

## Chapter 520

The man in black leaned to one side and looked at the man in white in front of him. He did not speak.

The voice of the man in white faintly sounded, "My lord said that the man was the only person he was afraid of in this world. It was supposed to be easy for us to complete the task. However, you want to irritate the disciple of that man. Do you think we can still get Fire Crystals in this situation?"

The man in white raised his head to look at the sky. Henry's every punch and kick would cause a fighter to explode.

The man in black snorted coldly. "I have my way of doing things. You don't need to teach me. If you have any questions, you can go to the master!"

After saying that, the man in black swung his long sleeves and strode away.

Looking at the back of the man in black, the man in white laughed grimly. "One day, I'll crush your head!"

After his voice fell, the man in white gradually disappeared, as if he had never appeared.

In the sky, the jets exploded one after another. Henry completely reversed the situation on his own. The violent power in his body also emitted out with every move of his. Every time he shot out a force, Henry felt that he was getting a little weaker. At the same time, the pressure on his body was also reduced a lot. Although he had not been hit, his whole body was covered with

blood from head to toe. It was from his pores.

Without the suppression of the jets in the sky, the advantages of Radiant Island were revealed at once. Whether they were the armoured Reapers or the people on the island, they were much stronger than the people brought by Cesia.

After seeing that the island had gradually gained an advantage, some underground forces began to join the battle and fight against Cesia.

"Cesia, let's leave!" The man in the green shirt, who was burnt all over his body, growled at her in a low voice.

A complicated look flashed in Cesia's eyes, and then she waved her hand. The jets were all stopped and flew out of the island at the fastest speed.

A jet circled in mid-air and dropped a rope in front of her. She reached out and grabbed the rope, letting the battle craft take her into the air. She looked at Henry and muttered, "How can I not understand what kind of person you are? What I love is your selfish look. Unfortunately, your love will never mine."

The jet left quickly with Cesia.

Another rope fell and landed in front of the man in green. The man in green grabbed the rope. Just as he was about to take off, he heard a shout.

"Want to run away?"

Henry rushed over from the sky, raised his fist, and hit the man in green across the air.

Facing Henry's attack, the man in green could no longer be as calm as before. Hanging on the rope, he could only

try his best to avoid Henry's punch.

Henry punched out with his fist. This time, there was a clear difference from the previous attack.

Henry could feel that there seemed to be an invisible wall of Qi in front of the man in green. When the cyclone on his fist touched the wall of Qi in front of the man in green, it directly smashed it. And this time he was able to hit the man.

Henry also fully understood at this moment why the man in green could ignore his attack before. There was always a layer of Qi around him to protect him. Although his previous attack was fierce, it could not break that layer of Qi.

But Henry also knew that although the Qi was intense, it was not invincible. First of all, the Qi in this man's body was limited, including the speed of his sudden outbreak at that time, it was also caused by the Qi. However, he was not able to continue to use the Qi, otherwise, Azra would fail in his attack.

After knowing this point, Henry relaxed a lot. The person who possessed the Qi was not invincible. As long as Henry could find an opportunity, even if the man were a master of Qi, he would be seriously injured.

Fighting against Henry's cyclone, the man in green felt sweet on his back. He spat out a mouthful of blood, and his face instantly turned pale.

Henry had succeeded in his first attack. When he wanted to take the opportunity to pursue and attack, he only felt that his feet were empty. The Qi in his body had been used up. The countless fallen jets left on the island

proved Henry's fantastic record.

After all the jets retreated, the killing sounds on the island gradually calmed down. The whole ground of the castle was dyed red with blood. Countless bodies were piled up together. Bodies belonged to both people from Radiant Island and the enemy's forces.

Red Hair and others also had scars all over their bodies. Future's machine started running out of power.

This battle could be said to be a tragic one.

When the battle was completely over, there was still the roar of gunfire ringing in everyone's ears.

Henry fell from the sky. When the Qi in his body was spent, the feeling of exhaustion came again, and the consequences this time was more intense than before.

Henry's strength had increased by hundreds of times, and so did the side effects.

This kind of exhaustion made Henry unable to resist it at all. His legs went weak, and he fell forward.

Future had expected this to happen. Before Henry completely fainted, she rushed to him and held him.

Due to the victory of this battle, the eyes of those people from underground forces showed joy. But, there were no cheers of victory on the island. Those who survived were quietly cleaning up the mess.

It was evident that this battle should not have happened at all. It was one of the ten kings of Radiant Island, Cesia, the owner of the Colourful Ring, who orchestrated this war.

Sylvia rushed to Henry immediately. When she saw

Henry, who was covered in blood and unconscious, her eyes were full of concern.

"Is he okay?" Sylvia stretched out her trembling arm and slowly put it on Henry's cheek.

"Sister-in-law, don't worry. Boss is just exhausted. He just needs to take a break." Future comforted her and then winked at Wade.

Wade nodded, picked up Henry, and strode toward Future's lab.

"Felix, I don't think Boss will wake up for a while. You and Uncle Peze will be responsible for the arrangement of the island."

"Okay," said Felix as he nodded. "You take care of the Boss. Leave these things to me."

This battle on Radiant Island was bound to cause a disturbance in the underground world. The battle results of The Conqueror destroying hundreds of battle jets alone would definitely be praised so that the world would once again understand the power of The Conqueror.

However, after this battle, the prestige of the island would not be as good as before. After all, someone had already dared to provoke the island.

## Chapter 521

Peze was responsible for the departure of the people on the island.

The battle this time made some people more convinced of the strength of Radiant Island, and some people began to question whether it was good or bad.

The walls around the island rose slowly, and the people who left saw that the fleet of Sea God had returned to the surroundings of Radiant Island, and the sea stretched even wider.

Henry never appeared again from the end of the big battle to everybody's departure.

Some people said that The Conqueror might pay a heavy price for breaking through his limit this time.

Some people said that The Conqueror had already reached the forefront of the world, and while everyone was fighting for small profits, The Conqueror was growing stronger.

No matter what, Henry's performance in this battle was undoubtedly shocking.

In the underground lab of Radiant Island, Moon Goddess, Red Hair, Sea God, Alex and the others were all standing there, looking at Henry, who was lying on the experimental table.

Sylvia was also standing in the crowd.

On the table, Henry's eyes were closed, and he only wore a pair of pants. The strong muscles on his body were

exposed, and his pores were still bleeding.

"Future, how is he?" Wade asked worriedly.

Future frowned tightly and kept scratching the screen in front of her. A few minutes later, her brows suddenly stretched out.

Seeing her action, everyone breathed a sigh of relief at the same time.

She slowly breathed out a sigh of relief. "He's all right now. The blood vessels in Boss's body are bursting, but his self-healing ability is too strong. Next, he may have to have a good long sleep. I'm not sure how long this sleep will be, but I guess it will take at least a week."

"A week..." Sylvia's eyes were red. How severe the impact was that he would sleep for such a long time.

"Okay." Future waved her hand. "I'm going to put the boss in a sleeping capsule. It is necessary because of his current physical condition. You can all go out first."

Hearing what she said, people nodded. Regarding this matter, Future was the most professional.

Sylvia reluctantly looked at Henry, who was lying on the experimental table and then left the lab with Red Hair and others.

When everyone left, there was only Future in the lab. She frowned again and stared at the computer screen in front of her. Before that, she noticed the change in Henry's body. There was a mass of air current in Henry's abdomen, which was rotating.

Now, the airflow in Henry's abdomen became more and more evident. The airflow contained the same energy as

the white crystal. Every time the airflow rotated, it would separate a little energy and pass it to Henry's limbs and bones. In this situation, Future couldn't tell whether it was good or bad, which was entirely beyond her understanding.

Future shook her head and walked out of the lab.

Days passed by.

On the day when the battle ended, all the forces had left.

Originally, Sylvia was going to stay on the island with Megan, but Victor called and said that the Su Family had something urgent to deal with. The day after everyone went back, Sylvia also left.

Wade told Sylvia that if Henry woke up, he would report to her immediately.

After everyone left, life on the island was gradually getting back to normal. A great war had seriously damaged the island, and many fortifications had to be rebuilt. Future also saw the loophole in her fortifications, and gradually, the improvement was made.

Henry was still sleeping.

Future went to the lab and looked at the changes in Henry's body at least twice a day. Every time she found out that the airflow in Henry's body was getting bigger and bigger, which made her very confused. Logically speaking, the airflow should be smaller and smaller since the airflow would be transmitted to Henry's limbs and bones every time, so But now, it was obviously not the case.

What Future did not notice was that the white crystal not

far from Henry got smaller. If Future checked an airflow diagram, it would be seen that there was a slight connection between Henry and the white crystal.

The blooming flowers on the island gradually began to turn yellow.

It had been half a month since Henry fell asleep.

The surface of the castle on the island had been completely renovated. Those places that had been destroyed were also repaired by the best craftsmen in the world overnight.

"Future, how's Boss now?" Wade saw Future in the castle and asked.

Future shook her head and said, "The situation is stable, and the wounds have healed completely. But I'm not sure when he will wake up. It all depends on his mind. After all, he has taken too much liquid. If I were to take that much, I would have exploded and died. Only he can bear it."

Wade sighed and said nothing. Henry's strength that day was really incredible. If he hadn't seen it with his own eyes, Wade wouldn't believe that someone could do that.

The more he took, the bigger price he would pay. Wade was very clear that it was lucky for Henry to make it through.

The sound of footsteps came from behind Wade. Wade knew who it was without even looking at it. He asked, "Felix, how's the outside now?"

"This is the information that I just got back from Arza.

Please read it." Felix threw a brown paper bag into Wade's hand.

With this world's most perfect intelligence system, Azra was also the eyes of Radiant Island.

Wade opened the brown envelope. Almost all the things in it were about Henry. The last battle on the island made Henry more famous. His story of fighting against hundreds of jets by himself had been wholly spread out. Especially the scene of Henry standing in the air. He couldn't hide it even if he wanted to.

This was a matter of both good and bad.

In terms of status, Henry's status had been strengthened again, but on a flip side, Henry's strength had already made people fearful. Henry's existence had broken the balance of the world!

There were too many people in this world who didn't want such a person to break the balance. Although they didn't do anything on the surface, no one knew what they would do secretly.

"By the way," Wade threw the brown envelope back to Felix and asked, "What did you say to sister-in-law?"

Hearing this question, Felix gave a wry smile and said, "What else can I say? I can only tell her the truth. Sister-in-law calls me almost every half an hour."

Wade shook his head and was about to speak when he heard a cry of surprise from Future.

"Hurry, Boss is awake!"

## Chapter 522

The computer in Future's hand could send her notifications at any time.

When Wade and others heard that Henry had woken up, they immediately ran to the lab.

In the lab, Henry slowly opened his eyes. He raised his arm and felt that his limbs were stiff.

Henry slowly moved his body and came down from the experimental table. As soon as he took a step, he felt a strong sense of weightlessness. Henry was shocked and suddenly stopped. He found that he had stepped several meters away from the table, which was seven or eight meters away from where he was now!

"What's going on?"

A strong doubt came to Henry's mind. Henry looked behind him in disbelief. "Every step I make is seven or eight meters. When did I become so fast?"

Henry's movements became more careful. He bent his legs and jumped lightly, which made Henry feel as light as a swan. In the past, he could only jump up dozens of centimetres, but now he could easily jump up two meters!

"This..."

Henry shook his head. He looked at the wall in front of him and punched out hard.

At the moment when Henry punched out, he clearly felt that there was a stream of airflow gushing out of his

abdomen and coming straight to his fist. Then it burst out from his fist and hit the wall in front of him.

The moment the Qi came into contact with the wall, a dent appeared on the wall.

This meant that Henry's casual attack had already contained the Qi!

"What the h\*ll is going on?" Henry's face was full of doubts. "Could it be that medicine has changed my body?"

Henry turned his head and looked at the white crystal in the lab. At this moment, this crystal was full of temptation to Henry. Henry had an urgent desire to touch it.

No! To be precise, it was the airflow in Henry's abdomen that wanted this crystal.

Henry shook his head. This was beyond his recognition. He could only ask Future what was going on.

As soon as Henry thought of Future, a burst of noise came from the door of the lab. Three people strode into the lab, Wade, Future, and Felix.

"Boss, you're awake!" Wade's face showed joy. Even if he knew that Henry was all right, they felt uneasy when Henry didn't wake up for a long time.

"Yeah." Henry nodded with a smile and said, "How long have I slept? I've slept for at least three days?"

"Three days?" Wade's face was full of strange expression. "Boss, you've slept for at least half a month!"

"Half a month?" Henry was shocked by Wade's words.

He didn't expect that he had slept for such a long time.

"Boss, what do you think? The flowers on the island are all yellow." When Future came over, she put two chips on Henry's neck. "Is there anything wrong with your body?"

"No, just..." Henry put his hand on his abdomen.

Looking at Henry's action, Future shook her head slightly at Henry.

Henry saw the response and did not say anything. He asked, "By the way, what's going on on the island now?"

"The people of all the major forces have left. Boss, you have shocked these people again this time," said Felix.

"Don't talk about them. Even for me was like having a dream. You were walking in the air. This is simply mindblowing!"

Henry smiled bitterly. "I don't know what will happen next. Where is Sylvia? Is she on the island?"

"No." Wade shook his head. "Sister-in-law had something to do at home, so went back first. I've already sent someone to inform sister-in-law."

As soon as Wade finished his words, his phone rang.

"Hello, um, okay, I got it. I'll inform the boss right away."

After a few words, Wade hung up the phone and then said to Henry, "Boss, sister-in-law is ready to take over as the new Master of the Su Family. She has been waiting for you to wake up. When the news of you waking up spread to the Su Family, she called. The ceremony of taking over as the new Master of the Su Family is set for the day after tomorrow."

"So fast?" Henry was a little surprised. He still wanted to

stay on the island for a few more days to figure out the condition of the airflow in his body.

"Boss, you don't know. Victor wanted sister-in-law to take over the family half a month ago, and he even sent out many invitations. Sister-in-law insisted on doing this only after you wake up. It's been a long time."

"Okay." Henry sighed. "Prepare a plane for me to return to China."

Wade went to prepare for Henry's return, and Felix also left the laboratory. This time, Sylvia would take over the Su Family. How could the island not prepare a significant gift for this kind of event?

As soon as Wade and Felix left, Future asked, "Boss, did you also feel it?"

"Yes." Henry nodded and put his hand on his abdomen again. "What's going on?"

Future shook her head and said, "I don't know either. I've been waiting for you to wake up. There is an airflow in your abdomen, which has the same energy composition as the white crystal. Let me show you."

She came to the big screen with Henry. Henry saw her fingers gently moving a few times across the screen, and then a picture of a human body appeared in front of Henry.

"Boss, look."

On the image in front of him, Henry saw the airflow in the abdomen of the human-shaped image at a glance, which was like a small whirlpool.

"This..." Henry opened his mouth but didn't speak. He

didn't know how to express his own thoughts now. Was there a whirlpool in his abdomen? And he didn't have any feelings about this whirlpool!

Future took a few chips from the side and stuck them to Henry's body. Then, another humanoid image appeared on the screen in front of him. The humanoid image was like Henry. When Henry made a particular action, the image would also make some moves. In the abdomen, the whirlpool airflow could be clearly seen.

Henry tried to take a deep breath. Through the video, he saw that at the same time when Henry took a deep breath, the whirlpool in his abdomen would spin at a breakneck speed. When Henry breathed smoothly, the whirlpool was also relatively stable.

Seeing this scene, Future's eyes suddenly lit up. She seemed to have some conjectures and immediately commanded Henry to do some actions, such as running, talking, holding his breath and so on.

Henry did these actions. Future stared at the screen in front of her, and her eyes widened. He could see that her breathing was a little rapid. Obviously, she had found something incredible.

"Hoo..." Henry took a deep breath and looked at Future. "What do you think? What's your discovery?"

"Boss." Looking at Henry, she said, "You seem to have two lives..."
