

Merchant 1571

Chapter 1571: Incomplete Morbius!

Moreover, Soul Remember Gift could be used on feys, but what about spirit qi professionals?

Lin Yuan asked, "Rememberling, when you searched for dead souls in the lava zone, you found the souls of many dead spirit qi professionals. Can you use their souls to create soul imprints?"

When Rememberling heard what Lin Yuan said, the soul imprints on its body immediately started to move, and the personification of the spirit qi professionals' souls lit up on Rememberling's body.

Rememberling picked one of the brighter spirit qi professional souls and made it into a soul imprint that it pushed onto its tail.

The soul imprint formed from the spirit qi professional's soul was much smaller than the ones from the souls of feys.

Lin Yuan could understand this because most of the soul imprints on Rememberling's tail that came from the souls of feys were Myth Breed, and spirit qi professionals naturally had weaker soul power than feys.

Since he was only testing his hypothesis, Lin Yuan did not care what kind of Willpower Rune the soul had comprehended.

Lin Yuan instructed, "Rememberling, apply the soul imprint on me."

Rememberling gently lifted its tail and rested it on Lin Yuan's head.

The soul imprint entered Lin Yuan's body, and he suddenly realized that a faint sense of comprehension was coming over his spirit.

Apparently, it was impossible to use a soul imprint from a spirit qi professional to comprehend a Willpower Rune.

But once a person's comprehension of Willpower Runes reached a peak and just needed a little push, the comprehension from the soul imprint would do just the trick.

Lin Yuan looked at Rememberling in shock.

Both Rememberling and Genius were forbidden beings. No one could find out about them!

Rememberling was like a key, and anyone who had control of it would be able to use it to unlock the road to heaven or hell.

If Lin Yuan kept Rememberling's Soul Remember Gift a secret, he might be able to disregard the lives of spirit qi professionals as nothing more than tools to increase his power like Di Wanmi had.

Eventually, Lin Yuan calmed down and swore that he would never use Soul Remember Gift to kill spirit qi professionals.

However, he would still kill any enemies that crossed his path and use Soul Remember Gift on them.

Lin Yuan was definitely not someone who showed mercy to his enemies, especially at a time like now when the entire world's structure was about change.

Rememberling's existence would benefit all the feys in the Spirit Lock spatial zone.

Even if some feys lacked natural talent, Soul Remember Gift would be able to help other feys slowly achieve comprehension and evolve into Fantasy or Myth Breed.

Lin Yuan was in no rush to return Rememberling to the Spirit Lock spatial zone.

Instead, he took out spirit qi crystals and said, "Rememberling, absorb these spirit qi crystals! I will evolve you to Diamond grade now."

While talking, Lin Yuan crushed a handful of spirit qi crystals.

The spirit qi wrapped around Rememberling and caused its grade to start to increase.

When Rememberling's power reached Gold, the entire Spirit Lock spatial zone started to shake.

Lin Yuan could sense that the Spirit Lock spatial zone was expanding, and he hurriedly left the Spirit Lock spatial zone with Rememberling.

Outside the Spirit Lock spatial zone, Rememberling's grade climbed continuously.

As Morbius evolved to Gold, the Spirit Lock spatial zone continued to expand, and it quickly reached 320 square meters.

This size was enough for Lin Yuan to put more things in the Spirit Lock spatial zone.

The increase in the size of the spirit pool and Pure Land of Bliss would also bring Lin Yuan greater benefits.

At that moment, a familiar voice that he had not heard in a long time said into his ear, "Partner, long time no see."

Lin Yuan immediately smiled brightly when he heard this voice.

He excitedly activated his spiritual energy and started communicating with Morbius. "Morbius, I guessed that you would wake up when you reached Gold grade."

Morbius's calm voice was warm as it replied, "Partner, you grew quickly. You evolved me to Gold grade so soon. Now that I'm Gold grade, I gained a memory. It seems that the current me is incomplete."

When Lin Yuan heard what Morbius said, he looked down at the Morbius bracelet on his wrist.

He had noticed some time ago that there were numerous small holes on the crimson and bronze Morbius bracelet.

It was likely that the small holes were meant to be embedded with something.

“Morbius, is there meant to be something embedded in the holes?”

Morbius shook its head and said, “Partner, it seems that the things in the holes can be replaced. However, for now, I’m not sure what is meant to be in the holes. I might be able to sense it when I encounter it. If these small holes can be filled up, you will be able to represent each of the feys you spirit-locked with one of the holes. This will remove the limit of the Spirit Lock.”

Lin Yuan was momentarily silent when he heard what Morbius said before he asked in surprise, “By the Spirit Lock’s limit, do you think that I will be able to spirit-lock other feys besides ones with only Normal abilities?”

Morbius nodded and replied, “You’re right.”

Now that he had Morbius’ definitive answer, he suddenly felt as though he was raising a group of children.

His children used to be disabled and trapped in wheelchairs. But now, he suddenly found out that they could stand up and become normal again.

Lin Yuan had put a lot of effort into nurturing all of the spirit-locked feys and helping them evolve under the best circumstances.

Lin Yuan had always been curious about what the Jasmine Lily, Blackie, and Purple Afterglow’s other abilities were.

Chapter 1572: Morbius’ New Thing!

Previously, Lin Yuan only had pure curiosity and no way of finding out the answers.

But now, he just needed to find the things that could fill the holes in the Morbius bracelet, and he would be able to see what the Jasmine Lily, Blackie, and Purple Afterglow’s other abilities were.

“Morbius, when the Radiance Hundred Sequence selection is over, I will take you to find the things that can fill the holes. Even if you can’t find what it is, we’ll still sweep the main world and dimensional worlds. I believe that we’ll eventually find it.”

A smile appeared on Morbius’ stern face, and it said, “Partner, sorry to make you work so hard.”

Morbius was a fey.

!!

Lin Yuan felt that Morbius had been his companion ever since he was born into this world, and a deep bond linked them. Morbius felt the same way about Lin Yuan.

No one felt as deeply for Lin Yuan as Morbius in this world.

However, Morbius was still a lifeform, and every lifeform wanted to trace its roots.

“Partner, the day will definitely come that I’ll complete you. You will be able to learn all the secrets about yourself,” said Lin Yuan.

Lin Yuan spoke with certainty, and it sounded like a promise.

Morbius' heart warmed when it heard what Lin Yuan said.

Morbius said softly, "Partner, I will do everything to protect you for the rest of this life."

At that moment, a thought seemed to strike Morbius, and it said, "Partner, I used my source power to fuse and produce the Sacred Sword Wielding Queen. My Spirit Lock spatial zone can produce pure spirit qi because the spirit pool can distill and purify spirit qi from the energy ores.

"Frankly, I think my roots' power suits sacred source lifeforms. I think I can even change the energy within sacred source lifeforms at will. I think the thing I need is more likely to come from the dimensional worlds."

Lin Yuan nodded slightly when he heard what Morbius said.

Morbius' words gave Lin Yuan a range, which made it much easier for Lin Yuan to proceed.

Lin Yuan decided that after the Radiance Hundred Sequence selection ended, he would immediately head to the Startling Lines Continent to get a hold of matters.

He needed to focus on developing the marsh world before the main world was thrown into chaos.

Lin Yuan would not have a chance to use abilities besides the Normal abilities of the feys he had spirit-locked during this Radiance Hundred Sequence selection.

However, Lin Yuan hoped that his spirit-locked feys would be able to shine to their greatest extent during the Major Federation Meeting.

"Morbius, you should be able to sense that there are two souls in my brain. They are currently separate but can be combined. But the soul from my previous life and my current soul are my soul. I think my soul can contract another sacred source lifeform."

"Partner, you can indeed use your soul to contract another sacred source lifeform. However, your first sacred source lifeform is formed from a combination of two sacred source lifeforms.

"The Grace Queen is the main lifeform, and it is rather special. The aura of its roots is much higher than that of the Sword of Service. I was the one who fused the two sacred source lifeforms. It has more soul power than a regular sacred source lifeform.

"But, you have been allowing me to allocate your spiritual power, so I can allocate my soul power to you too. Once your soul power increases and overlaps with my soul power, each of your two sacred source lifeforms will be able to contract a sacred source lifeform of its own."

Lin Yuan remembered the Moon Empress telling him that people with extremely talented souls could contract two sacred source lifeforms.

Both of his souls would be able to contract two sacred source lifeforms. This meant that he would be able to possess four sacred source lifeforms.

Moreover, these sacred source lifeforms could all be formed from two sacred source lifeforms like the Sacred Sword Wielding Queen was.

Lin Yuan happened to learn the secret behind sacred source lifeforms in the marsh world.

It seemed that it was now necessary for him to make the trip to the Palace of Everything so that he could choose two sacred source lifeforms that were suitable for him and fuse them.

Chapter 1573: Lin Yuan's New Support Method

Lin Yuan was exhilarated when he saw such a great expansion.

When Morbius had been Silver grade, the Spirit Lock spatial zone was already huge.

It had come far from its initial 80 square meters. It had been difficult to ration out every inch of space.

When he returned to the Spirit Lock spatial zone, Lin Yuan noticed that the Spirit Lock spatial zone had grown larger, and the spirit qi had also become much more concentrated.

He could tell that the feys in the Spirit Lock spatial zone that could produce weather and the Wind Speed Rapid Antelope were visibly changing.

!!

The Wind Speed Rapid Antelope had started to shed its short fur, and new fur was growing out.

Although its bloodline had not transformed, its aptitude had clearly increased after being nourished by such spirit qi.

However, the biggest changes happened to Genius and Chimey.

Genius and Chimey could only grow to such an extent because of pure spirit qi.

Genius and Chimey's fur and feathers had hidden their skin by now.

Lin Yuan had experienced this situation many times.

After Lin Yuan took a nap and woke up, he saw that the hair that Genius and Chimey shed already took up a large part of the space on the bed.

Lin Yuan was very glad that he had evolved Morbius' grade first.

Now, Genius and Chimey could be nourished by even purer spirit qi and improve their bloodlines. Their bloodlines would be more fully evolved when they evolved to Fantasy V.

Lin Yuan had not decided what the next fey he was going to spirit-lock was.

He did not have many Willpower Runes left over.

Thus, he either had to contract a fey like the Remembrance Soul Whale that he would eternally regret not contracting or a suitable one like the Jasmine Lily.

However, the former of the two choices was better.

Now that Morbius was awake, Lin Yuan did not need to rush to evolve its grade.

After Genius and Chimey's bloodlines were evolved, they would emerge from the pile of fur on their own.

Lin Yuan knew that he should not disturb Genius and Chimey.

He thought about the new item that Morbius mentioned.

Without Morbius having to guide him, he noticed a well next to the spirit pool.

Lin Yuan rushed over to the well and saw that it was bone dry.

Morbius walked over to Lin Yuan and said with a smile, "Partner, I think this well will be useful to you."

Morbius started to explain, "This is called the Element Well. It can increase the activation period of elemental energy. The various elemental energies will be evenly distributed in the Spatial Lock spatial zone. The water in the well can also dissolve elemental energy and increase the property of elemental energy.

"However, there is a limit to the well water. The well water needs to be slowly replenished using the spirit qi in the Spirit Lock spatial zone. At most, only half a bowl can be added each day. The Element Well can appear on the Pure Land of Bliss if needed. However, every second that it remains on the Pure Land of Bliss will use up a certain amount of well water."

Lin Yuan was stunned for half a minute when he heard what Morbius said.

Next, surprise spread across his face.

Currently, Lin Yuan wielded water-, fire-, earth-, wind-, and dark-elemental energy.

The water-, wind-, earth-, and fire-elemental energy came from the four Elemental Shellfish, while the dark-elemental energy came from the Dark Crystal Armored Insect.

There were many types of elemental energy.

As of now, Lin Yuan had no way of obtaining many elements like gold, wood, light, and lightning.

But Lin Yuan just needed to find the right spiritual ingredients and pour them into the Element Well to obtain concentrated elemental fluids.

The Element Well could evenly distribute different types of elemental energy to the surroundings.

This made Lin Yuan feel that the Spirit Lock spatial zone had become a miniature world.

Feys could not solely depend on increasing the purity of spirit qi to grow. They also needed elemental energy.

When special feys like the Sunlight King Lotus used light-elemental energy, they could replicate the light of the sun.

If the Spirit Lock spatial zone continued to grow larger, possibly forever, it could become a paradise for spirit qi professionals.

The Element Well would not only allow Lin Yuan to gain elemental fluids but would also enable Lin Yuan to produce heavenly-maiden-grade elemental pearls with purer elemental energy. This broke through the shackles that the world placed on feys.

The Element Well's appearance also allowed Lin Yuan to gain a new support ability.

When the Pure Land of Bliss was treating the roots of injured feys, the Elemental Well would become an aid station that further helped the feys.

If an enemy sealed off a certain type of elemental energy, Lin Yuan would still be able to create a perfect elemental environment.

This was an ability that not even sacred source lifeforms dared to say they had.

This ability that encompassed all types of elemental energy was shockingly strong.

However, this would continuously use up the Element Well's water.

Now, the well was utterly dry.

Morbius said that only half a bowl of water would be added to the Element Well per day.

Lin Yuan felt that at this rate, it would take forever just for the bottom of the well to be covered.

The appearance of the Element Well changed Lin Yuan's understanding of Morbius.

Morbius was destined to have endless possibilities.

However, this did not mean that the Elemental Shellfish's elemental pearls were useless. But, they were no longer going to be the best source of pure elemental energy that Lin Yuan possessed.

However, the heavenly-maiden-grade elemental pearls were still the most valuable resource for trade that Lin Yuan had.

Suddenly, Lin Yuan noticed that there were sounds coming from the piles of white fur and blue feathers.

Soon, a white cat and a light blue bird emerged from the piles of fur and feathers.

The cat climbed up to Lin Yuan's shoulder while the other one flew up to his ear.

Lin Yuan realized with shock that their bloodlines had clearly not changed, but they had transformed drastically.

Chapter 1574: Chimey Causes Trouble

Lin Yuan would not have dared to acknowledge them if he was not very certain that they were Genius and Chimey.

Genius and Chimey's changes were similar to what had happened to Lin Yuan when he consumed the Silver Stamen Gold Luster Cassia nectar.

Before he consumed the Silver Stamen Gold Luster Cassia nectar, there were still impurities in his body. It was inevitable that some impurities could not seep out of his skin.

But after he consumed the Silver Stamen Gold Luster Cassia nectar, his aura, features, and figure had not only changed significantly, but he even grew taller.

Genius was still white. But previously, it had been white like snow and faintly silver. But now, it was white like the shade of ivory that only existed in imagination.

!!

Genius' light blue eyes used to resemble Paraiba. But now, it was dark blue like topaz. Now, its eyes were so blue that they seemed to absorb all other blues, and it made Genius appear even wiser and more farsighted.

It still had eight tails. But previously, its tails resembled fox tails. Now, they had lost all of their volume and resembled eight ribbons that danced agilely in the air.

While most of Genius' changes took place to its aura, Chimey's appearance had fully transformed.

Although Chimey's feathers were still pale blue, its feathers were now constantly fluttering proudly.

The rising and setting of the sun would affect the movement of Chimey's feathers.

When the sun rose, its feathers would become bright gold and eventually resemble beautiful flames.

Chimey reminded Lin Yuan of the legendary vermilion bird from his previous life.

Yet, it was also different from the vermilion bird because the vermilion bird wielded fire-elemental energy, but Chimey's power lay with light and the heat naturally associated with it.

This ability was along the same line as the one that the Mother of Bloodbath gained from the Sky Sundial Jade Spider.

Now that Chimey's entire body was alight with gorgeous flames, Lin Yuan thought about the legend of the Golden Crow.

However, it was clear that Chimey was not only going down the path laid down by the Twilight Willpower Rune.

When the sun set, Chimey's feathers would darken.

This was a characteristic that Chimey had never displayed in the past.

The cloud patterns that sloughed off from Chimey's body crawled back onto Chimey's body after its feathers darkened.

Sound-type energy was intangible.

But now, Chimey could control the cloud patterns and manipulate them into musical notes. The musical notes could produce any sound that Chimey wanted by clashing the musical notes together.

With a wave of his hand, Lin Yuan used Source Sand's Close Guard Sand to form a wall of sand.

Lin Yuan said, "Chimey, try to use the musical notes to use Shatter Sound Attack."

Chimey collided the musical notes together, and each collision produced a sound hammer.

When the sound hammer hit the wall of sand, it broke into many smaller hammers that crashed through the wall.

Source Sand was now Fantasy V.

The wall of sand produced by Source Sand's Close Guard Sand should be able to easily handle the attacks of any of Lin Yuan's feys.

Every time the other feys evolved, Source Sand would help them to test their new powers.

It was clear that Chimey was not using its full power when it collided the musical notes together and used Shatter Sound Attack.

Although the wall of sand broke under Shatter Sound Attack's second attack, this did not mean that Source Sand was weak but that Chimey had become stronger.

However, Chimey was not done with putting on an exhibition for Lin Yuan.

Many musical notes fell from Chimey's feathers and started to crash together when Chimey flapped its wings.

The bounce of every musical note produced a sound hammer each time they hit against each other.

When he saw the numerous sound hammers, alarm bells rang in Lin Yuan's head.

He hurriedly injected a large amount of spiritual power into Source Sand.

Layers upon layers of walls of sand shot up.

Lin Yuan lost count of how many sound hammers there were, but there had to be at least ten thousand of them.

The Shatter Sound Attacks bulldozed through the first wall of sand.

Luckily, some Shatter Sound Attacks broke apart after breaking through the first wall.

This barrage of sound hammers was much weaker than the first attack.

But when the thousands of sound hammers slammed into the sand walls, the power was so explosive that it immediately detonated seven walls of sand.

Granules of sand littered the Spirit Lock spatial zone.

Luckily, Lin Yuan had used a shield of Close Guard Sand to protect all the other feys in the Spirit Lock spatial zone. Otherwise, Chimey would even have blown up its own nest.

By now, even the block-headed Chimey was aware that it had caused trouble.

Chimey just wanted to show Lin Yuan its new ability, but it had not intended to cause damage.

But at this moment, Chimey did not even have the strength to apologize because the final usage of Shatter Sound Attack had sapped all of its spiritual power.

Luckily, the last usage of Shatter Sound Attack had been weaker because of Chimey's lack of spirit qi.

Otherwise, the thousands of sound hammers would have been difficult for even Lin Yuan to fend off.

He would have had to use Di Wanmi to step in to protect him.

Lin Yuan looked at the exhausted Chimey with exasperation and injected a shot of spirit qi into Chimey.

However, Chimey's body was so empty of spirit qi that it would take some time to activate the cells that had been wrung dry of spirit qi.

After recovering slightly, Chimey looked at Lin Yuan and the rest of the Spirit Lock spatial zone apologetically and said, "Yuan, I'm sorry. I will never again flippantly use an attack if I don't know how strong it is!"

Lin Yuan reached out and ruffled the feathers on Chimey's head as he replied, "Chimey, you're lucky that you tested out the ability in the Spirit Lock spatial zone."

If they had not tested it and used it for the first time in battle at full force, the thousands of sound hammers could even produce an effect that rivaled Lin Yuan's Sword Skills.

Chapter 1575: Kick Up a Wind, Antelope!

Thus, Lin Yuan assigned Chimey to a half-attack and half-support role.

On the battleground, Chimey could use Shatter Sound Attack to counter controlling tactics.

Although Shatter Sound Attack was intangible, feys could determine the positions of Shatter Sound Attack by sensing the pressure in the air.

However, Chimey could use Shatter Sound Attack to control the direction that its enemies took.

If the other party tried to use force, it would be subjected to a barrage of attacks from the sound hammers.

!!

Moreover, Shatter Sound Attack was only sound and used to be an insignificant ability.

It was only when Chimey evolved to Diamond grade and gained the ability Clear Zither Change Voice that Lin Yuan started to see Shatter Sound Attack as important.

Sunlight Rays would be able to weaken a target while increasing the feys' agility. It was a perfect fit with Red Thorn.

Nirvana Light Swansong could save one from death.

With its other exclusive skill to create a positive environment and another to absorb the sun's power, Chimey was almost perfect at that moment.

Lin Yuan was curious about how Chimey was going to change after it awoke its bloodline.

The evolution of a fey's bloodline was split into two types.

The first was to evolve according to the fey's original bloodline. This evolution would not cause the fey to change its name and type after the evolution.

But if a bloodline was changed fundamentally, the fey's name and type would likely change after the evolution.

Chimey and Genius had been following their original bloodlines.

At that moment, Genius said, "Yuan, my spiritual energy was previously strengthened. But now that I evolved to Diamond grade and my tails changed, something new has happened."

Previously, Genius' ability Tail Trigger would use soul energy to sacrifice a tail and multiply the soul power.

This ability used up Genius' tails to increase its soul power but would damage its roots.

After asking Genius, Lin Yuan found out that the spiritual power in its head only took up a small portion of its total spiritual power.

Most of the storage space in Genius' head was taken up by soul power.

Genius' right tails were moving storage spaces for spiritual energy.

This was why using up one of the tails would increase its soul power.

Each time Genius used up one of its tails, it would need to rest and recover for many months.

This would also affect Genius' usage of Connected Tails.

If it sacrificed too many tails at once and its spiritual energy was seriously depleted, Genius would forget a portion of the knowledge it stored to protect itself.

However, Lin Yuan did not want to see this happen.

Hence, he never thought about asking Genius to use Tail Trigger.

Genius went on to say, "Yuan, using Tail Trigger in the past would have required me to sacrifice my tails. But now, I can use my own spiritual energy to create substitute tails that usually won't be visible. But every time a tail is used up, the substitute tail will grow rapidly to fill the gap. However, I will need to absorb a large number of spiritual ingredients every day to create a substitute tail."

Lin Yuan looked delighted when he heard what Genius said.

If this was true, he would finally be able to start making use of Tail Trigger and not have to worry about incurring any negative consequences because there would be substitute tails to protect Genius.

As for spiritual ingredients, Gao Feng had taken over the Sea Bliss Clan, and the Angelfish of Bliss that Lin Yuan had tampered with had been returned to the Return from Faraway Mansion.

Lin Yuan used spirit qi to change the Angelfish of Bliss and return them to normal.

Lin Yuan had as many rainbow fish coats as he wanted and did not need to be afraid of running out.

Lin Yuan stored the 10,000 rainbow fish coats sent over from Gao Feng in a fey storage box. He handed the fey storage box to Genius and said, "Genius, use these fish coats. I'll give you more when you use them all up."

Genius looked inside the fey storage box and said in a child-like voice, "Yuan, I should be able to produce two substitute tails with these fish coats."

If other spirit qi professionals heard what Genius said, they would start spluttering with shock.

What a waste! 5,000 fish coats cost an arm and a leg!

When the Sea Bliss Clan was still around, they would sell one fish coat for 80,000 Radiance dollars at least.

Moreover, they would most likely have to sink a large sum of money to obtain a fish tablet of a respectable grade.

5,000 fish coats would cost an average of 400,000,000 Radiance dollars.

No spirit qi professional would be able to afford such a cost. Even the disciples of top factions would be reluctant to spend such an amount.
