

Chapter 519

Henry's scarlet pupils scared everyone. No one expected that such a change would happen to Henry. At this moment, Henry's eyes were full of contempt for life!

His breathing became heavier and heavier. He looked at the countless circling jets above his head, and his eyes revealed a hint of ferocity.

Seeing Henry like this, Red Hair and others unconsciously showed a fearful look on their faces. They had forgotten how long they had not seen Henry like this. Since the establishment of Radiant Island, Henry's temper had changed. He was indifferent to many things and was no longer as aggressive as before.

But now, they found that Henry, who was full of courage and uprightness, seemed to show up again. Only that kind of Hell King would make people fear him. Hell was also built at that time.

There was a faint airflow surrounding Henry, which was visible to the naked eye.

Henry's long robe swayed without wind.

Within three meters around Henry, pieces of small stones were shaking slightly and floating slowly in the air.

Future had said that she wanted Henry to take this medicine in order to acquire the ability to change the surrounding environment. When a person's strength was accumulated to a certain degree, qualitative changes would occur.

At this moment, the qualitative change happened to Henry!

It could be seen that the gravel floating next to Henry was slowly cracking, and the airflow around Henry was getting stronger and stronger, and even stirred up smoke and dust.

Such a scene, even Future did not expect. She took out her tablet and quickly analyzed the data around Henry. The result made her widely open her eyes and could not believe it.

Henry's body was shaking, which meant that he was under tremendous pressure. Although the pressure was great, the reward he got was also huge.

At this moment, Henry only felt that he had unlimited power from head to toe, as if he could stab through the sky!

He raised his head to the sky and let out a long howl, which went straight up. Even with the gunfire colliding, Henry's voice had a strong penetrating force.

Henry bent his legs and then kicked hard on the ground. The moment Henry exerted force on his legs, the ground within three meters around him sank and cracked at the same time. Henry's whole body, under the power of this kick, was like a cannonball, soaring into the sky. The gravel floating around him was turned into powder at this moment!

Many people had witnessed this scene.

Sylvia and Megan, who had initially been leaving with Wade, were standing in the same place at this time. Megan widened her eyes and looked at this scene. Henry jumped up to dozens of meters high in the air and flew toward the jet in the air.

In Megan's understanding, it was already imposing for a person to jump four or five meters

high. The strongest person in the Su Family was only able to leap six meters high. Megan did not even dare to imagine the height of dozens of meters. Was it possible for a person to jump that high?

"Miss, Mr. Zhang, he..." Megan murmured as she looked at Henry, who was soaring into the sky.

Sylvia also looked at this scene in shock. This trip to Radiant Island completely subverted her cognition of the world.

However, although Sylvia was shocked, her thoughts were completely different from Megan's.

When she saw Henry jump up like this, she was more concerned. This was obviously beyond the limits of human beings. If Henry wanted to possess such a limitless force, how much pressure he had to bear?

Many people also saw this scene.

Looking at Henry, who was soaring into the sky, Cesia's eyes were full of complex emotions.

The green-robed man whose body and face were burnt shrank his pupils fiercely. "Impossible! How could he do this!"

When the people from the forces saw Henry soaring up to the sky, they all sighed in their hearts that The Conqueror was still the one they have known. The actions he took had already surpassed them by far too much!

Henry rushed to a jet. When he was still five meters away from it, Henry suddenly punched out. It was clear that there was still five meters between him and the jet, but Henry's punch blew through the plane.

This time, Henry clearly saw that a strong airflow came out of his fist and destroyed the jet. It was this airflow.

As the airflow was shot out, the violent power in Henry's body also decreased by a little.

Of course, it was only a little. Compared with the remaining violent power in Henry's body, it was just a drop in the sea.

In Henry's heart, at this moment, there was only one feeling. He felt like he was holding the world in his hands! With this powerful force, even if there was an army, Henry was confident that he could face it head-on with his strength.

Henry, who was in the air, stepped on the void space and a stream of Qi came out of his feet. Relying on this Qi, Henry seemed to be stepping on an invisible flight of stairs, and he could change its shape at will. Even Henry himself did not expect such a situation. If a person could always have such a powerful force in his body, then theoretically, this person could fly!

Future stood on the ground and looked at Henry in the sky with excitement on her face.

"He did it, Boss did it!"

Relying on the Qi in his body, Henry changed directions in the air. His speed was extremely fast, and each punch was so powerful that he could destroy the jets in the air. He kept waving his fists, and those jets kept exploding one by one.

He looked like Devil bringing a deterrence wherever he went.

The people from the various forces could not help but swallow their saliva. They looked at the figure in the sky. Was he still a human? Was this even something a human could do? This was God! The strongest expert under the starry sky, the owner of

Radiant Island, The Conqueror!

The pilots of the jets did not expect that someone could do this. They looked at the flying figure in the sky and felt cold all over their bodies. That person was a god of death. When he looked at someone, that person should say goodbye to this world.

Initially, hundreds of jets had been brought by Cesia. But now, Henry completely reversed the situation on his own. He alone was equivalent to an army. The gunfire couldn't hit Henry at all, and he destroyed jets one by one!

What Henry did was something only God could do!

The man in black, who was about to leave, looked up at the sky and sighed. "It seems that we have failed."

"My lord has told you not to provoke this person, but you didn't listen." A white figure appeared beside the man in black.
