

Merchant 431

Chapter 431: Showing Itself

Listen paused for a moment and said, "I think we should be able to find the flesh of the high-grade marine dimensional lifeform you wanted before in this sea market."

Upon hearing that, Lin Yuan's eyes lit up. He took a mask engraved with the pattern of the majestic sky city out of the Diamond fey storage box and put it on his face before saying, "The Zheng family should make a move on you on the night you return."

"Big Brother Liu and I will visit you early the next morning at the Listening Heron Chamber of Commerce's old mansion, and you'll take us to the Indigo Azure Sea Market."

As soon as Lin Yuan said that, the Mother of Bloodbath, Endless Summer, and Liu Jie all put a strange mask engraved with the pattern of clouds on their faces.

At that moment, the eyes behind Lin Yuan's mask displayed a sharpness that had never been shown before.

It was time for the Sky City, which had never shown itself before, to appear in the ears of the major factions.

...

In a study room with various Platinum feys and plants, a middle-aged man with sinister eyes was standing in front of the table.

All of a sudden, he viciously kicked at the youth who was kneeling on the ground with the same sinister eyes as him and snarled, "How did I, Zheng Jiangliu, have a son as stupid as you!"

The youth who the middle-aged man had kicked lowered his head, not daring to say anything.

At that moment, an old man standing beside the middle-aged man heartbreakingly glanced at the youth and said, "Master, Wenbo already knows his mistake. Besides, an expert who can kill Elder Niu without any surge is at least an emperor-class one. It's useless for you to blame Wenbo."

The old man's back was straight, and he spoke with a cedar-like aura.

When the youth on the ground heard the old man's words, he hurriedly said, "Father, listen to what Grandpa Jiao said. If an emperor-class expert really attacked Elder Niu, what could I have done?"

"Besides, I told Elder Niu to attack Listen because you said that you have Second Young Master's support on your side, and I wanted to quickly complete the mission you gave me."

"This is so that our third lineage's hard work can finally be paid for after so many years!"

When the sinister-eyed middle-aged man, Zheng Jiangliu, heard that his son was able to talk so much and find so many excuses, he actually wanted to send another kick. Nonetheless, he held back when he heard the later part.

The Zheng family's third lineage had constantly been collecting the near-shore coastal resources for several years but had not dared to really develop the resources.

This had also led to the suppression of the Zheng family's third lineage by the other three lineages.

The reason that his son had let Elder Niu attack Listen was to allow the third lineage to have complete control over Indigo Azure City's near-shore coastal resources as soon as possible. He would also have done the same himself.

However, Elder Niu's death had caused the third lineage to have one less pinnacle king-class expert. Moreover, Elder Niu was also good at scouting among the pinnacle king-class experts. Such an ability was very useful to a faction.

Such a loss was more heartbreaking to Zheng Jiangliu than simply losing a peak king-class expert.

Zheng Jiangliu glanced at his son on the ground with a lowered head and asked with a snort, "Do you have an understanding of the Listening Heron Chamber of Commerce's background?"

Zheng Wenbo froze for a moment when he heard his father's question but shook his head and answered, "The Listening Heron Chamber of Commerce has no background. If it did, how could it have been played by the Iron Wall Chamber of Commerce?"

"Their online and offline resources have been devoured without any ground to fight back."

Even after thinking all the way back to Indigo Azure City from the Royal Capital, Zheng Wenbo didn't think that Elder Niu had died at the hands of the Listening Heron Chamber of Commerce.

Although Zheng Wenbo vaguely remembered that Bi Chenghu and Bi Chengxiong of the Iron Wall Chamber of Commerce had told him that the Listening Heron Chamber of Commerce had found a backer, he felt that the Listening Heron Chamber of Commerce was lying.

Otherwise, Bi Chenghu and Bi Chengxiong would have suffered a calamity long ago, and it wouldn't have been Elder Niu's turn.

When Zheng Jiangliu heard his son's words, he knew that his son had done nothing on the trip to the Royal Capital.

The pinnacle king-class expert by his side had died, yet he didn't even know who he had offended. Elder Niu had really died in vain!

"Listen has returned to Indigo Azure City from the Royal Capital. He's now in the former old mansion of the Listening Heron Chamber of Commerce.

"The person I sent there three hours ago has not returned yet.

"Listen, however, is still alive and well!"

Zheng Jiangliu's words made Zheng Wenbo's pupils shrink.

So Elder Niu had actually died at the hands of the Listening Heron Chamber of Commerce.

However, no matter how Zheng Wenbo thought about it, he couldn't understand how the Listening Heron Chamber of Commerce had such ability. Why did they have to endure the Iron Wall Chamber of Commerce's trampling?

However, all the facts were there, and Zheng Wenbo had to believe them.

The old man with a straight back suddenly said, "Master, why don't you let me test how strong this Listening Heron Chamber of Commerce is?"

As he spoke, the old man's cedar-like aura became even stronger, and it carried an indefinable sense of sharpness that was extremely difficult to distinguish.

Zheng Jiangliu hurriedly replied, "Uncle Jiao, there's no need to trouble you. Your main fey, the Cold Snow Pine, is now faintly about to break through to Myth II and take its human form.

"Don't let these trivial matters delay your main fey from going to endure the upcoming World Cleansing."

As Zheng Jiangliu spoke, he had a more sinister look in his eyes.

The old man with a straight back responded, "Master, if we can't take down the Listening Heron Chamber of Commerce's shallow near-shore sea before the dimensional rift's revolt, I'm afraid we won't be able to explain it to Second Young Master."

When Zheng Jiangliu heard the word 'Second Young Master', his sinister gaze revealed scruples and plans.

Zheng Jiangliu answered in a deep voice, "Since Second Young Master's side wants to have 50% of our third lineage's shallow near-shore sea, I think Second Young Master won't stay by and do nothing if I have difficulties."

...

Lin Yuan was currently sitting side by side with Liu Jie in a special guesthouse and eating the special barbecued seafood.

At that moment, a message notification appeared on Lin Yuan's cell phone. Lin Yuan took a look at his cell phone and found that it was as he had expected.

The Zheng family had sent another king-class expert to assassinate Listen.

There were just less than five days from the next dimensional rift riot period, leaving Lin Yuan not much time to explore the Listening Heron Chamber of Commerce's shallow near-shore sea.

For Lin Yuan, the easiest way to explore the shallow near-shore sea was to have Red Thorn spread the sea of flowers underwater.

The sea of flowers spread by Red Thorn's ortet was equivalent to a part of Red Thorn's body. Lin Yuan could completely use it as his eyes to explore the shallow near-shore sea.

Chapter 432: Wind Speech Sparrow

Before he could spread Red Thorn's sea of flowers underwater to uncover the secrets of this shallow near-shore sea, Red Thorn undoubtedly needed to devour more flesh of Gold water world dimensional lifeforms so that its water-type exhalation ability could be inherited from the ortet to the child ramet.

This all depended on whether he could purchase the flesh of Gold water world dimensional lifeforms at tomorrow's Indigo Azure Sea Market. Lin Yuan was looking forward to the Indigo Azure Sea Market the next day.

He needed to gather the resources that he needed to use before going to bed.

Each Indigo Azure Sea Market was the accumulation of ten years of Indigo Azure City, a giant city by the sea. Therefore, if there were any precious feys or rare spiritual materials in the Indigo Azure Sea Market and he couldn't get any bargaining chips, it would be embarrassing for Lin Yuan.

At that moment, he noticed Liu Jie, who was eating the charcoal-grilled octopus balls, frowning more and more. After chewing the last octopus ball on the stick and swallowing it, the corner of Liu Jie's mouth twitched, revealing a hint of disdain.

Upon seeing that, Lin Yuan hurriedly asked, "Big Brother Liu, is there any problem?"

Liu Jie first nodded and then shook his head. Immediately afterward, Liu Jie replied, "The store owner added some seaweed to this octopus ball. If the seaweed was boiled in water, it'd taste better after dipped in sauce.

"But apart from the octopus fat in this octopus ball, the store owner also added some lard, which makes the freshness of the seaweed fishy.

"Furthermore, the octopus tentacles in the octopus balls are too shredded. It's not al dente when chewing.

"Also, in the honey sauce of the barbecue brush, there's obviously too much water added to the Flower Spot Bee's honey, resulting in the honey sauce not becoming mellow enough."

Lin Yuan froze as he heard Liu Jie say so much. This special guesthouse was very famous in Indigo Azure City, and the special barbecued seafood was even its signature dish.

Although it didn't feel as good as the meat skewers Liu Jie grilled inside the mansion, it was still okay.

Liu Jie was a great chef, after all. He could find so many shortcomings in the octopus balls with just a casual tasting—what a good tongue.

At that moment, Lin Yuan noticed the hand of the lady boss, who was standing near his table and pouring snow-clam soup to the customers on another table, had frozen. Apparently, this lady boss had overheard their discussion, and the warm smile on her face had frozen a bit.

Lin Yuan didn't think there was anything wrong with the taste of these octopus balls. But after listening to Liu Jie's review and then tasting the octopus balls, Lin Yuan instead tasted the taste of lard within.

Based on Lin Yuan's experience of eating Black Back Mountain Boar all year round, the lard inside the octopus balls obviously came from the Black Back Mountain Boar.

This made Lin Yuan couldn't help but feel that these octopus balls were more delicious.

After eating the special barbecue in the guesthouse Lin Yuan and Liu Jie hurriedly soaked in the hot spring and left the lady boss' sight.

The lady boss had been squinting her eyes and smiling like a weasel. Her smile was kind of treacherous.

Lin Yuan couldn't help but think of a saying, "Those with squinting eyes are either bigwigs or monsters."

Lin Yuan and Liu Jie each returned to their rooms, and after the former returned to his room, he entered his Spirit Lock spatial zone.

As soon as he did that, Lin Yuan felt that he was almost blinded by the Phoenix Perching Chinese Parasol Tree leaves.

Nearly 600 leaves sealed with the mid-grade strange flames were glowing with bright flames, causing the Spirit Lock spatial zone to be reflected as if it existed in an illusionary realm of aurora.

Chimey was sleeping on the bird's nest surrounded by the branches and leaves of the Phoenix Perching Chinese Parasol Tree. The speed at which it was absorbing the energy in the nest was obviously much faster than before.

The energy transmitted by the Phoenix Perching Chinese Parasol Tree made Chimey's pale-blue feathers dyed with a layer of beautiful light.

Just like Chimey, Gray was eating or sleeping on the Cinnabar Sweet Osmanthus for the whole day.

At that moment, a trace of gray feathers disappeared from Gray's body. It had white feathers attached to its wings and a smear of red on the top of its head.

This red was more splendid than the flowers that the Cinnabar Sweet Osmanthus bloomed. However, this red was very light, obviously not fully developed yet.

Lin Yuan couldn't help but sigh, It's almost the end for Gray's genetic model and secondary development.

It now looks very graceful.

I wonder what it will look like after its genetic model is fully developed.

After sorting out in his Spirit Lock spatial zone, Lin Yuan found that rare resources he could take out were actually completely jade-textured wood and the heavenly-maiden-grade elemental pearls. He didn't plan to trade out the source-type items that he had gotten before again.

Lin Yuan had previously given all the completely jade-textured wood to Hu Quan. It would take a few days for the new batch of completely jade-textured wood to mature.

Thus, what he was able to spend at will now were the two large brocade boxes of fire-type heavenly-maiden-grade pearls that he had collected recently.

He stored them in his amber-button-shaped Diamond fey storage box and took out five feys, which he had previously gathered in the Endless Forest's depths.

Most of the people that peddled supplies in the Indigo Azure Sea Market were the spirit qi professionals living in Indigo Azure City. They lived with the sea, and their flying feys and aquatic feys were the most precious to them.

While wild harvesting in the Endless Forest, Lin Yuan had not obtained any aquatic feys, but he had a lot of flying feys. The five flying feys he took out were exactly five of the same species, the Wind Speech Sparrows.

He had saved these five young birds from the mouth of a Giant Tree-Resting Viper. While doing so, he had also collected the Giant Tree-Resting Viper.

When he had saved those five young Wind Speech Sparrows, they were obviously dying of hunger. This meant that their parents had not returned to the nest for at least two days.

When the Wind Speech Sparrows were nurturing their young, they would never leave too far away from the nest.

This showed that these two adult Wind Speech Sparrows had become food for other predators while foraging for food.

After these five young Wind Speech Sparrows saw Lin Yuan, they immediately rejoiced and then manipulated the wind element to simulate human-like sounds.

It was just like how Lin Yuan heard 'Hello dad' five times now.

Upon hearing that, Lin Yuan touched the five little bird's heads affectionately and said, "Daddy will promote your grade and quality and sell you five little guys at a good price."

Chapter 433: Creation Breed

It wasn't easy for feys to interact with humans. Many feys wanted to interact with humans normally and even had to be promoted to Suzerain to do so.

It was a rare thing for Wind Speech Sparrows to use the wind to simulate sound to communicate with humans when they were at Normal.

Furthermore, after the Wind Speech Sparrows reached Bronze, they would evolve into Wind Chain Sparrows.

The Wind Chain Sparrows could manipulate the wind element to form chains to bind and pull on the target. It was considered a kind of support-type fey with stronger control abilities.

High-grade Wind Chain Sparrows' Wind Chains could even help the contractor catch feys or spiritual materials at the bottom of the sea.

For spirit qi professionals who made a living at the seaside, it was a rare fey.

Even if Lin Yuan could raise these five Wind Speech Sparrows to Bronze/Epic, it couldn't help them grow better.

Therefore, finding five good owners and five suitable Willpower Runes for them was also a way to find the best future for these five Wind Speech Sparrows.

Lin Yuan channeled his spiritual power and injected a large amount of spirit qi into their bodies. When these five Wind Speech Sparrows' grades constantly rose until they reached Elite/Epic, Lin Yuan found that his palm was obviously a bit crowded when he held up these five little guys.

Their feathers were not really gorgeous. All of them had a light-greenish hue, with a black line on their back.

When Lin Yuan broke through these five Wind Speech Sparrows' grades from Elite to Bronze, they underwent a rapid metamorphosis.

Lin Yuan saw that the four of the five little guys on his palm were still light green, but the feathers on their bodies became as strong as bone plates. Their sharp beak and claws also became sharper.

The black line on their backs grew a row of feathers that could greatly enhance their speed like the edge of a knife.

However, one of the Wind Speech Sparrows' bodies suddenly turned white when it reached Bronze, while the rest of its body was not much different from the other four Wind Chain Sparrows. Lin Yuan knew that this Wind Speech Sparrow had mutated when it had been promoted.

He raised these five little fellows' grades and quality to Bronze X/Epic and used Morbius' True Data to check the white Wind Chain Sparrow's attribute.

[Fey Name]: Wind Net Sparrow

[Fey Species]: Ploceidae/Sparrow

[Fey Grade]: Bronze (10/10)

[Fey Type]: Wind

[Fey Quality]: Epic

After checking the attributes, Lin Yuan realized that the Wind Chain Sparrow had mutated into a Wind Net Sparrow.

In his opinion, he wasn't sure whether such a mutation should be described as good or bad. However, its benefits should outweigh the disadvantages.

According to its grade, the Wind Chain Sparrow could usually make a varying number of wind chains according to its grade to control and attack. However, the Wind Net Sparrow could throw out a wind net made up of wind chains.

Despite the large area of the wind net, it was less powerful than the wind chain. Nonetheless, the Wind Net Sparrow was undoubtedly more practical than the Wind Chain Sparrow for catching feys in the sea.

Lin Yuan chose the most suitable exclusive skill out of the three that had appeared for these four Wind Chain Sparrow and one Wind Net Sparrow.

Then he dragged his hand, and these five little guys flew into the sky. Lin Yuan found that they flew in the same way, with wings flapping so fast his eyes could only see a cloud of shadows, and he noticed something that dumbfounded him.

The five little guys were quarreling in the sky by using the wind element to simulate the human voice. Lin Yuan was a little dizzy. Where did they learn to curse? Was it maternal genetics?

He hurriedly stored them in the Diamond fey storage box. He originally wanted to find the same buyer for these five little ones so that they wouldn't be separated, but now it seemed that he was simply thinking too much.

These five little guys didn't have a deep relationship!

How many grudges had they accumulated in the nest over food!?

If Lin Yuan hadn't stopped it quickly, these five little fellows would probably have started a big fight.

When Lin Yuan left the Spirit Lock spatial zone, he found that the sun had risen in the sky of Indigo Azure City. He could clearly feel the humidity within this Indigo Azure City's guesthouse. However, there was a salty taste of the sea that was unique to the seaside city.

Just as Lin Yuan was about to find Liu Jie, he found that Liu Jie was standing at the door fully dressed like a guard.

When he saw Lin Yuan come out, Liu Jie handed over the cup of milkshake he was holding and said, "This milkshake is made with the antelope milk of the Gold fey, Mountain Leaping Antelope, with snow rice added inside. It's nutritious and filling.

"It's much better than the seafood porridge in the guesthouse. I just saw that the oyster meat of the seafood porridge was at the very least taken out last night and is no longer fresh."

While Liu Jie was talking, Lin Yuan noticed that the squinting lady boss and the squinting boss exchanged glances.

When the squinting lady boss poured the congee for a customer, she deliberately poured a few extra pieces of oyster meat. This made Lin Yuan feel a little weird.

After hurriedly leaving the guesthouse with Liu Jie, Lin Yuan and Liu Jie headed to the Listening Heron Chamber of Commerce's old mansion by a flying fey.

They were both wearing Hu Quan's strange masks made of completely jade-textured wood silk threads. The completely jade-textured wood silk thread processed from the Wood Weaving House Centipede's body had become somewhat different from the properties of completely jade-textured wood.

The completely jade-textured wood would emit a faint jade-textured luster even without spirit qi. In contrast, the completely jade-textured silk threads produced in the Wood Weaving House Centipede's body would not change significantly in a low concentration of spirit qi.

When it came to a high concentration of spirit qi, the completely jade-textured silk threads produced from the Wood Weaving House Centipede's body had a stronger jade-textured luster than the completely jade-textured wood itself.

At that moment, Lin Yuan suddenly heard the Mother of Bloodbath's peculiar yet pleasant voice.

"Help me buy more spiritual materials that contain blood energy in the Indigo Azure Sea Market. I'm going to advance to Myth III as soon as possible."

Upon hearing that, Lin Yuan replied without the slightest hesitation, "Okay. Tell me if you fancy any in the Indigo Azure Sea Market."

He naturally wouldn't refuse the Mother of Bloodbath's request. He remembered that not much time had passed since it had broken through to Myth II.

In such a short period, the Mother of Bloodbath was actually preparing to reach Myth III.

Wasn't this a little too fast?

The Mother of Bloodbath lurked between Lin Yuan's hair and made a decision. As Lin Yuan began to form his private faction, the Mother of Bloodbath discovered that it was still a little too weak.

There was a clear distinction between Myth II and Myth III. It could only be killed if it faced a Myth III enemy. However, as Lin Yuan constantly developed his faction, there might be a day all the enemies were pinnacle emperor-class experts!

At that time, if it was still at this level, it couldn't help Lin Yuan or perform the duties as a Path Protector.

The Mother of Bloodbath had always had a secret—it could enhance its strength by infinitely devouring blood energy!

It was for this reason that the Mother of Bloodbath had not remained a Diamond/Fantasy V for long and reached Myth I directly. Such a progression had almost caused it to perish under the World Cleansing.

This painful lesson had made the Mother of Bloodbath's grade that was higher than Endless Summer fall behind.

Now that Endless Summer was at Myth III, it might have a chance to see if it could pass the World Cleansing with Endless Summer's help and advance to Myth III.

If it succeeded in reaching Myth III, it could become a pinnacle Myth Breed fey by quickly devouring blood qi energy. That was also the degree of a pinnacle emperor-class expert.

At that time, it would be qualified to nurture the blood law into a small world of blood.

With the body of a Myth Breed, it would get its hands on Creation!

It would become a Creation Breed!

Chapter 434: The Hornless Dragon Bloodline

Early in the morning in the Indigo Azure Sea Market...

Lin Yuan was wearing a set of moon-white spirit qi clothing that looked very simple, with only a few subtle designs highlighting its uniqueness.

Under a closer look, he found this moon-white spirit qi clothing strung with many moon-white rice beads. These rice beads were coiled together to form five kinds of fortune patterns.

When Lin Yuan had previously given Hu Quan the completely jade-textured spiritual materials, that earliest batch had a long strip of white sandalwood that was simply too small. Hu Quan could only do a pair of chopsticks. Thus, this completely jade-textured white sandalwood had been left behind.

Wen Yu had seen the evolution of the Dragon-Phoenix Landscape Carp into the Mountain River Eternal Life Carp some time ago and had perhaps found some inspiration.

She had taken the remaining completely jade-textured white sandalwood and warm silk and had chosen five of the six fortune patterns on the Dragon-Phoenix Landscape Carp to make this set of moon-white spirit qi clothes.

It looked unusually low-key on Lin Yuan. At the same time, it made his youthfulness graceful.

Lin Yuan looked at the many stalls and in front of him and couldn't help but sigh a little. There were simply too many stalls in the Indigo Azure Sea Market!

These stalls were like a maze, all clumped together. It would take an unknown amount of time to walk out of this sea market.

Lin Yuan had thought that the Indigo Azure Sea Market would be like most trading markets, which were dirty and noisy. However, this Indigo Azure Sea Market not only looked clean, but it also didn't have any strange smell.

Although he smelled nothing strange, Genius that Lin Yuan held in his arms scrunched its nose and said cutely, "Yuan, the fishy smell here is so strong. I can't breathe!"

Lin Yuan hurriedly took a mint leaf out of the Diamond fey storage box, used his finger to whisk out its juice, and put it on Genius' nose.

When Listen heard Genius' words and saw that Lin Yuan was twitching his nose as if he was distinguishing the fishy smell Genius was talking about, he explained, "The Indigo Azure Sea Market is the biggest official event of Indigo Azure City every decade. Thus, the Indigo Azure Guards will set up the venue in advance and let the Shellfish Vapor Corals release shellfish vapor before it opens.

"This affects the spirit qi professionals who buy, sell, and trade in the Indigo Azure Sea Market and allow them not to smell any odor.

"Most feys have a more developed sense of smell than spirit qi professionals and have stronger immunity against the Shellfish Vapor Corals' shellfish vapor, so they can smell what's in the market."

After listening to Listen's explanation, Lin Yuan felt that the Indigo Azure City's officials were really talented.

However, what was the difference between this and being afraid of smelling in a shithole without using one's nose to breathe but mouth?

Lin Yuan looked at Genius's sickly appearance and stored it back into the Spirit Lock spatial zone. He didn't understand. Genius was clearly a cat-species fey but had never liked to eat fish. It would hide far away whenever it smelled the smell of fish. On the contrary, it loved the meat of a Black Back Mountain Boar.

At that moment, he suddenly heard several violent hissing sounds. The source was not far away from his ears.

Lin Yuan looked in the sound direction and saw three blood-red snake-species feys locked in an iron cage. They were furiously hitting the iron cage with their bodies.

However, when doing so, although the sound was loud, the iron cage was not damaged at all.

The vendor of the three blood-red snake-species feys hurriedly picked up the stone bowl at the side and sprinkled the yellow powder in it on the feys.

Upon feeling this yellow powder, the three blood-red snake-species feys were immediately worn out, and their hissing sounds were weakened a lot.

Liu Jie said with a sigh, "He actually used realgar to sprinkle on these three Red Water Blood Snakes. Such feys like them that rely on blood energy to live are most afraid of realgar.

"A large amount of realgar powder can vaguely damage the Red Water Blood Snakes' roots in a moment.

"If he sprinkles such a large amount of realgar three times, I'm afraid these three young Red Water Blood Snakes will die."

Lin Yuan frowned. The realgar would enter through the Red Water Blood Snakes' scales into their blood. They were feys that lived on blood, and the fusion of the realgar into their blood might only have a suppressive effect on other snake feys, but it was fatal to the Red Water Blood Snake.

Obviously, this vendor was not a Creation Master and didn't know much about such feys like the Red Water Blood Snake.

The vendor had probably just happened to catch them in the wild and was just in time for the Indigo Azure Sea Market. As a result, he sold them at the Indigo Azure Sea Market.

Although the Red Water Blood Snake was very rare, few spirit qi professionals would be willing to contract them. After nurturing them to become stronger, the surface of their scales would carry a layer of strong blood-clotting toxin.

It might not be harmful to the contractor, but it would affect the other contracted feys. Hence, the spirit qi professionals who contracted the Red Water Blood Snake couldn't contract other species of feys.

At that moment, the Mother of Bloodbath's peculiar yet pleasant voice sounded.

"Lin Yuan, these three Red Water Blood Snakes actually have a faint trace of hornless dragon bloodline. Quickly help me buy them!"

The Mother of Bloodbath clearly sounded urgent.

Lin Yuan didn't react to the Mother of Bloodbath's meaning when he heard that. If these three Red Water Blood Snakes had the hornless dragon bloodline, buying them would be a great bargain.

If the Mother of Bloodbath hadn't comprehended the Blood Law Rune, even if there were other Myth Breed feys of a higher grade than the Mother of Bloodbath here, they also probably couldn't sense the hornless dragon bloodline of these three snakes, just like the Mother of Bloodbath.

If the Mother of Bloodbath wanted to break through to Myth III, it undoubtedly would need a large amount of blood qi energy.

The blood energy in these three Red Water Blood Snakes was simply too scarce and undoubtedly not the least bit useful to the Mother of Bloodbath.

Did the Mother of Bloodbath want to buy these three Mother of Bloodbath and treat them as spicy sticks?

As if the Mother of Bloodbath had sensed Lin Yuan's strange expression, its peculiar yet pleasant voice explained with a trace of helplessness, "I don't want their blood energy. I want to nurture them."

Upon hearing that, a strange thought suddenly flashed through his mind!

The Mother of Bloodbath wasn't going to carry out the plan of nurturing three bad husbands at the same time, right!?

Chapter 435: Mother of Bloodbath Under True Data

These three Red Water Blood Snakes would not take a short time to nurture, and their genders were unknown. What if she raised her husbands into sisters?

God damn it! This is simply a big loss!

At that moment, Lin Yuan heard the Mother of Bloodbath say, "I can finally use the exclusive skill that I comprehended after becoming a Myth Breed."

This was now Lin Yuan's second time hearing the Mother of Bloodbath mention its exclusive skill.

He had previously heard it mention its exclusive skill on the Long-Backed Swan's back.

At that time, the Mother of Bloodbath had said that it was good at stealth with its exclusive skills.

Lin Yuan had not used Morbius' True Data to check the Mother of Bloodbath's exclusive skills.

This time, he couldn't resist his curiosity and used it!

[Fey Name]: Mother of Bloodbath

[Fey Species]: Tarantulas/Chelicerata

[Fey Grade]: Suzerain (7/10)

[Fey Type]: Blood

[Fey Quality]: Myth II (Blood Law)

Abilities:

[Execution Sting]: Through the eight sharp chelicerae, the blood energy is injected into the target to control the target's blood.

[Eyes of Senluo]: The spider eyes look directly at the core of the blood inside the target and anticipate the target's next movements based on the blood flow.

[Eight Direction Blood]: Shock and solidify the blood inside the target's body and damage the target's body using the change of blood form while controlling the blood to flow of the target's body through its eight apertures.

[Spider Form Attachment]: Condense its own blood energy into a blood core, which can overload the attacks from the outside world.

[Blood Grip]: When manipulating the blood in the target's body, it can briefly control the target's body for movement through the blood flow.

[Blood Embrace]: The surrounding blood energy will be devoured into its own body. It will briefly improve its strength and slowly recover from injuries through blood energy.

Exclusive Skill:

[Desire Spider Form]: Increase its affinity for blood energy so that its body will not reject excessive blood energy but will transform it into a new sac to store the blood energy. After devouring the blood energy for purification, the blood energy can be absorbed directly into its body.

[Concealed Spider Shadow]: Stop the flow of its own blood energy, conceal its aura, and transform into the form of 'nothing'.

[External Blood Bone]: The chelicerae will be fused into other young feys' bodies so that the feys can become its own blood bones. The strength of the external blood bone cannot be higher than its own strength.

After Lin Yuan saw the Mother of Bloodbath's attributes, he didn't know what to say for a moment.

Lin Yuan knew that when feys became Myth Breeds, the Willpower Runes would turn into Law Runes, and the power of the law would be added onto the fey's abilities.

Therefore, the abilities the fey had previously comprehended fused with the law it had comprehended to produce a qualitative change.

After looking at the Mother of Bloodbath's True Data, Lin Yuan knew that the red crystal spider that it had given him before was the blood core condensed from its ability, the Spider Form Attachment.

Lin Yuan seemed to understand why the Mother of Bloodbath was qualified to say it could reach Myth III when it had just reached Myth II.

Although the Blood Embrace ability that the Mother of Bloodbath had comprehended at Diamond was an enhancing and recovery ability, after it was combined with Desire Spider Form, the Mother of

Bloodbath could constantly devour blood energy and let the blood energy become its own strength without hindrance.

This was Lin Yuan's first time seeing the True Data of a Myth Breed fey.

After really seeing that, based on the abilities and exclusive skills, he knew how powerful Myth Breed feys were.

Those three Red Water Blood Snakes should be the feys that the Mother of Bloodbath was going to use to nurture into its external blood bones.

The Mother of Bloodbath's Myth Breed exclusive skill, the External Blood Bone, needed its chelicerae.

Spider feys would shed their chelicerae about once every 100 years. The Mother of Bloodbath needed three Red Water Blood Snakes, which meant that it was at least 300 years old now.

It was extremely rare for wild feys to reach Suzerain/Myth II in 300 years. This showed the Mother of Bloodbath's great potential.

Lin Yuan went straight up to the vendor and asked, "Boss, these three snake feys hissed loudly just now. They look quite energetic. How much are you selling them?"

The vendor's eyes lit up when he heard Lin Yuan's words. He hadn't opened his business until now.

The vendor hurriedly pointed to the large water tank next to the iron cage containing the Red Water Blood Snakes and said, "I mainly sell deep-sea Butterfly Shells. Look how big these Butterfly Shells are. The pearls inside must be of good quality.

"After these pearls are dug out, these two Butterfly Shells can be polished and hung on water-type feys to increase their speed of advancement."

Lin Yuan had long noticed the large water tank. However, he was not interested in the deep-sea Butterfly Shells and the pearls they produced.

The quality of the deep-sea Butterfly Shells in this tank wasn't as good as the ones he fed to Blackie. The deep-sea Butterfly Shells could increase the advancement speed of water-type feys because the Butterfly Shells had a weak ability to gather water elements. But this speed was simply too slow, and it was better than nothing.

Lin Yuan shook his head and still pointed to the three Red Water Blood Snakes before saying, "Boss, I want these three little snakes."

The stall vendor's face sank and replied, "These three snake feys are all Bronze. They're not worth it. If you want to buy them, buy five deep-sea Butterfly Shells in this tank, and I'll give you these three snake feys for free."

When Lin Yuan had previously seen this vendor sprinkle the realgar on the three Red Water Blood Snakes, he thought that this vendor shouldn't know about the Red Water Blood Snakes.

This vendor was supposed to do business. No matter how cruel he was, he would not be willing to let the feys he was selling be damaged.

Now it seemed that this vendor really didn't know about the Red Water Blood Snakes.

Although people rarely needed the Red Water Blood Snakes due to the blood-clotting toxin in their bodies, their price on Star Web was about 70 Radiance dollars.

Lin Yuan originally intended to buy these three Red Water Blood Snakes with 200 Radiance dollars. However, this stall vendor said that as long as he bought five deep-sea Butterfly Shells from the tank, he would give him the three of them.

This vendor was really making a loss!

Lin Yuan looked at the deep-sea Butterfly Shells in the tank and felt he needed to cheat with True Data!

Chapter 436: Black-Hearted Or Stupid?

At that moment, Lin Yuan heard this vendor knock on the tank and say, "Take a look at the price of these deep-sea Butterfly Shells first before you decide. You'll have to pay first at my stall."

Lin Yuan only saw a small blackboard attached to this large tank with the words: 10 Radiance dollars for one deep-water Butterfly Shell. No bargaining. Any bargainers will have their rice pot explode!

Lin Yuan blinked when he saw the price. This vendor was also too ruthless. How could people suffer from their rice pot exploding!

It was fine if it was smothered rice that exploded, but if it was cooked porridge, that would be akin to receiving a rice scalding plastic surgery service.

This vendor's deep-sea Butterfly Shells were just the most common ones, and they were sold for 5 Radiance dollars on Star Web at most.

Such an item was actually sold at double the price in the Indigo Azure Sea Market than on Star Web.

This vendor was really not ambiguous about its price!

It was a gamble to purchase the deep-sea Butterfly Shells. If the pearls' quality was good, one could get their capital back and earn money.

After Lin Yuan used Morbius' True Data to check the over 30 deep-sea Butterfly Shells in this large water tank, he found that they were actually substandard shells without pearls.

Furthermore, these 30 deep-sea Butterfly Shells had been severely corroded in the deep sea. They could no longer be polished into Butterfly Shell flowers for feys to eat and slowly stimulate the dragon-species bloodline within their body.

At most, they would be polished into shell powder and sprinkled in the water to improve the water environment.

The substandard shells in the water tank should be the worst batch of Butterfly Shells left after rounds of screening. However, they were faked by the vendor through some means.

This vendor had clever counterfeiting methods. If Lin Yuan hadn't used True Data to check those deep-sea Butterfly Shells, he would really have misjudged.

He didn't expect that someone would openly sell such a quality of substandard shells that were worth less than 1 Radiance dollars on Star Web.

The price of Radiance dollars spent by this vendor for counterfeiting was higher than that of the deep-sea Butterfly Shells.

He was really so black-hearted doing such a business!

Lin Yuan naturally wouldn't buy such deep-sea Butterfly Shells. There was no difference between buying such substandard shells and spending 50 Radiance dollars to buy a pile of trash.

The vendor looked at the masked youth glancing at the deep-sea Butterfly Shells in the water tank. He was observing them seriously as if he was thinking about which one to buy.

He couldn't help but hum a song,

It's natural to counterfeit, and the technology is at its peak.

Effortless success by the pitfalls of deception.

Painstakingly for the transmission of skills.

It seems to be selling one's soul for gain and self-improvement.

Even if heaven strikes, I will still do my best.

Just when this vendor was getting excited, the masked youth pointed at the small cages next to the large water tank of deep-sea Butterfly Shells and said, "Boss, I see that you're selling some marine feys apart from the deep-sea Butterfly Shells.

"That Gold Green Oxygen Sea Anemone looks good to me. Why don't I buy that, and you give me the three snake feys?"

When the vendor heard Lin Yuan's words, he hurriedly sized him up.

It was as if he was looking at the strange-masked youth to find out whether he had found any flaws with these deep-sea Butterfly Shells.

This vendor noticed that the eyes behind the strange mask were gazing at him, with a hint of a smile at the corners of his mouth.

As a result, this vendor's excitement turned into a little panic.

Indigo Azure City hosted the Indigo Azure Sea Market, and the Indigo Azure Guards were solely responsible for managing it, but they were said to be very strict.

Although his counterfeiting action was not so bad, if anyone found out, even if the Indigo Azure Guards did not expel him from the Indigo Azure Sea Market if the stall vendors next to him learned about it and made his methods known, what could he gain from this Indigo Azure Sea Market?

Wasn't the reason he was working so hard on the art of counterfeiting because he wanted to be able to lie at home every day during this ten-year period before the next Indigo Azure Sea Market?

I, Qin Wala, will not work part-time!

The vendor hurriedly changed the subject and said, "I actually intended to trade off the Green Oxygen Sea Anemones. You're my first customer today, and we hit off. I'll sell it to you for 4,000 Radiance dollars."

Lin Yuan was a bit speechless. Why did it sound like we're good brothers, but I took advantage of you?

At that moment, Listen, who was standing in line with Lin Yuan, said to this vendor, "Boss, the Indigo Azure Sea Market is only open for a total of three days. You can't sell so many feys. This Green Oxygen Sea Anemone Green Oxygen Sea Anemones' tentacles are already a bit curled. You can't sell them if you don't do so quickly."

The stall vendor looked at the Gold Green Oxygen Sea Anemones, which had some cured tentacles.

He hurriedly grabbed a bucket of seawater with energy ore powder and poured it on the Green Oxygen Sea Anemones' bodies. However, it could only maintain the Green Oxygen Sea Anemone's state but couldn't make its condition better.

Marine feys were sold on the land, and after they left the water, their conditions would greatly deteriorate. Over time, it would even affect their roots.

The vendor looked at the condition of the Green Oxygen Sea Anemone and scolded indignantly, "This is really a losing deal. Give me some reaction to this water! Why are you half-dead!"

Lin Yuan looked at the vendor handling these feys in a flurry.

He couldn't help but wonder why some people were so stupid apart from being black-hearted when running a business!

Although aquatic feys' condition would deteriorate after leaving the water, if one put a fey that released spirit qi next to these aquatic feys for them to absorb, these aquatic feys could hold on even after leaving the water for three days.

Even feys that were very sensitive to spirit qi like the deep-sea Butterfly Shells left the sea to be raised in the water tank. They could grow rapidly with spirit qi.

Those stalls beside had feys that could release spirit qi, and the most common feys were the Spirit-Siphon Goldfish, but this vendor was not prepared at all. If he learned from the other stalls, he would not have been as panicked as now.

"Boss, have you noticed that the feys at the other stalls are more alive and that feys like the Green Oxygen Sea Anemone don't need the seawater blended with energy ore powder?"

Chapter 437: Lin Yuan Is a Devil

When the vendor heard Lin Yuan's words, his suppressed anger was instantly ignited.

He kicked on the iron cage containing the three Red Water Blood Snakes and cursed, "These three trash snakes ate all three of my Spirit-Siphon Goldfish. What a big loss!"

At that moment, the vendor looked at the blackboard on the water tank with the words: 10 Radiance dollars for one deep-water Butterfly Shell. No bargaining. Any bargainers will have their rice pot explode!

He felt it should be changed into: One deep-sea Butterfly Shell for 12 Radiance dollars! No bargaining! Any bargainers will have their teeth explode!

The Indigo Azure Sea Market vendors were not allowed to go out once they came in.

If they went out, it would be akin to giving up the right to set up a stall in the Indigo Azure Sea Market.

He had bought a three-day stall card for a full 150 Radiance dollars. If he went out halfway, he would lose all the 150 Radiance dollars.

After the Indigo Azure Sea Market started, supplies were not allowed to be transported inside through Ostrich Logistics. There was nothing he could do to buy a Spirit-Siphon Goldfish.

When Lin Yuan saw the vendor's reaction, he chuckled and summoned a Bronze I/Elite Spirit-Siphon Goldfish from the Spirit Lock spatial zone.

After he summoned it out, rich spirit qi immediately spread and made the masks made of completely jade-textured silk thread that Lin Yuan and Liu Jie wore on their faces, and the completely jade-textured white sandalwood rice beads embroidered on Lin Yuan's moon-white spirit qi clothes to light up with a hazy jade-textured luster.

However, the concentration of spirit qi released by this Bronze Spirit-Siphon Goldfish was not too high.

Therefore, the luster emitted by Lin Yuan's and Liu Jie's masks was not obvious under the clear sun. However, the luster from Lin Yuan's completely jade-textured white sandalwood rice beads made the five kinds of blessing patterns become distinct, causing Lin Yuan to look very worldly.

The vendor looked at the bright rice beads on Lin Yuan's body curiously and asked, "Brother, isn't the fluorite on your body heavy?"

Then his eyes never left the palm-sized Five Fortune Ranchu in Lin Yuan's palm. His gaze was full of hidden desire.

When Listen, who was at the side, heard the vendor's words, he blinked with some dismay. This vendor was really insightful to recognize the completely jade-textured white sandalwood as fluorite. Fluorite, which emitted a luster in daylight, was generally used to make stone sculptures, and even tacky people wouldn't wear them as an accessory.

Lin Yuan ignored the vendor's words and asked, "Boss, are you interested in this Bronze I/Elite Five Fortune Ranchu? It has reached Elite at Bronze I and has a high possibility of breaking through to Flawless or Epic at Bronze X!"

When the vendor heard Lin Yuan's words, he gulped and asked, "You want to trade this Spirit-Siphon Goldfish with the Green Oxygen Sea Anemone? I'm willing to give you all the deep-sea Butterfly Shells in this water tank!"

The corner of Lin Yuan's mouth couldn't help but twitch a little. Why was this vendor always thinking of cheating him?

"There are more than 600 deep-sea Butterfly Shells in this water tank. I'll give you the Star Web price of five Radiance dollars each. If you give me 3,000 Radiance dollars, I'll give you this Bronze I/Elite Spirit-Siphon Goldfish."

The Spirit-Siphon Goldfish could be sold for around 60 Radiance dollars at Elite I/Elite.

If a fey like the Spirit-Siphon Goldfish, which was extremely difficult to advance, reached Bronze I/Elite and was traded, the price should be around 2,500 Radiance dollars.

The price of the Five Fortune Ranchus was a little more than double that of an ordinary Spirit-Siphon Goldfish because it was auspicious. It was around 5,500 Radiance dollars.

Lin Yuan wanted to exchange it for the Gold Green Oxygen Sea Anemone because it could constantly filter out oxygen in the seawater, just like a natural oxygen bottle that could constantly supply oxygen.

The Green Oxygen Sea Anemone was very common in Indigo Azure City, a city by the sea.

The Green Oxygen Sea Anemone, which was in poor condition just now, was worth around 300 Radiance dollars.

Lin Yuan had asked the vendor to give him an extra 3,000 Radiance dollars because he clearly intended to earn 500 Radiance dollars from the vendor who always wanted to make a profit from him.

The vendor obviously hesitated when he heard Lin Yuan's offer. If he took out the Gold Green Oxygen Sea Anemone and 3,000 Radiance dollars to exchange for the Spirit-Siphon Goldfish, if he didn't make a large sum of money from selling everything at the Indigo Azure Sea Market, then he wouldn't be able to spend his days lying down but asking to work for other people for the next decade!

At that moment, Lin Yuan said to the vendor, "The Spirit-Siphon Goldfish is considered a good product and is very marketable.

"Even if you want to sell this after the sea market, you can still easily do so.

"Furthermore, as long as the Bronze I/Elite Spirit-Siphon Goldfish successfully advance to Flawless, its price can be increased by more than ten times in the blink of an eye."

The vendor felt that the youth in front of him who was luring him to buy the Spirit-Siphon Goldfish was like a devil.

He was luring himself to the cliff edge with a big cheese and then kicked. For some reason, the vendor suddenly had a sense of crisis! However, it was soon suppressed by desire. This big chunk of cheese smelled too good!

The vendor gnashed his teeth, slapped his thigh fiercely, and replied, "Brother, I'll buy it."

Lin Yuan then exchanged with this vendor. At that moment, Lin Yuan had the three Red Water Blood Snakes with the horned dragon bloodline and the Gold Green Oxygen Sea Anemone that the Mother of Bloodbath required.

A very gentle voice sounded not far away at this moment.

"Brother, are you willing to part with these three Red Water Blood Snakes? I'm willing to pay 100 Radiance dollars for each."

This gentle voice made the eyes of the vendor, who had been in love with the Five Fortune Ranchu in his hands, widen.

At that moment, the vendor thought, This person isn't trying to act along with this strange-masked youth, right!?

But immediately after, the vendor replied, "F*ck!"

He seemed to be giving away the three trash snake feys for free just now. Why was the person paying 100 Radiance dollars each?

Lin Yuan turned around and saw a thin youth sitting in a wheelchair with an elegant scholarly aura. However, he used a fleece blanket to cover his legs, so he must have some leg problems.

Upon seeing the youth's thin appearance, Lin Yuan felt that his legs were not injured but had been disabled for many years.

Lin Yuan said, "I'm very interested in these three Red Water Blood Snakes, so I really can't part with them."

Chapter 438: In a Flurry

After saying that, Lin Yuan stored the cage containing the three Red Water Blood Snakes and the Gold Green Oxygen Sea Anemone into the Diamond fey storage box.

At that moment, he felt several sharp aura sweeping toward him and heard a middle-aged man with three scars on his face standing behind this thin youth say in a deep voice, "Why don't I talk to our Young Master? The Red Water Blood Snake is only about 70 Radiance dollars. You—"

Before he could finish, he froze. The thin youth frowned, glanced behind at him, and said, "Uncle Fu, it's not the same outside as being at home. Control your temper."

The thin youth turned and nodded apologetically at Lin Yuan, but Lin Yuan didn't care.

When he was about to leave with Liu Jie and Listen, Lin Yuan saw the vendor show a smile that was worse than crying.

“You knew before that those three snake feys were some kind of Red Water Blood Snake?”

Lin Yuan nodded at his words and thought, Not only did I know that these three snake feys are Red Water Blood Snakes, but I also know that they have the horned dragon bloodline.

If he told this vendor, Lin Yuan was really afraid that he would start wailing.

Despite thinking so, Lin Yuan said, “Boss, we’re leaving. You should nurture that Bronze I/Elite Spirit-Siphon Goldfish well.”

Upon hearing that, the vendor stomped his feet in anger. However, when he saw the indistinct smile on Lin Yuan’s face, this vendor’s hair stood up.

Then the vendor felt an unusual headache. He had actually wanted to make a big sum of money, but he earned nothing in the end and even lost 300 Radiance dollars.

If he hadn’t complied and given the three Red Water Blood Snakes, he could have earned 300 Radiance dollars from them!

He might also have been able to use these three Red Water Blood Snakes to sell the deep-sea Butterfly Shells to the little cripple on the wheelchair.

The more he thought about it, the more this vendor’s heart ached. He carefully placed the Spirit-Siphon Goldfish in the tank where the deep-sea Butterfly Shells were kept.

Only when he felt that the condition of his aquatic feys had improved did he feel much better.

He was waiting in the middle of the stall for cash cows to come.

Lin Yuan was communicating with the Mother of Bloodbath.

“Why do you have an evil smile on your face? Is there something wrong with the Spirit-Siphon Goldfish you gave that vendor?”

Upon hearing that, Lin Yuan hurriedly shook his head and answered, “Don’t wrong me. This Spirit-Siphon Goldfish is healthy and has a good exclusive skill.”

The Mother of Bloodbath had not carefully observed the Spirit-Siphon Goldfish that Lin Yuan had traded out. However, seeing the strange smile on Lin Yuan’s face, the Mother of Bloodbath knew that there must be something wrong with them. It just didn’t know where the problem lay.

Lin Yuan felt that the next time he saw this vendor, this vendor would definitely hit him.

The exclusive skill that those Spirit-Siphon Goldfish had was Dirt Removal. It could remove the dirt on the other feys within the range.

The substandard shells were coated with a layer of artificial glaze that was almost indistinguishable from the superior-class Butterfly Shells. With this exclusive skill, he believed that the glaze attached to the surface of the substandard shells would be stripped off in less than two hours.

Lin Yuan had specially picked the Spirit-Siphon Goldfish with Dirt Removal from the school of fish in the Spirit Lock spatial zone.

He felt that Indigo Azure City should send him a banner printed with 'cheater killer' on it.

Lin Yuan felt the condition of the three Red Water Blood Snakes in the amber-button-shaped Diamond fey storage box, and they were significantly better than before when they had just been sprinkled with realgar.

He turned to the Mother of Bloodbath and asked, "Mother of Bloodbath, do you have any requirements for the quality of those three Red Water Blood Snakes?"

The Mother of Bloodbath answered with some melancholy, "These three Red Water Blood Snakes have the hornless dragon bloodline and are fantastically gifted.

"The best way is for them to awaken the hornless dragon bloodline at Bronze and reach Epic.

"My nurturing of the three Red Water Blood Snakes is actually similar to you humans nurturing feys.

"However, they don't need to comprehend the Willpower Rune but can instead share my Blood Law."

Hearing the Mother of Bloodbath's words, Lin Yuan said, "Leave these three Red Water Blood Snakes with me first and also awakening their bloodline and enhancing their quality."

The Mother of Bloodbath was silent for a moment and then gently replied, "Okay."

It thought that the youth that needed its protection back then in Millstone Town had now begun to help take on a big burden, which was something difficult for itself to do. In just six months, the youth had long grown up without realizing it.

The skinny youth sitting in a wheelchair in front of the stall noticed that the person behind him did not move and asked, "Uncle Fu, since we're rarely outside for once, push me to the front."

The thin youth's words seemed to have woken up the middle-aged man with three scars on his face.

When the middle-aged man was awakened, he subconsciously pushed the wheelchair with force, causing the thin youth sitting in the wheelchair to bump.

The middle-aged man with three scars on his face hurriedly said, "I lost focus and have disturbed Third Young Master."

The thin youth didn't care and asked with some curiosity, "I remember that even though Uncle Fu's Ice Heart Lionfish has not yet become a Myth Breed, it has already broken through to Suzerain. Why did you lose focus?"

The middle-aged man with three scars on his face answered with a grim expression, "When I oppressed that masked youth with my aura just now, the blood in my body went out of my control in a flash.

"The blood flooded into my brain and heart, causing me to lose focus."

The eyes of the thin youth that was called Third Young Master lit up. An evil and unrestrained smile hung on his scholarly, gentle face.

"Blood flowing backward and losing focus? How interesting!"

...

Lin Yuan, Liu Jie, and Listen had bought a lot of things in the few hours in Indigo Azure Sea Market. Liu Jie and Listen watched Lin Yuan purchase a lot of feys and spiritual materials that grew in the sea.

He only bought the marine feys that were of special quality or have mutated. Lin Yuan had mostly purchased all kinds of rare spiritual materials that were only produced in the sea.

After purchasing a large amount of resources, Lin Yuan had a rich harvest. Even though Listen and Liu Jie had long known how deep Lin Yuan's foundation was, they couldn't help but have a new perception of it again and again at this moment.

Chapter 439: Mutual Harm!

When Lin Yuan purchased the feys and spiritual materials, Listen noticed the difference between Lin Yuan and those other young masters of the major factions.

Lin Yuan had a deep foundation, yet he didn't squander it in the slightest. When he was purchasing those, he had a good grasp of the price and did not let himself be at the losing end.

It could be said that although he looked like he was buying a lot of goods in a large number, each transaction was a steal at a closer look.

In the eyes of Listen, Lin Yuan was earning resources while spending money.

Through the purchase of feys and spiritual materials, the snowball of the resources he could control was rolling bigger and bigger.

Such a vision and ability made Listen feel very admirable.

At this moment, Lin Yuan said to the old man in front of the stall, "Boss, the Blood Coral Crystals you sell here are now mine."

The old man who traded with Lin Yuan looked at the Blood Coral Crystal heartbreakingly. Then he looked at the two pieces of completely jade-textured agarwood that were like black crystals and said with a big wave of his hand and some heartache, "You lucked out with the Blood Coral Crystals."

Lin Yuan chuckled and replied, "Boss, you're refined. Otherwise, you wouldn't have preferred this agarwood with a subtle and imperceptible scent and could calm the mind."

Hearing Lin Yuan's words, the old man at the stall was visibly flabbergasted and asked, "I love the completely jade-textured agarwood. What does it have to do with its smell?"

It was Lin Yuan's turn to be stunned.

"Boss, don't you want this completely jade-textured agarwood for burning?"

The old man looked at Lin Yuan with dumbfounded eyes and shouted with trembling lips, "Don't pretend after the transaction! Only a fool would be willing to burn this completely jade-textured agarwood. Making it into a large thumb ring is the best use of it."

The old man in the stall only felt that the more he looked at the masked youth in front of him, the more he felt stuffy in his heart.

You're tactful about the money!

Burning the agarwood? You're so impressive, so why don't you raise a few Legend feys at home!

When Lin Yuan heard the old man's words, he took the Blood Coral Crystals he had exchanged and pulled Listen and Liu Jie to leave.

When they reached the depths of the Indigo Azure Sea Market, most of the feys and spiritual materials sold by the vendors were good stuff that was hard to find outside.

Such good stuff was naturally not sold casually but used by the stall vendors to exchange for the spiritual materials or feys they needed.

This old man wanted to exchange for completely jade-textured agarwood, and Lin Yuan fancied the Blood Coral Crystals that contained a lot of blood energy.

These Blood Coral Crystals contained extremely majestic blood energy, which was exactly what the Mother of Bloodbath needed, so Lin Yuan made the exchange.

Lin Yuan originally thought that he had met an enthusiast who liked the same agarwood as himself. This enthusiast was actually so unrefined that he wanted to make the agarwood into a large thumb ring.

He might as well crush the completely jade-textured agarwood into ink to practice calligraphy.

At this time, Liu Jie pointed to a distant stall and said, "Lin Yuan, there's really someone selling water world dimensional lifeforms' flesh.

"However, it's at an outrageous price. He actually goes as far as using the flesh of dimensional lifeforms of the same level from the abyss dimensional rift in exchange for the water world dimensional lifeforms' flesh with a 1:10 ratio.

"Quite a few parts from the demons in the abyss dimensional rift are not cheap.

"The flesh of the water world dimensional lifeforms corrode directly in the air and emit a foul gas, which can be completely defined as a disgusting biochemical weapon."

In Liu Jie's opinion, taking the flesh of the demons in the abyss dimensional rift in exchange for the water world dimensional lifeforms' flesh was inappropriate, even if it was a ratio of 1:100.

When Lin Yuan heard Liu Jie's words, he looked into the distance, and his eyes lit up.

Lin Yuan had been looking for vendors selling the water world dimensional lifeforms' flesh on this journey, but he hadn't found a single stall.

He knew that the water world dimensional lifeforms' flesh was too invaluable, and few people would keep it.

However, he didn't expect to not find a vendor selling it in the Indigo Azure Sea Market, a place that specialized in marine resources, that happened once every decade in Indigo Azure City. Fortunately, he found one now.

Liu Jie glanced at the surrounding stalls and said to Listen and Liu Jie, "Big Brother Liu, Listen, you two also wander around. If you come across any spiritual materials that contain a huge amount of blood energy, help me buy them.

"And you guys can also buy any suitable resources you find."

After saying that, Lin Yuan gave each Listen and Liu Jie a golden silk brocade pouch that was fully stuffed.

Then, Lin Yuan went toward the vendor who wanted to exchange the water world dimensional lifeforms' flesh for the abyss dimensional rift lifeforms' flesh.

Liu Jie and Listen glanced at the pouch Lin Yuan handed over, and they almost dropped it on the ground.

The two brocade pouches were filled with 30 fire-type heavenly-maiden-grade elemental pearls produced by the Scorching Elemental Shellfish. This was a huge fortune.

Liu Jie saw that Lin Yuan had already walked to the stall and said to Listen, "You go to the left side, and I'll go to the right. We'll both exchange for resources on each side."

Upon hearing that, Listen suddenly smiled mysteriously and replied, "Big Brother Liu, why don't we compete to see who can exchange more resources with these 30 heavenly-maiden-grade elemental pearls in the pouch?"

Liu Jie smiled straightforwardly and answered with a grin, "Sure. I lost the bet last time, and you made me eat 30 lemons!

"We'll bet this time, and whoever loses will have to eat 50 Gold chili peppers!"

Listen felt his mouth begin to become numb as if his cheeks had swollen up, hot and painful.

Listen hurriedly said, "Big Brother Liu, 50 Gold chili peppers will kill someone! Why don't we change it into Bronze ones?"

Liu Jie glanced at him and snorted.

"Since we have to gamble, we have to gamble on something exciting. If you think the Gold chili peppers are too much for you, we'll change it into Silver ones."

Liu Jie's compromise excited Listen, and he clapped his hands.

"Since we pursue excitement, we'll do it all the way! I request to change the 50 Gold chili peppers into one Platinum ghost pepper. Big Brother Liu, do you dare to do it?"

Liu Jie was now full of only one thought. Wouldn't he have to sleep on his back for at least a month after eating a Platinum ghost pepper! This was simply mutual harm!

However, Listen, who was afraid to eat spicy food, was not afraid. Why did he have to be scared?

“We’ll do it! You’re not allowed to drink milk an hour after eating!”

Listen didn’t expect Liu Jie to be so daring and had actually thought of not letting him drink milk. Listen had an idea and added another one.

“Not drinking milk is nothing! If you have the guts, drink iced cola immediately after eating the Platinum ghost pepper!”

Chapter 440: Increased Endurance

Liu Jie and Listen glanced at each other, and both felt that the other was a ruthless person, but once they remembered the taste of the Platinum ghost pepper, they hurriedly set off in both directions and used the heavenly-maiden-grade elemental pearls produced by the Scorching Elemental Shellfish in the golden silk brocade pouch to exchange for resources.

The old man, who had thought Lin Yuan was pretentious, once again doubted life. He had thought that these two youths who had just bet in front of his stall were just two childish people. He didn’t expect that they actually suddenly became ruthless!

The combination of these three people was one pretentious person! And two ruthless people!

It was simply too strange!

Lin Yuan had already reached the Indigo Azure Sea Market’s core area. Most of the feys and spiritual materials sold at the border of the Indigo Azure Sea Market were relatively ordinary, and very few were eye-catching.

However, the more he walked to the core area of the Indigo Azure Sea Market, the rarer and better the quality of the spiritual materials and feys he could exchange.

Previously, there was only one way to the outer area of the Indigo Azure Sea Market, but the roads to the core area had become more. This made Lin Yuan increasingly feel that this Indigo Azure Sea Market was like a huge maze.

In Lin Yuan’s opinion, the layout of the core area was not friendly to those with a bad sense of direction!

This large stall was the coldest in front of the middle-aged man who exchanged water world dimensional lifeforms’ flesh for abyssal world dimensional lifeforms’ flesh.

This middle-aged man was also happy and sized up the stalls around, just like a patroller patrolling a territory.

Several Platinum fey storage boxes were placed beside him, and he saw Lin Yuan walk over.

The middle-aged man hurriedly stood up and asked, “Do you want to exchange for the water world dimensional lifeforms’ flesh?”

Lin Yuan nodded and replied, “Uncle, you should’ve flesh of Class 3 water world dimensional lifeforms that are equivalent to Gold feys, right?”

As soon as the middle-aged man heard Lin Yuan's words, he raised his hands, and Lin Yuan saw he was wearing two exaggerating rings on his hands.

The middle-aged man chuckled and said, "I have two Diamond fey storage boxes of water world dimensional lifeforms' flesh, from Class 2 to Class 5.

"However, I'll have to say this beforehand. If you exchange for the water world dimensional lifeforms' flesh without a Diamond fey storage box, you have to buy these Platinum fey storage boxes in front of me.

"I don't want to be driven out by my own people."

When Lin Yuan heard this middle-aged man's words, he nodded in deep understanding. Lin Yuan had smelled the water world dimensional lifeforms' flesh, and this smell couldn't be covered even by the Shellfish Vapor Coral's shellfish vapor.

If he took out the water world dimensional lifeforms' flesh, the spirit qi professionals in this Indigo Azure Sea Market would experience a chain reaction of dissolved materials in the stomach.

At the same time, Lin Yuan also learned this middle-aged man's identity from his words. This middle-aged man had said that he didn't want to be driven away by his own people, which meant that he should be one of the Indigo Azure Guards.

The Indigo Azure Guards managed the Indigo Azure Sea Market. At the same time, it could also explain why this middle-aged man had two Diamond fey storage boxes full of high-class water world dimensional lifeforms' flesh.

As long as an opened water world dimensional rift appeared in the sea near the Indigo Azure City, and the water world dimensional lifeforms that gushed out from it threatened the safety of the residents on the shore of Indigo Azure City, the Indigo Azure Guards would have to exterminate these rebellious water world dimensional lifeforms.

This middle-aged man should also represent the entire Indigo Azure Guards. He wanted to take advantage of this Indigo Azure Sea Market to see if he could exchange the water world dimensional lifeforms' flesh that had been accumulated during this decade for some relatively useful resources."

"Uncle, I have the fey storage box that contains the abyssal demons' flesh. The amount I want may be a bit more."

The middle-aged man was happy to hear that and replied cheerfully, "As long as you don't take the Gold dimensional lifeforms' flesh for land reclamation, I have enough here!"

Lin Yuan took a Platinum fey storage box out of the amber-button-shaped Diamond fey storage box and started to put the Gold abyssal demons' flesh from the leaf-shaped Diamond fey storage box into the Platinum fey storage box.

He filled it with half of the remaining 3,000 Class 3 demons' flesh from his leaf-shaped Diamond fey storage box and handed the Platinum fey storage box filled with 1,500 demons' flesh to the middle-aged man in front of him.

This middle-aged man took a look at it and coughed. Then he asked with some surprise, "You're exchanging so much Class 3 demons' flesh for Class 3 water world dimensional lifeforms' flesh?"

Lin Yuan nodded. It was the most suitable for Red Thorn to devour Class 3 dimensional lifeforms' flesh to raise its grade and quality at Silver/Fantasy Breed.

It was not a picky eater and absorbed the flesh energy from the dimensional lifeforms' flesh. Therefore, there was not much difference in nature eating the demon dimensional lifeforms' flesh and the water world dimensional lifeforms' flesh.

Red Thorn had devoured a large amount of the unique acidic and withering inherited of the demons' flesh and had a grasp on it. It could also be inherited from the child ramets and ramets produced by Spore Growth.

Thus, eating the Class 3 demons' flesh only served to digest the blood energy for Red Thorn.

During this period, Lin Yuan discovered in his observation of Red Thorn that it had previously devoured the flesh of nearly 100 Gold water world dimensional lifeforms.

In addition to making the twelve one-meter useless petals of Red Thorn mutate into gill-shaped petals, it also vaguely controlled the decaying characteristics of the water world dimensional lifeform.

This decaying characteristic didn't mean that Red Thorn would cause the target to decay after striking it.

Rather, after death, the child ramets and ramets summoned by Red Thorn would quickly decay and become nutrients for other living child ramets and ramets to absorb.

Although Red Thorn's endurance had been greatly enhanced with Eye of Relinquish, if it completely mastered the water world dimensional lifeforms' decaying characteristics, then there was no doubt that Red Thorn could again increase its endurance.

The endurance was a guarantee that Red Thorn spawned a lush and stable sea of flowers, so naturally, the more, the better.

Lin Yuan and this middle-aged man finished exchanging this large batch of water world dimensional lifeforms' flesh in a short while.

After the exchange, besides giving Lin Yuan 15,000 Gold water world dimensional lifeforms' flesh, this middle-aged man also gave him an additional 500 Gold water world dimensional lifeforms' flesh.

After pondering for a moment, Lin Yuan asked this middle-aged man, "Uncle, I wonder if we can exchange contact numbers? I may need more water world dimensional lifeforms' flesh in the future, so it'll be convenient for us to trade again then."
