

The Mightiest Little Peasant Chapter 3068

In the abyss, Tang Hao descended at a steady speed.

Looking down, it was pitch-black and deathly silent.

Tang Hao reached the bottom half an hour later.

At this point, the rock walls of the continent could no longer be seen. There was only an endless dark void.

A vast and deathly aura filled the surroundings.

“Let’s take a look at this place first!”

He looked around but did not find anything. Tang Hao took out a map, found the nearest fragment, and flew over.

Ten minutes later, he saw a huge piece of land. It looked like a small star, floating in the void.

Upon closer inspection, the surface was riddled with holes and in a sorry state.

When he landed, he noticed that there were many auras on the fragment. Clearly, they were also Immortals who had come to search for treasures.

“It’s really clean!”

Tang Hao said with a wry smile after he used his divine will to scan the area.

This place had nothing left.

“Let’s go to the next!”

He followed the locations of the fragments marked on the map and searched for them one by one. From near to far, he continued to head towards the depths of the void.

The deeper they went, the harder it was to see people. Once they did, they were basically all divine Immortals.

“There seems to be a treasure there!”

Tang Hao took out his spirit truth Magic Eye and looked around the void. Suddenly, he noticed a huge rock among the gravel. Its surface was black, but a few cracks revealed a golden light.

It was a piece of gold iron ore!

Moreover, looking at the size, it was probably half a mine vein.

“It’s an immortal material!”

Tang Hao’s heart was on fire.

These were probably the treasures that had been brought along with the ancient tai Chu tide.

His figure moved, dashing over there to collect the ore.

Such a large piece was a considerable harvest.

However, not long after he flew out, he saw another divine light flying in that direction in the distance. It was one step ahead of him and had arrived in front of the ore.

“Hahaha! A piece of Draco first true gold, and it’s this big, what a pleasant surprise!”

The person laughed out loud. With a wave of his sleeve, he shattered the black outer shell.

In an instant, a dazzling golden light burst out and illuminated the vast void.

“Good! It’s really a good treasure!”

The person laughed again and praised.

Then, he rolled up his sleeves and kept the ore.

Tang Hao stopped, his face twitching.

F * ck! He had been intercepted!

He was a little displeased. He had always been the one cutting off others ‘share, and no one had ever cut off his share.

However, even though he was unhappy, he could do nothing about it. The people in this area were basically all heaven Immortals, and they all had some divine abilities. He had no way of snatching them back.

“Next time, you’ll have to be faster!”

He mumbled to himself and was about to turn around and leave in search of the next treasure.

However, at this moment, he suddenly stopped. He remembered that the voice was somewhat familiar, as if he had heard it somewhere before.

He focused his eyes and looked in that direction.

After he saw it clearly, he was stunned.

He did know this person.

This white-robed man with a kind face ... Wasn't he that peerless senior, Daoist myriad treasures?!

He was the one who had previously descended to the lower realm and fought with the witch of Devil Heart sect.

"What a coincidence!"

He muttered to himself, his expression a little strange.

He had once taken away many immortal materials that this senior had cultivated in the lower realm. Now, this senior had taken one of his immortal materials. Was this karma?

"I've suffered a loss!"

Tang Hao did the math and felt his heart ache.

He didn't take many immortal materials. From the looks of it, only the green Lotus had a higher value. The others were very ordinary, and their value was far less than this half of the Taiyi true gold mine.

"Hahaha! I knew it, I'm really lucky this time. As expected, I've just arrived and I've already encountered such a good treasure!"

On the other side, treasure Daoist was still laughing, his face full of joy.

"Next, there will definitely be more gains!"

With a smile, he raised his hand and took out a golden ruler.

He extended his hand and tossed the ruler. It floated in the air and began to spin rapidly.

A moment later, his expression changed as he looked at a certain place in the void, his eyes shining.

"The auras of so many treasures! It must be the ancient tai Chu tide! It's coming from the depths!"

He said happily.

The next moment, he took out an immortal robe, put it on, and flew over.

Tang Hao's expression changed slightly as he watched from a distance.

That golden ruler and that immortal robe were both extraordinary items. They were probably all extraordinary treasures. It seemed that this senior was really like his Daoist name, full of treasures.

"However, his cultivation base doesn't seem to be at the Golden immortal stage yet!"

Tang Hao was surprised.

This senior was very senior. Before the immortal world was established, he was already a well-known true immortal. Why hadn't he advanced to the Golden immortal level after ten thousand years?

This shouldn't be the case!

After such a long time, it was impossible for him to not even have three connate spirit items.

"Perhaps this senior wants to collect more innate spirit items!"

He muttered.

This was also possible.

He didn't dwell on this and quickly threw these doubts to the back of his mind.

As he looked in the direction where treasure Daoist had gone, his eyes gradually brightened.

This senior seemed to be very good at treasure hunting. As long as he followed him, he would be able to find the treasures. With the help of the gold fighting robe, he would be able to snatch the treasures from this senior.

"Right! That's it, I'm going to get back what I lost!"

He mumbled to himself and chuckled.

Who asked this senior to snatch his treasure, so he could only snatch it back.

He put on the gold fighting cloak and quickly followed from a distance.

Not long after, he saw something surging in the darkness in the distance. It was like a tide, rushing toward them at an extremely fast speed.

"It's the ancient tai Chu tide!"

Tang Hao was shocked.

He had heard from the people in the city that this ancient tide was extremely terrifying. It was formed by the convergence of some extremely dark and Yin Qi of absolute beginning. Now that he had seen it, it was true. He could sense that terrifying aura from far away.

This Qi of absolute beginning was not the same as the heaven and earth ancient Qi. After absorbing it, one's strength would increase. It was some dark and negative Qi that was born when the world was created. Ordinary people could not absorb it.

He slowed down.

The treasure Daoist in front of him also stopped slowly. Then, countless rays of divine light flew out of his body and opened up layers of light curtains, covering himself.

He then walked toward the ancient tai Chu tide.

“They are going to enter the ancient tide to look for treasures!”

Tang Hao was speechless.

This senior abundant treasures was really bold, daring to enter the ancient tide to fish for treasures!

However, this person had a lot of treasures, so he really had the strength.

“I’ll go in too!”

Tang Hao pondered for a while, then he headed toward the ancient tide as well.

He had the immortal King treasure garment and the ten thousand laws divine mountain in his body. He could hold on for a while in this ancient tide, which was enough time for him to fish for treasures.
