Chapter 851 – Slaying the Red Monarch

Yang Feng uttered with a smile: “Interesting, is it imperishable body, time properties, or other special bloodline. It’s really interesting!”

The Scarlet Blood Devil trembled and gazed at Yang Feng with fear and despair in his eyes.

Although the Scarlet Blood Devil can indeed be reborn continuously, but every time he is crushed into pieces, he can still feel that inhuman pain.

“Forget it! I’ll get rid of the Red Monarch first, and then study you!”

Yang Feng smiled slightly and touched the Scarlet Blood Devil with a finger, and countless runes enveloped, eroded, and sealed the other party. Then, he tossed the devil into a jade box and sealed him.

“You’ll get rid of me first? For a trifling Infinity Warlock, you’re really full of yourself.”

A huge red moon barreled towards Yang Feng.

Yang Feng frantically extracted world force from the World Ring inside him, and nine Devour Black Moons burst out and colliding with the huge red moon.

Boom! Boom!

As Yang Feng and the Red Monarch fought, the earth shattered, the space distorted, and extremely violent shock waves spread in all directions.

Thousands of kilometers away, the Gao’an Kingdom was shrouded in violent sandstorms. Some crude houses collapsed, while some ordinary people were even lifted up by the violent wind and thrown into the desert’s abyss.

The high priest, enveloped in dark gas, looked at the sky, dumbfounded: “What, what is happening? Is this the end of the world?”

Thousands of kilometers away, the Red Monarch hurled lightning, fire, ice, petrification, and other powerful spells at Yang Feng like a tide.

The Red Monarch is a Warlock Monarch rank powerhouses. Even though he is only the weakest-level Warlock Monarch, he is still proficient in countless combat spells and methods.

The nine Devour Black Moons surged and guarded in front of Yang Feng. When the barrage of spells slammed into the nine Devour Black Moons, they were devoured.

Guarded by the nine Devour Black Moons, Yang Feng looks like an undefeated Transcendent floating in a black moon. Thanks to the omni-directional protection, the bombardment of the Red Monarch’s spells was blocked.

Although the Red Monarch is a Warlock Monarch, but he didn't form a small world inside him. With his cultivation aptitude, if he formed a small world, he would basically stand no chance at advancing to the Warlock Monarch realm. This is the reason why he wasn't able to take down Yang Feng.

If it was a Warlock Monarch who formed a small world instead, they would be able to defeat Yang Feng with a full strength blow.

"The essence of devour sure is extraordinary! However, I am your opponent, you are bound to lose."

Seeing that his spells practically have no effect against Yang Feng, the eyes of the Red Monarch flickered gloomily. He spread the finger of a hand, and the Monarch grade secret treasure Red Moon Sacred Bead suddenly emerged.

The Red Moon Sacred Bead flew behind the Red Monarch.

A red moon rose behind the Red Monarch, and the Red Moon Sacred Bead flew inside. Next, the illusory red moon turned substantial, radiated red moonlight that sealed the space, and shot towards Yang Feng.

A dignified look in his eyes, Yang Feng extracted world force from the nine worlds inside him via the World Ring, and then nine Devour Black Moons rose and barreled towards the red moon.

When the Devour Black Moons knocked into the red moon, they collapsed like bubbles.

The nine Devour Black Moons resisted the red moon for only a moment before they collapsed completely.

"As expected of a Warlock Monarch, this is his true strength! He is indeed formidable!"

Yang Feng's expression flickered. All of a sudden, the Mountain Shield flew out, and then mountain ranges appeared and blocked in front of him one after another.

When the red moon slammed into the mountain ranges, it crushed them one after another.

Seeing that the red moon is about to crush all the mountain ranges, three black rays shot out of the void and stabbed at the Red Monarch with the Fallen Angel Swords in their hand from different directions.

"Supreme Infinity Warlock rank blazing angels!"

As soon as the three fallen angels appeared, the Red Monarch's eyes shimmered with graveness, and he made a prompt decision. He gave up the opportunity to give Yang Feng a heavy blow.

One on one, supreme Infinity Warlock rank blazing angels are not a match for the Red Monarch. But when faced with a surprise attack perpetrated by three supreme Infinity Warlock rank blazing angels, if he doesn't make a proper response, then even as strong as the Red Monarch is, he will be in danger of dying.

At this moment, the Phantom Ruler suddenly appeared behind Yang Feng.

The Phantom Ruler, which hovers between real and illusory, took advantage of the moment when the Red Monarch's attention was on the three fallen angels and opened the Eye of Illusion, and illusory light shot out from the Eye of Illusion and slammed into the Red Monarch.

The Red Monarch used all his strength to operate the red moon, which has the Red Moon Sacred Bead as the core, and it trembled slightly. In the next moment, he was hit by the illusory light, and he shivered and fell into a fantasy world for a moment.

Resplendent red light radiated from the Red Monarch, and he regained his senses in an instant.

At this moment, the three Fallen Angel Swords stabbed the Red Monarch from three crafty angles.

“Fuck off!”

The Red Monarch roared and chanted an incantation, and fearsome life force erupted and blasted the three fallen angels away.

Yang Feng pressed the Ruler Magic Cube with his hand, and the Ruler Armor enveloped him. Next, he took a step, appeared in front of the Red Monarch, and stabbed at the other party with his sword.

“Die!”

The Red Monarch smiled madly and pointed at Yang Feng.

That red moon suddenly barreled towards Yang Feng with the weight of a mountain.

Boom!

Yang Feng struck the red moon with a sword ray. The sword ray, which could easily cut stars and crush moons, collapsed in front of the red moon.

When the invincible red moon slammed into Yang Feng, the Ruler Armor and the Battle Demon Armor enveloping Yang Feng collapsed and shattered.

At this moment, the Phantom Ruler opened its second eye, the Eye of Dreams, and queer dream force shot out from its eye and shone on the Red Monarch, who has gone all out to eliminate Yang Feng.

“Shit!”

The Red Monarch’s countenance changed drastically. As he was about to perform a spell to call the red moon back and protect him, he suddenly felt his head spin, and he appeared in the distorted, chaotic, freakish, unreasonable Dream World.

“Soul sword!”

The Red Monarch extended his hand, and tremendous soul force gathered in his hand and formed a 10-meter-long soul sword that burst out with dazzling red light. There is a solemn expression on his face.

In the Dream World, the laws are different from those in the real world. Warlocks can only use the power of their soul here. Only Warlocks who have analyzed the rules of the Dream World and entered it with their fleshly body, or Warlocks who possess the bloodline of dream life forms can exert their full strength in the Dream World.

“It’s no use! Red Monarch! In this Dream World, I am the ruler!”

A distorted and blurry figure appeared thousands of meters away in front of the Red Monarch, and a huge hand formed from biscuits, candy, insects, gold, human faces, animal teeth, and other weird things slammed towards the Red Monarch.

“Screw off!”

The Red Monarch roared and slashed with the soul sword in his hand, and a soul sword ray formed from soul force sliced the huge hand apart.

The moment the Red Monarch sliced the huge hand apart, his body suddenly became transparent.

The most scary thing about the Dream World is that people without the bloodline of dream life forms cannot replenish the soul force they consume.

Many Warlock Monarch rank powerhouses are consumed by low-level dream life forms when they enter the Dream World.

Yang Feng sneered: “No matter how you struggle, it’s pointless! How will you replenish the soul force you consume in this place?”

The Phantom Ruler reappeared. A huge hand made of various weird things emerged out of thin air and, as if mocking him, slammed toward the Red Monarch again.

The Red Monarch’s countenance changed sharply, and he said decisively: “Yang Feng, I surrender, please spare my life. I am willing to exchange the Red Monarch State for my life.”

Yang Feng sneered: “Red Monarch, you alone are more dangerous than the entire Red Monarch State. How can I let you live? You should just die!”

The Red Monarch radiated dazzling red light and forcibly blocked the Phantom Ruler’s huge hand.

The Red Monarch snarled frantically: “I can surrender to you and become your subordinate! Now that the great tribulation is approaching, an additional Warlock Monarch like myself will be of great benefit to you. Spare my life!”

Yang Feng gazed at the other party with a detached look in his eyes. The Phantom Ruler’s huge hand squeezed the Red Monarch and erased him from the Dream World.

Yang Feng looked at the place where the Red Monarch disappeared and sneered: “Red Monarch, you have a vast network of friends, which also includes Warlock Monarch rank powerhouses. What would they think if you were still alive? Only a worthless deceased will make them wary and fearful. This way, they won’t confront me until they have learned of my underlying strength.”

As a Warlock Monarch rank powerhouse, the Red Monarch is not only strong, but also has a vast network of contacts and tremendous influence. If he does not die, his friends and allies will come to his help. But everything will be over after he dies. Upon his death, his allies and friends will have to consider whether it is worth or not being an enemy of a terrifying existence like Yang Feng.

Chapter 852 – Shocking the Core World

A blurry shadow flashed, and Yang Feng returned from the real world from the Dream World.

Regret streaked across his eyes: "The Red Monarch State! It's a pity, but that force is not something that I can meddle in right now."

After losing the Red Monarch, the Red Monarch State's strength has declined greatly. It is not Yang Feng's match.

However, if Yang Feng's legion entered the core world, it would be considered as a provocation by the core world. If he provokes a Holy Spirit Warlock rank powerhouse, Yang Feng won't stand a chance. He can only give up the Red Monarch State regretfully.

Yang Feng looked at the Red Monarch's soulless corpse, and the corners of his mouth rose slightly: "However, a Warlock Monarch body that is still full of vitality, plus the many treasures he carries with him, that's a great harvest."

With the soul shattered, from the perspective of intelligent life forms, he is already dead. However, his Warlock Monarch body, which has gone through extensive tempering and evolution, is full of powerful vitality. Even though his soul has shattered, his body is still very much alive.

If a body which lost its soul yet maintains its vitality is cultivated by a Warlock using special secret methods, it can even bear a new soul.

However, the new soul is different from the body's original soul. It can be molded according to the will of the Warlock who cultivated it.

The former marshal of the first legion of the 666th floor of the Abyss Agnipe looked at Yang Feng with complicated feelings in her beautiful eyes: "A Warlock Monarch died just like that. He is getting scary!"

An enigmatic ray flashed in Besskya's beautiful eyes: "Even a Warlock Monarch died at his hands. The speed at which his strength increases is really amazing."

In the Abyss, the strong are respected and get everything, while the weak are oppressed and enslaved.

When Agnipe was captured, she was unwilling to submit to Yang Feng because he was not her creator, nor was he strong enough. But now that Yang Feng displayed terrifying strength, to the point of even slaying a Warlock Monarch, it finally netted him respect.

"Let's go!"

Yang Feng's figure shook slightly, and he flew towards a mountain range with that hides a warp gate. For Yang Feng, the top priority is to use the Seven Color Aurora Star Rock to unlock the next level of xizu technology and improve his strength.

"Yes!"

The figure's of Agnipe and the other two fallen angels shook slightly, and they flew towards the warp gate along with Yang Feng.

Seeing the Red Monarch die before her eyes, the unruly and rebellions Knarissa became obedient.

The Red Monarch State, in a palace, there lays a green soul lamp.

A Glorious Sun Warlock dressed in a red Warlock robe is sitting in front of the green soul lamp with closed eyes, seeking enlightenment on the mysterious of magic.

Crack!

Suddenly, a crisp sound rose, and the green soul lamp cracked and went out.

“The soul lamp cracked!”

The Glorious Sun Warlock suddenly opened his eyes, looked at the green soul lamp, and exclaimed in disbelief: “His Majesty has fallen!”

“His Majesty’s soul lamp cracked!”

“His Majesty has fallen!”

“His Majesty died, what do we do?”

“...”

Almost in an instant, the news of the Red Monarch’s death spread to the core of the Red Monarch State, the Red Monarch City, and the Warlocks in the Red Monarch City entered a state of panic.

With the Red Monarch keeping watch, the Red Monarch State was regarded as a top Warlock group in the core world, its power immense.

In order to obtain more cultivation resources, the Red Monarch State offended many Warlock groups. There is no shortage of Warlock groups with Infinity Warlocks who were offended by the Red Monarch State.

When the Red Monarch was still alive, he had a vast network of friends, including several good friends that are Warlock Monarch. At the same time, with his tremendous strength, he could naturally suppress any opposition.

However, now that the Red Monarch died, the Red Monarch State doesn’t has the ability to hold its lands. As a result, the Red Monarch State’s Warlocks are unsurprisingly panicked.

The Red Monarch State, in the Red Monarch Palace.

In the red monarch Palace, a very handsome, tall young man dressed in a Warlock Robe with a red moon embroidered sits on the throne.

In front of the throne, there sit seven people, who are the seven Infinity Warlocks of the Red Monarch State.

Resentment flashed in the eyes of the handsome young man, and he said: “Uncles, my father, the Red Monarch, went to deal with the Battle Demon Sect’s Yang Feng. But, in a moment of carelessness, he fell in a vicious ploy. Uncles, please avenge my father.”

The seven Infinity Warlocks of the Red Monarch State were all silent.

The heart of the son of the Red Monarch thumped, his mind turned lightning fast, and he gritted his teeth and said: “Uncles, please help me avenge my father. The one who avenges my father will be the

next Red Monarch of the Red Monarch State. I will make a public abdication and give him the throne of the Red Monarch.”

When these words sounded, greed flashed in the eyes of the Infinity Warlocks, but then silence resumed in a flash.

A glint of unwillingness in his eyes, an Infinity Warlock sighed slightly: “Little Fei, Yang Feng is a monster in the top 3 on the Infinity List. Additionally, he is an overlord of a formidable force and has many powerhouses as subordinates. The Red Monarch died at his hands. Even if we join hands, I’m afraid that we’ll just add some Infinity Cores to his collection. You’d better give up on revenge.”

Resentment shimmered in the eyes of the son of the Red Monarch, and he said in a deep voice: “My father has many friends. The Black Crow Monarch, the Sun Fire Spirit Monarch, and the Green Sea Monarch, they are all his good friends. If they step in, Yang Feng, who is just a mere Infinity Warlock, is toast.”

“The Black Crow Monarch is here!”

A voice suddenly came from outside.

Countless black crows hovering between real and illusory flew over from the distance, landed in the Red Monarch Palace, and formed a handsome young man covered in black crow feathers.

“Uncle Black Crow Monarch!”

The son of the Red Monarch turned pale and glanced at the Infinity Warlocks. He vaguely understood what is about to happen.

If the Red Monarch State’s powerful barrier wasn’t disabled, then even if it is a Warlock Monarch rank powerhouse, they wouldn’t be able to sneak into the Red Monarch Palace without any warning.

Obviously, someone with high authority must have disabled the barrier, allowing the Black Crow Monarch to enter. Thinking about what this signifies, the son of the Red Monarch shuddered.

The Black Crow Monarch sighed slightly: “Little Fei, I heard about your father. I will be in charge of this matter in your stead.”

An Infinity Warlock stood up and said: “Your Majesty Black Crow Monarch, our young master is young and weak. I’m afraid that it will be difficult for him to preside over the Red Monarch State. Please take over the Red Monarch State, so as not to give others a chance to take advantage of us.”

The other six Infinity Warlocks stayed silent, making the blood of the son of the Red Monarch run cold.

The Black Crow Monarch pondered for a while before saying slowly: “Okay. Little Fei, until you reach the Infinity Warlock realm, I will manage the Red Monarch State in your stead.”

The son of the Red Monarch bowed his head and said respectfully: “Yes! Uncle!”

It didn’t take long for the news that the Red Monarch was vanquished to spread throughout the core world, creating a sensation.

The further you tread along the Warlock path, the greater the gap there is between major realms. Even the No.1 on the Infinity List Titan Demon Lian Wuyi would at most be able to fight a Warlock Monarch to a draw.

A few days later, the Infinity List was updated.

“No. 1 on the Infinity List, the Battle Demon Sect’s Yang Feng.”

“Nickname, Endless Darkness.”

“Record: Slayed the Red Monarch.”

The core world, in an unusual space. There are all kinds freaks fighting here.

Among the countless freaks, there is a tall man with short hair, engraved with countless mysterious runes, with a giant battle axe in hand, sitting on a 10,000-meter-tall mountain of bones that exudes Warlock Monarch realm breath and playing with a magic ball.

The tall man grinned, and his eyes flashed with crazy fighting spirit: “Battle Demon Sect’s Yang Feng? Interesting, it seems that I, Lian Wuyi, have another interesting opponent among human Warlocks.”

The core world, in a place enveloped in endless thunder and lightning.

Inside this space of lightning, there is an extremely handsome young man with long blue hair. A strange world filled with lightning has appeared behind the young man, devouring the lightning around him.

A peculiar ray flashed in the young man’s eyes, and he closed his eyes: “Yang Feng slayed the Red Monarch. It seems that he does have some skill. But since I got the Archaic Thunder Archgod’s Archaic Thunder Archgod Realm, I should be weaker than him.”

In a secret space, there is a faintly visible figure, who said in a low voice: “He actually vanquished a Warlock Monarch. His progress is really fast.”

Inside the Taboo Dynasty’s palace.

Reclining on her throne, the Taboo Monarch’s beautiful eyes flickered with dazzling light. “To be able to kill the Red Monarch, his progress is really remarkable. My lord’s discerning eyes are truly impressive.”

Inside the Star Dynasty’s palace.

The Star Heavenly Maiden’s beautiful eyes gleamed with strange light, and she said unhurriedly: “He slayed the Red Monarch. The speed at which his strength improves is too abnormal. Furthermore, there are no signs of his foundation being unstable.”

The Star Monarch is calm and collected, as if she has seen through everything: “There are worlds where the flow of time is different from ours. Such worlds are located at the junction of two or more universes. Only after the universes merge, will the flow of time return to normal. He should have obtained a world like that. However, without enough resources, even if you have such a world, it is useless.”

Chapter 853 – Level-5 Stronghold

The world with the Light of Eternity, underground the royal palace, a huge laboratory has already been set.

In the huge laboratory, there is a thousands-of-meters-tall, semi-finished level-5 Matter and Energy Converter inscribed with countless mysterious runes. There are many mechanical tubes inserted in the level-5 Matter and Energy Converter as if blood vessels.

With a flash of light, Yang Feng appeared in the center of the huge laboratory and waved his hand, and the Seven Color Aurora Star Rock flew directly into the center of the level-5 Matter and Energy Converter.

A huge hole appeared in the center of the level-5 Matter and Energy Converter and sucking in the Seven Color Aurora Star Rock.

The mechanical tubes that resemble blood vessels suddenly gleamed, and a steady supply of power poured into the level-5 Matter and Energy Converter from them.

The level-5 Matter and Energy Converter suddenly radiated light and wriggled, and parts generated automatically and appeared in the right place.

An hour later, the level-5 Matter and Energy Converter was finished.

“The level-5 Matter and Energy Converter was completed, level-5 technology has been unlocked.”

“Brilliant Star Hunter, a single combat unit. Based on the data in the database, it is comparable to a Glorious Sun Warlock single combat unit and has a maximum speed of Mach 300. With the current resources, one unit can be built in ten days.”

“Magic Seal Mecha, external use armor. The armor can amplify the spiritual force and soul force of Warlocks to execute various attack and defense moves. The ultimate output of power is at the Infinity Warlock rank. With the current resources, one unit can be built in a day.”

“Dazzling Light Unit, a single combat unit that can evolve. If the core isn’t destroyed, the unit can evolve alongside combat. Adding a high grade soul stone can make it mutate to a soul mechanical form with that can evolve. The initial combat strength is in the junior Glorious Sun Warlock realm. With current resources, one unit can be built in three months.”

“Star Field Battlestar, equipped with one main artillery and twenty-two secondary artillery. The main artillery can inflict serious damage to Warlock Monarch rank powerhouses. The comprehensive combat power is assessed at the Infinity Warlock realm. Can defeat an ordinary junior Infinity Warlock in a one on one fight. With current resources, one unit can be built in 10 years.”

“Skynet, comprehensive assessment, can suppress Warlock Monarch rank powerhouses. With the current resources, one complete system can be produced in 100 years.”

“Brilliant Envoy, a single combat unit that can wield the law of light.. Comprehensive assessment, Glorious Sun Warlock rank combat unit.. With the current resources, one unit can be built in 10 days.”

“Interstellar Probe, a scout unit with a maximum speed of 2 times the speed of light. Can jump through space.”

“Star Energy Extraction Shuttle, can enter inside stars and extract their energy.”

“...”

Yang Feng looked at the information before his eyes with a fervent gaze: “With level-5 xizu technology, the fighting strength of the battle robots will skyrocket. However, with the resources at my disposal, it seems that it’s a bit difficult to manufacture them in large quantities.”

As long as they have enough energy, xizu robots can work day and night without rest and produce weapons at full capacity. But that entails a huge amount of resources.

Yang Feng gazed at the huge level-5 Matter and Energy Converter with a bright look in his eyes: “Resources are the most critical factor that shackles my development. Next, should my target be the thirty-six primary material planes, or the Astral Boundary?”

Now that the level-5 Matter and Energy Converter is built, it can synthesize a treasure like Seven Color Aurora Star Rock. It is only a matter of time before another level-5 Matter and Energy Converter is built.

However, even if there are 10 level-5 Matter and Energy Converters, it isn’t even possible to increase the current output by five times, since there isn’t enough energy and matter to transform.

“The 36 primary material planes have countless powerhouses as well as who knows how many hidden old monsters! Now that human Holy Spirit Warlocks slowly awaking and returning, the old monsters in the 36 primary material planes should also begin to wake up. To provoke them is akin to seeking death.”

“As for Astral Boundary, only after a large number of Interstellar Probes is produced, will I be able to explore it. At present, the way to upgrade my strength as quickly as possible is to integrate the resources I can grasp at the moment.”

Yang Feng looked at the huge level-5 Matter and Energy Converter, and countless calculations flashed in his eyes.

With a gust of wind, Yang Feng collapsed into a specks of light and disappeared.

The Battle Demon Plane, the Battle Demon Sect headquarters the floating continent.

With a flash of a ray of light, Yang Feng landed in the Battle Demon Sect’s headquarters and walked towards the depths of the Battle Demon Sect.

The Battle Demon Bell Tower is one of the most crucial buildings in the Battle Demon Sect. Once the bell of the Battle Demon Bell Tower is rung, it means that someone wants to become the sect master of the Battle Demon Sect. It’s not a puppet-like sect master, but a supreme sect master with tremendous authority.

In the Battle Demon Sect, there are many experts and factions. Since none of the factions can subdue all other factions, a puppet sect master is instated to deal with the sect’s day-to-day affairs. Meanwhile, the great elders enter secluded cultivation to improve their strength. In this arrangement, the sect master has no power to command the great elders.

However, a true sect master of the Battle Demon Sect is a person who can use all the resources of the Battle Demon Sect and command the great elders. But the Battle Demon Sect hasn't had a true sect master for thousands of years.

Yang Feng's figure slowly appeared in front of the Battle Demon Bell Tower.

An elder guarding in front of the Battle Demon Bell Tower, who possesses Moonlight Warlock rank cultivation base, stepped forward and bowed to Yang Feng. His eyes flashed with shock, and he asked: "Greetings, great elder. This is the Battle Demon Bell Tower. Are you going over there?"

Yang Feng replied flatly: "I am!"

The elder checked Yang Feng's identity jade card, and then stepped aside and said respectfully: "Please!"

Yang Feng walked to in front of the Battle Demon Bell Tower, picked up a black hammer next to the giant black bell, and struck the bell.

Ding!

When the giant black bell rang, ripples filled the entire floating continent.

Ding! Ding! Ding! Ding!

Runes rose into the sky from the floating continent, and giant black bell projections suddenly emerged and rang loudly, the sound of which echoed across the entire Battle Demon Plane.

Giant black bell projections suddenly flew out from the identity jade cards of the Battle Demon Sect's disciples, entered their heads, and rang.

Except for individuals in some secret places, 99% of the Battle Demon Sect's upper echelon heard the ringing of the Battle Demon Bell.

"Someone rang the Battle Demon Bell!"

"Who? Who rang the Battle Demon Bell!"

"Who wants to become the true sect master of the Battle Demon Sect?"

"Is it Yang Feng? But isn't he a Bright World Warlock? A Bright World Warlock can't become the true sect master!"

"Yang Feng? Only he has the potential to become the Battle Demon Sect's sect master. But he is just a Bright World Warlock. There is no way he can subdue those Infinity Warlock and strong divine force rank great elders."

"..."

Astonished, the Battle Demon Sect's powerhouses turned into streams of light and flew to the Battle Demon Sect headquarters. Many have already guessed that the person who rang the Battle Demon Bell is Yang Feng, because only he has the potential to become the true sect master of the Battle Demon Sect.

A green figure emerged, and Yue Wuxian's personal disciple Jing Xuefeng appeared in front of the Battle Demon Bell Tower and looked at Yang Feng sitting next to the bell tower with shock in her beautiful eyes: "It's him! It really is him! Isn't he being too hasty? The sect master trial by fire isn't that simple! The other great elders won't let him pass the trial by fire so easily."

Although the competition within the Battle Demon Sect is fierce, but the relationship between the sect is also rather friendly. However, even though the great elders of the Battle Demon Sect welcomed Yang Feng to be one of them, but they are not necessarily willing to see him become the true sect master of the Battle Demon Sect and seat above them.

"It's him! It's great elder Yang Feng!"

"Sure enough it is him!"

"..."

Seeing Yang Feng sitting next to the bell tower from afar, the eyes of the Battle Demon Sect's powerhouses flying this way flashed with enigmatic light.

Ding Longjiang looked at Yang Feng above the bell tower with mixed feeling in his eyes: "Ut's really him."

Ding Longjiang was originally the most promising genius of the Battle Demon Sect to take over as the next sect master. But once Yang Feng becomes the true sect master of the Battle Demon Sect, Ding Longjiang will naturally no longer be able to become the sect master himself, which will be not a small blow to him.

Formidable fluctuations of divine force descended and rays of light shone. The thirteen god great elders of the Battle Demon Sect appeared outside the bell tower and gazed at Yang Feng, who is sitting next to the bell tower, with complicated emotions in their eyes.

The thirteen god great elders have all acknowledged that Yang Feng's potential is tremendous, far above their's. If Yang Feng becomes the sect master a few hundred years later, it won't come as a surprise.

However, it was almost a blink of an eye since their last meeting, yet Yang Feng has already rang the Battle Demon Bell and challenged the true sect master trial by fire, which filled the thirteen god great elders with excitement, envy, admiration, and other complex feelings.

Not long after, four rays of light flew out and landed in front of the bell tower, and the four great elders Yue Wuxian, Huang Yihe, He Lianu, and Yu Jingang appeared.

Yue Wuxian and the other three aren't gods and can freely travel through the planes. Therefore, the god great elders are responsible for guarding the base, while they travel various planes to advance their cultivation and growth.

Chapter 854 – Heavenly Evil Ogre Monarch

Huang Yihe gazed at Yang Feng standing next to the Battle Demon Clock with a complicated look in his eyes: "Battle Demon Sect's sect master trial by fire! To reach this point in such a short time, his growth is too fast!"

At the beginning, Huang Yihe only gave Yang Feng a chance because he wanted to forge a good relationship with Shi Xue. At the time, he didn't expect that Yang Feng would seize that opportunity and experience a meteoric rise, to the point that he would challenge the sect master trial by fire in less than 300 years.

He Liannu and Yu Jingang glanced at each other, showing a bitter smile: "Old Huang, you got such a bargain!"

When Shi Xue revealed her superior level-8 soul aptitude, the four great elders were all present in the Battle Demon Sect. After seeing that Huang Yihe and Yue Wuxian were fighting over Shi Xue, He Liannu and Yu Jingang hesitated for a while before giving up on her. They had no interest in Yang Feng at the time. As a result, Shi Xue and Yang Feng were left to Yue Wuxian and Huang Yihe respectively.

Now in less than 300 years, Shi Xue has been promoted to a Bright World Warlock (the Battle Demon Sect doesn't know Shi Xue's true strength) and Yang Feng has now challenged the position of the true sect master. Seeing how brightly the two shine, He Liannu and Yu Jingang are full of complicated emotions.

A complex look in his eyes, one of the three strong divine force rank gods of the Battle Demon Sect the God of War Xing Rentu asked: "Yang Feng, since you rang the Battle Demon Bell, are you here to accept the sect master trial by fire?"

Yang Feng replied calmly: "I am!"

Xing Rentu uttered: "Only powerhouses above the Bright World Warlock rank can hold this position. Have you promoted to an Infinity Warlock?"

All eyes focused on Yang Feng.

Infinity Warlocks rank powerhouses can already destroy a plane by themselves.

In the Great Cloud Dynasty, many among the Ten Great Sects only have one or two Infinity Warlocks.

Yang Feng advancing to a Bright World Warlock before he's 300 years old has already come as a shock for everyone in the Battle Demon Sect. But if he advanced to an Infinity Warlock before he's 300 years old, that would be simply a monstrous feat. Even in the Cangzhi Plane, where there are countless experts and talents, such existences are very rare.

"I have already advanced to an Infinity Warlock!"

Infinity Warlock rank fluctuations of powers slowly diffused from Yang Feng and spread towards the surroundings.

"Infinity Warlock!"

"Sure enough, he has promoted to an Infinity Warlock!"

“He is the most formidable genius in the history of the Battle Demon Sect not for no reason!”

“...”

When they sensed the Infinity Warlock rank fluctuations of power, the complexion of the Battle Demon Sect’s upper echelon flickered and their eyes shimmered with a complex shade. They already guessed that since Yang Feng rang the Battle Demon Bell, he must have promoted to an Infinity Warlock. But now that their guess was confirmed, shock filled their hearts.

Standing in the crowd, Zhang Hanshan gazed at Yang Feng with complicated emotions in her beautiful eyes and sighed in her heart: “He already advanced to an Infinity Warlock?”

When Zhang Hanshan was a Starry Sky Warlock, Yang Feng was just a Great Warlock. But Yang Feng now has already promoted to an Infinity Warlock, yet she is still only a Moonlight Warlock. Furthermore, she has no confidence in promoting a Glorious Sun Warlock. The gap between the two is so big that she can’t even feel jealous.

Xing Rentu said gravely: “The sect master trial by fire is very dangerous. If you make a slight misstep, you may end up losing your life. Yang Feng, are you sure you want to undergo the sect master trial by fire?”

Yang Feng replied: “I am.”

Without speaking any more superfluous words, Xing Rentu said decisively: “Okay, then let’s go to the Battle Demon Pavilion!”

The Battle Demon Pavilion is located in the deepest part of the Battle Demon Sect’s headquarters. It is a sealed off, majestic hall that covers an area of thousands of hectares.

When they entered the Battle Demon Pavilion, they saw a 500-meter-tall evil ogre with a horn on his head and a ferocious face, engraved with countless mysterious runes all over his body, and enveloped in a black carapace, sealed in a stone formed from taboo stone fragments and other substances.

Taboo stone is a product of the Second Warlock Dynasty that uses taboo magic and the power of bloodline of some special archgods. Except for Warlock Emperors and Holy Spirit Warlocks, other Warlocks don’t have the ability to refine taboo stones.

As for the Battle Demon Sect, it just collected taboo stone fragments and other sealing substances to seal the evil ogre in the Battle Demon Pavilion.

“Yang Feng, this is a Warlock Monarch Heavenly Evil Ogre Monarch. He was captured by the founding ancestor of our Battle Demon Sect and sealed in the Battle Demon Pavilion. Even though the Heavenly Evil Ogre Monarch has weakened by a lot after tens of thousands of years, but it should still possess supreme Infinity Warlock rank strength.”

“This evil ogre is fierce and cruel, and feels a deep hatred towards our Battle Demon Sect. More than seven people have died at his hands. Whether it is to lift the seal or seal him again, it takes a certain amount of time. Once the seal is released, we won’t be able to guarantee your safety!”

Xing Rentu stared at Yang Feng and warned with a solemn expression.

Yang Feng is the most formidable genius in the history of the Battle Demon Sect. Even though the other great elders don't want to see him become the sect master and surpass them this early, but they don't want Yang Feng to die either.

As the Battle Demon Sect used to be one of the Great Cloud Dynasty's Ten Great Sects, it also has a deep foundation and countless intelligence channels in the Cangzhi Plane. The information about the imminent great tribulation is no longer a secret to the upper echelon of the Battle Demon Sect. At this time, it is impossible for the Battle Demon Sect, which was originally already fairly united, to engage in internal strife.

Yang Feng replied: "Since the great tribulation is almost upon us, I can only forge ahead. If the Battle Demon Sect doesn't integrate its power, it will be difficult to support ourselves during the great tribulation."

Xing Rentu hesitated for a moment, and then made a concession: "I see. We could establish a council of great elders with you as the chairman, what do you think?"

Some top Warlock groups in the Western World use the structure of the council of great elders to rule their group. Although the authority of the chairman of a council of great elders is much smaller than that of the true sect master, but it is still the most influential position in a council of great elders.

Yang Feng replied flatly: "Great elder Xing, open the seal!"

Xing Rentu frowned slightly, then released a long sigh, silently recited an incantation, took out his great elder identity jade card, and touched it with a finger.

A black ray shot out from the identity jade card and entered the Battle Demon Pavilion.

The rest of the great elders also took out their identity jade cards, silently recited an incantation, and touched it with a finger.

The jade cards flew into the air one after another, and queer runes flew out of them and entered the Battle Demon Pavilion.

Countless queer runes appeared on the surface of the sealing stone, and the huge stone collapsed bit by bit and turned into a motes of light that sank into the mural behind it.

36 black rune chains wrapped around the Heavenly Evil Ogre Monarch suddenly appeared, shone brightly, and then collapsed and disappeared.

The Heavenly Evil Ogre Monarch opened his eyes, and a menacing Warlock Monarch rank breath slowly diffused from him.

The complexion of true disciples who only possess a Starry Sky Warlock rank cultivation base changed drastically, and they activated their defensive spells at once.

Evil qi as heavy as a mountain rolled out towards the Starry Sky Warlock rank true disciples, and their magic shields twisted and shattered like bubbles.

The God of Wind Zhuge Ding flicked a finger, and wind whirlpools enveloped the true disciples and formed wind barriers to resist the evil qi.

The countenance of the Moonlight Warlocks flickered, ripples rose on the life force fields they erected around themselves, and they felt a shortness of breath.

The Heavenly Evil Ogre Monarch looked dismissively at Yang Feng, his eyes flashed fiercely, and he sneered: "Little ant, have you come to challenge me?"

Overwhelming evil qi spewed out from the Heavenly Evil Ogre Monarch and swept towards Yang Feng like a tide.

All kinds of distorted, horrible, dark faces suddenly appeared and issued hair-raising wails.

When the Starry Sky Warlocks heard the wails, their bodies became chaotic, and strange faces appeared on them.

Zhuge Ding waved his hand, and green light enveloped the Starry Sky Warlocks and teleported them away.

Standing outside the Battle Demon Pavilion, the great elders gazed nervously at the Heavenly Evil Ogre Monarch with grave looks in their eyes.

The Heavenly Evil Ogre Monarch is fully capable of slaying any great elder here. Only outside the Battle Demon Pavilion, do the great elders have a sense of security.

Yang Feng took a step forward and appeared in front of the Heavenly Evil Ogre Monarch. Then, primal chaos runes appeared on his body, and he sent a palm slamming towards the other party.

"To compete with me in terms of strength, what an idiot!"

The Heavenly Evil Ogre Monarch grinned ferociously and slapped with his hand, and a world shrouded in evil qi and full of human, beast, ogre, and other kinds of faces rolled out.

Even if it is an Infinity Warlock, if they were enveloped by this terrifying world shrouded in evil qi, they would be eroded into freaks covered in evil qi.

Chapter 855 – Battle Demon Sect's Sect Master Yang Feng

When Yang Feng's palm slammed into the world shrouded in evil qi, countless primal chaos runes shone, and it evaporated and purified the evil qi, tore the world shrouded in evil qi apart, and blasted into the palm of the Heavenly Evil Ogre Monarch.

Boom!

The Battle Demon Pavilion shook violently, and a terrifying shock wave spread in all directions, slammed into the barrier of the Battle Demon Pavilion, and set off ripples in the barrier.

The palm of the Heavenly Evil Ogre Monarch actually warped, his body bulged, and a large amount of black blood burst out from the wounds on his body and sputtered in all directions.

"The heavenly evil ogre actually lost in terms of strength?"

"What secret method does Yang Feng practice? Why is his fleshly body so formidable?"

“This strength is simply terrifying. Even top body-tempering Warlocks probably don’t have such a terrifying fleshly body!”

“...”

The Battle Demon Sect’s upper echelon all inhaled a mouthful of cold air, shocked.

The Heavenly Evil Ogre Monarch is an exceedingly powerful ogre type evil god, and his fleshly body is even more so formidable. When human Warlocks fight against evil gods with formidable fleshly bodies, they generally use secret methods and secret treasures to suppress and seal the other party. But Yang Feng, as if a fierce beast, blasted the Heavenly Evil Ogre Monarch away. This is simply heaven-defying.

Along with flashes of afterimages, Yang Feng shot towards the heavenly evil god from different directions.

The Heavenly Evil Ogre Monarch’s black blood burst out, fell on the ground, and corroded the barrier on the ground of the Battle Demon Pavilion.

The eyes of the Heavenly Evil Ogre Monarch flashed, his eyelids expanded, and five additional pupils appeared in each eye.

From the twelve pupils, a pair of Six Sins Wicked Rays containing arrogance, jealousy, greed, gluttony, lust, and anger shot out respectively.

Even if it was a supreme Infinity Warlock, if they were hit by that pair of six law rays, they would be split into six clashing egos at once, no longer able to resist the Heavenly Evil Ogre Monarch.

At the Heavenly Evil Ogre Monarch’s peak, if a Warlock Monarch was hit by the Six Sins Wicked Rays, they would be also split into six clashing egos, and then devoured.

In the history of the Battle Demon Sect, there have been several extremely powerful powerhouses far stronger than other great elders that came to challenge the Heavenly Evil Ogre Monarch. But then they were hit by the Six Sins Wicked Rays, their ego split and clashed, and they ended up dying.

Yang Feng has been on guard of the Heavenly Evil Ogre Monarch all along. When the Six Sins Wicked Rays emerged, nine Devour Black Moons, which seem to be able to devour all power, suddenly appeared and swept towards the Heavenly Evil Ogre Monarch.

When the Six Sins Wicked Rays blasted into the Devour Black Moons, the Devour Black Moons blurred and collapsed one after another.

It wasn’t until only one Devour Black Moon remained that the weird Six Sins Wicked Rays were completely devoured.

Next, the last Devour Black Moon swallowed the Heavenly Evil Ogre Monarch and started devouring his flesh and soul.

The Heavenly Evil Ogre Monarch yelled frantically and released his evil qi as he struggled inside the Devour Black Moon.

But no matter how the Heavenly Evil Ogre Monarch struggled, his flesh, soul, and all his power were directly devoured by the Devour Black Moon. In the end, he disintegrated into dust and disappeared, leaving only a Warlock Monarch rank evil ogre core behind.

Yang Feng pointed with his finger, and the Devour Black Moon flew back into his body. Pure life force and soul force poured into him and nourished his body and soul.

“He eliminated the Heavenly Evil Ogre Monarch just like that?”

“Even supreme Infinity Warlock rank powerhouses are not the Heavenly Evil Ogre Monarch’s match, yet he was killed just like that?”

“When did Yang Feng become this strong?”

“...”

The great elders were all stunned, unable to believe their eyes. Even though the Heavenly Evil Ogre Monarch was sealed for thousands of years and has weakened greatly, but he was still a Warlock Monarch rank powerhouse with terrifying strength. The Six Sins Wicked Rays, even more so, was an innate ability that can kill a supreme Infinity Warlock.

When they saw such a formidable powerhouse being easily killed by Yang Feng, the eyes of the great elders flickered with incredulity.

Yang Feng turned to look at Xing Rentu and said lightly: “Great elder Xing, I should have passed the sect master trial by fire, right?”

Among the seventeen great elders of the Battle Demon Sect, Xing Rentu is the one who lived the longest, has the highest seniority, and is the strongest. Huang Yihe and Yue Wuxian, who have promoted to the Infinity Warlock realm not long ago, cannot compare to Xing Rentu in neither prestige nor status.

Xing Rentu bowed and said, a complicated look in his eyes: “Greetings, sect master!”

“Greetings, sect master!”

The upper echelon of the Battle Demon Sect bowed to Yang Feng and acknowledged his identity as the sect master.

Huang Yihe looked at Yang Feng with excitement and elation. At the same time, there are traces of jealousy mixed in. He mused with a smile on his face: “Sect master, my disciple has become the sect master, ha-ha, who could have expected!”

As soon as Yang Feng ascended to the position of sect master, he began to merge his force with that of the Battle Demon Sect.

The Battle Demon Sect is an ancient force that has existed for tens of thousands of years. In addition to the grade 4 plane the Battle Demon Plane, it is also in control of three other grade 4 planes, 15 grade 5 planes, 30 grade 6 planes, 176 grade 7 planes, 321 grade 8 planes, and 507 grade 9 planes.

The Battle Demon Sect has spent tens of thousands of years exploring the Astral Boundary and fighting against other plane powerhouses to win these planes.

It is because of the Battle Demon Sect's effort to expand towards the Astral Boundary that the odds of its Infinity Warlocks dying is quite high. At the time Yang Feng entered the Battle Demon Sect, there were only four Bright World Warlocks, since the Infinity Warlocks have fallen in an expedition, with only the great elders who have become gods still remaining.

After Yang Feng became the sect master, countless xizu robots entered the planes of the Battle Demon Sect and began to mine various resources day and night.

Along with the roars of machinery, rare resources of the planes were dug out and sent to the Battle Demon Sect's headquarters. The Battle Demon Sect's income of resources suddenly increased by hundreds of times.

In the plane with the Light of Eternity, Yang Feng poured the resources he got from the Battle Demon Sect into the munitions factories to produce advanced weapons such as the Dazzling Light Unit, the Brilliant Star Hunter, the Magic Seal Mecha, and the Brilliant Envoy.

The Battle Demon Sect, which has been exploring the Astral Boundary for tens of thousands of years, grasps a lot of secret information about the Astral Boundary, including information on planes with life forms. However, due insufficient strength, the sect could only maintain its current sphere of influence.

Yang Feng immediately assigned a large number of 5th and 4th generation battle robots to the true disciples who like to wage war and had them attack the planes with resources.

Above a grade 7 plane, there is a Star Destroyer Battlestar, an Interstellar Carrier, and 36 frigates of different types stationed.

In the starry sky, there are countless extraordinary life form eagle-winged devilmen with ferocious faces, a special imprint on the forehead, and a pair of wings on the back fighting with Type II Undyings.

Thanks to the undying properties of the Type II Undyings, no matter how the eagle-winged devilman powerhouses attack them, they heal their injuries almost instantly.

The swarms of eagle-winged devilman powerhouses that rushed to fight the Type II Undyings are being sliced into pieces

"Eagle-winged Devilman King, surrender! Surrender to the Battle Demon Sect, and your eagle-winged devilman race will have a way to survive."

Standing loftily in the void, Zhou Feng said flatly to the 50-meter-tall Eagle-winged Devilman King surrounded by eagle-winged devilmen.

"We eagle-winged devilmen will never surrender!"

The Eagle-winged Devilman King let out a roar, then runes appeared on his body, he flapped his wings, and completely fused with the law of wind and disappeared.

In an instant, the Eagle-winged Devilman King appeared behind Zhou Feng and sent a claw shooting towards the other party.

A black ray flying at a terrifying speed streaked across the Eagle-winged Devilman King, and then stopped beside Zhou Feng.

A 10-meter-tall Type III Undying equipped with ten God Slayer Swords, covered in black armor, appeared next to Zhou Feng.

The Eagle-winged Devilman King split into many fragments that sprinkled down.

Zhou Feng pointed with a finger, and a hurricane suddenly appeared and swept the Eagle-winged Devilman King's body, which then was absorbed into a storage treasure.

"What a frightening golem! Its combat power is far greater than that of ordinary Moonlight Warlocks. Only heavily-armed Glorious Sun Warlocks can quell it."

"The most scary thing is that there is more than one such golem!"

Zhou Feng looked at the Type II Undying with a complex shade in his eyes. With a thought from him, black rays gleamed, and nine Type III Undyings suddenly flew out and appeared beside him. Their eyes radiate cold, cruel, and emotionless electronic red light.

Chapter 856 – Dazzling Light Uni

t

Astral Boundary, a fleet consisting of a Star Destroyer Battlestar, an Interstellar Carrier, and 36 frigates is flying towards a grade 7 plane.

"They're here!"

"The bastards from the Battle Demon Sect are here."

"Get started! Annihilate them, don't let a single person off."

"..."

On a celestial body on the route of the fleet, the eyes of several bizarre-looking beings flashed with strange runes as they peered at the fleet tens of thousands of kilometers away.

Countless extraordinary life forms have gathered on that celestial body and formed armies. They are clearly prepared to ambush the fleet of the Battle Demon Sect.

Suddenly, the Star Destroyer Battlestar's secondary artillery flashed, and a rain of energy beams slammed into the celestial body.

Bombarded by the energy beams, droves of extraordinary life forms were blasted into fragments.

"Damn it, we were discovered!"

"How could this be? We are tens of thousands of kilometers, how did they discover us?"

"Traitors, there are traitors among us!"

"..."

The several extraordinary life form chiefs roared frantically with an alarmed look on their faces.

An astral extraordinary life form that looks like a snake, is covered in black scales, and is enveloped in mist, gritted its teeth and said: "Let's go, let's kill them! Everything will be resolved so long as we kill them."

Astral extraordinary life forms, who are born strong and rely on that strength to rampage across the world, are generally simple and crude. They are easily duped by human Warlocks. However, there are also some astral life forms that are not only powerful, but also far more cunning than human Warlocks. They are the most difficult beings to deal with. The astral life forms on the celestial body are evidently not in that category.

"Let's go!"

"Let's eat them!"

"..."

The eyes of the formidable extraordinary life form chiefs flashed fiercely, and they released piercing howls that spread underground of the celestial body.

Crowds of extraordinary life forms flew out from the celestial body and rushed towards the Battle Demon Sect's fleet.

The Battle Demon Sect's fleet, which was evidently prepared long ago, fired their artillery at the enemy while pulling back. Guided by optical computers, a rain of light accurately slammed into the extraordinary life forms and harvested their lives

"The secret treasures of the sect master are really something. With them, the Battle Demon Sect will shine brightly."

Sitting on the bridge of the Star Destroyer Battlestar, Zhang Hanshan looked at the holographic projection of the battlefield with elation.

On the celestial body, there are extraordinary life forms from several planes and some forces of astral races that wander the Astral Boundary gathered. In the past, the Battle Demon Sect would have to send at least three Glorious Sun Warlocks, 10 Moonlight Warlocks, and a large number of Starry Sky Warlocks and Great Warlocks to be able to defeat such a force at the lowest cost. And even then, it would still suffer a lot of casualties, which may even include Moonlight Warlocks.

But now Zhang Hanshan alone leading a fleet can slaughter that force of extraordinary life forms. With the fleet's frightening movement ability and long range, it is possible to eliminate this force of extraordinary life forms from a distance.

It was the first time that Zhang Hanshan experienced such an easy battle.

A transparent, invisible figure, without causing any ripples, flew towards the Star Destroyer Battlestar.

Decapitation strike has always been the favorite tactic of extraordinary life forms that are exceedingly powerful on an individual basis.

As soon as the transparent figure came within 10,000 meters of the Star Destroyer Battlestar, the battlestar's secondary artillery turned and flashed, and countless energy beams barreled towards the transparent figure.

Countless runes appeared on the transparent figure, and a 10-meter-tall freak covered in a black carapace, with four arms, which hold a black spear, a sword, a blade, and a black shield respectively, exudes Glorious Sun Warlock rank fluctuations of power, suddenly appeared.

The black shield shone, and a shield of light formed from countless runes enveloped it. Bombarded by the rain of light, the shield of light distorted and shifted aside.

After most of the power of the energy beams was deflected, the remaining power was not enough to penetrate the black shield.

The Glorious Sun Warlock rank freak is extremely fast. As it resisted the bombardment of the Star Destroyer Battlestar's secondary artillery, it approached the Star Destroyer Battlestar at a rapid speed.

Sitting on the bridge of the Star Destroyer Battlestar, the corners of Zhang Hanshan's mouth rose into a slight smile, and she uttered: "A Glorious Sun Warlock rank powerhouse, they really think highly of me."

If it were before, even though he is a true disciple of the Battle Demon Sect, the Moonlight Warlock Zhang Hanshan would only flee in embarrassment if she met a Glorious Sun Warlock rank freak. And if it was a surprise attack, she would even be in danger of dying.

But at this time, Zhang Hanshan sitting on the bridge is extremely calm. She pressed a button.

On the hull of the Star Destroyer Battlestar, a hatch suddenly opened, and a 10-meter-tall Dazzling Light Unit emerged. The Dazzling Light Unit is green, has blades of different lengths on its joints, has a diamond-shaped head inlaid with four electronic eyes, is engraved with countless runes, and exudes wisps of soul fluctuations.

When the Dazzling Light Unit appeared, without the sound of an engine starting, it shook slightly, and then appeared in front of the Glorious Sun Warlock rank freak and slashed at it.

The freak swung its blade and slashed at the Dazzling Light Unit as well.

The Dazzling Light Unit, who allowed the freak's blade to slam into, blew into pieces.

Green blade rays also slammed into the freak, severing three of its arms and shredding most of its carapace.

With a flash of black light, the freak regenerated at a speed visible to the naked eye.

The freak smiled coldly: "Humph, to compete with me in terms of resilience and defense, what a reckless thing. Golems are just brainless things."

Since the Dazzling Light Unit dealt it quite a bit of damage, the freak had to admit that the Dazzling Light Unit is rather formidable. However, since it was able to destroy the Dazzling Light Unit, the freak couldn't help but feel a little proud.

A green light shone, and the remains of the Dazzling Light Unit quickly joined together. The fully recovered Dazzling Light Unit appeared in front of the freak.

“How could this be? How did it recover so quickly?”

The freak was struck dumb. Green blade rays engulfed the freak.

After dozens of breaths of time, the Glorious Sun Warlock rank freak was chopped into countless pieces. At the same time, the Dazzling Light Unit absorbed pure soul force, making it even more powerful.

The Dazzling Light Unit is quite special. It not only possesses undying properties, but it can also evolve. When a Dazzling Light Unit evolves into its perfect form, it is known as Dazzling Ruler, which is an ultimate xizu weapon much like Devourer and Phantom Ruler.

At their peak, the xizu had only less than 20 Dazzling Rulers. This shows how difficult it is to produce Dazzling Rulers. Dazzling Rulers, which could suppress a galaxy, had an extremely important position among the xizu.

Ten Type III Undyings suddenly flew out from the Star Destroyer Battlestar and led countless modified 4th generation battle robots rushing towards the extraordinary life forms like a tide.

“The Multi-armed Black Armor King is dead!”

“How is this possible? Zhang Hanshan is just an insignificant Moonlight Warlock, how could she have killed the Multi-armed Black Armor King?”

“This is impossible!”

“...”

Seeing that the Glorious Sun Warlock rank freak was killed by Zhang Hanshan, the extraordinary life form chiefs suddenly felt their blood run cold and cried out.

The gap between the Glorious Sun Warlock and the Moonlight Warlock realms is huge. Even though Zhang Hanshan is a Moonlight Warlock from a major sect, but she still stands no chance against a Glorious Sun Warlock rank freak.

For the Multi-armed Black Armor King, who was a top powerhouse even among Glorious Sun Warlock rank freaks, to die at Zhang Hanshan’s hands is simply shocking.

Almost in an instant, the Type III Undyings led countless battle robots into the midst of the extraordinary life forms.

Attacked by the modified 4th generation battle robots, the extraordinary life forms suffered disastrous casualties at once and disappeared almost at a speed visible to the naked eye.

Two hours later, countless bodies of extraordinary life form appeared in the ice-cold Astral Boundary. The six Moonlight Warlock rank extraordinary life forms were also slayed by the Dazzling Light Unit one after another.

After wiping out the huge army of extraordinary life forms, countless robots flew out and began to sweep the battlefield, collecting the bodies of the extraordinary life forms. The bodies of extraordinary

life forms represent a great wealth. There are many Warlocks in the Cangzhi Plane who need these bodies to conduct experiments.

Chapter 857 – The Sky Collapses

Every Moonlight Warlock rank powerhouse of the Battle Demon Sect has brought a fleet to wage war in the Astral Boundary, conquering one plane below grade 6 the Battle Demon Sect knows of after another.

Planes at grade 6 and above generally have Bright World Warlock rank powerhouses or intermediate divine force rank gods keeping watch. With the Battle Demon Sect's current strength, it'll take a lot of effort to deal with them. Moreover, many grade 6 planes the Battle Demon Sect knows of are backed by Infinity Warlock rank forces. Once you attack such a plane, it is equivalent to go to war with a formidable force.

Three months passed in the wink of an eye.

Crack! Crack!

All of a sudden, sounds of something shattering rang in the entire universe, and crystal-like light shattered, turned into specks of light, and scattered amid the countless planes of the universe.

As if they were pulled by a force, more than 50% of the crystal-like lights fell into the Cangzhi Plane.

After the Cangzhi Plane absorbed the crystal-like lights, formidable life magic energy pervaded the entire plane, and the plane's energy level climbed.

The Cangzhi Plane is the only grade 1 plane that human Warlocks have discovered in the universe. The formidable plane that once gave birth to Eternals and the human Eight Warlock Emperors began to awaken slowly. Under the influence of the plane origin will, due to some "coincidences", hidden treasure troves began to show signs of their existence.

After the crystal light disappeared, a huge rift appeared in the starry sky of the Cangzhi Plane, the Feisuo Plane, the Light of Eternity Plane, and countless other planes respectively.

"The fusion of the universes has begun!"

The Star Monarch looked at the huge rift that suddenly appeared in the starry sky outside the Cangzhi Plane, and a mysterious runes appeared in her eyes. With a dignified look on her pretty face, her figure fluttered, and she flew towards the huge rift.

The Time Monarch looked at the huge crack in the starry sky with a grave look in his eyes, and whispered: "The great tribulation has officially begun! I wonder how many people will survive it!"

With a flash of light, the Time Monarch's figure shook slightly, and he disappeared.

Light flashed as powerhouses above the Bright World Warlock rank flew out from the branch floating continents occupied by the Six Warlock Dynasties.

Before long, the six Warlock Monarch rank powerhouses of the Six Warlock Dynasties appeared in front of the huge rift.

The Time Monarch said unhurriedly while gazing at the huge rift. "This is a universe rift that links the two universes. This rift must be sealed for now. Otherwise, if the Warlock Emperor rank powerhouses of the other universe, whose energy level is much higher than that of our universe, come to attack us, we will be in danger."

Enigmatic light shimmered in the eyes of the Transcendent Monarch, and he uttered slowly: "Much like that other universe, our universe also has Warlock Emperor rank old farts. Wouldn't it be better to open the rift and let the Warlock Emperor rank powerhouses of the other universe come over and fight against other race powerhouses of our universe?"

Those who haven't reached the Eternal realm, including Warlock Emperor rank powerhouses, thanks to the erosion of time, will have their soul decay, and eventually die.

However, Warlock Emperor rank powerhouses can use taboo stones as well other incredible methods to seal themselves and avoid the erosion of time, thus living to the present time.

The Taboo Monarch said coldly: "Although the Warlock Emperor rank powerhouses have started to awaken, but our lords have yet to return. Meanwhile, if the enemy orders us to submit, do we comply, or do we make a last stand and perish?"

Although the Six Warlock Dynasties possesses Emyrean grade secret treasures as well as have the protection of Holy Spirit Warlocks, but when faced against a Warlock Emperor rank powerhouse, their defeat is all but guaranteed.

If the Six Warlock Dynasties join forces, they can barely contend against a Warlock Emperor rank powerhouse whose soul has decayed and whose strength has weakened to the extreme.

But once a Warlock Emperor rank powerhouse who is in their prime steps in, then even if the Six Warlock Dynasties join forces, they won't be the opponent of the other party. They'll be able to give the other party a minor injury at most.

The Transcendent Monarch frowned slightly and fell silent.

"Let's start!"

The Time Monarch silently recited an incantation and pointed with a finger, and small white balls flew out of his hands and shot towards the huge rift.

As soon as the small white balls sank into the huge rift, they opened and formed time nodes.

The light emitted by the small white balls formed a net of time with the time nodes as the backbone.

All of a sudden, a large hand formed from magic, covered with countless strange eyes, carrying wisps of Holy might, emerged from the depths of the rift and extended towards the Time Monarch.

When the large hand covered with weird eyes entered the net of time, as if it was eroded by the river of time, it suddenly aged, decayed, and turned into ashes.

"The law of time? The Time Dynasty's Time Monarch? Your universe is destined to wither and turn into nutrients for our universe. Time Monarch, you are a rare talent, surrender! As long as you work for our universe, you may be able to become a Warlock Emperor rank powerhouse in the future."

A voice full of confidence and enticement, along with wisps of Great Holy step Holy might, came from the rift.

The Time Monarch uttered decisively: "Thank you for your kindness, but I have decided to stand with our universe to the bitter end."

Behind the Light Monarch, dozens of Infinity Warlocks chanted incantations and pointed with a finger, and magic light entered the time nodes and strengthened them.

In a direct confrontation, ten Warlock Monarchs are not the opponent of a Great Holy step powerhouse. However, the Time Text, which is an Empyrean grade secret method for a reason, has powerful sealing secret methods recorded. With the Time Monarch and dozens of Infinity Warlocks, coupled with the power of time secret treasures, it makes it hard even for a Great Holy step powerhouse to break this seal secret method.

The large hand with eyes slammed into the magic barrier set up by the Time Monarch repeatedly. Every time it slammed into the barrier, the large hand collapsed and turned into ashes.

The gloomy voice of the Great Holy step powerhouse came from the huge rift: "Humph, stubborn aboriginal monkeys. Sure enough, killing you all is the way to go."

The Time Monarch stepped aside immediately after he set up the barrier.

The Taboo Monarch stepped forward and placed a second barrier with the Taboo Dynasty's Warlocks

The Transcendent Monarch, the Death Monarch, the Star Monarch, and the Magic Note Monarch leading the Warlocks of their Warlock dynasties, used secret treasures and set up one seal after another on the huge rift.

Formidable force coming from the rift bombarded the barriers repeatedly, setting off ripples.

Under the impact of the formidable force, the huge rift grew bigger little by little.

The powerhouses of the Six Warlock Dynasties could only stay in front of the huge rift and reinforce the seals.

A huge rift suddenly appeared in the starry sky outside the Light of Eternity Plane, and a black meteor with the diameter of ten kilometers flew out of the rift and dropped towards the plane.

Boom!

Along with a tremendous blare, the black meteor fell into a forest in the Light of Eternity Plane, burst open, and set off a terrifying storm.

In the center of the cloud of dust, when the huge meteor with a diameter of ten kilometers opened, it revealed beehive-like holes. Warriors enveloped in a black armor jumped out, opened their mouths, and absorbed the life magic energy of the Light of Eternity Plane.

"These warriors possess with Great Warlock rank life force, and it is still rising slowly. Are they analyzing the rules of this universe?"

From a stronghold in the Light of Eternity Plane, Yang Feng watched the other universe base with peculiar shade in his eyes, and then gave an order.

The engines of 3,000 Starry Sky Rippers boomed as they flew out of a nearby warp gate and flew towards the black-armored warriors like shooting stars.

The black-armored warriors turned around, ejected sharp blades from their hands, and rushed towards the Starry Sky Rippers.

Boom! Boom!

The black-armored warriors, who possess fearsome combat prowess, surprisingly fought the Starry Sky Rippers to a standstill, with the casualty rate being nearly 1:1.

The fierce battle lasted for a quarter of an hour, at which point the 3,000 Star Sky Rippers were completely annihilated, while the black-armored warrior suffered 4,000 plus casualties.

After the battle, a large number of weird insects the size of cattle, with large bellies, flew out of the hive.

When the weird insects arrived at the battlefield, they absorbed the remains of the black-armored warriors, and then flew back to the hive.

Yang Feng watched the weird insects with a solemn look in his eyes: "Their recycling. In other words, as long as the other universe base has sufficient resources, they can grow stronger."

Yang Feng issued an order, and the most elite legion under his command converged. The huge mechanical legion formed by countless 4th generation battle robots flew towards the other universe base.

Chapter 858 – Hive

A Star Destroyer Battlestar emerged in the void, and a main artillery beam, which can slay a Bright World Warlock, barreled towards the other universe base.

The other universe hive-like base suddenly shone, and countless black armor pieces flew out and formed a black carapace.

When the Star Destroyer Battlestar main artillery beam slammed into the black carapace, it was redirected by a queer force, and then slammed into the ground and blasted open a huge hole, and a large amount of sand and stones splashed about. Consequently, a frightening shock wave hit the other universe base. But the shock wave wasn't able to harm the base.

Yang Feng's eyes shimmered gravely: "90% of the force was deflected! The other universe has a higher energy level for a reason."

According to his analysis of the data he got from the xizu legacy, Yang Feng learned that the energy level of the universe where the xizu lived was half an energy level lower than that of the world of Warlocks.

The universe energy level of the universe that is about to merge with the universe where the world of Warlocks is located is much higher.

The upper limit of the power that a high-level universe can hold is much greater than that of a low-level universe. Generally speaking, the level of civilization bred by a high-level universe is much higher than that of a low-level universe.

The fusion between the high-level universe and the universe where the world of Warlocks is located is regarded as a great tribulation for the latter's life forms because their opponents are despairingly powerful. A slight misstep can lead to the life forms of this universe to be reduced to slaves of the life forms of the other universe.

The life forms of the two universes are now in a position where they have to fight to the bitter end. Only when one side finishes the other side off and dominates them completely, can the fusion be achieved.

Infinity Warlocks such as Yang Feng already belong to the upper echelon of the world of Warlocks universe. Even if they side with the other universe's life forms, they will most likely end up being killed by the other party and become nutrients for the other universe.

In the void, a Blazing Sun Battlestar slowly emerged, its main artillery shone, and a terrifying beam that can eliminate an Infinity Warlock slammed into the hive-like base.

The hive-like base shone with black light, and a glossy force field enveloped it.

The main artillery beam of the Blazing Sun Battlestar pierced through the force field, and then slammed into the black carapace of the base and reaped apart a layer of the carapace. Next, the beam slammed into the ground and blasted open a huge, bottomless pit in the ground.

"The Blazing Sun Battlestar's main artillery can destroy a small part of the base's defenses. Judging by the base's defenses, the Blazing Sun Battlestar would need to fire at least ten attacks in a short period of time to destroy the base.

Yang Feng stared at the base shrouded in a black carapace in the distance with a solemn look in his eyes.

The damaged part of the black carapace ejected black vein-like tubular objects that quickly intertwined, shone with black light, and formed into a new part of the black carapace.

Yang Feng inhaled a mouthful of cold air: "Awesome, what a formidable self-repair ability. This enemy is really tricky!"

The energy level of the Light of Eternity Plane is neither low nor high. The rift that appeared in the starry sky of the plane is not too big, while the thing that flew out of the rift is not regarded as that tough in the other universe. For such an enemy to be able to withstand the bombardment of the Blazing Sun Battlestar's main artillery, this is simply terrifying.

With a thought from Yang Feng, a pyramid-shaped Star Field Battlestar appeared from the void.

A resplendent beam barreled toward the black hive. In an instant, the beam pierced through the black hive's force field and slammed into the black hive.

Engulfed by the terrifying beam, the black hive burst apart, and countless fragments sputtered in all directions.

Black rays shot out from the black hive and flew towards the Star Field Battlestar.

The black rays are warriors, who have a pair of black wings on the back, are enveloped in black armor, are armed with spear-like weapons, and exude Moonlight Warlock rank fluctuations of power.

Yang Feng gazed at the black-armored warriors, and his eyes constricted a little: "Moonlight Warlock rank powerhouses, they are soldiers! They are the black hive's soldiers. The ones before were just military engineers."

In the universe where the world of Warlocks is located, Moonlight Warlocks are already regarded as Transcendent realm powerhouses and have a lofty status. They are the backbone of major forces. Every time a Moonlight Warlock is born, it is a big event for a Warlock group.

The black-armored warriors that flew out of the black hive number 100,000 plus individuals. The huge force formed from 100,000 plus Moonlight Warlocks can be rated as terrifying. Even if all the Moonlight Warlocks in the Battle Demon Sect are added up, it will be less than 5,000.

Among the 100,000 black-armored warriors, there are 5,000 warriors wearing green armor that exude Glorious Sun Warlock rank fluctuations of power, 300 warriors wearing silver armor that exude Bright World Warlock rank fluctuations of power, and 20 warriors wearing gold armor that exude Infinity Warlock rank fluctuations of power.

Upon seeing this force of the black hive, despite how strong Yang Feng is, he could not help but feel shocked.

Before Yang Feng entered the core world, this force of the black hive was enough to make him eat a big loss.

All of a sudden, a huge fleet consisting of one Star Field Battlestar, six Blazing Sun Battlestars, 24 Star Destroyer Battlestars, 20 Interstellar Carriers, and 365 Frigates appeared in the void.

The huge fleet shone brightly, and countless beams blasted toward the black hive's warriors like a tide.

Bombarded by the rain of light, black-armored warriors and green-armored warriors blew up from time to time.

The bombardment of the rain of light only managed to distort the force field around the 20 Infinity Warlock rank gold-armored warriors, unable to harm them.

Hatches opened on the battleships, and crowds of 4th generation battle robots poured out and rushed towards the other universe warriors like an avalanche.

The huge mechanical torrent collided with the other universe legion at once.

Boom! Boom! Boom!

Huge explosions fell incessantly on the ear. As soon as they came into contact with the black-armored warriors, a large number of 4th generation battle robots were destroyed, and turned into fireworks.

However, the fierce and dauntless 4th generation battle robots under Yang Feng's command number hundreds of millions. Under the command of the Infinity Warlock rank gold-armored warriors, the other universe powerhouses penetrated the mechanical legion's defensive perimeter again and again. Nevertheless, many powerhouses still died to the enemy's siege.

The Type II Undyings, who were destroyed by the enemy force, repaired themselves and rushed back into battle at once.

“It’s time! Go ahead!”

When the other universe legion pierced through the twentieth defensive perimeters formed by the 4th generation battle robots, Yang Feng ordered coldly.

1 million 5th generation battle robots, namely Brilliant Star Hunters, Dazzling Light Units, and Brilliant Envoys, appeared suddenly. Led by the three supreme Infinity Warlocks Agnipe, Knarissa, and Besskya as well as the Infinity Warlocks Yu Yan, Yu Tianling, Alexia, and Sebas, the 5th generation robots pounced at the other universe legion.

After being baptized by the artillery fire of the fleet and the siege of the 4th generation battle robots, the strength of other universe legion was reduced by about 20%.

The three supreme Infinity Warlock rank powerhouses Agnipe, Knarissa, and Besskya waved the Fallen Angel Sword in their hand and slayed three other universe junior Infinity Warlocks.

The other universe Infinity Warlock rank powerhouses immediately formed three groups to fight Agnipe’s group of three.

None of the other universe Infinity Warlock rank powerhouses are an opponent of a supreme Infinity Warlock rank powerhouse like Agnipe and them. But after three of them joined forces, a strange resonance was formed, and their strength surged. Consequently, when one of them attacked, it is equivalent to superimposing with the power of the other two. They can now block a supreme Infinity Warlock rank powerhouse like Agnipe.

The remaining other universe Infinity Warlock rank powerhouses also formed groups of three and engaged Yu Yan and the other Infinity Warlocks in combat, holding the dominant position.

When the 5th generation battle robot Brilliant Star Hunters, Brilliant Envoys, and Dazzling Light Units entered the midst of the other universe legion, which was under the siege of the mechanical legion, the enemy suffered heavy casualties.

The Brilliant Star Hunters blurred and flashed as if ghost and slayed the black-armored warriors into countless pieces one after another.

The Brilliant Envoys radiated light that purified the pieces and turned them into ashes.

The Dazzling Light Units swung their swords at the silver-armored warriors and sliced the enemy into two without care for their own well being.

Chapter 859 – Annihilation

Caught off guard, 70 plus of the 300 Bright World Warlock rank silver-armored warriors were slayed at once. Before they could restore themselves, the Brilliant Envoys’ light of purification slammed into their fragments and purified them.

Countless hidden Mistwalkers suddenly turned into mist that enveloped the battlefield and blocked the other universe warriors' communication and senses.

The Mistwalkers' mist also eroded the power of the other universe warriors.

Deprived of their senses inside the mist, the strength of the other universe powerhouses dropped by a fraction.

In the mist, Brilliant Star Hunters guided by optical computers swiftly slayed the other universe powerhouses.

The 100,000 Moonlight Warlock rank powerhouses who have luckily escaped from the hive suffered heavy casualties, with a large number of powerhouses dying at every moment.

"Retreat!"

The face of a supreme Infinity Warlock rank golden-armored powerhouse flickered, his armor shone purple-gold, and he roared.

Although the other race powerhouses are using a language foreign to this universe, but the level-5 optical computers can easily interpret it.

The methods of Warlocks are queer and unfathomable, one of which is a spell called Alien Language Analysis. As long as this spell is cast, any language you don't understand can be analyzed. Only some languages full of mysterious laws and forces cannot be analyzed by this spell.

The language the other universe powerhouses use doesn't contain any extraordinary forces, which is how Yang Feng's level-5 optical computers analyzed it in an instant.

Following the order, rays of light shone, and the huge other race legion scattered and, while exerting a strange method, disappeared.

The armor of the other universe gold-armed powerhouses split open and radiated light and shade, and then the gold-armed powerhouses distorted and disappeared.

Yang Feng frowned slightly: "Upon seeing that things are far from reassuring, they retreat decisively! This kind of enemy is really troublesome!"

Yang Feng likes enemies who won't retreat until they are slayed. Cunning enemies who run when they can't win are the trickiest.

The corners of Yang Feng's mouth rose slightly: "Unfortunately, you chose the wrong place to descend! If it was in another place, I wouldn't be able to deal with you, but this is one of my lairs. Since you came to my lair, how can I let you leave alive?"

With a thought, Yang Feng transmitted an order: "Start the Skynet!"

Radar-like machines extended in the mountains, plains, deserts, and oceans of the Light of Eternity Plane.

The many radar-like machines radiated light rays that shot in all directions.

In an instant, the entire Light of Eternity Plane was shrouded by the light rays. Shrouded by the light rays, the laws and forces of the Light of Eternity Plane were mastered and reconstructed by the light rays.

This is a top level-5 Skynet. This level-5 Skynet can change the laws of heaven and earth in this area and extract all the forces of this world for its use, integrating offense and defense.

Originally, with Yang Feng's resources, it was impossible to set up this level-5 Skynet. However, after integrating the colossus that is the Battle Demon Sect and using the huge amount of resources accumulated by the Battle Demon Sect, Yang Feng was able to set up a level-5 Skynet in several key locations.

Strange ripples spread in all directions, and the invisible black-armored warriors suddenly appeared.

The Brilliant Star Hunters and the Dazzling Light Units flickered and slayed the black-armored warriors.

As the ripples surged, the green-armored and silver-armored warriors emerged as well.

The ripples set off by the Skynet entwined with the other universe warriors like ropes and made them feel like there is a mountain weighing on them, and they slowed down considerably.

The hundreds and thousands of Dazzling Light Units rushed towards the green-armored and silver-armored powerhouses. Only by slaying the Glorious Sun Warlock rank green-armored warriors and the Bright World Warlock rank silver-armored warriors can the Dazzling Light Units evolve rapidly. The Moonlight Warlock rank black-armored warriors have very limited effect on the evolution of the Dazzling Light Units

"Go to hell!"

Eyes shot with blood, a Bright World Warlock rank silver-armored warrior released countless silver blade rays and slashed the Dazzling Light Units around him.

The silver blade rays sliced the energy shields of the Dazzling Light Units activated, and then cut open huge wounds in the Dazzling Light Units' outer armor.

Silver light shone and the Dazzling Light Units repaired themselves at a speed visible to the naked eye.

One after another, the Dazzling Light Units knocked into the net of blade rays formed by the silver-armored powerhouse and hit the enemy blade with their swords, and then were knocked away.

After hundreds of Dazzling Light Units were knocked away, eight Dazzling Light Units seized the moment when the silver-armored warrior was weakened. Two Dazzling Light Units blocked the silver-armored powerhouse with their swords, while the other six Dazzling Light Units slashed the other party with their blade, inflicting the enemy heavy injuries.

Besieged by the hundreds of Dazzling Light Units, the silver-armored powerhouse was eventually sliced into countless pieces, and most of his power was directly absorbed by the Dazzling Light Units.

When the silver-armored powerhouses appeared, they were besieged and slayed by Dazzling Light Units.

The black-armored powerhouses were instantly killed by Brilliant Star Hunter as soon as they appeared.

Yang Feng came to a conclusion through the analysis of the level-5 optical computers: "One Dazzling Light Unit is equivalent to one green-armored powerhouse and 100 Dazzling Light Units are equivalent to one silver-armored powerhouse in terms of strength. Fortunately, I have integrated the resources of the Battle Demon Sect. Otherwise, even if I could defeat these other universe powerhouses, it would be difficult to wipe them out. Additionally, my strength would have decreased by a lot."

Each 5th generation battle robot is comparable to a Glorious Sun Warlock. If a 5th generation battle robot descends on a grade 7 plane, it will become an invincible existence capable of crushing all resistance.

While the 5th generation battle robots are really powerful, they require massive amounts of resources to be built. If Yang Feng had not taken control of the Battle Demon Sect and mobilized countless resources from the Battle Demon Sect, he wouldn't be able to produce 1 million Level 5th generation battle robots in such a short time.

The Skynet released ripples, which superimposed to the 36th layer.

The space distorted, and a two-meter-tall, extremely handsome man with a green rhombus crystal embedded in the forehead, a horn on his head, and purple hair, exuding Infinity Warlock rank fluctuations of power, appeared suddenly.

The man with purple hair struggled frantically as if there are ropes binding him, yet he can't seem to break free.

When the man with purple hair appeared, sixteen good-looking men and women with a horn on the head, yet without a rhombus crystal embedded in the forehead, exuding Bright World Warlock rank fluctuations of power, appeared suddenly.

Since the Skynet can suppress even Warlock Monarch rank powerhouses, the Infinity Warlock and the Bright World Warlocks rank powerhouses stand no chance against it.

Yang Feng's eyes shimmered gravely: "An Infinity Warlock and sixteen Bright World Warlocks. This is the true strength of this hive. However, after equipping the golden armors, their strength can increase by a great level. The high energy level universe civilization is indeed extraordinary."

The Warlock path gets progressively harder. In the Cangzhi Plane, even if a Bright World Warlock gets a level-9 secret treasure, it is hard for them to display Infinity Warlock rank fighting strength. But the other universe Bright World Warlock rank powerhouses can use the power of the strange armor to easily break the barrier between realms and display Infinity Warlock rank strength. That's simply incredible.

The Seven Color Rose Garden's Garden Master flew over and pointed with a finger, and petals suddenly flew out, entered the other universe powerhouses, and sealed them.

As the ripples continued to spread, the black-armed, green-armed, and silver-armed warriors were locked firmly, and then were besieged by the 5th generation battle robots.

After a Dazzling Light Unit slayed five silver-armored powerhouses, it trembled slightly, a crystal appeared on its forehead, it expanded by a circle, new runes appeared inside it, and it emitted queer breath similar to that of intelligent life forms.

When Yang Feng saw this scene, he smiled: "It evolved. The first Bright World Warlock rank Dazzling Light Unit, not bad. When it evolves into an Infinity Warlock realm powerhouse, it will have become an initial form Dazzling Ruler."

Chapter 860 – Gumana Universe

The Light of Eternity Plane, in the center of a large underground laboratory, there is a huge hive. Only a part of the hive remains after it was bombarded by a Star Field Battlestar.

The door of the large underground laboratory suddenly opened, and a flesh mechanical golem avatar of Yang Feng strode inside.

After Yang Feng integrated the resources of the Battle Demon Sect, he obtained countless precious resources.

This mechanical golem avatar possesses junior Infinity Warlock rank fighting strength. But since it consumes too much resources, Yang Feng produced only two units.

"This hive is still alive! How surprising."

As soon as Yang Feng came to the hive, he took a closer look and saw that there is black mucus flowing out from black tubular tissue similar to blood vessels of broken parts of the hive, repairing the damage inside the hive.

"Interesting!"

With a thought from Yang Feng, a crowd of ant-like robots rushed into the laboratory and crawled towards the inside of the hive.

The ant-like robots are called Analysts and are responsible for analyzing the technology contained in the spoils of war.

The xizu was not a race stuck in the old ways, as many of their technologies came as spoils of war from strong enemies they defeated.

The energy level of the universe where the xizu lived was half an energy level lower than that of the world of Warlocks, while the energy level of the world of Warlock was half an energy level lower than that of the other universe. In other words, the universe energy level of the universe where the xizu lived was an entire energy level lower than that of the other universe. Therefore, although Yang Feng has mastered the technology of the xizu, he also attaches great importance to the technology of the other universe.

When the crowd of Analysts crawled into the hive, the hive ejected black acid spraying at the Analysts from the tubes.

Swept by the black acid, their energy shields and the ant-like Analysts themselves were corroded at once.

After the black acid corroded all the robots, it slowly merged with the hive and turned the robots into nutrients for the hive.

Yang Feng's eyes shimmered gravely: "Awesome, the defense mechanism of this hive is really formidable. The hive has suffered so much damage, yet its defense mechanism hasn't yet been destroyed."

After it was bombarded by a Star Field Battlestar's main artillery, two-thirds of the hive have been destroyed. At the time, a large amount of its power has been deployed to protect the other universe's powerhouses. This is how the other universe's 100,000 Transcendent rank powerhouses managed to come out unscathed.

If it hadn't been for the hive deploying its power to guard them, 80,000 or so of the 100,000 Transcendent rank powerhouses would have been blasted apart by the bombardment of Yang Feng's main artillery. If they were unlucky, even a few Infinity Warlock rank powerhouses might have died.

Yang Feng pondered for a while, and then walked directly into the hive.

Without the hive having analyzed the karma spell fluctuations, it can't trace back to the true body by killing the avatar.

As soon as Yang Feng stepped into the hive, strange ripples pervaded the hive and swept him.

Sharp, pitch-black tentacles stabbed towards Yang Feng from all directions like spears.

With a thought from Yang Feng, a transparent magic shield appeared around him.

When the sharp, spear-like tentacles stabbed into the magic shield, they were deflected.

A flow of data flashed in Yang Feng's eyes, analyzing the defense mechanism of the hive: "Judging by their intensity, the attacks can slay Moonlight Warlocks. But it has little effect on Glorious Sun Warlocks."

After the sharp tentacles bounced off, they suddenly opened, revealed chrysanthemum-like mouthparts, and ejected black acid spraying at the transparent magic shield.

Sizzle!

Sizzling sounds came from the magic shield as the black acid corroded it.

"The extremely corrosive can corrode Glorious Sun Warlock rank magic shields. The hive's defense mechanism was indeed damaged."

Yang Feng, who activated a magic shield, strode into the hive. With a casual wave of his, wind blades cut off blood-vessel-like tentacles one after another.

The hive suddenly swelled, and countless runes appeared throughout the hive.

"Shit, it's going to explode!"

Yang Feng's face fell, and he blurred into motion and flew towards the outside.

The black hive suddenly collapsed on itself, and then exploded in an instant. Endless black light radiated in all directions. When the black light hit the laboratory's walls, the walls rippled.

"What a formidable method."

When the frightening black light hit Yang Feng's magic shield, it set off ripples, causing him to frown slightly.

If he could analyze the secrets of the hive, it would naturally be of great benefit to Yang Feng. It would be possible to upgrade xizu technology. But the other universe has a strong sense of secrecy. As such, it's not that simple to analyze its technology.

The eyes of the Infinity Warlock rank flesh golem avatar darkened, and Yang Feng pulled his consciousness away from the golem.

The Light of Eternity Plane, in a prison that is divided into many single rooms with an ice coffin each. The ice coffins have sealed the other universe's powerhouses Yang Feng captured.

With a flash of light, an ice coffin disappeared, and then appeared in a laboratory.

Many sharp, mechanical tubes pierced into the head of the other universe's powerhouse in the ice coffin and tried to extract information.

Boom!

There was a crisp sound, and the head of the other universe's powerhouse exploded. A huge explosion enveloped the laboratory and destroyed a large number of mechanical tubes.

"Failed again! The head of other universe's Bright World Warlock rank powerhouses has a chip implanted. Once you touch the memory chip, their head will explode. In order to read their memories, you need to circumvent this problem."

Yang Feng frowned slightly as he watched the other universe's powerhouse explode.

In a war, intelligence plays a key role. Intelligence is vital to the world of Warlocks. Since the energy level of the universe on the other side of the rift is a half an energy level higher, who knows how many formidable beings they have. If they can't obtain intelligence on the other universe, then the world of Warlocks will suffer tremendous damage before things fully develop.

"However, the defense of the Moonlight Warlock rank powerhouses is slightly weaker, and their mind can barely be read."

Yang Feng looked at the large number of other universe's powerhouses, who look quite similar to humans, lying on experimental platforms in a laboratory, and revealed a smile.

Before long, various machines in the laboratory extracted a lot of precious information from the Moonlight Warlock rank powerhouses.

The other universe's powerhouses call their universe the Gumana Universe.

The Gumana Universe is controlled by three Eternals, namely, the Spirit Eyes Eternal, the Wing Eternal, and the Frost Eternal.

Among them, the Spirit Eyes Eternal is the oldest Eternal, who once dominated the entire Gumana Universe and has lived for more than 3 billion years.

Originally, with the Spirit Eyes Eternal present, it was impossible to give birth to other Eternals. However, the Gumana Universe had a battle of devour with another universe 2 billion years ago. At that time, the Spirit Eyes Eternal suffered major damage, and the Wing Eternal suddenly emerged and took this opportunity to promote to an Eternal.

1 billion years ago, there was yet another battle of devour, from which the Frost Eternal emerged as the Gumana Universe's third Eternal.

The Spirit Eyes Eternal has the bern divine race as subordinates, the Wing Eternal has the winged divine race as subordinates, and the Frost Eternal has the frost divine race as subordinates.

The three divine races dominate the entire Gumana Universe.

Under the three divine races, there are the eighteen sacred races, each of which has a Warlock Emperor rank powerhouse standing guard.

In addition to the eighteen sacred races, there are countless other races of different sizes attached to the sacred races. The stronger other races have Holy Spirit Warlocks standing ground.

The ones who invaded Yang Feng's territory were the private troops of baron Loanka of the green rhombus race, one of the eighteen sacred races

The Gumana Universe's powerhouses have already disseminated the information that the universe where Warlocks live, which they call the Jeddah Universe, is a low energy level universe.

The powerful races of the Gumana Universe were mobilized to start the fight to annex the Jeddah Universe.

Baron Loanka was sent on a reconnaissance mission. His main task was to gather intelligence on the Jeddah Universe. But he unluckily bumped into Yang Feng, and was wiped out by him, whose strength has just increased.

"It's bad! It's real bad! Three Eternals, there are three Eternal in the Gumana Universe. This news is so bad that it can't be any worse."

After Yang Feng obtained a large amount of information, an oppressive feeling overcame him.

Eternals are beings that time cannot cleanse and are far stronger than Warlock Emperor rank powerhouses.

If it weren't for the barrier separating the two universes, an Eternal could descend on the universe where Warlocks dwell and wipe out any resistance.

A trace of understanding surged in Yang Feng's heart: "Unless one can advance to an Eternal before the two universes are completely connected, one basically cannot control one's destiny."
