

MGE 621

Chapter 621 – Deterrence

At Yang Feng's command, hundreds of thousands of Li Gui Province's Warlocks started to recite incantations.

Barriers began appearing in the area, and a gigantic magic ban array began to extend in all directions.

The magic ban array can cut off this place from the energy of heaven and earth. Except for Body-tempering Warlocks and Warlock geniuses who have formed a virtual world, the strength of the rest of the Warlocks will suffer a sharp decline.

As for the Yang Feng's battle robots, they will shine in the magic ban array.

To set up a super large magic ban array in the Li Gui Province, only Yang Feng's Undying Mountain can easily accomplish this.

The shortcoming of a magic ban array is that it doesn't discriminate between enemy and ally. In general, it is only set up when dealing with Elemental Warlocks who have the greatest destructive power. Although a magic ban array can greatly weaken pure Elemental Warlock, but it cannot weaken other Warlocks as much, so it's rarely seen on the battlefield.

But for Yang Feng's mechanical legion, a magic ban array makes for the best fighting environment.

Along with a bright voice, Bai Yuxian walked out of the void and said with a sweet smile: "Young Master Lei Ming, please calm down! I will have the Tai Yi Sect pay you a satisfactory compensation to pacify your fury. As for the Eight Great Families, they didn't mean to oppose you."

A middle-aged Warlock with a refined temperament and intermediate Bright World Warlock fluctuations of power spoke with a light smile: "Young Master Lei Ming, I am Shangguan Hong of the Shangguan family. The Shangguan family never meant to oppose you. No matter what happens, the Shangguan family will remain neutral."

Looking like he is on fire, a man with scarlet hair and eyebrows uttered in a deep voice: "Young Master Lei Ming, I am Wang Zhihuo of the Wang family. The Wang family never meant to oppose you!"

The Bright Warlocks of the Eight Great Families stepped forward and expressed their unwillingness of opposing Yang Feng's Undying Mountain.

The Tai Yi Sect was originally the head of the Ten Great Sects. After the Ten Great Sects were rooted out, the Tai Yi Sect's influence expanded greatly, and their conduct became more arrogant and domineering, offending many people.

Among the Eight Great Families, few have a good relations with the Tai Yi Sect. Even the Jiang family who is known as a Bai family's hunting dog along with the Tai Yi Sect has a very poor relationship with the Tai Yi Sect.

Yang Feng snapped his fingers, and a Star Destroyer Artillery fired a beam. The beam passed above the place where the Tai Yi Sect's camp is located, slammed into the desert, and blasted a bottomless giant hole in the desert.

"What a fearsome weapon!"

"Is this a secret treasure refined by the Undying Mountain's alchemy? That blow is on par with an all-out strike of a pinnacle Bright World Warlock in terms of power."

"What a dreadful secret treasure! This kind of secret treasure is enough to kill Bright World Warlocks!"

"..."

Seeing this scene, the Warlocks of the Two Great Sects and the Eight Great Families as well as the many first-rate Warlock groups of the Great Cloud Dynasty all inhaled a breath of cold air.

The Bright World Warlocks of the Two Great Sects and the Eight Great Families broke out in cold sweat on their back. If caught off guard they would either perish or sustain grievous wounds when hit by a Star Destroyer Artillery beam.

When he saw this, the expression of Sun Tianyang who has devoured an Incarnation Apple and recovered his body has become unsightly.

This was clearly a show of strength on Yang Feng's part, showing that he has enough power to wipe out the Warlocks of the Two Great Sects and the Eight Great Families. In this way, he will have an upper hand in the ensuing negotiations.

After experiencing the battle prowess of the Blazing Angel Alexia and the might of the Star Destroyer Artillery, the haughty Sun Tianyang dispelled the idea of provoking Yang Feng in the Li Gui Province.

The Li Gui Province is a restricted area for Infinity Warlocks. In addition to Infinity Warlocks, only pinnacle Bright World Warlocks who have formed a virtual world can contend against the Blazing Angel Alexia.

Yang Feng got right to the point: "Ladies and Gentleman, presumably all of you have come here for the relic site of the Golem Dynasty. What price do you intend to pay in order to enter the relic site?"

As long as Yang Feng intends to move around within the scope of influence of the Great Cloud Dynasty, he cannot refuse this request of the Two Great Sects and the Eight Great Families for no reason.

Shangguan Hong smiled and said: "The Shangguan family has control over several relic sites of the Eight Warlock Dynasty. If you let us in, Young Master Lei Ming, then you can enter our relic sites in turn. Besides, Young Master Lei Ming, you'll get the friendship of the Shangguan family."

The other Eight Great Families, the Tai Yi Sect, and the Saint Lotus Sect all expressed the same idea.

After bargaining with them, Yang Feng finally agreed to let them enter the relic site of the Golem Dynasty.

"Young Master Lei Ming, please wait a moment!"

After negotiating with the Two Great Sects and the Eight Great Families, Yang Feng turned around, ready to leave, when he suddenly heard a voice from behind.

Yang Feng turned back and saw a young man with a sunny expression on his face and giving off a comfortable feeling looking at him with a smile.

A smile on his face, the young man with a sunny expression waved his hand, and a piece of parchment flew towards Yang Feng: "I am Yuan Shuangbin, the Pavilion Master of the Flowing Flower Pavilion. Young Master Lei Ming, my Flowing Flower Pavilion has some of the ores you're looking for. I hope to offer these ores to you, Young Master. I wonder if I can exchange them for some slots to enter the relic site?"

Yang Feng took a look at the parchment, and his eyes lit up abruptly. Star River Green Gold is included among the various names written on the parchment. Additionally, there are two kinds of ore needed for the construction of a level-5 stronghold.

Yang Feng said: "500 slots, I can give you 500 slots to enter the relic site! However, once inside the relic site, you're responsible for your own survival."

Yuan Shuangbin smiled and threw a storage ring towards Yang Feng: "Please accept these ores."

When Yang Feng scanned the precious ores inside the storage ring, the corners of his mouth rose slightly: "Now I can build a level-4 stronghold. Sure enough, a leader of a large force can collect ores much easily than a rogue Warlock."

Matter and Energy Converter is at the core of xizu technology. Through Matter and Energy Converters, energy can be converted into various rare ores, and then all kinds of top warships and battle robots with incredible power can be produced.

At the same time, Matter and Energy Converters require top materials to be constructed. The materials required to assemble a level-4 Matter and Energy Converter are more difficult to find than the materials necessary for some level-9 secret treasures.

Now that he has become the master of the Li Gui Province, Yang Feng can easily find all kinds of rare ores needed for the level-4 Matter and Energy Converter.

"Brother Yuan, I am Jiang Yu, a true disciple of the Huan Zhan Abode. I wonder if can I have the honor to be friends with you?"

"Brother Yuan, I am willing to pay you 10,000 high grade magic crystals for a slot to enter the relic site."

"..."

When Yang Feng left, the surrounding Warlocks swarmed Yuan Shuangbin and competed for the 500 slots in his possession.

Yuan Shuangbin is enthusiastic and straightforward, and he likes to make friends. He soon sold the 500 slots to enter the relic site to many prestigious Warlocks as well as some genius rogue Warlocks.

Forming a loose group, these Warlocks entered the restricted area with cheerful expressions.

This relic site that has never been explored represents great danger on one hand. But on the other hand, it also represents huge benefits.

If not properly maintained, many secret treasures will lose their power with time, until eventually all the power is gone.

But when placed in some special warehouses, secret treasures will preserve their power for tens of thousands of years or even hundreds of thousands of years.

One day later, after repeated probing, Liu Yan discovered a fairly safe entry point. Unable to bear the wait any longer, the Warlocks in the desert flew into the relic site, fearing that the treasures inside will be taken away by Yang Feng.

After repeated considerations, Yang Feng possessed a Flesh Golem and led hundreds of thousands of battle robots into the relic site. He also brought his currently most powerful trump card – Alexia.

The relic site is a huge celestial body half the surface area of Earth.

As soon as Yang Feng and his party flew within 10,000 meters of the celestial body, a strong attractive force took hold of them and pulled them towards the celestial body.

When they entered the celestial body, they saw fantastic buildings thousands of meters tall, giving off the sense of a futuristic technological civilization. Only the 10- and 11-story-tall Warlock towers as well as the mysterious runes engraved on the various buildings demonstrate that this is a Warlock celestial body.

“What a terrible relic site, there are no living life forms here!” When Yang Feng landed, he looked at the spacious and bright streets surrounded by buildings constructed in a masterful architectural style and frowned, and an indistinct premonition welled up inside him.

Before coming here, Yang Feng didn’t detect any signs of life on this celestial body.

Chapter 622 – Crystallization of the Golem Dynasty’s Highest Golem Art

The relic site is full of life magic energy. According to common sense, there should be countless life forms here, such as insects, fungi, and plants with strong vitality.

Moonlight Warlocks are regarded as Transcendents, and they have acute perception ability, which exceeds that of ordinary people by far. If they want to, they can even sense the surrounding fungi.

Yang Feng doesn’t sense any traces of life on this celestial body, not even those of fungi. This is very abnormal.

In addition to Yang Feng, the Warlocks of the three dynasties, the Two Great Sects, and the Eight Great Families all became vigilant. They silently recited incantations, and spell fluctuations shrouded them and formed magic shields.

These Warlocks are well aware that an unrestricted relic site like this is the most valuable, yet at the same time most dangerous, the first time people enter it.

“This is the secret dwelling of the Golem Dynasty’s Sword Puppet Holy! Welcome, everyone! Please become a part of us!” A voice sounded suddenly. In the center of the city, a tall building carved with countless runes twisted and changed into a handsome, 1.8-meter-tall middle-aged man with black hair fluttering in the air and an expressionless look on his face, and queer golem force seeped out of him.

“Golem force, that’s a top golem of the 6th Warlock Dynasty!”

“The crystallization of the 6th Warlock Dynasty’s most advanced art – Living Golem!”

“...”

When the Warlocks sensed the golem force emanating from the middle-age man, their eyes blossomed with excitement.

The Golem Dynasty’s highest crystallization of alchemy is an incredible golem art called Living Golem. The Living Golem can practice cultivation on its own and use golem force.

The different forces born from human Warlocks practicing different secret methods are collectively called life energy or life force. Golem force is different from life force. Once hit by golem force, a life form will be eroded and transformed into a golem.

In the era of the 6th Warlock Dynasty, the Golem Lord traveled to countless planes with 3 Empyrean Golems and 12 Holy Golems in tow. At that time, countless powerful existences were eroded and turned into golems by the 3 Empyrean Golems and 12 Holy Golems.

After the Golem Lord developed Living Golems, the other golem legions declined gradually and finally withdrew from the Cangzhi Plane, only to suppress some low-grade planes.

After the collapse of the 6th Warlock Dynasty, the other race allied army fearing the Living Golems slew them.

Legend has it that the 3 Empyrean Golems and 12 Holy Golems leading the remaining Living Golems escaped to a plane and established a world called Golem Realm.

Since the fall of the 6th Warlock Dynasty, no Living Golems have appeared in the Cangzhi Plane. But now here is a Living Golem. This naturally filled the Warlocks with excitement.

Living Golems are a supreme masterpiece of the Golem Lord. They are fearsome existences that can practice cultivation, and possess powerful force. Unlike human Warlocks, they have no need for rest, and can fight uninterruptedly.

If you can research and create Living Golems, you’ll be able to get an extremely powerful golem army.

“This Living Golem is the prey of the Tai Yi Sect!” A look of greed in his eyes, Sun Tianyang silently chanted an incantation and inserted his hand into the void.

The space behind the handsome middle-aged Living Golem twisted, and Sun Tianyang’s right hand suddenly thrust out and extended towards the middle-aged man.

The Living Golem touched Sun Tianyang’s right hand lightly: “A mere junior Bright World Warlock dares to attack me, Jia Yiluo? How impetuous!”

In a flash, gray golem force extended along Sun Tianyang's right arm and eroded towards his body.

Sun Tianyang's face changed drastically, and he silently recited an incantation, and red light entangled his right arm in an attempt to dispel the golem force.

The gray light stifled the red light and continued to erode Sun Tianyang's right arm.

Sun Tianyang gritted his teeth, and then severed his right arm with a wind blade. His severed arm jumped away as if given life. After it jumped to the top of a tall building, the arm suddenly grew three eyes, stared at Sun Tianyang, and revealed a twisted smile.

Seeing this, many of the Warlocks present had a creepy feeling.

Sun Tianyang is a Bright World Warlock, a Bright World Warlock of the Tai Yi Sect to boot. Although he only has junior Bright World Warlock cultivation base, but some rogue Warlocks with advanced Bright World Warlock cultivation base may not be his opponent. Yet such a powerful Warlock was unexpectedly wounded severely by Jia Yiluo, and his severed limb has undergone a weird mutation, giving off a hair-raising feeling.

Sun Tianyang's face fell, and he screamed wildly: "My right arm won't regrow! You stole my right arm's soul!"

Hearing Sun Tianyang's scream, the complexions of the Warlocks changed dramatically.

Bright World Warlocks have incredible power. Even if they are chopped to pieces, they can regenerate quickly by various means. As long as the Bright World Core isn't broken, they have unlimited possibilities.

Originally, Sun Tianyang's severed right arm would have been easily regenerated. But after his right arm's soul was seized, his right arm can no longer regrow. Even if he uses strange secret methods to cultivate another right arm, the new arm won't be able to move nimbly.

Jia Yiluo showed a wicked smile: "I am Jia Yiluo, a housekeeper of the mighty Golem Lord granted the Sword Puppet Holy. Since you have invaded the Sword Puppet Holy's residence, I ask that you become our companions."

Hundreds of millions of golem insects rose into the air, formed insect swarms, and shot towards the Warlocks.

When they saw the swarms of golem insects without a trace of life fluctuations, everyone's face changed greatly.

Human Warlock proficient with fire spells began to recite incantations, and the space filled with violent fire elemental particles.

Jia Yiluo smiled and said: "Everyone, please don't look down on us. We are soldiers who have followed the Golem Lord on many campaigns to other planes. As you might expect, we have some experience in dealing with enemies!"

Suddenly, strange runes appeared, and a huge magic ban array activated in the area.

Shrouded by the huge magic ban array, the surrounding life magic energy was repelled. The Warlocks felt that their connection with the energy of heaven and earth was severed.

The fire elemental particles pervading the area dissipated and disappeared at once.

After practicing cultivation to the Moonlight Warlock rank, human Warlocks can use spells to control the energy of heaven and earth and form frightening natural disasters.

But the magic ban array repels the energy of heaven and earth. Human Warlocks hate fighting inside a magic ban array the most. In such an environment, even Body-tempering Warlocks are weakened by about 30%. Impacted the most, Elemental Warlock are weakened by 95%.

Yang Feng ordered coldly: “Destroy them!”

In an instant, a dense crowd of modified 2nd generation battle robots flew into the air, and countless Gunner Robots equipped with flamethrowers fired flames that formed a net of fire sweeping towards the insect swarms.

Enveloped by the net of fire, large swaths of golem insect were burnt to ashes.

The golem insects who escaped through the cracks were easily killed by the Warlocks.

The weakest Warlocks who entered this relic site possess Moonlight Warlock rank cultivation base. Even though the might of their spells has declined greatly because they can’t use the energy of heaven and earth, but they’re still very strong, far stronger than ordinary people.

Jia Yiluo showed a smile and said full of malice: “That’s the Cangzhi Plane’s human Warlocks for you. By the way, I will tell a piece of good news. This is not only a residence, but also a place of inheritance of the Sword Puppet Holy. Of the Warlocks who entered this time, if only one person remains alive, they can inherit the legacy of the Sword Puppet Holy and become the master of this Sword Puppet Star! Of course, they will also become the master of us Living Golems!”

With that, Jia Yiluo’s figure fluttered, and he disappeared into the city.

When they heard Jia Yiluo’s words, the Warlocks moved far away from the scope of Yang Feng and the Undying Mountain’s battle robots.

With the magic ban array in place, Yang Feng’s Undying Mountain has become the number one force here. On the Sword Puppet Star, there are invaluable Living Golems as well as a legacy of the 6th Warlock Dynasty. Everyone wants to be the master of this relic site.

Naturally, the Warlocks are apprehensive of Yang Feng.

Bai Yuxian said suddenly: “Everyone, Jia Yiluo is playing a trick on us. He want us to suspect each other, guard against each other, and even fight each other. He is a dangerous foe. We need to join forces in order to be able to contend with him. Don’t be instigated by him into infighting.”

Chapter 623 – Spatial Division

Yang Feng said: "Since the relic site is within the Undying Mountain's sphere of influence, no one can seize it away. In any case, this relic site will fall into the hands of the Undying Mountain. As such, there is no need for you to worry that we'll attack you here."

The thought of killing everyone emerged in Yang Feng's mind for an instant, and then disappeared. The Warlocks here are of extraordinary origins. Unless he can kill all the people here and shut them forever, it will spell endless future troubles for him. Most importantly, Yang Feng heard the malice in Jia Yiluo's words. It's stupid to fight one another because of the golem's words.

When they heard this statement, the pinnacle Warlocks of the three dynasties, the Two Great Sects, and the Eight Great Families showed thoughtful looks, and then their expressions eased, and they began to dispose of the golem insects.

These human Warlocks are very cautious. After killing a certain number of golem insects, they immediately retreated behind the Undying Mountain's battle robots and ingested elixirs and absorbed life magic energy from high grade magic crystals in order to restore their strength and maintain their peak condition.

Yang Feng didn't say anything when he saw this. The relic site gives him a very dangerous feeling. Despite how powerful he is, he doesn't dare to be careless.

Sitting on top of a large building, Jia Yiluo is observing the fight between the golem insects and the human Warlocks. He issued a sigh: "These human Warlocks are really careful. Unfortunately, I haven't recovered my full strength. If it was in the 6th Warlock Dynasty era, I could easily kill all these ants alone! Kong Yiluo, it's your turn."

Suddenly, the strange runes covering the tall buildings lit up, and terrifying spatial force enveloped all human Warlocks in an instant.

Yang Feng's face fell: "Shit, their employing spatial division!"

As the name implies, spatial division is a war tactic used to divide enemy experts into different places through spatial spells, and then pick them off one by one.

Spatial division is a tactic most suitable to be used in your own base. Many relic sites have spatial teleportation arrays. Once the enemy enters the relic site, they will be teleported to different places, and then killed one by one by the owner of the relic site.

Based on the analysis of Liu Yan of the Relic Site Search Department, this relic site doesn't have the ability to instantly teleport people. Caught off guard, Yang Feng and them were teleported to different places in an instant. Otherwise, as long as they carried secret treasure that exude spatial disruption fluctuations, they could evade space division.

Spatial fluctuations surged, and Yang Feng appeared in a majestic, yet empty and silent city.

"All combat units, head to my location immediately!" Yang Feng closed his eyes and used the command chip in his brain to send an order into the surroundings.

The battle robots who received the order moved towards Yang Feng at full speed.

The Space Disruptors released spatial disruption spells at once in order to interfere with the surrounding spatial force.

With a thought, Yang Feng tried to cut off the connection between the Flesh Golem and his consciousness: “What a terrible start. Do I go out, and then restart?”

A warning came from the chip: “Error! Due to the disturbance of an unknown force, consciousness cannot break away from stand-in golem numbered 0005. The degree of danger is extremely high!”

Yang Feng’s face fell: “Dammit! What happens to my true body if my consciousness is killed here?”

“There is a 10% chance that you will die directly along with the clone in the Feisuo Plane; a 20% chance your soul will receive a heavy blow and fall into eternal sleep; a 30% chance that your soul will receive a blow, and you might not be able to promote to the Glorious Sun Warlock rank within 1,000 years; a 40% chance that your soul will receive a blow, and it will take you 300 years to recover.” The chip issued an analysis.

Yang Feng smiled bitterly: “The world of Warlocks is really strange and dangerous, and it’s not good to use a stand-ins. No wonder top Warlocks use their true body when they go to explore relic sites.”

The world of Warlocks has avatars, death substitution, and other life-saving secret methods. At the same time, there are also karma secret treasures. If you are targeted by a karma secret treasure, then injuries suffered by the avatar will even spread to the true body. Therefore, when top Warlocks explore relic sites, they generally come with their true body instead of using a weak avatar.

Yang Feng calmed down from his anger: “A fall into the pit, a gain in your wit. Next time, I will use my true body to explore relic sites. That is under the premise that I survive this!”

“Fly out!”

Yang Feng gave an order, and 20 Starry Sky Rippers operated their engines to the limit, turned into streams of light, and flew towards the outside of the celestial body at Mach 17 speed.

“Useless, you can’t escape!” Following unbridled laughter, a 300-meter-long gold roc flapping the dragon wings on its back suddenly appeared in front of the 20 Starry Sky Rippers.

Following a gray light, the 20 Starry Sky Rippers dimmed, and Yang Feng’s connection to them was cut off.

With his extraordinary eyesight, Yang Feng saw the 20 Starry Sky Rippers follow the gold roc.

Yang Feng looked at the golem gold roc in the sky with apprehension in his eyes: “This is a Living Golem, the Golem Lord’s greatest masterpiece! What a dangerous and terrifying existence!”

Living Golems can erode all beings and transform them into golems. When the Golem Lord was alive, Living Golems were most feared existences.

It is because Living Golems are so powerful that the Golem Lord abandoned the golem legions he refined in the early days and developed the 3 Empyrean Golems and 12 Holy Golems.

Yang Feng glanced around at the desolate city where even insects cannot be seen, and a chill welled up inside him: “Fortunately, the Golem Lord is dead. Otherwise, such a sight might be encountered all over the Cangzhi Plane.”

In the Sword Puppet Holy’s secret dwelling, every living being has been transformed into a golem by the Living Golems. This scene is scarier than the most terrifying of horror movies.

Suddenly, a dignified look appeared in his eyes, and Yang Feng flipped his hand, and a greatsword appeared in his hand. He said coldly: “Come out!”

As the place where Yang Feng’s consciousness is placed, the Flesh Golem was refined to be a powerful existence with Moonlight Warlock rank cultivation base. Of course, the Flesh Golem is much weaker than his true body.

“Don’t attack!” Following a voice, a boy and a girl came out of an alley.

The extremely beautiful girl with short black hair asked Yang Feng with a look of expectation: “My name is Luo Yan. This is my brother Luo Ming. Are you a foreigner? Oh, no, are you a Warlock from outside? Is the Golem Lord still alive?”

Yang Feng looked at the girl with a complicated gaze and said: “The Golem Lord has been dead for a long time. The 8th Warlock Dynasty has collapsed more than 100,000 years ago.”

Although the girl looks exactly like a human, but she doesn’t have a breath of life on her. She has clearly been turned into a golem. Moreover, she doesn’t possess golem force. She must be a lower grade golem eroded by a Living Golem.

Luo Yan’s pretty eyes revealed a look of despair, and she sobbed: “The Golem Lord has died. In that case, isn’t it impossible for us to change back into humans?”

No matter how Luo Yan sobbed, no tears flowed out of her eyes. This illustrates that although she has the shape of a human, she is no longer a living human, but a “dead” golem.

His blood running cold, Yang Feng came up with a vague guess: “To be able to survive from the 5th Warlock Dynasty era till this day, what a terrible golem art. Living Golems must be a way the Golem Lord developed for pursuing longevity.”

Yang Feng frowned, a pensive look in his eyes: “With such formidable strength, how could the Warlock Emperors have died?”

Each one of the Eight Warlock Emperors is genius beyond compare. Judging by the Living Golems, it can be seen how amazing the Golem Lord’s golem art is.

However, each one of the Eight Warlock Emperors has lived for less than 300,000 years. Some even died after thousands or tens of thousands of years. This is simply inconceivable.

The life span of human Warlocks is indeed much shorter than that of dragons, kindred, high elves, gods, fiends, devils, and other such beings. However, for human Warlock Emperors who have evolved to the pinnacle of life forms in the universe to die just after thousands or tens of thousands of years is unreasonable.

“The Golem Lord is dead! I don’t want to live anymore either! You, become a golem as well, become our companion!”

The eyes of the pure and gorgeous Luo Yan suddenly dimmed and lost their luster, as if she has turned into a golem from a person, and a creepy smile appeared on her face. Suddenly, her body burst apart, and gray golem force shot towards Yang Feng.

Luo Ming’s eyes suddenly lost their luster, and he burst apart and turned into gray golem force that shot towards Yang Feng as well.

Chapter 624 – 100 Billion Golems

Yang Feng’s face flickered, and he activated a level-6 energy shield. The defensive power of xizu energy shields is fearsome. Except from its low resistance to magic phenomena such as souls and curses, its defensive ability in other aspects is far above that of single target level-6 defensive spells of ordinary Moonlight Warlocks.

When the two streams of gray golem force slammed into the level-6 energy shield, they weirdly passed through the energy shield and blasted into Yang Feng, and began eroding him frantically.

Boom! With a thought from Yang Feng, the two parts eroded by the golem force burst into pieces along with the golem force instantly.

The wounded part of Yang Feng’s body squirmed and repaired itself quickly. But his expression is unsightly: “Golem force is really terrible. They are clearly far below the Moonlight Warlock rank in terms power, yet they can still easily penetrate the level-6 energy shield. How dreadful!”

Although the power of the golem force is far lower than that of Moonlight Warlocks, but with its queer corrosive ability, it may even erode top Moonlight Warlocks and turn them into golems.

Yang Feng creased his eyebrows and mused: “Among the Eight Warlock Dynasties, the Golem Dynasty is a taboo among taboos! At that time, the reason why Living Golems were so dreaded by the various races, why even human Warlocks cooperated with other races, and why all Living Golems were destroyed together, I finally understand it a little now. This power is too dangerous.”

Living Golems is the crystallization of the Golem Lord’s highest golem art. Wherever golem force passes, all intelligent life forms will be eroded and turned into the Golem Lord’s toys. This power is too domineering and terrifying, which caused a backlash from the powerful beings of different races.

After the death of the Golem Lord, countless powerful races came to the Cangzhi Plane. They attacked the Golem Dynasty frantically and killed all the Living Golems of the Golem Dynasty. According to legend, only the 3 Empyrean Golems and 12 Holy Golems escaped and left the Cangzhi Plane.

There is even a rumor circulating that many Warlock Emperor rank beings from other planes joined forces to kill the Golem Lord. But there is no evidence of this ever happening.

Warlock Emperor rank is the limit that human Warlocks are known to be able to practice cultivation to. Over the years, human Warlocks have born Eight Warlock Emperors. But before the rise of human Warlocks, the Cangzhi Plane has also given birth to many Warlock Emperor rank existences.

Each of the 36 primary material planes has a history of more than 10 billion years. During this period of time, they all gave birth to Warlock Emperor rank existences.

The Primal Chaos Mother Spider, the Myriad Eyes Ogre, the Primordial Lightning Dragon, the Six Sky Devils, and other such existences are of the same rank as the Eight Warlock Emperors.

The reason why the Seven Warlock Emperors were called invincible in the world is because they have defeated existences who also possessed Warlock Emperor rank battle prowess. Unlike the other seven, after the Dawn Lord ascended the throne, he stayed in the Cangzhi Plane, where he ultimately died. He never fought other Warlock Emperor rank existences. This is why he is considered to be weaker than the other Seven Warlock Emperors.

Living Golems controlled by the Golem Lord are like a contagious pathogen. They can erode all intelligent life forms and turn them into golems that only know how to obey their master. For any Warlock, that is a nightmare.

“Mechanical avatar? No, it is an avatar formed of flesh and machinery according to a certain proportion. It’s really remarkable that human Warlock civilization has developed to this extent. There was no such secret treasures in the Golem Dynasty era. Young Master Lei Ming, your Undying Mountain’s alchemy has given me a surprise.” Along with some words of praise, the gentleman-like Jia Yiluo slowly emerged from a corner of the city and smiled.

As soon as Yang Feng saw Jia Yiluo, he narrowed his eyes slightly, stepped back a few steps, and activated one energy shield after another, a look of apprehension in his eyes.

After confronting Jia Yiluo, the Bright World Warlock Sun Tianyang suffered a heavy injury and lost an arm. Such a fearsome monster isn’t an existence that Yang Feng can contend with.

A person stood beside Jia Yiluo. It is Angélico, a peerless genius cultivated by the Hall of Truth of the Western World.

The peerless genius Angélico who defeated Yi Yuanyang in the Time Sky City no longer has the life fluctuations unique to human Warlocks.

Yang Feng thought: “Angélico died just like this? The world is really fickle and cruel.”

As a supreme genius cultivated by the Hall of Truth, Angélico has formed a virtual world and has junior Moonlight Warlock rank cultivation base. His combat strength is comparable to that of a quasi-Glorious Sun Warlock. Yet such a peerless genius died silently in this relic site, and was reduced to an ordinary golem under the control of the Living Golem Jia Yiluo. The world is really fickle.

Yang Feng gave a salute and spoke respectfully: “Mr. Jia Yiluo, I’m really sorry for disturbing your rest. The Undying Mountain is willing to withdraw from the Sword Puppet Holy’s secret dwelling. Please let us leave here.”

Jia Yiluo responded with a mocking smile: “Since you have already seen us Living Golems, do you think you can still leave here alive? We Living Golems have countless enemies in the outside world. Unless the mighty Golem Lord comes back from the Netherworld, we won’t appear outside, nor will we let anyone outside know of our existence.”

“The Golem Lord isn’t dead? He is still in the Netherworld?”

A thought flickered in Yang Feng’s mind, yet he said calmly: “In this case, please give me a chance, let me cast a spell!”

Jia Yiluo showed a playful smile: “Interesting! A mere Moonlight Warlock dares to challenge me, you’ve got guts. I appreciate you. Very well, I will give you a chance and let you cast a spell. After I turn you into my subordinate, I will also give you some autonomy.”

Jia Yiluo is a terrifying existence that can easily defeat a Bright World Warlock and instantly kill such a peerless Moonlight Warlock rank genius like Angélico. For a trifling Moonlight Warlock to try harm him with a spell is tantamount to a fool’s dream.

Yang Feng took a deep breath, cast Wide Area Sound Amplification, and shouted wildly: “Alexia, come save me!”

Jia Yiluo was stunned. He never expected Yang Feng to cast such a spell.

A black ray of light flashed, and the heroic and beautiful Alexia with three pairs of black wings on her back and the Fallen Angel Sword in hand appeared in front of Yang Feng.

Alexia swept Yang Feng with a glance and sneered: “My Lord, you are the weakest and most shameless master I have ever served.”

For a Fallen Angel like Alexia who lives to fight, the weak Yang Feng isn’t a master she’d like to serve.

A dignified look in his eyes: “Word Soul Summon! This is a secret method recorded in the Transcendent Script. To cultivate such a defective secret method like the Transcendent Empyrean Imprint, how foolish. No matter how mysterious your Transcendent Empyrean Imprint is, all you have cultivated is a child imprint, which will eventually be swallowed by the Transcendent Empyrean Imprint mother imprint. Your hard work will become a hope chest for the Transcendent Lord.”

Yang Feng smiled and said: “Mister Jia Yiluo, you should be clear about the strength of a Blazing Angel. You are not her opponent. Besides, my subordinates will be here soon. Besides, teleportation won’t work twice on me. Please let us leave this place.”

Jia Yiluo replied with a smile: “Young Master Lei Ming, in terms of fighting power alone, your Blazing Angel is indeed stronger than me. Even if I use golem force, I’m not her opponent, let alone when she’s guarded against me.”

“However, this is only one-on-one!”

The Dragon-winged Gold Roc who has easily turned more than 300 Starry Sky Rippers [1] into golems flew to Jia Yiluo’s side.

The Dragon-wing Gold Roc is surrounded by the more than 300 Starry Sky Rippers.

A beautiful golem with long black hair, a perfectly proportioned figure, an exquisite complexion, and a greatsword in hand walked out from a corner.

There was a commotion in the city, and countless human, beast, insect, and bird golems teleported here via spatial spells repeatedly and formed a frightening golem legion extending without end.

Jia Yiluo smiled and retreated into the golem legion: “Now it’s one-on-100 billion. In a magic ban area, even a Fallen Angel won’t be able to replenish their power. You stand no chance of winning. If you give up resistance, I will give you more freedom. After the Golem Lord returns from the Netherworld, he may grant you true golem force and turn you into a Living Golem just like us!”

The Dragon-winged Gold Roc golem and the beautiful golem also retreated into the endless golem legion and looked at Yang Feng and company with ridicule in their eyes.

Yang Feng gazed at the densely-packed golem legion with a dignified look in his eyes: “In the past, I used a massive mechanical legion to crush my enemies. Now I am threatened by an endless golem legion. This feeling is really terrible!”

[1] – 20 Starry Sky Rippers were mentioned last chapter. Now there are more than 300...

Chapter 625 – Ruler Magic Cube and Alexia

With a flick of his wrist, the Ruler Magic Cube appeared in Yang Feng’s hand. He pinched hard, and the Ruler Magic Cube instantly transformed into countless black armor pieces that landed on Alexia and formed a full body armor carved with abstruse runes.

As soon as the Ruler Magic Cube covered her, Alexia felt a steady stream of power pour into her from the Ruled Magic Cube.

Alexia sensed the steady stream of power from the Ruler Armor, and excitement streaked through her beautiful eyes: “What formidable power! The Undying Mountain’s alchemy is really powerful! Human Warlocks really cannot be underestimated!”

Abyssal Fiend Grand Duke Poydul has lived for hundreds of thousands of years, and he has collected many powerful secret treasures. But he doesn’t have a secret treasure that fits Alexia this well.

Equipped with the Ruler Armor, Alexia has the confidence to fight against Infinity Warlock rank powerhouses, and even slay them.

Alexia was moved a little: “It seems that my new master isn’t bad after all.”

“Alexia, protect me! Let’s break out and leave this celestial body!” Yang Feng roared and performed a secret method, and a pair of wings appeared on his back. With a light flap of the black wings, he turned into a black stream of light soaring into the sky.

On this strange celestial body, all heaven and earth energy is rejected by the magic ban array. There are very few spells that human Warlocks can cast here. At the same time, the recovery of power here is more than 10,000 slower than in the Cangzhi Plane.

Even though Alexia has power comparable to the Infinity Warlock rank, but faced with 100 billion low-level golems, she will exhaust her power, and then overwhelmed by the countless low-level golems.

Jia Yiluo's eyes flashed coldly, and he shouted loudly: "They want to escape? Kill them!"

The countless golem insects and birds formed black clouds that flew towards Yang Feng.

However, Yang Feng's Flesh Golem not only possesses Moonlight Warlock rank strength, but it also relies on the built-in super energy crystals as its power source. The countless golem insects and birds cannot catch up with him at all.

This is where powerful human Warlocks surpasses low-level Warlocks by far. By relying on their advantage in speed and all kinds of incredible secret methods, a powerful human Warlock can toy around with countless low-level Warlocks.

Only the hundreds of Starry Sky Rippers caught up with Yang Feng in one breath.

Alexia slashed out with her sword, and hundreds of sword rays sliced the hundreds of Starry Sky Rippers into pieces.

Killing intent shimmered inside Jia Yiluo's eyes: "Damn wretches. We just need to entangle them."

"Go to hell!" A fierce look in its eyes, the Dragon-winged Gold Roc flapped its wings and rushed out in a gust of wind. In an instant, it appeared in front of Yang Feng and extended a claw covered with golem force towards Yang Feng.

The claw of the Dragon-winged Gold Roc sealed the space off. Before it reached Yang Feng, a wave of despair and fear inundated him. The smart chip is running wildly, analyzing various methods of evasion and resistance. However, no matter which method he uses, the survival probability is 0%.

At the moment when Yang Feng was about to be engulfed by the frightening golem force, a black sword ray landed on the claw of the Dragon-winged Gold Roc.

As if cutting through tofu, the black sword ray sliced through the claw which is the part of the Dragon-winged Gold Roc with the strongest defense. At the same time, black threads spread along the Dragon-winged Gold Roc's huge body.

A look of despair welled up inside its eyes, and the Dragon-winged Gold Roc shrieked: "How is this possible? You are just a Bright World Warlock rank Blazing Angel! How can you cut me apart!?"

The Bright World Warlock rank Blazing Angel is indeed strong, but the Dragon-winged Gold Roc is also a Bright World Warlock rank Living Golem, and its combat strength is only a bit weaker. According to its calculations, it should be impossible for Alexia to cut it apart, let alone starting from its claw.

As it screamed, the Dragon-winged Gold Roc turned into countless bloody pieces.

"You're too weak! Since this is the case, then go to hell!" Alexia showed an enchanting smile and slashed at the fist-sized golem core inside the wings of the Dragon-winged Gold Roc.

The golem core is the life core of a Living Golem, and it has recorded all the secrets and information of the Living Golem. As long as the golem core has not been destroyed, the a Living Golem can use other

golems to construct a new body. Although the new body will be far inferior to the original one. But over the years, it can devour various materials and other golems in order to fully restore its body.

If the golem core isn't destroyed, the Living Golem won't perish. This is one of the most tricky parts about Living Golems. In the same rank, Warlocks may not be able to destroy the body of Living Golems, let alone their golem core.

"Stop!" With a roar, Jia Yiluo flipped his hands, and two Golem Whips made from countless runes shot towards Alexia like vipers.

The two Golem Whips suddenly split into hundreds of whips that entered the void. Hidden in the void, they resemble fierce beast lying in wait, ready to launch a shocking attack at any time.

The beautiful golem moved as well. Person and sword as one, as if she has turned into a huge sword, she slashed towards Alexia with tremendous might. Even Infinity Warlocks won't dare to take this slash head on.

Faced with the two Bright World Warlock rank attacks, the three pairs of black wings on Alexia's back spread, and the Ruler Armor extended and quickly formed a huge shield.

When the beautiful golem's sword strike landed on the huge shield, the abstruse runes covering the huge shield erupted, and a terrifying shock wave blew the beautiful golem away.

The Fallen Angel Sword containing dark force landed a slash on the Dragon-winged Gold Roc and erased it.

The Dragon-winged Gold Roc golem with Bright World Warlock rank cultivation base and golem force was thus wiped out by Alexia.

"In this case, die together!" A fierce glint flashed in Jia Yiluo's eyes, and the countless whips concealed in the void shuddered slightly and caused ripples in the space around Yang Feng.

At this moment, Void Assassins hidden in the void appeared suddenly, and chaotic spatial fluctuations permeated out of them.

Suddenly, Jia Yiluo's face fell, and an unclear premonition welled up inside him: "Not good!"

The queer spatial fluctuations enveloped the space at once, and the void fell into chaos, engulfing the whips hidden in the void.

Among human Warlocks, Moonlight Warlock rank experts and above have generally mastered part of the law of space, and can freely tread in the void.

However, there are many dangers in the void. It is not a place suitable for fighting. When fighting in the void, a moment of carelessness may lead to the void collapsing. The most fearsome void collapse may even seriously wound Warlock Emperor rank powerhouses. Besides, there are countless strange phenomena and void beasts that can devour anything in the void.

Because of this, once an expert escapes into the void, very few people will chase after them into the void.

The chaotic spatial ripples released in the void by the Void Assassins are equivalent to a self-detonation, which causes the void to collapse and devour everything. Even the Golem Whips that Jia Yiluo has spent a lot of precious materials to refine were devoured.

After she dealt with the Dragon-tinged Gold Roc golem, scorching light flashed in Alexia's eyes, her body blurred, and she appeared in front of the beautiful golem with a greatsword in hand and slashed towards her.

The beautiful golem retreated briskly. A space inside her opened, and tyrannical Sword Magic Golems rushed towards Alexia.

The Sword Magic Golems covered with blades struck by Alexia's Fallen Angel Sword were easily cut in half.

The Sword Magic Golems cut in half waved their swords at Alexia.

Alexia frowned, and Fallen Sky Fire enveloped the Fallen Angel Sword. The sword released sword rays shrouded by Fallen Sky Fire that struck the Sword Magic Golems, and the Sword Magic Golems ignited and burned to ashes.

The beautiful golem took advantage of this moment to retreat by dozens of kilometres, and flew into the golem swarm.

Countless bird golems pounced at Alexia.

Jia Yiluo spread the fingers of his hand, and invisible threads shot towards Yang Feng in the blink of an eye. If Alexia insists on pursuing the beautiful golem, then Yang Feng will be eradicated by Jia Yiluo with this move.

Chapter 626 – 100 Million Strong Mechanical Legion

"A pity!!"

Alexia sighed, her body fluttered, and she appeared in front of Yang Feng and waved her sword. A sword ray enveloped by black flames suddenly extended and turned into violent Fallen Sky Fire that burned the threads released by Jia Yiluo to ashes, and then swept towards Jia Yiluo himself.

Countless golems beside Jia Yiluo flew towards the Falling Sky Fire. When they were touched by Falling Sky Fire, they ignited with violent flames and turned into fireballs that fell from the sky.

Hundreds of thousands of golems rushed into the Fallen Sky Fire and blocked its advancement for a moment.

Taking advantage of this gap, Jia Yiluo's figure fluttered, and he flew into the golem crowd. He looked at Yang Feng with a reluctant expression and roared wildly: "Attack!"

The countless golems unleashed various attacks such as beams, ice cones, bone spurs, and poison blasting towards Yang Feng.

Alexia standing next to Yang Feng spread the fingers of her hand, and a black hexagram shield appeared in front of her.

The various attacks crashed into the hexagram shield and collapsed without even raising the slightest ripples.

Jia Yiluo looked at the invincible Alexia in the sky with astonishment in his eyes, and he exclaimed: "Is this a Bright World Warlock rank Blazing Angel? Impossible! Although a Bright World Warlock rank Blazing Angel is indeed stronger than we are, but not by this much! Then why, why is she so strong?"

A Blazing Angel is equivalent to a human Warlock peerless genius of the same rank who formed a virtual world.

Jia Yiluo and the other Living Golems possess the extremely dangerous golem force that can erode everything. However, in terms of combat power alone, these Living Golems are quite weaker than Alexia, and that is because they haven't recovered the power of their heyday.

After a moment, Jia Yiluo guessed the truth of the matter: "Yes, it's that armor secret treasure! That armor secret treasure has increased her power by dozens of times. Such a secret treasure would be rated as a first-rate secret treasure even in the Golem Dynasty."

Even though Jia Yiluo guessed the truth, but he still can only watch helplessly Yang Feng protected by Alexia quickly leave the Sword Puppet Holy's celestial body.

As soon as he flew out of the celestial body, Yang Feng abandoned the Flesh Golem avatar and returned to his true body.

When he returned to his true body, Yang Feng sensed the power constantly flowing from the small world, and he sighed lightly: "Sure enough, it's much more reassuring to be in my own body. The reaction speed is faster, and there are more means to deal with unexpected situations. It's no wonder that many Infinity Warlocks take the risk of using their true body when entering relic sites."

Avatars have all kinds of advantages. In low risk situations, avatars can be said to be a godsend. Even if the avatar dies, it won't harm the true body much.

However, in high risk battles, especially when confronting opponents who mastered spells and secret methods involving the law of karma, the opponent can injure the true body of the caster by attacking the avatar.

The Sword Puppet Holy's relic site taught Yang Feng a good lesson. If he hadn't brought Alexia and the Ruler Armor, his Flesh Golem may have been killed by now, and the Living Golems might have injured his true body severely through the law of karma.

Once he returned to his true body, Yang Feng issued an order. Apart from the battle robots necessary to guard the Andrak Plane, countless battle robots poured in through a top grade warp gate from the Andrak Plane.

Long aware that it won't be that easy to get a hold of this relic site of the Golem Dynasty, Yang Feng has made preparations to storm it.

It didn't take long for the desert to be covered by countless 3rd generation and remodeled 2nd generation battle robots.

The Moonlight Warlock Liu Yan from the Relic Site Search Department is watching the almost endless mechanical legion from a hillside, and shock filled her heart: "100 million people, is this the underlying strength of the Undying Mountain? To be able to mobilize 100 million elite troops, how fearsome. They should be occupying a grade 2 or grade 3 plane."

It's not that the Great Cloud Dynasty can't mobilize a legion formed of 100 million Great Warlocks. However, it is vast in area. The more places you occupy, the more places you need to guard. As such, if the Great Cloud Dynasty wants to mobilize 100 million Great Warlocks to form a legion, it can't do it in a short period of time.

Of course, in the world of Warlocks, the key to victory in conflicts lies mainly in top Warlocks and top secret treasures.

A Warlock legion formed from 100 million Great Warlocks is indeed a terrifying force, and even Bright World Warlocks Warlock will have a headache. But this isn't enough. If there is no Infinity Warlock standing guard, then the Great Cloud Dynasty's Infinity Warlocks can use various incredible secret treasures to easily destroy the Warlock legion formed by the 100 million Great Warlocks.

"So many Great Warlocks!"

"100 million, 100 million Great Warlocks! Is this the Undying Mountain's underlying strength?"

"No, they possess Great Warlock rank strength only thanks to secret treasures!"

"Even if it is the case, but they are still Great Warlocks! That's 100 million Great Warlocks!"

"The Undying Mountain is really astonishing!"

"..."

When the Warlocks unwilling to leave hiding in the distance saw the battle robots extend without end that appeared in the desert, shock filled their minds.

Many Warlocks who were dissatisfied with Yang Feng's Undying Mountain sobered up real quick when they saw the battle robots extend without end.

Yang Feng stood on a platform and gazed at the 100 million battle robot with a dignified look in his eyes.

It took him years to amass the 100 million battle robots. Although Yang Feng can easily produce this many battle robots within a year with the production capability of his munitions factories, but he doesn't have enough resources.

The Andrak Plane is Yang Feng's current base. He cannot use destructive mining methods to collect all the resources of the plane.

The Andrak Plane is a grade 6 plane. By devouring various kinds of energy, the plane origin will can recover and bear various ore veins in the plane.

Once Yang Feng uses destructive mining methods, although he can obtain a tremendous amount of resources in a short period of time, but the Andrak Plane's plane origin will be severely damaged, and may even perish. Once the plane origin will is dead, the entire plane will become a dead celestial body no longer suitable for hosting intelligent life.

Yang Feng finally made a decision after countless calculations: "Fortunately, the Li Gui Province has fallen under my control. Even if all of these battle robots are destroyed, I can use the resources of the Li Gui Province to recover my losses in just a year. I can afford this gamble!"

Just the three Living Golems are invaluable, let alone the celestial body itself that is a relic site of the Sword Puppet Holy.

There aren't many relic sites of Holy step Holy Spirit Warlocks in the Cangzhi Plane, and each one of them is extremely precious. Holy step Holy Spirit Warlocks are supreme experts of many planes. Although they are far from being a match for Warlock Emperors one-on-one, but in a fight between two Warlock Emperor rank experts, they can tip the scales to one side.

Theoretically, 100 Holy step Holy Spirit Warlock rank powerhouses teamed up using an Empyrean grade secret treasure can barely defend against against a Warlock Emperor. With enough Holy step Holy Spirit Warlock powerhouses coupled with Empyrean grade secret treasures, it is even possible to defeat a Warlock Emperor.

But it's extremely difficult to produce Holy step Holy Spirit Warlock rank powerhouses. After all, they are at the apex of Holy Spirit Warlocks. There has never been 100 Holy Step Holy Spirit Warlocks appear at the same time. Besides, the Holy step Holy Spirit Warlocks all belong to different forces, making it basically impossible for them to team up.

Even if there really were 100 Holy step Holy Spirit Warlocks joining forces, and they had an Empyrean grade secret treasure, they could only display their strength in defensive battles. Warlock Emperor rank experts can naturally use secret methods they grasp to pick them off one by one.

Nevertheless, Holy step Holy Spirit Warlock rank powerhouses are still top-notch existences. At the time, there were 12 Holy step Holy Spirit Warlocks following the Time Lord.

If a Holy step Holy Spirit Warlocks rank expert ever comes to the Cangzhi Plane, the current forces in the Cangzhi Plane won't be able to resist them at all. Even if the Great Cloud Dynasty and the three dynasties of the Western World join forces, they still will have a hard time contending with a Holy step Holy Spirit Warlock rank expert.

Yang Feng naturally doesn't want to give up on a relic site of such a fearsome existence.

The resources provided by the Li Gui Province are sufficient for for him to practice cultivation until the pinnacle Bright World Warlock rank. However, things like resources are never enough for Warlocks.

Yang Feng wants to advance to an Infinity Warlock from a Bright World Warlock, and then to a Warlock Monarch. The resources required for that are astronomical. He cannot afford to miss any opportunities.

"Attack!" At Yang Feng's command, countless battle robots flew towards the relic site of the Sword Puppet Holy.

The battle robots are disguised as humans. At a glance, it seems like countless men in black suits have turned into a black cloud flying into the celestial body with 100 Star Destroyer Battlestars and 20 Interstellar Carriers taking the lead.

As soon as the huge mechanical legion entered the relic site of the Sword Puppet Holy, a terrifying spatial force enveloped it.

Chapter 627 – Crushing Everything in the Way

Space Disruptors in the mechanical legion released powerful spatial disruption ripples, and the surrounding space turned chaotic.

The spatial force lasted for a moment before it collapsed.

The huge mechanical legion has just entered the relic site, when countless golems rushed towards the mechanical legion like raindrops.

The Star Destroyer Battlestars fired their secondary artilleries, and a rain of light descended on the 100 billion golems.

Under the bombardment of the dense rain of light, more than 1 million low-level golems were turned into ashes drifting in the air.

Countless Swift Eagle Fighters flew out of the 20 Interstellar Carriers at a terrifying speed and attacked the cannon fodder low-level golems

The Swift Eagle Fighters' speed is 5 Mach higher than the maximum speed of Undyings, and their attack speed is 3600 beams per minute.

The small fry golems hit by the Swift Eagle Fighters were blown to smithereens.

Even if a Bright World Warlock was besieged by the Swift Eagle Fighters, they would have to spend a lot of effort to destroy the Swift Eagle Fighters, or else they will be pursued and even killed.

There was a flash of excitement in Alexia's beautiful eyes: "What powerful weapons! These weapons are the best tools to deal with those small fry golems."

Alexia was the commander of a Fallen Angel legion. After fighting for tens of thousands of years, she finally advanced to the Bright World Warlock rank.

Despite her long track record, this is her first time seeing powerful vessels such as the Star Destroyer Battlestars and the Interstellar Carriers.

Under the frenzied attack of the two kinds of weapons, the small fry golems were blown apart before they could get close.

Even if there are some fry golems who sneaked in through the cracks, they are dealt by the Undyings and other 3rd generation battle robots.

The huge mechanical legion only has 100 million units. But when it entered the 100 billion strong golem legion, it was like Moses parting the Red Sea. It easily steamrolled open a path in the golem legion.

As countless golems were shredded by the artillery fire of the Star Destroyer Battlestars, explosions sounded everywhere.

The battle robots scattered in the relic site quickly flew towards the huge fleet.

Jia Yiluo looked at the huge fleet in the sky with shock in his heart: "So powerful! Is this the Undying Mountain's underlying strength? How formidable. They already have some semblance of the Golem Dynasty's mechanical legion!"

In the early days, the Golem Dynasty had various golem legions. Among them, the mechanical legions were more so a sharp sword of the Golem Lord. But after he developed Living Golems, the Golem Lord tossed the mechanical legions aside, and Living Golems flooded the Golem Dynasty.

It isn't that the Golem Dynasty's mechanical legions were weak, but the cost of maintaining a large mechanical legion far exceeded the cost of maintaining a Living Golem legion.

In a golem city, Bai Yuxian enveloped by a transparent halo disappeared from amid a golem army.

When the huge mechanical legion flew over the city, light rained down on the golem army with great precision.

The 1 million strong golem army was decimated, with only tens of thousands of golems escaping.

Bai Yuxian looked up at the huge fleet in the sky from inside of a building, and shock glimmered in her beautiful eyes: "Is this the army of the Undying Mountain? To be able to equip an army of such a scale with secret treasures, the accumulation of hundreds of thousands of years is indeed extraordinary!"

The Great Cloud Dynasty is the most powerful Warlock dynasty in the Cangzhi Plane, and possesses all kinds of powerful and incredible secret treasures. The dynasty even has Magic Note Throne, an Empyrean grade secret treasure that can mass-produce Infinity Warlocks. Even so, there are very few super-large weapons like the Star Destroyer Battlestars in the Great Cloud Dynasty.

In the world of Warlocks, the ultimate goal of all Warlocks is to become an invincible Eternal with an endless lifespan. Most secret treasures are developed with Warlocks as users and template.

After the collapse of the 7th Warlock Dynasty the Magic Note Dynasty known as the Secret Treasure Dynasty, the alchemy arts for refining large warship secret treasures have been destroyed in the chaos of war.

In the Great Cloud Dynasty, there are indeed some warship secret treasures whose might is not inferior to that of the Star Destroyer Battlestars, but they are few in number. In the Great Cloud Dynasty, they may be a total of about 100 warships that can surpass Star Destroyer Battlestars.

Bai Yuxian turned her eyes, then her figure fluttered, and she flew towards the huge fleet. At the same time, she spoke loudly: "I am Bai Yuxian, I request an audience with the Young Master!"

Yang Feng glanced at Bai Yuxian and muttered: "What a cunning vixen!"

Now that Bai Yuxian has announced her identity, Yang Feng can't just fire a Star Destroyer Artillery and kill her together with the golems.

This secret dwelling of the Sword Puppet Holy guarded by the freakish Living Golems who have lived for hundreds of thousands of years must have amazing treasures.

For Yang Feng, it would be best if everyone else died here.

But since Bai Yuxian has openly asked for help, Yang Feng can't easily refuse her. After all, the Undying Mountain is already nominally classified as a subordinate of the Great Cloud Dynasty. Although Yang Feng doesn't care about the Great Cloud Dynasty, but he doesn't want to easily offend this behemoth in the name of the Undying Mountain.

Since the Battle Demon Sect's 'Yang Feng' has been labeled a traitor, Yang Feng can now only roam freely in the Great Cloud Dynasty with the identity of the Undying Mountain's 'Lei Ming'.

The huge mechanical legion cleared up a path. At the same time, countless detection rays and scanning ripples enveloped Bai Yuxian like a tide. If there's anything abnormal about her, it will be revealed by the scanning.

Bai Yuxian let the detection rays and scanning ripples land on her. Although she knows that this will reveal much of her physical information, but she also understands that if it wasn't for this, Yang Feng would never let her board his battleship.

After repeated scans, Bai Yuxian's figure flickered, and she came to the deck of Yang Feng's flagship.

There is a luxurious litter placed on the deck, and Yang Feng embracing two gorgeous, sexy Fallen Angels is sitting on the litter. He looks domineering, as if he doesn't care about the 100 billion low-level golems.

Bai Yuxian smiled brightly and praised: "The Undying Mountain's foundation is astonishing. To be able to deploy 100 million elites, worthy of an ancient sect. This has been an eye-opener for me."

Eyes burning brightly, revealing his white teeth, Yang Feng uttered: "That's only natural. The Undying Mountain has painstakingly developed for hundreds of thousands of years in the grade 2 plane Death Cloud Realm, it's only natural for us to have a deep foundation. I came to the Cangzhi Plane to make great achievements for Undying Mountain and become the sole successor of the Undying Mountain!"

Bai Yuxian secretly analyzed: "Grade 2 plane, the Undying Mountain has occupied a grade 2 plane. No wonder they can develop to this extent. But Death Cloud Realm? That is not one of the 36 primary material planes. It should be a grade 2 plane that hasn't been discovered yet."

In the vast universe, human Warlocks are only aware of the grade 1 plane the Cangzhi plane and the 36 primary material planes.

The 36 primary material planes are all grade 2 planes. To be more precise, they are superior grade 2 planes that are infinitely close to grade 1, as they all have given birth to Warlock Emperor rank existences.

Apart from the 36 primary material planes, there are also some secondary grade 2 planes. But in those planes, Holy Spirit Warlock or supreme god rank existences are the limit.

Even so, controlling a grade 2 plane, and given hundreds of thousands of year of time, this is enough for an ancient Warlock group to develop into a behemoth.

Although Bai Yuxian is extremely intelligent, but what came out of Yang Feng's mouth was all lies, so her analysis is just a waste of time.

"Lei Ming, you wretch, I won't forgive you!" Watching the 100 billion golems being crushed with bloodshot eyes, Jia Yiluo roared, and he breathed in, and a huge black hole emerged from his mouth and exuded astonishing attractive force sweeping in all directions.

Jia Yiluo easily swallowed tens of thousands of Great Warlock rank golems beside him, and then expanded and turned into a 100-meter-tall golem giant. The fluctuations of power emitted from him are rising sharply.

Yang Feng smiled coldly: "Golem Fusion, the strongest secret method of Living Golems. If let to your own devices, you really might restore your full strength. Unfortunately, I can't give you this chance! Attack!"

The 30 Star Destroyer Battlestars fired their primary artilleries, and 30 beams with the might of full strength attacks of pinnacle Bright World Warlocks tore through the void and blasted into Jia Yiluo in an instant.

Bombarded by the 30 Star Destroyer Artillery beams, Jia Yiluo who has transformed into a 100-meter-tall golem giant crumbled bit by bit.

A black ray of light shot out from the battered giant golem Jia Yiluo has transformed into and escaped.

Chapter 628 – Golem Mountain

A crazed look in his eyes, Jia Yiluo roared loudly: "Kong Yiluo, Mei Yiluo, the two of you merge with me! With the three of us fused together, we are sure to destroy these intruders."

Living Golems can merge and produce a higher level Living Golem.

The Golem Lord's 3 Empyrean Golems and 12 Holy Golems came about from countless golems fusing together, and countless secret methods and resources strengthening them.

Sound waves spread in all directions and enveloped the entire relic site.

The beautiful golem with a greatsword wrinkled her eyebrows, her figure blurred, and she disappeared.

Kong Yiluo who can freely manipulate space and appear anywhere in the relic site also didn't appear.

A look of madness in his eyes, Jia Yiluo snarled: "You won't come to merge with me? This is treason, a blatant act of treason against the Sword Puppet Holy! How dare you betray master's orders! You traitors!"

Regardless of how Jia Yiluo roared, Yang Feng commanded the huge mechanical army to clear a path from amid the siege of the 100 billion golems and fly towards the center of the relic.

At the very center of the relic site, there is a huge mountain 10,000 meters tall suspended in the air, and on top of the huge mountain is a hall.

The closer they got to the huge mountain, the more frantic the golems became.

But with the comprehensive artillery barrage in place, the golems were obliterated before they could get near the huge fleet

Bai Yuxian looked at the huge mountain with a complex look in her beautiful eyes: "The relic site of the Sword Puppet Holy is extremely dangerous. It is enchanted with a rare karma spell and a large magic ban array, and there are countless low-level golems and three Bright World Warlock rank Living Golems here. Even an Infinity Warlock may die and become a golem here if careless. Yet he solved this problematic relic site with this method, I'm speechless."

In this relic site, there are many dangers, including the karma spell that cuts off the connection between the avatar and true body, the large magic ban array that blocks Warlocks from absorbing the energy of heaven and earth, the 100 billion low-level golems, and the Bright World Warlock rank Living Golems. Even if an Infinity Warlock rank powerhouse came here, they would have no other choice but to die.

Yet such a dangerous relic site is being leveled by Yang Feng's 100 million strong golem legion. Bai Yuxian has seen the exploration of relic sites many times, but this is the first time she witnessed such a violent, tyrannical, and unreasonable way to unravel a relic site.

The Sword Puppet Holy's relic site is indeed dangerous and full of restrictions. However, when faced with restrictions, Yang Feng orders the battle robots to use their lives to test them, and then uses Star Destroyer Artilleries to smash the restrictions apart.

After paying the price of about 2 million battle robots being destroyed, Yang Feng finally reached the Golem Mountain.

Starry Sky Rippers flew towards the Golem Mountain in order to test the restrictions placed on it.

When the dozens of Starry Sky Rippers reached the airspace above the Golem Mountain, a mighty force enveloped them, and they fell down from the sky.

"Erosion by unknown forces!"

"After analysis, there is a 99.9% chance that a restricted airspace array of the Golem Dynasty era is place there!"

"At the same time, there is also a gravity array and an enemy identification system!"

"..."

As soon as the Starry Sky Ripper landed on the Golem Mountain, a great amount of information was transmitted by the level-3 optical computer.

Yang Feng asked: "Is it possible to fully analyze the arrays on the Golem Mountain?"

A string of information came from the level-3 optical computer: "With the current database, it's impossible to analyze and crack the arrays on the Golem Mountain. According to the calculations, these

arrays were set up by a powerhouse surpassing the Holy step Holy Spirit Warlock rank. According to the characteristics of that era, this Golem Mountain should have been enchanted with the Golem Lord's spells."

With a look of doubt in eyes, Yang Feng brought up the holographic projection of the Golem Mountain: "Golem Lord? Why would he appear here and enchant the Golem Mountain with spells?"

When the holographic projection of the Golem Mountain appeared on the deck, countless abstruse runes containing the laws of heaven and earth appeared on the holographic projection.

When she saw the holographic projection, Bai Yuxian's face changed dramatically, she screamed in horror, and two lines of tears of blood ran down her face: "Stop! Otherwise, we will be transformed into golems!"

Yang Feng only glanced at the holographic projection of the Golem Mountain, when a gray gas covered him, and his thoughts began to slow down.

Yang Feng's countenance changed greatly, and he ordered posthaste: "Cut off the projection immediately!"

However, queer runes appeared on the projectors, and they didn't stop.

Queer runes also appeared on Yang Feng and Bai Yuxian, and they eroded their life force and transformed it into golem force.

From afar came Jia Yiluo's laughter: "Ha-ha. Lei Ming, you oaf, this Golem Mountain is a Supreme God Mountain the Golem Lord bestowed the Sword Puppet Holy. It isn't something that you a descendant of traitors can touch. You're screwed!"

Not daring to confront Yang Feng head-on, Jia Yiluo could only hide in the dark and urge the 100 billion golems to fight Yang Feng. However, with Bright World Warlock rank cultivation base, even if they are thousands of kilometres apart, he can easily 'see' Yang Feng.

"This is a method of a Warlock Emperor, how truly queer!"

Yang Feng wanted to close his eyes, but his eyelids didn't budge. It looks like he is absorbed in the holographic projection of the Golem Mountain. Numerous runes formed a strange mark that sealed his greatest trump card, the small world, and cut off all the life forces in his body, making him unable to move a finger.

A black sword ray shone and violently struck the holographic projection of the Golem Mountain. Containing the law of dark, the sword ray extinguished the holographic projection of the Golem Mountain from the root, from a higher dimension.

Boom! Boom! Boom The holographic projectors exploded, and the holographic projection of the Golem Mountain collapsed and disappeared.

Yang Feng heaved a sigh of relief, looked at Alexia standing beside him, and smiled: "The Golem Lord is indeed powerful. Unfortunately, he is dead already. No matter what tricks he left behind, he cannot stop the living!"

Equipped with the Ruler Armor, Alexia is comparable to an Infinity Warlock in terms of battle prowess. Besides, the dark force she grasps as a Fallen Angel is a nihility force that can eliminate all existences from a higher dimension. This is the essence of power of Fallen Angels. As a Bright World Warlock who has experienced countless battles, she has already mastered the power of Fallen Angels.

It was because of Alexia that Yang Feng dared to enter this dangerous relic site of the Golem Lord. Otherwise, with the high degree of danger, he would only enter this relic site once he reached the Bright World Warlock realm.

With a fierce smile on his face, Jia Yiluo entered the golem legion stealthily: "All the treasures of the Sword Puppet Holy are located in the hall at the top of the Golem Mountain. If you have the ability, go in and get them!"

Yang Feng raised his eyebrows and sent a 3rd generation Undying battle robot towards the golem mountain.

As soon as the Undying reached the airspace above the Golem Mountain, it fell to the ground. Struggling like an insect trapped in a spiderweb, the Undying crawled for less than 100 meters before it was eroded by the gray gas, and became a golem.

Yang Feng frowned and ordered: "Fire the artilleries!"

A dense rain of light fired from the Star Destroyer Battlestars blasted into the Golem Mountain.

When the energy beams that can easily kill Moonlight Warlocks blasted into the Golem Mountain, they disappeared at once, leaving no marks on the Golem Mountain.

The level-3 optical computer quickly put out an analysis: "The energy beams were absorbed by the Golem Mountain. It is not advisable to continue using low-level energy artilleries!"

Yang Feng said decisively: "Fire the Star Destroyer Artilleries!"

The 30 Star Destroyer Battlestars shone brightly, and 30 Star Destroyer Artillery beams slammed into the Golem Mountain.

A Star Destroyer Artillery beam can extinguish the plane origin will of a grade 9 plane, and another beam can shatter the grade 9 plane itself.

Even in the Cangzhi Plane, a Star Destroyer Artillery beam can easily pulverize a 10,000-meter-tall mountain.

Faced with the 30 beams, even an Infinity Warlock would have to retreat, not daring to resist them head-on.

Before the 30 beams blasted into the Golem Mountain, runes atop the mountain that has been still all along lit up, and 30 hexagrams blocked in front of the 30 beams.

When the beams slammed into the hexagrams, they entered the hexagrams and disappeared.

After the beams disappeared, the hexagrams disappeared as well. Remained unfazed, the Golem Mountain emitted a strange aura.

When he saw this, Yang Feng frowned and looked profoundly at the top of the Golem Mountain: “Even the Star Destroyer Artilleries have no effect. This Golem Mountain is worthy of being an object the Golem Lord strengthened with spells.”

Chapter 629 – Devouring Golem Force

Yang Feng gazed at the Golem Mountain from afar and frowned deeply. He can sense the terror of a Warlock Emperor.

The Golem Mountain is just a secret treasure the Golem Lord refined using secret methods. After hundreds of thousands of years, it has weakened by a great deal. But Yang Feng who has 100 million battle robots has no way to seize it.

Even if he sent all the battle robots to climb the mountain, they will be made into golems all the same.

“Ha-ha, Lei Ming, the Sword Puppet Holy hid his ultimate marvel on the top of the Golem Mountain. However, even if I tell you what it is, you still have no way of obtaining it. No matter how many troops you have, we will destroy your legion step by step.” Jia Yiluo’s sinister laughter came from afar, and gray golem force silently hit more than a dozen Starry Sky Rippers.

The more than a dozen Starry Sky Rippers instantly turned into golems, and then beams slammed into them and tore them to pieces.

The loss of more than a dozen Starry Sky Rippers is nothing to Yang Feng. However, Jia Yiluo expressed his determination to never give up with this stunt.

This relic site of the 6th Warlock Dynasty the Golem Dynasty refined from a celestial body is vast, and Jia Yiluo is quite familiar with it. He can use guerrilla tactics to attack Yang Feng and eliminate his battle robots continuously.

This is also the most troublesome aspect about powerful Warlocks. If you don’t kill them, they will initiate guerrilla warfare and become a pain in the butt.

Yang Feng didn’t care about the threat of Jia Yiluo. Warlock tracking methods are very strange and unpredictable. Once Yang Feng has fully seized the relic site, he can mobilize Warlocks proficient in tracking spells to come strangle the Bright World Warlock rank golem Jia Yiluo.

If Jia Yiluo and them escaped, then that would be it, but since they stayed behind, only death awaits them.

After killing of the Marshal Jing, Huang Yihe and the other infinity Warlocks of the Ten Great Sects vanished without a trace. One of the main reasons for this is that they are worried about the Demon Hunting Division chasing them.

The Great Cloud Dynasty’s Demon Hunting Division is proficient in various tracking spells. At the same time, there are many Warlocks proficient in divination in the division. Even an Infinity Warlock such as Huang Yihe doesn’t dare to expose his whereabouts lightly. If you are a little careless, you will be quelled by the Great Cloud Dynasty’s powerhouses.

The criminals on the Demon Hunting Division's wanted list don't dare to perform large-scale massacres in the Great Cloud Dynasty rashly. Otherwise, they will risk being killed by the Demon Hunting Division.

After performing a few shocking massacres in the Great Cloud Dynasty, many criminals chased by the Demon Hunting Division will either flee to other planes or submit to some bigwig of the Great Cloud Dynasty and become their hunting dog.

Yang Feng who has control over countless Warlocks in the Li Gui Province can establish an organization similar to the Great Cloud Dynasty's Demon Hunting Division. As such, hunting old antiques like Jia Yiluo isn't a problem at all.

"It seems that I can only use that card. If it's not useful, then I'll have to give up on the Golem Mountain."

With a look of determination in his eyes, Yang Feng spread the fingers of his right hand, and countless Devourers flew out and formed a black torrent flowing towards the Golem Mountain.

Bai Yuxian's eyes suddenly dimmed, and her vision turned dark. She can no longer feel anything. With this, she realized that there is something Yang Feng doesn't want her to see.

As soon as the Devourers reached the Golem Mountain, they began to devour the power of the Golem Mountain.

Suddenly, a weird mark appeared, and gray golem force swept towards the Devourers. As if the Golem Mountain has turned into a Living Golem, a copious amount of golem force extended towards the Devourers.

The swarm of Devourers opened their mouths, and powerful attractive force drew the golem force into their bodies.

Countless runes lit up on the Devourers, and the connection between them and Yang Feng became unstable, as if it could be severed at any time.

As a power developed by the Golem Lord, golem force represents the pinnacle of power in the Cangzhi Plane. However, Devourers are the crystallization of one of the most advanced technologies of the xizhu. They possess unpredictable might. The two strongest forces locked in a temporary stalemate.

With a dignified look in his eyes, Yang Feng released more Devourers who turned into a black swarm that flew into the Golem Mountain and devoured golem force frantically.

Yang Feng silently recited an incantation and spurted a large mouthful of blood essence, which turned into a mist of blood. Following an invisible rule, the mist of blood entered the Devourers.

Suddenly, queer marks lit up on the carapace of the Devourers. These marks are devouring marks Yang Feng created by combining numerous secret methods.

As soon as the marks appeared, the Devourers became more vigorous, and fully devoured the gray golem force. At the same time, the strange marks on their carapace became clearer, and emitted an abstruse aura.

Seeing this scene, Jia Yiluo hiding in the distance was struck dumb, eyes flashing with incredulity. He muttered: "Impossible! That's golem force infused by the Golem Lord! How could, how could something devour it? This is impossible!"

The golem force of the Golem Lord is the highest level of power in the endless planes, and it's even highly toxic to other Warlock Emperor rank powerhouses. Other Warlock Emperor rank powerhouses may be able to resist the Golem Lord's golem force, but not devour it.

Devourers are things Yang Feng refined from an Empyrean grade secret treasure material coupled with the highest xizu technology. As they are the core of his Warlock path, Yang Feng spent countless outstanding treasures and employed various secret methods to nourish these freaks. That is how they can devour the Golem Lord's golem force.

After the Devourers devoured and refined the golem force, they trembled, and eventually evolved, and the marks on their carapace became even more queer.

As if water from a river that broke the embankment, the Golem Mountain's golem force poured into the Devourers, causing them to expand and exude a fierce aura.

If the Golem Lord's true body was here, he could use golem force to erode the Devourers into golems. But the golem force not controlled by the Golem Warlock cannot stop the Devourers.

After losing the support of the golem force, the magic restrictions of the 10,000-meter-tall Golem Mountain lost their light.

It didn't take long for the Golem Mountain's entire golem force to be devoured by the Devourers. Countless Devourers formed a black insect cloud and flew into Yang Feng's small world, where they absorbed a tremendous amount of energy and began their second evolution.

A Starry Sky Ripper flew to the foot of the Golem Mountain, and walked along the path opened by the Devourers toward the top.

Enigmatic light flickered inside Bai Yuxian's beautiful eyes, and her gaze fell on the hall at the top of the Golem Mountain.

Treasures of the Sword Puppet Holy, even if it's a Holy grade secret treasure, it's enough to decide the fate of a sect. With a Holy grade secret treasure as the foundation, no one will look down on you.

Although the 6th Warlock Dynasty is famous for its golem arts, but it has also produced many powerful secret treasures. Even if it is the Bai family, they only have a few pieces of secret treasure refined by Holy step Holy Spirit Warlocks.

Fearsome auras rose, and Bright World Warlocks of the three dynasties, the Two Great Sects, the Eight Great Families as well as rogue Bright Warlocks turned into streams of light and flew in the direction of the Golem Mountain.

The Bright World Warlocks didn't use too much power when fighting the golems. Instead, they used stealth secret methods to hide, and then at the last moment, they rushed to fight over the treasures of the Sword Puppet Holy.

There are more than 20 Bright World Warlocks coming from various forces of the Cangzhi Plane gathered here. Yang Feng doesn't dare order the Star Destroyer Artilleries to attack them and risk universal condemnation.

Each Bright World Warlock is a Great Elder of a powerful force, and has a sublime status. Unless there is an irreconcilable enmity, Warlock groups won't easily kill Bright Warlocks of other Warlock groups.

Yang Feng looked at the hall and contemplated for a moment, a grave look in his eyes.

Numerous 3rd generation battle robots turned into streams of light and flew towards the hall, collecting the various treasures inside.

That hall is in the style of the 6th Warlock Dynasty the Golem Dynasty, and uses countless rare materials. At the same time, there are specimens of Moonlight Warlock rank extraordinary life forms and above placed in the different rooms of the hall.

The specimens of the extraordinary life forms contain a part of the blood essence of the extraordinary life forms, and there are even specimens of Bright World Warlock rank extraordinary life forms.

If these specimens are sold outside, each one of them can give rise to a powerful Bloodline Warlock family.

Yet the Bright World Warlocks didn't spare them more than a look. Instead, they rushed towards the core of the hall.

Countless 3rd generation battle robots quickly moved the specimens and all other valuables out of the hall.

Chapter 630 – Bloody Stele

"Here lies the Golem Lord slain by Huang Ling. People of future generations, you mustn't break this seal..."

When the hundreds of Warlocks from different forces broke into the core part of the hall, they saw a huge stele inscribed with bloody runes located at a side of the hall. As if a primeval beast, the stele exudes frightening fluctuations of power containing the laws of heaven and earth.

"The Golem Lord was slain?"

"How is that possible?"

"Huang Ling, who is that? There is no such person in history!"

"..."

When the Warlocks who intruded into the hall saw the bloody runes inscribed on the giant stele, their faces changed dramatically, and they went into an uproar.

The Golem Lord of the 6th Warlock Dynasty the Golem Dynasty was an unequalled existence in the world. Since his ascension to the throne, he has never lost a fight.

After the Golem Lord ascended the throne, he once slayed a Warlock Emperor rank being, and then refined them into the strongest of the three Empyrean Golems – the Demon Empyrean Golem.

After refining the Dark Empyrean Golem, the Warlock Emperor rank powerhouses hidden in the countless planes retreated whenever they came across the Golem Lord, letting the human Warlocks conquer the countless planes and obtain endless resources.

The Golem Lord who is recognized as one of the seven most powerful human Warlocks in the Cangzhi Plane was slayed by someone else, this is simply unbelievable.

“Empyrean Origin Blood Essence Fruit!”

“What? Empyrean Origin Blood Essence Fruit? Where is it?”

“Where is it? Empyrean Origin Blood Essence Fruit!”

“...”

Suddenly, excited voices sounded, and the Warlocks no longer looked at the giant stele, but instead searched for a the Empyrean Origin Blood Essence Fruit.

Empyrean Origin Blood Essence Fruit is a divine grade treasure that requires the blood of Warlock Emperor rank experts and special secret methods to be produced. Only one such fruit is enough to break through the heaven-man boundary and propel the soul aptitude of a human Warlock to superior level-8 from superior level-7.

According to legend, 10 Empyrean Origin Blood Essence Fruits used together can promote the soul aptitude of a human Warlock to inferior level-9 from superior level-8.

Of the Eight Warlock Emperors, except for the Dawn Lord who had superior level-8 soul aptitude, the other Seven Warlock Emperors all had level-9 soul aptitude of legends!

As you might imagine, Empyrean Origin Blood Essence Fruits are virtually priceless. Even Holy Spirit Warlock and Warlock Emperor rank powerhouses will be moved by Empyrean Origin Blood Essence Fruits.

The Bright World Warlocks swept the hall with their gazes and quickly found a dais in the center of the hall. On the dais, there is a flower pot inscribed with countless mysterious incantations. The flower pot contains crimson blood, which releases wisps of Empyrean might.

Additionally, there is a three-meter-long black sword broken in two placed on the dais. Exuding a terrifying aura, the black sword is obviously a top secret treasure.

Suddenly, the inscriptions on the stele released majestic light, and a transparent barrier appeared. Minute ripples surged on the surface of the barrier.

The bloody words inscribed on the stele appear to be furious, and the words ‘Huang Ling’ abruptly formed into a blood blade that cut through the void and struck lightning-fast.

A Glorious Sun Warlock has just cast a spell, when he was cut in half by the blood blade without the slightest resistance. All his blood essence and life force poured out of him and entered the words 'Huang Ling', which then returned to the stele.

"Karma spell!"

"All the life-saving spells of that Glorious Sun Warlock were eliminated, he was killed from the origin. This is the power of a karma spell!"

"What a scary spell. The person who set up this stele, even if they aren't a Warlock Emperor, they aren't that much weaker.

"This relic site has been around for hundreds of thousands of years. To have so much power after such a long time, how scary!"

"..."

Seeing this scene, the surrounding Warlocks inhaled a breath of cold air.

Karma spells are a kind of spell that Infinity Warlock rank beings and above must master. Infinity Warlocks possess incredible death substitution secret methods. As long as there is a drop of blood left, many Infinity Warlocks can be reborn, and then restore their strength step by step.

But Infinity Warlocks who mastered karma spells can kill the enemy from the origin. They can attack the enemy through avatars and projections.

Therefore, many Infinity Warlocks are unwilling to use avatars and projections that are weaker than their true body to confront enemies of the same rank, or enemies who have karma weapons. They prefer to use their true bodies to fight such enemies.

The strange stele inscribed with bloody characters was actually enchanted with a karma spell, which is obviously far beyond the ability of ordinary Infinity Warlocks.

The Bright World Warlocks looked at the strange stele with a dignified look in their eyes.

As one of the most terrifying kinds of spells, karma spells can erase the people 'foreordained' to die. Faced with a karma spell, death substitution secret methods are virtually ineffective. Only death substitution secret methods that also contain the law of karma may be effective.

Yang Feng has a god clone in the Feisuo Plane. If his true body dies, the clone in the Feisuo Plane will not be affected. However, if he is killed by a karma spell, then his clone will die along with his true body. This is the terror of karma spells.

After casting several detection spells to examine the queer stele, Bartolone said solemnly: "This stele does indeed possess tremendous power. But after the erosion of time, the remaining power is limited. We can destroy it if we join forces. Everyone, let's join forces and destroy this stele, and then compete for the treasures in here."

The rest of the Warlocks agreed: "Alright!"

Claud's eyes flashed fiercely, and he threatened: "Whoever doesn't attack the stele won't be eligible to fight for the treasures in here after the boundary is broken. Anyone like that, get out now, or we will eliminate you!"

The Warlocks in the hall hesitated for a moment, and then most of them nodded in agreement.

Dozens of Moonlight Warlocks and Glorious Sun Warlocks deliberated for a moment, glanced deeply at the treasures in the hall, and then blurred into motion and flew to other places of the hall.

Although the Empyrean Origin Blood Essence Fruit and the secret treasure in the center of the hall are beyond precious, but they have to compete with the Bright World Warlock old monsters in order to get them. Since they believe they aren't a match for the Bright World Warlocks, these Moonlight Warlocks and Glorious Sun Warlocks chose to give up.

However, many Moonlight Warlocks and Glorious Sun Warlocks remained. They stared at the two treasures with ambition glimmering in their eyes.

Empyrean Origin Blood Essence Fruit can let you break through the heaven-man boundary and advance your soul aptitude to superior level-8. Once ingested, many Glorious Sun Warlocks will advance to Bright World Warlocks without suspense, and will even have a chance to advance to Infinity Warlocks.

Among the countless people in the Cangzhi Plane, there is only a handful of outrageous geniuses born with superior level-8 soul aptitude. On average, one such genius is born every 1,000 years.

Not unlike Yang Feng, most of the geniuses who possess superior level-8 soul aptitude have used various beyond precious treasures to promote their soul aptitude to this stage.

Peerless treasures such as Empyrean Origin Blood Essence Fruit are extremely hard to come by.

"Go!" Bartolone roared loudly, and then silently recited an incantation and pointed with a finger, and a black ray shot towards the stele.

The rest of the Warlocks also recited incantations and cast various spells shooting at the stele.

The bloody words on the stele surged and released vast power that condensed into a 10-meter-long blood blade.

As soon as the huge blood blade appeared, it was hit by various spells, and numerous marks wrapped around and bound it.

There are more than 20 Bright World Warlocks present, some of whom are top Bright World Warlocks from the three dynasties, the Two Great Sects, and the Eight Great Families. Together, they can quell even an Infinity Warlock.

Although the huge blood blade could slay a Bright World Warlock, but under the siege of more than 20 Bright World Warlocks, it finally shivered and crumbled.

When the huge blood blade crumbled, the stele crumbled.

"You will regret this!" A helpless sigh came out at the moment when the stele shattered.

“Empyrean Origin Blood Essence Fruit!” With a flash of greed in his eyes, a Bright World Warlock extended his hand and sent a Mage Hand towards the Empyrean Origin Blood Essence Fruit.

The broken sword placed on the dais may be a Holy grade secret treasure, but it cannot compare to the divine grade beyond precious Empyrean Origin Blood Essence Fruit.

For Warlocks, a treasure that can enhance their strength is far more important than a Holy grade secret treasure.

Before the Mage Hand could touch the Empyrean Origin Blood Essence Fruit, it was blocked by a barrier, and then all its power was swallowed by the strange barrier.

“Sure enough there is a barrier set up!”

“That is only natural. Without a barrier, the Empyrean Origin Blood Essence Fruit would have withered long ago!”

“...”

The Bright World Warlocks discussed, their eyes shot with blood. At the same time, they blurred into motion and turned into streams of light darting towards the Empyrean Origin Blood Essence Fruit.
