

Merchant 801

Chapter 801: I Want All the Combat Skills

Chu Ci sometimes used fencing to defend or attack during battle.

If Lin Yuan wanted to use the Muscle Hyperthymesia Grass, he could not just learn how to fence.

Since Lin Yuan had transmigrated but still kept his memories from his previous life, he was no different from an original member of this world.

The history books about the Radiance Federation covered almost 2,000,000 years of history.

5,500 years ago, before spirit qi had appeared, humans had gained many combat skills.

These combat skills were the jewels of human intelligence that had been passed down through the generations.

After the Spirit Qi Awakening, spirit qi professionals had started battling with feys that they had formed contracts with and set aside their old combat skills.

In fact, many of the combat skills had been lost to time.

Still, the Hidden Moon Pavilion's 67th to 82nd levels were filled with key battle skills and martial arts knowledge.

This knowledge had been stored in the Hidden Moon Pavilion, but almost no one retrieved and studied them.

However, Lin Yuan wanted this knowledge.

If he could combine all the martial arts skills, he would be able to form a powerful weapon when he paired them with Spirit Essence Explosion.

This weapon would significantly raise both Lin Yuan's attack and defense capabilities.

That said, it was not easy to learn all 15 levels of knowledge. It would take slow and hard training.

After enough training in combat skills, the body's muscles would be able to react on instinct.

To achieve this level of combat skills, Lin Yuan needed to train for at least a decade.

But now, with just two blades of Muscle Hyperthymesia Grass, Lin Yuan was confident that his body would be able to grasp the knowledge from all 15 levels.

His muscles would be able to absorb all 15 levels worth of combat skills, and he would be able to choose the best method to fight against his enemies.

Just as Lin Yuan was about to say that he was willing to use the two Law Crystals to trade for two Muscle Hyperthymesia Grass, the First Elder of Dark Clouds Bird Shrine said, "If you would like the Muscle Hyperthymesia Grass, Dark Clouds Bird Shrine can give you two blades. We really hope to be able to trade for the Law Crystals with you this time."

Lin Yuan was slightly shocked, but he immediately realized that the Muscle Hyperthymesia Grass was not valuable to Dark Clouds Bird Shrine.

It was just like how he could easily nurture the Golden Lotus Brocade Pearls.

Although he planned on using two Law Crystals to trade for two blades of Muscle Hyperthymesia Grass, now that the First Elder had said what he said, Lin Yuan did not need to use the two Law Crystals.

However, Lin Yuan still gave the First Elder what he wanted and tossed the two Law Crystals to the First Elder before saying, "The Muscle Hyperthymesia Grass is useful to me, and I can't take them for nothing. Let's trade two blades of Muscle Hyperthymesia Grass for one Law Crystal. The Li family can use Law Source Crystal fragments to trade for the other Law Crystal. You can decide how many Law Source Crystal fragments are worth the one Law Crystal and use this rate for future trades."

The First Elder looked delighted when he heard Lin Yuan talk about future trades.

This opportunity was incredibly important to Dark Clouds Bird Shrine.

The First Elder planned on discussing with the other main members of the Li family how many Law Source Crystals should be traded for the Law Crystal.

He also wanted to ask for Li Xuan's opinion.

Dark Clouds Bird Shrine's biggest issue was that they lacked a thearch-class expert. However, they did have four pinnacle Myth III experts.

If they could obtain more Law Crystals from Lin Yuan in the future, Dark Clouds Bird Shrine would not have to worry about not having a thearch-class expert.

With a thearch-class expert, Dark Clouds Bird Shrine would be able to truly hold their heads up high in front of other top factions. They would not need to depend on dominating the avian-type fey market or always lower themselves before others.

This thought excited the First Elder the more he thought about it, and he decided that he would first store away the Law Crystals that they obtained this time.

They would not be used on the pinnacle Suzerain/Myth II feys.

He would wait until they had accumulated 10 Law Crystals before allowing the head of the family's main fey, a pinnacle Suzerain/Myth III main phoenix-species fey, to try to see if it could overcome the Trial of World Creation to become a Creation Breed fey.

"My Lord, rest assured. We'll definitely offer you an amount of Law Source Crystal fragments that you'll be happy with. I will dispatch Young Master Xuan to deliver them to you," said the First Elder.

Li Xuan froze when he heard the way that the First Elder addressed him.

The First Elder would always address him by his name or Little Xuan when he was in a good mood. He had never called Li Xuan 'Young Master Xuan'.

This meant that Li Xuan's position in his family had been acknowledged as a genuine Young Master of the young generation.

The First Elder was the second in command in Dark Clouds Bird Shrine behind Li Xuan's grandfather. With the First Elder's approval, it was possible for Li Xuan to immediately become the Young Leader when he returned home.

Li Xuan looked deeply into Lin Yuan's eyes, and there was an ocean of gratitude and sincerity in his gaze.

After Lin Yuan settled the trades with Long Tu and the First Elder, they left.

Lin Yuan, Long Tao, and Li Xuan went to the House of Envious Fragrance to have a meal together. Lin Yuan found out why Long Tao and Li Xuan had appeared at the Fey Observer Association together during the meal.

It was because Black had rejected Long Tao's invitation. Hence, he had decided to invite Li Xuan, a support-type spirit qi professional, to join the Dragon Gate Guild Club's main team.

Long Tao had planned on allowing Chen Hongfeng to become a member of the main team.

Unexpectedly, after Chu Ci had defeated Chen Hongfeng at the Allstar Match, he insisted on staying in the reserve team and training for a few more years. He would only join the main team after increasing his power.

This gave Long Tao a big headache because of next year's Allstar Match.

After the meal, Lin Yuan returned to the mansion and saw Duan He accompanying Listen back to the mansion.

Lin Yuan rushed to Lin Yuan and gave him a Diamond Fey storage box, and said, "Young Master, this is the earnings from the past week's auction of the luxury items."

Chapter 802: Lin Yuan's Feelings About Battle

Listen held the Diamond Fey storage box, his heart unable to rest at ease.

The earnings that the Listening Heron Chamber of Commerce had gained from the sale of luxury goods in the past week had already exceeded the amount of money that they had when they were at their prime in Indigo Azure City.

It still did not feel real to Listen that he had earned such an immense fortune on his own.

Lin Yuan's eyebrow twitched when he checked through the Diamond Fey storage box that Listen had handed him.

He had only provided Listen with Spirit Craftsmen from Hu Quan's Heavenly Craft Pavilion and some completely jade-textured wood fragments that had been stored away as garbage.

Lin Yuan had also given Listen some high-class luxury resources such as completely jade-textured wooden planks and heavenly-maiden-grade elemental pearls with external layers.

Hu Quan did not trust his subordinate Class 3 Spirit Craftsmen to create these luxury goods.

However, Hu Quan had been busy with the construction of Submerged Flood Dragon Lake and the basement and was unable to create high-class luxury goods.

Hence, Listen had been generating value out of the Return from Faraway Mansion's garbage.

As he looked at the small pile of Radiance dollars in the Diamond Fey storage box, Lin Yuan estimated that Listen had increased the value of the luxury goods by 50%.

This was Listen's talent as a top businessman.

Lin Yuan gave Listen a thumb's up and said, "Listen, you're truly a genius at business."

As Sky City expanded, Lin Yuan became busier and busier.

Lin Yuan used to pay some amount of attention to the Listening Heron Chamber of Commerce's progress. But now, he had totally taken his hands off.

Thus, Lin Yuan did not suggest anything regarding the Listening Heron Chamber of Commerce's development.

Yet, the Listening Heron Chamber of Commerce had already progressed past Lin Yuan's expectations.

Listen was excited by Lin Yuan's praise. The weariness in his face dispersed and was replaced by passionate inspiration.

Listen had been working tirelessly for the past two months, and he slept only a maximum of five hours each night.

He had never forgotten about how Lin Yuan had started warring with the Zheng family because of him and how he had caused the death of two emperor-class experts outside Indigo Azure City.

Listen's power was not strong, so all he could do was create more value for Lin Yuan by properly managing the Listening Heron Chamber of Commerce.

He had now proven himself to Lin Yuan for the first time. After receiving Lin Yuan's praise, he felt that all he had done over the last two months had been worth it.

Soon, Listen watched as Lin Yuan returned the Diamond Fey storage box to him and said, "You should never keep Radiance dollars in a Diamond Fey storage box when you're expanding a faction. Take this hard-earned money of yours and use it as you see fit."

"Our deal was that the Listening Heron Chamber of Commerce would become a rising faction within half a year. But I think that you can make the Listening Heron Chamber of Commerce into a business conglomerate. You might even be able to dominate a specific market with your own capabilities."

"With Sky City supporting you, you don't need to worry about lacking power. Whether the Listening Heron Chamber of Commerce can earn a solid position amongst the 50 major factions will be up to you."

Listen's eyes widened. He never imagined that Lin Yuan would have such high hopes for him.

With all of Lin Yuan's hopes for him, Listen suddenly saw an even wider and more exhilarating path open up ahead of him.

Lin Yuan had said all that to Listen because he felt that Listen was capable and because he had been inspired by the First Elder of Dark Clouds Bird Shine's talk about the expansion of Dark Clouds Bird Shrine.

Duan He stood next to Lin Yuan and watched his gaze. He suddenly felt that he respected Lin Yuan more and more.

It was not just Lin Yuan's patterns or his determination in the face of his opponents that made Duan He respect him.

It was because of the 24 Hot Spring Snails that Lin Yuan had evolved for the Indigo Azure Guard.

After receiving compensation from the Indigo Azure Guard Captain, almost every Hot Spring Snail's exclusive skill had become suitable for battle.

This meant that Lin Yuan had evolved the Hot Spring Snails to Elite/Epic.

This showed that Lin Yuan had a light that could illuminate the entire Radiance Federation in his heart.

As the disciple of the Moon Empress, the Radiance Federation was blessed to have such a light.

Duan He firmly believed that this light in Lin Yuan would be able to shine even brighter in the future.

He solemnly took out a Platinum fey storage box and gave it to Lin Yuan as he said, "Young Master, there are 500 Hot Spring Snails and 1,500 Law Source Crystals in this fey storage box. The Indigo Azure Guard Captain asked me to ask you for another deal."

Lin Yuan received the Platinum fey storage box from Hu Quan and replied, "No problem. The current dimensional rift has reached its tail end. This is its most active and dangerous period. I will try my best to evolve the Hot Spring Snails quickly enough for them to be used in battle. Although the Hot Spring Snails are good at healing external injuries, they cannot replenish vitality well. For this deal, I will give the Indigo Azure Guard 30 Bronze/Epic quality Jasmine Lilies that will be able to work alongside the Hot Spring Snails to replenish the Indigo Azure Guards' vitality."

It was becoming increasingly easy for Lin Yuan to nurture high-quality Bronze feys.

But now that he had Brocade Zither to nurture Golden Lotus Brocade Pearls, he no longer needed to nurture high-quality Bronze feys to trade for Law Crystals.

Lin Yuan only needed 50 Golden Lotus Brocade Pearls to trade for 1,500 Law Source Crystals.

It would only take Brocade Zither two days to produce 50 Golden Lotus Brocade Pearls.

Even though Lin Yuan was now a B-rank spirit qi professional, it would still take him close to four days to evolve 50 Bronze/Epic feys.

But as long as it was the Indigo Azure Guard who was approaching him, Lin Yuan would not reject him because he knew that his extra work would have a direct connection to the life of an Indigo Azure Guard.

He would be saving noble lives while earning resources at the same time.

The 30 Bronze/Epic Jasmine Lilies were a gesture on Lin Yuan's part that was outside of the deal. He hoped that the noble lives that had to face disaster would be able to remain safe.

Chapter 803: Lin Yuan Definitely Won't Blame Chimey!

When Duan He heard what Lin Yuan said, tears welled up in his eyes.

Duan He was born and bred in Indigo Azure City, but he was also a citizen of the Radiance Federation.

However, it was difficult for him to imagine that Lin Yuan would be willing to gift 30 Bronze/Epic Jasmine Lilies to Indigo Azure City to help them defend against the dimensional rift.

30 Bronze/Epic Jasmine Lilies made up a small fortune.

Calculating in terms of Radiance dollars, Lin Yuan had provided Indigo Azure City with 100,000,000 Radiance dollars worth of aid.

Lin Yuan returned to his room with the Platinum Fey storage box and went into the Spirit Lock spatial zone to start evolving the Hot Spring Snails.

The moment Lin Yuan entered the Spirit Lock spatial zone, he realized that he still had an important matter to attend to, which was talking to Chimey about the matter regarding the Sparrow Voice Loli Goddess.

Lin Yuan had never realized that Chimey, which had been by his side, would develop an idea like this. It had actually been live-streaming since they were back at the spirit lifeform store.

When Chimey had started live-streaming, Lin Yuan remembered that he had only given Genius and Chimey Star Web Cards for a few days.

It was not easy to start a live stream on Star Web. It would have been impossible with Chimey's intelligence level at that time.

This meant that Chimey had to have had Genius' help in order to start live streaming as Sparrow Voice Loli Goddess.

Lin Yuan suddenly realized why he always saw Chimey and Genius huddling together secretly. They would stick together in the Phoenix Perching Chinese Parasol Tree branches even when they were in the Spirit Lock spatial zone.

They had to be studying how to live stream on Star Web.

The moment Lin Yuan entered the Spirit Lock spatial zone, he saw the Wind Speed Rapid Antelope organizing the heavenly-maiden-grade elemental pearls.

Lin Yuan fed the Wind Speed Rapid Antelope a wind-type heavenly-maiden-grade elemental pearl every two days, and its powers had evolved from Gold I to Gold VII.

Its quality had been evolved from Flawless to Legend.

After experiencing the pure wind-type World Cleansing and being constantly nourished by pure spirit qi, the Wind Speed Rapid Antelope's fur had transformed from khaki to white.

Many light green patterns that were similar to that on the Celestine Elemental Shellfish had appeared on the Wind Speed Rapid Antelope's fur.

These patterns were the product of the extremely high concentration of wind-type elements in the Wind Speed Rapid Antelope.

Lin Yuan had saved the Wind Speed Rapid Antelope from its serious injuries and was completely different now.

The initially hornless Wind Speed Rapid Antelope now had two round bumps growing out of its forehead. It felt like the protruding of two bones.

Lin Yuan knew that this was a sign that the Wind Speed Rapid Antelope's degenerated horns had started to grow out again.

When its real horns started to grow out, the Wind Speed Rapid Antelope's genetic model would transform and change it into an utterly new fey.

The Wind Speed Rapid Antelope's intelligence used to be that of a 9-year-old child, and it had been uncomfortable even after being taken care of in the Spirit Lock spatial zone.

But the current Wind Speed Rapid Antelope was no longer only as smart as a child. It was now as smart as a youth of about 13 years old.

The Wind Speed Rapid Antelope had become accustomed to manipulating the flow of wind to sort heavenly-maiden-grade elemental pearls with different external layers into different wooden boxes.

Lin Yuan stroked the Wind Speed Rapid Antelope's head and fed it two wind-type heavenly-maiden-grade elemental pearls.

Since the Wind Speed Rapid Antelope was talented at using wind elements, it would be a good idea to nurture the Wind Speed Rapid Antelope.

After some thinking, Lin Yuan said to the Wind Speed Rapid Antelope, "Once you evolve, I'll give you your own name. From now on, you can eat wind-type elemental pearls whenever you feel that the wind element in your body has decreased."

The Wind Speed Rapid Antelope was happy to hear that, but it remembered the two bones that were growing out of its head and decided not to use its head to bump Lin Yuan's leg.

Instead, it licked Lin Yuan's hand.

Silver Corona, Brocade Zither, and the Sacred Sword Wielding Queen were busy.

Brocade Zither was busy nurturing Golden Lotus Brocade Pearls while Silver Corona was absorbing spotted coral, and the Sacred Sword Wielding Queen was absorbing Law Source Crystals.

Lin Yuan had been in the Spirit Lock spatial zone for almost five minutes, but neither Chimey nor Genius had approached him.

Since Chimey live-streamed for four to five hours daily, it should already know about how the GIF had dropped.

Lin Yuan thought about the shocking list of the top 100 contributing fans that he had seen in the information that Wen Yu had provided him about Sparrow Voice Loli Goddess.

Chimey had earned almost 400,000,000 Radiance dollars from contributions, excluding the cut that Star Web removed.

Although Lin Yuan had provided 30 Bronze/Epic Jasmine Lilies to Indigo Azure City for free, healing-type feys were generally more expensive, and 30 Bronze/Epic Jasmine Lilies could have easily fetched 2,000,000,000.

Compared to the 2,000,000,000 Radiance dollars he had just given away, Chimey's 400,000,000 Radiance dollars did not seem much.

However, the comparison was based on perspective.

If this was one year ago when they were back in the Xia Region, Chimey's 400,000,000 could have bought the entire Xia Region.

400,000,000 was a gigantic sum when it was earned through live-streaming.

Chimey had always been by his side, and he had always given it the best.

It ate Platinum Celery Vine and stayed in the Phoenix Perching Chinese Parasol Tree. Chimey basically did not need to worry about money.

Thus, Lin Yuan was truly afraid that Chimey would use this 400,000,000 to pick up bad habits on Star Web.

Lin Yuan circulated his spiritual power and shot out thousands of black feathers from the amber-button-shaped Source Sand.

The feathers joined together on Lin Yuan's back and became six black wings.

He gently flapped the wings, flew up to the branches of the Phoenix Perching Chinese Parasol Tree, and heard Genius murmuring, "Chimey, you have to tell Yuan about this because you've been greatly influenced by Yuan's identity as Black. As long as you're honest with him, he definitely won't blame you!"

Genius' words eased Lin Yuan.

Genius and Chimey were not just partners that Lin Yuan had formed contracts with. They were like children that Lin Yuan had watched grow up.

Genius was mature now.

Lin Yuan heard Chimey chirp out a response, and he was shocked by what it said.

Chapter 804: Chimey Became Human Prematurely

Chimey spoke with urgency and fear. “You know that I live stream on Star Web. I like to sing and wanted to earn enough money so that Yuan and the rest could have a plate of red braised meat each, and no one would have to share.

“But I didn’t know that by the time I started receiving contributions, you and Yuan would already be able to eat red braised meat whenever you wanted. I was going to tell Yuan when I surprised him with a gift box. How was I supposed to anticipate that the GIF would drop during the competition!?”

Before Genius replied, Chimey went on to say, “I chose the beauty department when I was setting up my live-streaming room. Yuan will definitely blame me when he finds out. After all, I’m a bird and not a girl.”

Just after Chimey finished speaking, it heard a familiar and clear voice in the depths of its soul.

“Now that you’ve evolved to Fantasy Breed, you’ll look like any other girl when you change into human form. You’re already Fantasy III. Don’t you have the confidence to evolve to Myth II?”

Lin Yuan’s obvious words of comfort that lacked any tone of reprimand made Chimey hurriedly fly into Lin Yuan’s arms, where it started to sob sadly.

Chimey had been hiding its live-streaming from Lin Yuan, and this had brought it a lot of stress.

Lin Yuan sighed and touched Chimey’s head with the pad of his finger.

When he heard the conversation between Genius and Chimey, he already knew everything about Chimey’s live-streaming and that it had not picked up any bad habits.

However, he did not understand why Chimey would be so scared of his reaction.

If Lin Yuan had found out about Chimey’s hobby of live-streaming on Star Web, he would immediately have helped Chimey to set up an account on Star Web.

Naturally, he would support all of Chimey’s hobbies.

But if he had helped Chimey to set up the account, he would not have allowed it to join the beauty department.

Lin Yuan suddenly thought back to a memorable item on the Dark Clouds Bird Shrine’s treasure collection catalog—the Spirit Bodhi Fruit.

The Spirit Bodhi Fruit only grew on the Spirit Bodhi Tree after decades of standing against the elements.

The Spirit Bodhi Fruit was useless to spirit qi professionals, but it could allow Fantasy Breed feys to gain human form that they should only be capable of changing into when they reached Myth II.

The Spirit Bodhi Fruit was a spiritual ingredient that was completely useless, but its utter uselessness caused Lin Yuan to remember it.

The Spirit Bodhi Fruit was a consumable that would decide on the time of the transformation according to the Fantasy Breed fey's quality.

Chimey was now Fantasy III. Every additional level would amount to an hour of transformation time, so Chimey would be able to take human form for about three hours.

Since such an incident had occurred, it was necessary for Chimey to step in to personally settle the issue.

Chimey only stopped crying after Lin Yuan stroked its head for a while.

Lin Yuan asked Chimey, "What are you going to do now that your GIF dropped during your live-stream?"

The worry in Chimey's eyes had disappeared, but its gaze darkened after it heard Lin Yuan's question.

A moment later, Chimey replied, "How about I stop live-streaming on Star Web from now on?"

Chimey's stubbornness made Lin Yuan smile.

Chimey had been so certain, yet it was running away at such a time.

However, Lin Yuan would always spoil the feys he had contracted.

"Chimey, I'll be able to obtain one Spirit Bodhi Fruit, which should be able to allow you to transform into a human for three hours given that you're currently Fantasy III. You can use the human form to settle the issue of the GIF dropping.

"Although Star Web doesn't have a rule forbidding feys from live-streaming on Star Web, hiding behind a GIF gives a slight sense of trickery. As such, you will have to reveal the fact that you're a fey while in human form," said Lin Yuan seriously.

Lin Yuan's words made the twinkle return to Chimey's eyes.

When Lin Yuan noticed the gleam in Chimey's eyes, he felt that it was even more radiant than a Twilight Rune.

Chimey flapped its wings enthusiastically and flew several rounds around the Spirit Lock spatial zone before it stopped in front of Lin Yuan and said hopefully, "Really, Yuan?"

Lin Yuan jokingly rolled his eyes and replied, "When have I ever lied?"

Chimey happily flew around the Spirit Lock spatial zone a few more times before landing in front of Lin Yuan and asking, "Can I still block my face with a GIF from now on? I want to remove it when I finally evolve to Myth II. I want to hold a concert!"

This was the first time that Chimey had revealed its dreams to Lin Yuan, who smiled and replied, "You lazy bug, you better work hard at evolving your power on the Phoenix Perching Chinese Parasol Tree. Don't forget to save a seat in the front row for me when you hold your concert."

Chimey's eyes shone as it said, "The front row will be reserved for you, Genius, Red Thorn, the Source Sand, the Jasmine Lily, Blackie, and the rest. Everyone else will have to go to the second row!"

Chimey's response floored Lin Yuan because it meant that the front row would become a meeting of animals.

It was likely that Red Thorn would trumpet to give Chimey a rhythm when Chimey was singing.

Lin Yuan was stunned by this thought and suddenly remembered that the other feys would be able to change forms alongside Chimey by the time it reached Myth II.

Hence, it was highly possible that they would be able to sit at the front row of Chimey's concert.

Lin Yuan, Chimey, and Genius sat in the bows of the Phoenix Perching Chinese Parasol Tree and chatted. The atmosphere was calm and pleasant.

Suddenly, Lin Yuan remembered Chimey mentioning a surprise box and asked, "If a surprise box from Star Web contains more than 100,000 Radiance dollars, they can be revoked after sending a complaint to the officials. Chimey, you should complain! You earned the money with your talent and should get to decide how to use it. However, I don't want you to spend it frivolously. I hope you'll use it to do meaningful things."

Chimey nodded, but it was not focused on what Lin Yuan had said at all.

It was too hopeful and curious about how beautiful it would look in human form.

Chapter 805: The Transformation of the Astronomical Parliament's Members

Bei Xu woke up amongst the pile of rocks he had built to be his hideout. He immediately picked up on faint scraping sounds outside.

When Bei Xu heard these noises, all the hair on his body stood on end.

The scraping sounds were an urgent warning in the Grotto Continent. It was the sound of a colony of Knife Twist Line Centipedes.

The Knife Twist Line Centipedes were not considered feys. Their only means of attack was using their knife-like mouths.

If the Knife Twist Line Centipede accidentally bit an adult, they would be immediately trampled to death.

All of Bei Xu's hair had stood on end because of a legend that came to his mind.

The Knife Twist Line Centipede did not like to feed on flesh. It liked to eat metal-type spiritual ingredients.

According to legend, subterranean dimensional rifts opened up wherever a Knife Twist Line Centipede colony appeared.

A subterranean dimensional rift would definitely spell death for the people in the Grotto Continent who did not have feys.

When Bei Xu thought back to the fey that Lin Yuan had given him during the Astronomical Parliament's parliamentary meeting, a black figure lunged at Bei Xu's face, and he almost jumped out of his skin.

Bei Xu refocused his eyes through the dim light and realized that the black figure was a palm-sized bat.

Bei Xu was delighted by Lin Yuan's fey and felt that he had finally become a spirit qi professional.

But immediately after, Bei Xu fell into despair.

Even if he formed a contract with this fey, could he really take on the sea of lifeforms that flooded out of the subterranean dimensional rift with this new fey of his and live to tell the tale?

Some Knife Twist Line Centipedes had already started to crawl through the cracks in the rocks. Bei Xu shakily circulated his spiritual energy and formed a contract with the bat-species fey in his hand.

After he formed the contract, his eyes widened.

He had only requested for a fey from Lin Yuan, so he did not expect to be given such a strong fey.

Intense gratitude shone in Bei Xu's eyes, mixed with surprise and hope.

As he sensed the Sharp Shadow Bat's abilities, Bei Xu finally knew why Lin Yuan had told him that he could do it.

With the Sharp Shadow Bat, the 'rock insect' curse would no longer dictate his life.

After Bei Xu formed a contract with the Sharp Shadow Bat, he noticed through the spiritual energy connecting him to the Sharp Shadow Bat that there was a black ring with bat patterns and two crystal bottles of spirit fluid on the ground.

Bei Xu, who had been mining for his entire life, knew how rare feys were in the Grotto Continent.

He did not know how to use the black bat-shaped ring and two bottles of spirit fluid on the ground.

However, he was certain that they were part of the surprise that Lin Yuan had mentioned.

He carefully picked up the black ring and spirit fluid before standing up amongst the rocks to instruct the Sharp Shadow Bat to kill the Knife Twist Line Centipedes that were crawling in through the cracks.

As he looked at the corpses of the Knife Twist Line Centipedes on the ground, Bei Xu summoned his Willpower Rune. Unexpectedly, his Sharp Shadow Bat charged toward his Willpower Rune.

Bei Xu's mouth gaped wider and wider, and saliva even dripped out.

In spite of his befuddlement, he noticed that his Sharp Shadow Bat was growing larger.

Bei Xu was utterly confused about the Sharp Shadow Bat's transformation, but he knew that his Willpower Rune had disappeared after the Sharp Shadow Bat became larger.

When he sensed the Sharp Shadow Bat's new power, he felt that he would even be able to fight his way through a Class 1 subterranean dimensional rift.

If Lin Yuan had an all-seeing eye, he would have spat out a fountain of blood when he saw Bei Xu's situation. Actually, Lin Yuan had forgotten that Bei Xu would be completely unaware of how to use the Diamond fey storage box and spirit fluid.

The items he had given Bei Xu to increase his power became burdens he needed to protect when he brought them along with him.

Due to Bei Xu's 'rock insect' curse, he did not know anything about fey grades and qualities or the relationship between Willpower Runes and Fantasy Breed feys, which was common knowledge in the Radiance Federation.

Bei Xu would not even know how blessed he was now that the Sharp Shadow Bat had accidentally triggered its emperor bloodline and transformed into the Monarch Dark Bat.

Bei Xu would definitely be able to survive in the Grotto Continent with the Bronze X/Fantasy I Monarch Dark Bat.

...

Meanwhile, Yin Lin woke up on her soft bed.

Her heart pounded the moment she woke up. She did not dare to open her eyes despite knowing that she was now able to see clearly.

After a moment, she opened her eyes to a small crack.

Yin Lin saw a familiar yet foreign world through this crack, and everything that she saw was inexplicably beautiful and real.

All of the colors, shapes, and details were unclear to Yin Lin as of now.

This world had immediately mystified Yin Lin.

Warm tears flowed out of the corner of her eyes and slid down her face.

The moment the tears flowed out, a stunning smile broke out on Yin Lin's face.

This smile was the epitome of tears of happiness.

There was some noise at the door of Yin Lin's room, and it was clear that someone was afraid of making noise and disturbing Yin Lin as they walked on the carpet.

Yin Lin's mother walked through the door. She had wanted to give Yin Lin a blanket, and she was surprised to find Yin Lin already awake.

The moment she saw Yin Lin, Guan Da was stunned.

She realized that not only had azure leopard-shaped patterns appeared on the left side of Yin Lin's face, but white lion-shaped patterns that were slightly smaller than the leopard-shaped ones had appeared on the right side of Yin Lin's face as well.

Since she was from a Class 5 family, Guan Da could remain emotionless even in the most extreme situations. But when she saw the patterns on Yin Lin's face, her body started to tremble uncontrollably.

Guan Da had always seen her daughter's life as a miserable one.

But even though Yin Lin was blind, Guan Da felt that Yin Lin was the luckiest person in the world.

She did not expect that Yin Lin would be able to unlock the Yin family's most precious Spirit White Lion spirit patterns and Guan family's Azure Cloud Leopard spirit patterns at the same time after one afternoon nap.

Chapter 806: The Future Azure Envoy

Guan Da had always hidden Yin Lin away from the world because she wanted Yin Lin's sightless world to be calm and peaceful.

But now that Yin Lin had awakened the Azure Cloud Leopard and Spirit White Lion's spirit patterns, she could freely move around the Guan family's Azure Cloud Leopard and Spirit White Lion's mystic realms.

11 of the 12 Class 5 families in the Azure Federation had younger generations that could inherit Azure inheritance beast patterns.

However, none of the Guan family's younger generation had gained the Azure inheritance beast patterns, resulting in the Guan family's influence weakening amongst the 12 Class 5 families.

But now, the Guan family's beast pattern had finally appeared.

Moreover, the Guan family's beast pattern had appeared alongside the Yin family's beast pattern.

The two families' beast patterns strengthened each other, and Yin Lin was now the most revered member of the Azure Federation's younger generation.

This thought made the corners of Guan Da's eyes grow damp.

At that moment, a pair of hands gently wiped the corners of Guan Da's eyes, and a pleasant voice full of worry said, "Mom, why are you crying?"

Guan Da was about to instinctively deny that she had been crying.

By the time her reaction caught up to her, Guan Da asked Yin Lin incredulously, "Lin Lin, you can see clearly!?"

Yin Lin nodded and replied, "Mom, I can see the world as clearly as anyone else now."

Now that she could see this beautiful world clearly, Yin Lin felt like she had been given a new lease of life.

Lin Yuan, who was evolving feys in the Spirit Lock spatial zone, would never have anticipated that the Yin Lin, who he was afraid would not be able to fully regain her sight due to the lack of vitality, was about to become a flourishing Azure Envoy.

...

The past few days had been the busiest in Lin Yuan's life.

Although he had worked equally hard before, he had left the Spirit Lock spatial zone multiple times to collect the Law Source Crystals sent by Long Tao and Li Xuan besides nurturing feys.

Lin Yuan had formed a triangular long-term working relationship with Coiling Dragon's Valley and Dark Clouds Bird Shrine.

Thus, both families had expressed their sincerity to Lin Yuan.

Coiling Dragon's Valley had dispatched Long Tao to deliver 12,540 Law Source Crystals as well as the Suzerain/Myth III Vicious Poison Law Crystal to Lin Yuan.

The Vicious Poison Law Crystal was the first Suzerain/Myth III Law Crystal that Lin Yuan had obtained.

Law Crystals from Myth III feys were twice as strong as those from Myth II feys.

The stronger the fey was when it was still alive, the brighter the cracks in the Law Crystal.

Lin Yuan carefully studied the brightness of the Vicious Poison Law Crystal and checked it with True Data.

He was sure that the Vicious Poison Law Crystal had come from a Suzerain IX/Myth III Aquamarine Scales Sky-Swallowing Python.

Li Xuan from Dark Clouds Bird Shrine had delivered 6,210 Law Source Crystals and a brocade box of Law Crystal fragments.

There were also the two blades of Muscle Hyperthymesia Grass that Lin Yuan had been looking forward to.

When Li Xuan arrived, Lin Yuan took the chance to discuss the trade of Spirit Bodhi Fruits.

Eventually, Li Xuan returned to Dark Clouds Bird Shrine's mansion in the Royal Capital and took the Spirit Bodhi Fruit from the First Elder to give to Lin Yuan.

Since Lin Yuan wanted a consumable like the Spirit Bodhi Fruit, which did not have any special meaning, Li Xuan was more than willing to give it to him to express his thanks.

Lin Yuan wanted to give Li Xuan a Golden Lotus Brocade Pearl, but he was shocked by Li Xuan's insistent refusal.

Hence, Lin Yuan kept Li Xuan's gesture in his heart.

Lin Yuan opened the brocade box that Li Xuan gave him in the Spirit Lock spatial zone and saw that it was half-filled with Law Crystal fragments.

When he tried to grab them, his hand could not pick them all up.

Other than the Law Crystal fragments in his hands, there was still a quarter of the total number of Law Crystal fragments left in the brocade box.

Lin Yuan nodded in satisfaction at the large number of Law Crystal fragments.

Besides the quality of the Law Crystal fragments, the quantity had already surpassed Lin Yuan's expectations.

After the Sacred Sword Wielding Queen absorbed this box of Law Crystal fragments, it would be able to repay Lin Yuan's efforts by 20 times, and a more complex world would be created on its skirt.

These transactions had allowed Lin Yuan to earn a windfall.

Once he checked the quality of the Law Crystal fragments, he realized that most of them came from different Myth Breed feys.

The laws were very complicated, but the types were not all unorthodox.

Every type of Law Crystal was generally widely applicable, and it was clear that the Li family had chosen them after careful consideration.

This was great for Lin Yuan.

Even though Lin Yuan possessed a large number of Law Source Crystals, he could not nurture them all into worlds.

These messy laws could be used in the Astronomical Parliament's Star Spirit Seat or allow Lin Yuan to gain a limited resistance to their element, which would increase Lin Yuan's power in a way.

Lin Yuan gave the Spirit Bodhi Fruit to Chimey and told it to decide for itself when it wanted to use it.

He assumed that Chimey would be eager to eat the Spirit Bodhi Fruit and start live-streaming as Sparrow Voice Loli Goddess on Star Web. Unexpectedly, Chimey looked troubled after it received the Spirit Bodhi Fruit.

It carefully hid the Spirit Bodhi Fruit in the nest in the Phoenix Perching Chinese Parasol Tree and chirped to Lin Yuan and Genius, "Yuan, Genius, do you think that I'll look good in human form? Yuan, do you think that I should wear my own clothes or buy a new set when I'm live-streaming in human form? Genius, can I hug you when I'm live-streaming in human form? I want to stroke a cat like Yuan does!"

Chimey's troubling questions made Genius and Lin Yuan look at each other—both were rendered speechless.

They could not help but sigh to themselves and wonder if the world of avian-type young girls was as complicated as it seemed.

Chimey's last question dazed Genius.

It never thought that the Chimey that it regarded as its good friend would have the evil idea of wanting to stroke it during the live stream.

Chapter 807: Like Father Like Daughter

It'll be humiliating if I end up purring in front of so many people on the live stream.

After Lin Yuan nurtured feys for a few days, he realized that the troubled Chimey had no intention of live-streaming.

He was not worried about when Chimey wanted to live-stream. He gave the 18,780 Law Source Crystals to the Sacred Sword Wielding Queen that was dizzy with happiness.

The Sacred Sword Wielding Queen already had over 800 Law Source Crystals and could eat to its heart's content.

But when it saw the 18,780 Law Source Crystals that Lin Yuan had given it, the Sacred Sword Wielding Queen was stunned.

The Sacred Sword Wielding Queen stuck out its fingers as it started to make mental calculations.

Given its current rate of absorbing Law Source Crystals, it would take it close to a month of continuous absorption to absorb all the Law Source Crystals.

Eating was a source of joy, and every meal was just an increment of joy.

The Sacred Sword Wielding Queen would be able to experience the joy of continuous eating. This was peak bliss for this sacred source lifeform.

It was too incredible that it had a contactor that would feed it continuously.

The Sacred Sword Wielding Queen suddenly felt as though it had grown up in a short period.

It locked its fingers together and stretched, and a pair of bony hands appeared in front of it.

The hands were holding a dark green gem.

Lin Yuan could not help but be amused by the Sacred Sword Wielding Queen's expression, and he felt that if it was not a sacred source lifeform that took human form, it would be a hamster-species fey based on its personality.

It was just as obsessed and took as much joy from eating.

This thought rendered Lin Yuan speechless in a second.

He seemed to be just as possessive and liked to hoard like hamsters.

Lin Yuan had always raised the Sacred Sword Wielding Queen like it was his daughter.

Lin Yuan thought, *?It really is true what they say, like father like daughter.*

This thought made Lin Yuan even more speechless than he already was.

The Sacred Sword Wielding Queen peered at the Myth III Vicious Poison Law Crystal, and its mouth twitched slightly.

As a sacred source lifeform, it felt that Law Source Crystals were more suited to its taste.

With the feast of Law Source Crystals, the Myth III Law Crystal was just a small snack to it.

The Sacred Sword Wielding Queen felt a little troubled by Lin Yuan's speechless expression.

It felt that it should acquire more knowledge about laws such as the Enlightenment Law as they would make Lin Yuan smarter when they were applied to him through the Sacred Sword Wielding Queen's skirt.

Lin Yuan did not know what the Sacred Sword Wielding Queen was thinking. If he did, he would probably have rolled his eyes at it.

“Hold on to this Vicious Poison Law first but don’t absorb it. Do it in a few days when I tell you to do so,” said Lin Yuan.

The Sacred Sword Wielding Queen nodded. Without Lin Yuan’s order, it would not even bother to absorb the Law Crystal when it had Law Source Crystals.

It took out a huge leather sack and gave it to Lin Yuan.

The leather sack was filled with fingernail-sized Law Crystals that came from a day’s worth of the Sacred Sword Wielding Queen tempering the Law Source Crystals.

Lin Yuan took the sack so that he could give it to Endless Summer to accelerate its increase in power.

In four days, Lin Yuan worked overtime and managed to evolve the 400 Hot Spring Snails.

He had once again evolved the Hot Spring Snails to Elite/Epic before he chose from their three possible exclusive skills and finally evolved them to Bronze X/Epic.

As for the 30 Jasmine Lilies that he would gift to Indigo Azure City, he obtained 30 Bronze low-quality Jasmine Lilies with abilities that strongly leaned toward healing from the Listening Heron Chamber of Commerce.

Jasmine Lilies with abilities that strongly leaned toward healing were rare.

The abilities allowed the Jasmine Lily to trigger the vitality in its body and allow it to inject vitality into its target through its flower head.

The one-time injection of a large amount of vitality would result in unnecessary depletion of vitality.

But this ability would be effective in emergency situations and raise the target’s vitality to its maximum in the shortest amount of time.

This exclusive skill was extremely suited for emergency situations during battles in the wild. It could significantly reduce severe injuries and save lives.

Now that he had settled both the Hot Spring Snails and Jasmine Lilies, Lin Yuan stretched.

He turned and said to Genius, “Genius, have you memorized the basic fighting strategies and moves from Star Web?”

Genius meowed and replied in a child-like voice, “Yuan, I’ve memorized all the basic fighting strategies and moves from Star Web and organized them into a system. However, there’s really a lot of them, and it was difficult to search for all of them.”

Lin Yuan patted Genius’ head. During the last few days, while he had been nurturing feys, Genius had been searching through the entire Star Web for comprehensive combat skills and fighting strategies.

It had really been hard on Genius.

Lin Yuan took the Muscle Hyperthymesia Grass roots that he had prepared in advance out of the amber-button-shaped fey storage box.

He had sorted them out at the mountain behind the mansion after he received the Muscle Hyperthymesia Grass child ramets.

The scent of the Muscle Hyperthymesia Grass would lose its effectiveness because many people in the mansion had drunk the Silver Stamen Gold Luster Cassia nectar.

However, there were many feys that were uncleansed in the mansion.

Thus, the scent of the Muscle Hyperthymesia Grass would greatly affect the feys in the mansion.

Lin Yuan did not want the lake full of Angelfish of Bliss to die.

He placed one of the Muscle Hyperthymesia Grass roots in his mouth and fought against the bitterness to swallow it.

Since his body and soul had already been cleansed, he did not feel any discomfort.. Nonetheless, all the cells in his muscles were triggered.

Chapter 808: Chef Supreme and Bamboo Monarch's Attention

Genius meowed and used Connected Tails to connect itself and Lin Yuan.

The system of all the fighting skills and moves that Genius had spent the last few days memorizing from Star Web was transferred to Lin Yuan's brain.

In a flash, Lin Yuan accepted the sea of knowledge from Genius, and it was imprinted in his brain.

In his state of hyper memory, his muscles memorized all the combat skills and fighting styles that were stored in his brain.

In half an hour, his muscles memorized all the combat skills and fighting styles that were available on Star Web.

He would be able to use the information in his muscles to apply the combat skills while he was defending and attacking.

Lin Yuan had been a complete greenhorn to martial arts, but he could now be called a master of martial arts.

He felt that this seemingly coincidental achievement was actually a once-in-a-lifetime miracle.

The fact that one's body and soul had to be cleansed by the Silver Stamen Gold Luster Cassia nectar from Radiant Moon Palace would already be an insurmountable obstacle for most people.

Secondly, the Muscle Hyperthymesia Grass that was unique to the Li family was also required, and Dark Clouds Bird Shrine had to give their approval before the Muscle Hyperthymesia Grass could be obtained.

If Lin Yuan had not been able to produce Golden Lotus Brocade Pearls and Law Crystals, he might not have received the Muscle Hyperthymesia Grass from the Li family even though he was the Moon Empress.

The third factor was Genius' Connected Tails.

Compared to the other two factors, the third factor was the hardest.

Genius had transformed into the Beast that Connects Everything when it evolved to Fantasy Breed and opened up the path for the Hundred Questions Beasts.

The strength of Connected Tails did not just lie in its ability to transfer knowledge, but that Genius could memorize all the knowledge in the world.

Without the unique Genius, even if a person was able to fulfill the first two requirements, they would not be able to learn all the combat skills and fighting strategies within half an hour.

After Lin Yuan was out of the state of hyper-memory, he suddenly felt his perspective on the world shift.

The change in his muscles led Lin Yuan to feel that his body had become tens of times more agile.

He immediately instructed the Source Sand to change into a grain of sand and to toss gravel at him every ten seconds.

Lin Yuan would never be able to avoid this rate of gravel being thrown at him in the past, but his body started to move on instinct now.

He turned and dodged the rapid rain of gravel in a charismatic series of movements.

This made a sense of thrill course through Lin Yuan's veins.

This speed of reaction to attacks was exactly what Lin Yuan wanted.

Although his body had not been improved, the increase in combat skills and fighting styles were enough for Lin Yuan to utilize Spirit Essence Explosion perfectly.

Even the arch-class experts found defense to be the most difficult during a battle.

However, Lin Yuan could now pair the combat skills and fighting strategies with Spirit Essence Explosion to make up for this weakness.

Yet, Lin Yuan was still unsatisfied.

He stored away 100 of the over 120 Golden Lotus Brocade Pearls that Brocade Zither had nurtured into a Diamond fey storage box before he picked up Genius and headed to Radiant Moon Palace.

While on the way to Radiant Moon Palace, Lin Yuan contacted Duan He and arranged to meet him at a restaurant in the Radiant Moon Palace.

He gave the sack of Law Crystals for Endless Summer and the feys for the Indigo Azure Guard to Duan He.

In the past, Lin Yuan would have kept away the batch of feys for Indigo Azure City for two months before giving it to Duan He to prevent anyone from being shocked by the Creation Master resources that he possessed.

But now, Lin Yuan had already decided to reveal his identity as the disciple of the Moon Empress. Hence, Duan He would only be shocked but not think anything was strange about how he had prepared 400 Bronze/Epic Hot Spring Snails and 30 Bronze/Epic Jasmine Lilies in an hour.

Lin Yuan knew that there was a war room in the Radiant Moon Palace's treasure trove that contained a large number of spirit fluids.

There were close to 10,000 bottles of each kind of spirit fluid.

The lowest quality of any of these spirit fluids would be able to produce a Bronze/Epic fey.

The Class 5 spirit fluids in the war room could create Bronze/Legend feys in a second or enable feys that were stuck at Diamond X/Fantasy V to evolve to Suzerain and undergo the World Cleansing.

After he gave Duan He the items, Lin Yuan used the Ethereal Jellyfish's Tentacle Node to transport himself to the Radiant Moon Palace's entrance.

He ran into the Moon Empress, Mystic Moon, and Cold Moon walking out of the palace when he arrived.

Lin Yuan hurriedly ran up to greet them.

He bowed, and Mystic Moon and Cold Moon said, "Good day, Young Lord."

Lin Yuan greeted them in return.

He did not expect Mystic Moon to be back from the outskirts so soon.

However, he felt that Mystic Moon was different from before.

Now, a terrifying aura seeped out of Mystic Moon's body intermittently. Lin Yuan remembered the Moon Empress mentioning that Mystic Moon was a fey.

It seemed that Mystic Moon had just evolved, and his body was still not accustomed to controlling his new power.

A warm smile appeared on the Moon Empress's face when she saw Lin Yuan, and she walked up to him to adjust his collar.

While she was doing so, she noticed the Flowing Cloud Beeswax pendant hanging around his neck, and her smile widened.

Shock flashed across Cold Moon's eyes when she saw Lin Yuan. News of the Golden Lotus Brocade Pearl that appeared in the Royal Capital's Fey Observer Association had spread throughout the Royal Capital.

It had also attracted the attention of the Class 5 Creation Masters Chef Supreme and Bamboo Monarch.

More than 30 factions had come to Leaning Moon Mountain to see the Moon Empress and ask for a Golden Lotus Brocade Pearl.

Cold Moon knew that this matter had nothing to do with the Moon Empress and that it was the single-handed work of Lin Yuan.

This meant that the Golden Lotus Brocade Pearl, which could change the style of Creation Master factions, was Lin Yuan's unique secret.

Cold Moon had always been certain of Lin Yuan's power as a combat-class spirit qi professional, but she never expected that his power as a Creation Master would increase so exponentially in the short period of six months.

Although she had never seen the Golden Lotus Brocade Pearl for herself and could not be sure if it was as amazing as the rumors said, it had to be very special for so many factions to visit Leaning Moon Mountain because of it.

It was not something that any Creation Master could nurture.

Chapter 809: The Moon Empress' Ride

Cold Moon watched as Lin Yuan handed a cloud-shaped Diamond fey storage box to the Moon Empress.

This stunned Cold Moon.

She was not alone as even the Moon Empress, and the recently returned Mystic Moon were astonished.

Mystic Moon was slightly confused.

It has always been the Moon Empress who does everything she can to give things to Young Lord. Since when did Young Lord start giving things to the Moon Empress?

The Moon Empress was about to instinctively reject Lin Yuan, but when she saw the seriousness in his face and thought about how he would feel if she did reject him, she reached out her hand to receive the cloud-shaped fey storage box.

She looked inside the fey storage box, and her expression changed from surprise to a happy smile.

The happy smile then changed to pride and amazement.

The Moon Empress never expected her disciple to have grown so much.

She immediately knew what to do with the Golden Lotus Brocade Pearls that were in the Diamond fey storage box.

She saw this gift from Lin Yuan as an extremely precious treasure, and an odd feeling came over her.

It was like the apple of her eye that she had painstakingly polished had finally grown up and no longer needed her as much.

This stubborn young man in front of her not only rejected her help but was also starting to repay her. This was the first time that the Moon Empress was experiencing such a feeling.

The mixture of shock and pride made her feel like she had just successfully passed on her flame to a new spark.

The Moon Empress beamed at Lin Yuan and said, "I really like what's inside this Diamond fey storage box. I'm headed to Midnight Palace with Cold Moon and Mystic Moon now. Why don't you accompany me to the Moon Stable?"

Neither Mystic Moon nor Cold Moon knew what was in the fey storage box that Lin Yuan had given the Moon Empress.

But when he heard that the Moon Empress wanted to bring Lin Yuan to the Moon Stable, Mystic Moon's eyes lit up because he knew that she was going to give Lin Yuan the fey carriage that she had put a lot of effort into preparing for him.

Mystic Moon could not help but gulp when he thought of the fey carriage that the Moon Empress had prepared for Lin Yuan.

He could not help but think about how the Moon Empress looked while she was preparing the fey carriage for Lin Yuan.

Lin Yuan immediately moved to the Moon Empress' side to escort her as he said, "Let's go, Master. I'll accompany you."

Lin Yuan had always had access to every nook and cranny of the Radiant Moon Palace and could even freely walk in and out of Moonbeam Corridor.

The Moon Empress had even built a breeding room for Lin Yuan in Moonbeam Corridor.

After Lin Yuan and the Moon Empress held their question-and-answer session, he would go to his breeding room in Moonbeam Corridor to organize all the information he had gained.

The first time that Lin Yuan had seen the interior of the breeding room, he had blown an internal raspberry.

All the walls in the breeding room were embedded with enormous transparent spirit wood.

Even Class 4 Creation Masters had to work non-stop for about a decade to gather enough resources to buy a fist-sized transparent spirit wood.

Transparent spirit wood was highly beneficial for Creation Masters as it could increase the purity of spirit qi.

This luxury good might be useless to Lin Yuan, but this interior element was evidence of the Moon Empress' affection for him.

Although Lin Yuan was extremely familiar with the Radiant Moon Palace, he had not explored the entire Leaning Moon Mountain.

He only traveled between the Radiant Moon Palace and the pavilion where he stayed, as well as where Chu Ci stayed.

The Moon Stable was where the fey carriages were kept, and Lin Yuan had never been there before.

But when he had seen Li Xuan and Long Tu's fey carriages, Lin Yuan found himself liking fey carriages more and more.

It made Lin Yuan ponder over what kind of fey carriage he should create for himself.

The choice of what kind of fey carriage to create was not an easy one. Firstly, he needed to think about what kind of protection he should use to cover his fey carriage.

There were also the blocking qualities that the interior needed to have and the strength of the feys that would be used to pull the carriage.

Lastly, there was the charisma factor to consider.

All of these considerations needed separate contemplation, and Lin Yuan was currently at a loss. Thus, he was curious about the fey carriages that were in Leaning Moon Mountain's Moon Stable.

As he walked alongside the Moon Empress and admired the scenery around Leaning Moon Mountain and the rare feys that were all around, Lin Yuan was rather pleased.

Some time had passed since New Year's.

There was warmth in the cold as winter shifted to early spring.

The early spring in Leaning Moon Mountain was full of the fragrance of flowers that when breathed in, it could make a person feel like their spirit was being soothed.

When they arrived at the Moon Stable, Lin Yuan saw two large figures dressed in moon-colored long robes.

They were three meters tall each, and Lin Yuan was certain that they were not human spirit qi professionals.

They had to be giant feys.

The two giant figures knelt when they saw the Moon Empress and nodded at Lin Yuan.

However, Lin Yuan realized that they did not greet Cold Moon or Mystic Moon in any way.

"Go pull out the Freezing Moon Pagoda Carriage. The both of you will be coming with me to Midnight Palace," said the Moon Empress.

Lin Yuan found the Moon Empress' words to be strange as feys always pulled fey carriages. So why did the Moon Empress tell these two enormous figures dressed in moon-colored long robes to pull out the fey carriage?

Suddenly, Lin Yuan froze, and his head snapped back to look at the enormous figures, which lifted their heads and let out a sound similar to that of snake-species feys.

The sound did not have the same cruel ferocity that snake-species feys let out. Instead, it was filled with an odd tone of magic.

When the two enormous figures cried out, Lin Yuan noticed that there were two faces below their moon-colored long robes.

Shortly after, one of the figures shot into the sky and turned into a giant snake that was almost a kilometer long.

The other figure was not far behind as it turned into a light green giant snake that was also about a kilometer long.

Lin Yuan's nostrils contracted as he used True Data to check on the white and light green giant snakes.

Chapter 810: Flying-Serpent Bloodline

When Lin Yuan used True Data to check the white and light green giant snakes, he realized that a similar situation had arisen when he checked Auntie Zhang's Terror Rabbit when it was in a near-death state.

He could not see any information about the two giant snakes' attributes on True Data. All he could see were their four exclusive skills.

This made Lin Yuan aware that they were Creation Breed feys.

Two energy chains appeared out of the two giant snakes' heads and pulled open the Moon Stable's heavy doors. The Moon Stable trembled when the light green and white energy chains entered through the doors.

A pagoda-shaped structure with moon drawings all over it emerged from the Moon Stable.

All the moon drawings had moonbeam stones embedded in them and made the pagoda-shaped structure appear like a chilly sky in the heavens.

After the light green and white energy chain tossed the pagoda-shaped structure to the sky, the energy in the giant snakes started to pour forth.

Dorsal fins appeared on the smooth back of the snakes, while two large wings appeared on the front half of their bodies.

The wings were as translucent as fish fins, and the sky shimmered as the wings were flapped.

When Lin Yuan saw the wings, he immediately knew that these two Creation Breed snake-species feys had the flying-serpent bloodline, which was a branched out bloodline of snake-species feys.

As for the eliteness of the bloodline, the flying-serpent bloodline was as elite as the main dragon-species and main phoenix-species bloodlines.

The flying-serpent bloodline could actually suppress most main dragon-species and main phoenix-species feys.

Lin Yuan watched as both snakes lifted the back halves of their bodies and started to twist around and formed a secure base that supported the Moon Beam Treasure Pagoda that was still connected to the light green and white energy chains.

The dorsal fins on the snakes turned outward and looked like two blooming lotuses.

When Lin Yuan saw the Moon Empress' fey carriage, he gained a completely new understanding of what fey carriages were.

The Moon Empress said to Lin Yuan, "This Freezing Moon Pagoda Carriage is the Radiant Moon Palace's emblem. If you ever need to use the Radiant Moon Palace's name to do anything, just let White Moon and Light Green Moon know. You have just as much authority as me in Leaning Moon Mountain."

Lin Yuan immediately realized that the Moon Empress was telling him that he could ride this Freezing Moon Pagoda Carriage.

However, he felt extremely pressured to sit in the fey carriage pulled by these two Creation Breed feys.

The Moon Empress handed a Diamond fey storage box to Lin Yuan, who quickly reached out his hand to receive it.

After he received the fey storage box, the Moon Empress said, "Even if you don't need to represent the Radiant Moon Palace, you'll still need your own fey carriage. See if any of the feys in this fey storage box are suitable to pull your fey carriage."

Lin Yuan was about to look through the fey storage box when the Moon Empress chuckled and said, "Summon out all the feys from inside the fey storage box."

As such, Lin Yuan did as the Moon Empress said instead of using his spiritual energy to look through the fey storage box.

Shortly after, 12 fist-sized balls of water appeared in the air next to Lin Yuan.

Lin Yuan could not help but be taken aback by the balls of water.

Mystic Moon's eyes widened when he saw the 12 balls of water that Lin Yuan had summoned.

Mystic Moon had been the one to tell the Moon Empress to prepare a fey carriage for Lin Yuan, but the Moon Empress had prepared too many items for Lin Yuan.

If Mystic Moon had not mentioned the fey carriage to the Moon Empress, she would have come up with more ways to strengthen Lin Yuan's foundation and give him more items that would protect his life.

However, Mystic Moon was confused because the Moon Empress had not given Lin Yuan the fey carriage that she had prepared for him.

But when Mystic Moon took a closer look at the 12 balls of water, his eyes almost popped out of their sockets.

He never expected the Moon Empress to give Moving Source Water to Lin Yuan.

When Lin Yuan saw the 12 balls of water, the Sacred Sword Wielding Queen that had been consuming Law Source Crystals in the Spirit Lock spatial zone started to move.

The Sacred Source Wielding Queen's movements were much stronger than when Lin Yuan had first obtained the Law Source Crystals. It was similar to when Red Thorn had discovered the Source Seed.

Soon, Lin Yuan's mouth started to twitch.

The Sacred Source Wielding Queen was moving so erratically because it wanted to eat the 12 balls of water.

Given the Sacred Source Wielding Queen's reaction, Lin Yuan knew that the 12 balls of water would not be able to evolve it like the Source Seed did for Red Thorn.

Actually, the 12 balls of water would increase the Sacred Sword Wielding Queen's growth more than the Law Source Crystals would.

There was even a chance that the Sacred Sword Wielding Queen would immediately mature from child to adult after it absorbed the 12 balls of water and would allow the Queen Form and Sacred Sword Form to unlock second abilities.

Lin Yuan learned through his communication with the Sacred Sword Wielding Queen what the 12 balls of water were.

However, it was because he knew what the 12 balls of water were that he would never give them to the Sacred Sword Wielding Queen as much as they would increase its power.

While Lin Yuan was processing his shock about the 12 balls of water, the Moon Empress said, "In the event of the death of a sacred source lifeform's contractor, a 7 Stars sacred source lifeform can use shooting stars to regress to its child states to survive as long as it did not form a marrow contract with its contractor.

"As you know, a Class 5 Creation Master can make a 5 Stars sacred source lifeform's shell into a weapon. When using the pure law power in Law Crystals, the laws in a dead sacred source lifeform can be extracted and nurtured.

"The 12 balls of water that you see before you are the sacred source lifeforms that a person from an independent federation had contracted. This person's sacred source lifeform was 9 Stars and was close to perfection. But since there was no marrow contract and the person fell out with the sacred source lifeform, he couldn't fully cooperate with the sacred source lifeform, nor could the sacred source lifeform be evolved to perfection.

"I sublimated the person using Totem Moon, and I also later killed the sacred source lifeform that escaped. These 12 balls of water are the products of the laws that were in the sacred source lifeform Moving Source Water."

Cold Moon and Mystic Moon breathed in deeply.. They did not expect the Moon Empress to tell Lin Yuan about what had happened a decade ago at such a moment.
