

Chapter 283

This kind of water-energy technology was not a very novel thing for Future. After years of contact with Fire Crystals, she was already immune to this kind of thing.

But for scientists, this was a symbolic research result that was enough to make them so excited that they didn't sleep all night.

Early the next morning, Henry yawned and walked out of the office. He had been sleeping this night, but Chris and others really didn't want to blink. They all had dark circles but were very excited.

If it weren't for the fact that they were going to register for the patent right today, they probably wouldn't be willing to leave the lab.

At nine o'clock in the morning, Chris and Josh almost stepped out of the lab at the same time.

"Congratulations, President Xiao. I hope that President Xiao would share some of the tech with me." Josh stretched out his hand to Chris.

Chris burst out laughing. "President Yang, I'm so flattered, I don't deserve it. I can't even catch up with your tricks."

The meaning of Josh's words was that he wanted to Chris to share more profit with him, but surely Chris would not share anything to him.

"Then I wish you, President Xiao, can carry forward this patent in the future." Josh patted his shoulder, looked at him with meaningful eyes, and then turned his head and left.

Secretary Zhao had already driven a car to wait for Josh at the entrance of the research centre.

Josh sat in the back seat with an unhappy face and asked

directly, "How's it going? Have you got in touch with him?"

"I've contacted him." Secretary Zhao handed Josh a new mobile phone.

Josh took the phone and found it was connected. When he was about to ask how the other party dealt with the matter, he heard a rebuke from the other end of the phone. "Yang, are you kidding me? I brought you a technology prototype at that time, and what you have given to me? I saw your company's press conference. Your son was caught, and the technology leaked. If you don't give me some profit, you will see the consequences yourself!"

Before Josh replied, the person on the phone hung up the phone.

Josh listened to the busy voices on the phone, and his face looked terrible.

He deliberately came to the reporters and told them that Cody had been kidnapped. His purpose was to focus on Chris's company so that he could study it at ease.

However, the plan was never able to catch up with changes. The people Henry found for Chris completely disrupted Josh's entire strategy. Josh invited those reporters to hold the press conference. In the end, he was getting entangled in a web of his spinning.

On the other side of Chris, Henry did not understand the registration of patent and other things. Anyway, the matter here was over, and he was ready to go back to Yinzhou.

Henry and Chris were at the entrance of the lab. When he was about to tell Chris that he was about to go back, a yellow Porsche 718 stopped in front of Henry.

The window rolled open, and it was Milan who was sitting in the main driver's seat.

"Hey, Henry, get in the car!" Milan shouted at Henry.

"What's wrong?" Henry asked curiously.

"Cut the crap. I'll tell you when we get in the car." Milan shook her head.

Henry was speechless. He opened the door and sat up.

The Porsche 718 roared and left quickly.

Henry leaned against the passenger seat and said, "What are you going to do? I'm going back to Yinzhou."

"Go back tomorrow. My father gave me a task. It's too boring for me to go alone, so you have to come with me." Milan pouted at the place where Henry was sitting. "There's a bag in front of your feet. I've chosen some clothes for you. You can change."

Henry opened the bag and saw that it was a suit.

"Why do I have to wear this? Is there a party?" Henry guessed.

"Of course! Apart from the party, what else could be so boring?" Milan rolled her eyes. "That guy, Cody is probably here as well. Can you help me deal with him?"

Henry was speechless for a while.

The party was held at noon, at a large private club. Milan told Henry this party was for the youth. The purpose of her attending this party was to contact Frank Shang, the successor of Y&Y Venture Capital Company. Now that the Xiao Family had researched such a big project, they had to find some great investors. Otherwise, it would be difficult for the assets of the Xiao Family to use technology in a short period of time.

The Hangshi Dragon Club covered an area of more than 10,000 square meters. There were hills and ponds inside the club, and the environment was extremely beautiful.

Frank was bored and stayed here. Actually, he didn't want to come today at all, but he couldn't bear the ringing of his father's phone call, so he came over.

Currently, Frank only wanted to stay in the agency. He was not

interested in inheriting the company at all. What he wanted to do most was to improve his strength so that he could take on all kinds of tasks like his teacher.

In the past, Frank felt that he had everything, as long as he had money, he could have whatever he wanted. But after contacting his teacher, Frank understood that those billionaires were no different from ordinary people in his teacher's eyes. If he was willing, he could make anyone see the sun tomorrow. Money was always a worldly possession. Only when a person was strong enough, he would feel accomplished.

This party belonged to the younger generation, and as the only successor of the leading enterprise in Hangshi, Y&Y Venture Capital Company, Frank could be said to be the one with the highest status in this party. Anyone who came to this party would like to get well with Frank.

Some people knew that Frank liked things like martial arts fighting, so they especially found some fighting masters who had fought with him and formed a special fighting ring.

Originally, these masters wanted to let Frank make a few moves, but after the real fight, they found that the strength of Frank was far beyond their own strength.

Fighting with these people made Frank feel bored. They were not even at the same level. Now what he wanted was not to defeat others and get the sense of honour, but to become stronger. Only fighting with someone stronger than him could help him grow up.

A Porsche 718 was parked in front of the Dragon Club. Compared with other luxury cars in the parking lot of the club, this sports car looked ordinary and even somewhat cheap.

Henry got off from the passenger seat in a black suit.

The door of the main driver's car opened, and Milan was wearing a sky blue dress. Her shoulder-length hair gave her a strange temperament, and there was a hint of sexiness in her

21:07

heroic spirit. Such a woman made people want to conquer her at first sight.

When she stepped on a pair of beige high-heeled shoes, her whole body looked tall and beautiful. The long dress on her body let the shape of Milan's body show up perfectly.
