

Merchant 791

Chapter 791: Dark Clouds Bird Shrine's Visit

Lin Yuan did not need to use a lot of resources to solve Bei Xu's concerns.

Once Bei Xu gained the Sharp Shadow Bat, it could use Bat Colony Sucking to heal the portion of his waist that was cut out.

With Bat Colony Sucking to replenish Bei Xu's vitality, his flesh would regrow quickly without leaving a scar.

However, Bei Xu would have to experience some struggles in the process.

The Sharp Shadow Bat had been evolved to Legend quality, so Bei Xu would not have to worry about evolving it.

Genius' spirit fluids would solve the issue of evolving the Sharp Shadow Bat's grade.

In order to increase the sharpness of the Sharp Shadow Bat's wings, it needed to consume a large amount of metal-type spiritual ingredients and hard minerals.

Most of the dimensional rifts that opened in the Grotto Continent were subterranean dimensional rifts. Hence, there was no lack of rocks and metal-type spiritual ingredients.

After Bei Xu increased the Sharp Shadow Bat's grade after it evolved to Fantasy Breed, he would be able to rely on the Sharp Shadow Bat's power to explore Class 1 subterranean dimensional rifts.

If Bei Xu could find source-type lifeforms in the Class 1 subterranean dimensional rift and use the Sharp Shadow Bat's Bat's Fangs Blood Seed, he would be able to form a faction.

Wen Yu's face had completely drained of color, and the cat's eye stone had also become dim.

When Lin Yuan noticed Wen Yu's expression, he did not explain further to Bei Xu. All he said was, "You can do it."

Lin Yuan exchanged a look with Wen Yu. With Lin Yuan's agreement, Wen Yu disbanded the second Astronomical Parliament's parliamentary meeting.

Soon, Lin Yuan woke up on the chair in the training room. He immediately took out a few pieces of the Angelfish of Bliss' fish coat that had been roasted by Liu Jie and gave it to the pale Wen Yu.

When he handed her the roasted fish coat, he said, "Eat some of this fish coat, and you should feel better. You should also go to sleep and replenish your spiritual energy."

Wen Yu received the roasted fish coat from Lin Yuan with a smile and took a bite as she replied, "Young Master, these Angelfish of Bliss fish coats that Big Brother Liu roasted with maple syrup are really yummy. Even if my spiritual energy wasn't depleted, I wouldn't be able to hold back from eating some."

Lin Yuan immediately thought back to Genius eating the Angelfish of Bliss' fish coats.

The Angelfish of Bliss' fish coats had changed color after being roasted with a coating of maple syrup. With some of Liu Jie's other marinades, the fish coats tasted like jerky.

Genius had also liked eating it, and it always tried its best to find some even though its spiritual energy was never depleted like Wen Yu's was.

But ever since Genius knew that it was eating fish coats, it started to scorn it because it had always disliked eating fish.

Every time it needed to replenish its spiritual energy using fish coats after concocting spirit fluids, it scrunched up its face and put on a pained expression.

However, it still gobbled down the fish coats.

Lin Yuan felt that amongst all the feys he had contracted, Genius was the biggest troublemaker.

Wen Yu stretched as she munched on the fish coats.

"Young Master, I really need to sleep. Otherwise, I won't be able to focus. If I try to do anything now, my efficiency will be low. When you used Star Spirit Seat to send items to Bei Xu, the Astronomical Parliament absorbed the laws you sacrificed and grew 30 times of when it absorbed willpowers."

Lin Yuan felt a lot better after he heard what Wen Yu said.

Although Lin Yuan's Sacred Sword Wielding Queen could rely on its skirt to easily extract willpowers and laws from the Law Crystals of dead Fantasy Breed feys, willpowers and laws were still too precious.

The use of willpowers and laws in this manner was like a rich man throwing money away.

Anyone would feel reluctant to spend their resources this way, especially the rich and powerful Lin Yuan.

Since Wen Yu's Astronomical Parliament could evolve using the laws and willpowers that Lin Yuan spent, Lin Yuan did not feel as bad about sacrificing them.

Wen Yu went down from the training room on the third floor to her room on the second floor to rest.

Just as Lin Yuan was about to step out of the training room door, his phone started to ring.

When Lin Yuan picked up his phone, his eyes lit up, and he saw that the person calling was Long Tao.

Lin Yuan had guessed that when he showed the Law Crystals, Dark Clouds Bird Shrine, and Coiling Dragon's Valley would soon approach him.

The walls of Lin Yuan's mansion had a thick layer of Soundproof Rock embedded into them. Hence, there was perfect soundproofing even between adjacent rooms.

But judging from the time, Li Xuan should be arriving soon.

Lin Yuan felt that if Long Tao also wanted to talk face-to-face, he should ask Long Tao to come too.

Lin Yuan's schedule was packed in the time before the Guard Ye Banquet, and it would take up a lot of Lin Yuan's time if Long Tao and Li Xuan came at two different times.

The voice at the other end of the call said, "Lin Yuan, your Law Crystal really helped my father. When my father found out that I got it from you, he told me to contact you to express my gratitude."

Lin Yuan's eyes narrowed as he started to think.

He had not asked Wen Yu to investigate the Long family's Coiling Dragon's Valley and its experts, so he was not familiar with the Long family's situation.

However, that small piece of Law crystal was not enough for a Suzerain/Myth III fey to evolve to Creation Breed. However, it could allow a pinnacle Suzerain/Myth II fey to evolve to Myth III.

From Long Tao's words, it seemed that his father was the one who wanted to meet Lin Yuan.

Lin Yuan and Long Tao were friends with similar characters. Lin Yuan also planned on keeping Connected Beast Park under check by supplying Coiling Dragon's Valley with Golden Lotus Brocade Pearls.

Thus, Lin Yuan was not opposed to meeting Long Tao's father.

Lin Yuan had told Li Xuan to bring his elders to the Return from Faraway Mansion because he wanted to send a message to the other factions about what kind of a place Return from Faraway Mansion was.

But since Long Tao wanted to bring his father to express his thanks to Lin Yuan, they would demonstrate Coiling Dragon's Valley's power to its maximum.

The reason for the Long family's visit would differ from the Li family's. The Long family's faction would attract the attention of the other elite factions in the Royal Capital.

This would be able to better fulfill Lin Yuan's goal of branding the Return from Faraway Mansion with his title as the Moon Empress' disciple.

Chapter 792: One Line in Exchange for Evolution.

Lin Yuan immediately said, "Big Brother Long, you're too kind. Li Xuan is coming to my place. If you come too, we can go to the House of Envious Fragrance together."

Long Tao chuckled and replied, "Okay. I'll reserve a table at the House of Envious Fragrance and head over with my father."

Lin Yuan remembered Brocade Zither, which he had spent an entire day nurturing in the Spirit Lock spatial zone, and said, "I've prepared the Golden Lotus Brocade Pearls that we agreed on. You can take them back with you this time."

A look of delight spread across Long Tao's face. The Law Crystal had helped his father greatly. In a way, Lin Yuan had saved the Long family.

The Golden Lotus Brocade Pearls would benefit the Coiling Dragon's Valley's expansion as it increased their elite Creation Master resources by 10%.

Long Tao knew that his father had asked to see Lin Yuan to express his thanks but also to establish a deeper partnership with Lin Yuan.

Since Lin Yuan could produce 17 Golden Lotus Brocade Pearls so quickly, it meant that Lin Yuan had a decent store of Golden Lotus Brocade Pearls on hand.

Coiling Dragon's Valley still had the chance to trade for more Golden Lotus Brocade Pearls with Lin Yuan.

After Lin Yuan hung up the call with Long Tao, he went downstairs to the lobby to see the Mother of Bloodbath sitting on the water rhinoceros leather sofa entertaining Li Xuan and a white-haired elderly man with exceptionally bright eyes.

The Mother of Bloodbath stood up when it saw Lin Yuan.

The elderly man next to Li Xuan stood up, and Lin Yuan rushed to hand a Gold fey storage box to the Mother of Bloodbath.

Inside the Gold fey storage box were some of the Blood Brew Grapevine's slightly withered old leaves.

The process of withering could not be reversed. Even if these old leaves were left on the Blood Brew Grapevine, they would still end up withering.

Hence, Lin Yuan had pruned the old leaves. The Mother of Bloodbath could absorb the blood energy from these old leaves to increase its power.

Lin Yuan shot Li Xuan a radiant smile and said, "Big Brother Li, I'm done with my tasks. Sorry to have made you wait."

The way Lin Yuan addressed Li Xuan made the white-haired elderly man's nostrils contract.

The way that the elderly man looked at Li Xuan changed.

Although Dark Clouds Bird Shrine had been an elite faction for over 40 years, their fundamentals were not as strong as the other veteran elite factions.

But in terms of manpower, most top factions could not compete with the Li family.

Ascending Dragon City's Coiling Dragon's Valley and Wind Mist City's Gao family only had one direct descendant, while the ruined Condense Fairy Orchard only had two.

Connected Beast Park did have more disciples than other top factions, but they only had about 10 young direct descendants.

However, there were 23 young direct descendants in Dark Clouds Bird Shrine.

As the oldest direct descendant in Dark Clouds Bird Shrine, Li Xuan was always respected in Dark Clouds Bird Shrine.

But in recent years, the young direct descendants in Dark Clouds Bird Shrine were growing up, and Li Xuan felt increasing pressure.

However, now that the Moon Empress' disciple had called Li Xuan 'Big Brother', it meant that they had a very good relationship.

Although the Radiance Federation seemed to be thriving with other 50 top factions, only the top 20 candidates who had learned from over a century of top factions' skills had the right to interact with the Moon Empress, Chef Supreme, and Bamboo Monarch.

Although Dark Clouds Bird Shrine had been rising rapidly, they still did not have the right to interact with the Moon Empress, Chef Supreme, and Bamboo Monarch.

Thus, Dark Clouds Bird Shrine had yet to gain a Law Source Crystal with pure law power.

Yet, Li Xuan had done what none of his elders could have done.

Li Xuan had formed a connection with the Moon Empress.

This was enough for the elderly man to re-evaluate Li Xuan's position in Dark Clouds Bird Shrine.

After Lin Yuan and Li Xuan greeted each other, Lin Yuan turned to the white-haired elderly man next to Li Xuan and noticed the change in the way that the elderly man looked at Li Xuan.

Lin Yuan immediately understood what was going on.

He smiled slightly and nodded at the elderly man before turning to say to Li Xuan, "Big Brother Li, why don't we all take a seat? Long Tao will be here soon. Big Brother Li, if you have time later on, why don't we go to the House of Envious Fragrance again?"

Li Xuan looked at Lin Yuan with gratitude.

He had brought his elder to see Lin Yuan to prove that he had a plan for his personal networks.

Hence, Li Xuan had intentionally invited the First Elder in Dark Clouds Bird Shrine.

Now that the First Elder saw Li Xuan's relationship with Lin Yuan, Li Xuan's position in Dark Clouds Bird Shrine would be significantly elevated.

At that moment, Li Xuan noticed Lin Yuan wink at him.

Lin Yuan picked up the Dehua porcelain teapot and poured Three Treasures Tea for the Mother of Bloodbath, the Dark Clouds Bird Shrine's First Elder, Li Xuan, and himself.

As the fragrance of the tea permeated into the air around them, Lin Yuan said to the Dark Clouds Bird Shrine's First Elder, "Senior, please have some Three Treasures Tea. The pine plum flowers and pinecones were harvested from Leaning Moon Mountain. There's also some Buddha's hand citrus added in. It tastes pretty good."

The Dark Clouds Bird Shrine's First Elder quivered when he heard Lin Yuan's introduction of the Three Treasures Tea.

Pine needles, plum flowers, and pine cones were ordinary ingredients that could be obtained from anywhere.

However, these ingredients in particular were priceless because they came from Leaning Moon Mountain.

The soil from Leaning Moon Mountain could not be bought without permission from the Moon Empress.

The Dark Clouds Bird Shrine's First Elder had also noted Lin Yuan's respectful nature when he saw the order in which Lin Yuan poured the tea.

Otherwise, Lin Yuan would not have poured the tea for himself last.

At first, Li Xuan did not understand why Lin Yuan had blinked at him.

Now that he heard what Lin Yuan said, he immediately understood Lin Yuan's intention.

Warmth flooded Li Xuan's heart.

Chapter 793: Golden Soaring Dragon's Specifications

Although Li Xuan had not known Lin Yuan for long, Li Xuan had sensed Lin Yuan's truly sincere preference to keep himself under the radar.

Ever since Lin Yuan had met Li Xuan, he never even breathed a word about his status.

When Lin Yuan mentioned that the ingredients had come from Leaning Moon Mountain, he was covertly declaring his status to Li Xuan's First Elder.

Lin Yuan had done that to help Li Xuan.

Moreover, Lin Yuan had shown Li Xuan respect through the order in which he poured the tea.

At that moment, Li Xuan did not know how to thank Lin Yuan.

Lin Yuan had done that because he had noticed the change in the way that the First Elder was looking at Li Xuan. Hence, Lin Yuan decided to help Li Xuan even further.

Lin Yuan, who had come to this new world, understood interpersonal ties well. He immediately understood the meaning behind the First Elder's gaze.

If by helping Li Xuan he could enable him to earn a higher authority in Dark Clouds Bird Shrine, his relationship with Li Xuan would become even better.

The better friends Lin Yuan and Li Xuan became, the more authority Li Xuan had in the Li family. When Lin Yuan needed Dark Clouds Bird Shrine's help, he would be able to receive as much help as he needed.

...

Most top factions had set up luxurious mansions in the Royal Capital.

The mansions were empty most of the time and were only used to house the direct descendants of the top factions when they came to the Royal Capital on business.

In the Coiling Dragon's Valley's mansion, a ferociously mighty dragon's roar sounded out as nine twisting Golden Soaring Dragons about 200 meters long each soared through the sky.

However, these nine Golden Soaring Dragons were different from normal flood-dragon-species fey.

They had the bone shield skin that only ferocious-dragon-species feys had.

These nine Golden Soaring Dragons also did not glide through the sky like flood-dragon-species feys. Instead, it was filled with sturdy power.

The Golden Soaring Dragons' heads also greatly resembled that of ferocious-dragon-species feys, and tens of razor-sharp teeth protruded from their heads.

There was no soft fur on their neck. Instead, bony spines jutted out.

These nine flood-dragon-species feys that looked like ferocious-dragon-species feys were the special Golden Soaring Dragons that Coiling Dragon's Valley nurtured.

Since ancient times, pure flood-dragon-species feys and ferocious-dragon-species feys could transform into main dragon-species feys.

Due to the clashing bloodlines in impure flood-dragon-species feys and ferocious-dragon-species feys, it was difficult to evolve their bloodlines.

However, the Long family had evolved the Golden Soaring Dragon by accident.

The Golden Soaring Dragon had both the viciousness of the ferocious-dragon-species feys' bloodline and the liveliness of the flood-dragon-species feys' bloodline. It was a dragon-species fey with an impure bloodline but also the potential to evolve to the main dragon-species fey.

Three of the nine Soaring Golden Dragons were more beautiful and stocky than the rest. They had already moved toward the transformation to the main dragon-species bloodline.

The nine Golden Soaring Dragons were attached to a magnificent pavilion. There were numerous golden carvings of dragons on the magnificent metal pavilion.

The metal pavilion galloped forward as the nine Golden Soaring Dragons pulled it.

This was the famous Long family's Soaring Dragon Palace Carriage.

Usually, it was only used when the Long family visited prominent individuals.

The number of Golden Soaring Dragons that pulled the Soaring Dragon Palace Carriage represented the courtesy of the Long family.

When the Long family visited the Moon Empress' Radiant Moon Palace, Chef Supreme's House of Fragrant Chefs, and Bamboo Monarch's Purple Bamboo Garden, the carriage was pulled by ten Golden Soaring Dragons.

When the Long family visited top factions that they were unfamiliar with, they used seven Golden Soaring Dragons.

The Long family only used eight Golden Soaring Dragons when they were visiting top factions that they were close with or in-laws.

Although nine Golden Soaring Dragons were just one less than ten, it was still the first time that Coiling Dragon's Valley used that number of Golden Soaring Dragons.

The Long family's Soaring Dragon Palace Carriage had displayed their prowess and attracted the attention of many top factions that had come to the Royal Capital to attend the Guard Ye Banquet.

These top factions were not only astonished that the Long family was using nine dragons but also curious about who the Long family was visiting.

At that moment, Lin Yuan was chatting with Li Xuan and the First Elder of Dark Clouds Bird Shrine.

Li Xuan and the Dark Clouds Bird Shrine's First Elder were not in a hurry to reveal their purpose for coming.

They felt that the Long family would definitely be discussing collaboration and trading. They could also bring up their proposal then.

Soon, the roars of nine dragons could be heard outside Lin Yuan's mansion. The Mother of Bloodbath immediately flashed itself to the entrance of the mansion.

When the Mother of Bloodbath saw the nine Golden Soaring Dragons and the carriage and sensed the overwhelming blood energy inside the nine Golden Soaring Dragons, it felt that those nine sausages looked delicious.

The Mother of Bloodbath led Long Tao and Long Tao's father in.

The moment Long Tu saw Lin Yuan, he immediately strode over to Lin Yuan, reached out his hand, and said, "Young friend, thank you for giving my son the Law Crystal. It not only helped me greatly, but it also solved an issue I had been grappling with for years."

Long Tao had walked in with a smile. But when he heard what his father said to Lin Yuan, his expression immediately changed to one of embarrassment.

It had always been sons that made use of their fathers. Since when did fathers start making use of their sons?

His father had called Lin Yuan 'young friend'. Didn't it mean that he would have to call Lin Yuan 'uncle' now?

Long Tao played with the thought of calling Lin Yuan 'uncle' and almost felt himself collapse.

Lin Yuan had also been stunned by the way Long Tu addressed him. He quickly led Long Tu to the sofa and said, "Uncle Long, I'm glad that I was able to help you."

Lin Yuan shot a look at Long Tao.

Long Tao hurriedly sat down next to his father and pulled back his outstretched hand as he said with slight vexation, "Dad, did you call Lin Yuan young friend because you feel that you're too old? Do you want to be brothers with me?"

Long Tu immediately snatched his hand out of Long Tao's grip and rolled his eyes as he said, "Old? As if! Not even your mother finds me old."

Lin Yuan poured Three Treasures Tea for Long Tu and Long Tao.

Li Xuan watched Long Tao and Long Tu with envy.

Although Long Tao had clearly spoken out of turn, Long Tu was not insulted at all.

It was clear how much Long Tu loved Long Tao.

Meanwhile, he might be the oldest direct descendant in Dark Clouds Bird Shrine and had his mother's love, but Li Xuan could not remember one time in his life where he experienced paternal affection.

Chapter 794: The Power to Change Creation Master Style

As of that moment, everyone had arrived.

Since Coiling Dragon's Valley and Dark Clouds Bird Shrine were well-acquainted, Long Tu knew the Li family's First Elder well.

Everyone was talking freely and happily.

After chatting for a while, Lin Yuan waved his hand and summoned 26 Golden Lotus Brocade Pearls onto the jade-textured old pearwood table.

Brocade Zither had only finished nurturing the last Golden Lotus Brocade Pearl less than an hour ago. It was very coincidental.

The 26 Golden Lotus Brocade Pearls had small round pearls growing on them. The small and slightly pink Golden Lotus Brocade Pearls looked extremely cute.

Lin Yuan said to Long Tao and Li Xuan, "This is the 26 Golden Lotus Brocade Pearls that we agreed on. There are 17 for Long Tao and 9 for Li Xuan. You can take them."

Li Xuan, Long Tao, Long Tu, and the First Elder of Dark Clouds Bird Shrine did not react any differently when they saw the decoration in the mansion.

They knew that Lin Yuan was the disciple of the Moon Empress. Hence, they were not shocked by the luxurious interior of the mansion.

But they now had so many Golden Lotus Brocade Pearls in front of them. Coiling Dragon's Valley and Dark Clouds Bird Shrine had a few pinnacle Class 4 Creation Masters and tens of Class 4 Creation Masters. Every Golden Lotus Brocade Pearl could increase the homogeneity of the spiritual ingredients in the concoction of spirit fluids by 10%, essentially increasing the effectiveness of the spirit fluid by 10%.

This meant that every 10 Golden Lotus Brocade Pearls could match up to one Class 4 Creation Master.

These four people felt that what was in front of them was not 26 Golden Lotus Brocade Pearls but 2.5 living Class 4 Creation Masters.

This feeling was too exciting.

As the main members of the Long family and Li family, Long Tao, Long Tu, Li Xuan, and the First Elder of Dark Clouds Bird Shrine knew better than anyone how precious Creation Master resources were.

Although top factions needed to be supported by strong combat power, only a group like the Five Thearch Soldiers that had five thearch-class experts standing guard could have the influence of a top faction with three pinnacle Class 4 Creation Master.

Not even Coiling Dragon's Valley could compete with the number of experts that Five Thearch Soldiers had.

However, in terms of influence, the only top faction that could suppress that of the Five Thearch Soldiers was Coiling Dragon's Valley.

In fact, with the Five Thearch Soldiers' high number of high-class spirit qi professionals, they needed Creation Master resources even more badly.

They even needed to secretly establish connections with top factions that had a large amount of high-class Creation Master resources.

By this analogy, the 26 Golden Lotus Brocade Pearls were not just 2.5 Class 4 Creation Masters but also a way to curry favor with thearch-class experts.

Long Tu could not help but sigh in amazement as he stared at the 26 Golden Lotus Brocade Pearls on the table.

"I can't believe that the Moon Empress nurtured such a precious item that can help Creation Masters. If there were slightly more of these, it would be able to completely change the style of factions that use Creation Masters as their role."

Long Tu's words made the Mother of Bloodbath, which was sipping on tea, frown. It shot a look of disdain at Long Tu.

The Mother of Bloodbath had become Lin Yuan's Path Protector because it wanted to repay the Moon Empress for saving its life.

Before meeting Lin Yuan, its gratitude to the Moon Empress was enough for the Mother of Bloodbath to sacrifice its freedom and treat the Moon Empress with gratitude and respect.

After following Lin Yuan, the Mother of Bloodbath also felt that all of Lin Yuan's achievements had come from the Moon Empress.

But as time passed, the Mother of Bloodbath had discovered that Lin Yuan was someone who could always create miracles.

The Mother of Bloodbath would often follow Lin Yuan to Radiant Moon Palace. The Moon Empress would always need to find an excuse even to give Lin Yuan the smallest gift.

It was clear that Lin Yuan's vast reservoir of Creation Master resources did not all come from the Moon Empress.

This made the Mother of Bloodbath doubtful.

But after Lin Yuan had used his flimsy body to stand ground at the World Cleansing and summoned white sand to save the Mother of Bloodbath, the latter realized that it owed Lin Yuan a debt of gratitude larger than what it owed to the Moon Empress.

The Moon Empress had only helped it out of convenience, like how she had given it the Crescent Moon Radiant Sunlight tablet that could suppress the Trial of World Creation.

However, Lin Yuan had a boundless future as the disciple of the Moon Empress, yet he had been willing to risk his life to save the Mother of Bloodbath.

As a wild fey that was born from blood, the Mother of Bloodbath had never felt any warmth like that.

Afterward, the Mother of Bloodbath did not try to find out how Lin Yuan could create miracles. Instead, it did its best to protect Lin Yuan.

Lin Yuan had clearly created the Golden Lotus Brocade Pearls on his own. However, Long Tu had said that it was the Moon Empress who had nurtured them.

This annoyed the Mother of Bloodbath.

However, Lin Yuan's smile became broader after he heard what Long Tu said.

Lin Yuan felt that he would not have been able to nurture a resource that could affect the fundamentals of Creation Master resources like Golden Lotus Brocade Pearls if he was not the Moon Empress' disciple.

It was true that he was friends with Long Tao and Li Xuan. But if he did not have a high enough status, Coiling Dragon's Valley leader and the First Elder of Dark Clouds Bird Shrine would not be sitting in front of him so calmly.

Although they would not force him to trade the Golden Lotus Brocade Pearls, he would become the center of attraction once news of the Golden Lotus Brocade Pearls spread.

Every faction would close in on him.

Lin Yuan had come from another world and was willing to believe in the innate goodness of people. But he also knew that the opposite end of the spectrum was innate evil.

Goodness and evil manifested together.

As warm as goodness was, evil was cold.

Lin Yuan was willing to announce his identity as the Moon Empress' disciple at the Guard Ye Banquet because he did not want to disappoint the Moon Empress but also because his past eight months of growth had allowed him to change completely from the weak youth that would pant while restocking a few shelves.

He had used every breath in him and every minute and second of the past eight months to improve.

As one of the younger generation, especially one that had felt the audience's eyes on stage at the Allstar Match, Lin Yuan wanted to climb to the highest peaks and take Sky City along with him.

Although violence was not in Lin Yuan's nature, his ambition was undeniably strong.

Chapter 795: Can You Handle It?

Normally, the simplest ambition was to protect one's loved ones.

Before Lin Yuan became the Moon Empress' disciple, his loved ones only included Chu Ci and maybe Uncle Li and Auntie Zhang, who took care of him.

But after becoming the Moon Empress' disciple, the entire Radiant Moon Palace had become his family.

Now that Chu Ci had become Cold Moon's disciple, Lin Yuan's family ties were closely connected with the Radiant Moon Palace.

As for the Return from Faraway Mansion, they were friends that had gone through thick and thin with Lin Yuan.

The private faction Sky City had also come from the Return from Faraway Mansion.

Lin Yuan wanted to protect the people that he cared about. No one felt more pressure to do this than Lin Yuan.

Thus, Lin Yuan felt that his improvement over the last eight months was nothing to toot his own horn about. He still had a long way to go.

Lin Yuan understood war even better after experiencing the evolving water world dimensional rift and fighting against the Zheng family.

He saw the entire Divine Wood Federation as wood to stoke his fire of life experience.

Moreover, the Astronomical Parliament's continent strategy had been put into motion.

Although he had kept himself hidden as the City Lord of Sky City, one of his other identities needed to continue growing.

In another few months, when the Floating Island Whale hatched, Sky City would be able to float into the sky. Hence, Lin Yuan needed to collect resources as quickly as possible to increase Sky City's combat power.

After Lin Yuan had learned about Tower Canon's hundred-year 'The Sleeper's Revival' plan, his mind was immediately on high alert.

This was why Lin Yuan had spent so much effort researching the Soldier Ration Radish with the goal of nurturing it.

Coiling Dragon's Valley and Dark Clouds Bird Shrine were clearly determined to work with him.

Hence, Lin Yuan quipped, "Uncle Long, you're right. There are quite a lot of Golden Lotus Brocade Pearls. A fair number should change the style of factions that have Creation Master as their main roles."

Lin Yuan's words made Long Tu's eyes gleam. If anyone else had talked to Long Tu that way, he would have treated it as a joke.

The style of factions only changed after hundreds of years. How could someone talk about changing it so easily?

But since it was Lin Yuan who had said it, Long Tu took the words seriously because they were most likely to be true.

Since Lin Yuan only wanted the useless Law Source Crystals in exchange for the Golden Lotus Brocade Pearls, Long Tu became overwhelmed with emotion.

Is it possible that the Moon Empress is able to extract laws from Law Source Crystals!?

The level of Class 5 Creation Masters was too mysterious. It was a level that all pinnacle Class 4 Creation Masters spent a lifetime chasing but failed to attain.

People initially defined a Creation Master's Class.

Given how rare Class 5 Creation Masters were, no one knew what kind of level existed beyond that.

Thus, the term Class 6 Creation Master had never been used.

If the Moon Empress could do what the other Class 5 Creation Masters could not, she could stand above them and be called the first true Class 6 Creation Master in the Radiance Federation.

At the thought of this, Long Tu jerked his head up to anxiously say something to Lin Yuan.

But Lin Yuan beat him to it and said nonchalantly, "I'm good friends with Big Brother Long. No other faction has had access to Golden Lotus Brocade Pearls. As of now, you're the only one. Since you said that the Golden Lotus Brocade Pearls can change the style of factions with the Creation Master role, why don't you lead Coiling Dragon's Valley as a pioneer?"

Lin Yuan's words immediately caused Long Tu, Long Tao, Li Xuan, and the First Elder of the Li family's breathing to quicken.

The four of them had immediately started thinking of ways to convince Lin Yuan to trade for more Golden Lotus Brocade Pearls the moment they saw the Golden Lotus Brocade Pearls.

However, they did not expect Lin Yuan to initiate the topic.

Since Lin Yuan did not seem ready to allow the Golden Lotus Brocade Pearls to fall into the hands of other factions but wanted the two families to use the Golden Lotus Brocade Pearls to expand themselves, this situation was an enormous blessing for Coiling Dragon's Valley and Dark Clouds Bird Shrine.

This blessing did not need to be sustained for long. One month was enough for them to gain a much more solid foundation than other factions that had Creation Master roles.

The way Lin Yuan had said 'Big Brother Long' made Long Tao look at Lin Yuan with increasing affection.

As the only direct descendant of Coiling Dragon's Valley's young generation, Long Tao had been born with a golden spoon in his mouth. His life had been nothing but smooth sailing.

Besides Li Xuan, with who he had become friends when he was young and innocent, Long Tao could not be bothered with any other disciple from top factions.

The only possible ones would be his combat teammates from the Dragon Gate Guild Club.

But now, Long Tao regarded Lin Yuan as a good brother.

Long Tao was not alone with this sentiment. Li Xuan had been worn over when Lin Yuan called him 'Big Brother Li'.

Lin Yuan had purposely mentioned Li Xuan when he was offering Dark Clouds Bird Shrine this good opportunity. It was like Lin Yuan was only offering Dark Clouds Bird Shrine this chance on account of Li Xuan.

It was fair to say that Lin Yuan's words were enough to secure Li Xuan's position in Dark Clouds Bird Shrine.

Li Xuan no longer needed to constantly be on guard against his siblings.

When Lin Yuan had been speaking to Long Tu, his fist had clenched tightly. At that moment, Lin Yuan felt like he was holding a hefty power, one that had transformed Creation Master resources.

He could use his own ideas and decisions to direct the style of Creation Master resources.

Lin Yuan had taken the initiative to voice a collaboration instead of waiting for Coiling Dragon's Valley and Dark Clouds Bird Shrine to make offers so he could negotiate the price. His status and the value of the Golden Lotus Brocade Pearls allowed him to be confident of controlling the price even though he was the one who had taken the initiative.

Since Lin Yuan wanted to form relationships with Dark Clouds Bird Shrine and Coiling Dragon's Valley, he might as well go all the way.

The First Elder of Dark Clouds Bird Shrine said with a slight tremor in his voice, "How many Golden Lotus Brocade Pearls will Dark Clouds Bird Shrine be able to borrow from you?"

When Long Tu heard the First Elder's question, his eyes also quickly shot toward Lin Yuan.

It was clear that Long Tu was after the answer to the same question.

Lin Yuan tapped his finger on the table as he pondered for a moment before saying, "If I can provide both families with 600 Golden Lotus Brocade Pearls per month, will you be able to handle it?"

Chapter 796: Lack of Law Crystals

The First Elder of Dark Clouds Bird Shrine could not help but inhale sharply.

600 Golden Lotus Brocade Pearls in one month is an unimaginably huge load!

But worry quickly set in.

According to the price set for the trade of Golden Lotus Brocade Pearls, it was 30 Law Source Crystals for 1 Golden Lotus Brocade Pearl.

With 600 Golden Lotus Brocade Pearls, Dark Clouds Bird Shrine, and Coiling Dragon's Valley would have to produce 18,000 Law Source Crystals together.

Although Law Source Crystals were useless to them, it was not easy to kill Class 7 dimensional lifeforms.

When Lin Yuan had said that he had 600 Golden Lotus Brocade Pearls for the two families to share, Coiling Dragon's Valley would receive a larger share because they had more Creation Master resources.

Hence, Coiling Dragon's Valley would need to expend a significant amount of effort to produce so many Law Source Crystals.

But soon, the First Elder felt that he had just been slapped by Long Tu because Long Tu said, "According to the trade of 30 Law Source Crystals for 1 Golden Lotus Brocade Pearl, the Long family can handle the 600 Golden Lotus Brocade Pearls.

"Haha! We need the flesh of a mountain of high-class dimensional lifeforms to nurture the Extreme Day Explosive Dragon. Hence, we made a deal with the Five Thearch Soldiers and have gained control over eight Class 4 dimensional rifts for many years. We always need to clean out Law Source Crystals annually and have accumulated a large store of Law Source Crystals over the last century."

Lin Yuan's eyes lit up as the First Elder wrinkled his nose and said, "Dark Clouds Bird Shrine can take a smaller share of the 600 Golden Lotus Brocade Pearls. But we'll take 200 at the very least. We should be able to produce 6,000 Law Source Crystals."

While he was speaking, the First Elder had already decided that he would teach the other four elders who managed Dark Clouds Bird Shrine's storage a good lesson when he went back.

If they had not deemed the Law Source Crystals useless and thrown away a large amount to trade for the money to build a breeding base for avian-type feys, the Li family could have taken 300 Golden Lotus Brocade Pearls.

However, the First Elder also knew that taking 200 Golden Lotus Brocade Pearls was Dark Clouds Bird Shrine's limit.

It was not that Dark Clouds Bird Shrine could not obtain more Law Source Crystals from external sources because they could have exchanged for more with other factions by trading rare resources.

However, Dark Clouds Bird Shrine had always been relying on the Long family. They had relied on the Long family's help to advance to a top faction in the last 40 years.

Thus, whether it was for emotional, logical, or power-related reasons, Dark Clouds Bird Shrine had to take a smaller share.

When Long Tu heard what the First Elder said, he chuckled and said, "Of course, 200 Golden Lotus Brocade Pearls are no problem. If you don't have enough Law Source Crystals, we can lend you some."

As Lin Yuan watched the way that the First Elder and Long Tu managed business, he gained a better understanding of the perspectives of Dark Clouds Bird Shrine and Coiling Dragon's Valley.

Lin Yuan had said that he would provide 600 Golden Lotus Brocade Pearls for both factions to share because he wanted to see the way they managed business.

What he saw was one compromising party and a party that was willing to provide compensation.

Although Lin Yuan's identity as the Moon Empress' disciple protected him in every deal that he made with factions so that he would not have to worry about being taken advantage of, this push and pull collaboration was definitely much more comfortable.

Lin Yuan knew how much Brocade Zither could produce. Brocade Zither could produce 24 to 25 Golden Lotus Brocade Pearls per day.

One month of hard work would produce about 750 Golden Lotus Brocade Pearls, which exceeded the amount that Lin Yuan was offering Coiling Dragon's Valley and Dark Clouds Bird Shrine.

From the way Long Tu spoke, he would be happy to take all Golden Lotus Brocade Pearls that Lin Yuan could offer.

During the transaction a month later, where he would gain 18,000 Law Source Crystals, Lin Yuan would be able to gain more worlds that were formed from laws, and his Sacred Source Wielding Queen's Stars would also increase.

It would definitely increase to 2 Stars, even to 3 Stars, and gain new abilities.

After this trade, it would be impossible for Connected Beast Park to sleep soundly.

After the Long family gained a large number of Golden Lotus Brocade Pearls, Connected Beast Park's role would be viciously suppressed by Coiling Dragon's Valley.

This would shake Connected Beast Park's roots and influence to their cores.

Moreover, there was no way that Connected Beast Park could devour Condense Fairy Orchard.

At that point, Connected Beast Park would be stuck between Condense Fairy Orchard and Coiling Dragon's Valley, causing them to come after Sky City.

With 18,000 Law Source Crystals per month, Sky City's combat power would change drastically.

Endless Summer and the Mother of Bloodbath's evolution to Creation Breed would no longer be uncertain.

There would also be a large number of Law Crystals that the Mother of Bloodbath and Endless Summer would be able to use to charge toward the second Trial or even the third Trial.

Even though they were done talking about the Golden Lotus Brocade Pearls, neither Long Tu nor the First Elder made any indication that they were leaving.

Lin Yuan knew that they were waiting for each other to mention the Law Crystals with pure law power.

This was different from the Golden Lotus Brocade Pearls, and Lin Yuan had no intention of initiating this topic.

This Golden Lotus Brocade Pearls deal had enabled Lin Yuan to gain an unprecedented reward.

As long as the Golden Lotus Brocade Pearls were constantly improved, Lin Yuan's money and resources would never dry up.

Hence, Lin Yuan no longer needed to rely on Law Crystals to gain rewards.

Lin Yuan had already decided to keep more Law Crystals for internal use for those he was really close to.

There would definitely be many leftover Law Crystals after Endless Summer, and the Mother of Bloodbath evolved to Creation Breed.

But as he, Chu Ci, Liu Jie, Wen Yu, Duan He, Master Hong Shen, and Hu Quan's powers increased, there would never be enough Law Crystals.

The Myth III feys of his that could use the Law Crystals were Genius, Chimey, Red Thorn, the Acid Corrosion Queen Bee, the Ethereal Jellyfish, the Source Sand, the Jasmine Lily, Blackie, the Blue Flash Purple Butterfly, Gray, Silver Corona, Brocade Zither, and the Floating Island Whale that had yet to hatch.

This amounted to over 20 lifeforms.

As Morbius evolved, Lin Yuan would be able to lock even more feys. As of now, his spiritual energy could still form a contract with one fey.

After the Cinnabar Osmanthus Haworthia ripened, Lin Yuan could increase his spiritual energy by eating its fruits and be able to form contracts with even more feys.

This meant that Lin Yuan's usage of Law Crystals would be a huge problem for him.

Chapter 797: The Three Stages of the Spirit Qi Awakening

The First Elder of Dark Clouds Bird Shrine and Long Tu both wanted to trade for Law Crystals.

After they exchanged looks, the First Elder tried to please Lin Yuan by saying, "My Lord, can Dark Clouds Bird Shrine have some of your Law Crystals? You can have your pick from our treasure collection."

The First Elder's words shocked both Lin Yuan and Long Tu.

Long Tu did not expect the First Elder to be willing to make such a serious offer.

By opening up the treasure collection, Lin Yuan would have access to all of the Li family's precious resources.

The treasure collection of a top faction hid their secrets. Yet the First Elder of the Li family was willing to give Lin Yuan access to their secrets in exchange for Law Crystals.

This was a huge sacrifice.

Long Tu was momentarily too taken aback to pick up after the First Elder.

Dark Clouds Bird Shrine's treasure collection might not have any important secrets after only having been a top faction for 40 years, but the family's treasure collection was different.

Before this century of the Spirit Qi Awakening, there had been five years of Spirit Qi Vacuum.

Before the five years of Spirit Qi Vacuum, there were almost 5,000 years of Spirit Qi Thinning.

This century of Spirit Qi Awakening had allowed humans to form contracts with feys and become spirit qi professionals.

However, the Long family's ancestors had already started using spirit qi to collect treasures since the Spirit Qi Thinning period and established a solid foundation for Coiling Dragon's Valley.

Long Tu would be extremely pained if any of these items were taken away.

Hence, Long Tu planned on observing first.

If Lin Yuan agreed to work with Dark Clouds Bird Shrine, Long Tu would decide whether or not to make his advancement based on what Lin Yuan picked from Dark Clouds Bird Shrine's treasure collection.

Long Tu had already gained one Law Crystal and healed his fey, whose roots had been injured. The fey was no longer stuck at Myth III.

However, no faction would complain that they had too many Law Crystals.

The Long family was in great need of Law Crystals.

Most pinnacle emperor-class experts had the potential to become thearch-class experts. However, without Law Crystals, they would be stuck at the pinnacle emperor-class.

Lin Yuan did not expect the First Elder to offer to open their treasure collection to him. This gesture moved Lin Yuan immensely.

But even so, Lin Yuan did not plan on giving up too many Law Crystals.

With a wave of his hand, three crystal fragments appeared in Lin Yuan's hand.

After Lin Yuan shook the fragments in his hand, he said to the First Elder, "I only have three Law Crystal fragments. Since the Li family is so sincere, I'm willing to allow the Li family to have two."

Lin Yuan's words made Long Tu unable to continue to sit silently.

However, even as the head of the family, he could not decide to open Coiling Dragon's Valley's treasure collection on his own.

Since Lin Yuan was only willing to allow Dark Clouds Bird Shrine to have two Law Crystal fragments, Long Tu could have the last one.

Long Tu took a deep breath and said in a low voice, "I'm willing to use one Suzerain/Myth III poison-type Law Crystal to exchange for one Law Crystal with pure law power. Is that okay?"

Long Tu had only said this after deep contemplation.

One poison-type Myth III Law Crystal could enable much more evolution than a fingernail-sized Law Crystal.

However, poison-type laws were too unorthodox, and Coiling Dragon's Valley did not have use for them.

Although a Myth III poison-type Law Crystal could benefit a poison-type fey 50 times more than a fingernail-sized Law Crystal, it could not help a fey that was stuck at pinnacle Myth II evolve to Myth III.

It was worth it to use one Myth III poison-type Law Crystal that was just collecting dust in storage to exchange for a Suzerain/Myth III fey.

But this was as far as Long Tu could go.

Lin Yuan was delighted to hear this.

But once happiness bloomed in Lin Yuan, he curbed it before it burst out of control, and none of it emerged through his expression.

Lin Yuan had trained this emotionless facade over the course of the past eight months.

There were very few poison-type laws. The Sacred Sword Wielding Queen had absorbed many Law Crystal fragments, but it had never absorbed a poison-type law.

The rarity of poison-type feys in the Radiance Federation caused an awkward position for poison-type Law Crystals amongst all Law Crystals.

Nonetheless, Lin Yuan felt that poison-type laws would be of great use to him.

The willpowers and laws on the Sacred Sword Wielding Queen's skirt could be applied to Lin Yuan. When fighting against Zhou Luo, Lin Yuan had accidentally discovered that the laws carved on the skirt could strengthen his immunity against laws.

As a weak spirit qi professional that only had a fleshy body, he was most afraid of being poisoned rather than injured by physical or elemental attacks.

Although the Jasmine Lily could fix genetic models and regrow limbs, it was helpless against strong poisons.

If Lin Yuan was poisoned during an actual life-and-death battle, Lin Yuan would have no choice but to amputate the poisoned area.

Then, he would use the Jasmine Lily's Severed Limbs Growth to regrow the amputated area.

This method would only be effective against feys that used slow-acting poison.

The Ethereal Jellyfish's Spatial Shift could transport elemental energy, and poison was not pure elemental energy. Thus, Spatial Shift would not be very effective against poison.

Lin Yuan had never had a good solution to counter poison.

Although some spiritual ingredients could increase a spirit qi professional's defense against poison, these spiritual ingredients were always poison themselves.

While they increased the body's susceptibility to poison, it would also cause enormous pain and even result in disfigurement from the decaying of skin.

Lin Yuan might not place much value on his own looks, but he did not want to be disfigured just to increase his defense against poison.

Lin Yuan couldn't help but think, *?If I can use one Law Crystal to exchange for a Suzerain/Myth III poison-type law and allow the Sacred Sword Wielding Queen to absorb it, my resistance to poison should increase dramatically. I can't get this increase from the spiritual ingredients that improve resistance.*

Chapter 798: The Opportunity to be Impervious to Poison

There would be many plant- and insect-species feys in the Divine Wood Federation where Lin Yuan was going to go soon.

These feys occupied more than 90% of all the feys in the Divine Wood Federation.

Most of these feys were capable of producing poison. With the Myth III Law Crystal, Lin Yuan would be even safer during his training in the Divine Wood Federation.

When the Sacred Sword Wielding Queen evolved the Myth III poison-type law to a world of poison, normal poisons would have no effect on Lin Yuan.

At that point, Lin Yuan could even say that he was impervious to poison.

After Long Tu revealed the best terms he could offer, he kept his gaze locked on Lin Yuan's eyes.

He noticed a moment later that Lin Yuan's gaze had not changed at all after he heard about the Myth III poison-type Law Crystal. Long Tu's breathing froze, but he did not plan on offering anything else.

As the head of Coiling Dragon's Valley, he could not budge on the limit he had set.

Although there was no room for negotiation of more, the Long family had many other items that he could offer in place of the Suzerain/Myth III poison-type Law Crystal.

"Instead of the Myth III poison-type Law Crystal, I also have a pinnacle Myth II dark-type Law Crystal and a water-type Law Crystal. The pinnacle Myth II dark-type Law Crystal has the Gray Shadow Law while the water-type Law Crystal has the Fast Flow Law. Frankly, the Myth III poison-type law is pretty good. It is the Vicious Poison Law, which is common amongst poison-type laws. As long as the poison attack does not use spiritual energy, most poison-type feys should be able to absorb it," said Long Tu.

Suddenly, Long Tu felt that he was being stupid.

As the Moon Empress' disciple who also had the ability to easily produce three Law Crystals, even if Lin Yuan had a poison-type fey, he would use his own Law Crystals instead of the Myth III Vicious Poison Law Crystal.

Moreover, as much as the Vicious Poison Law was well-liked by poison-type feys, it did not change the fact that poison-type laws had a small community that used them.

When Lin Yuan heard Long Tu say that the Myth III poison-type Law Crystal had the Vicious Poison Law, he lost control of the delight he had been fighting down, and his lips curled upward.

Lin Yuan had been slightly stunned when he first heard Long Tu mention the Myth III poison-type Law Crystal.

The Acid Poison Law, Blood Poison Law, and Decay Poison Laws were useful to Lin Yuan, but they could not enable the Sacred Sword Wielding Queen to evolve because these laws only strengthened a specific type of poison when they were evolved.

They were unable to raise Lin Yuan's overall resistance to poison.

But the Vicious Poison Law was different because it encompassed most of the different types of poison.

If Lin Yuan evolved the Vicious Poison Law, he would gain immunity from acid poison, blood poison, decay poison, and more.

Although it would not be as effective as the specific poison laws, it was good enough for Lin Yuan.

Lin Yuan could not care less about the pinnacle Suzerain/Myth II dark-type Gray Shadow Law and pinnacle Suzerain/Myth II water-type Fast Flow Law.

He currently had the murderous and manipulative dark-type Dark Death Law. Thus, he did not want the inferior Gray Shadow Law.

Lin Yuan felt that the two dark-type Law Runes that he had were enough.

The Sacred Sword Wielding Queen's skirt also had no lack of water-type laws because Duan He had swept a nest of Qiu Horn Gray Whales.

Lin Yuan had immediately absorbed the three piles of Law Crystal fragments that came from different Qiu Horn Gray Whales.

Although the Qiu Horn Gray Whales' Law Crystals were incomplete and Lin Yuan could not evolve them, the water-type Fast Flow Law was also not worth Lin Yuan evolving it.

Although the Fast Flow Law seemed to be water-type, it was actually the speed of water.

As long as Lin Yuan did not flee to the ocean or try to chase an enemy into the ocean, this Law Crystal would never be of use.

Thus, Lin Yuan disregarded it firmly.

"I'll choose the Suzerain/Myth III Vicious Poison Law Crystal," said Lin Yuan.

Lin Yuan gave one of the Law Crystals to Long Tu.

Long Tu received the Law Crystal and peered closely at it before saying seriously, "I'll immediately send someone to retrieve the poison-type Law Crystal and the Law Source Crystals for the 17 Golden Lotus Brocade Pearls. In a month, we'll trade for 400 Golden Lotus Brocade Pearls with 12,000 Law Source Crystals. The Long family already has 12,000 Law Source Crystals on hand, and someone will deliver them in a few days."

With the successful trade of the Law Crystal, Long Tu decided to do even more to establish a good relationship with Lin Yuan.

Although Long Tu did not know why Lin Yuan needed so many Law Source Crystals, he did not need to cheat Coiling Dragon's Valley for Law Source Crystals when he was the Moon Empress' disciple.

Lin Yuan raised his gaze to meet Long Tu's eyes. A second later, Lin Yuan beamed brightly and said softly, "Uncle Long, the Golden Lotus Brocade Pearls are just the beginning. I hope to work with you more in the future."

Lin Yuan's words made Long Tu look over the moon and excited at the same time.

It would only benefit Coiling Dragon's Valley to work with Lin Yuan more.

If Lin Yuan brought anything else similar to the Golden Lotus Brocade Pearls to the Long family first in the future, the Long family's strategy would be able to surpass that of the other factions by leaps and bounds.

The First Elder of Dark Clouds Bird Shrine was looking angrily at Long Tu, and he could not help but scold Long Tu inwardly.

Long Tu had been afraid to say a word, but after the First Elder said that he would open Dark Clouds Bird Shrine's treasure collection, Long Tu immediately exchanged for one of Lin Yuan's Law Crystals with a Suzerain/Myth III Law Crystal.

Coiling Dragon's Valley was a huge organization. The Long family had the main role of Creation Master and used their endless stream of Creation Master resources to rapidly accumulate even more resources.

However, Dark Clouds Bird Shrine was different.

Dark Clouds Bird Shrine had to constantly expand and grow to become a top faction over the last 40 years because of their dominance of the avian-type fey market.

Every move that Dark Clouds Bird Shrine made in the market required large spending.

Due to their continuous expansion, Dark Clouds Bird Shrine's treasure collection no longer had anything as precious as a Suzerain/Myth III Law Crystal.

Chapter 799: Muscle Hyperthymesia Grass

Regardless, the past 40 years of major resource development had allowed Dark Clouds Bird Shrine to completely grab hold of the avian-type fey market.

They could now sit back and accumulate resources just like the Long family.

The First Elder of Dark Clouds Bird Shrine was really afraid that Lin Yuan would refuse to trade for the two Law Crystals after he saw what was in Dark Clouds Bird Shrine's treasure collection.

Hence, the First Elder's hand could not stop twitching.

He gave Lin Yuan a catalog containing many different feys, spiritual ingredients, and some source-type lifeforms.

“My lord, this catalog lists everything that is in Dark Clouds Bird Shrine’s treasure collection now. We’ve been focusing on expanding, which resulted in our treasure collection becoming a bit sparse,” said the First Elder.

Lin Yuan flipped through the catalog.

The First Elder had not said that a large portion of Dark Clouds Bird Shrine’s treasure collection had gone toward expanding the faction to be humble.

Otherwise, the First Elder would not have to talk down about Dark Clouds Bird Shrine during the trade because it would not have benefited Dark Clouds Bird Shrine.

But even so, Lin Yuan spent five minutes flipping through just the Elite source-type items.

It was clear that top factions really had a mountain of resources.

While Lin Yuan was reading through the catalog, his attention had been caught by several items.

There were many items that Lin Yuan felt could be of use. However, he did not plan on using Law Crystals to exchange for them. He would exchange these items for the improved Golden Lotus Brocade Pearls once Dark Clouds Bird Shrine ran out of Law Source Crystals.

Thus, Lin Yuan’s gaze mostly went back to items that he would not be able to trade for using the improved Golden Lotus Brocade Pearls.

This method of reading through the catalog allowed Lin Yuan to go through it quickly.

Lin Yuan did not pay much attention to Myth II Law Crystals.

The Myth II Law Crystals were good, but Lin Yuan would need to use a large amount of Law Source Crystals to nurture Law Crystals that were below pinnacle Myth II.

Including the Myth III Vicious Poison Law, Lin Yuan already had four laws that he needed to nurture.

After laws became able to increase Lin Yuan’s resistance to elements, the Cold Flames Law became an advantage because of its unorthodox nature of having both ice and fire characteristics.

This gave Lin Yuan resistance to both ice and fire.

He had already evolved the Cold Flames Law and intended on putting effort into nurturing it.

The First Elder felt more anxious the faster that Lin Yuan flipped through the catalog.

Lin Yuan had almost flipped to the end of the catalog. If he really could not find anything inside that caught his fancy, the Li family would essentially have lost two Myth III feys.

Besides the arch-class experts, spirit qi professionals with Myth III feys had the most battle prowess in top factions.

During Dark Clouds Bird Shrine’s quick expansion, they also needed to steadily increase their power.

Dark Clouds Bird Shrine had many experts with feys that were stuck at pinnacle Myth II.

If the Li family could not trade for Law Crystals with Lin Yuan this time, it was unlikely that they would have the chance to in the future.

While Lin Yuan was flipping through the Dark Clouds Bird Shrine's catalog, he noticed that special resources that the First Elder had mentioned were unique avian-type feys that Dark Clouds Bird Shrine had specially nurtured.

These avian-type feys had been nurtured to Diamond X/Legend, and any would be able to fulfill Lin Yuan's need for an avian-type fey.

If this was in the past, Lin Yuan would have immediately decided to trade for them.

But he now had Blackie, which could fly as fast as the Divine Travel Black Swallow ever since it had evolved to Gold/Fantasy.

It was enough to meet Lin Yuan's needs.

Moreover, Lin Yuan did not need a few avian-type feys for the fey carriage that he wanted to build.

But it was also unnecessary for Lin Yuan to produce 12 Law Crystals to trade for 12 avian-type feys that he could use for the fey carriage.

He had pure spirit qi that not even Class 5 Creation Masters could create. It would not be difficult for him to nurture a new type of avian-type fey.

The avian-type feys that he nurtured using the pure spirit qi would be even better than those nurtured by Dark Clouds Bird Shrine.

Just when Lin Yuan was about to say that he did not find anything that he wanted and suggest that the Li family use a large amount of Law Crystal fragments to trade when his gaze stopped on the last page of the catalog.

Lin Yuan's heart pounded wildly in his heart.

If he could trade for this with Dark Clouds Bird Shrine, he would be able to bring one of his ideas to life as well as save himself decades of hard work.

Lin Yuan reached out and pointed at a normal-looking zigzag-shaped green grass and asked the First Elder, "Was this Muscle Hyperthymesia Grass child ramet nurtured from the ortet? What's the difference between the effects of the child ramets and ortet? It says here that you have five child ramets. What does the Li family usually do with it?"

The First Elder was stunned by the onslaught of Lin Yuan's questions.

When Lin Yuan had reached the last page of the catalog, the First Elder's heart plunged.

He did not expect Lin Yuan to be interested in the Muscle Hyperthymesia Grass.

However, the First Elder was unclear on what Lin Yuan meant.

He did not know if Lin Yuan had asked casually or if he was prepared to use the Law Crystals to exchange for the Muscle Hyperthymesia Grass child ramets.

If so, Dark Clouds Bird Shrine would benefit greatly.

Although the Muscle Hyperthymesia Grass was the foundation of avian-type feys' sense of direction that Dark Clouds Bird Shrine used when nurturing avian-type feys, all the Muscle Hyperthymesia Grass in the catalog had been separated from the ortet.

Although they had the same effects as the ortet, they did not have the ortet's abilities.

Thus, Dark Clouds Bird Shrine would have gained two Law Crystals for almost nothing if Lin Yuan wanted to trade for the Muscle Hyperthymesia Grass.

The First Elder cleared his throat and said truthfully, "The Muscle Hyperthymesia Grass child ramets are usually planted in a sealed-off space and can release a special fragrance.. The bodies of lifeforms that smell this fragrance gain an incredible memory and can memorize complicated movements and directions."

Chapter 800: The Fall of the Main Phoenix-Species

The First Elder of Dark Clouds Bird Shrine paused momentarily before he said, "However, the Muscle Hyperthymesia Grass' fragrance is also extremely poisonous and can seriously damage the muscles in a body. Dark Clouds Bird Shrine uses it with extreme care. Otherwise, one wrong move and the avian-fey nurtured with it would be poisoned to death."

A troubled look came over the First Elder's face.

He talked about the Muscle Hyperthymesia Grass with slight terror, and it was clear that he hated it as much as he loved it.

"After avian-type feys are born, they are triggered using residues of the Muscle Hyperthymesia Grass' scent to give them the ability to memorize complicated flight routes perfectly. It also enables them to produce specific responses after they hear the name of particular locations. Our Dark Clouds Bird Shrine has learned a lot after the deaths of countless precious avian-type feys."

Lin Yuan nodded as he listened to the First Elder's explanation which signaled for the First Elder to continue speaking.

Normally, the First Elder would never reveal Dark Clouds Bird Shrine's secrets and the management strategy of the faction's expansion.

But there were no unpleasant individuals here. Long Tu was already well aware of Dark Clouds Bird Shrine's situation.

As the Moon Empress' disciple and the person who provided Dark Clouds Bird Shrine with so many Golden Lotus Brocade Pearls, Lin Yuan was allowed access to these secrets.

After a moment of silence, the First Elder said, "When using the Muscle Hyperthymesia Grass, Dark Clouds Bird Shrine noticed that the avian-type feys with fewer impurities in their bodies can better hold up against the Muscle Hyperthymesia Grass' scent. After countless experiments, we confirmed this after

using the Muscle Hyperthymesia Grass' roots when a main phoenix-species fey was about to be successfully nurtured."

The First Elder could not help but sigh.

The main phoenix-species fey was like the main dragon-species fey and was the most elite species of its bloodline.

The main phoenix-species feys of lesser quality would definitely be able to become Myth Breed feys as long as the feys did not die halfway.

The main phoenix-species feys of higher quality had the potential to become Creation Breed feys.

This move to rush the success shook Dark Clouds Bird Shrine's roots.

Lin Yuan frowned when he heard the First Elder's sigh.

"Why?" asked Lin Yuan.

The scent of the Muscle Hyperthymesia Grass' roots was nearly 10,000 times more effective than the main plant.

If the scent from the main plant could enable avian-type feys to accurately remember routes and react to directions, a spirit qi professional could use the Muscle Hyperthymesia Grass' roots to memorize the slightest movement and battle strategy.

The moment of memorization would be more vivid in the spirit qi professional's mind than all the battle strategies and movements that they had painstakingly memorized beforehand.

From the moment the main phoenix-species fey was born, the body could be tempered to remove all impurities.

According to Dark Clouds Bird Shrine's research, the Muscle Hyperthymesia Grass' roots should be harmless to main phoenix-species feys.

The First Elder responded in a flat tone, "We didn't expect that the Muscle Hyperthymesia Grass' roots would affect the soul. The Muscle Hyperthymesia Grass could only be used on feys with a pure soul."

Lin Yuan's heart lit up.

The first time he had used the Silver Stamen Gold Luster Cassia nectar was to clear out all the impurities in his body and evolve his genetic model.

The second time he had used it, he realized that he had two souls in his mind. Coincidentally, the Moon Empress had prepared twice the amount of Suzerain Silver Stamen Gold Luster Cassia nectar for him.

The honey made from Suzerain Silver Stamen Gold Luster Cassia could cleanse the soul.

After consuming the Suzerain Silver Stamen Gold Luster Cassia nectar twice, the impurities in his soul had been cleansed without his consent.

This meant that Lin Yuan would be immune to the effects of both the scent of the Muscle Hyperthymesia Grass and its roots.

Luckily, Lin Yuan had seen the Muscle Hyperthymesia Grass in the Li family's treasure collection catalog.

If he waited till after he allowed the Sacred Sword Wielding Queen to absorb the Myth III Vicious Poison Law Crystal and his body became resistant to poison, the effectiveness of the Muscle Hyperthymesia would drop by half.

After all, the Muscle Hyperthymesia Grass' effects were directed at the toxins in the body and were considered poison-type damage.

When Blackie had evolved to Fantasy Breed and gained Spirit Essence Explosion, he pondered ways to use Spirit Essence Explosion.

Lin Yuan had secretly tried injecting half of his spiritual power into his fist to unleash the might of Spirit Essence Explosion.

He had realized that when this strike landed against the radium walls of the Mother of Bloodbath's training room, he could cause a small mark.

Although Spirit Essence Explosion used explosive spirit qi to cause damage, the mark left on the radium wall meant that a full-powered attack would carry the full power of a Diamond X/Fantasy V fey.

But as compared to a Diamond X/Fantasy V fey, Lin Yuan's body was not built as sturdily, nor was it as agile.

Lin Yuan could not evolve the body he had.

The genetic model of humans placed humans as the most intelligent lifeform. By forming contracts with feys and battling with others, humans could use spiritual power, willpower, and exceptional senses to create the best way of living.

But if a person tried to strengthen their body using many spiritual ingredients, there would only be two outcomes.

One was that the body would be unable to hold up, and the organs would shut down, leading to death. The other outcome would be that the body would reach a maximum level that was about the same as a pinnacle Gold fey.

Currently, the bodies of thearch-class experts were about as strong as pinnacle Gold feys.

But thearch-class experts could circulate their spiritual power to create spirit qi vortexes that they could use to protect themselves.

Since he could not do anything about his physical body, Lin Yuan's only option was to make himself more agile.

No matter how he thought about it, Lin Yuan felt that Chu Ci had great foresight.

Although Chu Ci had only been learning some basic fencing tricks in the last six months, she had become acquainted with fencing.
