

Merchant 771

### **Chapter 771: Red Thorn's Request to Evolve**

When Lin Yuan returned to the mansion, he saw Liu Jie packing up the dishes on the table.

Liu Jie noticed Lin Yuan's return and said, "Lin Yuan, Master asked me to go to the Spirit Guards' land so that she can help evolve my sacred source lifeform. I may have to stay there for the next few days. I'll return before the Guard Ye Banquet so that we can go together."

Liu Jie had told Lin Yuan early on about how he had contracted a sacred source lifeform, but he did not tell Lin Yuan about its abilities to prevent Lin Yuan from worrying.

As such, there was no reason for Liu Jie to hide his reason for going to the Spirit Guards' land.

Lin Yuan walked over and helped Liu Jie pack the food. He also prepared himself to immediately combine the Fairy's Heart with the Flower Brocade Pearl after transforming Red Thorn in the Spirit Lock spatial zone.

After the Flower Brocade Pearl became a fairy-type lifeform, it would be able to produce a high number of ripe child ramets.

Although Lin Yuan had been relying on his own strength to advance himself, he had never truly pulled away from the Moon Empress's influence.

Without the Moon Empress, he would have died at the hands of Cheng Wu or in the water world dimensional rift.

Before, he had evolved several valuable feys in the Spirit Lock spatial zone, such as the Mountain River Eternal Life Carp.

However, he never thought of giving those items to the Moon Empress because the Radiant Moon Palace had feys that had just as good or even better abilities than the Mountain River Eternal Life Carp.

Although Lin Yuan would be able to show his sincerity to the Moon Empress by giving her the Mountain River Eternal Life Carp, it would be useless to her.

When Lin Yuan decided to nurture Golden Lotus Brocade Pearls, he had planned on nurturing 100 of them to give to the Moon Empress.

The 100 Golden Lotus Brocade Pearls were going to be Lin Yuan's gesture of sincerity.

It would also be the first proof of Lin Yuan's improvement over the last eight months.

After he sent Liu Jie off, Lin Yuan flashed himself into the Spirit Lock spatial zone.

Lin Yuan was stunned the moment he entered the Spirit Lock spatial zone because he saw the Mouth of Relinquish in the slumbering Red Thorn trembling violently.

The trembling Mouth of Relinquish was covered with concentrated plant energy.

When the plant energy exploded around the Mouth of Relinquish, it seemed that it was going to rip out of the Mouth of Relinquish.

However, the Mouth of Relinquish was a resilient wall that kept the plant energy secured inside.

Lin Yuan quickly went up to it and placed his hand on the part of the Mouth of Relinquish that was not covered with teeth as he circulated his spiritual power to sense the changes taking place in Red Thorn.

He could not contain the delight that rose in him.

The plant energy came from the Source Seed that Red Thorn had absorbed.

Lin Yuan did not expect so much plant energy to come from one Source Seed.

He immediately took out the third Source Seed and dropped it into the half-open Mouth of Relinquish.

The plant energy had been stuck in the Mouth of Relinquish, but now, the sleeping Red Thorn was like an awakening beast that was ferociously roaring.

The violent sound waves coming from the Mouth of Relinquish made Lin Yuan's ears ring.

Lin Yuan watched as the Mouth of Relinquish opened and closed continuously and felt that it resembled a sommelier that was savoring a divine wine.

He could sense Red Thorn's plea through his connection with its bloodline.

In the past, Red Thorn's pleas were only made while it was evolving. But this time, it had issued a plea after consuming two Source Seeds.

However, this plea was different from those that Red Thorn had issued in the past. Previously, the pleas were asking Lin Yuan how it should go about unlocking a new ability.

But this time, it was asking Lin Yuan which of its two abilities it should evolve.

Lin Yuan pondered over the query.

It had not been easy for Red Thorn to progress to where it was now from the Source Seed it had started out as.

Red Thorn was Lin Yuan's first source-type lifeform and was his earliest partner after Chimey and Genius.

It was also the result of his parents offering up their lives and service.

Lin Yuan had invested a lot of effort into nurturing Red Thorn.

The first direction that Lin Yuan had taken when nurturing Red Thorn was to supply it with energy by allowing it to consume flesh.

This allowed Red Thorn to become a predatory plant and caused it to grow the Mouth of Relinquish.

The second direction Lin Yuan had taken was apparent in Red Thorn's digestive ability.

Its digestive ability allowed Red Thorn to grow a corrosive cavity that complemented the brutal vine ramet and caused it to grow the Tongue of Relinquish.

This direction fulfilled Lin Yuan's initial dream of developing Red Thorn's combat style.

The style came from countless improvements.

The third direction that Lin Yuan had evolved Red Thorn was its method of proliferation.

With the first and third evolutions, Red Thorn was now a fey that could fight by relying on a colony.

Spore Growth allowed Red Thorn to fight using its sea of flowers.

Lin Yuan felt that Red Thorn's third evolution was the main one.

The third evolution allowed Red Thorn to gain Spore Growth and also connected Red Thorn's first and third evolutions.

The three evolutions together formed a unique combat system.

As for the fourth evolution direction, Lin Yuan had evolved Red Thorn's storage ability.

This increased Red Thorn's stamina and allowed Spore Growth to expand its reach.

Essentially, Red Thorn's abilities improved overall and raised its tolerance in battle.

The Eye of Relinquish that had emerged from the fourth evolution not only increased Red Thorn's storage ability during battle but also helped Red Thorn expand its reach. The leftover Eyes of Relinquish would be sent to the sea of flowers through the vines connecting Red Thorn and the child ramets.

From this, the blood energy stored in the Eyes of Relinquish would become the source of strength for Red Thorn to attack its enemy.

In battle, Red Thorn had always relied on its corrosive digestive fluids and vines to cause damage.

When faced with a weak enemy, Red Thorn could attack from multiple directions. However, it would be stuck when faced with a strong enemy.

Nonetheless, when the Eyes of Relinquish were used in battle, they would be able to cause damage against strong feys.

This would increase the sea of flowers' strength and attacking power, and the strong enemies would also be at Red Thorn's mercy.

Lin Yuan could only choose two of these four impressive evolution directions to continue evolving Red Thorn.

He felt stuck in a dilemma and did not know how to go about making a choice.

## **Chapter 772: The Strange Sea Burial Lotus Flower**

The mercurial aspect of life was complex and ever-changing. Every sudden change had endless possibilities hiding behind it.

It was just like how the Tongue of Relinquish had replaced the corrosive cavity.

The useless flowers had not only provided Red Thorn with the ability to communicate with humans after it evolved, but the petals had also become gill-shaped and increased Red Thorn's ability to breathe underwater.

After Red Thorn had absorbed a large number of water world dimensional lifeforms, its ability to breathe underwater was perfectly transferred to the brutal vine ramets through the corrosive cavity in the spore cavity.

This enabled Red Thorn to fight as well underwater as it did above water.

Such were the improvements that came with sudden evolution.

Thus, considering these sudden possibilities, Lin Yuan felt that all four abilities should be evolved.

However, the Mouth of Relinquish's original mutation evolved again. The Source Seed that Lin Yuan had dropped into the Mouth of Relinquish acted as though it was alive as it rapidly spat out the hidden plant energy in its body.

If Lin Yuan did not make a decision soon, the Mouth of Relinquish would fail to contain the increasing plant energy.

Finally, Lin Yuan gnashed his teeth and made the best decision he could.

"Red Thorn, evolve the absorption and digestion abilities," instructed Lin Yuan.

After Red Thorn evolved in those directions, Lin Yuan tested Red Thorn by ordering it to continue consuming while it was digesting and continuously producing more Eyes of Relinquish.

Lin Yuan only relaxed after he sensed Red Thorn's agreement.

After Lin Yuan gave his order, the burning Mouth of Relinquish shut the plant energy off and quietened down.

But the Mouth of Relinquish remained open and continuously produced Eyes of Relinquish as Lin Yuan had instructed.

Lin Yuan returned Red Thorn to the leaf-shaped Diamond fey storage box.

Red Thorn needed to sleep for some time after each evolution. Lin Yuan did not know how long it would sleep this time.

However, he knew that once it awoke, it would present him with a huge surprise.

In the leaf-shaped Diamond fey storage box, Red Thorn gobbled the water world dimensional lifeforms around it and produced Eyes of Relinquish, which were transported to the Blood Brew Grapevine.

The Blood Brew Grapevine had not been without the supply of Eyes of Relinquish for long. It had only been two hours.

However, in the two hours, all the vines other than the main vine had become limp.

It looked about to wither at any time as all the nutrients had been left for the main vine.

Now that the supply of Eyes of Relinquish was restarted, the Blood Brew Grapevine could continue consuming it.

If Lin Yuan had waited till the Blood Brew Grapevine adjusted itself, he would have suffered seriously when the unripe Blood Brew Grapes wilted due to a lack of blood energy.

Lin Yuan let out a breath of relief after observing Red Thorn in the leaf-shaped Diamond fey storage box for a while.

He had decided to choose Red Thorn's absorption and digestive abilities after careful contemplation.

He felt that they could be considered one unit supporting each other and forming the pillar that held up Red Thorn's combat system.

Without Red Thorn's absorption and digestive abilities, there would be no point in evolving its storage and spore abilities.

The storage ability was just a large barrel that Red Thorn could dip into when necessary.

If Red Thorn's source of water did not change, it would not matter how good its storage medium became, and it would still be unable to store up water.

The spore ability could be seen as the way that Red Thorn expanded its reach and healed itself in battle.

Despite its importance, if Red Thorn could not supply enough blood energy, the spores would still be unable to unleash great power.

Although Lin Yuan could not be sure if there would be any benefits to evolving Red Thorn's absorption and digestive abilities, the two abilities directly affected Red Thorn's combat power.

Red Thorn had always been able to absorb flesh.

Red Thorn's energy gain had been set when it divided itself and would not change significantly, but it was able to consume other items once it was evolved.

Although energy could not be obtained for evolution, the flesh could still be absorbed to strengthen itself.

Red Thorn could absorb and transfer the innate abilities in the dimensional lifeforms.

It was just like how Red Thorn could absorb the energy and transfer the abilities of metal spiritual ingredients to newly grown vines.

To what extent could Red Thorn's fighting abilities be evolved?

Lin Yuan chose to evolve Red Thorn's absorption ability first to change Red Thorn's evolution potential.

But he also decided to evolve the digestive ability as it needed to have the digestive ability of a similar level.

Otherwise, when Red Thorn consumed metal spiritual ingredients, it would not be able to digest them without a strong digestive ability.

The evolved digestive ability would also increase the effects of the Mouth of Relinquish.

This would not only speed up the evolution of Red Thorn's grade but also speed up its storage ability and evolve the production of Eyes of Relinquish.

The spore cavity would be supplied with more energy and produce more spores that could evolve the sea of flowers.

This was exactly compatible with Red Thorn's fighting style.

All Lin Yuan needed to do now was quietly wait for Red Thorn to finish transforming.

He walked to the spirit pool and carefully studied the Sea Burial Lotus Flower.

The Sea Burial Lotus Flower had expressed a craving for the spotted coral jade recently.

The first batch of coral jade in the Spirit Lock spatial zone had matured. Besides a portion of the spotted ones that Lin Yuan had promised to Gao Feng, Lin Yuan had set aside those that he intended on covering the bottom of Submerged Flood Dragon Lake with.

The Angelfish of Bliss in Submerged Flood Dragon Lake were all Platinum grade and did not need as much spotted coral jade.

Thus, Lin Yuan poured the remainder of the spotted coral jade into the spirit pool to cover the bottom.

When the Sea Burial Lotus Flower encountered the spotted coral jade, it started to enthusiastically absorb the pure spirit qi.

A large amount of Bone Lotus Flowers was activated to cover all the spotted coral jade at the bottom of the spirit pool to absorb the energy inside.

But contrary to Lin Yuan's expectation, the Sea Burial Lotus Flower was not absorbing the energy inside the spotted coral jade as quickly as it did with pure spirit qi.

Instead, it was taking its time.

### **Chapter 773: Incubating Fairies**

The Sea Burial Lotus Flower looked like a harmless small white flower.

Lin Yuan had been making adjustments to this small white flower for some time and was completely aware of its situation.

But after absorbing the spotted coral jade, many pretty corals had appeared next to the Sea Burial Lotus Flower's roots.

The corals were colorful and covered the Sobbing Sea Crystals that grew from the Sea Burial Lotus Flower's roots.

A spot was left at the bottom of the roots for Lin Yuan to pull out the Sobbing Sea Crystals.

Lin Yuan could not help but be amazed.

He also immediately understood this situation arose from the Sea Burial Lotus Flower mutating after absorbing the spotted coral jade.

After the mutation, the small white flowers on the Sea Burial Lotus Flower also grew numerous strange spots.

These spots seemed to be climbing up the Sea Burial Lotus Flower's flowers.

Lin Yuan was very familiar with the spots that were growing on the Sea Burial Lotus Flower's flowers. They came from the spotted coral jade that had been absorbed.

However, Lin Yuan was still unclear on what effects the spots would have.

The Sea Burial Lotus Flower would have to absorb the spotted coral jade for some time and complete its mutation before the effects of the spots would become apparent.

At that time, he would be able to use True Data to check on the changes that had taken place in the Sea Burial Lotus Flower.

Lin Yuan tried touching the new corals that grew out and noticed the Sea Burial Lotus Flower suddenly reached out a rainbow coral lotus and wrapped around Lin Yuan's finger.

This made Lin Yuan's finger feel a warm suction and allowed him to sense a faint messy thought.

The messy thought stunned Lin Yuan, and he instantly realized that his previous guess had been correct.

The Sea Burial Lotus Flower was currently mutating, and one of its markers was that its thoughts would become more apparent.

Lin Yuan circulated his spiritual power and used his finger to transfer the pure spirit qi to the rainbow coral lotus that the Sea Burial Lotus Flower had stretched out. Ten minutes later, he finally plucked his finger away from the reluctant Sea Burial Lotus Flower.

He had considered forming a contract with the Sea Burial Lotus Flower before.

Now that he had two Fairy's Hearts, he could allow the Sea Burial Lotus Flower to transform into a fairy-type source-type lifeform along with the Flower Brocade Pearl.

As long as Lin Yuan was the first person that the Sea Burial Lotus Flower saw afterward, it would make no difference if Lin Yuan actually formed a contract with the Sea Burial Lotus Flower.

This would also save Lin Yuan some of his already scarce spiritual energy that he could use to form contracts with other feys.

Only a short period remained before the Sea Burial Lotus Flower's thoughts would become clear and intelligible.

As such, Lin Yuan could not wait till the Sea Burial Lotus Flower finished mutating. He needed to immediately combine it with the Fairy's Heart.

Otherwise, when the Sea Burial Lotus Flower's thoughts became intelligible, Lin Yuan might end up sacrificing both the Sea Burial Lotus Flower and Fairy's Heart.

Genius had been hard at work concocting Luxuriant Spirit Fluid.

Lin Yuan walked over to Genius but did not disturb it.

He waited till Genius finished concocting another bottle of Luxuriant Spirit Fluid before he picked up Genius and said, "Genius, you don't have to concoct Luxuriant Spirit Fluid from today onward."

Genius let out a meow and said in a child-like voice, "Then I shall help Master Hong Shen by concocting Platinum Water Potions so that the Angelfish of Bliss can evolve to Platinum grade soon."

A surge of warmth crept over Lin Yuan's heart, but he shook his head and said, "Genius, I'll take you to pick out a few Hundred Questions Beasts when I return from the Guard Ye Banquet. I'll evolve those Hundred Questions Beasts, and you can use Connected Tails to teach them to see if they can pick up how to become Creation Masters."

Genius said with an air of responsibility, "I will be a good teacher and teach those kitties properly. I'll make sure that they will be of help to you."

Lin Yuan could not help but scratch Genius's small nose.

Genius was even smaller than the average Hundred Questions Beasts, yet it was calling them kitties.

Lin Yuan massaged Genius' head and said, "If you're successful, you won't have to work so hard anymore."

Genius nodded obediently and nudged Lin Yuan's with its voluminous tails as a show of clingy affection.

Chimey, which had stayed in the nest in the Phoenix Perching Chinese Parasol Tree, saw that Genius was finally starting to relax and quickly flew over to land on Genius' head.

Its small feet stepped on Genius' head as though asking Genius if it had forgotten about Chimey's live stream.

Although Chimey had become Gold/Fantasy, it still could not figure out how to work Star Web's live stream.

Hence, it had not dared to live stream all this time as it was afraid that a GIF would block it without Genius's help.

After Lin Yuan played with Chimey for a while, Genius and Chimey went back to the top of the Phoenix Perching Chinese Parasol Tree.

Lin Yuan laid the Sea Burial Lotus Flower and Golden Lotus Brocade Pearl on each side of him.

He placed each Fairy's Heart on the Golden Lotus Brocade Pearl ortet and flower core of the Sea Burial Lotus Flower.

Soon, the pink gems that were the Fairy's Hearts started to crack.

The pink energy flowed from the gem into the Sea Burial Lotus Flower and Golden Lotus Brocade Pearl.

Shortly after, the pink energy disappeared, and Lin Yuan quietly waited for the Golden Lotus Brocade Pearl and Sea Burial Lotus Flower to change.

It was not long after that Lin Yuan saw a flower grow out of the Golden Lotus Brocade Pearl ortet and the Sea Burial Lotus Flower's flower core.

The flower stopped growing after it reached a height of one meter and a small ball grew at the top of it.

The small ball started to expand, and Lin Yuan was sure that it was a fruit.

The fruits that were growing on the Golden Lotus Brocade Pearl and Sea Burial Lotus Flower were different in that the one on the Golden Lotus Brocade Pearl was golden with pink patterns while the one on the Sea Burial Lotus Flower was white with moving colored spots.

#### **Chapter 774: The Golden Lotus Brocade Pearl's Transformation into a Fairy**

It was actually not urgent whether the Sea Burial Lotus Flower finished mutating or not.

Once it transformed into a fairy-type source-type lifeform, the Sea Burial Lotus Flower would still be able to absorb spotted coral jade and continue mutating.

The Sea Burial Lotus Flower would be able to communicate clearly with Lin Yuan when it gained intelligence and would choose the spotted coral jade for itself.

There were many different kinds of spots on the coral jade, and almost every ten spots were different.

When Lin Yuan had been nurturing the spotted coral jade, he did not think to organize them and just took whatever he saw.

However, now that he thought about it, it seemed that the more spots a coral jade had, the better it was for the Sea Burial Lotus Flower's evolution.

Both flowers started off growing at the same rate.

But it soon became clear that the Golden Lotus Brocade Pearl's flower was growing much faster than the Sea Burial Lotus Flower's flower.

The fruit had to be containing the fairies that the Golden Lotus Brocade Pearl and Sea Burial Lotus Flower was going to transform into.

The Sea Burial Lotus Flower was slightly slower because the transformation faced resistance from the messy thoughts forming in the Sea Burial Lotus Flower.

While the two fruits grew larger, they were also expeditiously absorbing the spirit qi in the Spirit Lock spatial zone.

Lin Yuan placed his hand on the fruits and circulated his spiritual power to inject pure spirit qi into the fruits.

With Lin Yuan's help, the two fruits were visibly becoming larger.

Lin Yuan dared not leave the Spirit Lock spatial zone at this time in case the two rascals that hatched recognized someone else as their master.

If that happened, Lin Yuan might break out into tears.

The fairies that hatched formed a lifelong attachment to the first lifeform they saw.

The lifeform did not have to be human.

There were many lifeforms in the Spirit Lock spatial zone, not to mention that the two fairies could also gaze upon each other first.

Hence, Lin Yuan instructed Source Sand to create two separate rooms in front of him using ferromanganese chain blades.

The rooms were sealed on all sides except for the entrance where Lin Yuan stood. This would ensure that the two fairies that hatched would see him first.

Soon, the fruit on top of the Golden Lotus Brocade Pearl's flower broke open.

A small fairy with transparent wings about the size of Lin Yuan's palm flew out.

The fairy's long pink hair was the same shade of pink that was on the Golden Lotus Brocade Pearl.

The fairy's white skin contrasted against the golden tutu it was wearing. The round tutu made it look like a golden bell.

After the fairy hatched, it started to inspect its surroundings curiously and flew over to Lin Yuan the moment it spotted him.

It held Lin Yuan's face and stroked it affectionately before flying around him in a dance-like fashion.

At that moment, Lin Yuan noticed that the Sea Burial Lotus Flower's fruit was also about to break open.

He quickly hid the hatched fairy behind him to ensure that the Sea Burial Lotus Flower's fairy would see him first.

A small figure in white armor that was etched with lotus flower carvings and had three sets of silver wings at its back emerged.

Its long silver hair swayed behind it, and it looked like a blooming silver lotus.

The Sea Burial Lotus Flower's fairy was dazed for a moment before it laid eyes on Lin Yuan.

Its stern expression turned a strange scarlet as it flapped its wings and landed on Lin Yuan's finger to look up into his eyes.

Lin Yuan was almost hypnotized by the Sea Burial Lotus Flower's fairy. Why did it have to look at him with such a flushed expression?

Suddenly, the Sea Burial Lotus Flower's fairy started to cry out in an extremely pleasant voice.

The Sea Burial Lotus Flower's fairy hurriedly waved its small hands around and seemed to be signaling something to Lin Yuan.

The Sea Burial Lotus Flower's fairy had acknowledged Lin Yuan as its master after taking one look at him. However, Lin Yuan had not formed a contract with the Sea Burial Lotus Flower. Thus, it could not communicate with him spiritually.

The Sea Burial Lotus Flower and Golden Lotus Brocade Pearl had acknowledged their master like how dogs would.

Although the person had a limited relationship with the dogs, the dogs regarded the person as their everything.

It was likely that these two fairies felt closer to Lin Yuan due to this bond at first sight as compared to the feys that Lin Yuan had formed contracts with.

A thought struck Lin Yuan as he looked at the Sea Burial Lotus Flower's fairy's anxious movements.

Fairy-type source-type lifeforms were more intelligent than spirit qi professionals, and they could learn languages through listening.

However, it would take some time.

It would take them a month of training before they could communicate and reply freely.

But with the capable Genius as their teacher, it would not require so much time.

Lin Yuan shouted up to the top of the tree, "Genius, come teach your students."

Genius heard Lin Yuan's shout and let out a short meow before it tunneled out of the foliage.

It ran to Lin Yuan's leg and climbed up to Lin Yuan's shoulder to nuzzle his face.

"Yuan, I've finished learning all the Class 4 Scholar, Fey Observer, and Spiritual Ingredient Analyst knowledge. However, there isn't any Class 5 knowledge available on Star Web to buy. Thus, I've been looking through the information banks on Star Web on my own and picking up random knowledge. From now on, I'll be able to teach the little kitties even better," said Genius in a child-like voice.

Lin Yuan knew that Genius was thinking about how it would have to teach the Hundred Questions Beasts soon.

It seemed that Genius was full of responsibility.

"Okay. Regarding the Class 5 information, I'll take you to the Hidden Moon Pavilion with me soon. The 108th, 109th, and 110th levels are set aside for Class 5 Scholar, Fey Observer, and Spiritual Ingredient Analyst knowledge. We can go look at them together."

While talking to Genius, Lin Yuan noticed that the Golden Lotus Brocade Pearl's fairy continued hiding behind him ever since the Sea Burial Lotus Flower's fairy emerged.

Lin Yuan was slightly surprised by this.

He placed a hand behind his back, and a weight landed on his fingers.

Lin Yuan knew that the Golden Lotus Brocade Pearl's fairy had landed on his fingers.

He brought his hand back to his front and immediately saw the Golden Lotus Brocade Pearl's fairy quivering slightly as though it was afraid of something.

### **Chapter 775: Six-Winged Silver Corona and Two-Winged Brocade Zither**

Lin Yuan immediately deemed this situation as important.

There was nothing indecent in the Spirit Lock spatial zone, and the Golden Lotus Brocade Pearl's fairy had been very lively when it had just hatched.

It had not seemed afraid at all.

It all started when the Sea Burial Lotus Flower's fairy hatched.

This meant that the Golden Lotus Brocade Pearl's fairy was naturally afraid of the Sea Burial Lotus Flower's fairy.

Lin Yuan tried moving his right hand closer to his left.

When the Golden Lotus Brocade Pearl's fairy came closer to the Sea Burial Lotus Flower's fairy, the Golden Lotus Brocade Pearl's fairy's terror became more obvious.

Suddenly, Lin Yuan remembered the information that the Moon Empress had shared about fairy-type source-type lifeforms and noticed something he had missed.

There were many dragon-species feys with many dragon-species feys' bloodlines that could not be unlocked.

As such, they would not be able to completely unlock the wyrm-species fey and terrifying dragon-species feys' bloodlines, much less moving upwards to become the main dragon-species fey.

But it was not only dragon-species feys that had clear bloodline levels. All feys had set rankings that separated their bloodline.

There were even some feys and source-type lifeforms that had even stricter discrepancies between their bloodline rankings. This included fairy-type source-type lifeforms.

The bloodline of fairy-type source-type lifeforms was separated mainly based on their number of wings.

Fairy-type source-type lifeforms with one pair of wings were the most common and considered the lowest bloodline level.

Next up were fairy-type source-type lifeforms with two pairs of wings.

These source-type lifeforms were already considered the elite amongst fairy-type source-type lifeforms. Liu Jie's Insect Queen and Chu Ci's Burning Sunflower Twins were fairy-type source-type lifeforms with two pairs of wings.

In the information regarding fairy-type source-type lifeforms in the Radiance Federation, those with two pairs of wings were considered to be the top.

It was only three years ago that a fairy-type source-type lifeform had unexpectedly transformed when it evolved to Myth Breed and grew a third pair of wings.

This had completely rewritten the understanding of fairy-type source-type lifeforms in the Radiance Federation.

According to legend, fairy-type source-type lifeforms with three pairs of wings were the emperors of fairy-type source-type lifeforms. The fairy-type source-type lifeforms with only one pair of wings had zero authority.

The fairy-type source-type lifeforms with three pairs of wings also had a fair amount of bloodline power over those with two pairs of wings.

It was found that fairy-type source-type lifeforms with three pairs of wings could rely solely on their bloodline to suppress two-thirds of the fighting power of those with two pairs of wings.

It could be seen as a form of bullying.

Besides being an icon of bloodline ranking, the number of wings also indicated a fairy-type source-type lifeform's potential.

Lin Yuan did not expect that one of the fairies he hatched using the Fairy's Hearts would have three pairs of wings.

He felt that one of the reasons was that the Sea Burial Lotus Flower had an extremely high potential while it was mutating.

Another reason was that luck was on his side.

Otherwise, it was impossible for him to attain a fairy-type source-type lifeform with three pairs of wings so easily.

Moreover, the fairy-type source-type lifeform with three pairs of wings that was recorded had been transformed from one with two pairs of wings.

This meant that fairy-type source-type lifeforms had a chance of transforming and gaining more wings when they evolved.

*The Sea Burial Lotus Flower's fairy had three pairs of wings. Does this mean that the mutating Sea Burial Lotus Flower's fairy with an ocean of potential has a chance of transforming to gain four pairs of wings?*

When Lin Yuan was about to comfort the Golden Lotus Brocade Pearl's fairy, the Sea Burial Lotus Flower's three pairs of wings started to flap faintly.

It flew off Lin Yuan's finger and landed behind the Golden Lotus Brocade Pearl's fairy.

The Sea Burial Lotus Flower's fairy looked at Lin Yuan and took the Golden Lotus Brocade Pearl's fairy's hand in its own.

Lin Yuan sensed that the quivering Golden Lotus Brocade Pearl's fairy had frozen.

He immediately knew the Sea Burial Lotus Flower's fairy to reach out to soothe the Golden Lotus Brocade Pearl's fairy.

He was surprised that the Sea Burial Lotus Flower's fairy was so empathetic.

Lin Yuan said, "Genius, use Connected Tails and transfer all knowledge regarding language, world affairs, and general knowledge to them."

Genius responded with a meow. Its bright blue eyes shone as two of its tails fell off.

With Genius's body as the source, the two tails extended toward the two fairy-type source-type lifeforms.

When the Connected Tails reattached to Genius' body, Lin Yuan heard a cold and intimate voice ring out next to his ear. "Master, please give me a name!"

Another lively but more subdued voice chimed in eagerly, "Master, I want a name too!"

Fairy-type source-type lifeforms were very intelligent, and intelligent lifeforms always placed priority on being named.

Lin Yuan felt that naming could not be easier.

The Sea Burial Lotus Flower's fairy had bright silver hair and spots on its white armor. Its skin was fair, and its personality was haughty yet intimate. Lin Yuan felt that Silver Corona would be a good name for it.

The Golden Lotus Brocade Pearl's fairy was wearing a pink and golden skirt. It also had a very petite figure.

Although it had a lively personality, it was very obedient. Taking into account the Golden Lotus Brocade Pearl's characteristics, Lin Yuan felt that a good name for it would be Brocade Zither.

Lin Yuan said to the two fairies, "One of you shall be named Silver Corona while the other shall be named Brocade Zither. How does that sound?"

Immediately after Lin Yuan named them, he heard the Sacred Sword Wielding Queen's voice in the depths of his soul.

"Lin Yuan, you've changed!" said the Sacred Sword Wielding Queen.

Lin Yuan was surprised by the Sacred Sword Wielding Queen's words. He did not understand how he had changed.

*Did I become more handsome?*

However, Lin Yuan could tell that the Sacred Sword Wielding Queen was a bit hurt from sensing his soul.

He did not know what had happened to the Sacred Sword Wielding Queen, but he knew of a good way to comfort it.

Lin Yuan said to the Sacred Sword Wielding Queen, "I'll treat you to a feast soon. I've accumulated almost 1,000 Law Source Crystals."

Once Lin Yuan spoke, he used his soul to sense the Sacred Sword Wielding Queen's mood and realized it was no longer upset.

### **Chapter 776: Silver Corona Completely Transformed**

The Sacred Sword Wielding Queen was only full of happiness and hope now.

Lin Yuan could not help but sigh at how easily gluttons were placated with food.

The Golden Lotus Brocade Pearl and Sea Burial Lotus Flower's fairies murmured the names they were given, and the Sea Burial Lotus Flower's fairy flew up to Lin Yuan's shoulder to kiss his face.

The Sea Burial Lotus Flower's fairy's cold expression became even more flushed as it whispered, "Master, I like the name Silver Corona."

Lin Yuan did not think that it was strange for Silver Corona to kiss him as it was just a sign that it liked its name.

Although Brocade Zither also wanted to fly up to Lin Yuan's shoulder and be closer to him, it did not dare to land next to Silver Corona.

Silver Corona noticed how Brocade Zither was acting and pulled Brocade Zither down to land on Lin Yuan's shoulder.

"Master, I like my name too," said Brocade Zither meekly.

Lin Yuan used True Data to check on Silver Corona and Brocade Zither's characteristics.

Brocade Zither's True Data showed that it had perfectly inherited everything from the Golden Lotus Brocade Pearl.

[Fey Name]: Golden Lotus Brocade Pearl (Brocade Zither)

[Fey Species]: Crassulaceae genus/Cyperus-type

[Fey Grade]: Bronze (10/10)

[Fey Type]: Source/Fairy

[Fey Quality]: Legend

Abilities:

[Copious Juices]: Increase the amount of juices stored in the leaves and congeal it into protein when properly nourished.

[Wrap Leaves]: When the leaves mature, a layer of wood protein will form on the exterior, which will store all the energy from inside the leaves.

Exclusive Skill:

[Lively Plant Pearls]: After training, the plant pearls will form new ones if they are sufficiently nourished. When nutrients are depleted, the new pearls will provide the main pearl with some nourishment. However, if the new pearls grow newer Lively Plant Pearls, they will separate from the main body to form an independent plant pearl.

It could be said that besides the change in type, the abilities and exclusive skills were all the same.

But after the Sea Burial Lotus Flower transformed into Silver Corona, the information on True Data had changed significantly.

The information about Silver Corona indicated that it was transforming.

The Sea Burial Lotus Flower had been growing quickly in the Spirit Lock spatial zone, and its grade had unknowingly evolved to Silver VII/Epic.

The Sea Burial Lotus Flower had always been different from other feys, and it did not evolve even when Lin Yuan injected pure spirit qi into it.

The Sea Burial Lotus Flower's grade and quality were connected to the strength of the Sobbing Sea Crystals.

However, after the Sea Burial Lotus Flower transformed into Silver Corona, its method of evolution seemed to have changed slightly.

Such change was indicated as a suppressed state on True Data.

Feys knew best how to evolve themselves.

When Silver Corona's intelligence had still been developing, Lin Yuan had to guess everything about its transformation and evolution.

Now, Lin Yuan could just ask Silver Corona if he had any questions about it.

"Silver Corona, is there anything I can do to help you during your transformation?"

Silver Corona hurriedly replied, "Master, I was just about to ask you if you could pluck my Sobbing Sea Crystals for me."

Lin Yuan was surprised by Silver Corona's words. The Sobbing Sea Crystals were Silver Corona's main source of energy.

*Why does Silver Corona want me to pluck its main source of energy? Won't it cause its grade to drop from Silver VII/Epic to Normal I/Normal?*

However, Lin Yuan did not reject Silver Corona's request.

Lin Yuan strode toward the Sea Burial Lotus Flower's main body and plucked the Sobbing Sea Crystals.

Once Lin Yuan plucked the Sobbing Sea Crystals, Silver Corona weakly collapsed onto Lin Yuan's shoulder.

Brocade Zither was very nervous and worried about seeing Silver Corona fall from mid-air.

Lin Yuan checked on Silver Corona and the Sea Burial Lotus Flower using True Data and noticed that both had fallen to Normal I/Normal.

At that moment, Lin Yuan heard Silver Corona exclaim in delight, "Master, I can finally break through and complete my transformation!"

Silver Corona weakly flew over to the Sea Burial Lotus Flower's main body. A moment later, rainbow lotus flowers bloomed at Silver Corona's feet.

The rainbow lotus flowers caused corals to grow towards the roots.

Suddenly, the Sea Burial Lotus Flower's roots became active and wrapped around the corals like snakes.

Finally, the roots seemed to melt and combine with the corals.

The spots on the corals quickly moved toward the Sea Burial Lotus Flower's white flowers through the roots and caused the number of spots on the white flowers to double.

At that moment, Lin Yuan noticed Silver Corona's aura shift from its cold intimacy to intense loneliness.

This intense feeling of carnage made Lin Yuan feel as though he had returned to a desolate sea bed that only had Bone Lotus Flowers as far as the eye could see.

As the spots on Silver Corona's armor increased and moved, a large crown made of corals appeared on its head.

The crown looked extremely odd and was at least twice as large as Silver Corona's body.

When the crown appeared, Silver Corona's aura started to increase.

The spots in the coral jade had mostly been transferred to the small white flowers.

Lin Yuan realized that the Normal I/Normal Sea Burial Lotus Flower had evolved to Elite X/Epic and was evolving to Bronze grade.

He also noticed that Silver Corona was no longer a carcinoma fey.

It had now transformed into a fey with true abilities.

"Master, please choose my exclusive skill!" said Silver Corona.

Silver Corona's aura increased again when it spoke, and it broke through its Bronze grade limit to become Bronze I/Normal.

### **Chapter 777: Exclusive Skill**

When Lin Yuan saw Silver Corona's three exclusive skills, he could not help but inhale sharply.

Although Silver Corona was a carcinoma fey that had transformed, it was still a fey that was inclined toward carnage.

Lin Yuan felt that all three exclusive skills would spread copious carnage.

The three exclusive skills were:

[Hanging Devil's Soul]: The target that Bone Lotus Flowers have attacked will have its soul trapped within the Bone Lotus Flower's bone soul. The bone soul will have a cursing effect and use the powers of the dead to curse the living. The aura of the dead will be used to suppress the living's vitality.

[Hermit's Dead Servant]: The Bone Lotus Flower will absorb the target's body when attacking it. 1% of the target's power will be injected into the target's soul to cause the target to be pregnant with its dead soul. The dead soul will consume itself, and when the Bone Lotus Flowers gain 36 hermit dead servants, every hermit dead servant will be able to create a layer of mist over the Bone Lotus Flowers.

[Parasitic Bone Seed]: The Sea Burial Lotus Flower's Sobbing Sea Crystals will become a parasitic seed that will be planted in bone. When the Sea Burial Lotus Flower activates the seed, the energy in the seed will be released into the bone to increase the bone's strength.

Lin Yuan felt that all three exclusive skills were impressive.

However, after some comparison, Lin Yuan decided to give up on Parasitic Bone Seed.

In every living being, bones only served the purpose of supporting and protecting organs.

When the bone that Parasitic Bone Seed hardened suffered physical damage, the bone would be able to sustain heavy attacks.

If Lin Yuan chose Parasitic Bone Seed, his much lacking defense would be supplemented.

Lin Yuan's defense would be perfectly formed when used in conjunction with Genius' Spiritual Energy Expansion and the Ethereal Jellyfish's Spatial Shift.

However, Parasitic Bone Seed required the use of one Sobbing Sea Crystal every time the ability was used. As such, Parasitic Bone Seed would be too precious to utilize.

Moreover, Lin Yuan needed to use the Sobbing Sea Crystals to evolve the Jasmine Lily.

Lin Yuan also could not accept having a parasitic seed embedded in his body.

Although Parasitic Bone Seed was a support-type ability, Lin Yuan still felt uncomfortable about it.

Hanging Devil's Soul and Hermit's Dead Servant appeared to be similar, but there were vast differences between them.

No matter which of the two exclusive skills Lin Yuan chose, the Sea Burial Lotus Flower would be destined to use the sea of flowers as its main combat attack on land.

However, the Sea Burial Lotus Flower's combat style was very different from Red Thorn's.

Red Thorn's sea of flowers was more lively and could be used in any battle.

However, the Sea Burial Lotus Flower's sea of flowers needed a piece of land where the living targets' souls could be absorbed to increase the sea of flowers' power.

If Red Thorn's Sea of Flowers was thought of as a weapon, the Sea Burial Lotus Flower's would be more like a defensive attack mechanism that had to be rooted to a base.

Since Lin Yuan planned on going to the Divine Wood Federation, he would be able to plant many Bone Lotus Flowers around his base there.

This would allow his base at the Divine Wood Federation to become a restricted area.

Restricted areas always attracted risk-takers.

There was a saying that curiosity killed the cat.

Cats might have nine lives, but spirit qi professionals only had one.

Once news of the restricted area spread, there would be an endless stream of people who would take the risk and end up helping the Sea Burial Lotus Flower increase its power.

In order for the news of the restricted area to spread, many people had to die at the hands of the Sea of Flowers first.

As the Sea of Flowers' power increased, there would also be even stronger individuals who stepped forward to take the risk.

Lin Yuan felt that this idea of his made him seem like some kind of Demon Lord that awaited for brave souls to challenge him.

Frankly, Silver Corona's exclusive skills did not need to take the life of spirit qi professionals. Another good method would be to find an active dimensional rift and build a base there instead of extracting dimensional lifeforms out of the dimensional rift.

The endless supply of dimensional lifeforms would feed and sustain the sea of flowers.

When this thought struck Lin Yuan, he decided which of the two exclusive skills he would choose.

He felt that Hermit's Dead Servant was better suited to the combat system that Lin Yuan had in mind for Silver Corona.

Hanging Devil's Soul was not weak. In fact, it was much better at nurturing souls than Hermit's Dead Servant.

Hanging Devil's Soul could trap a dead target's soul in the Bone Lotus Flowers, but there would not be much damage done to the soul.

Hermit's Dead Servant could only incorporate 1% of the target's power into the soul and form a dead soul in the Bone Lotus Flower.

This meant that Hanging Devil's Soul would be much better at increasing the effectiveness of the sea of flowers.

However, Hanging Devil's Soul was not as premium as a form of nurturing the dead soul.

Since Lin Yuan wanted to create a sea of flowers outside of his base at the Divine Wood Federation to make it into a restricted area, he needed a strong entity to defend the area.

As the sea of flowers killed more living creatures, the powers of the 36 dead servants would continue to climb as well.

This would form a cycle of support between the Bone Lotus Flowers.

Lin Yuan was also very interested in the dead servants' ability to create a mist over a battleground.

The mist would cover the entire sea of flowers and hide it.

A restricted area was dubbed as so because it was kept very secretive.

If they could be seen clearly, it would be considered a dangerous area instead of a restricted area.

Lin Yuan made a decision and said to the waiting Silver Corona, "Silver Corona, choose Hermir's Dead Servant!"

### **Chapter 778: A Scary Ability Centered on Carnage**

After Silver Corona received Lin Yuan's order, it immediately chose its exclusive skill.

When it was done evolving, the aura of desolate carnage dissipated, and it returned to its intimate demeanor as it flew around peering at Lin Yuan.

Silver Corona noticed Lin Yuan looking at it, and it hastily looked away. But its flushed face became like a fiery cloud that drifted over its face.

Lin Yuan was secretly surprised as he watched the flying Silver Corona.

While Silver Corona had been evolving, Lin Yuan had used True Data to check on the effects of the spots that Silver Corona had absorbed.

It was these effects that made Lin Yuan understand why Silver Corona had three pairs of wings.

From the moment it was born, it reached the pinnacle of the fairy-type source-type lifeform bloodline.

Lin Yuan composed himself before looking at the information on True Data again.

[Fey Name]: Sea Burial Lotus Flower (Silver Corona)

[Fey Species]: Water Willow/Water Bone Lotus

[Fey Grade]: Bronze (1/10)

[Fey Type]: Source/Fairy

[Fey Quality]: Normal

Abilities:

[Spotted Coral]: Different effects are generated when trained according to the spots on the coral jade.

1. Nurture Spot Style: Nurture the spots that were absorbed from the spotted coral jade in the Bone Lotus Flowers. The Bone Lotus Flowers will use a living being's life and soul to nurture the spots to give

them vitality. The spots with vitality can use the living being's original strength to increase the strength and stamina of the Bone Lotus Flowers.

2. Burial Spot Style: Place the spots in between the Bone Lotus Flowers. The spots will eat the Bone Lotus Flowers and become bone insects. According to the abilities, the bone insects will retain the spot's abilities and can deal with attacks on the Bone Lotus Flowers. The external life force will be absorbed, and when the external life force is still weak, their soul can also be absorbed.

[Bone Powder Mist]: The Bone Lotus Flowers will vomit out the living being's bones that could not be digested. The bone powder will fly up into the sky and stay in the coral spots once it reaches a set thickness of layer.

Exclusive Skill:

[Hermit's Dead Servant]: The Bone Lotus Flower will absorb the target's body when attacking it. 1% of the target's power will be injected into the target's soul to cause the target to be pregnant with its dead soul. The dead soul will consume itself, and when the Bone Lotus Flowers gain 36 hermit dead servants, every hermit dead servant will be able to create a layer of mist over the Bone Lotus Flowers.

The more Lin Yuan looked at Silver Corona's True Data, the harder it became for him to compose himself.

When Lin Yuan saw Silver Corona's Hermit's Dead Servant, Spotted Coral and Bone Powder Mist seemed to be very strong.

Lin Yuan had chosen Hermit's Dead Servant to be Silver Corona's exclusive skill because it suited the idea that Lin Yuan had in mind and because it would be compatible with Spotted Coral and Bone Powder Mist.

He had already used True Data to check on countless feys. He had also seen the data of Myth Breed feys like the Mother of Bloodbath.

However, the Mother of Bloodbath's normal abilities were not as complicated as Silver Corona's.

Silver Corona's Spotted Coral was separated into two states, Nurture Spot Style and Burial Spot Style.

The spots that Silver Corona absorbed came from spotted jade, which appeared because the pure spirit qi had led the coral jade to display its life patterns.

The coral jade was the petrification of deep-sea corals, and corals were formed from countless small coral polyps.

The Nurture Spot Style used the coral polyps' original abilities to evolve the Sea of Flowers.

Lin Yuan also knew that every kind of spot could support the Sea of Flowers to some extent.

The Burial Spot Style was the result of Silver Corona's carnage after transforming into a fairy-type source-type lifeform.

This state allowed Silver Corona's original attack style to become more flexible.

Once the spots nurtured by the Bone Lotus Flower entered the Burial Spot Style, they would start to eat the Bone Lotus Flowers and become bone insects.

The small bone insects would be able to kill any lifeform that entered the Sea of Flowers.

The bone insects' attack would absorb not only the lifeform's vitality but also its soul.

Moreover, the small bone insects would be subtly absorbing the vitality and soul, making this form of attack imperceptible.

The people who stepped into the restricted area would feel their vitality draining away and becoming weaker until they had no chance of escape.

By the time the lifeform sensed itself getting weaker, it would probably already be time for the bone insects to attack.

The Nurture Spot Style increased the sea of flowers while the Burial Spot Style enabled bone insects to release hidden explosive lethality.

This allowed the spots' effects to be maximized to the extreme.

In order to activate the portion of the sea of flowers that the bone insects had eaten, Silver Corona only needed to accumulate its spiritual power and the vitality of the lifeform.

Silver Corona's Spotted Coral was enough for Silver Corona to use carnage and robbery to raise its ferocity.

Bone Powder Mist was very malleable and could act as both support and attack.

The Bone Lotus Flowers would vomit out the undigested bone, but the coverage of the bone powder was not strong.

Although the bone powder could block light, it could only block spying by spirit qi professionals from a distance.

When the spirit qi professionals were near, the bone powder's obscurity ability would weaken significantly.

But now that Silver Corona had Hermit's Dead Servant, the 36 dead servants could all produce a layer of mist to cover the sea of flowers.

The 36 layers of mist would be able to make up for the Bone Powder Mist's shading ability.

The actual impressive part of Bone Powder Mist was not the shading ability. It was that Bone Powder Mist increased the area of battleground that Silver Corona could control and allowed the sea of flowers to also control the battle from the air.

This would turn the battleground from being just on land to being on air instead.

Even if someone attacked the sea of flowers from the air, as long as it was in the area above the sea of flowers, they would be attacked by the bone insects, and their vitality and soul would be drained away.

**Chapter 779: Brocade Zither Feels Inferior**

Lin Yuan waved to Silver Corona and let out a heavy breath before saying, "Silver Corona, come here."

Silver Corona quickly flew up to Lin Yuan's face, reached out to touch his nose, and looked into his eyes.

Lin Yuan could not help but smile brightly at Silver Corona as he waved and summoned a large amount of coral jade.

"Silver Corona, take a look at these coral jades. Pick out those that can increase the variety of your spots."

Silver Corona bumped its face against Lin Yuan's nose and said in a haughty and affectionate voice, "Master, you're so nice to me!"

The crown on Silver Corona's head lit up, and eight rainbow lotus flowers grew out of Silver Corona's silver hair.

The rainbow lotus flower petals were like fingers that sifted through the pile of coral jades.

A calm and warm smile spread across Silver Corona's face. It did not look like a fey that lived to kill at all.

Lin Yuan also felt slightly down when he saw how happy Silver Corona was around him.

Silver Corona was basically one of his contracted feys.

Naturally, Lin Yuan was happy that Silver Corona was strong. However, this power astonished him.

Silver Corona's power was considered annihilation-class amongst carcinoma feys. It could be considered a king amongst carcinoma feys.

If Silver Corona casually unleashed its power, it would quickly become an unmitigated disaster.

Lin Yuan felt that this power could rival that of sacred source lifeforms.

When compared to the abilities of sacred source lifeforms, Silver Corona could not match up.

However, when it came to increasing battle power, Silver Corona could devastate any battle on land.

Lin Yuan could not help but clench his fist when he thought about this power that he held.

But when he thought about Chu Ci, the Moon Empress, Uncle Li and Auntie Zhang, and everyone in the Return from Faraway Mansion, Lin Yuan's heavy spirits lifted and were replaced by a sense of power.

Besides being to be used as a method of killing, power could also protect.

Lin Yuan needed this power to protect those around him.

Silver Corona's power was only at Bronze grade now. Lin Yuan could not imagine what it would become when it evolved to Myth Breed.

After Silver Corona became a fairy-type source-type lifeform, its method of evolution had changed completely.

The Sea Burial Lotus Flower could absorb pure spirit qi and condense it into Sobbing Sea Crystals. However, Sobbing Sea Crystals could no longer affect the current Silver Corona's grade and quality.

Now, the Sea Burial Lotus Flower's Sobbing Sea Crystals were just an innate ability.

Silver Corona and Red Thorn had similar methods of evolution now. The only difference was that Red Thorn needed to consume flesh to evolve while Silver Corona absorbed the souls of living beings to do so.

After Lin Yuan returned from the Radiant Moon Palace, he could use the Ethereal Jellyfish to activate its tentacles and open a Space Tunnel to the Divine Wood Federation.

But the basement had not been fully constructed yet. Moreover, the Guard Ye Banquet was almost here, and Lin Yuan did not have the time to personally make a trip to the Divine wood Federation for training.

Lin Yuan felt that after he created the Space Tunnel, he would need to use the Ethereal Jellyfish's tentacles to find another suitable location.

The location that Mystic Moon had chosen would never have a large number of low-class dimensional rifts opening there.

In order to nurture the 36 dead servants quickly, Lin Yuan could not think of a better way than to use dimensional lifeforms.

Silver Corona quickly sorted through the coral jades.

Lin Yuan laid out the coral jades that Silver Corona had chosen on the Spirit Lock spatial zone floor.

He took out another large pile of coral jades for Silver Corona to look through. Since spotted coral jade could increase Silver Corona's battle power, Lin Yuan could move around the items in the Spirit Lock spatial zone to make more space for the nurturing of coral jades.

Ever since Silver Corona hatched, Brocade Zither had clearly been acting very shy.

Under the pressure of its bloodline, Brocade Zither could not express any overwhelming emotion, regardless of how kind Silver Corona was to it.

Lin Yuan gestured for Brocade Zither to land on his palm and said, "Brocade Zither, how many pearls can you nurture at once?"

Brocade Zither coyly reached out one finger.

Lin Yuan frowned and asked in disbelief, "1 string?"

Brocade Zither shook its head.

Lin Yuan guessed again. "10 strings?"

Brocade Zither shook its head again.

This made Lin Yuan feel relieved as he asked again in a more relaxed tone, "100 strings?"

Once again, Brocade Zither shook its head.

Just as Lin Yuan was about to happily increase his guess, Brocade Zither said sweetly, “Master, this one finger means that I can keep producing. I can produce as many strings as I please! After all, the strings are just casual snacks to me!”

Brocade Zither took a breath of pure spirit qi and continued. “With so much spirit qi in here for me to absorb, I don’t even want to eat those snacks anymore.”

Lin Yuan looked at Brocade Zither in shock. He did not expect the Golden Lotus Brocade Pearl to think of the strings of pearls as snacks.

As for what it said about continuous production, Lin Yuan was rendered speechless.

He knew that Brocade Zither had misunderstood what he meant and asked, “Brocade Zither, how long does it take one string to separate itself from you?”

Brocade Zither stuck out another finger and replied, “About 1.5 hours. However, I won’t be able to eat them once they’re separated from me.”

Lin Yuan gently pinched Brocade Zither’s face and said, “You little imp. Why even think of eating these snacks when you can have all the spirit qi you want in the Spirit Lock spatial zone? Brocade Zither, nurture a few strings for me. The strings of pearls are really useful to me!”

Brocade Zither nodded in delight.

Once Brocade Zither transformed into a fairy-type source-type lifeform, it became highly intelligent. It regarded Lin Yuan as its father and felt deep affection for him.

However, Silver Corona had hatched before they could become close.

Silver Corona was born with six wings, while Brocade Zither only had two. This made Brocade Zither uncontrollably terrified of Silver Corona.

Brocade Zither suddenly felt inferior.

### **Chapter 780: What Does the City Lord of Sky City have to do with Lin Yuan?**

Now that Brocade Zither knew that it could be of help to Lin Yuan, its feelings of inferiority decreased significantly.

Brocade Zither joyfully flitted around, and its round golden tutu bobbed around adorably.

Lin Yuan brought Brocade Zither over to the Pure Land of Bliss. The Cinnabar Sweet Osmanthus, which had been planted in the Pure Land of Bliss to heal itself, had been moved to the mansion’s yard.

This had left a hole in the Pure Land of Bliss that Lin Yuan had yet to fill.

Now, Brocade Zither could nurture Golden Lotus Brocade Pearls in the space left behind.

The Pure Land of Bliss would also increase the rate of production of child ramets.

Brocade Zither nurtured Golden Lotus Brocade Pearls differently from Master Hong Shen.

When Master Hong Shen nurtured child ramets, he used external energy in the form of spirit fluids.

Meanwhile, Brocade Zither injected its own energy into the child ramets.

After a prolonged period, Brocade Zither's body would be damaged.

However, the Pure Land of Bliss was different because it had healing effects.

Brocade Zither would not be affected even if it continuously used its own resources to produce child ramets.

When Lin Yuan brought Brocade Zither over to the Pure Land of Bliss, it immediately started to plant child ramets.

Brocade Zither first planted numerous Golden Lotus Brocade Pearls in the Pure Land of Bliss before it released a golden pillar of light.

The golden pillar of light landed on the child ramets, which started to grow rapidly.

Lin Yuan squatted down by the Pure Land of Bliss's side and carefully observed the Brocade Zither nurturing the child ramets.

He realized that Brocade Zither only needed about an hour to finish nurturing a child ramet in the Pure Land of Bliss.

According to this rate, Lin Yuan would gain 20 Golden Lotus Brocade Pearls per day.

This rate of production far exceeded Lin Yuan's expectations.

Brocade Zither was as productive as five Class 4 Creation Masters combined.

This efficiency gave Lin Yuan a new business idea.

If Brocade Zither could keep this rate up, Lin Yuan would be able to change the way he used Golden Lotus Brocade Pearls. He would be able to sell the Golden Lotus Brocade Pearls commercially.

When there were enough Golden Lotus Brocade Pearls in the market, Lin Yuan just needed to evolve Brocade Zither.

Once Brocade Zither gained new abilities, the Golden Lotus Brocade Pearls it nurtured would be fundamentally strengthened.

As such, Lin Yuan would earn a large sum again as though the Golden Lotus Brocade Pearls were new on the market.

This cycle would allow Lin Yuan to accumulate innumerable resources.

Although this felt slightly like cheating, it was not Lin Yuan's fault that he was the only one who possessed the Golden Lotus Brocade Pearl. Hence, no matter how shady this source of wealth was, Lin Yuan would always dominate the market.

As long as Lin Yuan continued to produce better Golden Lotus Brocade Pearls, there would definitely be buyers. The stronger the effects of the Golden Lotus Brocade Pearls, the more factions and high-class Creation Masters would want to buy them.

The factions and high-class Creation Masters would benefit from the improved effects.

Lin Yuan would be able to create more Creation Master resources while still increasing his own store of Creation Master resources.

The factions and Creation Masters who did not manage to buy any could only be resigned to being left in the dust.

Lin Yuan would control the direction in which Creation Master resources flowed amongst the factions by continuously evolving the Golden Lotus Brocade Pearls.

When Long Tao brought back all the Golden Lotus Brocade Pearls that he had obtained from Lin Yuan back to Coiling Dragon's Valley, Coiling Dragon's Valley's Creation Masters would be able to subdue other factions once they evolved their resources.

There were no everlasting secrets amongst factions. The Miao family would definitely learn about the existence of the Golden Lotus Brocade Pearls sooner or later.

Once they found out, Connected Beast Park would definitely be anxious to get their hands on the Golden Lotus Brocade Pearls so they could compete with Coiling Dragon's Valley.

Otherwise, Connected Beast Park would be crushed under Coiling Dragon's Valley's feet.

Lin Yuan touched his chin as he fell deep into thought.

*I have three different identities. My identity as the City Lord is enemies with Connected Beast Park. But what does the City Lord of Sky City have to do with my identity as Lin Yuan? As Lin Yuan, I'm the Moon Empress' disciple! Even if the Miao family comes to me, or if I lure them here, I can always use the Golden Lotus Brocade Pearls to burn an enormous hole in their wallets!*

Lin Yuan might be enemies with the Miao family, but he would not mind using a different identity to suck Connected Beast Park dry.

He did not mind if the Miao family obtained the Golden Lotus Brocade Pearls eventually.

By the time they did, Lin Yuan would be able to evolve Brocade Zither.

At that time, Lin Yuan just needed to form another deal with Long Tao, and Coiling Dragon's Valley would pull ahead of Connected Beast Park again.

Even if Connected Beast Park begrudged him for cheating them, they would have to approach him again, and he would be able to violently shake their pockets empty.

He would not show any mercy to the Miao family. It was a must to be as greedy as possible.

Even if Connected Beast Park could make a comeback, Lin Yuan was determined to utterly crush them.

Lin Yuan checked the time and summoned the Sacred Sword Wielding Queen from the depths of his soul.

He had gathered a fair number of Law Source Crystals and decided to let the Sacred Source Wielding Queen absorb those he had on hand first.

The Sacred Source Wielding Queen had absorbed a significant number of Law Source Crystals.

Moreover, it needed some time to absorb Law Source Crystals.

If he did not make good use of time, the Sacred Source Wielding Queen would probably be unable to finish absorbing all the Law Source Crystals before the Guard Ye Banquet.

If the Dark Death Law could not evolve into the Dark Death World because of this, Lin Yuan would be tempted to smash his head into a wall.

When he had shown Long Tao the Law Crystals, he had noticed the yearning in Li Xuan's eyes.

Dark Clouds Bird Shrine would probably approach him to trade for Law Crystals in the next few days.

At that time, he would be able to gain more Law Source Crystals and complete Law Crystals.
