Chapter 861 – Siege on the Battle Demon Sect

In the fight of annexation between two universes, the strong get stronger and the weak get weaker. In order to survive such a great tribulation and take control of your own destiny, you have to become the strongest.

The starry sky outside the Battle Demon Plane. Suddenly, lights gleamed, the space distorted, and six Gumana Universe's battle unit hives appeared.

"This is the Battle Demon Sect, one of the former Ten Great Sects of the Great Cloud Dynasty as well as one of the emerging forces in this universe. If we destroy it, we'll receive great recognition when we go back."

In the deepest part of a hive, a handsome young man with a red rhombus crystal on the forehead and red hair smiled slightly.

In front of the young red rhombus race powerhouse, there is a huge round table with a blurry shadowclaw powerhouse, a tall hyperion powerhouse, a shirake powerhouse who seems to be engulfed by endless darkness, a purple rhombus race powerhouse with a purple rhombus crystal embedded in the forehead, and a hideous looking ghostblade powerhouse covered in sharp blades.

These six powerhouses are the masters of these six hives.

The blurry shadowclaw expert said: "The Battle Demon Sect? This Warlock group is not only extremely powerful, but they also have Monarch grade secret treasures. It's a little troublesome to break through their lair. I can't help but admit, but the aboriginals of the world of Warlock are rather strong, second only to our former great enemies of the Muja Universe and the Sarah Universe."

The Muja Universe was the first powerful enemy the Gumana Universe encountered. At the time, the Spirit Eyes Eternal nearly died in the war with the Muja Universe, giving the Wing Eternal a chance to advance to an Eternal, and then defeat the Muja Universe and annex it.

The Sarah Universe is the second strong enemy the Gumana Universe encountered. At the time, the Spirit Eyes Eternal and the Wing Eternal were forced to let the Frost Eternal advance to an Eternal.

The shadowclaw powerhouse clearly thinks highly of the world of Warlocks.

The red rhombus race powerhouse said slowly: "This is a powerful universe that gave birth to Eternals before after all. It cannot be underestimated. That's why we have to destroy all forces with potential. Otherwise, even though they are rubbish now, but with the meddling of the universe will, they may become a great enemy of our universe."

The remaining powerhouses fell silent, and then nodded.

Whenever two universes devour each other, the universe will of both universes will try their best to breed strong entities of their to compete with the strong entities of the enemy universe.

When the Gumana Universe devoured other universes, it had encountered this situation many times. Seemingly unassuming nobodies developed rapidly in the universe war and eventually grew into terrifying existences that could threaten the Gumana Universe.

If it weren't for the Gumana Universe's Eternals, who quelled one outstanding individual of the other universes after another, The Gumana Universe might have already been devoured by another universe.

Lately, the Battle Demon Sect has developed at an astonishing speed and annexed many minor planes. It has become one of the key targets of the Gumana Universe.

The red rhombus race powerhouse uttered with a light smile: "Then let's begin!"

Two hives opened at once, and crowds of black-armored warriors, green-armored warriors, and silver-armored powerhouses led by ten gold-armored powerhouses flew out and shot towards the Battle Demon Plane.

A hive unfolded, countless blurry, shadow-like existences flew out abruptly.

A hive unfolded, and 100-meter-tall hyperions with infinite power, engraved with mysterious runes, suddenly flew out and rushed towards the world below.

A hive unfolded, and fuzzy and twisted beings shrouded in darkness flew out suddenly.

A hive unfolded, and freaks with sharp blades growing everywhere, which are shrouded in queer runes, flew out suddenly.

The powerhouses of the six hives flew out and rushed towards the Battle Demon Plane from six directions.

"Open fire!"

Xing Rentu gazed at the swarms of Transcendent rank powerhouses in the sky, his eyes flickered gravely, and he ordered coldly.

In the Battle Demon Plane, mountains, deserts, plains, and forests suddenly parted, and energy beam turrets and live ammunition turrets extended.

The entire Battle Demon Plane suddenly turned into a terrifying fortress. A rain of light burst out from the Battle Demon Plane and swept towards the sky.

Engulfed by the rain of light, the freaks that flew out from the six hives burst into fragments.

Xing Rentu watched countless Transcendent rank powerhouses in the sky die with delight: "The inheritance the sect master got from who knows where is something else! To be able to display such might without consuming magic crystals, amazing!"

The Battle Demon Sect has set up formidable offensive arrays in their headquarters over generations. However, these offensive arrays come with a tremendous expenditure.

The mechanical turrets use high-energy crystals as the power source. Although, unlike magic crystals, the high-energy crystals cannot increase a Warlock's extraordinary power, but they are much easier to obtain.

Suddenly, an extra eye appeared on the forehead of the purple rhombus race and the red rhombus race powerhouses, who wear armors of different colors, and beams shot out and barreled towards the countless turrets below.

Boom! Boom! Boom!

The beams slammed into the turrets with great precision and blasted them apart one after the other.

At this moment, Yang Feng silently came to the Battle Demon Plane. As he watched the battle unfold through holographic projection, he analyzed: "The Gumana Universe's powerhouses also have the power to attack from a distance. However, the evolution of the Gumana Universe is geared towards individual military strength. They cannot match up to the xizu technology in terms of long-range firepower.

There are three Eternals in the Gumana Universe as well as eighteen Warlock Emperor rank powerhouses, each of which has the power to suppress an ordinary universe.

Under these circumstance, the civilization of the Gumana Universe naturally evolved in the direction of personal strength. For example, the golden armor can enable Bright World Warlock rank powerhouses to display Infinity Warlock rank fighting strength, which is simply unimaginable in the world of Warlocks. Therefore, it is not surprising that their long-range firepower is much worse than that of the xizu, who specialized in interstellar warfare.

After paying the price of tens of thousands of casualties, the Transcendent rank powerhouses of the six races crossed the enemy's artillery defense perimeter and appeared above the headquarters of the Battle Demon Sect.

The six races sent a total of 60 powerhouses with Infinity Warlock rank battle prowess and 1,800 powerhouses with Bright World Warlock rank battle prowess. This is a despair inducing force.

After all, the Battle Demon Sect currently only has a sect master and seventeen great elders with the cultivation base above the Glorious Sun Warlock rank. On paper, there is a huge gap between both sides in terms of strength.

Yang Feng ordered coldly: "Start the Dragon King Array!"

Countless mysterious runes gleamed and endless power surged towards the floating continent where the Battle Demon Sect is located.

In the center of the floating continent, a huge mountain range stretching for thousands of kilometers trembled slightly and split open, and a 1,000-meter-long archaic dragon king covered in shiny runes flew out, a dull look in its eyes.

As soon as the archaic dragon king appeared, it fired a gold pillar of fire sweeping towards the sky.

Swept by the gold fire, twenty-odd Bright World Warlock rank powerhouses screamed and disappeared into ashes and smoke.

All of a sudden, countless angels flew out from the Battle Demon Sect's headquarters and flew towards the Gumana Universe's powerhouses in the sky. The Battle Demon Plane's gods cast various formidable divine spells that greatly boosted the strength of the angels.

The angels are mostly composed of Great Warlock rank soldiers, which are quite lacking compared the Gumana Universe's powerhouses, which are mostly composed of Moonlight Warlock rank soldiers. However, the angels can serve as cannon fodder to hold back the Gumana Universe's powerhouses, allowing the Battle Demon Plane's turrets to display a more terrifying offensive.

When the archaic dragon king appeared, it plunged directly into the center of the battle, fired pillars of fire, and burned Bright World Warlock rank powerhouses to ashes.

Flames soared from the Battle Demon Plane's floating continent and formed a sea of fire that nourished the archaic dragon king, who exudes Warlock Monarch rank breath, allowing it to easily mobilize the power of fire elemental particles to burn the enemy.

The Gumana Universe's powerhouses have extremely rich combat experience. The 60 Infinity Warlock rank powerhouses led the 1,000 plus Bright World Warlock rank powerhouses to attack the archaic dragon king.

All kinds of attacks slammed into the archaic dragon king and blasted open wounds on its body.

After all, the archaic dragon king is dead. Even though it has the upper hand against 10 Infinity Warlock rank powerhouses. But the fact that it wasn't instantly done for by 60 Infinity Warlock rank powerhouses is already a rather impressive outcome.

Yang Feng furrowed his eyebrows slightly and pressed a button.

10 Star Field grade main artillery rapidly rose from the Battle Demon Plane's floating continent and flashed, and 10 beams tore through the void and barreled towards the 6 hives in the starry sky.

Boom! Boom! Boom!

Under the bombardment of the 10 terrifying beams of light, 3 of the 6 hives instantly disappeared into smoke and ashes and the other 3 fragmented. Countless Gumana Universe's powerhouses flew out and fled, all the while cutting a sorry figure.

Chapter 862 – Escape in Defeat

Blazing Sun grade and Star Destroyer grade main artillery rose from the floating continent, shone brightly, and fired a dense rain of beams barreling towards the other universe's powerhouses above the Bright World Warlock realm.

Caught off guard, hundreds of Bright World Warlock rank powerhouses were wiped out and 3 Infinity Warlock rank powerhouses were severely injured by the rain of beams.

Seeing that the hives have been either damaged or destroyed and that 3 Infinity Warlock rank powerhouses have suffered serious injuries, the remaining Gumana Universe's powerhouses shuddered inside, and apprehension shimmered in their eyes.

After the 10 Starfield grade main artillery destroyed three hives and severely damaged the other three hives, they entered the charging stage. They cannot continue firing for the moment.

After the Blazing Sun grade and Star Destroyer grade main artillery were modified, although their firing rate was reduced from once every five minutes to once every one minute, but the charging time is still significant.

Braving the siege of angels and the bombardment of artillery, 30 Infinity Warlock rank powerhouses led 600 Bright World Warlock rank powerhouses to attack the Starfield grade main artillery.

A series of attacks such as bone blades, light rays, wind blades, and shadow rays blasted towards the 10 Starfield grade main artillery from a distance.

As long as the 10 Starfield grade main artillery are destroyed, with a terrifying force composed of 50 plus Infinity Warlock rank powerhouses and 1,000 plus Bright World Warlock rank powerhouses, it is still possible for them to annihilate the Battle Demon Sect.

A huge energy shield suddenly appeared, and the various attacks blasted into the huge energy shield and set off ripples, unable to break through.

Countless modified 4th generation battle robots gushed out like a tide, turned into a torrent of steel, and rushed towards the 30 Infinity Warlock rank powerhouses and 600 plus Bright World Warlock rank powerhouses.

After they were modified, the 4th generation battle robots now possess Moonlight Warlock rank fighting strength and pose a threat to Infinity Warlocks and Bright World Warlocks.

Submerged in the 4th generation battle robots, the 30 Infinity Warlock rank powerhouses and 600 plus Bright World Warlock rank powerhouses fought like crazy.

Booming sounds reverberated and flashes of light covered the entire Battle Demon Sect as 4th generation battle robots were being blasted apart by the Gumana Universe's powerhouses.

All of a sudden, three black rays flashed, and the three supreme Infinity Warlock rank fallen angels Agnipe, Knarissa, and Besskya hidden in the crowd of 4th generation battle robots launched a surprise attack. Fallen Angel Swords gleamed and stabbed three gold-armored powerhouses, and Fallen Angel Fire instantly incinerated the three gold-armed powerhouses into ashes.

After successfully launching a surprise attack, Agnipe's group of three disappeared into the mechanical torrent.

When the three Infinity Warlock rank powerhouses died, the Gumana Universe's powerhouses were both shocked and angered. They fired various spells barreling towards the place where the three fallen angels have disappeared into, blanketing the space.

With this joint attack, the dozens of Infinity Warlock rank powerhouses wiped out thousands of 4th generation battle robots, and even destroyed the chips of the Undyings, making it impossible for them to regenerate.

Three black sword rays suddenly emerged, and three Bright World Warlock rank powerhouses were enveloped by Fallen Angel Fire, and turned into ashes.

Agnipe and the other two fallen angels are seasoned supreme Infinity Warlock realm powerhouses. Moreover, they are equipped with the Fallen Angel Armor that by Yang Feng created for them. Inside

the endless mechanical sea, they appeared and disappeared like ghosts and slayed Infinity Warlock rank and Bright World Warlock rank powerhouses.

Alexia, Yu Yan, and Yu Tianling have also plunged into the battlefield. The three of them also hid within the mechanical sea and specifically hunted Bright World Warlock rank powerhouses.

The battered archaic dragon king dived into the sea of fire, opened its maw, and inhaled a copious amounts of flames, and its wounds quickly healed at a speed visible to the naked eye.

The archaic dragon king is a part of the Battle Demon Sect's underlying strength. As long as it is not destroyed, it can absorb the surrounding sea of fire to heal itself.

When the archaic dragon king started to heal itself, it belched a gold pillar of fire.

Hit by the gold pillar of fire, six shadowclaw Infinity Warlock rank powerhouses were slowly burned to ashes.

The 1,000 plus Bright Warlock rank powerhouses fired countless beams at the archaic dragon king.

Numerous runes appeared on the archaic dragon king, and beams rose from the Battle Demon Sect's floating continent and entered the body of the archaic dragon king.

The many runes formed a magic shield in the shape of a turtle shell. When the beams fired by the 1,000 plus Bright World Warlock rank powerhouses slammed into the magic shield, the shield shattered.

Countless 4th generation battle robots took this chance to slay 40 plus Bright World Warlock rank powerhouses. The rest of the other universe Bright World Warlock rank powerhouses had no choice but to stop attacking the archaic dragon king, or else they would be torn to pieces by the mechanical torrent.

Suddenly, bright beams shot out from the floating continent, plunged into the midst of the Bright World Warlock rank powerhouses and vaporized 200 of them in an instant.

At the same time, Warlock towers on the floating continent flashed, and various powerful spells such as lightning, ice cones, fire, and curse rays soared into the sky and barreled towards the Gumana Universe's powerhouses.

One after another, the Gumana Universe's Bright World Warlock rank powerhouses were blasted into fragments that turned into specks of light and rained down on the plane.

"Lent, what do we do now?"

The leader of the shadowclaws, who previously escaped from a hive, watched as a large number of powerhouses died at every moment and asked with an unsightly expression.

The leader of the purple rhombus race said with a solemn expression: "Let's withdraw! Our intelligence was inaccurate. The Battle Demon Sect is far more powerful than we thought. If we continue to fight, we won't be able to withdraw even if we want to later."

The hyperion uttered loudly: "We still have so many troops. If we throw them all into the fray, then we might be able to break the defenses of the Battle Demon Sect and kill all those aboriginals. As long as we

kill them all and occupy the Battle Demon Plane, we can repair the hives and restore their battle prowess.”

From the six hives, 100 Infinity Warlock rank, 2,000 Bright World Warlock rank, 50,000 Glorious Sun Warlock rank, and 650,000 Moonlight Warlock rank powerhouses have escaped previously.

This terrifying force can fully crush the Battle Demon Sect.

The leader of the purple rhombus race Lent stared at the almost endless sea of 4th generation battle robots and said unhurriedly: “Our intelligence was wrong. Who knows how many trump cards the Battle Demon Sect still has hidden. If we continue to fight, we may not necessarily win.”

The shadowclaw leader uttered with a grave look in his eyes: “They have less than 10 Infinity Warlocks. Even though three of them are supreme Infinity Warlock rank powerhouses. However, the six of us all possess supreme Infinity Warlock rank battle prowess after putting on the equipment. As for Bright World Warlock rank powerhouses, we still have 2,000 plus individuals. If we attack them with all our might, we have a 70% chance of breaking through their defenses. But if we retreat now, the people that we lost would have died in vain!”

“I agree that we should withdraw! If we don’t withdraw, we will be in danger.”

The red rhombus leader touched the red rhombus crystal on his head, and red rays flickered and formed a holographic projection in front of him.

In the holographic projection, there is a huge fleet consisting of 1 Starfield Battlestar, 10 Blazing Sun Battlestars, 30 Star Destroyer Battlestars, 20 Interstellar Carriers, and 130 Frigates quietly floating behind a celestial body depicted, looking transparent. Using some unknown method, the red rhombus race leader discovered the invisible fleet.

The other leaders gasped at this scene. For such a huge fleet to not have come out yet, the Battle Demon Sect must still feel at ease. Once all the forces of the six hives enter the Battle Demon Sect, if they cannot capture the Battle Demon Plane in a short time, and the huge fleet suddenly strikes them from the rear, probably not many of their powerhouses will be able to survive.

“Let’s retreat!”

“I agree!”

“...”

After the leaders of the six hives came to a consensus, ripples spread with them as the center.

In the next moment, the Gumana Universe’s experts who have been fighting just a moment ago instantly turned into rays of light and escaped.

Black astral passageways appeared at the location of the leaders of the six hives, and the leaders flew inside along with their subordinates without hesitation.

Yang Feng watched as the six leaders disappeared with their subordinates, and a thought suddenly welled up inside him: “The Gumana Universe’s powerhouses are quite familiar with our universe. There must be traitors in our universe, and their status should be extremely high. Otherwise, in such a short

time, how would they know that they can use the Astral Boundary to travel between planes and carry out attacks?”

The Astral Boundary is a unique existence of this universe that links the countless planes. In the universe where the xizu lived, there was no such thing as the Astral Boundary.

Chapter 863 – The Bright Moon School Asks for Help

Different universes have different laws of heaven and earth. For the Gumana Universe’s powerhouses to freely use the Astral Boundary to attack and defend only shows that they have a deep understanding of the laws of this universe.

Yang Feng gazed at the astral passages, and regret flickered in his eyes: “To be able to abandon their subordinates so decisively, the Gumana Universe’s powerhouses seem to be used to fighting. It would be great if their main force launched an all-out attack against the Battle Demon Plane.”

Yang Feng has also deployed a level-5 Skynet in the Battle Demon Plane.

If all of the Gumana Universe’s powerhouses have attacked the Battle Demon Plane, Yang Feng would activate the level-5 Skynet to kill them all. But since they retreated so decisively, there is no need to activate the level-5 Skynet.

The level-5 Skynet is a great trump card that Yang Feng has up his sleeve. Once it is activated, it will wipe out all enemies. Consequently, once the enemy learns about the level-5 Skynet, they will naturally develop methods to deal with it.

After the main forces of the six hives escaped, the remaining powerhouses scattered in all direction and tried to flee. However, mechanical legion, without letting up, entwined with the remaining Gumana Universe’s powerhouses.

The strength of each of the Gumana Universe’s powerhouses is above the Starry Sky Warlock realm. If they descended on a place in the Battle Demon Plane without Warlock towers, they will be able to slay hundreds of thousands of ordinary people in a day.

However, the Gumana Universe’s powerhouses, who are besieged by at least five 4th generation battle robots, fundamentally cannot escape. Those who choose to run away only died faster.

The 5th generation battle robots such as the Dazzling Light Units and the Brilliant Star Hunters took this opportunity hunt the other universe’s Glorious Sun Warlock rank and Bright World Warlock rank powerhouses.

As they hunted the enemies, the Dazzling Light Units that absorbed enough power evolved into Bright World Warlock rank existences.

“The plane origin force is surging. After this battle, this plane will be upgraded to a grade 3 plane in one year. By slaying other universe’s powerhouses, the plane origin force can absorb their power and evolve. Furthermore, the more other universe’s powerhouses you slay, the more you will be blessed by the universe.”

Yang Feng operated the Fate Algorithm and vaguely felt that he is blessed by the universe.

Even though the universe's blessing cannot make Yang Feng's strength soar and advance to the Warlock Monarch realm in one go. But the more the universe blesses him, rare events such as finding clues about treasure troves will become increasingly more common.

In short, the more the universe blesses him, the greater Yang Feng's luck will be in this universe.

A strange radiance shimmered in Yang Feng's eyes: "No wonder the Gumana Universe's powerhouses started killing as soon as they came here. Killing us will bring them great benefits."

Xing Rentu came to Yang Feng and said solemnly: "Sect master, the Bright Moon School sent a request for help. Their headquarters, the Clear Moon Plane, is being besieged by the Gumana Universe's powerhouses."

Yang Feng raised his brows slightly and asked: "How many hives are there?"

Xing Rentu gazed at Yang Feng with an expression of awe and replied: "There are four hives!"

Before Yang Feng integrated the resources of the Battle Demon Sect and deployed various defensive devices, two Gumana Universe's hives could conquer the Battle Demon Plane by paying a heavy price.

In this battle, Yang Feng's mechanical legion killed more than half a million Moonlight Warlock rank powerhouse, including 40 powerhouses with Infinity Warlock rank battle prowess. There is now no longer anyone in the Battle Demon Sect who opposes Yang Feng. His prestige has reached an extreme height in the Battle Demon Sect.

Yang Feng said: "Then let's send troops to help them! Great Elder Xing, mobilize more supplies. I need to refine more mechanical golems."

A dignified shade flashed in Xing Rentu's eyes, and he said in a deep voice: "Yes, Sect master! I will try my best to mobilize supplies."

After Yang Feng became the sect master of the Battle Demon Sect, his authority skyrocketed, and he raked in a great number of resources, which is how he was able to build a large number of 5th generation battle robots and level-5 Skynets in a short time.

But the Battle Demon Sect is a huge sect with 17 great elders and countless elders after all. Yang Feng must take their sentiments into consideration as well. As such, he can't arbitrarily devote all of the sect's resources to the construction of his mechanical legion. Otherwise, the Battle Demon Sect will divide and fall apart.

However, after going through a battle with the Gumana Universe's powerhouses, the Battle Demon Sect's Warlocks witnessed firsthand how formidable the mechanical legion is. Now if Yang Feng wan't to mobilize resources for his mechanical legion, there won't be any resistance.

The headquarters of the Bright Moon School, the Clear Moon Plane, is a grade 4 plane.

In the Clear Moon Plane, there are 36 celestial bodies suspended, each of which radiates resplendent moonlight, forming a huge moonlight domain.

Those 36 celestial bodies are the final trump card of the Bright Moon School — the Celestial Moon Array. Over the generations, the Bright Moon School's powerhouses extracted 36 moons from other planes and used countless spells to enchant and refine them.

Once the Celestial Moon Array is fully activated, even a Warlock Monarch rank powerhouse can be defeated, or even quelled.

The Gumana Universe's powerhouses rushed into the Celestial Moon Array like ants, and dozens of Infinity Warlock rank powerhouses launched attacks on the 36 moons.

One of the moons has already been broken in half, and may shatter at any time.

13 gods of the Clear Moon Plane led angel legions to launch an attack against the Gumana Universe's powerhouses.

The Bright Moon School has gone all out. In addition to the 2 strong divine force rank and 11 intermediate divine force rank gods, they still threw 2 Infinity Warlock rank and 13 Bright World Warlock rank blazing angels.

In the starry sky, there are still 25 weapons with Infinity Warlock rank battle prowess that have been mobilized.

In the Clear Moon Plane, Warlock towers stimulated all their power, and various powerful spells such as lightning, ice cones, fire, and wind blades soared into the sky, barreled towards the Gumana Universe's powerhouses, and blasted them apart one after another.

However, there are too many Gumana Universe's powerhouses. Except for the top-shelf 30 plus Warlock towers in the Clear Moon Plane, the rest of the Warlock towers are not a big threat to Bright World Warlock rank powerhouses.

The Gumana Universe's Bright World Warlock rank powerhouses, who number close to 1,000, can easily block the Bright Moon School's 25 Infinity Warlock rank weapons and blast them apart one by one.

Zhang Zhiqiao, dressed in a green armor and exuding junior Moonlight Warlock rank fluctuations of power, is fighting frantically with a black-armored soldier. She is hurling exquisite spells at the other party.

The black-armored soldier, who can display Moonlight Warlock rank battle prowess thanks to the black armor, cannot measure up to Zhang Zhiqiao, who is a real Moonlight Warlock realm powerhouse. Under the bombardment of a dozen plus spells, the black armor of the black-armored soldier has cracked. He can't even get close to Zhang Zhiqiao.

Seeing that the black-armored soldier is about to be killed by Zhang Zhiqiao, five other black-armored soldiers flew over from afar in an instant and attacked Zhang Zhiqiao.

Zhang Zhiqiao, who had no choice but to cast a spell to dodge the attacks of the five black-armored soldiers, let the first black-armored soldier escape.

Boom!

Amid a loud blare, a moon suspended above the Clear Moon Plane shattered, and countless fragments scattered downward like raindrops.

Deafening cheers spread throughout the Gumana Universe's army.

Looking at the shattered moon in the sky, Zhang Zhiqiao felt the formidable power inside her slowly fade, and then felt her blood run cold: "Broken! The Celestial Moon Array was broken! Is the Bright Moon School going to perish today?"

The moonlight domain formed by the Celestial Moon Array can not only greatly weaken the enemy, but can also greatly strengthen the Bright Moon School's Warlocks. Thanks to the buff and debuff, the Bright Moon School's powerhouses could barely hold on. But now that the Celestial Moon Array lost a moon, it is equivalent to the array weakening by more than half.

Without the buff and debuff of the Celestial Moon Array, the Bright Moon School cannot contend against the army led by dozens of Infinity Warlock rank and hundreds of Bright World Warlock rank powerhouses.

The morale of the Bright Moon School's Warlocks plummeted, and despair flashed in their eyes.

"Curses, it's hopeless! I let down the ancestors."

The beautiful eyes of the pure and gorgeous Bright Moon School's great elder the Goddess of the Moon Mei Shuanghua, who is enveloped in moonlight and exudes strong divine force rank fluctuations of power, flashed with bitterness, and countless thoughts surged in her heart. For a moment, she didn't know what to do.

In the starry sky, within the four hives.

An enigmatic ray shimmered in the eyes of a red rhombus race powerhouse with a red rhombus crystal on his forehead: "The Bright Moon School has no more cards to play! Let's mobilize all our forces and defeat them in one fell swoop."

"Okay!"

The other three hive leaders nodded in agreement.

Following flashes of light, crowds of Transcendent rank powerhouses flew out of the hives and rushed towards the Bright Moon School like dark clouds.

"We're finished!"

When the Bright Moon School's Warlocks saw the powerhouses fly out of the hives, their complexion changed dramatically, and their eyes shimmered with despair.

All of a sudden, a resplendent beam slammed into a hive, ran through it, and blasted it into pieces.

A huge fleet slowly emerged in the direction that the beam was shot from.

Chapter 864 – Saving the Bright Moon School

That huge fleet is composed of 1 Starfield Battlestar, 20 Blazing Sun Battlestars, 40 Star Destroyer Battlestars, 50 Interstellar Carriers, and 200 plus Frigates.

As soon as the fleet appeared, a dense rain of light shot towards the powerhouses that flew out of the hives. Caught off guard, large swaths of the enemy powerhouses were wiped out in the artillery fire.

Yang Feng has tested the strength of the hives and the hives' powerhouses in the Light of Eternity Plane.

The computing power of the level-5 optical computer network is even more fearsome than that of a Warlock Monarch. Under the guidance of the level-5 optical computer network, the main artillery of the 20 Blazing Sun Battlestars slayed 13 and heavily injured 7 Infinity Warlock rank powerhouses in this volley.

The Starfield Battlestar's thousands of secondary artillery shone and fired a barrage of light, which gravely wounded 300 and blasted apart 20 plus Bright World Warlock rank powerhouses.

Along with the booming of engines, countless 4th generation battle robots formed a mechanical torrent that rushed towards the Gumana Universe's powerhouses.

"Reinforcement! Our reinforcements are here!"

"Reinforcements are here, reinforcements from the Battle Demon Sect are here!"

"It's the Sect Master, it's the Sect Master Yang Feng's mechanical legion! He is here to save us!"

"We're saved!"

"..."

Upon seeing reinforcements emerge abruptly, the Bright Moon School's powerhouses, who were struggling to hold on, suddenly became excited, and their morale skyrocketed.

"It's the Battle Demon Sect's reinforcements! Let's go all out!"

When the Goddess of the Moon Mei Shuanghua saw the huge fleet appear in the sky, her beautiful eyes flickered with the shade of determination. She gritted her teeth and waved her hand, and a sphere glowing with moonlight flew into the air.

As soon as the sphere glowing with moonlight flew into the air, countless curse runes gleamed, and a beautiful, 100-meter-long moonlight dragon flew out.

When the moonlight dragon appeared, it rapidly absorbed the moonlight radiated by the remaining 35 moons, and then blurred, appeared besides a Gumana Universe's Infinity Warlock rank powerhouse, and engulfed the enemy with its maw. Endless moonlight shone and purified the opponent.

After that moonlight dragon killed the Infinity Warlock rank powerhouse, it disintegrated into motes of light and disappeared.

In an instant, the moonlight dragon suddenly emerged from the edge of the moonlight domain, engulfed another Infinity Infinity Warlock rank powerhouse with its maw, and disappeared.

The moonlight dragon is part of the Bright Moon School's underlying strength. It is an extraordinary life form with the potential to evolve into a Warlock Monarch rank being. The Bright Moon School has nurtured the moonlight dragon for more than 100,000 years. So long as it is nurtured for another 5,000 years, it will be able to completely transform and evolve into a Warlock Monarch rank moonlight dragon.

If the reinforcements had not arrived, the Goddess of the Moon Mei Shuanghua would not have put the moonlight dragon into battle. Even though the moonlight dragon is formidable, but it is only a supreme Infinity Warlock rank being. If the Gumana Universe's many powerhouse focus their attacks on the moonlight dragon, it will stand no chance.

"Damn it, that's the Battle Demon Sect's Yang Feng!"

"What are Mauzy and them doing? How come they let someone from the Battle Demon Sect come here?"

"How come they are so quick? How could these reinforcements have come so quickly? Even if it is an Infinity Warlock rank powerhouse, it will take at least a day to reach the Bright Moon School from the Battle Demon Sect. How did they come so fast?"

Both startled and enraged, the three hive leaders inside the remaining three hives roared in anger.

The Gumana Universe has launched an all-round offensive. By relying on their formidable strength, they invested many hives as combat units and attacked the targets that need to be eradicated. All resistance must be severely damaged, or even eliminated.

The attack on Yang Feng's Light of Eternity Plane was just an accident, it was merely a lone hive fishing for benefits. It's timing of attack was different from that of the other hives.

The attack on the Bright Moon School and the attack on the Battle Demon Sect were launched practically at the same time. For the Battle Demon Sect to send reinforcements, it means that the Gumana Universe's legion that went to attack the Battle Demon Sect has been defeated.

The three hive leaders suddenly had a bad premonition.

"What should we do now? Do we attack the reinforcements?"

"There's not enough information! I suggest that we retreat!"

"I also recommend that we retreat. Mauzy and them had six tier 1 hive battle units, yet were defeated by the Battle Demon Sect. Since they sent reinforcements, they naturally have the confidence to defeat us."

"How about we focus all our fighting power on the reinforcements? The Bright Moon School poses no threat!"

"I disagree."

"There's not enough information. I also think that retreat is the most correct choice given the circumstances."

“Fine! Then let’s withdraw!”

“...”

After a period of discussion, the three hive leaders came to a consensus.

Ripples diffused from the three hives and spread down.

The Gumana Universe’s powerhouses, who were locked in a fierce battle, suddenly turned into streams of light and entered into the hives.

Next, the three hives radiated light, flew into three astral passages, and disappeared.

Yang Feng frowned slightly as he watched the three hives escape, and his eyes shimmered with a dignified shade: “These guys are really decisive, how troublesome!”

Yang Feng brought with him 1 million 5th generation battle robots, 100 million modified 4th generation battle robots, and his Infinity Warlock rank subordinates.

If the three hives stayed and fought with him, Yang Feng was sure that he could wipe them out after paying a huge price, and then gain more blessing from the universe.

Yang Feng’s thoughts revolved: “But it doesn’t matter that they escaped. After all, with my current strength, I still have to pay a considerable price to wipe them out.”

Yang Feng’s most elite legion at this time is the 1 million 5th generation battle robots.

Besieged by 1 million Glorious Sun Warlock rank 5th generation battle robots, even if it is 100 Infinity Warlock tank powerhouses, they will be wiped out if they don’t flee.

However, although the 5th generation battle robots are exceedingly powerful, they also require an astronomical amount of resources to be produced. Only after he integrated resource of the Battle Demon Sect, was Yang Feng able to build such a fearsome mechanical legion.

The level-5 Skynet is Yang Feng’s strongest shield that can guard his lair. The 1 million 5th generation battle robots are Yang Feng’s strongest spear that is not inferior to the Gumana Universe’s legions.

If it weren’t for the 5th generation battle robots, the 4th generation battle robots alone, no matter how many they are, would stand no chance against fleets with fierce long range firepower.

The Battle Demon Sect has decided to use all their resources to build 5th generation battle robots. However, the period before the 5th generation robots are built is a dangerous time. At the moment, the best course of action is to conserve the numbers of the 1 million 5th generation battle robots.

Yang Feng sent 4th generation battle robots to hunt down the Gumana Universe’s powerhouses who didn’t manage to escape, and then went to the Bright Moon School’s headquarters.

“Thank you, Sect Master Yang Feng, for helping our Bright Moon School! We will keep this act of great kindness in our hearts!”

The Goddess of the Moon Mei Shuanghua led the Bright Moon School’s 15 great elders and other upper echelon members and bowed to Yang Feng.

Much like the Battle Demon Sect's sect master of the past, the Bright Moon School's school master is in charge of ordinary affairs. The 16 great elders are jointly in charge of dealing with the school's major affairs. Among the sixteen great elders, the Goddess of the Moon Mei Shuanghua, who has the greatest combat power and the most allies, is to some extent the actual leader of the Bright Moon School.

Zhang Zhiqiao, who is standing in the crowd, is gazing at Yang Feng with a complex expression in her beautiful eyes. When the two met for the first time, Yang Feng was just a Great Warlock. But now, Yang Feng is an Infinity Warlock as well as the Battle Demon Sect's sect master and holds a lot of power. She, however, barely managed to advance to the Moonlight Warlock realm and is only a trifling junior Moonlight Warlock. It is not surprising that she has mixed feelings upon seeing Yang Feng.

Yang Feng replied with a smile: "The Battle Demon Sect and the Bright Moon School are allies. As such, it is only natural that we help each other. If the Battle Demon Sect was in trouble instead, I believe the Bright Moon School would not stand idly by."

Mei Shuanghua showed a pure, beautiful, and determined smile and said: "That's natural. If the Battle Demon Sect is in trouble, we of the Bright Moon Sect will do our best to support you."

The Battle Demon Sect, which is one of the Great Cloud Dynasty's Ten Great Sects, has many enemies as well as many allies. The Bright Moon School is the most loyal ally of the Battle Demon Sect. This alliance relationship has been unbreakable for thousands of years.

In an exquisite palace in the Bright Moon School, there are the Bright Moon School's 16 great elders and Yang Feng seating. Rare and exotic fruits and treasures of heaven and earth are placed in front of everyone.

Many of the rare fruits can increase the lifespan of Moonlight Warlocks by more than 10 years and improve their cultivation base by a great extent.

Yang Feng said: "Respected great elders of the Bright Moon School, the great tribulation has arrived. The other universe's offensive will only get more intense. May I ask that your plans are?"

Enigmatic light flickered in Mei Shuanghua's pretty eyes, and she asked: "Sect Master Yang, do you have any good suggestions?"

"Sect Master, the Star River Sect and the Saint Demon Sect sent requests for help to the Battle Demon Sect!"

Yang Feng was about to speak, when his communications device suddenly vibrated. He pressed it, and a holographic projection of Xing Rentu appeared from the communications device.

Although the Battle Demon Sect is not as close with the Star River Sect and the Saint Demon Sect as it is with the Bright Moon School, but when the four sects were expelled by the Great Cloud Dynasty, they established a military alliance.

Chapter 865 – Helping the Star River Sect

Yang Feng apologized slightly: "Sorry, it seems that I have to assist them!"

The Star River Sect and the Saint Demon Sect, who were also in the Great Cloud Dynasty's Ten Great Sects, possess enormous power. Although they aren't staunch allies of the Battle Demon Sect, but saving them will have huge benefits. After all, they are veteran forces with tremendous resources, while what Yang Feng currently lacks the most is resources. Additionally, killing the the Gumana Universe's powerhouses can net him the favor of the universe. Yang Feng is naturally enthusiastic about this.

Mei Shuanghua pondered for a while, and then her beautiful eyes flickered with determination, and she said: "I will go with you."

Yang Feng, without using superfluous words, uttered decisively: "Okay!"

When Yang Feng and Mei Shuanghua boarded a battleship, the huge fleet activated an astral gate and flew inside.

Yang Feng has partially analyzed the rules in the Astral Boundary. There are endless mysteries and countless secrets in the Astral Boundary, and although Yang Feng can't fully analyze them completely, but he can already open an astral gate.

As soon as the huge fleet flew into the Astral Boundary, it deviated from its course and flew towards another celestial body.

Mei Shuanghua frowned slightly and asked, puzzled: "Sect Master Yang, this doesn't seem to be the shortest way to the Star River Sect nor the Saint Demon Sect?"

Mei Shuanghua, this head of the Bright Moon School's great elders, has sent many avatars to travel the Astral Boundary in the search of its mysteries, and thus naturally knows many secrets.

Yang Feng replied with a mysterious smile: "Don't worry, you'll find out soon enough."

Before long, a desolate celestial body without any vitality appeared before Yang Feng's fleet.

Suddenly, the interior of the desolate celestial body suddenly opened, revealing a 20-meter-tall warp gate.

The huge Starfield Battlestar suddenly gleamed with yellow light all over, distorted, shrank to a ship 5 odd meters long from the a magnificent battlestar tens of thousands of meters long, and flew into the warp gate.

The rest of the huge fleet blurred, shrank, and flew into the warp gate.

After passing through the warp gate, an empty celestial body without any vitality appeared before Mei Shuanghua's eyes.

As soon as the huge fleet flew out of the celestial body's warp gate, it flew for more than 10,000 kilometers in the Astral Boundary before the Star River Sect's battlefield appeared in front of Mei Shuanghua.

Astonishment shimmered in Mei Shuanghua's gorgeous eyes, and she stared at Yang Feng and said: "So fast, was that a spatial teleportation portal? That's really extravagant."

In the world of Warlocks, teleportation arrays are nothing special. The most powerful teleportation arrays can enable people to cross billions of kilometers in an instant, and even travel between planes.

However, using teleportation arrays to teleport people consumes huge amounts of resources. The resources that need to be consumed to transport a huge fleet to hundreds of millions of kilometers away, even if it is the Bright Moon School, it will harm their vitality.

Yang Feng replied with a smile: "Without the lips, the teeth feel the cold. We must unite and pool all our resources together to be able to overcome this crisis."

Mei Shuanghua pondered for a while, and then nodded slightly.

If Yang Feng hadn't led his fleet to help them, the Bright Moon School would have been destroyed in one fell swoop.

Much like Yang Feng and them can get the blessing of this universe by slaying the Gumana Universe's powerhouses, so can the Gumana Universe's powerhouses can get the blessing of their universe by slaying this universe's powerhouses and ordinary people. If the Gumana Universe's powerhouses are given the opportunity, they will destroy this universe's planes one after another and erase all intelligent life forms.

This is the cruel reality of a war of annexation between two universes. Only with the death of the majority of one side's intelligent life forms, can a victorious side emerge. The victors' universe will devour the other side's universe and the victors themselves will obtain great benefits, while the vast majority of the losers will die, with only a few survivors becoming the slaves of the victors.

Yang Feng glanced at the holographic projection of the battlefield and praised in admiration: "The Star River Sect's underlying strength is really amazing."

At this time, in the Star River Sect's headquarters, there is a huge star giant made up of 108 stars. The Warlock towers on the stars inside the star giant constantly radiate dazzling light and support the huge star giant.

The huge star giant's attacks involve firing star beams from its maw and waving its hands. In the wake of its attacks, the Gumana Universe's powerhouses are blasted into ashes.

In front of the star giant, there is a star shield made of 36 stars. The Warlock towers on the star shield's stars are supporting the star shield.

There are only four hives besieging the Star River Sect. One of the hives has unfurled and turned into a black screen, cutting off the Star River Sect's ability to absorb star force of the surrounding stars. If not for the black screen, the star giant would have been several times stronger.

A stream of powerhouses flew out from the four hives and fought the star giant and the star shield.

Although the star giant and the star shield are extremely powerful, but the hives have too many Infinity Warlock rank, Bright World Warlock rank, and Glorious Sn Warlock rank powerhouses. Nevertheless, despite being in a disadvantageous position, the Star River Sect's situation is much better than that of the Bright Moon School not long ago.

Mei Shuanghua gave Yang Feng a meaningful look and said: "It looks like the Star River Sect can hold on for a while!"

When different camps form an alliance, the strong will naturally have more authority. If Yang Feng intends to weaken the Star River Sect, now would be the best time. So long as Yang Feng takes action a moment later, the Star River Sect's vitality will be weakened by a fraction.

Yang Feng replied: "The great tribulation is upon us. Since we are all in the same boat, we must unite if we ever hope to be victorious. Attack!"

When the huge fleet received Yang Feng's order, resplendent beams barreled toward the Gumana Universe's powerhouses.

The Starfield grade main artillery slammed into the black screen formed from a hive, released a blare, and shattered the screen.

Swept by the rain of light, more than 1,000 of the countless Gumana Universe's powerhouses besieging the star giant were erased at once.

After the black screen formed from a hive was destroyed, countless star runes emerged in the huge star giant and frantically absorbed star force, and the star giant's strength increased several-fold. The star giant grabbed a Gumana Universe's Infinity Warlock rank powerhouse, and a copious amount of star force enveloped and purified the other party.

The huge star giant suddenly opened its maw, and a boundless amount of star force compressed and formed a brilliant beam that slammed into a hive.

The hive was blasted into pieces and its remains were purified by a tremendous amount of star force.

After the star giant released that terrifying attack, the light of the surrounding stars suddenly became dim, and its strength decreased several-folds.

However, after the two hives were destroyed, the remaining two hives immediately issued the order of retreat.

The countless Gumana Universe's experts besieging the Star River Sect retreated, turned into streams of light, and flew towards the hives.

The star shield suddenly opened, and a huge star net appeared and caught 20 Infinity Warlock rank and 500 Bright World Warlock rank powerhouses.

"Beautifully done! That's the Star River Sect for you! It's better to cut off one finger than to injure five, they understand this well. Let's go!"

A look of excitement flashed in Yang Feng's eyes. His figure shook slightly, and he took Agnipe and the other Infinity Warlock rank experts as well as the 1 million 5th generation battle robots and rushed toward the 20 Infinity Warlock rank and 500 Bright World Warlock rank powerhouses caught in the net. That is top-shelf prey.

The 1 million 5th generation battle robots stabbed into the midst of the Gumana Universe's powerhouses like the sharpest spear and attacked the enemy recklessly.

Boom! Boom!

The sounds of huge explosions rang incessantly as 5th generation battle robots exploded one after another. At the same time, Bright World Warlock rank powerhouses were also blasted into a mist of blood by 5th generation battle robots.

Mei Shuanghua killed a Bright World Warlock rank powerhouse in passing and gazed at the 5th generation battle robots frantically besieging the Bright World Warlock rank and Infinity Warlock rank powerhouses, and shock filled her heart: "So strong! So this is Yang Feng's trump card, what a terrifying mechanical legion! Each one of these golems has Glorious Sun Warlock rank fighting strength."

As Transcendent rank powerhouses, Glorious Sun Warlocks are regarded as being part of the upper echelon in major Warlock groups. Even if it is one of the Great Cloud Dynasty's Ten Great Sects like the Bright Moon School, including the gods, they have no more than 100 Bright World Warlock rank existences.

The 1 million 5th generation battle robots are equivalent to 1 million Glorious Sun Warlock rank powerhouses. Faced with this terrifying force, even if it is a Warlock Monarch rank existence, they will be in danger of dying if they don't escape.

A Devour Black Moon swept across the battlefield wantonly and devoured one Gumana Universe's Infinity Warlock rank powerhouse after another, purifying the flesh and souls of the other side into the purest life origin force for Yang Feng to absorb.

Many top experts flew out from the Star River Sect and joined the siege of the Gumana Universe's powerhouses. As a sect expert at astrology, the Star River Sect knows countless secrets. They also know that it is beneficial to kill the Gumana Universe's powerhouses.

Chapter 866 – Rescuing the Saint Demon Sect

Besieged by the three forces, the Gumana Universe's 20 Infinity Warlock rank and 500 plus Bright World Warlock rank powerhouses were quickly wiped out.

After all, the Gumana Universe's Infinity Warlock rank powerhouses used external objects to upgrade their strength. Most of them only truly possess Bright World Warlock rank strength, and can only use numbers to win. As such, besieged by Yang Feng and other top-shelf experts, they were easily defeated.

"Thank you, Sect Master Yang, Great Elder Mei for your help. The Star River Sect will never forget this act of kindness."

The great elder Xinghe Mingxuan, with the Star River Sect's 21 great elders in tow, bowed to Yang Feng and spoke.

The great elder Xinghe Mingxuan gave Yang Feng a deep look, a complex look in his eyes.

Xinghe Mingxuan is the Star River Sect's Infinity Warlock with the highest status in the Cangzhi Plane, responsible for presiding over all of the Star River Sect's matters in the Cangzhi Plane. In the eyes of Xinghe Mingxuan, Yang Feng was just a junior with infinite potential. Yet in less than 300 years, this

junior has become the sect master of the Battle Demon Sect, wielding tremendous power. Naturally, he's feeling somewhat envious.

Yang Feng uttered with a smile: "Our four sects are allies, it is only natural to help each other. The Saint Demon Sect also sent a request for help to the Battle Demon Sect. I must lead troops to support them, so I'll take my leave now."

After Yang Feng destroyed a hive and annihilated 20 Infinity Warlock rank and 500 plus Bright World Warlock rank powerhouses, 10 Dazzling Light Units have evolved. At present, he already has 30 Bright World Warlock rank Dazzling Light Units.

Although Dazzling Light Units can evolve into Dazzling Rulers, but it requires countless fierce battles to achieve that.

Yang Feng actively assisted the Bright Moon Sect and the Star River Sect, on the one hand, it was to help his allies and reap the favor of the universe, on the other hand, it was to let the Dazzling Light Units evolve through battle.

Xinghe Mingxuan stepped forward and said: "Sect Master Yang, on behalf of the Star River Sect, I will go with you to provide assistance to the Saint Demon Sect."

Xinghe Mingxuan is an intermediate Infinity Warlock rank powerhouse. Coupled with his Warlock grade secret treasure, he can fight against an advanced Infinity Warlock rank powerhouse. His fighting power is in the top five in the Star River Sect. Him going to fight is proof of the Star River Sect's sincerity.

Yang Feng agreed: "Okay!"

The Saint Demon Plane is the Saint Demon Sect's headquarters.

At this time, there are five hives floating in the starry sky outside the Saint Demon Plane.

An almost endless stream of the Gumana Universe's powerhouse poured out from the five hives and rushed towards the Saint Demon Plane.

In the Saint Demon Plane, lights shone, and a 10,000-meter-tall One-eyed Evil Ogre King exuding Warlock Monarch rank fluctuations of power and a 10,000-meter-tall Gold Giant King radiating gold light and enveloped by countless runes fought madly with the Gumana Universe's powerhouses.

Swarms of angels, evil ogres, abyss creatures, fiends, and other powerful existences flew out of the Saint Demon Plane and engaged the hives' Transcendent rank powerhouses.

In the alliance formed by the Battle Demon Sect and the other three forces, the Saint Demon Sect has the strongest fighting power and the deepest roots.

Using the One-eyed Evil Ogre King and the Gold Giant King as shields, 28 intermediate divine force rank gods and 5 strong divine force rank gods fought the Gumana Universe's powerhouses.

In the battlefield filled with screams, powerhouses of the Saint Demon Sect and the Gumana Universe died from time to time.

The Saint Demon Sect, who played all their cards, was in a slight advantage. But then, even more powerhouses flew out from the five hives and engaged the Saint Demon Sect's powerhouses.

The seriously injured Gumana Universe's experts flew back into the hives, recovered 90% of their combat power within a few breaths, and then plunge into the battlefield again.

The Saint Demon Sect was gradually put at a disadvantage, and their intermediate divine force rank gods were blown apart by the Gumana Universe's powerhouses one after another.

The Saint Demon Sect's strongest elder, the God of Darkness Luo An, turned into a river of darkness and obstructed 13 of the Gumana Universe's Infinity Warlock rank powerhouses in one breath.

None of the 13 Infinity Warlock rank powerhouses are Luo An's opponent. But when the 13 people joined forces, they pressured him so much that he couldn't catch his breath.

Every one of the 5 strong divine force rank gods can block at least five of the Gumana Universe's Infinity Warlock rank powerhouses.

However, the Gumana Universe's Bright World Warlock rank powerhouses number 1,000 plus individuals. Every time the 1,000 plus Bright World Warlock rank powerhouses attack, a number of the Saint Demon Sect's powerhouses is blasted to pieces.

"Dammit, where, where are the reinforcements!"

Luo An, who has transformed into a river of darkness, was frantically burning divine force crystals and bitterly resisting the attacks of the Gumana Universe's powerhouses. On several occasions, the river of darkness was blown apart, almost unable to reassemble. Luo An can only roar wildly in his heart.

Far a way, the space rippled, and a bright beam of light suddenly shot out, slammed into a hive, and blasted it apart.

The interstellar fleet commanded by Yang Feng emerged from the empty space, and a concentrated rain of light barreled towards the Gumana Universe's powerhouses like a tide.

In the wake of the rain of light, countless powerhouses of the Gumana Universe turned into ashes.

Doors opened on the huge fleet, and a mechanical sea formed from countless 4th generation battle robots quickly plunged towards the Gumana Universe's powerhouses and engaged them.

While commanding the 1 million 5th generation battle robots, Agni and the other two supreme Infinity Warlock rank blazing angels as well as Yu Yan, Alexia, and Yu Tianling pounced at the Gumana Universe's Bright World Warlock rank powerhouses like a dagger and started to hunt them.

Even though the Gumana Universe's Infinity Warlock rank powerhouses are not genuine, but they still possess Infinity Warlock rank battle prowess. They aren't easy to kill. The Bright World Warlock rank powerhouses, on the other hand, are a much easier target.

Besieged by the 1 million 5th generation robots, the 1,000 plus Bright World Warlock rank powerhouses suffered disastrous casualties.

Seeing that things are far from reassuring, the four hives chose to retreat at once.

“Thank you, Sect Master Yang, Great Elder Mei, Great Elder Xinghe, the Saint Demon Sect won’t forget your act of kindness.”

When the four hives disappeared, Luo An brought the remaining 20 great elders of the Saint Demon Sect to Yang Feng and saluted.

Before the battle with the Gumana Universe’s powerhouses, the Saint Demon Sect had a total of 39 great elders. But now only 21 are left.

Yang Feng replied with a smile: “Our four sects are allies, so it is a matter of course to help each other.”

Luo An uttered with a light smile: “Sect Master Yang, your assistance to the Saint Demon Sect must have come at a considerable expenditure. Please make a list. The Saint Demon Sect will certainly not let you suffer any losses.”

Xinghe Mingxuan said: “Yes, Sect Master Yang, the Star River Sect won’t let you suffer any losses either.”

Mei Shuanghua smiled and said: “The Bright Moon Sect will never let its allies suffer any losses.”

Luo An and the other two are wily old foxes. They are well aware that if they don’t give Yang Feng some benefits, then the next time their headquarters is attacked, no one may come their rescue.

“Then I won’t stand on ceremony!”

Without standing on ceremony, Yang Feng produced a list that was equivalent to 30 times of his actual losses and handed it to Luo An and the other two respectively.

If the three factions pay the resources on the list, Yang Feng can create another 1 million 5th generation battle robots.

After Luo An and the other two looked at the list, their brows jumped up slightly, yet they didn’t put forward any objections. Although the materials on the list are a lot and many of them are precious, but they aren’t necessary for the practice of cultivation. Furthermore, it is better to give them to Yang Feng, than to be killed by the Gumana Universe’s powerhouses.

Yang Feng waved the list in his hand and said with a slight smile: “Luo An, Mingxuan, and Shuanghua, the Gumana Universe’s powerhouses have launched a comprehensive offensive. If you have any friends who cannot withstand their attacks, they can also pay some resources and ask me to help them. As long as they are willing to pay twice as much resources, I am willing to go help them.”

This time, the the Gumana Universe has only launched an exploratory comprehensive offensive. Even though it is only an exploratory comprehensive offensive, but except for the 36 primary material planes, it is difficult for the rest of the forces to resist this offensive.

Since Yang Feng holds such an elite legion in his hands, he naturally has to take this opportunity to destroy the legions of the Gumana Universe one by one. On the one hand, he’ll be able to inflict damage to the Gumana Universe’s vitality and get the favor of this universe, on the other hand, he can upgrade his mechanical legion in terms of quantity and quality.

When Luo An and the other two heard Yang Feng’s words, their eyes lit up, and they took out communication secret treasures and contacted their connections.

Xinghe Mingxuan's face flickered, and he said with complex emotions: "The headquarters of the Myriad Snow Gate has already been destroyed!"

When these words came out, Luo An and the others felt a chill in their heart.

The Myriad Snow Gate used to be one of the Great Cloud Dynasty's Ten Great Sects. Even though it was slightly weaker, but it was still a Warlock group with huge underlying strength. Yet such a behemoth was destroyed in the first round of the Gumana Universe's offensive. Naturally, Luo An and them, who are also part of the Ten Great Sects, are sympathetic.

Luo An said: "The Flame of Illusory Dragon has always been friendly with my Saint Demon Sect. They are still holding on. They are willing to pay three times the materials on the list. Please help them."

Yang Feng replied decisively: "Then I'll help the Flame of Illusory Dragon."

Chapter 867 – Selling Arms

The Gumana Universe's powerhouses were very cautious. Yang Feng, commanding his fleet, fought tirelessly. He defeated six hive legions in a row and saved six Warlock groups, who were stronger than the Battle Demon Sect.

Although the Battle Demon Sect is one of the Great Cloud Dynasty's Ten Great Sects and possesses great power, but there are many other powerful human Warlock groups in the boundless universe.

"Someone got here first!"

As soon as Yang Feng's fleet flew out in the Astral Boundary, it detected two huge forces fighting the Gumana Universe's powerhouses far away.

One of the forces sent 10 archdevils engraved with countless runes and exuding Warlock Monarch rank fluctuations of power. The 10 archdevils roared wildly and unleashed various innate abilities and spells.

When the 10 Warlock Monarch rank archdevils join forces, their power is simply terrifying. Bombarded by the innate abilities and spells of the 10 archdevils, a large swath of the Gumana Universe's powerhouses was blasted to ashes, and even Infinity Warlock rank powerhouses were instakilled.

In addition to the 10 Warlock Monarch rank archdevils, this force also sent 60 Infinity Warlock rank abyssal fiends, evil gods, evil ogres, and other extraordinary life forms, every one of which is a living being, not a mindless weapon.

Yang Feng looked at the fearsome legion with a dignified shade in his eyes: "What a frightening force!"

10 Warlock Monarch rank archdevils plus 60 Infinity Warlock rank extraordinary life forms, this is a terrifying force that could destroy Yang Feng's forces before he upgraded the stronghold to level-5. Even if the Battle Demon Sect uses its underlying strength, it can't stop such terrible force.

Luo An, Xinghe Mingxuan, Mei Shuanghua, and other powerhouses gazed at the Warlock Monarch rank archdevils, a dignified flash in their eyes.

The 10 archdevils are all alive. Even if it is the Saint Demon Sect, they aren't willing to fight one Warlock Monarch rank archdevil, much less 10.

Mei Shuanghua took a closer look, and she said: "Those archdevils have the marks of the Transcendent Dynasty on them. They are from the Transcendent Dynasty. This is the elite Transcendent legion of the Transcendent Dynasty."

Luo An sighed with emotion: "The Transcendent Dynasty, as expected of one of the Eight Warlock Dynasties, they're really formidable."

In the heyday of the Transcendent Dynasty, the Transcendent legion contained not a small number of Holy Spirit Warlock rank evil gods, archfiends, true dragons, and other extraordinary life forms.

After its collapse and the passage of countless years, for the Transcendent Dynasty to still be able to easily mobilized 10 Warlock Monarch rank archdevils and 60 infinity Warlock rank Transcendents, it shows how fearsome the Transcendent Dynasty is.

Xinghe Mingxuan sighed in relief: "Fortunately, we still have the Six Warlock Dynasties to rely on, or else we humans would have no hope of getting through this great tribulation."

The power of the Gumana Universe scared Xinghe Mingxuan. According to the information Xinghe Mingxuan received, 13 major forces that have been on friendly terms with the Star River Sect have been razed to the ground by the Gumana Universe's forces. If it wasn't for Yang Feng's assistance, the Star River Sect would have been part of that list.

Yang Feng sneered in his heart: "Can the Six Warlocks Dynasties be relied on? In this great tribulation, you can only rely on yourself. Only by constantly improving your strength can you hope to survive!"

Yang Feng sent a voice transmission cautiously: "We are the support troops sent by the Battle Demon Sect. Friends of the Sea of Red Stars, do you need our assistance?"

A domineering and unruly voice came from the battlefield: "You're not needed here, screw off!"

The face of Luo An and the other powerhouses fell. They are all great elders of formidable forces. For the voice to tell them to screw off, this naturally filled them with indignation.

A cold look on his face, Yang Feng gave the order to jump, decisive.

An astral passage suddenly appeared, and the huge fleet flew inside.

"Damn it, Old Yan, you son of a bitch. It took me a lot of effort to invite the Battle Demon Sect's reinforcements, yet this is how you treat me? Suit yourself. Next time you are besieged by the other universe's powerhouses, if I come to save you, I'll be a son of a bitch."

When they entered the astral passage, Luo An took out a communications secret treasure and roared angrily at the Sea of Red Stars' great elder Yan Ming, exasperated.

Yan Ming, on the other end, smiled bitterly and said: "Old Luo, I didn't know that people from the Transcendent Dynasty would appear. I'm sorry for what happened. However, the Sea of Red Stars has also paid a price. After this war, we will be incorporated into the Transcendent Dynasty."

Luo An was speechless.

Although the Sea of Red Stars was rescued by the Transcendent Dynasty, but it also has to pay a huge price, that is, the entire Warlock group would be annexed by the Transcendent Dynasty, losing its autonomy.

Xinghe Mingxuan and Mei Shuanghua sank into their thoughts. The exploratory offensive of the Gumana Universe made them witness the power of the Gumana Universe and realize the danger of the great tribulation. And this was only an exploratory offensive. When the Gumana Universe truly unleashes an all-out offensive, Warlock groups such as the Star River Sect and the Bright Moon School will be crushed easily.

“Ladies and gentlemen, these are the battle units of my mechanical legion. You have already witnessed their strength. What do you think of them?”

Yang Feng smiled, light shone, and a few 5th generation battle robots appeared in front of him.

Xinghe Mingxuan stared at the 5th generation battle robots with a burning shade in his eyes: “What powerful golems. Each unit possesses Glorious Sun Warlock rank battle prowess, and in some ways, they also possess Infinity Warlock rank characteristics.”

Luo An and the other two powerhouses looked at the 5th generation battle robots with a scorching shade in their eyes.

When commanding the 1 million 5th generation battle robots, Yang Feng was like the sharpest spear, unleashing earth-shaking might with every attack. More than a dozen Gumana Universe’s Infinity Warlock rank powerhouses have died in the mechanical sea composed of 5th generation battle robots, making it a first-class legion.

The Star River Sect, the Saint Demon Sect, and the Bright Moon School, they all have fewer than 1,000 Glorious Sun Warlocks.

The power of a mechanical legion composed of 1 million fearless Glorious Sun Warlock rank battle robots is simply appalling. Luo An and them are gazing at the 5th generation battle robots with a fervent look in their eyes.

Yang Feng handed a list containing the price of the several 5th generation battle robots to Luo An and them with a smile: “These are the new types of golems I developed after luckily getting my hands on a legacy of the Golem Lord. Originally, I wanted to hide them and treat them as a trump card of the Battle Demon Sect. But seeing that the great tribulation is upon us and that you are good friends of the Battle Demon Sect, if you wish, I can sell them to you in large quantities.

Luo An received the list and looked at it carefully, and then revealed a smile of excitement.

Yang Feng is selling the 5th generation battle robots for five times the price is costs to build them. Even so, the resources needed to purchase a 5th generation battle robot are more than 1,000 times less than the resources necessary to cultivate a Glorious Sun Warlock. The disadvantage of the 5th generation battle robots is that it’s hard to upgrade their strength.

However, now that the great tribulation has arrived, the most important thing is to seize time to enhance the strength of your force.

Major forces such as the Battle Demon Sect, the Bright Moon School, the Star River Sect, and the Saint Demon Sect have huge resource reserves, which ordinarily are not allowed to be used. They can only be used at the most critical times.

Even though Yang Feng has taken control of the Battle Demon Sect, he couldn't use the sect's strategic reserves. However, after the battle with the Gumana Universe's powerhouses, the Battle Demon Sect as a whole agreed to activate the strategic reserves and make every effort to improve their combat strength.

After going through the battle with the Gumana Universe's forces, the Star River Sect and other formidable sects will use their strategic reserves to upgrade their strength at all costs.

Luo An's eyes flashed with a burning shade, and he said in a loud voice: "100,000 units, no, 500,000 units, no, 1 million units, the Saint Demon Sect can buy 1 million units of these golems."

Xinghe Mingxuan spoke decisively: "1 million units, the Star River Sect will buy 1 million units of these golems as well."

Mei Shuanghua's gorgeous eyes sparkle with determination, and she uttered: "1.5 million units, Sect Master, the Bright Moon School will buy 1.5 million units of these golems. Based on our friendship, I ask that you prioritize our order, Sect Master Yang."

Xinghe Mingxuan's face fell, and he said: "The Star River Sect will increase the price by 10%. Sect Master Yang, please give priority to the Star River Sect's order."

Luo An uttered somewhat anxiously: "30%, the Saint Demon Sect will increase the price by 30%. Sect Master Yang, please give priority to the Saint Demon Sect. The Saint Demon Sect is a good friend of the Battle Demon Sect."

The Star River Sect and the other two sects are frightened of the Gumana Universe's forces. Only when they have at least 1 million 5th grade battle robots, can they sleep soundly. Otherwise, who knows when the Gumana Universe's forces may eliminate their headquarters.

Luo An and them, who are crafty individuals, naturally know that for Yang Feng to sell them the 5th generation battle robots so generously, he is bound to set up several backdoors. However, due to the threat coming from the Gumana Universe, they have no choice but to buy the golems from Yang Feng. Furthermore, they are fighting to buy them.

Yang Feng smiled, saying: "Don't worry, I will make sure to sell the golems to you in the shortest possible time. But you have to pay upfront."

Luo An and them spoke resolutely "No problem."

Chapter 868 – The Bai Family Asks for Help

Luo An's communications secret treasure suddenly lit up, his eyes flashed gravely, and he asked Yang Feng: "The Great Cloud Dynasty invites us to the Cloud Sea Plane to hunt the Gumana Universe's main force. Sect Master Yang, what do you think?"

Mei Shuanghua said with a cold smile: "The Cloud Sea Plane is part of the Bai Family's foundation. The Bai Family, who has drove us out of the Cangzhi Plane before, is asking us to help them, how truly shameless."

Xinghe Mingxuan sighed slightly: "The Bai Family has indeed gone to far at that time."

At that time, Bai Wuqing launched a campaign against the Cangzhi Plane's Ten Great Sects, drove them and many other top sects out of the Cangzhi Plane's Eastern World, and monopolized the Cangzhi Plane's resources.

The Cangzhi Plane is the birthplace of human Warlocks as well as the only know grade 1 plane in the universe. The Ten Great Sects lost a lot after they were expelled from the Cangzhi Plane. Naturally, none of them has a good opinion of the Great Cloud Dynasty's Imperial Court.

Whether it is Mei Shuanghua or Xinghe Mingxuan, they wish to see the Bai Family exterminated.

Yang Feng suddenly said with a smile: "Although the Bai Family is a good-for-nothing, but it is also a human Warlock force. Since the Bai Family is in trouble, as human Warlocks, we should 'help' them. I decided to go and have a look."

With the 1 million 5th generation battle robots, with this huge fore in his hands, Yang Feng can even defeat Warlock Monarch rank powerhouses.

Because there is a great barrier between the Gumana Universe and the universe of Warlocks, the Gumana Universe's Holy Spirit Warlock rank powerhouses cannot cross the barrier for the time being. Unless his luck is horrible and he is besieged by dozens of the Gumana Universe's hives, Yang Feng won't be defeated.

Luo An thought for a moment, and then showed a smile: "Indeed, we should 'help' the Bai Family."

If the Bai Family's base is captured by the Gumana Universe's forces, Yang Feng and company can just go and collect their treasures.

If the Bai Family and the Gumana Universe's forces exhaust one another, Yang Feng and company can seize the opportunity to hunt down the Gumana Universe's powerhouses.

When Yang Feng made his decision, the huge fleet flew directly into a warp gate inside a celestial body.

The Cloud Sea Plane, in the vast starry sky, a fist-sized astral passage suddenly appeared, and then a fleet flew out like a group of specters, completely invisible.

When the invisible fleet flew out, its battleships gradually expanded and restored their huge size.

Yang Feng glanced at the holographic projections on the bridge, and then said with a grave look in his eyes: "The Bai Family, as expected of a force that was in control of the Cangzhi Plane for tens of thousands of years, it's underlying strength is really amazing!"

The Cloud Sea Plane is a grade 2 plane second only to the 36 primary material planes. There are stars floating in the plane's outer space, with each star being a divine country.

As a grade 2 plane, the Cloud Sea Plane can accommodate more than 10,000 gods. The divine countries in the plane's outer space number 7,000, and they are each above the feeble divine force grade.

The 7,000 divine countries shone and resonated with each other, forming a divine country boundary that covered the whole plane. Unless the Gumana Universe's powerhouses destroy more than half of the 7,000 divine countries, they won't be able to break through the divine country boundary and enter the Cloud Sea Plane to slay ordinary people.

The 7,000 divine countries flickered, and angel legions, with their divine country as the base, engaged the Gumana Universe's powerhouses.

When the angels are destroyed, as long as their heart is intact, they will return to the Angel Pool in their divine country, absorb the power inside, get reborn, and then plunge back into battle.

Among the 7,000 divine countries, 32 are strong divine force grade divine countries. They are the backbone of the resistance against the Gumana Universe's forces.

In the center of the 32 strong divine force grade divine countries, there are 3 divine countries exuding mighty divine force rank splendor. The 3 mighty divine force rank gods are the Bai Family's most profound underlying strength.

The god path is both more difficult and simpler than the Warlock path. It is extremely difficult for a god to advance by themselves. It requires an understanding of laws, a perception of divine authority, and the support of enormous amounts of divine force. However, as long as you obtain a higher-level godhead, everything will become easy. You can quickly advance until the potential of the higher-level godhead is exhausted.

The godheads of the 3 mighty divine force rank gods are mighty divine force grade godheads that the Bai Family, which was in control of the Cangzhi Plane for tens of thousands of years, acquired through various means. Although the three mighty divine force rank gods can hardly leave the Cloud Sea Plane. However, they are the most powerful guardians of the Cloud Sea Plane.

In addition to the 3 mighty divine force rank gods, there are 26 Warlock Monarch grade weapons on the edge of the divine country boundary.

Although each of the 26 Warlock Monarch grade weapons is slightly weaker than the Star River Sect's star giant, but when they act together, the 26 Warlock Monarch grade weapons are far stronger than the Star River Sect's star giant.

In addition to the 26 Warlock Monarch grade weapons, the Bai Family has also mobilized 285 Infinity Warlock grade weapons. This shows how profound the underlying strength of the Cangzhi Plane's strongest force is.

In the Cloud Sea Plane's outer space, there are 36 hives floating. The Gumana Universe's powerhouses poured out from the 36 hives and engaged the Bai Family's powerhouses.

700 plus infinity Warlock rank, 10,000 plus Bright World Warlock rank, hundreds of thousands of Glorious Sun Warlock rank, and 10 million plus Moonlight Warlock rank powerhouses flew out from the 36 hives.

Countless rays interwove, making it appear like the whole world has crumbled.

In the Gumana Universe's camp, there are 16 100-meter-long weapons with the body made from a small hive, a pointy head, eight pairs of eyes, seven pairs of wings on the back, six pairs of claws, and a scorpion tail behind.

The 16 weapons, which exude Warlock Monarch rank fluctuations of power, engaged the Bai Family's 26 Warlock Monarch rank weapons and even put the other party under tremendous pressure.

A freak covered in sharp tentacles, with the body made from a hive ten times as big as the small hives, a pair of wings on the back, eight 500-meter-tall giant eyes scattered around its body that leave it with no blind spots and contain countless pupils, its eight eyes gleamed and fired a beam barreling towards the Bai Family's 3 mighty divine force rank gods.

A grave expression on their faces, the Bai Family's 3 mighty divine force rank gods burned divine force crazily and unleashed formidable defensive divine spells to protect themselves from the eight beams, their eyes filled with wary.

Yang Feng observed the battlefield, carefully, saying: "It looks like the Bai Family's situation isn't that good!"

"The Bai Family hasn't gone all out yet!" Luo An uttered with a smile: "The Bai Family has two Empyrean grade secret treasures, namely the Zigud Wood Stuff from the archgod era and the Magic Note Throne. The Zigud Wood Stuff is a treasure that a Warlock Emperor rank archgod called Zigud forged from the corpse of another Warlock Emperor archgod they slayed and countless treasures of heaven and earth. After the collapse of the Dawn Dynasty, the founder of the Bai Family obtained the Zigud Wood Stuff by luck, which led to him establishing the Great Cloud Dynasty."

Each Empyrean grade secret treasure has endless might and inconceivable powers. The number of Empyrean grade secret treasures refined by the Eight Warlock Dynasties isn't large, and practically all of them have an owner. However, there are still some ownerless Empyrean grade secret treasures from the Eternal and the archgod eras.

Mei Shuanghua's eyes flashed fiercely, and she said with a smile: "When the Bai Family goes all out and is in a dire situation, then we'll help them."

In the alliance of the four sects, the Bright moon School is the weakest. Moreover, a greater part of the Bright Moon School's foundation lies in the Cangzhi Plane. They are far behind the Battle Demon Sect and the other two sects in terms of development of other planes. As a result, the Bright Moon School is the one that hates the Bai Family the most.

Following a flash of light, wisps of light formed a figure in front of Yang Feng's fleet. It is the Great Cloud Dynasty's current emperor Bai Wuqing.

Derision streaked past Bai Wuqing's eyes, and he snapped: "Grand Duke of the North Lei Ming, I order you to take your fleet to attack the other universe's freaks at once."

A throne-like brand appeared on Bai Wuqing's forehead. Virtually at the same time, a throne-like brand also appeared on Yang Feng's forehead.

The Fate Algorithm throbbed, and a sense of danger surged in Yang Feng's mind.

Yang Feng's countenance changed suddenly. By relying on the Warlock Monarch rank computing power of the level-5 optical computer network, he instantly guessed the truth of the matter: "Curses, it's the power of the Empyrean grade secret treasure Magic Note Throne!"

The Empyrean grade secret treasure Magic Note Throne is not only a peerless secret treasure that can aid in Warlock cultivation, but it also possesses various mysterious powers.

"I shall obey!"

On the bridge, Yang Feng bowed to Bai Wuqing and transmitted his voice to outside with loudspeakers, decisive.

With that, the throne brand on Yang Feng's forehead disappeared.

Chapter 869 – Severing Shackles

"Grand Duke of the North, I order you to take your troops..."

Before Bai Wuqing's projection could finish speaking, transparent threads suddenly appeared on his body, and the projection became dull and spiritless.

Yang Feng's eyes flashed with the shade of dignity, and he uttered slowly: "When I was forced to accept the official post of the Great Cloud Dynasty, I didn't think there was such a hidden danger!"

Mei Shuanghua took a look at Yang Feng, and her beautiful eyes shimmered with enigmatic light: "The Undying Mountain's Lei Ming, it turns out that he is the Undying Mountain's Young Master Lei Ming who established a great foundation in the Great Cloud Dynasty."

Xinghe Mingxuan's eyes flickered with complicated emotions: "The Grand Duke of the North Lei Ming! The Grand Duke of the North who is in charge of the Li Gui Province, the Yu Province, and the Bright Moon Province, no wonder his strength has risen so fast."

In recent years, the Undying Mountain's Young Master Lei Ming has become a top figure in the Cangzhi Plane and has taken control of three provinces, wielding countless cultivation resources and tremendous power.

The Bright Moon School and the Star River Sect naturally pay close attention to top figures like Lei Ming. However, Yang Feng, who has been hiding very well, only recently revealed some flaws. Only those who have been tracking down the details about the Undying Mountain's Lei Ming know that Yang Feng is Lei Ming.

Luo An's eyes flashed with enigmatic light, and he uttered slowly: "This is one of the powers of the Magic Note Throne. Anyone who accepts an official post or a title conferred by the Magic Note Throne

must obey reasonable orders issued by Bai Wuqing. Otherwise, they will suffer a backlash from the Magic Note Throne. The stronger they are, the greater the backlash they will suffer.

Xinghe Mingxuan said: "When we the Ten Great Sects sent our top disciples to the Imperial Court for training, after they reached a bottleneck, we had them resign from their official posts and return to the sect, so that they wouldn't be bound by the shackles of the Magic Note Throne.

The Great Cloud Dynasty's Three Grand Ministers, Nine Ministers, the heads of the Six Ministries, and the palace eunuchs, most of them are loyal to the Bai Family because they were bestowed great power by the Magic Note Throne. At the same time, the Magic Note Throne can deprive them of said power.

"I, Undying Mountain's Lei Ming, shall resign from all my official posts and titles of the Great Cloud Dynasty."

Yang Feng ran the Fate Algorithm, and countless mysterious runes appeared in his eyes.

As if he plunged into a sea of fate, threads of fate appeared around Yang Feng.

Yang Feng saw that among the countless threads of fate tied to him, there is one thread of fate emitting a strange black gas. The moment when his words fell, the thread of fate dissipated by half.

An illusory, transparent blade of fate suddenly appeared and slashed towards the thread of fate.

Light flashed, and Bai Wuqing strangely appeared before the thread of fate and said in a clear, loud voice: "Yang Feng, the great tribulation is upon us. Only when we human Warlocks unite, may we be able to survive the great tribulation. If you join the Great Cloud Dynasty, I will grant you a hereditary peer title of grand prince and use the power of the Magic Note Throne to help you become a Warlock Monarch."

"What I want is real power, not false power under another's control."

Yang Feng smiled and pointed with a finger, and the illusory, transparent blade of fate severed the black thread of fate.

When the black thread of fate was severed, Yang Feng felt his body relaxed. Although he also felt his strength weaken at once. But at the same time, he felt more comfortable and in control.

A great amount of black gas emitted from the black thread of fate and formed a black throne brand that was engraved on Yang Feng's forehead.

The Cloud Sea Plane, in a luxurious palace, Bai Wuqing sitting on the throne opened his eyes, took a deep look in Yang Feng's direction, and said unhurriedly, expressionless: "He broke free from the Magic Note Throne's shackles. From now on, the tiger has returned to the mountain. I wonder whether this is a disaster or a blessing to the Bai Family."

Yang Feng touched the black brand on his forehead: "This magic seal is the power of the Magic Note Throne. It won't dissipate before I fulfill Bai Wuqing's order.

Once the power of the Magic Note Throne was unleashed, even Warlock Emperor rank powerhouses will hardly be able to resist it.

Yang Feng sensed the Devourers in the small worlds inside him stir, and the corners of his mouth rose slightly: “But I have the Devourers, the nemesis of such curse-like spells.”

“However, it’s not yet time for this card to be exposed. Furthermore, it’s in my best interest to fight against the Gumana Universe’s forces.”

Those who slay Gumana Universe’s powerhouses can reap the favor of the universe. Thanks to this, your endeavors will go more smoothly in this universe, and the small probability of some lucky events taking place will be greatly amplified. This has great benefits in the long run.

When Yang Feng’s subordinated experts and mechanical legion slay the Gumana Universe’s powerhouses, the universe’s favor can be superimposed on him. Naturally, he’s rather interested in hunting down the Gumana Universe’s powerhouses.

A Star Destroyer Battlestar suddenly emerged from empty space, its doors opened, and a dense crowd of enhanced 4th generation battle robots flew out and, as if blanketing the sky, rushed towards the battlefield.

Yang Feng unleashed 1 million enhanced 4th generation battle robots at once.

In recent years, Yang Feng has never stopped the construction of battle robots. Because of constraint of resource, he has only produced 1 million plus 5th generation battle robots. But the number of 4th generation battle robots has already reached 3 billion.

The 1 million enhanced 4th generation battle robots are just a drop in the bucket for Yang Feng. Even if they are all destroyed, he won’t feel a thing.

Instead of flying directly into the center of the battlefield, the 1 million 4th generation battle robots hunted Gumana Universe’s Moonlight Warlock rank powerhouses on the edge of the battlefield.

When the mechanical legion composed of 1 million Moonlight Warlock rank robots plunged into the battlefield, the Bai Family’s situation turned for the better.

A supreme Infinity Warlock rank fire qilin flew out and plunged into the battlefield. However, it cunningly only attacked easy pray on the periphery of the battlefield, not daring to plunge into the center of the battlefield.

A 10,000-meter-long astral dragon snake, a 1,000-meter-long manta stone wolf, a 10,000-meter-long giant dragon turtle, and a 10,000-meter-tall evil ogre, all exuding fearsome breath, plunged into the battle. However, they just stayed at the edge of the battlefield and picked off easy targets, hunting Gumana Universe’s Glorious Sun Warlock rank powerhouses. They aren’t willing to fight against the Gumana Universe’s Infinity Warlock rank powerhouses.

In addition, the powerhouses of dozens of Warlock groups were forced to join the extremely cruel battlefield.

After the Warlock groups joined the battlefield, the situation was still in a stalemate.

If the Warlock groups have tried their best and fought to the death, it would be possible to break the stalemate. However, the Warlock groups, who were forced to come help, don’t have the intention to fight for the Bai Family with all their might. Much like Yang Feng, they just hunt weak prey. When they

meet a strong enemy, they retreat immediately. Since they mostly care about protecting their lives, it's naturally impossible to reverse the situation.

Although Bai Wuqing urged repeatedly, but the Warlock groups turned a deaf ear, refusing to fight with all their might.

The power of Magic Note Throne has limitations. Although Bai Wuqing can issue reasonable orders, but the target can disobey orders that will lead to their death.

Boom!

Along with a blare, a weak divine force grade divine country in the Cloud Sea Plane's outer space exploded. The terrifying explosion set off ripples in the divine country boundary.

10 Infinity Warlock rank, 200 Bright World Warlock rank, and 1,000 Glorious Sun Warlock rank powerhouses of the Gumana Universe flew out from the explosion.

The divine country is the residence and the strongest fortress of the gods. A weak divine force rank god can contend against even an Infinity Warlock inside their divine country.

However, despite how powerful a divine country is, it will still be destroyed in front of absolute power. A weak divine force rank god's divine country, which can barely contend against an Infinity Warlock, stands no chance against a force composed of 10 Infinity Warlock rank, 200 Bright World Warlock rank, and 1,000 Glorious Warlock rank powerhouses.

After the explosion of the divine country, the eight-eyed freak that pressured the Bai Family's three mighty divine force rank powerhouses fired a beam from an eye that entered empty space.

In the empty space, a huge hole opened at once.

Four hives shook slightly and flew out from the hole.

Yang Feng's face flickered: "Shit, this monster can transfer hives. If things go on like this, the Bai Family will stand no chance."

At the sight of the four hives, the complexion of the Warlocks changed dramatically.

Until this point, the human Warlock side was at a complete disadvantage. Yet now four more hives appeared. If there is no miracle, the loss of the human Warlock side is all but guaranteed.

Yang Feng contemplated for a while, and then ordered: "Fire!"

In an instant, a bright beam fired by the Starfield Battlestar pierced through one of the hives that have been transferred, and the hive exploded into pieces.

Yang Feng's huge fleet suddenly appeared, and countless main artillery and secondary artillery shone. A rain of light slammed into the Gumana Universe's powerhouses and blasted them to shreds one after another.

"So strong!"

"To destroy a hive with a single shot, awesome."

“What’s the secret treasure is that, how can it be so powerful!?”

“...”

When the Warlock groups who came as reinforcements saw this scene, astonishment welled up inside them.

Chapter 870 – Assassination

In an ordinary-looking hive, in a palace, there sit three people. Among them, one is a handsome person with a red rhombus crystal imbedded in the forehead, another one is a person covered in shadows, making it impossible to see their face, and the last one is a person enveloped in fire.

The three powerhouses emit Warlock Monarch rank fluctuations of power.

The Warlock Monarch rank red rhombus race powerhouse uttered with a smile: “This is the mechanical fleet of the Battle Demon Sect’s Yang Feng. To be able to destroy a hive, truly amazing! His secret treasure refining technology has a hint of the Golem Lord and the Magic Note Lord. As expected of a universe that once gave birth to Eternals, it’s not so easy to devour it.”

The eyes of the powerhouse enveloped in flames shimmered with frigid killing intent, and he said slowly: “Yang Feng’s rate of advancement is far above that of ordinary Warlocks. Only a few freaks can compare to him in this regard. He must be one of the children of universe chosen by this universe. If we join hands and kill him, maybe we’ll be promoted to the Imperishable realm.”

The Imperishable realm is equivalent to the Holy Spirit Warlock realm in the world of Warlocks. Even in the Gumana Universe, the Imperishable realm powerhouses are bigshots and guardians of a race.

Although the Gumana Universe’s energy level is half an energy level higher than that of the universe with the Cangzhi Plane, but it is nonetheless not a simple thing to birth an Imperishable realm powerhouse.

The three Warlock Monarch rank powerhouses were willing to brave the risk of entering this universe as the vanguard all for the sake of getting the favor of their universe and obtaining resources that will enable them to advance to the Imperishable realm.

Children of universe are beings who received the favor of their universe. Thanks to that, they may pick up a treasure on the side of the road when they go out for a stroll, save a random person who may end up being a formidable individual, or have other fortuitous encounters. At the same time, such beings have an astonishing rate of cultivation.

If you can kill another universe’s child of universe, you’ll be able to get the favor of your universe, and have good luck in your endeavors in your universe.

“I’ll go kill him!”

Shrouded in shadows, the windshadow powerhouse whose features cannot be made out uttered coldly, and then disappeared instantly.

The Warlock Monarch rank red rhombus race powerhouse sighed ruefully: “The innate ability of windshadows is something else. Able to travel freely inside wind and shadows, they are the most frightening assassins. Caught of guard, even an Imperishable realm powerhouse will be assassinated by them.

The Warlock Monarch rank flamewell powerhouses uttered faintly: “That’s true. However, although the windshadows’ innate ability is incredible, but they also possess the weakness innate to assassins, that is, they are quite weak in frontal combat. They rely too much on their innate ability. If their innate ability is neutralized, they are quite easy to defeat.”

The three remaining hives summoned by the eight-eyed freak radiated faint light and shot towards Yang Feng’s fleet like three meteors.

Crowds of powerhouses flew out from the three hives and rushed towards Yang Feng’s fleet.

Many doors opened on the battle ships of Yang Feng’s fleet, and swarms of 4th generation battle robots flew out, formed a mechanical sea, and swept towards the three hives.

At present, Yang Feng has begun to put all resources into the construction of the 5th generation battle robots. The 4th generation battle robots have been reduced to cannon fodder after being enhanced.

Even so, the enhanced 4th generation battle robots, who possess Moonlight Warlock rank fighting strength, have the power to threaten Infinity Warlock rank powerhouses.

60 Infinity Warlock rank, 1,400 Bright World Warlock rank, 30,000 Glorious Sun Warlock rank, and 1 million Moonlight Warlock rank powerhouses flew out from the three hives and engaged Yang Feng’s mechanical legion.

Yang Feng deployed 20 million 4th generation battle robots to form one defensive perimeter after another. At the same time, he had the fleet retreat.

Each time, the 60 Infinity Warlock rank and 1,400 Bright World Warlock rank powerhouses of the Gumana Universe attacked, they smashed a track of space and reaped open the mechanical sea composed of the 20 million 4th generation battle robots like a sharp blade.

However, the Glorious Sun Warlock rank and Moonlight Warlock rank powerhouses of the Gumana Universe besieged by the sea of 4th generation battle robots suffered disastrous casualties.

“Attack!”

When the three hives flew to within 30 kilometers of Yang Feng’s fleet, the mechanical legion formed from 1 million 5th generation battle robots flew out and attacked the 60 Infinity Warlock rank and 1,400 Bright World Warlock rank powerhouses.

As if a spear, the 1 million 5th generation battle robots slammed into the arrowhead formed by the 60 Infinity Warlock rank and 1,400 Bright World Warlock rank powerhouses.

Dozens of Bright World Warlock rank powerhouses were besieged and slayed by the 5th generation battle robots.

The 60 Infinity Warlock rank powerhouses suddenly slowed down, forced to frantically stimulate their power to destroy the 5th generation battle robots. If they weren't careful, they would be surrounded and killed by 5th generation battle robots.

Agnipe and five other Infinity Warlock rank powerhouses entered into the sea of 5th generation battle robots stealthily and attacked the Gumana Universe's Infinity Warlock rank powerhouses.

Luo An, Xinghe Mingxuan, Mei Shuanghua, and three other powerhouses also plunged into the sea of 5th generation battle robots and launched surprise attacks against the Gumana Universe's Infinity Warlock rank powerhouses from time to time.

When the three hives slowed down, they could not pick up speed anymore. Under the siege of the nearly endless amount of 4th generation battle robots, the Gumana Universe's powerhouse were killed one after another.

"To actually block three hives, how formidable!"

"That's the mechanical legion of the Battle Demon Sect's Yang Feng. When did his mechanical legion become so powerful?"

"The 60 Infinity Warlock rank and 1,400 Bright World Warlock rank powerhouses, even though they're slightly weaker than genuine powerhouses of the same realm, but to be able to block this force, it's really amazing."

"..."

When the Warlock groups who have been compelled to participate in this battle saw that the legion of the three hives was blocked by Yang Feng's mechanical legion, they inhaled a mouthful of cold air, and shock filled their eyes.

When the three hives join forces, even if it is a Warlock group such as the Bright Moon School, even with geographical advantage, they would find it hard to resist the forces of the three hives.

Yet Yang Feng's mechanical legion not only was able to resist the forces of the three hives, but it also put them under tremendous pressure. This is simply incredible.

After a few minutes of fierce fighting, the Starfield Battlestar, which has fully charged, fired a bright beam of light that slammed into a hive and vaporized it.

The main artillery of the Blazing Sun Battlestars and the Sun Destroyer Battlestars shone brightly and fired beams that obliterated Infinity Warlock rank and Bright World Warlock rank powerhouses of the Gumana universe.

The Starfield Battlestar, on the bridge.

Sitting on the bridge, Yang Feng gazed at the holographic projections and quietly calculated: "There are two hives left. If they don't retreat, I'll be able to annihilate this legion of the Gumana Universe."

Suddenly, Yang Feng operated the Battle Demon Secret Method, and a white Battle Demon Armor appeared on him. At the same time, he pressed a Ruler Magic Cube, and a black as ink Ruler Armor inlaid with Monarch Cores and Infinity Cores enveloped his entire body.

At this moment, a shadow flew out without any sound or sign from the shadows on the bridge and stabbed at Yang Feng's heart with a fully transparent dagger of unknown length.

At the same time, from the shadow behind Yang Feng, a vast divine force wave suddenly emerged. Yang Feng's Ruler of the Night avatar flew out of the shadow and blocked the shadow's dagger with the Dagger of the Night.

Yang Feng's Ruler of the Night avatar has integrated several strong divine force grade godheads. Although this makes it impossible for him to break through to the mighty divine force realm by himself, but it also makes him far stronger than ordinary strong divine force rank gods.

The move of Yang Feng's Ruler of the Night avatar was masterfully executed, sealing any changes of the shadow's dagger.

Ding!

When the two daggers collided with each other, a formidable force hit Yang Feng's Ruler of the Night avatar and knocked him aside. As if cut by wind blades, countless wounds appeared on his body, and drops of god blood fell on the ground.

"Fool, your comrades betrayed you! You're dead!"

With a wave of Yang Feng's hand, the Mountain Shield suddenly appeared, and mountain range projections emerged one after another. It seems like there is an endless distance between Yang Feng and the Warlock Monarch rank windshadow powerhouse.

The Warlock Monarch rank windshadow stabbed his dagger into the mountain ranges and erupted with the essence of wind, and violent wind blades cut the mountain ranges and stabbed towards Yang Feng with thick killing intent.

Yang Feng's eyes flashed a dignified shade, and he pointed at the Mountain Shield. The Mountain Shield broke out with a fearsome whirlpool that pulled at the Warlock Monarch rank windshadow powerhouse's dagger and absorbed countless attacks.

In an instant, countless marks left by the dagger appeared on the Mountain Shield.

Suddenly, Yang Feng felt extreme danger and leaned sideways. Three wind blades containing the essence of wind stabbed him, cut through the Ruler Armor and the Battle Demon Armor, and left a long wound, and blood splashed about.

If Yang Feng's defenses weren't astonishingly strong, he would have been cut into two by the wind blades.

Yang Feng's eyes flashed with killing intent. The Phantom Ruler suddenly appeared, and the Eye of Dreams opened and shrouded the windshadow powerhouse in formidable dream force.
