

The Mightiest Little Peasant Chapter 2442

The mark of a wheel on the great void sect master's forehead glowed.

A dazzling divine light burst out, and at the same time, a vast immortal pressure gushed out.

In an instant, the immortal pressure spread out and filled the entire small world.

"This is ...?"

In the distance, the group of venerable sovereigns who were still fighting for the Supreme Buddha's sarira near the shrine were all shocked and stopped their movements at the same time.

They turned around and looked in the direction of the immortal pressure, their expressions incomparably shocked.

This wasn't any ordinary immortal might, but the might of a true immortal! Even eight-tribulation venerable sovereigns like them were almost suffocated and their divine souls trembled!

In today's world, there were no true immortals. The only thing that had the power of a true immortal could only be a fairy weapon!

"It's old man Taixu! Is he crazy?"

A Dao master's eyes shone with divine light as he saw the situation at the exit and exclaimed in shock.

From the looks of it, the old man of the great void sect was about to activate his great void heaven's celestial artifact, the great void divine wheel!

This was simply crazy!

Although fairy weapons were powerful and could destroy the world and suppress the universe once they were activated, the price to pay for each activation was too great. Therefore, although they had a fairy weapon in each heaven, they never used it.

Furthermore, the celestial artifacts of their respective heavens were made from the core of their respective Middle Worlds and could not be used easily.

The most recent time the fairy weapon was activated was still the great void heaven, but that time only a part of the great void divine wheel's function was activated, allowing the geniuses of the various heavens to enter it to cultivate. It was not like now, where it had to be fully activated.

The last time he activated it, he had paid a huge price and consumed a huge amount of natural treasures.

This time, if the old man of the great void sect were to summon the celestial artifact from a distance and fully activate it, the price he would have to pay would be dozens of times higher than the previous time. Even with the deep foundation of the great void heaven, it would still be a serious injury.

After everyone saw it clearly, they all cried out in shock.

It had been thousands of years since a celestial artifact had appeared in the world!

The great void sect master had six people on his side, while their opponent was only one person, and he was a newly advanced venerable sovereign. Why did they have to use a fairy weapon?

Even if he wanted to kill Haotian, this was definitely not the best place to use a fairy weapon.

This small world couldn't withstand the terrifying power of the fairy weapon at all. It would collapse completely, and they would be swept into the void turbulence. For venerable sovereigns like them, although it wasn't life-threatening, it would still be a little troublesome to find a way out.

"Looking at old man Taixu's expression, he's clearly really crazy. Could he have lost to that kid?"

A Dao Lord guessed in disbelief.

Among the 33 ancient orthodoxies, the great void heaven had always been one of the top few. It had inherited the great void God's legacy, and the Masters of the great void heaven in the past were all very strong. They were ranked in the top five among the Dao Masters of the various heavens.

How could such a veteran powerhouse lose to a newcomer?

"I'm afraid he really lost. Otherwise, why would he be so crazy?" The person who spoke was Dao master Emperor Xi.

After he finished speaking, he shook his head, his expression somewhat emotional.

A newcomer who had just been promoted not long ago already had the strength to defeat them, the old venerable sovereigns. This was really lamentable.

"The great void divine wheel!"

Mahesvara Buddha glanced over and snorted.

During the war between the immortals and the Buddhas, the heavens of the celestial gate had used many fairy weapons, including the great void divine wheel. It had also gathered the power of many fairy weapons and attacked the three Holy Lands of Buddhism from above the nine Heavens, only then did they break through the defense.

"Fight! It's best if both sides are injured!"

Both sides were great enemies of his Buddhism, and the more fierce the fight, the happier he was.

He collected another sarira and entered the small Pagoda. The pagoda shone brightly with Buddhist light and opened up layers of shields.

The other venerable sovereigns also activated their defensive treasures.

At the entrance, Tang Hao's expression changed when he felt the immortal pressure that covered the sky and the earth.

This was the first time he had faced the power of a real celestial artifact!

Even the strongest weapons of the nine tribulations, such as the king Roc divine halberd and the No beginning Dao Bell, were insignificant in front of a true immortal weapon. The two of them were simply not on the same level.

"We must rush out!"

Tang Hao made a prompt decision. His body flickered and he dashed toward the exit.

The power of a celestial artifact was not something he could contend with. With his current strength, if he took a blow, even if he did not die, he would be no different from being crippled.

"You want to leave?"

The path master of the divine incantation path and the others moved to block him.

No matter what, they could not let this kid escape.

"Get lost!"

"Die!" Tang Hao roared and punched forward with both fists.

Bang Bang!

With two explosions, the divine curse Dao master and the devil Dao ancient Emperor were both sent flying.

Their expressions were aghast and incomparably shocked.

After fighting for so long, how could this kid still be so brave? the celestial core power in his body was surging as if it couldn't be exhausted. It was simply strange!

Tang Hao did not wait for them to recover. He closed in on them and threw another punch.

Bang Bang!

His two heads exploded, and golden immortal blood and flesh splattered everywhere.

"Ah, Yingluo!"

Then, two crazy long howls were heard.

The two heads instantly reappeared, their expressions ferocious and crazy.

To 8th tribulation cultivators like them, having their heads blown off was the greatest humiliation.

“You’re looking for death!”

They shouted and chased after him.

By then, Tang Hao had already blasted venerable spirit worship away and was only one step away from the exit.

“Not good!”

Suddenly, Tang Hao’s expression changed. He felt a great sense of danger.

He turned around and saw that the great void sect master was standing in the air not far away. A beam of divine light shot into the sky from between his brows and opened up a void Whirlpool. Across the whirlpool, a strong aura locked onto him, causing his hair to stand on end.

He could vaguely see that on the other end of the void, there was a huge round wheel the size of a small star that was spinning. It was covered in mysterious and complicated patterns.

A dazzling immortal radiance surged on these patterns and finally gathered in the center.

“F * ck!”

Tang Hao grinned. He felt his scalp go numb.

This aura ... Was too terrifying!

It could make his heart palpitate so much even from so far away!

“This old man Taixu has really gone crazy!”

With the strength of an 8th tribulation true immortal, it was impossible to activate such a huge genuine immortal weapon. At this moment, there were probably millions of people of the great void sect exerting their strength to activate this treasure.

He was going to resist the power of the entire great void heaven!

Clang clang clang!

Ye Xi wrapped around him, and then, one after another, ninth tribulation defensive treasures flew out and surrounded him.

He couldn’t dodge this attack, so he could only take it head-on.

Whoosh!

After a few breaths, the great void divine wheel trembled and blasted out an extremely bright divine light.

This beam of divine light passed through the void tunnel and descended into this world with the power of destruction. Wherever it passed, the surrounding void was instantly torn apart and completely annihilated.

It only blocked for a moment, and the nine tribulations shield at the front was shattered.

Then, it was the second one.

These shields couldn't withstand the power of immortal items and true immortal items, and they all cracked to varying degrees.

The situation was urgent. Tang Hao had no choice but to take out a handful of sarira flower petals and stuff them into his mouth. He frantically activated the shield to block the shocking divine light.

Whoosh!

He threw out the ROC King's divine halberd, which struck the divine light. However, the next moment, the divine halberd was sent flying, and cracks appeared on the halberd.

In the face of a true immortal weapon, he couldn't resist it at all. The divine light broke through his layers of defense and finally landed on his body.
