

Merchant 951

Chapter 951: Warm Sun Fund

“I’ve been a host for eight months. I only live stream twice a week, and I took a hiatus for a few months. Regardless, I’ve already earned a significant number of Radiance dollars.”

Although all activity in the live-streaming room had been halted, Chimey’s words stunned everyone in the live-streaming room.

They did not understand why Sparrow Voice Loli Goddess was suddenly being reflective. The more reflective one was, the more likely that there was something wrong.

It seemed as though Sparrow Voice Loli Goddess was flaunting her wealth.

Sparrow Voice Loli Goddess had become No.1 in the beauty department by showing her face tonight. Yet, she was suddenly exposing herself and making sure that she would become public enemy No.1 tomorrow.

However, the live-streaming room had been muted, so none of the watchers could express their opinions.

“I saved up all the Radiance dollars and haven’t touched a penny of them yet. Currently, the amount has reached 3 billion Radiance dollars,” said Sparrow Voice Loli Goddess.

Chimey smiled happily with pride for its achievements.

However, Chimey did not know that its words made it come across as braggy.

Although the live stream was muted, the live stream of a top host like Sparrow Voice Loli Goddess was saved and stored on Star Web.

Some of Sparrow Voice Loli Goddess’ long-time fans were shocked by what she just did.

Not even Sparrow Voice Loli Goddess was powerful enough to sustain being canceled over showing off its wealth.

While everyone was wondering why Sparrow Voice Loli Goddess was self-sabotaging out of the blue, she smiled sweetly and said, “I’ll never be able to use all of the 3 billion Radiance dollars, and I don’t intend to. I plan on starting a Warm Sun Fund with the money. The fund will be used in all areas of the Radiance Federation. Those who have the ability to become spirit qi professionals but don’t have the means to buy a suitable fey will be given a Normal fey to contract. A third of the Warm Sun Fund will go toward helping disabled feys and returning them to the pink of health so that they’ll also have the chance to change their lives. I’m done speaking.”

Chimey ended the live stream.

The live stream had lasted for a little over an hour.

The Spirit Bodhi Fruit should have enabled Chimey to stay in human form for close to four hours, so Chimey had ended the live-stream much too early.

But the thought of Lin Yuan made Chimey want to throw a tantrum. It refused to sing any longer for the people who were insulting Lin Yuan and Black.

Chimey lowered its head and said to Genius, "Genius, I'll leave the Warm Sun Fund to you to handle. I'll take care of sponsoring it while you spend it."

Genius swayed its five voluminous tails and said in a child-like voice, "Chimey, I will use and allocate the money without any issues. I'll make a detailed plan based on the details of the situations in the major cities. However, we'll still need Yuan's help to implement the plan. Without help, we won't be able to access the entire Radiance Federation."

Chimey realized how complicated the matter was. It shook its head and decided not to think too much. Since Genius and Lin Yuan were around, there was no need for it to worry.

Chimey also thought back to the warm smile that Lin Yuan had given it during their first meeting and how that smile had saved its life.

Chimey wanted to spread this warm smile to every corner of the Radiance Federation so that every spirit qi professional and fey that had started out from far behind the starting line like it and Lin Yuan could change their lives as well.

It knew what it was like to only see the light and the end of the tunnel after what seemed like an eternity, and it wanted to strengthen other creatures with warmth.

After Chimey ended the live stream, the live-streaming room was no longer muted.

While Chimey was enjoying the feeling of holding and stroking Genius, the audience in its live-streaming room was going wild.

Blue Storm: "Oh my God! Sparrow Voice Loli Goddess is using all her earnings from live-streaming for a philanthropic cause. Is there even another host on Star Web like her?"

Chen Yuhuang: "Since Sparrow Voice Loli Goddess wants to help those who don't have the means to buy feys, I want to thank her on their behalf."

Free Spirit: "Am I the only one who got the main point? Not only does Sparrow Voice Loli Goddess want to help spirit qi professionals, but she wants to help disabled feys as well. She's so caring and warm-hearted!"

Forget Me: "All I want to say is that Sparrow Voice Loli Goddess is my one true hero."

Many people followed suit and started to send similar messages.

Monotonous Life: "Sparrow Voice Loli Goddess is a genuine ray of sunshine!"

All the Way: "Sparrow Voice Loli Goddess is the true ray of sunshine!"

Soft Rabbit Baby: "There's no one as warm-hearted as Sparrow Voice Loli Goddess!"

The chain of messages continued for some time.

Lin Yuan could not help but give Chimey's a thumb's up when he saw all the messages.

Chimey had done what Lin Yuan had always wanted but never had the time to do.

Lin Yuan suddenly felt that the little twittering bird had finally grown up.

As Chimey's contractor, he needed to see Warm Sun Fund through for Chimey.

Now that Lin Yuan's network had spread far and wide, he was far from the naive youth he used to be.

It would not be difficult for him to execute the Warm Sun Fund.

At that moment, Bai Hao was silently staring at the live-streaming room. However, his mind was filled with a flurry of thoughts.

He had fallen in love with Sparrow Voice Loli Goddess at first sight, but now that love had seeped into every cell of his body.

He already liked her voice, looks, and talent, but now, he was also touched by her kindness.

Bai Hao felt that it was his duty to make her his.

However, he still did not know how to make her his.

Nonetheless, he decided that he would come up with a brave plan to pursue his love.

Lin Yuan had logged out of Star Web and showered before entering the Spirit Lock spatial zone.

He planned on using Klein Hub to explore the marsh world tonight.

Chapter 952: Enabling a Contract

Lin Yuan had only seen marsh dimensional rifts and was looking forward to exploring the marsh world.

The marsh would be the second world that Lin Yuan was personally experiencing after the Startling Lines Continent.

The Divine Wood Federation and Radiance Federation both existed in the main world, but they were vastly different.

The Startling Lines Continent's three federations were highly populated, and they were always competing against each other.

By starting a business in the Divine Wood Federation, Lin Yuan would be able to try to profit off the three federations.

However, if he tried to gather resources from the Startling Lines Continent, he would be leeching into Divine Wood Federation, Iron Hammer Federation, and Great Lush Federation's profits which would definitely result in backlash.

The marsh world was different. There were only marsh dimensional lifeforms living there.

He could mine for resources there without holding back, as well as establish his own territory.

The most important factor in expanding into a dimensional world was power.

Lin Yuan possessed Creation Breed power. Even if he could not reign as king in the marsh world, he would be able to control a large territory without issues.

From the moment he had entered the Spirit Lock spatial zone, he thought of the Class 4 Medusa Giant Lizard that had been trapped in the lead-shaped Diamond fey storage box.

He hastily left the Spirit Lock spatial zone and the mansion.

As he looked at every blade of grass that Wen Yu had so carefully tended to, Lin Yuan spiritually called out to Blackie.

Blackie rose out of the Submerged Flood Dragon Lake, and Lin Yuan somersaulted onto its back before it carried him toward the back mountain.

Lin Yuan jumped down onto an empty patch and summoned the Medusa Giant Lizard out of the leaf-shaped Diamond fey storage box.

The Medusa Giant Lizard had been struggling to get free from the moment it was trapped in the fey storage box.

Unfortunately, it had not been strong enough to even make a dent in the metal cage.

Rather, the Medusa Giant Lizard was the one that ended up tuckered out, and it collapsed in the cage.

The Medusa Giant Lizard let out a howl when it saw Lin Yuan and kicked at Lin Yuan.

Its kick landed on the metal cage.

Lin Yuan noticed that red patterns had appeared on the Medusa Giant Lizard's purple scaly skin and knew that it had evolved after consuming the four Class 4 Marsh Crocodiles.

After the red patterns spread throughout the Medusa Giant Lizard's skin, it would be able to evolve to Class 5.

Lin Yuan was glad to see the Medusa Giant Lizard's repeated attempts to attack him despite being caged. The more ferocious the Medusa Giant Lizard was acting, the stronger it would become after it evolved.

Lin Yuan waved his hand, and the amber-button-shaped landed on the ground.

An enormous quicksand pit appeared beneath the metal cage, and 12 chains shot out of the quicksand. The chains grouped themselves into groups of three and securely wrapped themselves around the Medusa Giant Lizard's limbs, paralyzing it.

The Source Sand was only Gold I/Fantasy II and would not be able to control the Medusa Giant Lizard with Close Guard Sand.

Luckily, the Medusa Giant Lizard had grown tired after thrashing about for a few hours.

But once it strained itself, the Medusa Giant Lizard would be able to break free of the Source Sand's chain blades.

Lin Yuan took out the eyeball of the Medusa Snake Lizard and crushed it in his hand before slicing his other hand. He mixed the fluids in the eyeball with the blood from his palm.

After the blood and fluids mixed together, it immediately turned into a crimson crystal that looked just as hard as any other stone. This was likely due to the petrification abilities of the eyeball.

Since the blood had been petrified, Lin Yuan's aura was optimally preserved.

He took out the Medusa Snake Demon's blood and placed the crimson crystal within the blood. Lin Yuan could sense the Medusa Snake Demon's blood rotting the crystal bottle from the inside.

Lin Yuan immediately tossed the crystal bottle into the quicksand, and the granules of sand enveloped the crystal bottle.

A large hand made of sand rose from the sand and slammed down on the Medusa Giant Lizard.

The Medusa Giant Lizard roared in fury after it was attacked.

The hand threw the crystal bottle into the Medusa Giant Lizard's mouth before dissolving back into sand that also flew into the Medusa Giant Lizard's mouth. This ensured that the crystal bottle made it to the Medusa Giant Lizard's stomach.

Lin Yuan had done so because of the toxins in the Medusa Giant Lizard's saliva that could cause an infection when the Medusa Giant Lizard bit something. He also did so because the Medusa Giant Lizard's mouth was too smelly.

Although Lin Yuan was five meters away from the Medusa Giant Lizard, a horrifying stench entered his nostrils every time the Medusa Giant Lizard roared.

Lin Yuan was afraid that he would faint the moment he moved within one meter of the Medusa Giant Lizard.

He did not care how the Medusa Giant Lizard felt after consuming the sand and crystal bottle because its digestive system would even be able to digest ferromanganese.

The Medusa Giant Lizard was outraged that it had suddenly been stuffed full of things, yet it was strangely quiet.

It looked dazed and confused, as though it had been soothed into submission by whatever had entered its body. Its feral expression faded, and it turned into an obedient puppy.

A moment later, its drunken expression vanished, and it let out a howl.

The second that the Medusa Giant Lizard howled, blood aura emanated from Lin Yuan's palm wound.. The Medusa Giant Lizard immediately fell silent and lowered its head.

Chapter 953: The Perfect Source-Type Cleansing

Although the Medusa Giant Lizard did not show any affection toward Lin Yuan, it no longer tried to attack him.

Lin Yuan held his breath and stepped nearer to the metal cage.

This time, when Lin Yuan tossed the crystal bottle, the Medusa Giant Lizard obediently gulped it down.

Lin Yuan noticed that the Medusa Giant Lizard was already instinctively moving toward him.

It looked at him with admiration and fawning as though he had turned into the Medusa Snake Demon.

When the Medusa Giant Lizard saw Lin Yuan opening the metal cage, it crawled out.

Lin Yuan used Spirit Essence Explosion and wrapped his fist in a layer of spirit qi.

Spirit Essence Explosion had also become stronger since the concentration of spirit qi in the Spirit Lock spatial zone had increased.

If the Medusa Giant Lizard wanted to harm him, he would definitely punch it without holding back.

However, he realized that the Medusa Giant Lizard that had been induced twice was already acting just like an obedient puppy. It did not dare to move too close to him. All it did was silently stand guard by him.

Lin Yuan planned on inducing the Medusa Giant Lizard a third time to form an eternal contract when he heard Morbius' voice in the depths of his soul.

"Yuan, dimensional lifeforms live in the dimensional world, and spirit qi has no effect on them. However, dimensional lifeforms treasure source-type energy. If you include source-type energy in the third induction, an incredible change might take place. Dimensional lifeforms are always grateful for the opportunities that they receive. The Medusa Giant Lizard might become even more loyal to you."

Lin Yuan's eyes lit up.

He summoned the Sacred Sword Wielding Queen that had been continuously absorbing Law Source Crystals.

"Sacred Sword Wielding Queen, when you're absorbing Law Source Crystals, you can temper the law power inside as well as store source-type energy in your body. The source-type energy can be injected into complete laws to evolve them. But can the source-type energy be used outside of your body?" asked Lin Yuan.

The Sacred Sword Wielding Queen was very intelligent. When it saw the Medusa Giant Lizard's obedient attitude, it knew what Lin Yuan was planning.

However, the Sacred Sword Wielding Queen did not understand the point of using such precious source-type power to evolve such a despicable dimensional lifeform.

When Lin Yuan used the Sword Skill Night Crow Wither Attack, any one of the 28 crows would be able to kill tens of Medusa Giant Lizards.

Thus, the Sacred Sword Wielding Queen voiced its question to Lin Yuan.

“I plan on expanding into the marsh world, and nurturing some marsh dimensional lifeforms can help the process,” replied Lin Yuan.

The Sacred Sword Wielding Queen’s eyes lit up.

If Lin Yuan could expand into the marsh dimensional world, it would never run out of Law Source Crystals to eat even if Lin Yuan never traded with anyone ever again.

This was amazing!

“Master, a dimensional lifeform can undergo a Source-Type Cleansing once in its life to unlock an evolution. Any class of dimensional lifeform can undergo the Source-Type Cleansing. However, high-class dimensional lifeforms need a lot more source-type energy for the Source-Type Cleansing to be successful. The Medusa Giant Lizard is currently Class 4 and will need 400 sets of source-type energy for its Source-Type Cleansing,” said the Sacred Source Wielding Queen.

Lin Yuan frowned and replied, “400 sets of source-type energy?”

This meant that the Medusa Giant Lizard needed 400 source-type crystals to undergo the Source-Type Cleansing successfully.

Before he obtained the Golden Lotus Brocade Pearls, this was an astronomical figure to Lin Yuan. But now, he would not feel any reluctance parting with 400 source-type crystals.

The Sacred Source Wielding Queen patted the stray hairs on its head and said hesitantly, “Master, you’re right. An incomplete Source-Type Cleansing is also fine, and it’ll save a significant amount of source-type energy. The Medusa Giant Lizard will still evolve.”

“How much source-type energy is required for a Source-Type Cleansing?” asked Lin Yuan.

The Sacred Sword Wielding Queen immediately replied, “An incomplete Source-Type Cleansing can save however much source-type energy you want. It can save from one to 400 sets of source-type energy. However, one dimensional lifeform can only undergo one Source-Type Cleansing in its life, and it won’t be able to undergo a perfect one after an imperfect one.”

Lin Yuan pondered over the Sacred Sword Wielding Queen’s words for a moment.

Finally, he decided to allow the Medusa Giant Lizard to undergo a perfect Source-Type Cleansing.

The 400 sets of source-type energy could be considered the sunk cost to experiment how much a dimensional lifeform could evolve during a perfect Source-Type Cleansing.

If the perfect Source-Type Cleansing could not meet Lin Yuan’s expectations, he would not do it in the future.

“Sacred Sword Wielding Queen, the Medusa Giant Lizard will undergo a perfect Source-Type Cleansing! I want to see how much the perfect Source-Type Cleansing improves the dimensional lifeform.”

The Sacred Sword Wielding Queen immediately replied, “Yes, Master. I’ll inject 400 sets of source-type energy into the Medusa Giant Lizard.”

It started to sway its skirt, and threads appeared out of the skirt.

Lin Yuan tossed the last bottle of fluid into the Medusa Giant Lizard’s mouth.

Once the Medusa Giant Lizard consumed the final bottle, the threads punctured the Medusa Giant Lizard, and an amber glow flowed from the skirt into the Medusa Giant Lizard’s body.

Lin Yuan counted 400 threads in total, and he knew that each thread was injecting source-type energy into different parts of the Medusa Giant Lizard’s body.

After the threads were drawn out of the Medusa Giant Lizard’s body, the Medusa Giant Lizard immediately let out an ear-splitting roar.

The Medusa Giant Lizard’s new roar was very different from its old one.

Chapter 954: The Mysterious Totem

Previously, the Medusa Giant Lizard’s roar had been full of imposing viciousness. Now, it was more terrifyingly savage.

Soon, the Medusa Giant Lizard’s body started to expand, and the stench of its mouth became so noxious that it forced Lin Yuan to rush backward.

Lin Yuan noticed that the Medusa Giant Lizard’s tail had grown to twice the length of its body, and three heads had sprouted from its neck. The three new heads had grown almost as large as the Medusa Giant Lizard’s original head.

The four heads roared in unison, blowing away the sand grains that Source Sand had turned into.

The Medusa Giant Lizard’s light purple scales had also darkened into a majestic purple-black.

There were black and gold patterns running all over the purple-black scales, and they seemed to carry an unspeakable aura of blood.

The Medusa Giant Lizard’s limbs had also grown much thicker to support its enlarged body and tail. Each of its claws was one meter long. The dark old claws were dull but unmistakably razor-sharp as they pulverized the grains of sand beneath them.

This was an amber pattern of the Medusa Giant Lizard’s current figure.

Lin Yuan was not surprised by the Medusa Giant Lizard’s changes and expansion.

It would have been more strange if the perfect Source-Type Cleansing had not brought about many changes.

However, this was the first time that Lin Yuan had seen a totem appear on a dimensional lifeform's body. The color and aura of the totem were exactly the same as that of source-type power.

But even after asking Morbius, Genius, and the Sacred Sword Wielding Queen about this, none of them knew the reason why this had occurred.

Apparently, the answer could only be found in the marsh world.

Lin Yuan sensed that the Medusa Giant Lizard was even stronger than a Class 5 demon.

The four heads were also very agile and could target four different Class 5 demons.

Demons were the most powerful dimensional lifeform.

It seemed that the perfect Source-Type Cleansing had evolved the Medusa Giant Lizard to possess the power of a Class 6 Medusa Giant Lizard.

The Medusa Giant Lizard did not look like a Medusa Giant Lizard anymore. It was as though the Source-Type Cleansing had evolved the Medusa Giant Lizard to the best source-type lifeform.

He noticed that an intelligent gleam had appeared in the Medusa Giant Lizard's eye, and its roar had changed once again. Now, there was a strange syllabic quality to the roar, as though it was a type of language.

Lin Yuan had contracted the Medusa Giant Lizard through a proxy method. Thus, he could not sense its thoughts.

Suddenly, Lin Yuan's eyes lit up as he remembered a new field that Genius had mentioned had emerged on Star Web. It was called Dimensional Language.

For example, the roars of some high-class demons could have a special meaning. The cries of the Medusa Snake Demon could signify specific instructions used to control the Medusa Giant Lizard.

Genius was very interested in this field, and it had been listening to the different cries of various dimensional lifeforms available on Star Web to see if it could figure out their meanings.

The Medusa Giant Lizard's current roar was full of complex syllables, and Genius would be able to use Connected Tails to link itself to the Medusa Giant Lizard to learn the meanings of the different syllables and pick up the Medusa Giant Lizard or marsh dimensional lifeforms' language.

The Medusa Giant Lizard walked over to Lin Yuan and lay by his side. It used its head to nudge Lin Yuan. But when it realized how much Lin Yuan detested its breath, it quickly buried its four heads in the sand.

When the Medusa Giant Lizard lifted its heads again, Lin Yuan realized that the stench was no longer unbearable.

It seemed that the smell of the Medusa Giant Lizard's mouth was connected to the bacteria in its saliva. It was now able to control the toxins in its saliva.

Lin Yuan noticed how timid the Medusa Giant Lizard was, and he reached out to pat its head.

He saw that the Medusa Giant Lizard's skin was tough and thick. He attributed this to the defensive abilities of the skin.

The Medusa Giant Lizard was happy that Lin Yuan was touching it. The other three heads were not displeased not to have Lin Yuan's touch.

This meant that the same soul controlled the Medusa Giant Lizard's four heads, unlike Purple Demon, which had a separate soul controlling each of its heads.

Lin Yuan saw no rush for Genius to use Connected Tails to pick up the Medusa Giant Lizard's language.

The more pressing matter at hand was for Lin Yuan to use Klein Hub to enter the marsh world.

After entering the marsh world for the first time, Klein Hub would not mark out every location in the marsh world. Lin Yuan would need to take note of the landmarks on his own and decide on a location to build his territory.

The next time that he used Klein Hub, he would immediately appear in the location he had decided on.

Thus, the most important task Lin Yuan had was to choose a suitable area that he could establish his territory on, and that was also suitable for the Barren River Orchid Bud to grow.

He would remove or chase away anything that would hinder him in his chosen area.

Lin Yuan entered the Spirit Lock spatial zone and instructed the Kill Food Sky Butterfly to change into a size that could carry him.

He entered the Class 2 marsh dimensional rift through Klein Hub while on the Kill Food Sky Butterfly's back.

But once he entered the marsh world, Lin Yuan was immediately floored by the sight that greeted him.

Chapter 955: The Fight Between the Medusa Snake Demon and the Marsh Soil Rock Turtle

A giant turtle that looked like a small mountain let out an outraged roar. Its shell was covered in layers of yellow patterns.

The spikes protruding from its shell formed a small mountain about two stories tall and detached themselves from the shell, flying out in all directions.

The spikes immediately minced all the attacking Marsh Crocodiles into a pulp.

The mangled flesh of the Marsh Crocodiles sunk into the black marsh, staining it dark red.

Even so, the other Marsh Crocodiles did not retreat. However, they did seem fearful and didn't dare to charge.

An eerie voice started to sing a song full of complicated syllables at that moment.

The Marsh Crocodiles were no longer afraid or hesitant, and they immediately charged at the enormous turtle.

Compared to the 20-meter-long turtle, the 4-meter-long Marsh Crocodiles were tiny.

Nonetheless, the Marsh Crocodiles snapped their jaws around the turtle's limbs and started to thrash about.

This did not cause the turtle much damage. Rather, the Marsh Crocodiles' teeth shattered from the unyielding force.

The wave of thousands of Marsh Crocodiles made the red pool below the turtle grow larger.

As the giant turtle howled in anguish, the yellow patterns on its back started to glow again.

Just as the giant turtle was about to attack again, three green beams of energy shot into the turtle's mouth.

The last beam pierced right through the giant turtle.

The green energy beam was very corrosive, and the puncture wounds in the giant turtle started to widen.

The yellow light all over the turtle's body started to ripple even more vigorously.

The giant turtle whipped its heck around, and the yellow light concentrated at its wounds.

Shortly after, the giant turtle's wounds started to close at a visible rate. This prevented further blood loss.

At that moment, the strange voice sounded more urgent.

Lin Yuan saw a half-girl, half-green snake figure with green snakes for hair. The figure's green eyes turned gray, and the giant turtle's wound turned to stone.

The part that had been turned to stone cracked and fell.

The giant turtle's neck wound grew larger, and the flesh around the wound also turned to stone. This prevented new flesh from growing again and ensured that the hole stayed open.

Lin Yuan did not expect to witness such a fearsome battle the moment he entered the marsh world.

It was rare to find the Marsh Soil Rock Turtle and Medusa Snake Demon in the marsh dimensional rift. In fact, the Marsh Soil Rock Turtle was even rarer than the Medusa Snake Demon.

Lin Yuan could not tell whether the Marsh Soil Rock Turtle had infringed on the Medusa Snake Demon's territory in order to consume all the marsh soil or if the Medusa Snake Demon had purposely provoked and hunted the Marsh Soil Rock Turtle.

But after taking a closer look, Lin Yuan felt that the former was more likely because the Marsh Soil Rock Turtle was already Class 7 and was about as strong as a Myth Breed fey. On the other hand, the Medusa Snake Demon had just reached Class 6. Even if it had strong defensive abilities, it would never go after prey that was a higher class than it was.

There was a Class 6 Medusa Giant Lizard nestled next to the Medusa Snake Demon.

The bottom half of the Medusa Giant Lizard had almost been completely destroyed by the Marsh Soil Rock Turtle's attacks, and it was evident that it was about to die. It was even struggling to breathe.

Lin Yuan also noticed that there was a snake on the Medusa Snake Demon's head that was different from all the snakes that took the place of the Medusa Snake Demon's hair.

This small snake had smoother scales and had a faint green glow.

It timidly threaded through the other snakes as though it was trying to hide.

Lin Yuan was shocked by this as the Medusa Snake Demon hated being in close contact with any lifeform that it did not share blood relations with.

Could that small snake that was trying to hide be the Medusa Snake Demon's child?

The young Medusa Snake Demon should also be a half-human, half-snake that had hair snakes for hair.

Lin Yuan used True Data to check on the small snake.

What he saw made him clench his fist tightly.

He had actually guessed correctly and was in the presence of the extremely rare Snake Change Medusa.

The Snake Change Medusa was a dimensional lifeform, but spirit qi professionals could contract it.

It did not have a set type and did not have any limits. As such, anyone could contract it.

Morbus had reached Silver X/Fantasy I and could Spirit Lock another fey while Lin Yuan had enough spiritual energy to contract two feys.

Hence, Lin Yuan set his sights on the Snake Change Medusa.

Lin Yuan felt that this was his lucky day. A miracle descended on him the moment he entered the marsh world.

The Medusa Snake Demon changed into the Snake Change Medusa because of an inevitable mutation in its evolution process.

The small Snake Change Medusa looked about as strong as a Class 1 dimensional lifeform.

It would be a miracle if it could evolve into the Medusa Snake Demon at this point.

If the Snake Change Medusa's class was too high, Lin Yuan would not be able to contract it.

It was possible to contract a high-class Snake Change Medusa, but Lin Yuan did not plan on using alternative plans.

It was also extremely difficult to force a highly intelligent dimensional lifeform to submit, especially one as proud as the Medusa Snake Demon.

The Marsh Soil Rock Turtle was a Class 7 dimensional lifeform and already had Law Source Crystals.. It was much stronger than the Marsh Crocodiles and Class 6 Medusa Snake Demon.

Chapter 956: Rising Lizard's First Fight

The Marsh Soil Rock Turtle's diet consisted of marsh soil, and the consumed marsh soil would also be nourished within the Marsh Soil Rock Turtle's stomach.

When the Marsh Soil Rock Turtle was injured, it would use the marsh soil stored in its stomach to heal itself.

At this point, most of the Marsh Crocodiles had died, and it was basically a done deal that the Marsh Soil Rock Turtle was victorious.

Although the Marsh Soil Rock Turtle ate marsh soil and had invaded the Medusa Snake Demon's territory for this reason, it was just as cruel as any other dimensional lifeform.

Before the Marsh Soil Rock Turtle departed, it would kill both the Medusa Snake Demon and its child.

The Class 6 Medusa Snake Demon was clearly devastated and in agony.

Clever lifeforms always valued kinship.

The Class 6 Medusa Snake Demon was clutching its daughter helplessly.

Even if it tossed its daughter out, its daughter would unlikely be able to escape from the Marsh Soil Rock Turtle's wrath.

After the Marsh Soil Rock Turtle killed the last Marsh Crocodile, it swam fiercely toward the Medusa Snake Demon.

Lin Yuan did not immediately order the Kill Food Sky Butterfly to step in. Instead, he summoned the Medusa Giant Lizard out of the leaf-shaped Diamond fey storage box.

The Medusa Giant Lizard immediately put its four heads close together and let out a thunderous roar.

Lin Yuan said to the Medusa Giant Lizard, "Go and fight with the Class 7 Marsh Soil Rock Turtle and see how much weaker you are compared to it."

The Medusa Giant Lizard remained Class 4 after the complete Source-Type Cleansing, but its power should have reached that of a Class 6 dimensional lifeform.

Since he wanted to test the Medusa Giant Lizard's power, it would have to face off against a strong opponent.

There was no opponent more suitable than the Class 7 Marsh Soil Rock Turtle that had just emerged victorious from a tough battle.

The Medusa Giant Lizard immediately charged toward the Marsh Soil Rock Turtle.

Once it was near the Marsh Soil Rock Turtle, the Medusa Giant Lizard whipped its tail and used it to pierce the Marsh Soil Rock Turtle's already existing wound.

Lin Yuan had noticed a sharp helix-shaped horn at the end of the Medusa Giant Lizard's thick tail, but he did not know that it would be used in this manner.

The tail was just like a spear that could pierce flesh.

The Marsh Soil Rock Turtle should not have been able to inflict damage on the Marsh Soil Rock Turtle.

However, Lin Yuan noticed that the Marsh Soil Rock Turtle's gaze had been focused on the Medusa Giant Lizard's totem from the moment it saw the Medusa Giant Lizard.

The sight of the Medusa Giant Lizard's totem seemed to strike fear into the Marsh Soil Rock Turtle.

It was only when the Medusa Giant Lizard's tail pierced its wound that the Marsh Soil Rock Turtle started to violently thrash about and prepared to retaliate against the Marsh Soil Rock Turtle.

The Medusa Giant Lizard's four heads started to move, and they sank their teeth into the Marsh Soil Rock Turtle's neck.

The Medusa Giant Lizard's sharp teeth pierced the Marsh Soil Rock Turtle's hard skin, and its bacteria-filled saliva that Lin Yuan despised started to flow freely.

Shortly after, the stench of decomposition drifted from the Marsh Soil Rock Turtle's neck. The rotting of its neck made the Marsh Soil Rock Turtle much weaker.

The Medusa Giant Lizard's twisting and forceful thrashing eventually pulled the Marsh Soil Rock Turtle's head asunder from the rest of its body.

It was now impossible for the Marsh Soil Rock Turtle to continue living, and it would soon stop struggling after using up the last of its energy.

However, the Medusa Giant Lizard did not care. It continued to slash down on the Marsh Soil Rock Turtle to grant it a swifter death.

When Lin Yuan saw the Medusa Giant Lizard's performance, he thought, *Spending the 400 source-type crystals to increase the Medusa Giant Lizard's combat power was so worth it.*

Just as Lin Yuan was about to approach the Medusa Snake Demon and its daughter, the Medusa Giant Lizard bounded up to him and used all its four heads to point at the Medusa Snake Demon and its daughter. It was clear that it wanted to gobble the injured Medusa Giant Lizard up to evolve itself.

Lin Yuan was not opposed to this.

After the Medusa Giant Lizard experienced the perfect Source-Type Cleansing, it needed to consume the flesh of many dimensional lifeforms of the same class and other Medusa Giant Lizards.

Once the Medusa Giant Lizard consumed the Class 5 Medusa Giant Lizard, it would evolve to Class 5.

Lin Yuan looked at the excited Medusa Giant Lizard and said, "Since you formed a contract with me, I should give you a name. From now on, you'll be called Rising Lizard!"

The Medusa Giant Lizard was incredibly smart. All four heads let out a delighted roar when they heard Lin Yuan name it.

Evidently, the Medusa Giant Lizard was really pleased with the name that Lin Yuan had given it.

Lin Yuan had named the Medusa Giant Lizard Rising Lizard because of the totem that had appeared after it experienced the complete Source-Type Cleansing.

While Rising Lizard was charging toward the Class 5 Medusa Giant Lizard, something interesting happened.

Although the Medusa Giant Lizard was the guardian of the Medusa Snake Demon, the Medusa Snake Demon should be attacking Rising Lizard that was about to consume it.

However, not only did the Medusa Snake Demon not put up a fight, but it also knelt down on the ground with its eyes fixed on the Medusa Giant Lizard's totem. It looked like it was worshipping its god.

Lin Yuan widened his eyes. He did not expect Rising Lizard's totem to have such powers.

The Medusa Snake Demon started to sing a strange song in a drunken state.

Chapter 957: Faith and 'Apostle'

The strange song was filled with complex syllables.

Rising Lizard stopped eating and looked up at the Medusa Snake Demon before turning to look at Lin Yuan expectantly.

The chain of events left Lin Yuan confused.

He ordered the Kill Food Sky Butterfly to land on Rising Lizard before summoning Genius and saying, "Genius, use Connected Tail and link yourself to Rising Lizard and me."

Genius meowed before two tails separated from it and turned into silver links. One connected Lin Yuan and Rising Lizard, while the other connected Genius and Rising Lizard.

Rising Lizard was not hostile toward Lin Yuan, so it granted full access to its memories and thoughts.

Lin Yuan immediately knew the meaning behind the Medusa Snake Demon's song through the links.

The meaning shocked Lin Yuan.

Normally, the Medusa Giant Lizard was obedient to the Medusa Snake Demon. Yet now, the Medusa Snake Demon addressed Rising Lizard as 'Apostle' and offered its faith to Rising Lizard.

When he saw how the Medusa Snake Demon was staring at Rising Lizard's totem, he knew that the totem was why the Medusa Snake Demon addressed Rising Lizard as 'Apostle'.

Lin Yuan knew that Rising Lizard was just a Class 4 Medusa Giant Lizard and was far from being an Apostle. Hence, he was certain that the Apostle of the marsh world had to have immense source-type power.

He also realized that there was more to the marsh world than met the eye.

It also proved that the Medusa Snake Demon knew about the existence of the Apostle.

The Apostle used faith to control the intelligent lifeforms in the marsh world and turned them into its believers.

This meant that a group of Apostles with totems on their bodies ruled the marsh world.

It was even likely that a higher lifeform existed above Apostle.

Rising Lizard was just a Class 4 dimensional lifeform for now. As it continued to grow, it might be able to break through to Apostle.

Although Lin Yuan was still unsure about the structure of Apostles and faiths, he would not say no to the Medusa Snake Demon wanting to become Rising Lizard's believers as it would allow him to control a Class 6 Medusa Snake Demon.

Aside from its strong combat power, the Medusa Snake Demon's intelligence and half-human form would be helpful in Lin Yuan's expansion into the marsh world.

Now that it had Lin Yuan's permission, Rising Lizard roared toward the Medusa Snake Demon, and a look of elation came over the Medusa Snake Demon's face.

It was an honor for a believer to be accepted by its Apostle.

The Medusa Snake Demon's elation changed into piousness as it placed its hands together as though it was praying.

The silhouette of a soul rose from the Medusa Snake Demon and entered Rising Lizard's totem.

An amber light shot out of Rising Lizard's totem and landed on the Medusa Snake Demon. A faint totem appeared on the Medusa Snake Demon's shoulder. However, this totem was inky green, while the one on Rising Lizard was amber.

Rising Lizard used the totem to confirm the Medusa Snake Demon's desire to become its believer.

Lin Yuan had been using Connected Tails to read Rising Lizard's thoughts during this process.

He realized that the power of faith was different from the power of the spirit, soul, and others.

This power was mystical, and Lin Yuan could not momentarily place his finger on it.

The power of faith bound the Medusa Snake Demon and Rising Lizard together tightly to the point that Rising Lizard could take the Medusa Snake Demon's life with one thought.

The faith was also fortified with Rising Lizard's power.

Lin Yuan craved this mysterious power.

He had just stepped into the marsh world and did not have the answers to his many queries.

However, he also had no one to ask. Hence, he pushed his curiosity down.

Genius also used Connected Tails to learn Rising Lizard's language.

Genius said to Lin Yuan in a child-like voice a moment later, "Yuan, I think Rising Lizard and the Medusa Snake Demon speak the same language. However, I can't say for certain yet. I need to use Connected Tails to link my consciousness with the Medusa Snake Demon.

"While I'm learning Rising Lizard's language, I'll compare it with that of the Medusa Snake Demon to see if they're the same. If they're really the same, give me half an hour, and I'll be able to communicate with Rising Lizard and the Medusa Snake Demon. Then, you can wear me on your face and speak to them using the marsh world language."

Genius' words were a pleasant surprise to Lin Yuan.

If he could learn the marsh world's language early on while exploring it, it would make further exploration much easier.

Lin Yuan also had many things to ask the Medusa Snake Demon.

He wanted to contract the Snake Change Medusa and enable it to undergo a perfect Source-Type Cleansing.

Since the Snake Change Medusa was a Class 1 dimensional lifeform, it only needed 100 sets of source-type energy.

100 sets of source-type energy were peanuts to Lin Yuan.

He also wanted to see if a totem would also appear on the Snake Change Medusa after it experienced the complete Source-type Cleansing and became another Apostle.

Chapter 958: Possible to See Dimensional Lifeform's Attributes

Lin Yuan communicated his plan to Rising Lizard through Connected Tails, and it immediately roared at the Medusa Snake Demon.

The Medusa Snake Demon hurriedly stood up, pulled out the Snake Change Medusa from its hair, and held it out.

It stood at attention as though it was waiting for Lin Yuan to give it orders.

Lin Yuan nodded at Genius, and another of Genius' tails fell and changed into a silver link that connected the Medusa Snake Demon and Genius.

Four black wings sprouted from Lin Yuan's back, and he flew over to the Medusa Snake Demon to receive the trembling Snake Change Medusa.

The Snake Change Medusa did not understand why its mother that had fawned over it from the second it was born was suddenly handing it over to a stranger.

It started to twist and turn in its mother's hand as though it was saying, "Mom, I'm so scared. I want to hide completely in your hair."

Its mother's indifference and Lin Yuan's imminent arrival terrified the small Snake Change Medusa even more.

Just as Lin Yuan's hand was about to make contact with it, it anxiously coiled itself up and tucked its head away.

Lin Yuan softened his touch when he saw this.

Normally, the Medusa Snake Demon would be able to evolve to Class 2 a year after its birth.

However, this Snake Change Medusa looked to be less than a year old.

Lin Yuan gently took over the Snake Change Medusa, and a roasted rainbow coat appeared in his other hand.

Since the Medusa Snake Demon had a human form, its diet was the same as humans.

But due to the environmental factors of the marsh world, the Medusa Snake Demon only had raw food available to it.

The fragrance of the roasted rainbow fish coat wafted into the Snake Change Medusa's nose, and its appetite immediately bloomed.

The Snake Change Medusa's tongue started to dart out despite keeping its head tucked away.

Since it seemed that the Snake Change Medusa was going to continue in this state for some time, Lin Yuan gently touched its soft scales.

Lin Yuan kept his touch extremely gentle so that the Snake Change Medusa would know that he had no intention of hurting it.

After a moment, the Snake Change Medusa's head surfaced from the coil, and it alternated between staring at Lin Yuan fearfully and drooling over the roasted rainbow fish coat in his hand.

Lin Yuan held the fish coat by the Snake Change Medusa's mouth with a smile. He knew that he would not be able to understand what the Snake Change Medusa was saying, so he did not try to communicate with it.

All he did was slowly move the rainbow fish coat around in front of the Snake Change Medusa so that it would be able to eat it whenever it wanted.

Once the Snake Change Medusa was assured that Lin Yuan did not mean it any harm, it let its craving for the rainbow fish coat take over. It then bit down on the rainbow fish coat while letting out a happy sound.

The Snake Change Medusa's head moved from side to side as though this was the most delicious thing it had ever tasted.

Lin Yuan was in no rush to form a contract with the Snake Change Medusa. Since the Medusa Snake Demon had become Rising Lizard's believer, it was as good as one of Lin Yuan's feys. Thus, it would be inappropriate for him to contract its daughter without so much as greeting it.

Lin Yuan felt a headache coming on as he looked at the Snake Change Medusa, Rising Lizard, and the Medusa Snake Demon.

He was used to checking on a fey's attributes using True Data, and it felt strange for him to be unable to check on dimensional lifeforms in the same way.

At that moment, Morbius' voice sounded out in Lin Yuan's head. "Yuan, True Data works in such a way that it binds itself to a particular world. Once a mark is left, you'll be able to use True Data to analyze any fey in that world. Once you use Klein Hub to lock on to a location in the marsh world, it will be the equivalent to making a mark. You will then be able to check on the attributes of dimensional lifeforms."

Lin Yuan's face lit up with delight.

If he could use True Data on Rising Lizard, he would be able to discern the abilities of the Apostles.

However, he could not take the matter of using Klein Hub to leave a mark in the marsh world lightly as his choice would be permanent, and he would have no choice but to begin his plan for expansion there. Hence, the choice of location had to be taken seriously.

Once Genius picked up the language of the marsh world, Lin Yuan planned on asking the Medusa Snake Demon if there was a suitable location nearby for the expansion and construction.

Lin Yuan did not have high standards for the location. He only needed a large and enclosed space so that he would have sufficient time to slowly expand into the giant treasure chest that was the marsh world.

While Lin Yuan and Morbius were speaking, Genius said, "Yuan, I have learned a fair bit of the marsh world's language. However, it's difficult for me to articulate the language. I'll have to practice hard before I'm able to use it."

Lin Yuan picked up Genius and said, "Genius, use Tool Transformation."

Genius meowed and changed into a pair of white glasses.

Lin Yuan wore the white glasses on his nose, and information about the marsh world's language flooded into his mind.

Just as he was about to speak to the Medusa Snake Demon, the eloquent stream of words turned clumsy and choppy the moment they left his lips.

Lin Yuan finally realized why Genius had said that it would be difficult to use the marsh world's language immediately. It was because the muscles in the mouth could not immediately adapt to produce such foreign syllables.

As Rising Lizard's believer, the Medusa Snake Demon could sense Rising Lizard's obedience and respect toward Lin Yuan.

Chapter 959: Wendy

As such, the Medusa Snake Demon was exceptionally respectful to Lin Yuan.

Still, its eyebrow twitched in frustration when it heard what Lin Yuan said.

Why couldn't this apparently all-powerful person that was even revered by an Apostle speak properly? Why was he trying to say with his bumbling words?

Lin Yuan did not have the time to train his mouth muscles to become accustomed to speaking the language of the marsh world.

He took a blade of Muscle Hyperthymesia Grass out of a fey storage box and placed it in his mouth to induce a hyper-memory state.

Next, he carefully studied the language of the marsh world before saying to the shocked Medusa Snake Demon, "Is there a large enclosed vacant area nearby with hidden resources around it?"

Despite being an intelligent lifeform, the Medusa Snake Demon could not understand why this person that had been stumbling over his words just seconds ago could now suddenly speak with such fluency.

Astonishment aside, the Medusa Snake Demon did not dare to leave Lin Yuan waiting. It pondered seriously for a while before replying, "While I was pregnant with Wendy, I happened across a place that fits your description. It's wide and has three mountains around it. It is also full of Marsh Crocodiles, which I can control.

"However, there are three Crocodile-Eating Marsh Otters there, and it was them that chased me out of that area in the first place. The strongest one is also Class 6, but I was pregnant with Wendy at the time and dared not start a fight with them. If I had taken over their territory, I would not have been reduced to being harassed by the Marsh Soil Rock Turtle."

Lin Yuan nodded as he listened.

It turned out that the Snake Change Medusa that had grown friendlier and was now coiling around its wrist was called Wendy.

The large area with three mountains around it that the Medusa Snake Demon had mentioned fit Lin Yuan's requirements to a tee.

Mountains were extremely rare in the marsh world.

Unlike the main world, the mountains in the marsh world were formed from a large amount of hardened mud that had the same composition as the mud that lay at the bottom of the marshes.

Thus, the mountains in the marsh world would not hinder the development of the territory.

If Lin Yuan ever found those mountains obstructive, he could easily knock them down.

The mud that came from the fallen mountains would even be able to supply Lin Yuan with pure earth-type energy for a long time.

Lin Yuan asked the Medusa Snake Demon, "Can you still find that place?"

The Medusa Snake Demon nodded and replied, "Medusa Snake Demons have a photographic memory of the roads and paths we've traveled on in the past, and we'll never forget any of them. That place isn't far from here. I'll be able to reach there in three months."

Lin Yuan coughed awkwardly.

The Medusa Snake Demon was by no means slow. The distance that it could travel in three months at a rushed pace in the marsh, which was its most comfortable territory, would equal an hour of the Kill Food Sky Butterfly's rushed speed.

Lin Yuan waved his hand and returned Rising Lizard to the leaf-shaped Diamond fey storage box. He instructed the Medusa Snake Demon to climb onto the Kill Food Sky Butterfly so as to provide directions.

With a few flaps of its wings, the Kill Food Sky Butterfly flew off in the direction as stated by the Medusa Snake Demon.

Just before the Kill Food Sky Butterfly took flight, it released butterfly silhouettes that dug out the marsh soil from inside the Marsh Soil Rock Turtle's body.

The blue butterfly silhouettes dropped the marsh soil into Lin Yuan's hands.

The Marsh Soil Rock Turtle had been able to heal itself and release attacks due to the marsh soil in its body.

Lin Yuan did not know how much marsh soil the Class 7 Marsh Soil Rock Turtle had started out with, but it now only had 13 mid-grade pieces and one high-grade piece called the Rust Mine Soil.

The Rust Mine Soil was one of the rarer high-grade marsh soil, and it was useless to most plant-type feys.

However, it was extremely beneficial to a select number of metal plant-type feys.

Lin Yuan planned to take the Red Mine Soil back to the Return from Faraway Mansion and use it to nourish the Bronze/Legend Gold Curtain Peonies.

Suddenly, he realized that he could just kill the Marsh Soil Rock Turtles from now on to obtain marsh soil.

This was much easier than slowly digging through Marsh Crocodile infested marshes.

He could also nurture the Marsh Soil Rock Turtles in the future and use them to seek out more marsh soil.

Lin Yuan noticed that the Marsh Crocodiles that the Marsh Soil Rock Turtle had killed were riddled with flesh-eating bacteria that had grown to a meter long within an hour.

It was clear that the flesh-eating bacteria were much more active in the marsh world than in the marsh dimensional rift.

The bloodstained marsh was now completely clean, aside from the black mud at the bottom of it. Lin Yuan felt that it might even be cleaner than the environment in the main world.

He stored away the marsh soil before saying to Wendy in the marsh world's language, "Wendy, will you become my buddy by forming a contract with me?"

Wendy lifted its small head, but it did not know what Lin Yuan was referring to.

It thought of the rainbow fish coats it had just gobbled up and their addictive flavor.

"After I become your buddy by forming a contract with you, can I eat those crispy roasted pieces?"

Lin Yuan smiled toothily.

"Once you become my buddy, everything I have will be yours. I'll feed you things even tastier than those roasted pieces."

Wendy flicked its tail but did not agree.

Instead, it looked at its mother.

The Medusa Snake Demon was currently busy being astonished by the Kill Food Sky Butterfly's speed.

Chapter 960: Three Flower Snake-Eyes Totem

The Medusa Snake Demon could sense how powerful the Kill Food Sky Butterfly was.

Combined with the respect for and eagerness to please Lin Yuan, it was impossible that the Medusa Snake Demon would say no on Wendy's behalf.

With a nod of its mother's head, Wendy slithered up to Lin Yuan's ear before whispering, "I'll do it."

Lin Yuan gently placed his hand on Wendy and circulated his spiritual energy to form a contract with it.

Once the contract was formed, Lin Yuan and Wendy's spiritual energy was linked, making Wendy even more affectionate than before.

Since the Kill Food Sky Butterfly was also carrying the Medusa Snake Demon, it had expanded itself.

While it was flying, it had also set up an energy shield to protect Lin Yuan, the Medusa Snake Demon, and Wendy from the air currents.

Lin Yuan realized that the space in the marsh world was much more stable than that in the main world.

Even when the Kill Food Sky Butterfly was in full throttle, the space in the marsh world did not ripple like it did in the main world. This was probably why dimensional rifts opened in the main world.

Since he had nothing else to do for now, Lin Yuan decided to enable Wendy to experience the complete Source-Type Cleansing.

He summoned the Sacred Sword Wielding Queen, and it started to dance around on the Kill Food Sky Butterfly's back after receiving its orders.

A hundred threads extended from the swaying skirt toward Wendy, and light amber source-type energy was soon pumped into Wendy's body.

The Medusa Snake Demon immediately started to panic when it saw what was happening.

Nonetheless, it dared not make any reckless movements.

Wendy suddenly changed into Medusa and proceeded to flip between its Medusa form and snake form.

Lin Yuan had kept his eye on the Snake Change Medusa, and he did not expect that it would revert to its half-human form after experiencing the complete Source-Type Cleansing.

Wendy's Medusa form looked to be about five years old and had a head of dark green hair, alabaster skin, round green eyes. Wendy looked like a porcelain doll.

While Wendy was switching between its Medusa and snake form, Lin Yuan noticed that the color of its snake-half was becoming lighter. Eventually, it became a jade green that resembled the color of the Jasmine Lily's leaves.

Lin Yuan also noticed that Wendy's pupils had split into three, and each turned into the shape of a flower. Eventually, the three flowers combined into a bouquet.

At that moment, a totem in the shape of an eye with a bouquet of three flowers for pupils appeared on Wendy's forehead.

The appearance of the amber totem signaled the end of the complete Source-Type Cleansing.

The Medusa Snake Demon was staring at its daughter with astonishment and at Lin Yuan with fear.

Apostles were the strongest and most secret creatures known to the Medusa Snake Demon. It was one's unimaginable honor to become an Apostle's believer.

The Medusa Snake Demon could not fathom the kind of power that could shape Apostles.

Could the legend be true?

Once Wendy's complete Source-Type Cleansing was complete, it slithered over to face Lin Yuan before reaching out its arms.

Wendy's outstretched arms blindsided Lin Yuan.

Currently, Wendy looked to be about five years old and looked to be around the same age that Chu Ci had been when he had decided to take responsibility for her life.

He could not help but think back to the days when he and Chu Ci had struggled to get by.

Lin Yuan picked up Wendy and noted that its jade-green hair was rather odd.

As a Medusa Snake Demon, shouldn't it have snakes for hair? Why did it have normal human-like hair instead?

Moreover, Wendy was clearly the Snake Change Medusa. So why did it look like the Medusa Snake Demon?

While Lin Yuan was thinking, Wendy turned into a three-centimeter long snake that looked as though it had been carved from jade.

Wendy climbed out of Lin Yuan's arms and went to its mother before changing back into its Medusa form.

It stretched out its arms toward its mother.

It was then that Lin Yuan realized that Wendy could switch between its snake form and Medusa form.

The Medusa Snake Demon dared not pick up Wendy.

Lin Yuan thought, *‘If the Medusa Snake Demon hadn't become Rising Lizard's believer, it might already be kneeling before Wendy.*

This recent development gave Lin Yuan another insight into Apostles.

Apostle was not just a title but also a rank.

Apostles were definitely ranked above dimensional lifeforms, and they were powerful enough to supersede the ties of kinship.

Something nagged at Lin Yuan. After he used Klein Hub to mark out the location in the marsh world, he would finally be able to check Wendy and the Medusa Snake Demon's attributes.

Not long after, the Kill Food Sky Butterfly flew to the location as directed by the Medusa Snake Demon.

When he saw the place, Lin Yuan's eyes lit up. It was exactly as the Medusa Snake Demon had described.

The three mountains were not large piles of mud but rather large piles of loose soil.

The soil diverted away the moisture of the marsh and made it difficult for large lifeforms to live there.

The place satisfied Lin Yuan and fit the Barren River Orchid Bud's needs.

As he looked at the soil beneath him, a faint murderous aura rose from Lin Yuan.. "It's time to clean this place out," he growled.
