

MGE 171

Chapter 171 – Romulaj's Surrender

Yang Feng asked: "Joana, where's Romulaj?"

Night Hunter Romulaj was the most legendary assassin of the dark elves. If she could be subdued, then Yang Feng's forces would be once more enhanced by a large fraction. Conversely, with her as an enemy, Yang Feng would have to be constantly wary of being assassinated by this legendary assassin.

Yang Feng currently only had the strength of a level-1 Warlock. Once his true body were to come across such a top assassin, then his chances of survival would be just at 10%.

Joana said faintly: "Romulaj was always a loner. She only listens to the orders of the dark elven Great Matriarch. I've just become the dark elven Great Matriarch, and have yet to enter in contact with her."

Yang Feng's eyes flashed with a touch of a fierce glint, and he said solemnly: "Then forget about it. Joanna, immediately go select a group of dark elven experts, then follow me to attack the City of Hellions. I want to capture the City of Hellions by today."

Dark elves and hellions were not limited to just a single city in the underground world. However, the City of Dark Elves and the City of Hellions, these two cities were most definitely the 2 most important cities of the 2 races.

Once the City of Dark Elves and the City of Hellions were captured by Yang Feng, then he would have 2 strongholds in the underground world and would inflict heavy damage to the underground world's allied forces.

Hellions and dark elves were the core of the underground world's allied forces. If the bases of both races were to be seized by Yang Feng, then the impact it would have on the underground world's allied forces could very well be imagined. Even the collapse of the alliance would not be out of question.

Besides, there were all kinds of treasures stored in the City of Hellions collected by hellions during the past several millennia. Once the City of Hellions was captured, then Yang Feng would be able to seize a great deal of wealth, and get a lot of supplies. In addition, he could also turn the City of Hellions into his base of operations to attack the other hellion cities.

Joana was slightly alarmed: "By today? But there's a distance of 4,000 kilometers between our City of Dark Elves and the City of Hellions."

Yang Feng said with a light smile: "That's right, by today! If you think it's unbelievable, then they definitely would also think the same."

There was a great difference between a mechanical legion and a human legion, that is, as long as there was an adequate power source, then the mechanical legion could travel and battle until their components were worn down, or their energy was depleted.

Joana pondered for a moment, and then responded decisively: "Alright!"

From the 1 million battle robots which Yang Feng had brought along, 100,000 of them were left to defend the City of Dark Elves, while the remaining 900,000 primary battle robots along with the dark elven experts rushed towards the City of Hellions.

There were also 5,000 engineering robots among the 100,000 robots stationed in the City of Dark Elves. The 5,000 engineering robots took all kinds of materials and quickly started to build a variety of munitions factories and defensive devices – fortifying the City of Dark Elves.

Yang Feng had no intentions of letting the dark elves continue believing in the Goddess Lolth; therefore, the City of Dark Elves would lose the baptism of the Goddess Lolth's divine power, and would become just an ordinary large city. However, the City of Dark Elves would be turned into another type of terrifying fortress after it was overhauled by Yang Feng's mechanical legion.

Inside the great temple, approximately one hour after Yang Feng's army had left the City of Dark Elves. A figure invisible to the naked eye shuttled noiselessly and quickly moved towards the Holy Spring Divine Pool.

Beast-type bladed robots, gunner robots, and artillery robots were stationed in every corner of the great temple. The invisible figure soundlessly shuttled amidst the robots, entered the Holy Spring Divine Pool, and saw the seriously injured Shayenna lying weakly in the pool.

"Big sister Shayenna, you're cutting quite the sorry figure!"

The space twisted and a petite figure with a pair of sharp ears emerged. At a glance, the figure appeared to be a 16 or 17 year-old young lady. The young lady had an explosive figure with peerless facial features and a pair of D cups.

Shayenna's beautiful eyes flashed with the touch of a complicated glint, and she said with a bitter smile: "Romulaj, you've come too late!"

At that time, if Romulaj were in the City of Dark Elves, then with Shayenna's prestige coupled with Romulaj's support, Joana's rebellion could have been suppressed. At that time, Joana wouldn't even dare to entertain the thought of rebellion. Now that the City of Dark Elves had fallen into the hands of Yang Feng – his strength an untold amount of times greater than Joana's – if the both of them were to have the intention of taking back the City of Dark Elves, then that would be just a pipe dream.

Romulaj responded: "It's still not too late! As long as you're rescued, then we'll definitely have a chance in the future. Your body's injuries will get better with the support from the Goddess Lolth's divine power!"

Radiation tumors grew all over Shayenna's body and both her legs had been blown off. With such severe injuries, even a Great Warlock rank expert would have slim chances at survival if they didn't had the appropriate knowledge. But as a High Priestess, Shayenna could slowly recover with the support from the Goddess Lolth's divine power. Even her severed legs could be grown anew via casting divine spells.

Shayenna's pretty eyes ignited with the flames known desire and ambition, and she said solemnly: "Alright! Take me away; there will come a day when I'll take everything back which is rightfully mine!"

"I'm very sorry to have to disturb your reunion. Ms. Romulaj, I'm glad I could meet you. I am Yang Tie, one of the Steel City's 10 marshals. I'd like to warmly invite You to join our Steel City."

Yang Feng had come from the same direction that Romulaj had appeared; looking at her with a smile.

Boom!

Along with loud sounds, Mofen Demonic Polar Bear, Amanni Light Wing Icebird, Coloman Boa, and the rest of the 10 level-4 extraordinary life form rank mechanical battle beasts appeared from different directions, and encircled Romulaj. The mechanical battle beasts stared fixedly at Romulaj. The 10 of them instantly erupted with Great Warlock rank life force, stirring the space around them.

When Shayenna saw this, her pretty face paled, and her beautiful eyes flashed with a touch of despair.

After the corpses of the 10 level-4 extraordinary life forms had passed through Yang Feng's remodeling, they were turned into mechanical battle beasts. However, the life force and fighting strength of each mechanical battle beast was a lot weaker than what it used to be during their lifetime. Even so, while under the siege of the 10 level-4 extraordinary life form rank mechanical battle beasts, only death would await the legendary assassin Romulaj. Contrary to what one might expect, even Shayenna at her prime would have to flee for her life with the help of her various trump cards if she were to meet the 10 mechanical battle beasts.

Romulaj swept Yang Feng with a glance, and then said with a disdainful smile: "You're not human but just an alchemical golem! As you humans like to say, playing hide and seek. Are you even a man?"

As an assassin, Romulaj's eyesight had surpassed that of many Great Warlocks. She had seen through Yang Feng's farce at a glance.

Yang Feng said with a smile: "Aren't you the same? If we're talking about playing hide and seek, then that is your second nature."

Romulaj said coldly: "That's different. I am an assassin! Concealing is a requirement of my class. As the leader of a force, a King, you won't have great accomplishments if you just play hide and seek all day long. As far as I know, no founding Emperor of the 8 Great Warlock Dynasties was a character who played hide and seek. Right, Yang Feng?"

Yang Feng said lightly: "To compare me to the founding Emperors of the 8 Great Warlock Dynasties, that's very generous of you! I'm quite aware of my circumstances. With my current strength of a level-1 Warlock, if I hadn't played hide and seek, then I could have already died an unknown amount of times! In this world, the winner is king and the loser is criminal. I only seek victory; as for the process, it doesn't matter. Romulaj, will you surrender?"

Romulaj sighed with some annoyance: "There's nothing I can do; I cannot beat so many alchemical golems. I yield!"

With a flick of his wrist, Yang Feng took out the Liquid-Metal Nano-Robot Elixir, and walked towards Romulaj: "Hold still and let me inject you with this elixir!"

Romulaj's pretty eyes flashed with the touch of a peculiar glint, and she ridiculed: "You will never get people's genuine loyalty if you only rely on alchemical elixirs to control others. Even if I yield before the power of the elixir, but you will never get my admiration."

“I do not need your admiration, I just need you to obey my orders and to not betray me. With regards to people’s changes of heart, I believe in the power of alchemy.”

Yang Feng was unfazed. He directly pricked Romulaj’s arm with the needle, and injected her with the Liquid-Metal Nano-Robot Elixir.

Romulaj’s immune system was roused, and killed one tenth of the Liquid-Metal Nano-Robots. She raised her slim eyebrows lightly, yet didn’t say a word. She was clear that the elixir was nothing good from the fact that she had to agree to it being injected.

Yang Feng heaved a slight sigh of relief only after injecting the Liquid-Metal Nano-Robots into Romulaj’s body.

As a legendary assassin, Romulaj was the most dreadful and dangerous opponent for Yang Feng. Yang Feng would have slim chances at survival once she were to lock onto the position of his true body. However, once she became one of his subjects, she would become Yang Feng’s sharpest blade.

Romulaj said lightly: “Heal big sister Shayenna’s injuries. As long as you heal her, then I’ll serve you wholeheartedly, and kill anyone that you tell me to kill. Even old freaks like Anthony and Aldrich, as long as they dare to leave their bases, then I’ll assassinate them for you!”

Yang Feng said with some expectation: “I know that you’re adept at killing, but what about protecting?”

With the cultivation base of a level-1 Warlock, Yang Feng was already considered to be an expert in Turandot Subcontinent; but in front of those Great Warlock rank powerhouses, he couldn’t even withstand a single blow. What he lacked the most was a strong bodyguard.

Romulaj thought for a moment, and then lightly shook her head: “I’m an assassin, not a bodyguard; thus I’m adept at killing, and not at protecting.”

“Well, I’ll first heal your big sister Shayenna, as I also need her to work for me.” Yang Feng took out a vial of Liquid-Metal Nano-Robot Elixir, and injected Shayenna with it.

Chapter 172 – Capturing The City Of Hellions

Once injected into Shayenna, the Liquid-Metal Nano-Robots swiftly removed all the cancerous radiation cells.

Xizu research on nuclear energy and nuclear power was by far beyond the level of Turandot Subcontinent’s Warlocks. The Liquid-Metal Nano-Robots clearly had a miraculous effect on the nuclear radiation power.

Shayenna only felt strange movements along her throat. She parted her cherry lips, and spat out pitch-black filth – exuding a sickening stench.

After Shayenna had spat out that nasty stuff, she felt her entire body become a lot more relaxed and at ease.

“Still not enough, your body is just too damaged. It seems like I need to inject you with more vials of the elixir.”

Yang Feng frowned lightly, then took out 5 vials of the Liquid-Metal Nano-Robot Elixir and directly injected them into Shayenna’s body.

Originally, the Liquid-Metal Nano-Robots treated the body by stimulating its potential – extracting the body’s ailments and toxins by erupting the person’s potential.

Although Shayenna was a Legend rank expert, but the injuries which she had suffered were just too severe; therefore, she had to rely on the Liquid-Metal Nano-Robots to extract the radiation power in her body. This drained greatly the Liquid-Metal Nano-Robots.

Once the 5 vials worth of Liquid-Metal Nano-Robots had entered her body, they quickly began to dispose of the cancerous radiation cells.

The ugly radiation tumors on Shayenna’s body burst open, and diffused putrid pus. The scars all over her body directly fell off, exposing a spotless and lovely body.

Shayenna’s beautiful eyes flashed with a touch of excitement. She waved her lily-white hand, cast the level-4 divine spell Great Healing, and a stream of resplendent divine light shrouded her body.

Bursts of itch were transmitted from Shayenna’s legs; her flesh sprouted and wriggled as a pair of slender and elegant legs slowly emerged.

The level-4 divine spell Great Healing originally had a miraculous effect of regenerating severed limbs, yet she could not recover her blown off legs because of the interference from the radiation power; but now that the radiation energy was completely dispelled by the Liquid-Metal Nano-Robots, Shayenna could finally recover her missing legs with the level-4 divine spell Great Healing.

With a light jump, Shayenna jumped out of the Holy Spring Divine Pool. Her body was washed clean of all the filth excreted from the tumors all over her body by countless streams of water, and the nauseating and disgusting deformity of her blown off legs had given way to a pair of splendid and enticing legs. She was a peerless dark elven beauty.

Shayenna gave an exceedingly fascinating and charming smile, and said enticingly: “Sir Yang Feng, thank you for saving me. I, Shayenna am willing to accept You as my Master, and am willing to serve You.”

Yang Feng revealed a trace of a smile: “She’s really sensible, no wonder she could become the Great Matriarch of the dark elves.”

Shayenna was so sensible that Yang Feng had no chance to give her a taste of the Liquid-Metal Nano-Robots’ backlash. Even the prideful and powerful Carolina who was a peerless expert infinitesimally close to the Starry Sky Warlock rank could not withstand the backlash from the Liquid-Metal Nano-Robots; therefore, Shayenna would be no different.

Yang Feng waved his hand, and threw a cell phone at Romulaj: “Shayenna, come with me to the City of Hellions. Romulaj, stay here and secretly protect the City of Dark Elves; if there’s anything the matter, then notify me through this communication magic box.”

Romulaj fiddled with the cell phone after receiving it, and revealed a trace of curiosity: "The communication magic box produced by Steel City looks really unique."

Convenient alchemical products like the communication magic box were the focus of transactions between dark elves and human Warlocks. On the whole, every upper class dark elf had one. Romulaj had also seen her fair share of them, but she had yet to see an Earth-style cell phone.

Shayenna said deferentially: "Yes! Sir!"

Only then did Yang Feng flew to the City of Hellions along with Shayenna and 8 level-4 extraordinary life form rank mechanical battle beasts.

The flying speed of the Amanni Light Wing Icebird surpassed the speed of sound; thus they could catch up with the army ahead of them. This was the reason why Yang Feng had left the 10 mechanical battle beasts behind to guard Shayenna, but he hadn't expected that he would be so lucky as to capture Romulaj.

The City of Hellions.

Different from the City of Dark Elves, the City of Hellions was just an large city with a 30 meters tall city wall and a variety of grotesquely shaped nests built inside it.

The hellions were artificially produced freaks by combining human subjects with the bloodlines of powerful beings from all kinds of different planes. The hellions possessed the bloodlines of countless powerful beings. Each superior hellion was a powerful being comparable to extraordinary life forms, while the 5 Great Hellion Ancestors were so terrifyingly powerful that they could even slaughter gods.

It was precisely because hellions were so powerful that they didn't believe in any gods. Also, they weren't proficient in Alchemy and had no support of formidable Alchemy. Even if they were to built an even firmer city wall, it still couldn't withstand a single strike from a powerhouse – a Great Warlock's all out attack could destroy the City of Hellion's city wall – they were naturally unwilling to do pointless work.

By devouring humans, hellions could get the majority of their knowledge and a part of their power; therefore the majority of hellions were not fond of arduous cultivation, but would instead go out of their way to hunt for humans. This was the reason why humans were so hostile towards hellions and were so adamant about killing them.

In the underground world, hellions were indisputably the most powerful race. Even though the dark elves had Shayenna, the underground world's nr.1 expert behind it, yet their number of Great Warlock rank experts was far behind that of hellions.

But hellions were also divided into different tribes. The majority of tribes were in conflict with one another, which was precisely the reason why the dark elves had become underground world's most powerful force.

The City of Hellions, within a beautiful and luxurious palace which was not the slightest bit inferior to a human's imperial palace.

A devilishly-handsome young man was quietly reading a book. The young man had a tall figure, a head full of dazzling short golden hair, and was dressed in black clothes.

Next to the young man knelt 7 beautiful and enchanting young ladies covered in muslin. The 7 young ladies were looking flirtatiously at the young man, their beautiful eyes brimming with adoration.

An eagle-eyed hook-nosed young man – exuding the atmosphere of a highly capable person – strode into the room. The man gave the 7 charming young ladies a mere glance, and then said solemnly: “Your Majesty, Steel City’s expeditionary forces had defeated the City of Dark Elves, and are currently marching towards our City of Hellions.”

The young man with short golden hair was the Monarch of Turandot Subcontinent’s Pantheon Hellion Tribe, the Pantheon Hellion Monarch. Although he looked just like a mere 24 or 25 year-old, yet he had already lived for more than 3 millennia – he was literally an old freak.

Pantheon hellions originated from the Pantheon Hellion Ancestor. The blood and divinity of countless formidable gods from different planes gathered inside the body of the Pantheon Hellion Ancestor; it was the most powerful among the 5 Great Hellion Ancestors. The pantheon hellions lived the longest and were the strongest among hellions of the same rank. The only weakness of the pantheon hellions was their low fertility – they numbered the least amongst hellions.

Every adult pantheon hellion had the cultivation base of a Great Warlock rank expert. Furthermore, once they turned adult, even if they didn’t practice cultivation, they would still slowly condense a trace of divinity and become divine being.

The Pantheon Hellion Monarch was the sole powerhouse among Turandot Subcontinent’s pantheon hellions. Him, the Undead Hellion Monarch and the Myriad Beasts Hellion Monarch were called Hellion Clan’s 3 Great Tycoons.

The eagle-eyed hook-nosed young man – who was exuding the atmosphere of a highly capable person – was Pantheon Hellion Monarch’s trusted subordinate, Wormysley.

The eyes of the Pantheon Hellion Monarch flashed with a touch of astonishment, and he exclaimed: “So fast? But the City of Dark Elves has the blessing of Lolth, that whore of a Goddess. How could it have been defeated so fast? How come Steel City’s mechanical legion is so powerful?”

Wormysley said with a bitter smile: “I don’t know, I only know that they are marching towards us. Not long ago, the 8th sentry post’s warriors were wiped out.”

The eyebrows of the Pantheon Hellion Monarch rose lightly, and he said: “It seems like we have at most 30 minutes before Steel City’s mechanical legion reaches our City of Hellions; their speed of advancement is really fast. Currently, there are no news from the Undead Hellion Monarch, and the Myriad Beasts Hellion Monarch presides over the underground world’s overall situation. Am I the only one left in the City of Hellions?”

Wormysley said with anticipation: “That’s right. Your Majesty, the City of Hellions depends on you!”

The eyebrows of the Pantheon Hellion Monarch suddenly straightened, and he said with a smile: “Since this is the case, then pass down my order – everyone is to immediately evacuate the City of Hellions. It’s better to give this city to Steel City.”

Wormysley stilled for a moment, and then said with some incredulity: “Your Majesty, did I heard you correctly? You want to give the City of Hellions to Steel City? We hellions haven’t suffered such a humiliation for several millennia!!”

The Pantheon Hellion Monarch said lightly: “Wormysley, between our City of Hellion and the City of Dark Elves, which one has the strongest defense?”

Wormysley said without hesitation: “The City of Dark Elves has the blessing of the Goddess’ divine power; it’s brimming with extraordinary power, and its defensive strength is by far stronger than that of our City of Hellions.”

The Pantheon Hellion Monarch continued: “The main forces of the City Of Hellions had already departed for the surface world. Compared to the City of Dark Elves, how is the current strength of our City of Hellions?”

Wormysley was silent for a moment, and then said with difficulty: “The remaining power of our City of Hellions cannot compare to that of the City of Dark Elves.”

The eyes of the Pantheon Hellion Monarch flashed with a glint of wisdom, and he analysed succinctly: “Since the other side could defeat the City of Dark Elves in a short period of time, then our City of Hellions also won’t be able to withstand their offensive. Staying here won’t amount to nothing more than dying in vain! We’ll withdraw first, and leave them an empty city; in the future, we’ll think of ways to recapture the city. After all, the underground world belongs to us; and no matter how strong the humans are, but it’s still impossible for them to stay here long term.”

Wormysley sighed in admiration: “That’s right, the underground world’s environment is fundamentally not suited for the survival of humans. Even if they hide in the City of Hellions, there is nothing to it. We’ll regain the city in the future. Your Majesty is really amazing; your subordinate is far from being your equal.”

After he finished speaking, Wormysley saluted towards the Pantheon Hellion Monarch, and then quickly left the palace.

The Pantheon Hellion Monarch suddenly sighed with disappointment: “Steel City, interesting. They could even capture the City of Dark Elves. The rumor that they wiped out 18 Great Warlock rank experts in one fell swoop, it appears like it isn’t fake. Alchemy is just so powerful! The Alchemy of human Warlocks, ah!!!”

Whenever humans contended against other formidable beings, they tended to breed, like flies, all kinds of extremely powerful secret treasures, and overwhelm those powerful and highly talented beings with superior abilities. In terms of cultivation aptitude, more than 99% of humans couldn’t compare to formidable beings like fiends, ancient demons, and divine descendants.

The Pantheon Hellion Monarch had astonishing strength. If secret treasures were not taken into account, then he would be Turandot Subcontinent’s nr.1 expert with his battle prowess, and even Starlight Aldrich might not be his match. But when taking secret treasures into account, then Starlight Aldrich could defeat him by paying a sky-high price.

When Yang Feng's enormous mechanical legion arrived before the City of Hellions, it was met with torrents of flames along with large amounts of smoke rising from the city.

"Leave no provisions for the enemy!"

When Yang Feng saw the City of Hellion's city gate wide open and the churning flames, his eyes flashed with a touch of graveness. He felt like things had become tricky.

If the hellions had opted to stay in their city and had directly faced Yang Feng, that would be the best scenario for Yang Feng.

As long as the remains could be retrieved, then no matter how many primary battle robots were to be wrecked by the hellions, it would just result in a slight consumption of energy. To redeem a large number of hellion lives for a bit of energy, that would definitely be quite profitable.

But the hellions were very cunning. They directly burnt the City of Hellions along with any goods which couldn't be moved, before leaving this empty city to Yang Feng, along with a headache.

Hellions were, however, a powerful race of the underground world. Even without the City of Hellions, they could still disperse to all corners of the underground world and survive by eating insects, mushrooms, and moss. As for the issue of losing their reason when not eating human flesh, hellions had also a solution for that.

Apart from the City of Hellions, there were still more than 30 cities set up by the hellions in the underground world; therefore, it wasn't that simple to defeat them.

"The hellions are so crafty! If I had abandoned the city to escape, would it be different now?"

Joana thought it over, and immediately realized that she could not have made the second choice. Dark elves had spent countless blood and sweat on the City of Dark Elves. With the blessing from the Goddess Lolth's divine power, this extraordinary city had a formidable defense. Other cities were fundamentally not a match for it.

The dark elves would have never agreed if Joana had chosen to abandon the City of Dark Elves. Additionally, at the time, they had looked down on the small force which was Steel City.

Chapter 173 – Eunice Captured

Yang Feng pointed towards the City of Hellions, and laughed out loud: "Fleeing at the first sign of trouble, those hellions can be regarded as clever! But I've already known that it wouldn't be that easy to defeat the hellions! Since they abandoned the City of Hellions, then let it be forever! The City of Hellions will be a dagger pressed against the hearts of the hellions. Unless they submit to me; otherwise, they will be destroyed! It's just a matter of time!"

With Yang Feng's laughter, the upper dark elves following beside him started to feel relieved. Many dark elven beauties looked at Yang Feng with traces of interest exuding from their beautiful eyes.

Joana looked at the confident Yang Feng, and felt somewhat surprised: "He's quite the character."

Yang Feng ordered simply: "Enter the city, and extinguish the fire!

The huge mechanical legion immediately entered the City of Hellions.

Under the leadership of Dephilia, the dark elven Wizards began to extinguish the fire within the City of Hellions.

Large amounts of rain dropped from the sky and fell on the flames, before extinguishing them and leaving black smoke along with a burnt smell behind.

The Pantheon Hellion Monarch watched the mechanical legion enter the City of Hellions in an orderly manner from a dark corner of the city; he was taken aback: "That's Steel City's mechanical legion? It's different from what I've seen previously! These should be the most elite and most powerful mechanical golems of Steel City; the Knight rank mechanical golems were but a ruse."

Prior to the battle of Black City, Steel City was known for their 100,000 Knight rank mechanical golems; this bit of power was basically dismissed by the major powers.

But after the battle in Black City, everyone's gazes were focused on Steel City.

The first time Steel City's strongest combat unit was led by Yang Feng, it had defeated the dark elves and occupied the City of Dark Elves; rousing the attention of the Pantheon Hellion Monarch, to the point that he went to personally investigate in spite of the danger.

"That life-like alchemical golem is the commander of this mechanical legion. That is to say, the true commander of the huge mechanical legion is either Yang Feng or Yang Ye. Steel City's City Master Yang Ye is said to be obsessed with Alchemy and spends all his time on researching Alchemy. Also, only those paranoid, like someone with the identity of a level-1 Warlock, would refine so many powerful mechanical golems. In other words, the commander of the mechanical legion ought to be the only kin of Steel City's City Master, Yang Feng."

The Pantheon Hellion Monarch quietly observed from the side. With mistaken intelligence and wrong reasoning, he still managed to arrive at the correct conclusion.

100,000 engineering robots began with large scale fortification of the City of Hellions once the tremendous mechanical legion entered the city.

When the Pantheon Hellion Monarch saw those robots slowly transform the city into a stronghold, he couldn't help but feel discouraged. He was very clear, once Yang Feng had finished with the fortifications of the City of Hellions, turning it into a huge fortress, then it would be akin to pressing a dagger against the hearts of the hellions.

With the City of Hellions as a base, Yang Feng could sweep the hellions all over, and gradually reduce their lebensraum, before wiping them out completely.

Inside Rose Garden. Eunice was researching on new spell models in the laboratory. Suddenly, her beautiful eyes flashed with a touch of alarm as she felt fluctuations of magic coming from behind her. Her dexterous eyes suddenly became dull, and her face became devoid of all emotions; like a walking corpse, she went silently outside.

As one of the people doted on by Yang Feng, Eunice's status was very high in Rose Garden; she easily passed through the checkpoints, before arriving outside of Rose Garden.

Once Eunice arrived outside of Rose Garden, she waved her lily-white hand, and magic carpet suddenly flew out. With a light jump, she jumped onto the magic carpet.

"Teacher Eunice, what happened? Hadn't Master told us to stay inside Rose Garden? Outside is filled with Master's enemies, it's very dangerous!"

Judy, the innocent-looking and big-breasted sensual beauty wearing a pet collar on her neck, came over and asked loudly, while looking puzzled.

"Interesting. If I remember correctly, you're a pet raised by Yang Feng! Come with me!" Suddenly, the voice of another person came out of Eunice's mouth.

Eunice pointed with her lily-white hand. With the flicker of a magic radiance, a wind rope formed suddenly and swept towards Judy.

A resplendent radiance surged on Judy, instantly dispersing the wind rope.

"You aren't teacher Eunice. Who are you?" Judy's beautiful eyes flashed with a touch of fear, she shouted out loud, turned around, and swiftly fled towards the depths of Rose Garden.

There were 3 Great Warlock rank experts inside Rose Garden. Carolina and the others were unparalleled inside Rose Garden, and even a Starry Sky Warlock would be suppressed by the three of them.

"Who am I? I am Aldrich, Starlight Aldrich! You actually have a level-3 secret treasure on you. It seems like that fellow Yang Feng is quite fond of this pet of his. Don't flee, come with me!"

A voice full of confidence and magnetism came out of Eunice's mouth, before she erupted with a Great Warlock rank life force, and reached out.

Suddenly, an invisible hand caught Judy.

Radiances from defensive spells erupted from Judy. Every defensive spell was a powerful level-3 spell, but they still couldn't contend with the invisible hand and were shattered. Judy had no way to block Aldrich's strike; she was caught by him and thrown onto the magic carpet.

Sounds of alarm reverberated through Rose Garden; tyrannical spirit fluctuations were dropped from the sky and swept over.

From Rose Garden came Carolina's ice-cold voice: "These soul fluctuations, you're Aldrich! Aldrich, you've got guts! You even come to snatch our Rose Garden's people. Are you trying to incite a conflict between Rose Garden and Warlock College Antalya? "

Aldrich said with a light smile: "Your Rose Garden has already been subdued by Steel City; it has been reduced to its bitch. You're already unfit to stand toe to toe with us. Carolina, go tell your Master, Yang Ye, he shall personally come apologize to our Warlock College Antalya. Otherwise, I'll burn the 2 most beloved women of his only kin, Yang Feng, at the stake!

Carolina's pretty eyes flashed with a touch of coldness, and she said chilly: "Aldrich, Eunice is your daughter; are you so cruel that you would burn your own daughter to death?"

"You've got to break some eggs to make an omelette! If she died, I would just feel a heartache and nothing more. Familial feelings are not worth mentioning when compared to my pursuit of eternity. Besides, is there anything special about the death of a single daughter; as long as I am alive, how many more of them can't I give birth to? Please tell Yang Feng to make his uncle come apologize to Warlock College Antalya. If Yang Ye doesn't come within two days, then I'll burn these two to death in Warlock College Antalya."

Aldrich burst into a loud laughter. The magic carpet he rode turned into a ray of light, and flew into the distance.

Carolina stood quietly inside Rose Garden.

Only a long time later did Carolina withdraw the unbelievably powerful spirit force, albeit somewhat regretfully.

Inside Rose Garden and with the support from the demigod rank armament Rose Divine Mirror, Carolina could even suppress Starry Sky Warlock rank experts, but once she stepped out of Rose Garden, she could be defeated.

Starlight Aldrich, Tyrannical Black Dragon Anthony, Steel White Elephant Haris, Behemoth Claw Konrath, and Sword of Justice Acheson, these 5 were respectively the leaders of Warlock College Antalya, Black Dragon Tower, White Elephant Ivory, Savage Claw, and Eyes of Justice, as well as Turandot Subcontinent's publicly acknowledged strongest 5 great powerhouses. Each one of them wielded one or more demigod rank armaments.

Carolina was very remarkable. She didn't loose out to any one of the 5 great powerhouses, but she also had no certainty in besting any one of them. Once 2 or more of the 5 great experts were to jointly attack her, then there would be a chance of her losing her life. Therefore, as strong as she may be, she still wouldn't lightly leave Rose Garden.

Cordelia came up to Carolina and said faintly: "He snatched Judy and Eunice. Little sister Carolina, what should we do now?"

Carolina was silent for a moment, and then said somewhat unwillingly: "Immediately inform Yang Feng of our circumstances."

It was a great humiliation for the always arrogant Carolina to have Judy and Eunice snatched right before her eyes. If it was during peace times, then she would have already lashed out against Warlock College Antalya. But now that Rose Garden practically stood on the opposite side of the 5 Great Warlock Groups, there would be no point to it.

Without arguing, Cordelia took out a communication magic box and narrated Yang Feng their circumstances.

Underground world, inside the City of Hellions.

Yang Feng's face became ashen after listening to Cordelia's report, and he shattered the table with a slap: "Fuck, that Aldrich is really too cunning!"

Yang Feng had been suspecting that Aldrich had tempered with Eunice; therefore, he didn't dare touch her. His doubts have now been confirmed.

Aldrich was obviously monitoring Yang Feng's moves. Only after Steel City's army went on an expedition to the underground world did he make his move, capturing Eunice and Judy.

If Yang Feng's mechanical legion was stumped by the City of Dark Elves, and was forced back to the surface world, then Steel City would be in danger of suffering a pincer attack from both sides. The underground world's allied forces would have seized the opportunity for a counter-attack, while the 5 Great Warlock Groups would have also seized the chance to hit him while he was down. Steel City could have collapsed if he was the slightest bit inattentive.

Chapter 174 – Of Course I'll Save Them

Yang Feng felt a lingering fear: "Fortunately, I attacked first the City of Dark Elves, or else it would be troublesome!"

Yang Feng was already psychologically prepared when he attacked the City of Dark Elves. If he wasn't able to capture the City of Dark Elves within a short period of time, then he would dispatch the engineering robots to build a fortress in the 3rd layer of the underground world. He would mine all kinds of resources from the surroundings and build new munitions factories in preparations for a prolonged war. If Yang Feng was forced to do that, then he would now face a dilemma.

Yang Feng pondered in silence: "The City of Dark Elves, the City of Hellion; only by stationing 100,000 primary battle robots in each city will they become as steady as mountains. This means that would be left with just 800,000 primary battle robots at my disposal."

Dephilia suddenly asked, "Eunice and Judy, are you planning to go save them?"

Eunice was just a level-1 Warlock, while Judy was but a pet that Sanger Family had sent Yang Feng as a gift. For ambitious and ruthless characters, they would let them die with a straight face; they would do whatever they wanted, and nothing would ever faze them.

"Eunice is but a trifling level-1 Warlock, and Judy is just a pet. With your status, you can easily find women as beautiful as them. In terms of appearance and mannerism, Cordelia, Carolina, and Clarissa are superior to Eunice, while the dark elven Great Matriarch Shayenna is even more gorgeous."

"According to your current plight, the best approach would be to wipe out the rebellious forces of the underground world, while using the City of Hellions as a stronghold. Mine more ore veins and let your uncle refine more alchemical golems. Wait until you amass enough power, and then kill your way out of the underground world in one fell swoop. With just a decade of accumulation, no one in the entire Turandot Subcontinent would stand a chance against you." Dephilia analyzed indifferently.

Each of Dephilia's sentences was a strike at Yang Feng's heart chords. Indeed, as Dephilia had mentioned, as long as Yang Feng holed himself up in the underground world and developed for a

decade, then he could use the underground world's countless resources to build more than 10 million primary battle robots. At that point, he would have had no match in Turandot Subcontinent.

Even if it was Warlock College Antalya, Yang Feng had the confidence of taking them down a decade later. At the moment though, Yang Feng didn't have a full grasp of Warlock College Antalya.

Joana and the upper class dark elves focused their gazes on Yang Feng, awaiting his decision.

Yang Feng's eyes flickered with a ruthless glint and he said with a domineering laugh: "Hahaha. There is only a single proper choice! That is of course, to save them! I will save them! As to why? It is because they are my women! Even though Judy is just a pet, but she's my pet! Anyone who dares to touch her, will die!"

The corners of Dephilia's mouth lifted slightly, and she exposed a trace of a smile: "Well said! This is how a man should act; I would have looked down on you if you had said that you want to give Eunice and Judy up."

Dephilia was also a woman; what she loathed the most were men who'd abandon their close ones in order to achieve success. Although Yang Feng had saved her, yet she was still somewhat resentful for taking advantage of her. But at this moment, that grudge had all but vanished and she was in a good mood; she even found him to be a lot more pleasing to the eye.

A touch of appreciation flashed in Joana's pretty eyes, and she said with a light smile: "Well said! A true man doesn't abandon his women! I'll lend you a helping hand."

A trace of admiration was appropriately revealed on Shayenna's face. At the same time, she looked at Joana and said without batting an eyelid: "Sir, you're really manly. I, Shayenna, am greatly admiring of your manliness!"

Yang Feng ordered promptly: "We're giving up the City of Hellions, and are immediately returning to the surface world!"

The 900,000 primary battle robots quickly departed from the City of Hellions, before swiftly rushing towards the surface world.

Along with the echoing of rumbles and the great tremors, the 900,000 robots surged towards the surface world like a steel flood; leaving a broken City of Hellions behind.

The Pantheon Hellion Monarch watched the tide-like retreat of the 900,000 primary battle robots in confusion as he wondered inside: "Why did they withdraw so quickly? In the end, what is Steel City thinking?"

The speed at which the 900,000 robots were advancing was pushed to the brim, reaching 400 km/h. The robots had to stop every 3 or 4 hours to exchange their power source crystals and rest for 5 minutes to cool off.

18 hours later, the 900,000 primary battle robots had finally rushed out of the underground world.

Dimensional Personnel Carriers were neatly spread outside the entrance to the underground world. The battle robots were very orderly and swiftly boarded the Dimensional Personnel Carriers.

Following which, the Dimensional Personnel Carriers drove into a number of Thunder-Demon Heavy-Duty Transport Aircraft.

Finally, the numerous Thunder-Demon Heavy-Duty Transport Aircraft took off and flew towards St. Kaulin City.

Steel City's munitions factories were operating at full power, madly manufacturing a variety of battle robots, before transporting them over.

The 800,000 level-4 humanoid robots which were planed to be melted down and manufactured anew, were ordered to board Dimensional Personnel Carriers and rush towards St. Kaulin City.

Steel City had nearly squeezed out its entire military potential. A number of the Thunder-Demon Heavy-Duty Transport Aircraft unhesitatingly squandered great amounts of energy to fly to Rose Empire's iron ore warehouses, before returning with large amounts of iron ores.

Several hundred warriors had barred the road leading to Warlock College Antalya.

A convoy coming from Steel City was stopped outside the checkpoint.

The leader of the warriors barked: "This is the territory of Marquis Merton. Traitors of humanity are not welcome here! Screw off!"

"Get lost! You traitors of humans!"

"Scram, you garbage!"

"..."

The warriors spat out a number of obscenities and curses. Furthermore, a couple of archers shot their arrows at the convoy. The arrows were ricocheted after hitting the armor of a Dimensional Personnel Carrier.

<Enemy attack! The humans on the opposite side are deemed enemies, commencing cleanup!>

Level-4 humanoid bladed robots rushed out of the dimensional personnel carriers. Their figures shook, and they pounced at the human warriors at the checkpoint.

Along with miserable screams, the checkpoint was dyed in blood.

<This territory belongs to Merton Marquisdom, and these humans were soldiers sent by Merton Marquisdom. Merton Marquisdom is hostile towards our Steel City. Commencing clean up.>

Droves of bladed robots, gunner robots, and artillery robots swiftly got off the dimensional personnel carrier and rushed towards the castle beside the road.

The dimensional personnel carriers with the rest of the troops proceeded towards Warlock College Antalya.

Boom! Boom! Boom!

Along with loud artillery rumblings, the gate of Merton Marquisdom's castle was blasted apart.

The bladed robots and gunner robots seized the opportunity to rush inside. Miserable screams rang inside the castle, before quickly dying out.

Engineering robots entered the Merton Marquisdom's castle. Soon after, they left with large quantities of metal, and stored it inside the dimensional personnel carrier.

On the road heading to Warlock College Antalya; according with Warlock College Antalya's orders, countless forces, both large and small, began to obstruct the advance of Steel City's army.

All the human forces, both large and small, were completely destroyed by the level-4 robots – all their assets and metals looted.

Wherever Steel City's army passed, it would sweep everything before them. Countless human forces, both large and small, were directly uprooted, leaving everything of theirs to Steel City. To maintain the order, Steel City would leave behind a few level-4 robots every time a force was destroyed. The variety of metal scraped from those places was enough to manufacture hundreds of level-4 robots.

If Yang Feng wasn't wary of Warlock College Antalya, then he would have long since sent his mechanical legion to sweep the forces belonging to Warlock College Antalya, and take control of them. But since he had already shed all pretenses, he had no longer any apprehensions; therefore, he began to nibble on Warlock College Antalya's forces.

Two days later, outside of St. Kaulin City.

The huge mechanical legion stretched for more than 100 kilometers, nearly surrounding St. Kaulin City.

A panic pervaded St. Kaulin City. In the past several millennia, this was the first time that someone had led troops to attack St. Kaulin City.

Even the underground world's allied forces didn't dare to push the front line towards St. Kaulin City; they didn't want to provoke Warlock College Antalya.

"Aldrich, come out. Didn't you want to see me? I, Yang Feng, have come!" Yang Feng's voice came from the center of the mechanical legion.

Yang Feng's crazily magnified voice via powerful loudspeakers echoed throughout St. Kaulin City.

"Yang Feng, the one I wanted to see is not you, a kid who is steel wet behind the ears, but your uncle, Yang Ye."

A mighty pressure swept out from the depths of Warlock College Antalya, shrouding the earth. Simultaneously, as if coming from the heavens, a voice shook the area and completely suppressed Yang Feng's words just now.

Yang Feng gave a chuckle, then a trace of a cold glint flashed past his eyes, and he said harshly. "My uncle had no time; therefore, I came in his stead. Besides, I also brought Steel City's mechanical legion along! Return Eunice and Judy to me, and I'll immediately lead my troops back; otherwise, today is the day that your Warlock College Antalya disappears from Turandot Subcontinent!"

Aldrich said lightly: “My Warlock College Antalya stands upright in Turandot Subcontinent for nearly ten thousand years, while all our enemies are dead. I would like to see what gives you the confidence of breaching our Warlock College Antalya! If you’re truly capable of this feat, then I’ll return them to you!”

Chapter 175 – Attacking St. Kaulin City (I)

Yang Feng’s eyes shifted and he contemplated for a moment, and then said provokingly: “Since your Warlock College Antalya claims to be one of Turandot Subcontinent’s 6 hegemons, then do you dare to come out of St. Kaulin City and battle it out with my Steel City? If you don’t dare, then it’s prove that Warlock College Antalya’s reputation is undeserved, and that you’re a group of good-for-nothings who only know how to rely on the power of their predecessors. Moreover, St. Kaulin City wasn’t even established by Warlock College Academy!”

St. Kaulin City was established by the ancient Warlocks, and was later occupied by the first generation of Warlock College Antalya. It had been Warlock College Antalya’s inheritance from the day of its conception to this day.

Aldrich said calmly: “It’s no use. I’m staying right where I am. If you have the ability, then capture St. Kaulin City. At that time, I’ll naturally return Eunice and Judy to you. But if you can’t capture St. Kaulin City, then I’ll burn them to death right in front of you.”

Unlike Dephilia, who was hard working and had not much worldly experience, Aldrich had went through countless hardships and had stepped on the bodies of countless geniuses, before he finally reached the position of Warlock College Antalya’s Dean. There was simply no way such an old freak would be incite.

Even though the level-3 Warlocks standing behind Aldrich disagreed with his decision, but they didn’t dare to refute him.

Warlock College Antalya had a total of 4 Great Warlocks. With 2 of the Great Warlocks falling in Black City, Warlock College Antalya had only Aldrich and another Great Warlock left. Thus, as Warlock College Antalya’s Dean, Aldrich had nearly all of Warlock College Antalya’s power under his control; while the other Great Warlock, Holden, fundamentally couldn’t compete with him.

Always cool-headed and callous, that was precisely how Warlock College Antalya’s Dean, Starlight Aldrich, was.

“He actually came! He should know how powerful Warlock College Antalya is, yet for my sake, he still came. In his mind, I’m not just some lowly bitch.” While standing beside Aldrich, traces of her being moved emerged in the depths of Eunice’s bewitching eyes.

The World of Warlocks was exceedingly cruel. In order to get the trace of a chance at upgrading their power, Great Warlocks like Aldrich would butcher their families to extract their bloodline. Warlocks, who would do anything for power, were not rare in the World of Warlocks.

Eunice had grown up in such an environment; and so, her mentality was somewhat distorted and perverted. But when she saw Yang Feng recklessly launch an attack at Warlock College Antalya for her sake, it pulled at her heartstrings.

Judy's pretty eyes also revealed a trace of her being moved, and two rows of sparkling tears flowed out of her beautiful eyes: "To him, I'm not just some dispensable toy."

Judy was a pet that Sanger Family had gifted Yang Feng to quench his anger. As such, Judy had always had a low self-esteem. Now that she saw Yang Feng being willing to come here and fight for her, she felt extremely moved and full of warmth.

"Then let's fight! Open fire!" Yang Feng's eyes flashed with a touch of a strange glint, and he barked.

Boom! Boom! Boom! Boom!

The artilleries roared! 20,000 artillery robots, as well as self-propelled artilleries, howitzers, rocket artilleries, and others, madly bombarded St. Kaulin City's city wall.

Above St. Kaulin City's city wall, 9 five-story-tall Warlock Towers flashed brightly, and extremely formidable fluctuations of magic shrouded the city wall.

While under the bombardment from a variety of heavy-artilleries, the steel rock of St. Kaulin City's city wall showed its might; the bombardment from the heavy artilleries, which were comparable to a level-3 area of effect spell, had just slightly caved in the city wall – before being easily restored via the effect from the spell.

The shellfire from the various heavy-artilleries crossed the city wall and reached the city, before blowing countless buildings into smithereens.

Thousands of St. Kaulin City's human warriors were either killed or injured amidst the artillery barrage.

Laser-guided bombs also flew straight into Warlock College Antalya's inner court.

At the heart of St. Kaulin City was Warlock College Antalya, and at the heart of Warlock College Antalya was the inner court. There was a large number of official Warlocks and a crowd of Warlock Towers inside the inner court. With every official Warlock that was killed, it would reduce a portion of the pushback when besieging the city.

Warlock College Antalya was one of Turandot Subcontinent's 6 hegemons. When attacking such a terrifying existence, Yang Feng couldn't afford to be the slightest bit lenient.

Red radiances were shot from the Warlock Tower in Warlock College Antalya's inner court, and then fell on the laser-guided bombs.

Boom! Boom! Boom! Boom!

As if hit by interceptor missiles, the laser-guided bombs exploded.

A seven-story-tall Warlock Tower suddenly lit up in Warlock College Antalya's inner court, appearing to be the center of the entire world. All of a sudden, the Ancient Energy Absorbing Tree in the center of the inner court started to madly extract tremendous amounts of magic energy, before pouring it into the Warlock Towers.

The Warlock Towers in Warlock College Antalya's inner court suddenly lit up, and an tremendous power pervaded St. Kaulin City in a flash.

The heavy-artillery shelling, which could cover half of a football field, was reduced to a diameter of 5 odd meters, and had its might decreased by a few dozen times.

The world-shaking irresistible artillery shelling was reduced to a tolerable degree.

Yang Feng's eyes contracted slightly: "The power of the artillery shelling has been greatly diminished! This is Warlock College Antalya's power. The ancient human warlocks, who were known for being capable of imitating all cultivation powers, were truly dreadful."

With the Astral Boundary as the fulcrum, the ancient human Warlocks searched everywhere for different planes, and established planar passageways to colonize and enslave other planes. In the process of constantly attacking different planes, the ancient human Warlocks had obtained a great amount of knowledge, and were known for being capable of imitating all cultivation powers; even the most mysterious divine power could be imitated via spells, obtaining the same result.

Obviously, the reason why Warlock College Antalya could weaken the might of the artillery barrage was because of imitating the effect of divine power.

Yang Feng frowned slightly: "It's really troublesome! Like this, the artillery shelling won't have much effect!"

The tens of thousands of heavy artilleries continued to shoot a variety of artillery barrage, bombarding St. Kaulin City, yet it had no effect what so ever. It was just a waste of energy and ammunition.

Yang Feng contemplated: "It's not without effect. If it continues like this, then it'll become a contest of consumption. The other side has an Ancient Energy Absorbing Tree, while my side has a large number of nuclear power plants; its unknown who's gonna be the winner if this stalemate persists.

Warlock College Antalya used the power of the Ancient Energy Absorbing Tree to greatly weaken Yang Feng's artillery barrage. In order to use the Ancient Energy Absorbing Tree, Warlock's spirit force needed to be consumed to act as a conductor.

If this stalemate persisted, then it would result in a contest of consumption, which would be rather detrimental to Yang Feng.

It should be kept in mind that Steel City was currently the subcontinent's enemy. Once a stalemate took place, then the underground world's allied forces and the other 4 Great Warlock Groups would take this chance to raid Yang Feng's base, and destroy all the munitions factories. Once that happened, then defeat would be right around the corner. At that time, the best outcome would be to flee to the underground world, and prolong the death throes.

This battle against Warlock College Antalya would determine the general trend of the world. If Yang Feng won, then Steel City would dominate Turandot Subcontinent, before slowly swallowing all other forces. But if Yang Feng lost, then he would be chased away like a stray dog. He would have a hard time finding a place of his own.

Yang Feng muttered irresolutely for a moment, and then waved his hand. Suddenly, 10 Falcon Heavy-Duty Assault Helicopters rose into the sky, and then quickly flew towards St. Kaulin City.

The 10 Falcon Heavy-Duty Assault Helicopters had just reached a distance of 200 meters from St. Kaulin City, when flame arrows were shot from the 9 Warlock Towers above St. Kaulin City's city wall, and hit the 10 Falcon Heavy-Duty Assault Helicopters.

The 10 Falcon Heavy-Duty Assault Helicopters immediately exploded, turned into 10 fireballs, and fell from the sky.

"Attack!" Yang Feng expressionlessly waved his hand and commanded.

Like a tide, 10,000 level-8 beast-type bladed robots led 100,000 humanoid battle robots in a charge at St. Kaulin City.

The 9 Warlock Towers located on St. Kaulin City's city wall flashed brightly. The fire elemental particles churned and turned in the sky, brewing an immense fire-attributed meteorological spell.

"Dispel!"

A cold glint flashed through Dephilia's beautiful eyes; she pointed with her lily-white hand at the sky, and cast a Dispel.

The tremendous amount of fire elemental particles collapsed under Dephilia's Dispel.

The 9 Warlock Towers flashed brightly once more, and fluctuations of earth-attributed magic covered the land.

The land in front of St. Kaulin City wriggled and decayed, before turning into a bottomless bog emitting a foul stench.

Once the various battle robots sank into the bottomless bog, they had to struggle to move.

"Dispel!"

"Dispel!"

"..."

The dark elven Wizards, whom Yang Feng had brought from the City of Dark Elves, immediately dispelled the bottomless bog.

"Dark elves!! Those are dark elven Wizards!"

"Dark elves! The dark elves are actually collaborating with him! This Yang Feng is simply too vile, and even death couldn't atone for his crimes!!"

"Oh heavens, this beast is actually collaborating with the dark elves! Truly a traitor of humanity!!"

"..."

Within Warlock College Antalya, Warlocks who had been observing the battle via Magic Eyes were both startled and angered when they saw the dark elven Wizards next to Yang Feng, before roaring madly and exposing their unsightly sides.

5 Great Warlock Groups, with Warlock College Antalya among them, had falsely accused Steel City of colluding with the underground world's allied forces. But now that they saw that Yang Feng actually collaborating with the dark elves, they immediately became both startled and angered. They were filled with fear.

Chapter 176 – Attacking St. Kaulin City (II)

Aldrich, who had been all along extremely calm as if nothing could faze him, had a slight change in his complexion, and a touch of graveness flashed past his eyes: "The dark elves are actually on its side! Could the City of Dark Elves already been conquered by it? But even if the City of Dark Elves was conquered, it still wouldn't be easy to subdue the dark elves. What's going on? Previously, had Steel City really been in cahoots with the dark elves?"

After the bottomless bog had vanished, the battle robots dug their way out of the ground and rushed towards St. Kaulin City.

Holes opened above special protrusions about St. Kaulin City, from where the muzzles of magic artilleries extended.

St. Kaulin City's magic artilleries 10 meters long, had countless mysterious and profound runes carved on them, and were manufactured from large amounts of magic metal and mithril. The manufacturing price of each magic artillery was more than 50 million magic stones.

Each magic artillery had 36 power source sockets, where mid grade and/or high grade magic stones could be inserted, thus adjusting the might of the magic artillery.

Currently, 36 high grade magic stones were embedded in the magic artilleries. When hit by such a magic artillery, its destructive power could even heavily injure a Great Warlock.

Along with bright flashes, St. Kaulin City's 500 magic artilleries instantly fired.

500 tremendous radiances instantly hit the mechanical legion dispatched by Yang Feng, before detonating into a frightening explosion and swallowing the mechanical legion dispatched by Yang Feng practically in its entirety.

When the light from the explosion faded, more than 95% of the 110,000 strong mechanical legion dispatched by Yang Feng had been turned into a wreckage; countless components were scattered everywhere.

The dark elven Wizards standing next to Yang Feng had their complexions turn pale, their beautiful eyes flickering with fear.

Joana gave a faint sigh, and a peculiar glint flashed past her beautiful eyes: "Those military weapons are so powerful! Turandot Subcontinent's 6 Great Warlock Groups are really deserving of their reputations."

"Haha, Steel City's mechanical legion only amounts to this much!"

"That's right, they're but a pile of wreckage before our magic artillery!"

“Even if Steel City has 1 million alchemical golems, you still will never defeat Warlock College Antalya!”

“...”

Warlock College Antalya’s upper echelons revealed traces of smiles and commented overbearingly, as they observed the battlefield via Magic Eyes.

Boom! Boom! Boom!

But in the next moment, Yang Feng’s counterattack had arrived. The overwhelming artillery shelling, while under Portable Fortified Stronghold extremely precise calculations, had bombarded Warlock College Antalya’s magic artillery.

With Warlock College Antalya not having its base attacked for the last several millennia, there was a serious lack in terms of defensive experience; and so, no Warlocks were arranged to protect the magic artilleries. While under the concentrated artillery barrage, the 500 magic artilleries were instantly blasted into pieces. Simultaneously, when the magic stones were hit by the barrage, they were blasted apart. The detonation of the magic stones’ energy led to their explosions.

Huge explosions sounded above St. Kaulin City’s city wall. The astonishingly valuable 500 magic artilleries were wrecked by Yang Feng’s artillery fire.

“Fucking Yang Feng, how dare he do this!”

“How dare he wreck our magic artilleries!!”

“This damned beast!!”

“...”

As if being slapped in the face, the upper echelons of Warlock College Antalya scolded and cursed with ashen complexions.

The 500 magic artilleries, with each being worth more than 50 million magic stones, were extremely valuable. The 500 magic artilleries were worth more than 25 billion low grade magic stones. This Warlock College Antalya’ heritage, which had been accumulating for several millennia, was now wrecked by Yang Feng in a single exchange. Warlock College Antalya’s upper echelons hated Yang Feng’s guts.

Aldrich’s countenance had also become exceedingly unsightly.

During the artillery barrage, 5,000 engineering robots swiftly arrived at the battlefield, and quickly started gathering the remains of the destroyed robots, before throwing them into the wreckage recovering vehicles. The wreckage was then quickly transported towards the rear.

Yang Feng waved his hand. 10,000 level-8 battle robots formed a legion in tandem with 100,000 level-4 humanoid robots, and proceeded to attack St. Kaulin City.

Inside St. Kaulin City, there was a variety of elite Knights which Warlock College Antalya had conscripted from Southern States Coalition – their numbers reaching up to 1 million.

When the battle robots were seen approaching, the 9 Warlock Towers above St. Kaulin City's city wall flickered brightly, and large areas of effect spells blessing agility, power, physical strength and spirit fell onto the human experts above the city wall.

Once the human Knight-rank experts received the magical blessings, their strength immediately soared. They were brimming with courage.

Human experts proficient in archery drew their enchanted arrows, and then shot them at the mechanical army.

Although humans were not as good as dark elves, who were born with a powerful innate gift for archery, but human population was hundreds of times larger than that of dark elves. The human experts inside St. Kaulin City were rarely seen experts, their archery not the slightest bit inferior to dark elves'.

The arrows dropped from the sky and shot into the midst of the mechanical legion. A lot of arrows had directly ran through the heads of the level-4 humanoid robots, nailing them to the ground.

The archery of the humans inside St. Kaulin City was extremely tyrannical, yet the robots' resistance towards the arrows was exceedingly high. A lot of level-4 humanoid robots covered in arrows, like hedgehogs, still continued to charge at St. Kaulin City.

The level-4 gunner robots madly swept towards the human experts above the city wall with their gauss rifles.

Under the dense hail of bullets, a large number of human Knight rank experts were hit by the gauss bullets, and then fell from the city wall.

The marksmanship of the level-4 gunner robots was exceedingly accurate, forcibly suppressing the human archers above the city wall to the point that they didn't even dared crop up their heads.

Once the crowd of battle robots neared the edge of St. Kaulin City's moat.

The water of St. Kaulin City's moat was drawn from Poway River, it was up to 60 meters wide and 100 meters deep, and had turbulent waves. No matter how many lives were to be thrown into the moat, it would still seem bottomless.

Once the 5,000 engineering robots arrived before the moat, they quickly built wide pontoon bridges extending towards St. Kaulin City's city wall.

Once the pontoon bridges were built, the crowd of battle robots swiftly followed them right until below St. Kaulin City's city wall, and then like spiders, frantically climbed the city wall.

Aldrich showed a slight smile, and waved his hand: "Idiot!"

As if huge legendary flood dragons, Krona White-Scaled Boas covered in white scales suddenly rose from the moat and ferociously bumped into the steel pontoon bridges.

Adult Krona White-Scaled Boas were level-2 extraordinary life forms. With their frightening brute strength, once they hit the steel pontoon bridges, they directly sent them into the air.

The crowd of battle robots was carved into two groups. About 10,000 battle robots were climbing St. Kaulin City's city wall, 10,000 were directly drawn into the moat, and 90,000 were trapped on the other side.

Among the battle robots which were stopped on the other side of the moat, the gauss cannons of the level-8 gunner robots rumbled, and countless gauss shells bombarded the Krona White-Scaled Boas.

Flesh and blood flying, the Krona White-Scaled Boas were being blasted by the level-8 gunned robots, before turning into corpses and falling into the moat.

The remaining Krona White-Scaled Boas rushed ashore with crimson eyes. An extremely strange snake hiss arrived from St. Kaulin City, and the Krona White-Scaled Boas withdrew into the moat.

Human Knight rank experts raised huge stones, and smashed them against the robots climbing the city wall. When hit by the huge stones, the battle robots climbing the city wall were knocked into the moat.

The waves in the moat churned, the battle robots which fell into the moat had lost contact with Yang Feng, obviously destroyed. They sank to the bottom of the river.

Yang Feng's eyebrows wrinkled slightly when he saw the outcome.

Battle robots which had been destroyed on the battlefield, as long as their wreckage was gathered, would be very quickly manufactured anew by Yang Feng, before being once more thrown into the battlefield, becoming the enemy's nightmare. However, these battle robots were sunk in the moat; therefore, they couldn't be reformed before Warlock College Antalya was defeated. Moreover, the Krona White-Scaled Boas had cut off Yang Feng's path of attack, greatly inconveniencing him.

Shayenna suddenly gave a laugh: "Sir, are you being troubled by the Krona White-Scaled Boas? I have a trick to deal with them!"

Yang Feng's eyes lit up and he said: "What trick? Spill it out!"

Shayenna took out a crystal vial with a black elixir, and chuckled: "This is Demon Grave Poison, it's a highly poisonous mixture of the soil from a demon's grave and the 9-Leafed Portman Flower's juice. Just a drop of it is enough to poison any life form inside the moat."

The soil from a demon's grave was soil formed by merging the blood essence of fallen ancient demons, who's strength was comparable to that of gods, with the land. This soil was highly poisonous to many life forms. The 9-Leafed Portman Flower was a rare flower with therapeutic effects produced in the underground world. Once both of them were mixed together, it would give birth to a horrifying poison.

Among the underground world's races, dark elves were known for being great experts in using poisons. They often used poison in assassinations. Therefore, in terms of poison research, they had no equals in the underground world.

Chapter 177 – Attacking St. Kaulin City (III)

"Excellent." Yang Feng showed a trace of a satisfied smile. He waved his hand, and a humanoid robot took the vial of elixir from Shayenna.

The 200 shielded robots protecting Yang Feng went all out, and frantically rushed towards St. Kaulin City's moat with a terrifying speed of 400 km/h.

While under the fire cover from the battle robots, the battle robots climbing the city wall were quickly climbing to the top. After paying the price of 1,000 battle robots crashing to the ground, they finally jumped on top of the city wall.

Above the city wall, once the large number of human Knight rank experts saw the level-4 humanoid robots jumping onto the city wall, they rushed forward and fought against them.

Suddenly, 30 Falcon Heavy-Duty Assault Helicopters rose into the air, their artilleries roaring – madly strafing towards the human experts above the city wall.

Under the bombardment from the 30 Falcon Heavy-Duty Assault Helicopters, hundreds and thousands of the human experts were turned into large fragments splashing about.

The 9 Warlock Towers above St. Kaulin City's city wall flashed brightly, shooting fire arrows at the 30 Falcon Heavy-Duty Assault Helicopters.

The 30 Falcon Heavy-Duty Assault Helicopters had immediately turned into 30 fireballs, before dropping to the ground and exploding.

Yang Feng narrowed his eyes slightly as he thought: "The Warlock Towers are really troublesome; they're worthy of being one of humanity's strongest defensive weapons."

Warlock Towers were one of humanity's strongest defensive weapons. In human history, there were several crucial battles where the survival of the race was on the line. It was all due to the Warlock Towers struggling madly and blocking the enemy's offensive, that they got a chance to take a breather and ultimately acquire victory.

Warlock College Antalya succeeded a base of the ancient Warlocks. With the extremely formidable defensive strength of the Warlock Towers, St. Kaulin City had never been breached in a frontal assault.

The reason why Aldrich was so adamant about forcing Yang Feng to bring the fight to St. Kaulin City, was to use defense as a means to defeat the enemy, to wipe out Steel City's main forces in one fell swoop in St. Kaulin City, then to constrict Steel City's lebensraum, and ultimately to annihilate it.

When the mechanical legion was madly engaged with St. Kaulin City's human experts, the humanoid robot had eventually reached St. Kaulin City's moat under the protection of the shielded robots, and then poured the Demon Grave Poison into the moat.

Once a few drops of the Demon Grave Poison were dropped into the moat, the clear and transparent moat was immediately become as black as ink, and started emitting a foul stench.

The water of St. Kaulin City's moat immediately surged. Krona White-Scaled Boas thrashed madly and issued extremely mournful hisses, splashing the moat's water about.

Soon after, the moat stopped churning, and the corpses of the Krona White-Scaled Boas floated up in the moat. Apart from the Krona White-Scaled Boas, large amounts of dead fish, shrimps, tortoises, and crabs floated up in the moat, painting an image from hell.

“So poisonous!!”

“Such a scary poison!”

“Dark elves, fuck, it’s definitely those whores’ doing! They are proficient in the refining of all kinds of highly poisonous elixirs.”

When Warlock College Antalya’s Warlock saw this, they started to curse through clenched teeth.

The engineering robots came forward once more and built pontoon bridges leading to St. Kaulin City.

The pontoon bridges were just finished, when fire arrows were fired at them from the 9 Warlock Towers.

The newly built pontoon bridges were destroyed by the 9 Warlock Towers, and collapsed.

Hum! Hum! Hum! Hum!

The distinctive roaring sounds from bombers flying came from the sky.

As if raindrops, countless bombs dropped from the sky, and extremely accurately fell towards the Warlock Towers down below.

A very strange hurricane swept from the 9 Warlock Towers, forming a storm, and sweeping the countless bombs towards the mechanical legion.

The various bombs instantly exploded in the midst of Yang Feng’s mechanical regiment, blasting the battle robots into countless pieces.

“Dispel!”

The two Great Warlock rank experts, Dephilia and Shayenna, launched Dispel on the 9 Warlock Towers, dispelling the spells released by them.

Boom! Boom!

Under the bombardment from the cluster bombs, bunker buster bombs, sonic explosives, incendiary bombs, and a variety of other bombs, the 9 Warlock Towers were plunged into a sea of flames. Inside the Warlock Towers, all of the Apprentice Warlocks and a lesser half of the official level-1 Warlocks had died.

However, even though the 9 Warlock Towers were under the bombardment from the Colossus Heavy-Duty Bombers, but they still weren’t crushed, they stood tall and mighty amidst the explosions.

Suddenly, up to 10 meters long Mandala Winged Snakes with a pair of wings, and a single horn on their heads flew out of Warlock College Antalya’s inner court, and rose high into the sky.

Adult Mandala Winged Snakes were level-2 extraordinary life forms with the terrifying power of wind elemental particles manipulation. They were airborne weapons carefully bred by Warlock College Antalya, which could freely soar in the sky.

1,500 Mandala Winged Snakes under the lead of a level-3 extraordinary life form rank Mandala 4-Winged Snake soared into the sky, heading towards the Colossus Heavy-Duty Bombers flying at a high altitude.

The the spell casting range of the level-3 Warlocks from inside the Warlock Towers was insufficient, and they couldn't hit the Colossus Heavy-Duty Bombers flying at the high altitude of 5,000 meters.

Once the Mandala Winged Snakes reached the high altitude of 2,000 meters, they saw thousands of Lightning Supersonic Fighters rushing towards them.

Artilleries roared and wind streams raged.

Lightning Supersonic Fighters dropped from the sky, exploded and turned into fireballs. Mandala Winged Snakes also fell to the ground, turning into meat paste.

A cruel and fierce airborne battle broke out above St. Kaulin City.

The Mandala Winged Snakes were extremely fierce, but the thousands of Lightning Supersonic Fighters were much more powerful than them. After a bout of fierce fighting, the Mandala Winged Snakes showed signs of decline, their numbers ever decreasing.

With the suppression in the sky, the Colossus Heavy-Duty Bombers continued to throw all kinds of bombs. The 9 Warlock Towers could only cast defensive spells to barely defend themselves; therefore, they were no longer capable of suppressing the mechanical legion down below.

The engineering robots swiftly built steel pontoon bridges, allowing the battle robots to cross the moat and then to climb the city wall.

Suddenly, along with an angry bellow, an extremely brutal black dragon rose from Warlock College Antalya and flew into the sky.

Shayenna's pretty face changed slightly, and she warned: "That is Tyrannical Black Dragon Anthony! The Black Dragon Tower has also joined this battle!!"

The Tyrannical Black Dragon Anthony was Black Dragon Tower's Tower Master. Since he had appeared, it proved that the Black Dragon Empire had also joined the battle in order to destroy Steel City in one go.

Once Tyrannical Black Dragon Anthony flew into the sky, the remains from the Lightning Supersonic Fighters continuously dropped from the sky, before exploding.

The Lightning Supersonic Fighters' fighting strength was extremely frightening, but in front of a Turandot Subcontinent's powerhouse like Tyrannical Black Dragon Anthony, they still looked vulnerable.

Suddenly, 300 magic artilleries emerged around the St. Kaulin City, before flashing brightly, and instantly firing 300 magic radiances at Yang Feng's mechanical legion.

Along with heaven-shaking explosions, more than 90% of the mechanical legion in the vicinity of the St. Kaulin City was destroyed.

Yang Feng's eyebrows wrinkled slightly, and he waved his hand. A counter attack was launched in a flash.

Tens of thousands of heavy artilleries instantly launched a salvo, firing at the 300 magic artilleries.

Only this time, level-3 Warlocks from the Black Dragon Empire stood in front of the 300 magic artilleries. The level-3 Warlocks from the Black Dragon Empire cast defensive spells, intercepting the shellfire.

Originally, even level-3 Warlocks wouldn't be capable of intercepting the bombardment from Yang Feng's heavy artilleries. If level-3 Warlocks were so daring as to face the bombardment from the heavy artilleries; then ultimately, they would deplete their spirit force, and then die without leaving any remains behind. But after the heavy artillery shellfire was weakened by Warlock College Antalya's spell, its might was reduced to such a degree, that Black Dragon Tower's level-3 Warlocks could easily withstand it.

Aldrich said lightly: "Yang Feng, from the moment you were drawn here by your two women, it was destined that your Steel City would loose! This is not a battle between the Warlock College Antalya and Steel City, but a battle between the Turandot Subcontinent's humans and the traitors of humanity.

Aldrich reached out and a huge magic screen suddenly condensed above the St. Kaulin City.

The image on the magic screen was that of the Gold Sand City, a city belonging to the Steel City's sphere of influence.

At this moment, flames and smoke were rising from the Gold Sand City, with traces of destruction everywhere. A crowd of Warlocks were urging all kinds of extraordinary life forms to frenziedly massacre the Gold Sand City's humans.

Flames rose from the munitions factories inside the Gold Sand City, explosions ringing constantly.

An exceedingly savage Behemoth barged about the Gold Sand City, ripping all the battle robots baring its way to shreds.

As if detecting something, the extremely savage Behemoth turned its head. Its eyes flickered with an extremely savage radiance, and it snarled: "Yang Feng, you idiot! You actually went out with Steel City's main forces! You're screwed. Savage Claw will destroy all of Steel City's munitions factories, and severe your supply of military forces! After this battle, you and your uncle, I'll pull out your tendons, skin you, chop you to pieces, and then feed you to my dogs!"

"Kill!"

"Kill!"

"Kill!!"

In the surroundings of the broken munitions factories, savage extraordinary life forms issued angry bellows. They were the Savage Claw's Warlocks morphed into powerful being.

Chapter 178 – Nuclear Explosion, Breaching The City

Seeing this scene, the pretty complexions of Shayenna and the dark elven experts changed slightly.

Shayenna had an unsightly expression as she whispered: "That's Behemoth Claw Konrath, the leader of Savage Claw."

There were already countless experts from Warlock College Antalya and Black Dragon Tower inside St. Kaulin City, protecting it. Now that the munitions factories in the rear had been taken down by Savage Claw, Yang Feng was in a dilemma. As long as he took the wrong step, it would be his undoing.

"As for your reinforcements!" Aldrich gave a faint smile, reached out, and the image above the magic screen changed.

The magic screen displayed 500 odd level-4 battle robots torn into countless pieces. Next to the battle robots stood a handsome golden-haired and blue-eyed middle-aged man with a tall and sturdy figure.

Shayenna's pretty countenance changed and she exclaimed: "That's Steel White Elephant Haris, White Elephant Ivory's Tower Master!"

Haris turned towards Yang Feng and said with a smile: "Yang Feng, all your reinforcements are being intercepted by me! I'll lead all of White Elephant Ivory's Warlocks and attack you from the rear after wiping out all of your reinforcements. Without backup, you're destined to die here."

The image in the magic screen above St. Kaulin City kept swiveling, displaying the remains of level-4 battle robots as well as the remains of various munitions factories.

Regardless of status, the peak Warlocks from Savage Claw and White Elephant Ivory were destroying the mechanical legion reinforcements and the munitions factories all over.

Aldrich had only given Yang Feng two days time, he didn't want for the mechanical legion to gather in its entirety. Through this method, the experts from Savage Claw and White Elephant Ivory could now easily wipe out Yang Feng's reinforcements and severe his logistics.

To weaken one's opponent through a variety of means, to seek success regardless of means, that was Starlight Aldrich's style.

Shayenna's pretty face changed slightly, and she reminded: "Sir, Lets call it a day! Our preparation are not adequate. Lets retreat to Steel City. We should wait until the time is ripe to once more send our troops, settling them in one go. You've already done enough for Eunice and Judy. If You're defeated here, then there will be no one to take revenge for them."

Dephilia also sighed faintly, and a touch of unwillingness flashed past her pretty eyes: "Yang Feng, I also agree with Shayenna's proposal. If it cannot be done, then don't deplete your power needlessly."

"Yeah! There is a proverb in the east of the World of Warlocks, he who has health has hope. Sir, let's withdraw first!"

"That's right. We should retreat first, bide our time a few years until our army is powerful enough, and then use all our forces to get rid of them."

"Women, how many of them do You want? Sir, we, dark elves, have no shortage of beautiful women. As long as You want to, then everyone is willing to service You. But let's withdraw first!"

"..."

The dark elven upper echelons had wavering expressions as they persuaded Yang Feng, they didn't want to die here.

A resolute glint flashed past Yang Feng's eyes, and he said solemnly: "There's no need to say more, I've already decided! We need to breach Warlock College Antalya by today! As long as Warlock College Antalya is breached, then all our problems will be solved."

The people standing beside Yang Feng looked at each other, traces of disapproval flashing past their eyes. Warlock College Antalya's base was built by the ancient Warlocks, how could it be so easily conquered?

Dephilia was pleased to hear that, but she felt also puzzled. Complex feelings interwove within her beautiful eyes.

Yang Feng suddenly gave an order: "Pass my order, everyone is to immediately retreat 30 kilometers!"

After hearing the order, the battle robots quickly retreated.

"Are they retreating? Or luring the enemy?"

Aldrich was full of doubts when he saw this, yet he didn't send people to chase. Warlock College Antalya could not defeat Yang Feng's mechanical legion in field warfare; and even if Great Warlocks were dispatched, it was not like Yang Feng had no Great Warlock rank experts of his own.

"They are retreating? This seals my fate!" Hopelessness flashed past Eunice's beautiful eyes, and she gave a faint sigh.

As per Yang Feng's orders, the mechanical legion withdrew until a distance of 30 kilometers from Warlock College Antalya before stopping.

Everyone was somewhat at a loss regarding Yang Feng's order, and some dark elven upper echelons' eyes even revealed glints of disdain as they looked at Yang Feng. Dark elves only respected the strong; therefore, Yang Feng's decisive retreat made most of them look down on him.

Yang Feng took out a pair of sunglasses, put them on, then looked in the direction of the distant Warlock College Antalya, and ordered faintly: "Detonate!"

Boom!

The nuclear warheads mounted by Phantom Assassins below St. Kaulin City's 9 Warlock Towers instantly exploded, before an endless amount of light and heat engulfed St. Kaulin City's 9 Warlock Towers in a flash.

A horrifying shock wave instantly devastated St. Kaulin City.

All hell had broken loose. The more than 1 million Southern States Coalition's Knight rank experts were engulfed by the terrifying shock waves above St. Kaulin City's city wall, they were turned into ashes by the endless amount of light and heat.

The 300 magic artilleries and the more than 300 Black Dragon Tower's level-3 Warlocks guarding in front of them were also directly vaporized and turned into ashes.

“No!!”

Aldrich’s cry of dismay came from the sky.

The magic screen above St. Kaulin City had collapsed in a flash.

Warlock College Antalya’s inner court, inside the seven-story-tall Warlock Tower.

“Aldrich!!”

The Great Warlock Holden’s eyes suddenly widened from anger, and he issued a heart-wrenching roar, before his body instantly exploded – turning into countless fragments of scattered earth.

Inside the seven-story-tall Warlock Tower, in the moment when Holden’s body had exploded, all the other Warlocks also had their bodies blow apart.

The weakening spell comparable to divine power covering the entire St. Kaulin City was managed by the Warlocks inside the seven-story-tall Warlock Tower. Immediately after the spell was destroyed, the Warlocks inside the Warlock Tower had suffered a backlash.

The Ancient Energy Absorbing Tree was also affected. A lot of the branches had fallen down from the huge tree; clearly, it had also suffered heavy injuries.

The Colossus Heavy-Duty Bombers in the sky were also shrouded by the aftermath of the the nuclear explosion. As if raindrops, they fell to the ground, before bursting into flames.

The Lightning Supersonic Fighters were also affected. They dropped from the sky, and then exploded.

Tyrannical Black Dragon Anthony morphed black dragon, who was in a high from the killing in the sky, was also affected by the shock waves from the nuclear explosion – he spat out a big mouthful of blood.

Motionless just like a stone, the Mechanical Black Dragon hidden in the clouds suddenly opened its eyes, an ominous glint flickering in its electronic eyes. It dropped from the sky, opened its bloody maw, and fiercely bit at the Tyrannical Black Dragon Anthony morphed black dragon’s neck, before vigorously tearing off a large chunk of flesh.

“Fuck! Stinking golem, break for me!” Anthony gave a furious roar, and ferociously whipped at the Mechanical Black Dragon with his tail, sending the strongest mechanical battle beast under Yang Feng’s control flying for more than a dozen meters.

After the Mechanical Black Dragon was sent flying for more than a dozen meters, it flapped its wings, and flew towards Anthony.

“Aldrich, you good-for-nothing!!”

Anthony looked down below, at the place where the 9 Warlock Towers and the 300 Black Dragon Tower’s level-3 Warlocks used to be yet were no mere, then faced the sky and gave a roar full of grief and indignation. He cast a spell, turned into a black light, and quickly fled in the direction of Black Dragon Tower.

“This Anthony is quite the resolute one! This old ghost is really difficult to kill!!”

In the clouds, the space distorted; following which, Carolina emerged slowly. She looked at the fleeing Anthony in the distance, and sighed faintly.

According to Yang Feng's plan, Carolina should have appeared when Anthony and Aldrich were battered, reaping Anthony's life in one fell swoop. But Anthony was extremely cunning, he immediately escaped after seeing that things were going awry.

Carolina didn't have the ability to make Anthony stay behind when he wanted to leave.

Carolina looked down at St. Kaulin City, and fear flashed past her beautiful eyes: "St. Kaulin City was actually breached! The power of those weapons is truly terrifying!"

St. Kaulin City's defensive strength was exceedingly terrifying. Even if it was Carolina who wanted to destroy the 9 Warlock Towers located above the city wall, she would still find it exceedingly challenging. Unless there was a mole; otherwise, it was practically impossible to breach the city.

However, St. Kaulin City, which was renowned for being unconquerable, was actually breached by Yang Feng. Carolina had mixed feelings about it, because it meant that even St. Rose City might not withstand the offensive from Yang Feng's mechanical legion.

"What is this power?"

"It's too terrifying! Is this the power of the gods?"

"It's too scary! Such destructive strength, it's just too scary."

"..."

The dark elven experts were dumbstruck when they saw this scene, not daring to believe their eyes. Their ears were hurting badly because of the shock wave. Were it not for the level-8 shield robots opening their defensive covers to protect them, then by now, they would definitely be seriously injured.

Shayenna was gobsmacked, her pretty eyes full of reverence as she looked at Yang Feng: "It's too scary!! Such a destructive might, perhaps only when giving their all might gods be capable of accomplishing the same."

Shock flashed past Dephilia's beautiful eyes: "Such terrifying weapons! Such weapons are simply too scary. No wonder 18 Great Warlock rank experts had fallen in Black City."

Joana was equally gobsmacked, her pretty eyes brimming with shock and fear: "Fortunately, I had chosen to surrender. Otherwise, once he used those weapons, an untold amount of dark elves would have died. The entire City of Dark Elves would not be enough to kill him."

Chapter 179 – Entering The City

Yang Feng ordered faintly: "Enter the city!"

Alike ants, 200,000 level-8 battle robots along with 2 million level-4 humanoid robots swiftly moved towards St. Kaulin City.

Even though St. Kaulin City's 9 Warlock Towers were already destroyed, Yang Feng was still apprehensive of carelessly dispatching all his troops.

As a base constructed by the ancient Warlocks, plus Warlock College Antalya's several millennia of accumulations, it was unknown how many trump cards St. Kaulin City had. If the mechanical legion was to enter in its entirety, then were to be hit by a formidable spell and turned into ash, by then, Yang Feng would have nothing left to do, except lament his stupidity.

While under the protection of 100,000 battle robots, Yang Feng personally entered St. Kaulin City. Anyway, even if this avatar were to be eliminated, he still had countless avatars replace it with.

"St. Kaulin City is really something, it could even withstand an nuclear explosion." As soon as Yang Feng entered St. Kaulin City, he couldn't help but to constrict his gaze slightly.

The explosion from the 9 nuclear warheads had merely destroyed more than half of St. Kaulin City's city wall. Meanwhile, while St. Kaulin City was covered in a protective spell, the might of the nuclear warheads was weakened greatly and had just extended 500 meters into the city. Miraculously, St. Kaulin City was intact after the nuclear explosion, with only its city wall destroyed and its garrison annihilated.

Practically the entire garrison in the vicinity of St. Kaulin City's city wall was eliminated by the 9 nuclear warheads in one fell swoop. Yang Feng directly marched into the city, before heading towards the inner court.

Warlock College Antalya's inner court was the core of St. Kaulin City. Once the inner court was captured, then St. Kaulin City would fall into Yang Feng's hands. But if the inner court was not captured, then even if Yang Feng were to occupy St. Kaulin City, it still wouldn't amount to much.

While under the protection of the huge mechanical legion, Yang Feng arrived before Warlock College Antalya's gate.

Yang Feng was filled with myriad emotions as he looked at Warlock College Antalya's gate. A few years ago, he was still racking his brain about how to enter Warlock College Antalya. Furthermore, he received a blow from Scarlet Hands Blitz, and was bullied by tutor Eunice. But now, he had actually arrived before Warlock College Antalya as a conqueror, bringing along an army of countless experts.

Yang Feng looked silently at Warlock College Antalya, and then directly entered into the college.

In Warlock College Antalya's outer court, there were still some students who weren't even Apprentice Warlocks. When those students saw Yang Feng and the mechanical legion behind him, their eyes flickered with panic and fear. They surrendered.

Suddenly, an extremely excited cry came from the crowd: "Is it you, Yang Feng? It's me, Gars!"

Yang Feng followed the voice and spotted a youngster standing in the crowd. It was Gars, who had accompanied Yang Feng through Hunting Fangs Wilderness all those years ago.

"So it's you, Gars, come over!" Yang Feng smiled, and waved his hand. The battle robots gave way.

Gars had a complicated look, a touch of envy and jealousy flashing past the depths of his eyes. He exclaimed: "Yang Feng, you changed so much in the few years I haven't seen you!"

A few years later, Gars was still an outer court student in Warlock College Antalya, while Yang Feng was not only a powerful level-1 Warlock, but also a marshal of the Steel City, commanding the mechanical legion to breach St. Kaulin City. The strength and status of both parties was worlds apart, it was only natural for Gars to feel a bit strange.

Yang Feng said lightly: "Mhm! Let's catch up after I capture Warlock College Antalea's inner court."

Gars felt the pressure related to authority coming from Yang Feng; he answered involuntarily: "Okay."

The enormous mechanical legion advanced quickly, before stopping outside of the entrance to Warlock College Antalya's inner court.

"This is the entrance to Warlock College Antalya's inner court, no one is permitted entry."

The huge Molock Direwolf, Dulimuk, opened its eyes, staring at Yang Feng and the enormous mechanical legion. It barked, and erupted with a terrifying life force comparable to that of a level-3 Warlock in a flash. It absorbed the stones in its surroundings, gathering them into a thick layer of rock armor.

A peculiar glint flashed past Yang Feng's eyes, and he persuaded: "Dulimuk, St. Kaulin City was already breached by me! From this day forward, Warlock College Antalya will become history. Renounce Warlock College Antalya, and follow me, okay? I need your assistance. I'm willing to give you double the benefits you get from Warlock College Antalya!"

Dulimuk's eyes widened; it barked: "I promised my Master to guard Warlock College Antalya. Pledges issued by Molock Direwolves are not to be violated. If you want to enter the inner court, then you must step over my dead body!"

After saying that, Dulimuk suddenly jumped, and like a bolt of lightning, madly pounced at Yang Feng.

"Such a loyal wolf! Unfortunately, it's not on my side!" Yang Feng sighed lightly. In the World of Warlocks, deceptions and schemes were a common occurrence. The various extraordinary life forms and formidable beings captured from other planes and put to work by Warlocks, every single one of them thought about how to rebel against their Masters and gain their freedom.

Extraordinary life forms as true to their word as the loyal and powerful Dulimuk were rare and precious.

A dozen shielded robots suddenly raised their shields, and stepped forward to block. Layers of level-3 protective covers suddenly appeared, blocking in front of Yang Feng.

Dulimuk extended its claw in a mad strike, shattering a protective cover with its terrifying power. Simultaneous, a level-8 shielded robot's shield was caved in by the strike. The shield robot was sent flying, before bumping into another shielded robot.

Thousands of gunner robots and artillery robots opened fire in a flash. Countless shell fire bombarded Dulimuk, and countless rock fragments splattered about.

Dulimuk resisted for less than 10 seconds, before crumbling into a pile of stones under the concentrated artillery barrage.

Molock Direwolves had outstanding physical and magical resistance. However, no matter how outstanding the resistance, it still could not escape its fate while the shell fire from thousands of level-8 gunner robots and artillery robots was concentrated on it.

"It's a pity!" Yang Feng gave a faint sigh, and then proceeded towards the inner court.

A humanoid robot came forward, extracted Dulimuk's magic core, and then put it away.

Eunice and Judy had been injected with the Liquid-Metal Nano-Robot Elixir. Through the Liquid-Metal Nano-Robots, Yang Feng could easily lock down on their position.

The mechanical legion led by Yang Feng advanced into the inner court, before arriving below the seven-story-tall Warlock Tower.

"Yang Feng, stop!"

Following the angry roar, Starlight Aldrich, along with Judy and Eunice, appeared atop the seven-story-tall tower.

At this moment, the hair of the originally calm and ruthless Aldrich was in disarray, blood was flowing from the corner of his mouth, he was battered alike a beggar. His eyes were full of enmity as he looked at Yang Feng.

The power from the extraordinary defensive spell shrouding St. Kaulin was comparable to a large area of effect defensive divine spell cast with the help of divine power. Even with the help from St. Kaulin City left by the ancient Warlocks, Aldrich had still received a huge backlash from the nuclear explosion.

But Aldrich was very crafty. He had transferred the majority of the backlash to Great Warlock Holden as well as the numerous lesser Warlocks, blowing them up in one fell swoop. Despite this, he had still suffered rather serious injuries; thus it was only natural for him to be full of resentment towards Yang Feng.

Yang Feng raised his hand, and the 200,000 level-8 battle robots and numerous level-4 humanoid robots behind him stopped in their steps.

"Very good. Yang Feng, it seems that you're rather attached to these two women. Immediately hand the control rights to your mechanical legion over. Take Steel City's Great Warlock rank experts and leave St. Kaulin City. Otherwise, I'll immediately kill them!"

A sinister glint flashed past Aldrich's eyes. He flicked his hands casually, and a pair of black claws suddenly appeared, grabbing at throats of Eunice and Judy. The throats of the two women could be squashed at any time.

"Aldrich, don't be naive! This war determines the life and death of our Steel City; as such, I can't retreat even by half a step. I will never hand the mechanical legion's control rights over! Otherwise, wouldn't that spell the death sentence for Steel City's thousands upon thousands of people?"

"I admit that I'm rather attached to Eunice and Judy, but your condition is too excessive; I cannot agree to it. How about this, you return them to me, and I'll give you a way out, giving you a chance at a comeback. People as selfish as yourself put their lives above anything else. Let them go, and you'll live

past this day; otherwise, today will be the day you die.” Yang Feng took a step forward. His eyes flickered with a cold glint, and he barked.

Aldrich laughed loudly, contempt filling his eyes: “Haha, you want to kill me? You think it would be that simple, only relying on your lumps of metal? Although I cannot get rid of your lumps of metal, but if I want to flee, is there anyone in this world who can stop me?!”

In a head on confrontation, Yang Feng’s mechanical legion was exceedingly mighty. However, to make a peak Great Warlock like Aldrich stay, was nevertheless extremely difficult.

“Is that so? Do you see this?” Yang Feng sneered, and pressed on the Dimensional Crest on his chest. A radiance suddenly flew out and fell on the ground, exposing a silhouette. It was a level-4 extraordinary life form, the Mechanical Mofen Demonic Polar Bear.

Aldrich said in disdain: “Just a single level-4 extraordinary life form rank mechanical golem? I can easily take such a mechanical golem down.”

Yang Feng sneered, repeatedly pressing on the Dimensional Crest on his chest.

One after another, Amanni Light Wing Icebird, Coloman Boa, Fire Lion, Lightning Leopard, and other level-4 extraordinary life form rank mechanical battle beasts appeared before Aldrich.

Before long, 13 level-4 extraordinary life form rank mechanical battle beasts had appeared in front of Yang Feng, before emitting terrifying life force, and glaring at Aldrich. They were just waiting for Yang Feng’s order, ready to pounce at Aldrich and tear him to shreds.

Chapter 180 – Aldrich’s Death

When he saw this, Aldrich’s complexion changed slowly, before becoming very unsightly. As one of Turandot Subcontinent’s peak expert’s, and by drawing support from his demigod rank armament, he could very well challenge 8 odd level-4 extraordinary life forms at the same time when in his top condition. However, he was presently gravely injured; therefore, if he were to clash with the 13 level-4 extraordinary life form rank mechanical battle beasts facing him, only death would await him if he didn’t flee.

Aldrich sneered: “So what? Even with this many Great Warlock rank alchemical golems, if I want to flee, you still can’t stop me!”

“Is that so? Then let me show you my strongest trump card! God rank armament Book of Prophecies; let me show you its power!” Yang Feng sneered, flicked his wrist, and a book emitting strange fluctuations of power appeared in his hand.

Aldrich became very nervous as he stared at the book in Yang Feng’s hand. But then, his eyes spewed boundless flames of anger and he snarled madly: “Book of Prophecies my ass! This is clearly Clifford’s Legend rank secret treasure Book of Gaia! Are you playing with me?”

Yang Feng sighed faintly: “Of course I’m playing with you. Isn’t it obvious? Are you retarded?”

Aldrich was seething with anger. Just as his anger had died down, when he was staring at Yang Feng, a ghostly silhouette suddenly burst out from amidst the shadows behind his back, before stabbing at Aldrich with the Legend rank dagger Kiss of the Damned.

Aldrich instinctively erupted with a powerful life force around his body.

The Legend rank dagger Kiss of the Damned easily sliced open Aldrich's force field, which was even capable of somewhat resisting level-4 spells, before stabbing into his back.

Instantly, 12 types of curses erupted inside Aldrich, a black gas enveloped him, and he became greatly weakened.

The shadow also showed its appearance – it was the Legend rank assassin Night Hunter Romulaj.

While Yang Feng was attracting Aldrich's attention, Romulaj seized this opportunity to make her move, and stabbed Aldrich's abdomen with the Legend rank dagger Kiss of the Damned in one fell swoop.

"Bitch, drop dead!!"

His eyes blood-shot, Aldrich pointed at the shadow, before casting the level-4 death type spell Disintegrate in a flash. A ray of disintegration was shot at Romulaj.

Once the level-4 death type spell Disintegrate was cast, then even Great Warlock rank experts would have a great probability to be instakilled if hit. It was a horrifying spell.

When it came to the Legend rank assassin Romulaj, if she were to be hit by Disintegrate, then there was a probability of more than 90% that she would be instakilled, becoming a pile of residue.

At this moment, an azure light curtain appeared in front of Romulaj. The green disintegration ray hit the azure curtain, before shattering it shortly after.

Romulaj seized this chance to pull out the dagger and sever the claws at the throats of Eunice and Judy. She reached out, grabbed the two women by the shoulders, and vigorously pulled at them. The tender bodies quickly drifted backwards, before rushing towards Yang Feng's camp.

The black gas from the curses twisted around Aldrich. An extremely resentful glint flickered in Aldrich's eyes, and he barked: "You can't save them! I've already cast spells on them. As long as I will it, then their souls will collapse and they'll turn into dead bodies."

Aldrich just finished speaking, when Eunice and Judy suddenly shrieked, twitching all over, their eyes white. Their bodies bulged, as if some terrifying, strange life form was roaming inside them. Threads of blood flowed out of their mouths.

"Really? Unfortunately, my spells are customized to restrain yours'!"

Carolina stepped out from an empty space, flicked her wrist, and the Rose Divine Mirror suddenly appeared in her lily-white hand. The mirror illuminated Eunice and Judy.

A sacred, bright white light illuminated Eunice and Judy.

Painful expressions crept onto the faces of Eunice and Judy. The two women spread open their lips; black wisps of mist exited their mouths and gathered into human faces screaming miserably, before being purified by the sacred white light and vanishing.

A glint of despair flashed past Aldrich's eyes, and he issued a beast-like growl: "Carolina, it's you! You've also come!!"

In Turandot Subcontinent, Saint Rose Carolina was an expert known for being capable of purifying all kinds of wicked spells. Saint Rose Radiant Book was one of Turandot Subcontinent's strongest secret methods, capable of purifying an uncountable number of wicked spells. With Carolina around, regardless of how many wicked spells Aldrich used on Eunice and Judy, all would be purified.

Carolina chuckled: "That's right! Aldrich, I came to witness your fall! At that time, when you flaunted your prowess at Rose Garden, had you ever thought that this day would come?"

The Mechanical Black Dragon emitting traces of an ancient black dragon's pressure unexpectedly appeared behind Aldrich, blocking his escape route.

Aldrich's complexion went through various changes, before against everyone's expectations, he suddenly knelt on the ground, kowtowed repeatedly towards Yang Feng and implored: "Sir Yang Feng, please spare my wretched life! You can cast a controlling spell on me. I just ask that you spare my wretched life. After all, I'm Eunice's father! I'm the only relative she has left in the world. I beg you, spare my life!"

"I'm a Great Warlock rank expert, and I know all the secrets in Warlock College Antalya. As long as you take me as a slave, then I'll tell you all that I know, allowing you to take control of Warlock College Antalya with ease."

A peculiar glint flashed past Yang Feng's eyes: "Knowing when to yield and when to resist, truly worthy of an ambitious and ruthless character."

Carolina saw Aldrich covering and wagging his tail in front of Yang Feng, and a glint of disdain flashed past her beautiful eyes: "What a disappointment!"

A glint of contempt flashed past of Romulaj's pretty eyes. Although Yang Feng had also forced her to submit, yet she hadn't stooped so low as to cover and wag her tail.

Aldrich was one of the most powerful Great Warlocks in Turandot Subcontinent, as well as Warlock College Antalya's Dean. For such a big shot to actually behave so deplorably when confronted with a life or death situation gave rise to a description in Romulaj's mind, unworthy of one's name.

Yang Feng waved his hand. A humanoid robot holding a syringe with the Liquid-Metal Nano-Robot Elixir went next to Aldrich, grabbed his right arm, and then directly injected the elixir.

Aldrich's immune system instinctively moved to eliminate one tenth of the Liquid-Metal Nano-Robots. His complexion changed slightly, yet he didn't show any signs of resistance as he knelt on the ground.

Only death would await Aldrich if he resisted while being watched by so many experts.

After seeing the Liquid-Metal Nano-Robot Elixir being injected into Aldrich, Yang Feng turned towards Eunice and asked, "I had promised you to kill him; therefore, I'll let you decide whether he lives or dies. Just say the word, and he's dead!"

Aldrich had immediately turned pale from fright, before raising his head to look at Yang Feng and saying: "Master, you agreed to spare my wretched life!"

Yang Feng laughed heartily and said: "Haha, when had I done that? It's just your own wishful thinking. The one to decide your fate is your daughter Eunice and not me."

Aldrich immediately turned towards Eunice, prostrated himself on the ground, and started pleading: "Eunice, my daughter, my dear daughter. I know I wronged you. I beg you, please spare my life. I beg you, for the sake of me being your father, please spare my life. The resources accumulated through the years, I'll gift them all to you. Moreover, with my pointers, you are bound to reach the Great Warlock rank."

Eunice gave Aldrich a profound look, deep seated resentment concealed in her beautiful eyes: "Aldrich, my dear father. At that time, I had also implored you to spare my mother and older sister. Yet you, the best that you are, in order to have a slight progress in your power, had mercilessly murdered them. I'll never forgive you! Master, kill this beast. Henceforth, my body and heart are yours."

"Okay, then die!" A touch of regret flashed past the abyss of Yang Feng's eyes, and he said faintly to Aldrich.

"No!!"

Aldrich issued an extremely mournful cry, his face twisted, his body swelled up uncontrollably, and he exploded with a 'pop'. Only his head rolling on the ground was left intact. His breath of life had faded.

In Turandot Subcontinent, there were many extraordinary life forms capable of surviving with just their head remaining, yet Aldrich was obviously not such a life form.

Carolina and Romulaj shivered slightly inside when they saw this.

Aldrich was a formidable existence of the pinnacle Great Warlock rank. Even though he was pierced by Romulaj's Kiss of the Damned and his strength was weakened by more than 90%, yet he was still very powerful, his fighting strength was comparable to that of an ordinary Great Warlock. Such an exceptional expert, with just a sentence from Yang Feng, had met a violent end without any strength to resist. This was an eye opener to the two women with regards to the dread of the God Eradicating Elixir.

Yang Feng watched Aldrich's corpse, a touch of regret flashing past the depths of his eyes.

Although Aldrich had no moral integrity, yet he was still a genuine pinnacle Great Warlock existence. If it was not for Eunice, then Yang Feng would not miss the chance to take him as a subordinate, and consequently increase his forces. After all, although Aldrich's character was no good, yet his strength was tyrannical, and his conduct was shrewd and ruthless. He was despicable and there was no lows to which he couldn't stoop, he was a first-rate veteran at doing dirty work.

"Thank you, Master. From today, my body and heart are yours." Eunice pounced into Yang Feng's arms, gave him a deep kiss on the mouth. Her eyes charming, her body exuding an enchanting luster.
