

Merchant 911

Chapter 911: Blue Flash Purple Butterfly! Fantasy Breed!

The Kill Food Sky Butterfly would be much stronger than Endless Summer if they really started fighting.

Lin Yuan felt that Endless Summer was Sky City's number one fighting power. But now that he had the Kill Food Sky Butterfly, Endless Summer was demoted to number two.

Lin Yuan could control the Kill Food Sky Butterfly through the Blue Flash Purple Butterfly. As such, the Kill Food Sky Butterfly had become another source of power for Lin Yuan.

This source of power was different from the Mother of Bloodbath's power as a Path Protector.

As Lin Yuan's Path Protector, the Mother of Bloodbath was considered external strength.

But since the Kill Food Sky Butterfly had sworn its servitude to the Blue Flash Purple Butterfly, it had become Lin Yuan's own strength.

Lin Yuan said to the Blue Flash Purple Butterfly, "Little fellow, it's your turn to evolve to Fantasy Breed now."

The Blue Flash Purple Butterfly flew toward the butterfly-shaped Willpower Rune in Lin Yuan's hand.

At that moment, a surging grandiose purple willpower flowed out of the Blue Flash Purple Butterfly.

The purple willpower slowly turned into shining butterflies, and it was as though 1,000 purple butterflies were flying off towards the horizon.

The purple glow turned into purple afterglow light that cascaded all over the Blue Flash Purple Butterfly.

The purple willpower in the Blue Flash Purple Butterfly grew stronger, and its wings became even more slender.

A long tail grew out of the bottom of the Blue Flash Purple Butterfly, and it consumed and spat out the purple afterglow light continuously.

Lin Yuan nodded approvingly. It seemed like the Blue Flash Purple Butterfly's evolution to Fantasy Breed would not be as painful as Genius and Chimey's had been.

Judging from this situation, the Blue Flash Purple Butterfly should soon evolve into the Purple Afterglow Beauty Goddess Butterfly.

The beauty of the Purple Afterglow Beauty Goddess Butterfly was legendary.

Just as Lin Yuan was about to declare a state of calm, something out of the ordinary occurred.

The light blue Kill Food Sky Butterfly flew up from Lin Yuan's finger and carefully flew around the evolving Blue Flash Purple Butterfly.

Lin Yuan could sense the Kill Food Sky Butterfly's admiration, hesitation, affection, hurt, and determination.

The moment that the Kill Food Sky Butterfly felt determined, it turned midair and changed into a gentle woman with blue hair and purple eyes.

Lin Yuan did not know what the Kill Food Sky Butterfly was trying to do.

At that moment, the woman that the Kill Food Sky Butterfly had changed into placed its hands together as though it was about to bid goodbye.

Shortly after, an aura of resolution spewed forth from the gentle woman, and white flames burst to life around her.

Lin Yuan could not help but exclaim in shock when he saw the white flames, "Bloodline Sacrifice! Kill Food Sky Butterfly, you've only just evolved to Creation Breed. Why are you sacrificing your bloodline? Are you trying to kill yourself?"

But from the Kill Food Sky Butterfly's posture, Lin Yuan had a general idea of why it wanted to sacrifice its bloodline.

Feys with elite bloodlines could all sacrifice their bloodlines.

Some main dragon-species feys would sacrifice their bloodlines right before their death to give their favorite offspring strength. As such, their offspring would be able to gain the main dragon-species bloodline easily from a young age.

However, the Bloodline Sacrifice was extremely dangerous. The bloodline was a basic part of a fey.

Any impact to a fey's bloodline would result in serious injuries, much less sacrificing the bloodline itself.

Normally, dragon-species feys that sacrificed their bloodlines would lose their lives afterward.

Only a few feys had accumulated a large amount of pure spiritual ingredients that could use the pure elemental energy inside the spiritual ingredients to prolong their life after sacrificing their bloodline.

The main dragon-species feys always sacrificed their bloodlines on their deathbed.

The Kill Food Sky Butterfly had only just transformed out of its Kill Food Worm stage, and it could be said that it had just grown up.

The grown-up Kill Food Sky Butterfly was doing the same thing as those old dragon-species feys that were about to die. It wanted to sacrifice its elite bloodline to help the Blue Flash Purple Butterfly's bloodline improve further.

As the most beautiful butterfly-species fey, the Blue Flash Purple Butterfly was only lacking in its bloodline.

The Kill Food Sky Butterfly's sacrifice of its bloodline to the Blue Flash Purple Butterfly would greatly change the Blue Flash Purple Butterfly.

It was even possible that the Blue Flash Purple Butterfly would be able to break through the current understanding of it that people had and evolve into a fey that was even more beautiful than the Purple Afterglow Beauty Goddess Butterfly.

Lin Yuan was stunned by the Kill Food Sky Butterfly's ultimate sacrifice. He could feel the deep love that the Kill Food Sky Butterfly had for the Blue Flash Purple Butterfly. The love was so strong that the Kill Food Sky Butterfly was even willing to give up its life.

Moths always flew toward flames, and this was exactly what the Kill Food Sky Butterfly was doing now.

Did a love that made one willing to sacrifice themselves for the sake of their loved one truly exist?

Naturally, someone like Lin Yuan, who had only ever been single, could not provide an answer to this.

Still, this scene before him made him aware that there were some creatures that were even willing to put their life on the line in the name of love.

Although the Kill Food Sky Butterfly had decided to sacrifice itself, Lin Yuan could not watch it die.

The evolving Kill Food Sky Butterfly was still conscious, and it knew that the Kill Food Sky Butterfly was going to sacrifice itself.

Lin Yuan could sense the Blue Flash Purple Butterfly's heartache and anxiousness.

The Blue Flash Purple Butterfly even considered stopping its evolution to prevent the Kill Food Sky Butterfly from sacrificing itself. However, the process of evolving to Fantasy Breed could not be halted once it started.

Once a fey started fusing with a Willpower Rune, it could only wait for the evolution to be over.

Lin Yuan took a deep breath and used spiritual energy to say to the Blue Flash Purple Butterfly, "Leave it to me. I'll save the Kill Food Sky Butterfly. Don't waste the opportunity that the Kill Food Sky Butterfly is willing to use its life to give you."

Lin Yuan activated the Pure Land of Bliss, and it appeared by his feet.

The glowing white sand covered the Kill Food Sky Butterfly with white flames around it.

The Pure Land of Bliss was unable to heal the damage caused by Bloodline Sacrifice.

However, the Pure Land of Bliss could protect the Kill Food Sky Butterfly and ensure that it kept its life even after sacrificing its bloodline.

Although the Strength Law that the Kill Food Worm had comprehended was not an attribute law, the Kill Food Worm was still an earth-type fey. It remained an earth-type fey even after evolving to Creation Breed.

Thus, pure earth-type spiritual ingredients were required to help the Kill Food Sky Butterfly regain its sacrificed bloodline.

Lin Yuan took earth-type elemental pearl heavenly-maiden-grade elemental pearls out of the Spirit Lock spatial zone and tossed them toward the Kill Food Sky Butterfly.

He did not care if they had an outer layer or what kind of outer layer they had because the priority was to save the Kill Food Sky Butterfly's life..

Chapter 912: Yuan, Long Time No See

Lin Yuan had made a promise to the Blue Flash Purple Butterfly, one of his partners. If the Kill Food Sky Butterfly died after sacrificing its bloodline, the Blue Flash Purple Butterfly would be seriously affected. It was even possible that the Blue Flash Purple Butterfly would never get over its grief.

He did not want his partner to be in pain for the rest of its life.

The earth-type heavenly-maiden-grade elemental pearls landed on the white flames surrounding the Kill Food Sky Butterfly and immediately became a flood of earth-type elemental energy.

The pure earth-type energy was enough for the Kill Food Sky Butterfly to regain its senses.

Lin Yuan yelled to the Kill Food Sky Butterfly, "I can continuously provide you with pure earth-type elemental energy. Feys depend on pure elemental energy to sustain their bloodlines. You can use the pure earth-type elemental energy to produce a new bloodline while sacrificing your current one simultaneously. Sometimes, sacrificing yourself is not just about you. The Blue Flash Purple Butterfly is hurting because of your sacrifice."

The Kill Food Sky Butterfly was shocked by what Lin Yuan said.

When the Kill Food Sky Butterfly saw the Blue Flash Purple Butterfly evolve to Fantasy Breed, it knew that this was an extremely important transformation.

The only thing that the Kill Food Sky Butterfly could give the Blue Flash Purple Butterfly was its elite butterfly-species bloodline.

The Kill Food Sky Butterfly looked at the Blue Flash Purple Butterfly, and it instantly sensed the latter's intense pain.

The gentle woman that the Kill Food Worm had changed into looked guilty and hurriedly absorbed the thick earth-type elemental energy. It started to produce a new bloodline at the same time that sacrificed its bloodline to the Blue Flash Purple Butterfly.

Lin Yuan waved his hand, and all the earth-type heavenly-maiden-grade elemental pearls he had accumulated poured out onto the Pure Land of Bliss.

"Just take as much as you need. But these are all the earth-type elemental pearls I have," said Lin Yuan.

Naturally, the Kill Food Sky Butterfly would prefer not to die.

It looked surprised at the pile of earth-type heavenly-maiden-grade elemental pearls that rose to Lin Yuan's knee.

Although the Kill Food Sky Butterfly had evolved to Creation Breed and transformed its appearance, it had retained all its memories.

Hence, the Kill Food Sky Butterfly was well aware of the value of heavenly-maiden-grade elemental pearls.

The Kill Food Sky Butterfly would eat a few elemental pearls per week when it was in the Cage of Brahma Insects.

However, those elemental pearls only had a purity of around 70%, whereas these ones all had a purity of at least 95%.

The Kill Food Sky Butterfly was suspicious. *“Aren’t earth-type heavenly-maiden-grade elemental pearls valuable?”*

Even pinnacle Class 4 Creation Masters had trouble nurturing one. Thus, how did Lin Yuan get so many? Moreover, almost all of them had an outer layer.

During their previous confrontation, the Kill Food Sky Butterfly had discovered who Lin Yuan was.

Despite being the disciple of a Class 5 Creation Master, it could not be easy for Lin Yuan to produce so many earth-type heavenly-maiden-grade elemental pearls.

The Kill Food Sky Butterfly knew that Lin Yuan was giving up a lot to save its life.

It quickly thanked Lin Yuan before it moved to stand in the pile of the earth-type heavenly-maiden-grade elemental pearls and started to temper them to replenish its depleting bloodline.

The Kill Food Sky Butterfly said to Lin Yuan, “I won’t be seriously injured after I sacrifice my bloodline thanks to these earth-type heavenly-maiden-grade elemental pearls.”

Lin Yuan nodded and replied, “I’ll continue supplying you with these earth-type elemental pearls until your bloodline has been fully restored. I also want to thank you for giving the Blue Flash Purple Butterfly the transformation opportunity of a lifetime.”

As the Kill Food Sky Butterfly sacrificed its bloodline to the Blue Flash Purple Butterfly, the purple willpower around it grew stronger until even the sky above was stained purple. The purple afterglow was like voluminous clouds that covered the sun.

The Blue Flash Purple Butterfly flew toward the sky and danced around in the purple light.

When the purple afterglow descended to the ground, a field of pear blossoms and begonias bloomed.

The petals of the flowers dissolved into purple light that shot toward the Blue Flash Purple Butterfly in the sky.

It looked as though the purple light was the reception that was ready to receive the stunning beauty in the sky.

The Blue Flash Purple Butterfly glided on the wind and broke free of its bloodline.

The purple light from the flowers spread out over the Blue Flash Purple Butterfly, and the purple willpower in the sky intensified.

At that moment, plumes of thick purple qi burst forth from the Blue Flash Purple Butterfly’s wings.

The purple qi broke through the purple afterglow and took out the entire sky.

At that moment, all of the purple light formed from the field of flowers fell with the pressure of beauty.

Lin Yuan used True Data and discovered that the Blue Flash Purple Butterfly had transformed into the Purple Afterglow Beauty Goddess Butterfly.

After the Blue Flash Purple Butterfly transformed into the Purple Afterglow Beauty Goddess Butterfly, the Trial of World Creation Cloud finally released the Kill Food Sky Butterfly's Creation World Ley Line.

The Kill Food Sky Butterfly used the earth-type elemental energy in the heavenly-maiden-grade elemental pearls to replenish its bloodline while combining the energy from the Creation World Ley Line with its own power.

Lin Yuan inhaled deeply.

Several developments had taken place over the last few minutes. But luckily, both the Blue Flash Purple Butterfly and the Kill Food Sky Butterfly were safe, and the Blue Flash Purple Butterfly had even transformed drastically.

Lin Yuan did not feel any heartache when he saw the diminishing pile of earth-type heavenly-maiden-grade elemental pearls because they would normally not have been able to help the Blue Flash Purple Butterfly undergo such a big transformation.

But now, these earth-type elemental pearls not only enabled the Blue Flash Purple Butterfly to transform, but they also saved the life of a Creation Breed fey.

To anyone else, heavenly-maiden-grade elemental pearls were extremely precious, and it would cost them an arm and a leg to even obtain one.

But to Lin Yuan, they were just another common resource that was produced in the Spirit Lock spatial zone.

Now that the Blue Flash Purple Butterfly had evolved to Fantasy Breed, Morbius could also evolve to Fantasy Breed.

The Bronze/Legend Elemental Shellfish would also be able to produce elemental pearls at a quicker rate.

The increased amount of pure spirit qi in the Spirit Lock spatial zone would also allow Lin Yuan to cultivate a few more Elemental Shellfish.

Thus, Lin Yuan would never have a shortage of heavenly-maiden-grade elemental pearls.

The Pure Land of Bliss was collecting the residual energy of the Creation World Ley Line, and another golden pearl appeared. It was smaller than the one that had appeared after the Pure Land of Bliss had absorbed the residual energy of Endless Summer's Creation World Ley Line.

The size difference should have something to do with Endless Summer's evolution to Sovereign.

The Kill Food Sky Butterfly was only Suzerain X and was still a distance away from Sovereign.

When the Kill Food Sky Butterfly replenished its bloodline, it would be able to break through to Sovereign.

Lin Yuan was about to check on the Purple Afterglow Beauty Goddess Butterfly's abilities when he felt the Morbius bracelet around his wrist grow hot.

When he looked down at the Morbius bracelet, he heard Morbius' voice say, "Yuan, long time no see!"

Chapter 913: Fantasy Breed Morbius

Lin Yuan was overwhelmed with emotion when he heard Morbius' voice, and he said softly, "Morbius, long time no see. You're finally awake!"

Although it had only been two months since they last spoke, it had felt like years to Lin Yuan.

Morbius happily replied, "Yuan, I didn't expect you to be able to comprehend two Willpower Runes so soon. You even helped the Blue Flash Purple Butterfly and the Spirit-Drawing Ichthyosaur evolve to Fantasy Breed."

Morbius chuckled, unable to express its excitement over talking to its friend after such a long slumber.

While Lin Yuan spoke to Morbius, he felt the Morbius bracelet grow hotter until it eventually hurt.

However, Lin Yuan did not mind this. He excitedly asked Morbius, "Morbius, are you about to evolve to Fantasy Breed?"

Morbius hesitated before saying, "You're right. But I'll need to use more of your spiritual energy to evolve to Fantasy Breed. I'll have to use the spiritual energy that I returned to you, as well as even more spiritual energy, on top of that. Why don't I hold off on evolving to Fantasy Breed for some time? But no matter how much I try, I won't be able to hold myself off for long."

Lin Yuan could hear a note of shame in Morbius' voice.

Morbius was extremely guilty that it would need to use more of Lin Yuan's spiritual energy to evolve to Fantasy Breed. When Lin Yuan was between eight to 17 years old, his spiritual energy had been wispy at best because of Morbius. Lin Yuan would become dizzy after concentrating his spiritual energy for a short while.

If Morbius evolved to Fantasy Breed, Lin Yuan would return to that state. Moreover, Morbius needed even more spiritual energy now, so Lin Yuan might end up in a worse state than before. Morbius did not want this to happen.

Although it would take a huge toll on Morbius to suppress itself to not evolve to Fantasy Breed, and it would end up falling unconscious and injuring its roots after a prolonged time, Morbius was still insistent on waiting until Lin Yuan had enough spiritual power before it evolved to Fantasy Breed.

A spirit qi professional's spiritual energy was continuously growing. Lin Yuan's spiritual energy had increased significantly in the last eight months.

Morbius estimated that Lin Yuan's spiritual energy would become sufficient to help it evolve to Fantasy Breed in two years.

Lin Yuan hurriedly shook his hands in exasperation and asked, "Morbius, how much spiritual energy do I need in order for you to evolve to Fantasy Breed?"

Morbius answered truthfully, "Yuan, I need three times the amount of spiritual power that you've gained over the last eight months in order to evolve to Fantasy Breed. However, don't forget that you'll need spiritual energy for your everyday use as well. Why don't I sleep for some time? I'll be able to hold off on evolving to Fantasy Breed the longest while I'm unconscious."

Lin Yuan smiled toothily and said, "Morbius, you forget that I have the Cinnabar Osmanthus Haworthia. It has already produced fruits. Although the fruits still need some time to ripen, I can use spirit qi crystals to accelerate their ripening."

He went into the Spirit Lock spatial zone.

The Purple Afterglow Beauty Goddess Butterfly knew where Lin Yuan was going, so it was not nervous. It calmly waited for Lin Yuan to return.

However, Lin Yuan's disappearance frightened the Kill Food Sky Butterfly.

If Lin Yuan used spatial teleportation, it would result in a shift in the spatial energy.

The Kill Food Sky Butterfly was a Creation Breed fey and could shatter the spatial energy to stop spatial teleportation.

But Lin Yuan had not caused any shifts in spatial energy. It was as though he had disappeared into thin air.

This strange occurrence was a head-scratcher for the Kill Food Sky Butterfly.

However, the Kill Food Sky Butterfly could not be bothered with this for long as its main focus was the Purple Afterglow Beauty Goddess Butterfly.

The two butterflies dancing around each other had no qualms about showing off their affection to every creature in the area.

Lin Yuan entered the Spirit Lock spatial zone and went to the Pure Land of Bliss. He collected the two golden pearls and squatted down to check on the Cinnabar Osmanthus Haworthia.

He thought, *It looks like the Cinnabar Osmanthus Haworthia's fruits still have a long time to go before they ripen.*

Morbius felt at ease when it saw the Cinnabar Osmanthus Haworthia's fruits and said to Lin Yuan, "The Cinnabar Osmanthus Haworthia has produced three fruits. You should have enough spiritual power after eating one of them. Although the first fruit's effects will be the most obvious, eating more will also have an effect until the third one is eaten.

“After I evolve to Fantasy Breed, True Data, Calm Mind, and Spirit Qi Condensation will be boosted. You’ll be able to use True Data to check on Creation Breed feys, and Calm Mind will be able to perfectly defend against all feys Myth Breed and below while still having a strong defense against feys above Myth Breed. One spirit qi crystal will still be produced every week, but each spirit qi crystal will be much more effective than before. After the Blue Flash Purple Butterfly’s grade becomes Silver, I’ll also evolve to Silver grade. The spirit qi crystals produced will be ten times more effective than before.”

Now that Morbius knew that Lin Yuan had a way to increase his spiritual energy, it was ready to speak freely about evolving to Fantasy Breed.

When Morbius had been asleep, Lin Yuan could only get a vague idea of its abilities.

But now that Morbius was awake, Lin Yuan could ask Morbius any questions he had instead of slowly experimenting and doing research on his own.

He was most excited about the increase in the effectiveness of the spirit qi crystals.

Previously, Lin Yuan needed ten spirit qi crystals to evolve a Silver X/Fantasy fey to Gold I.

Once Morbius evolved to Fantasy Breed, Lin Yuan would only need one spirit qi crystal to perform the same task. This effectively increased Lin Yuan’s own power ten times.

He used to be able to use one spirit qi crystal to evolve five Bronze/Epic feys to Bronze/Legend.

Chapter 914: Purple Afterglow Beauty Goddess Butterfly! Overpowering Exclusive Skill!

Now, one spirit qi crystal could evolve 50 Bronze/Epic feys to Bronze/Legend.

It was almost unbelievable that Lin Yuan could increase the quality and quantity of spirit qi crystals without lifting a finger.

It had not been easy for Lin Yuan to obtain a Bronze/Legend fey. But now, a Bronze/Legend fey was completely worthless to him.

Lin Yuan had been using spirit qi crystals to evolve fey grades. But once they reached Gold I, he would run out of spirit qi crystals to evolve them any further.

Now, Lin Yuan could increase the limit to Platinum I.

If Lin Yuan was also able to collect some Myth Breed feys’ World Grace, he felt that he would be able to evolve all his feys to Diamond grade.

Since Morbius was about to evolve to Fantasy Breed and could produce stronger spirit qi crystals, Lin Yuan did not plan on keeping the weaker spirit qi crystals.

He took out all the spirit qi crystals he had and crushed one of them to direct the spiritual power to the Cinnabar Osmanthus Haworthia. Morbius also helped Lin Yuan to direct the spirit qi.

Unexpectedly, the Cinnabar Osmanthus Haworthia was a huge consumer of spirit qi. It took nine spirit qi crystals for the fruits to ripen fully.

Once the Cinnabar Osmanthus Haworthia ripened, they released a fragrance that penetrated to the heart.

Lin Yuan took a whiff of the fragrance and felt his spirit pulse and his mind clear.

After the fruits ripened, the Cinnabar Osmanthus Haworthia wanted to absorb the energy in the fruits. But before the Cinnabar Osmanthus Haworthia could make its move, Lin Yuan plucked the three ripe fruits.

The Cinnabar Osmanthus Haworthia started to sway and whip its leaves around in protest.

Lin Yuan stroked the Cinnabar Osmanthus Haworthia's leaves soothingly.

He ignored the fact that the Cinnabar Osmanthus Haworthia was a plant-type fey that could not understand human language and said, "I need your fruits for something important now. In the future, I'll only pluck two of your fruits and leave you one to eat."

Lin Yuan remembered how fast the Cinnabar Osmanthus Haworthia had scurried away from the Cinnabar Sweet Osmanthus when it first produced fruits.

Luckily, he had ripened the Cinnabar Osmanthus Haworthia's fruits himself. If he let the Cinnabar Osmanthus Haworthia's fruits ripen in their own time and let the Wind Speed Rapid Antelope look after them, any slip up by the Wind Speed Rapid Antelope and the Cinnabar Osmanthus Haworthia would swiftly gobble up the fruits.

Lin Yuan popped the three Cinnabar Osmanthus Haworthia fruits in his mouth. The moment he bit into them, he felt like he had a mouthful of spearmint. His entire spiritual energy was refreshed, and he soon felt his spiritual energy rise.

He was extremely pleased by this feeling of his spiritual energy increasing.

When Lin Yuan ate the third Cinnabar Osmanthus Haworthia fruit, his spiritual energy stopped increasing. He gently shook his head and felt that he had enough spiritual energy to contract three or four feys.

Lin Yuan said to Morbius, "Morbius, you can evolve to Fantasy Breed now."

"The Spirit Lock spatial zone is going to change significantly this time. I'll need to sleep at least two hours while I'm evolving to Fantasy Breed. Although the Spirit Lock spatial zone's expansion won't endanger the feys inside it, they definitely won't be comfortable," replied Morbius.

Lin Yuan nodded and prepared to summon Genius, Chimey, and the Wind Speed Rapid Antelope out of the Spirit Lock spatial zone.

The Floating Island Whale, Gray, and the Elemental Shellfish needed to absorb the pure spirit qi inside the Spirit Lock spatial zone. As such, Lin Yuan decided to leave them inside the Spirit Lock spatial zone.

Once he summoned Genius, Chimey, and the Wind Speed Rapid Antelope out of the Spirit Lock spatial zone, Morbius immediately started to evolve.

When Morbius started its evolution, Lin Yuan's bracelet started to grow hot. However, the heat would not burn Lin Yuan.

Lin Yuan looked down at the Morbius bracelet and noticed that it was different from before.

Previously, there was the image of the spirit pool, Pure Land of Bliss, and the light green bowl from which spirit qi crystals were produced engraved on the bracelet.

Now, a new image was slowly forming. This new image filled Lin Yuan with hope.

Chimey, Genius, the Wind Speed Rapid Antelope, and the Blue Flash Purple Butterfly usually spent all their time in the Spirit Lock spatial zone.

Although the Blue Flash Purple Butterfly usually stuck with the Jasmine Lily, it had become friends with Genius, Chimey, and the Wind Speed Rapid Antelope.

When Genius saw that the Blue Flash Purple Butterfly had evolved to Fantasy Breed, it started to meow and say, "Blue Flash Purple Butterfly, did it hurt when you evolved to Fantasy Breed? It hurt so much for me when I went through it! But I was very brave and didn't cry like Chimey did!"

Chimey chirped and said, "Stop spouting nonsense! I didn't cry! I'm the strongest! Blue Flash Purple Butterfly, don't listen to Genius. He was the one meowing away in pain!"

Chimey started to imitate the cries of anguish that Genius had let out while it was evolving.

Genius used its five tails to cover its face in shame.

The Wind Speed Rapid Antelope hopped around happily to express its joy that its friend had evolved.

Lin Yuan watched his feys getting along and enjoyed the caressing of the breeze. His heart was at ease, and he basked in the sweetness of calmness.

Although Morbius was evolving to Fantasy Breed, True Data was still usable.

Lin Yuan used True Data to check on the Purple Afterglow Beauty Goddess Butterfly's attributes.

[Fey Name]: Purple Afterglow Beauty Goddess Butterfly

[Fey Species]: Flash-butterfly species/Scaled-butterfly species

[Fey Grade]: Bronze (10/10)

[Fey Type]: Spiritual/Soul

[Fey Quality]: Fantasy I

Abilities:

[Silence Scale Powder]: Special scale powder with the ability to silence is released, and any target that comes into contact with the scale powder will be unable to use spiritual power abilities. The scale powder will also be absorbed into the target's spiritual power. Each time the target uses spirit qi, their spirit qi will end up cracking.

Exclusive Skill:

[Scale Powder Halo]: The scale powder has strong reflective abilities, and the target that lays eyes on the scale powder will be affected by the reflection. The target will start to feel dizzy and experience temporary blindness.

[Soul Beauty Goddess]: By activating the power of the spirit and soul, the beauty will be increased to a limitless level. The target will be attracted and fall in love. The target will want everything of its object of love on its own body, and the target will want to collect everything connected to the object of its love.

Lin Yuan inhaled sharply.

He knew that the Blue Flash Purple Butterfly's bloodline had been improved due to the Kill Food Sky Butterfly's sacrifice.. However, he did not expect that the power of Silence Scale Powder would increase so significantly.

Chapter 915: Morbius! Klein Hub!

Previously, Silence Scale Powder had only had the power to silence.

The scale powder would prevent a target from accessing their spiritual power and using their elemental abilities.

However, the Purple Afterglow Beauty Goddess Butterfly's scale powder could not only stem a fey's spiritual power but also absorb their spiritual power and crack their body.

Thus, Silence Scale Powder now had a diminishing effect on top of its controlling effect.

Since the scale powder targeted spiritual power, it was difficult to clean it off.

As long as a trace of scale powder was left on the target, the target would be under the scale powder's effects.

The Purple Afterglow Beauty Goddess Butterfly's Silence Scale Powder was not powder from its wings that could spread out across numerous targets.

When one entity in a group was affected by Silence Scale Powder, the target's movements would spread the scale powder around to other feys until all the feys in the target's team were under the influence of Silence Scale Powder.

Hence, the Purple Afterglow Beauty Goddess Butterfly's Silence Scale Powder was extremely suitable for large-scale outdoor battles.

The Purple Afterglow Beauty Goddess Butterfly's original ability Scale Powder Halo had not changed much. It could still use reflective light to blind and cause a target to become dizzy.

That said, Soul Beauty Goddess was too powerful!

Soul Beauty Goddess could attract other feys and make them treasure the Purple Afterglow Beauty Goddess Butterfly's Silence Scale Powder. The target feys would want to keep the Silence Scale Powder on themselves of their own volition.

It was even possible that the target fey would desire to consume the Silence Scale Powder in order to protect the Silence Scale Powder in the best way possible.

This attraction greatly increased the Silence Scale Powder's dispersal and controlling effects.

Soul Beauty Goddess did not have any disadvantages. The controlling ability would remain intact as long as the Purple Afterglow Beauty Goddess Butterfly used its own spiritual energy and soul to magnify its beauty to the greatest extent.

Beauty was always put on a pedestal. Feys were no exception.

Soul Beauty Goddess allowed the Purple Afterglow Beauty Goddess Butterfly's scale powder to affect all feys.

Lin Yuan's jaw fell open. Not only was the Purple Afterglow Beauty Goddess Butterfly beautiful, but it was strong to boot!

Morbius' grade followed the fey in the Spirit Lock spatial zone with the lowest grade, and Jasmine Lily had reached Platinum I/Fantasy III while the Spirit Tide Ink Flood Dragon had reached Platinum I/Fantasy I.

According to Morbius' Spirit Lock spatial zone limit, Morbius would be able to reach Silver X once it evolved to Fantasy Breed.

Lin Yuan would need to lock another fey and nurture it to Gold I/Fantasy I in order to increase Morbius' grade.

Thus, Lin Yuan decided to use this opportunity to increase the Purple Afterglow Beauty Goddess Butterfly's grade. He still had ten spirit qi crystals, which was enough to evolve it from Bronze X/Fantasy I to Silver X/Fantasy I.

This would hit Morbius' current limit.

Lin Yuan thought, *?What a coincidence that I have just the right number of spirit qi crystals!*

He crushed the ten spirit qi crystals and directed the spirit qi toward the Purple Afterglow Beauty Goddess Butterfly.

The Purple Afterglow Beauty Goddess Butterfly successfully evolved to Silver X/Fantasy I.

Due to the Spirit Lock, the Purple Afterglow Beauty Goddess Butterfly did not have any abilities other than Normal abilities.

As such, there was no reason for Lin Yuan to use True Data to check on it again.

The Kill Food Sky Butterfly looked at Lin Yuan with gratitude. It already considered the Purple Afterglow Beauty Goddess Butterfly as its whole world.

Now that Lin Yuan was putting effort into nurturing the Purple Afterglow Beauty Goddess Butterfly, the Kill Food Sky Butterfly was even more thankful to Lin Yuan than when he had saved its life.

Lin Yuan said to the Purple Afterglow Beauty Goddess Butterfly that was flying around him, "Purple Afterglow Beauty Goddess Butterfly, why don't I call you Purple Afterglow from now on?"

Purple Afterglow flapped its wings to express its satisfaction with the name.

Lin Yuan started to play with Genius, Chimey, Purple Afterglow, the Wind Speed Rapid Antelope, and the Kill Food Sky Butterfly.

While they were playing, Lin Yuan suddenly saw a strange image of a bottle appear on the Morbius bracelet.

Morbius' voice sounded out in Lin Yuan's mind, "I have evolved to Fantasy Breed."

Lin Yuan used True Data to check on Morbius.

[Fey Name]: Morbius

[Fey Species]: ???

[Fey Grade]: Silver (10/10)

[Fey Type]: Spatial/Mystery

[Fey Quality]: Fantasy I

Abilities:

[True Data]: All complicated information that is invisible to the eye is turned into data. Information that is turned into data might contain truth that cannot be distinguished on the surface.

[Calm Mind]: Passive ability. Effects of Calm Mind can be improved according to the fey's grade. Calm Mind can stabilize the mind and has a certain probability of resisting negative conditions.

[Spirit Qi Condensation]: Gather the spirit qi in the air and Spirit Lock spatial zone. The gathered spirit qi will form spirit qi crystals that can enhance feys and source-type lifeforms.

Exclusive Skill:

[Spirit Lock]: Morbius' spatial zone can be used to nurture feys. The initial grade of the fey that Morbius' spatial zone can nurture must not be higher than Morbius' grade. Morbius isn't able to increase its grade by itself, so its grade will be increased along with the fey's grade that it nurtures. At the same time, Morbius can obtain the initial ability of the fey that it nurtures. However, Morbius will not obtain abilities when its grade increases. Whenever Morbius increases a grade, it will be able to nurture one more fey. Morbius' method of growth will remain unchanged.

[Pure Land of Bliss]: The Spirit Lock spatial zone will produce soil that is great for recovering near-death fey's injuries. The fey's recovery time will be determined by the grade of Morbius and the dying fey.

[Klein Hub]: Swallow and bind the dimensional hub that connects to the dimensional world into the Spirit Lock spatial zone. The lifeforms and items in the Spirit Lock spatial zone will enter the connected

dimensional world during the binding process. However, the dimensional world's lifeforms will not be able to enter the Spirit Lock spatial zone.

[Normal Spirit Lock]:

Jasmine Lily (Bud of Mountain Jade): Platinum (1/10)/Fantasy III

Ability – [Heal]:

– Fasciated Flower Stand: Its Heal ability will reverse-heal the target, absorbing its vitality and letting it experience extreme comfort at the same time.

– Crystallized Main Flower: Its Heal ability will reverse-heal the target and absorb a large amount of its vitality.

– Bud of Mountain Jade: Its Heal ability will heal the target and channel rich vitality into it through its Bud of Mountain Jade, restoring the target's damaged vitality.

Exclusive Skill:

[Recovery Imprint]: It accumulates the healing energy that the Jasmine Lily releases during normal times. The contractor can activate the imprint to release the accumulated healing energy.

[Severed Limbs Growth]: It comprehends the arcana of plant growth. Even if one's gene template is damaged, the rich vitality can allow one to continue to grow slowly.

[Elite Spirit Lock]:

Spirit Tide Ink Flood Dragon: Gold I/Fantasy I

Abilities:

[Spirit Injection]: Restore a huge amount of spiritual power at once and restore the lost spiritual power over a period of time.

Exclusive Skill:

[Spirit Qi Imprint]: The spirit qi that is constantly released to the environment would be stored within the Spirit Qi Imprint instead. It can also drain a small amount of the spirit qi released from other dragon species feys within the surrounding area that do not exceed the fey's grade and inject it into the Spirit Qi Imprint. It would be branded on the contractor's body, and the contractor could release spirit qi contained within the Spirit Qi Imprint.

[Spirit Essence Explosion]: Gather the spiritual power into a single point, and explode all the energy. The Spirit Essence Explosion can only be applied to places where there is contact with the Spirit Qi Imprint.

[Bronze Spirit Lock]:

Purple Afterglow Beauty Goddess Butterfly: Silver X/Fantasy I

Abilities:

[Silence Scale Powder]: Special scale powder with the ability to silence is released, and any target that comes into contact with the scale powder will be unable to use spiritual power abilities. The scale powder will also be absorbed into the target's spiritual power. Each time the target uses spirit qi, their spirit qi will end up cracking.

Exclusive Skill:

[Scale Powder Halo]: Its scale powder contains a powerful reflective effect. The multi-faceted reflection will cause the target being enveloped by the scale powder to suffer from light pollution and lead to dizziness or brief blindness.

[Soul Beauty Goddess]: By activating the power of the spirit and soul, the beauty will be increased to a limitless level. The target will be attracted and fall in love. The target will want everything of its object of love on its own body, and the target will want to collect everything connected to the object of its love.

Lin Yuan realized that Morbius had evolved to Silver X/Fantasy I.

However, when he saw Morbius' new exclusive skill Klein Hub, he could not help but be stunned.

His mouth gaped slightly. Klein Hub was essentially a Class 6 dimensional rift that opened in the Spirit Lock spatial zone, and he could even choose what dimensional world connected to the dimensional rift.

Due to Klein Hub's features, it would not allow dimensional lifeforms to escape like they could from the Class 6 dimensional rift.

The ever-polite Lin Yuan could not help but curse and say, "Damn! Klein Hub is incredible!"

Chapter 916: Don't Cry, I'm Fine

A crystal clear river threaded through the Purple Bamboo Forest, where each bamboo was 30 meters tall.

These purple bamboo stems were very slender, but they did not sway in the wind. The numerous bamboos were like the teeth of a comb that brushed through the gentle breeze.

Occasionally, phoenix cries resonated from deep within the bamboo forest. The sonorous phoenix cries and the rustling of leaves created an elegant symphony.

Spring was late this year in the Radiance Federation. But even if spring never came, the fragrance of bamboo, phoenix cries, and plumes of effervescent clouds persisted. It told a heartwarming story even more soothing than the spring wind.

Other than the Golden Therach Bamboo, hundreds of other types of bamboo were also planted in the forest.

The fruits of the bamboo hung off the branches of the bamboo, pulling the branches down to the ground.

Some branches hung so low that they touched the surface of the river, scaring a few purplish-golden carps that jumped out of the water.

The purplish-golden carp plucked and ate the fruits. Their tails swished in the water, kicking up a light spray of water onto the bamboo as though they were giving thanks for their meal.

The Purple Bamboo Forest flourished all year. Nestled deep in the bamboo forest was a cottage made of purple bamboo.

A few charming white cranes were flying around the cottage.

The white cranes rode the breeze, and two enormous bronze furnaces were puffing out plumes of vapors that intermittently drifted into the cottage.

A man and woman were sitting on a bench in the cottage. The man was gently combing the woman's long ivory hair with a bamboo comb.

Although the man only looked to be about 30 years old, all the hair on his head had turned gray, and he appeared to already have one foot in a coffin.

The woman gently touched the thin lens in front of her. She could tell that the gray-haired man was forcing the blissful smile that was plastered on his face, and tears welled up in her eyes.

Once the first tear fell, the strong front she had been putting on crumbled.

The man's hand that was holding onto the comb froze for a moment, but he soon went back to raking it through her hair.

Despite his calm expression, he could not help but gently wipe away the tears that were rolling down the woman's cheeks.

The woman's tears dampened the man's nice-looking hands and rolled down the tips of his fingers to land on the bench.

"Xiangxiang, don't cry. I'm fine. I'm going to hand the Purple Bamboo Forest over to Xia Chen. After we meet with our old friends, we'll go and admire the beautiful scenery in the Radiance Federation together."

The man looked at the woman with clear and determined eyes.

He felt lucky to be living a life where he was lucky enough to meet someone he wanted to be with for the entirety of his life. Who said that love had to last forever?

Bamboo Monarch felt the warmth left by the tears on his fingers and sighed three times.

The first sigh was to lament his own lack of ability. Even though he was a Class 5 Creation Master, he was unable to remove the love of his life's bad luck.

The second sigh was because of his lack of courage. While he was with her, he did not regret becoming afflicted by her bad luck. Rather, he regretted not asking for her hand sooner.

The third sigh was for Wang Fuxiang's sake. He bemoaned her life that was full of trials and tribulations.

His three sighs were like three questions. Unfortunately, no one would ever be able to answer these questions.

Wang Fuxiang looked deeply into the Bamboo Monarch's eyes, and her tears fell onto his shirt.

"Fu Wenzhu, am I really worth it?"

The Bamboo Monarch plucked his ring off his finger and put it on Wang Fuxiang's ring finger. Since she was a woman, her finger was too slim for the ring.

The ring hung loosely around Wang Fuxiang's finger, and it would slip off with one forceful movement.

The Bamboo Monarch laughed awkwardly and placed the ring on Wang Fuxiang's thumb instead.

"Xiangxiang, all my wealth is in this ring. Now, I will give it to you. Do you still think I regret my decision?"

Wang Fuxiang cried even harder, and she gently touched the Bamboo Monarch's face before twirling a finger around a lock of his gray hair.

Wang Fuxiang felt compelled to say her true feelings as she gazed at the gray hair.

"Fu Wenzhu, I promised to be with you but only on one condition."

The Bamboo Monarch stared back at her silently before gently touching her face and pressing her head down on his chest.

"I can't imagine a future without you, so please don't ask me to do it. If I really have to choose, I hope that you'll wear my ring from now on."

While the Bamboo Monarch was speaking, the river outside twinkled with the radiance of nostalgic days past.

The light from the river reflected off the bronze furnace onto Wang Fuxiang and the Bamboo Monarch, and the spotlight of mutual longing shone down on them.

A lump was stuck in Wang Fuxiang's throat, and she could say anything in return.

Nonetheless, her eyes shone with the solemn promise that the man in half-armor had given her.

The man was willing to give her all his wealth and even sacrifice his life. Yet, he was going to lose his life because of her.

In spite of how touched Wang Fuxiang was, she knew that if only one of them could make it out alive, the Bamboo Monarch's survival would be better for the Radiance Federation. It would also be the best choice for her.

Wang Fuxiang murmured, "Fu Wenzhu, don't forget me."

Wang Fuxiang spoke softly, and the words did not travel far past her lips. As such, the Bamboo Monarch did not catch what she said.

At that moment, several cries of a cicada broke through the silence of the Purple Bamboo Forest.

The Bamboo Monarch had anticipated this and was unbothered by the cicada cries. He continued to comb Wang Fuxiang's hair.

Xia Chen had been waiting by the Bamboo Forest Garden's entrance for some time, and he said softly, "Lord Cicada Song, welcome to the Purple Bamboo Garden. My Master isn't feeling well, so I'm here to greet you in his stead. I hope you will be understanding of my inadequacies."

However, Xia Chen did not seem to have any intention of leading Cicada Song into the Purple Bamboo Garden.

As the Bamboo Monarch's first disciple, Xia Chen had been helping to manage the Purple Bamboo Garden for the past decade.

Hence, he knew why Cicada Song had come..

Chapter 917: The Bamboo Monarch's Rage

Xia Chen understood where the Bamboo Monarch was coming from. Thus, the real reason he was standing there was to stop every person, including Cicada Song.

At that moment, a streak of black metal flashed across the sky, and a man in iron armor appeared next to Cicada Song.

The man in iron armor said to Xia Chen, "Take me to see the Bamboo Monarch."

Xia Chen shook his head and replied, "My Master said that the Purple Bamboo Forest would no longer be receiving guests. You are no exception, Lord Iron Prison. If you would like to take a seat to rest, I can prepare our specialty Bamboo River Tea for you."

Iron Prison's expression hardened as he said, "The Bamboo Monarch might not be seeing guests, but I insist on meeting with him."

While Iron Prison was speaking, Xia Chen grinned and said, "Lord Iron Prison, please don't make things difficult for my Master or me."

Xia Chen manipulated his aura, but instead of aiming it at Iron Prison and Cicada Song, he used it to secure the entrance of the Purple Bamboo Forest.

This was a declaration of Xia Chen's stance.

As the Bamboo Monarch's first disciple, Xia Chen had outstanding powers. However, Iron Prison did not seem to worry about Xia Chen.

Iron Prison scoffed and was about to take a step forward when a hand on his shoulder stopped him.

Cicada Song sighed and thought, *Iron Prison is always so impulsive. He can even turn a good thing into something bad.*

When he noticed Iron Prison's look of confusion, Cicada Song said, "Many of our old friends who were at the Midnight Palace should be making their way to the Purple Bamboo Forest. Even if the Bamboo

Monarch refuses to see guests, he won't have a choice when so many of us are out here waiting for him."

Iron Prison stopped trying to walk forward.

Xia Chen maintained his aura, but he was soon faced with six members of royalty.

Cicada Song said to a stout middle-aged man, "Tian Feng, I'm surprised you left your Cultivated Garden!"

Cicada Song frowned slightly. Tian Feng had never been on good terms with the Bamboo Monarch. In fact, the two of them could even be said to be rivals.

Hence, it was surprising for Tian Feng to show up at the Purple Bamboo Garden at such a time.

Tian Feng turned his gaze to the Purple Bamboo Forest and said, "Tower Canon's hundred-year plan 'The Sleeper's Revival' is almost upon us. The Bamboo Monarch has to recover his health."

Tian Feng immediately made his motives clear and ignored Xia Chen as he shouted, "Bamboo Monarch, six of your old friends are here waiting for you. If you don't come out to see us, we'll just have to go to you."

Tian Feng's shouts resounded throughout the entire Purple Bamboo Forest, frightening some of the phoenixes and carp that lived in the forest.

Some Golden Thearch Bamboo deep in the forest suddenly released the aura of spiritual power.

Xia Chen's gaze darkened as he looked at Tian Feng. However, Tian Feng's actions made Xia Chen let out a sigh of relief.

The Bamboo Monarch's brow furrowed when he heard what Tian Feng said. He then looked kindly at Wang Fuxiang and said softly, "Xiangxiang, wait here for me."

The Bamboo Monarch's spiritual energy bubbled, and a child with green hair dressed in green clothes appeared in front of him.

He said to the child, "Green Mindful, watch over Sister Xiang. If anyone steps through the door and past the two Bamboo Crane Prosperity Fairy Furnaces, kill them without mercy."

Green Mindful's black eyes turned green, and worlds seemed to take form inside its pupils, giving off the air of infallibility.

The child called Green Mindful said obediently, "Okay, Big Brother Bamboo. I will be good and stay here to protect Sister Xiang."

The Bamboo Monarch said softly to Wang Fuxiang, "Don't do anything stupid and just wait for me."

The Bamboo Monarch disappeared from the cottage.

Green Mindful politely greeted Wang Fuxiang and laid out several dishes on the table for her before standing by her side like a child guard.

Wang Fuxiang had been hiding her identity as a spirit qi professional in Langya Pavilion and conducted business as a normal human.

Although she was actually a spirit qi professional, she was still weaker than Bamboo Monarch's feys. She would not be able to do anything stupid with Green Mindful around even if she wanted to.

What the Bamboo Monarch said about showing no mercy made Wang Fuxiang once again aware of how certain the Bamboo Monarch was about her.

Meanwhile, the Bamboo Monarch's figure appeared next to Xia Chen. At that moment, Chef Supreme arrived at the Purple Bamboo Forest.

Initially, Chef Supreme had wanted to bring Li Changlin, Zhang Yingying, and Zong Ze.

But after receiving the call from the Moon Empress, he had made more haste, leaving the other three behind.

However, he did not expect the other six to have arrived before him and to have called the Bamboo Monarch out.

The Bamboo Monarch nodded at Chef Supreme and said loudly, "I'm not feeling well, yet you insist on calling me out to chat. What do we have to chat about?"

In spite of the Bamboo Monarch's calm voice, his tone made Xia Chen inhale sharply.

The Bamboo Monarch usually chuckled after he finished speaking, but he had not done so this time.

This meant that the Bamboo Monarch was now inexplicably furious.

Xia Chen had never seen the Bamboo Monarch blow his top. However, he knew that his ever-gentle Master was terrifying when he was enraged.

Even Tian Feng did not speak immediately.

The single brain-celled Iron Prison stepped forward and said, "No matter what happens, you have to protect your cell."

At that moment, all the color drained from the Bamboo Monarch's already sickly face.

Soon, his body was like bamboo shoots that had just burst forth from the ground as his face took on a healthy pink glow and his gray hair turned black.

The Bamboo Monarch looked just as he had before and summoned a light green bamboo into his hand. His rigid aura shot into the sky and crashed down on all seven members of royalty standing before him.

He did not say a word, but everyone present knew what his intentions were.

The Bamboo Monarch's aura wiped the ever-present twinkle of a smile from Cicada Song's eyes.

"Bamboo Monarch, we had a deal to never use power above Myth Breed with each other. Did you forget?"

Chapter 918: The Moon Empress's Arrival

Cicada Song did not expect the issue to be so difficult to handle, and he certainly did not expect the Bamboo Monarch to place his feelings for Wang Fuxiang above his own life.

Chef Supreme felt troubled by the Bamboo Monarch's fury. He had come for the same reason as the other members of royalty. However, the Moon Empress' call had made his determination waver.

She had not spoken clearly during the call, and all she said was that her disciple had a plan without describing what the plan actually was.

Since the Bamboo Monarch's soul was stained by bad luck, the Hundred Prosperity Wine was no longer effective.

Chef Supreme could not figure out what the Moon Empress had in mind, but given his understanding of her, she would never say she had an idea if it was not real.

Chef Supreme stepped forward and opened his palm. A flame with a thousand colors sparked to life in his palm, and an aura comparable to that of the Bamboo Monarch flowed out of Chef Supreme.

When they sensed Chef Supreme's aura, the other members of royalty looked at him in confusion and thought to themselves, *Why is Chef Supreme going against our agreement!?*

Everyone knew that Chef Supreme and the Bamboo Monarch were on good terms. Could Chef Supreme have decided to attack Wang Fuxiang for the sake of the Bamboo Monarch's health?

What Chef Supreme did next astonished the other six members of royalty.

"I support the Bamboo Monarch's decision," said Chef Supreme.

Chef Supreme walked over to stand beside the Bamboo Monarch and nodded at him.

Cicada Song, Iron Prison, Tian Feng, and the others did not know what Chef Supreme was trying to do.

At that moment, a ray of light whipped across the sky.

Everyone looked up to see a crescent moon hanging high above the Purple Bamboo Forest in the midday sky.

Chains of moonbeams fell from the crescent moon, and the Moon Empress descended the chains with the ever cold-faced Cold Moon behind her.

The Moon Empress' appearance stunned everyone.

Given her character, she was never inclined to participate in such matters. Why did she personally come to the Purple Bamboo Forest?

The Moon Empress made a beeline for the Bamboo Monarch and handed him a brocade box.

When the Bamboo Monarch looked at her in bewilderment, the Moon Empress said, "Inside this box is what you need the most right now."

...

Morbius laughed when it heard what Lin Yuan said.

From the moment Morbius had joined Lin Yuan, this was the first time that it heard Lin Yuan curse.

Morbius was delighted that Lin Yuan was so pleased with Klein Hub.

“Yuan, you’ll be even more shocked by the changes to the Spirit Lock spatial zone.”

Lin Yuan immediately brought Chimey, Genius, the Wind Speed Rapid Antelope, Purple Afterglow, and the Kill Food Sky Butterfly into the Spirit Lock spatial zone.

Once they were inside, Lin Yuan immediately choked on the pure spirit qi, and it took him a few moments to acclimatize to the concentration of spirit qi.

Previously, the spirit qi in the Spirit Lock spatial zone had been like a bottle of water. Now, it was more like a bottle of cold soda. Its concentration was ten times what it was before.

Not only would Lin Yuan be able to nurture feys faster, but the feys that could not transform in the lower concentration of spirit qi would also now have a chance.

It was just like how other Creation Masters did not possess spirit qi that was pure enough to create the Possess Star Intelligent Dark Clouds.

Chimey, Genius, Purple Afterglow, and the Wind Speed Rapid Antelope had spent a lot of time in the Spirit Lock spatial zone.

Both Chimey and Genius had experienced the evolution of the Spirit Lock spatial zone before, and they were not shocked by the concentration of spirit qi in the Spirit Lock spatial zone.

However, this was not the case for the Kill Food Sky Butterfly.

The Kill Food Sky Butterfly felt like it had been transported to a magical land in which each breath brought it unspeakable delight.

Purple Afterglow sensed the Kill Food Sky Butterfly’s shock and kindly explained the situation to it.

Lin Yuan ignored the Kill Food Sky Butterfly. Since it had sworn its servitude to Purple Afterglow, it was no different from the Acid Corrosion Queen Bee and Red Thorn. They were all essentially Lin Yuan’s feys.

The increase in size was the change to the Spirit Lock spatial zone that Lin Yuan was most excited about.

The Spirit Lock spatial zone had become several times larger.

When Morbius had been Normal grade, it was only 20 square meters. It had been 40 square meters when it was Elite grade, and 80 square meters when it was Bronze grade.

Previously, the size would double after each evolution.

But now that Morbius had evolved to Silver X, it had expanded to 480 square meters, which was six times larger than its previous size.

As such, the resources in the Spirit Lock spatial zone had also increased by six times.

Along with the increase in the Spirit Lock spatial zone's size also came an expansion in the spirit pool and the Pure Land of Bliss.

Previously, the spirit pool had been about 5 square meters large. Now, it was 30 square meters and was like a small pond.

The expanded spirit pool could distill energy ores faster to replenish the spirit qi in the Spirit Lock spatial zone.

The light green stone bowl from which spirit qi crystals were produced still looked the same, except that it seemed much thicker than before, and there were several markings on its inner area.

There was also a red metal table at the side of the Spirit Lock spatial zone with a huge hole in its center.

Lin Yuan walked over and noticed that this table was the feature that accompanied Klein Hub because the hole was the perfect size to hold a spatial hub.

Lin Yuan lightly knocked twice on the red metal table and immediately started to wonder how he should go about using it.

"Yuan, the increase in the size of the Spirit Lock spatial zone is because I evolved three times during my evolution to Fantasy Breed, then another three times when I evolved to Silver X," said Morbius.

Lin Yuan smiled and thought to himself about how Morbius used to leave him to wonder about the changes to the Spirit Lock spatial zone himself when it was asleep.

Now that Morbius was awake, he could just ask it all his questions instead of riddling it out himself.

"Morbius, how do I activate Klein Hub?"

Chapter 919: Ferocious Marsh Crocodile

Lin Yuan had heard about the Class 6 dimensional rift and how it could connect to a dimensional world for the first time at the Guard Ye Banquet.

At that time, he had felt that the most suitable dimensional world for humans to venture into was the marsh world.

Class 5 marsh dimensional rifts opened about as frequently as water world dimensional rifts did and were considered rare.

Moreover, marsh dimensional rifts were extremely dangerous, and most of them were filled with decaying mud which made it difficult for humans to move around easily.

Although the marsh could be turned into land with a large amount of earth-type elements, not many people could afford such resources. After all, exploring the marsh dimensional rift was different from expanding a faction into the marsh world, which was a continuous process.

Once all the source-type items in the dimensional hub were removed from the dimensional rift, the marsh dimensional rift would close, and all the resources used would be non-retrievable.

There were also many poisonous marsh beasts and carnivorous plants in the 40% of land that existed in the marsh dimensional rift.

Enormous Marsh Crocodiles lived in the remaining 60% of marsh.

The Marsh Crocodile was the most abundant lifeform in the marsh world, and most of them were Bronze I.

A young Marsh Crocodile was about half a meter long.

Although their mouths were filled with sharp teeth, all the nutrients in their bodies were directed to their scales. Hence, their jaw muscles were weak and could bite through a weak Bronze fey but could not tear through the flesh.

As such, the Class 1 Marsh Crocodile was often discussed along with the Class 1 alien insects.

This topic was greatly debated amongst Scholars.

Scholars used various pieces of evidence to compare the Class 1 Marsh Crocodile with the Class 1 alien insects. Eventually, they concluded that a Class 1 alien insect on its own could not bite through the Class 1 Marsh Crocodile's scales, but a Class 1 alien insect could snap the Class 1 marsh's crocodile's jaws from the inside like a pair of chopsticks.

A Class 1 alien insect could also aim its bite at the Class 1 Marsh Crocodile's neck, where it did not have any scales.

Hence, Scholars deemed the Class 1 Marsh Crocodiles to be weaker than Class 1 alien insects, resulting in the Class 1 Marsh Crocodile being ridiculed.

But once the Marsh Crocodile reached Class 3, they would advance into the adult stage and grow to two meters long.

Although this was not large, the jaw muscles would have fully developed and changed drastically from when it was young.

Its mouth would be able to bite through a Gold fey's muscles and even its bones if the fey was slightly weaker.

The adult Class 3 Marsh Crocodile floated on the surface of the pitch-black marsh, ready to pounce on any prey.

Once a Class 3 Marsh Crocodile had its jaws around a target, it would start to thrash about until its prey stopped moving.

Scholars had also compared Class 3 Marsh Crocodiles with Class 3 alien insects.

The alien insects also changed significantly when they reached Class 3.

The Class 3 Marsh Crocodile could use its jaws, deadly thrashes, and hard scales to beat two of three alien insects with no issue.

Although the Class 3 Marsh Crocodile could not beat the Class 3 Horn Demon, it was still considered one of the top Class 3 dimensional lifeforms.

It was possible to find Class 3 Marsh Crocodiles in a Class 1 dimensional rift. Thus, low-rank spirit qi professionals had always struggled with venturing into marsh dimensional rifts while high-rank spirit qi professionals did not like to venture in.

Due to the shape of the land in the Class 1 marsh dimensional rift, it was as difficult to explore it as it was to explore other Class 2 dimensional rifts.

Other Class 2 dimensional rifts also produced higher-grade resources than the Class 1 marsh dimensional rift. Thus, very few people were willing to explore marsh dimensional rifts, and there were very few marsh dimensional rift resources available in the market.

The scales of the Marsh Crocodile were regarded as high-grade leather while their skin was used as half-armor, wallets, and other expensive accessories.

Abysm dimensional rifts and water world dimensional rifts had special resources like strange flames and heavy water. The marsh dimensional rift also had special resources, but it was so difficult to explore that their special resources were much more valuable than strange flames and heavy water.

Strange flames were formed from special fire-type elements, and so was marsh soil.

Marsh soil was made from special earth-type elements that could speed up a plant-type fey's growth and nourish the surrounding area when buried underground.

It was also an extremely beneficial nurturing ingredient to some earth-type feys.

When Lin Yuan was constructing the Return from Faraway Mansion, Wen Yu had buried some mid-grade marsh soil from Class 3 marsh dimensional rifts in the soil around the mansion.

The mid-grade marsh soil combined with tens of thousands of energy ores enabled the plant-type feys in the Return from Faraway Mansion to grow swiftly.

For example, Normal Fenzi Bamboo and Sieb Bamboo grew in the Return from Faraway Mansion's 3,000-meter bamboo forest.

In the past year, even without the help of a Creation Master, many of the Fenzi Bamboo and Sieb Bamboo had evolved from Normal to Elite under the influence of just the marsh soil and energy ores.

It was clear that marsh soil was extremely beneficial to plant-type feys.

"If you want to use Klein Hub, you need to find a dimensional rift and enter it to where the dimensional hub is. Klein Hub will consume the dimensional hub, and a dimensional rift will appear in the Spirit Lock spatial zone's Klein Hub space. But once Klein Hub consumes the dimensional hub, it will be unable to change the type of dimensional hub until it comes into contact with the heart of the first dimensional world.

“Yuan, you have to be careful when deciding to use Klein Hub to consume a dimensional hub,” said Morbius.

Lin Yuan nodded and replied, “I made my choice long ago.. I intend on using Klein Hub to consume the dimensional hub of a marsh dimensional rift and open a marsh dimensional rift in the Spirit Lock spatial zone.”

Chapter 920: Lin Yuan’s Wild Ambition

While Lin Yuan was speaking, wild ambition flared from his gaze.

From the moment he had learned about the Class 6 dimensional rift, he had been considering expanding Sky City into the abyssal world.

If he expanded into the abyssal world, he would be able to source for strange flames for the Phoenix Perching Chinese Parasol Tree and Chimey.

Ever since he had witnessed the power of top-grade strange flames in the Midnight Palace, he had wanted one for himself.

Although he did not have use for a top-grade strange flame now, and it would be too over the top to use it as a lamp, Chimey would need strange flames to evolve its bloodline when it evolved to Fantasy V.

Now, the Spirit Lock spatial zone had the Klein Hub that could connect to the marsh world, which would enable Lin Yuan to venture into the marsh world.

Although the Class 6 marsh dimensional rift would also be able to connect to the marsh world, there were no Class 6 marsh dimensional rifts in the Radiance Federation.

Even if Lin Yuan encountered another spirit qi professional in the marsh world, the spirit qi professional would definitely be from another federation.

On the other hand, the marsh world was so expansive that finding another spirit qi professional in it would be like looking for a needle in a haystack.

The Kill Food Sky Butterfly had sworn its servitude to Purple Afterglow and had essentially become Lin Yuan’s fey.

Lin Yuan had not come up with any prior plans for the Kill Food Sky Butterfly, but now, it seemed that it could be the one to break into the marsh world.

Given that the Kill Food Sky Butterfly was Creation Breed, it would not be in any danger in the marsh world unless it met a Class 10 marsh dimensional lifeform.

Even if it did bump into a Class 10 dimensional lifeform, there was no guarantee that the Kill Food Sky Butterfly would lose.

Lin Yuan had already used True Data to check on the Kill Food Sky Butterfly’s attributes.

After Morbius evolved to Fantasy Breed, Lin Yuan would be able to see more details in the Kill Food Sky Butterfly's True Data.

Lin Yuan had long been curious about how the True Data of Creation Breed feys would look, and the Kill Food Sky Butterfly's True Data did not disappoint Lin Yuan at all.

All of the Kill Food Sky Butterfly's abilities and exclusive skills were geared toward explosive strength.

With the Kill Food Sky Butterfly around, Lin Yuan would be safe when he explored and started construction in the marsh world.

Lin Yuan would also be able to instruct Purple Afterglow to contact the Kill Food Sky Butterfly and order it to return to the Spirit Lock spatial zone through Klein Hub.

From then, Lin Yuan would be able to summon the Kill Food Sky Butterfly to use as part of his arsenal again.

Since he had already decided to instruct Klein Hub to consume the dimensional hub of the marsh dimensional rift, he was going to see his plan through.

He was extremely curious about how the marsh world looked.

Lin Yuan did not immediately leave the Spirit Lock spatial zone. Instead, he started to organize the resources in the Spirit Lock spatial zone.

Now that the Spirit Lock spatial zone had expanded, it looked rather empty.

Lin Yuan charted out a general plan for how he would use the space in the Spirit Lock spatial zone and placed the precious feys such as the Floating Island Whale, Gray, Twin Red Pagoda, Soldier Ration Radish in the Pure Land of Bliss.

The Pure Land of Bliss was now 40 square meters and had more than enough space to store the most precious resources in the Spirit Lock spatial zone.

Lin Yuan took rows of shelves out of the amber-button-shaped Diamond fey storage box. Hu Quan had made these shelves out of precious wood, and they all had lifelike carvings on them.

At the time, Hu Quan did not understand why Lin Yuan wanted to use these normal but still precious pieces of wood when he had so much jade-textured wood.

Lin Yuan had asked Hu Quan to make these shelves in preparation for the expansion of the Spirit Lock spatial zone, but he did not expect the Spirit Lock spatial zone to expand to such an extent. Thus, he did not have enough shelves.

He placed these shelves next to the jade-textured wood shelves and filled the shelves with jade-textured wooden planks.

After he filled the shelves, Lin Yuan piled five of the precious wooden planks on the ground and took more planks out of the Diamond fey storage box.

Next, he took out a large amount of coral jade and placed it on the floor.

Silver Corona saw Lin Yuan take out the coral jade and happily flew around him. Its flushed face looked wary as it said softly, "Lin Yuan treats me the best!"

Currently, Lin Yuan had only used a small part of the Spirit Lock spatial zone.

He was also going to ask Hu Quan to create more shelves for him.

The coral jade on the floor could be placed on the shelves, but Lin Yuan intended on organizing the Spirit Lock spatial zone more thoroughly when he returned to the mansion.

He was also going to attempt to nurture the feys that had a big reaction but did not evolve in the previous Spirit Lock spatial zone.

The increase in the concentration of spirit qi in the Spirit Lock spatial zone had sped up the Floating Island Whale's hatching as it could now absorb ten times the amount of spirit qi than before.

Hence, the Floating Island Whale would also need ten times more water-type elemental pearls than before.

Thankfully, Lin Yuan had stocked up many heavenly-maiden-grade elemental pearls. However, it did not seem enough for the Island Whale.

Although the Spirit Lock spatial zone's concentration of spirit qi had increased by ten times, the Elemental Shellfish did not produce ten times more elemental pearls.

Lin Yuan calculated the timeframe and concluded that the Elemental Shellfish produced elemental pearls three times quicker than before.

This speed would not be enough to sustain the Island Whale's needs.

Hence, Lin Yuan needed to find more young Elemental Shellfish as soon as possible.

He suddenly realized that in spite of the increase in the rate of the Elemental Shellfish's production, his elemental pearl needs had also risen.

A large amount of pure earth-type elements would be required to turn the marsh in the marsh world into land, and earth-type heavenly-maiden-grade elemental pearls would be the best source of pure earth-type elements.

Moreover, the Kill Food Sky Butterfly also needed a large amount of earth-type heavenly-maiden-grade elemental pearls to recover its diminished bloodline.. Ergo, Lin Yuan had to get his hands on Elemental Shellfish no matter what.
