

Chapter 523

Future handed over the report of the newly emerged data to Henry. At the same time, she also showed Henry a photo of the human figure. In the image, Henry clearly saw that the airflow become a whirlpool and hidden in his abdomen was changing with his every movement and every breath. It sometimes rotated fast and sometimes slow.

The change of this whirlpool was exactly the same as Henry's heart. When Henry's heart contracted, the whirlpool would spin faster. When the heart expanded, the speed of the whirlpool's rotation would slow down.

The precise data showed that every change of this whirlpool was exactly the same as his heart!

"Boss, this kind of thing may sound very inconceivable, but in fact, this whirlpool seems to be taking the initiative to replace the heart work." Future looking at Henry and swallowed saliva. She could not believe the words she said, but the observation showed that this was true!

Hearing what she said, Henry was a little stunned. The sudden appearance of whirlpool in his body which took the initiative to work as his heart made him feel weird.

Future turned to Henry and asked, "Boss, do you feel like you're in pain?"

Henry shook his head. "No, on the contrary, I think this whirlpool makes me feel a sense of smoothness when I move."

"A sense of smoothness?" Future looked at Henry with a strange look. She walked to the side and opened the door of a lab. "Boss, go in. Use all your strength to run, punch, and jump. I want to test the maximum data of your current body."

Henry nodded and walked into the lab.

She closed the door and then said, "Boss, let's start."

One night passed quietly.

Wade's helicopter had been parked on the island and could take off at any time.

The next morning, Henry came out of the lab and changed into a clean and fresh sports clothes.

After a night, Henry had a thorough understanding of his current physical condition. The conclusion he came up with shocked him a little.

Compared with before, Henry's current physical strength had increased by leaps and bounds. His strength doubled, his jumping power and explosive power doubled, and his reaction speed was also five times faster than before. Even the strength of his internal organs and bones had increased by fifty to eighty percents. If Henry wanted to achieve these results by practising, he would need at least a few years to do it.

This was just Henry's improvement regarding his own functions, without counting the whirlpool inside his body.

The test results told Henry that the whirlpool would not have any effect on him. On the contrary, it could make him become more powerful. The Qi brought out of the whirlpool could form a significant lethality, which would improve Henry's speed to a new level. However, Henry was not clear about how to use the Qi. He was not someone who could use it by waving with a sword or use it to protect himself. Henry still could not figure out how to use it. He could only say that there was Qi in his attack, but he did not know how to use it.

However, even so, it was enough for Henry to be happy that somehow he had to take a step forward in this aspect. As for how to use it, he could explore it slowly.

After a night of training, Henry regained control of his body. He would not rush out for a few meters with a single move. The surge of strength made him lose control for a short time.

Henry got in the helicopter, and the helicopter took off from Radiant Island. Wade was the pilot. Felix and others did not follow Henry. There were still a lot of things waiting for them to deal with on the island.

Wade was on his way back to China, so went with Henry.

"Boss, I've asked someone to prepare the gift. It should be sent to sister-in-law tomorrow afternoon." Before getting on the helicopter, Felix said to Henry.

Henry nodded.

Tomorrow was the day when Sylvia would become the family head of the Su Family, which was definitely a big deal for Sylvia.

The helicopter shot up into the sky and left the island.

This time, Henry didn't need to transfer. All he needed to do was to fly directly to Yanjing City, China.

Wade was wearing a pair of sunglasses and holding a cigar in his mouth, leisurely sat on the pilot seat, playing the dynamic music.

"Boss, do you know what people are saying about you outside now?"

"I don't care what they say." Henry curled his lip. "I don't believe they can talk about me."

"Haha." Wade laughed loudly. "The news that you sacrificed the whole island for your wife has been spread everywhere, but no one indeed dares to say anything about you. After all, the power you showed that day was amazing."

"Amazing?" Henry laughed at himself. On that day, Henry still remembered how the mysterious man in black with just a snap of his fingers made him unable to resist. Henry woke up yesterday and thought about who the man was. Were they the people that the president of The King Region once mentioned?

Henry now didn't think that he was strong at all. He even felt that the title of the strongest man in the world was a kind of ridicule. The world was huge. There were many people better than him. There were too many extraordinary people that he couldn't get in touch with.

Henry lowered his head and looked through the window at the dark blue sea below the helicopter, which was full of mystery.

The exploration of this world by human beings was nothing more than

a drop in the bucket. The dark sea, the vast sky, and the so-called Land of Death were all unknown. No one knew what was there.

A colossal wave suddenly rose under Henry's helicopter. In the waves, Henry clearly saw that there was a wooden boat steadily sailing. No matter how fierce the waves were, they could not affect the wooden boat.

A man stood on the wooden boat, he was standing with his hands clasped behind his back, looking up at the helicopter.

When Henry saw the man on the wooden boat, the first feeling in his heart was that the man was looking at him.

"Let's land," Henry suddenly said.

"Ah?" Wade didn't understand why Henry made such a request.

"Let's land here," Henry said again.

Wade didn't ask any more questions and landed on the spot. When the helicopter was 20 meters away from the sea surface, Henry opened the door and jumped straight down, landing on the wooden boat.

When Henry fell down, there was a stream of Qi under his feet, which made him control the impact force caused by falling. It did not have any impact on this wooden boat.

The wooden boat floated steadily among the enormous waves, giving people a strange sense of stability.

Chapter 524

Henry and the man stood on both sides of the wooden boat, looking at each other.

Henry saw that the other side was wearing a linen robe and a bamboo hat on his head.

"The Conqueror, you're here." The voice of the other party was very calm, without any emotion.

The bamboo hat covered the man's cheek. Henry couldn't even tell whether the man was old or not. He couldn't recognize it from his voice, because the man didn't use his mouth to speak at all but was using ventriloquism.

"Are you waiting for me?" Henry smiled.

It seemed that since he began to get in touch with Qi, he often met these strange people.

"Yes." The man said, "I was waiting for you."

"What are you waiting for me for?" Henry was confused.

"Set the rules." The voice of the other party came. At this moment, the initially rolling waves suddenly became gentle.

"Rules?" Henry frowned.

"Half a month ago, you broke the rules. You shouldn't have used extraordinary power in front of ordinary people. But since you've just entered the Qi-controlling Realm, you can break the rules once."

The saying of the man made Henry shocked.

"Qi- controlling Realm? What does that mean?" Henry was full of doubts. "Does this so-called Qi-controlling Realm has something to do with Qi?"

Did it mean controlling the Qi in one's body?

"Well, The Conqueror, since you have already controlled your Qi, you

should know something. Catch this." The man took out a dark red token from his arms and threw it to Henry.

Henry reached out his hand. This token was a C-shaped, with the word "Hidden" on it.

"From today on, you are a member of the Recluse Association." The man in linen robe continued, "The Recluse Association has no rules. The only rule is that you can't show anything related to Qi in front of ordinary people, even once. Otherwise, next time, I won't just give you a simple verbal warning."

After the man finished speaking, there was no more nonsense. With a wave of his hand, waves suddenly raised on the surface of the sea. Huge waves rushed toward the wooden boat, aiming only at Henry's position. As for the man, there was not even a drop of water near him.

His move made Henry's eyes shrink. After the battle that day, Henry knew very well how much Qi could make a person stronger. It was definitely possible to use the Qi to control the sea, but it needed high proficiency. For Henry, it was absolutely impossible at the moment.

Henry took a deep breath, held the token in his hand, bent his legs, and then jumped into the helicopter directly. It was more than 20 meters high, but now it was just one Henry's leap.

When Henry jumped up, all the waves that rushed to the wooden boat dispersed.

The man looked up at the sky and murmured, "He has just entered the Qi-controlling Realm, but he has such a strong power. I hope that he could break through that shackle."

On the helicopter, Henry looked at the token in his hand.

Qi-controlling Realm, Recluse Association. The man had given him two important messages.

Henry had been thinking before that if the ancients used to use Qi, how should they distinguish the strength of the other party. After all, the Qi could not be judged by the appearance. Some well-built people might not be strong.

Today, he finally heard someone say something about it.

Also, it was no wonder that he had never heard of the Qi before. It turned out that such an organization specially hid it. It was the first time that Henry heard of the Recluse Association. If members of this organization were all masters who knew how to use Qi, then how terrible could this organization be?

Henry put away the token in his hand. He planned to investigate the Recluse Association when he had the chance. Only he could do this investigation. If he handed it to Wade and others, with the strength of the Recluse Association, they might get in trouble.

Seeing Henry holding a token without saying a word, Wade did not ask. He focused on driving the helicopter. Although the helicopter had been specially modified by Future, it still took a lot of time to fly to China.

After all, the speed of the helicopter was far less than that of those passenger planes, and it also needed to be refuelled halfway. Fortunately, the time on Radiant Island was later than that in China. Henry and Wade did not need to be in a hurry. Henry finally arrived at Yanjing at one o'clock in the morning.

It was so late, so Henry did not go to the Su Family. He just found a hotel to rest and planned to go to the Su Family tomorrow morning.

After Wade sent Henry over, he had something to do, so he left immediately.

The next morning, in the Su Family in Yanjing City.

The news that the Su Family was going to change the Master had spread very early. The date was set for today, and many people who had a good relationship with the Su Family had come to Yanjing.

When the sun appeared, many people had gathered in front of the Su Family gate to congratulate him.

Victor specially arranged for people to receive the guests, making sure they would not feel neglected.

Before dawn, Sylvia was sitting in front of the dresser, getting her hair and makeup done by five top makeup artists and choosing her

clothes.

"Is it necessary?" Looking through the mirror, Sylvia looked at Megan, who was standing behind her and asked with some embarrassment.

"Of course, Miss, we are changing the head of the family. It's the most important thing for the Su Family. Today, you are the protagonist. You must suppress everyone out there!" Megan nodded without hesitation and continued, "And Miss, don't forget that you are the wife of The Conqueror. Do you want to lose him to another woman? I heard that Yetta of the Nangong family liked Mr. Zhang when he was a child. She will come today. You can't be inferior to her."

When Sylvia heard the name of Yetta, she thought of an elegant figure. When she was in Yanjing City, she met Yetta once. At that time, Megan took her to a gathering of an ancient family.

Sylvia remembered that Yetta was a quiet and likeable woman.

For some reason, when Sylvia heard that other women would appear, she could not help but feel a sense of crisis. What if Henry suddenly fell in love with such a quiet woman?

The reason why Sylvia now lost her confidence in front of Henry was not because of his identity, but because she cared more and more about him. A woman in front of the person she cared about would always have some type of hesitation.

In front of the manor of Su Family, many luxurious cars came one after another.

A Benz S600 was parked in front of the manor of the Su Family, the father and son of the Jiang family got out of the car.

Chapter 525

Last time, in Jingcheng City, Henry directly destroyed Saul, so the Jiang family did not participate in the underground world meeting.

After such a long time, Saul almost recovered. Every day, he had been thinking of the scene of him getting injured, which made him feel extremely embarrassed.

He, the future heir of the Jiang family, was beaten by a son-in-law of the Su Family." Saul's friends knew about this and almost laughed out loud.

Moreover, this matter was spreading all over the Jiang family. Some people said that, with his current situation, he did not deserve to be the future master of the Jiang family. Every time Saul heard these words, he would clench his fists hard. He was eager to find a chance to avenge himself in front of everyone!

Saul chose this opportunity today to act.

Even if Sylvia took over as the Master of the Su Family today, how could the Su Family fight with him? He just wanted everyone to know that he, Saul Jiang, was not someone that everyone could provoke!

As soon as Saul got out of the car and was about to walk through the entrance of the Su Family's manor, he saw a taxi stop in front of the Su Family's mansion.

Saul looked at the taxi with interest, wondering who dared to take a cab here? Which well-known family had declined to such a point?

When the door of the taxi opened, and Henry came out of the taxi, Saul was unable to hold back his laughter. Then he shouted, "Tsk, tsk. I was wondering who had such courage to call a cab."

"Hey?" When Henry saw Saul, he asked curiously, "Did you recover so quickly?"

Last time, although Henry didn't use his full power, it should have taken

Saul a whole month to recover fully, but now only about 20 days had passed.

Hearing this, Saul's face changed. His injury had not completely healed yet. In order to heal completely, he should rest for ten more days. But since the last time, he couldn't calm down, and he couldn't rest peacefully. As long as he was resting, he would listen to someone talking about himself. This time, he didn't even have time to recover but came for revenge.

Saul's father looked at Henry coldly and snorted, "Junior, don't be too arrogant. Today, no one can protect you!"

Last time, the people from the Yue family insisted on protecting Henry, so his father did not do anything. But this time, his father was ready. As long as this person dared to say something arrogant to him, he would definitely teach him a lesson directly. Even if the people of the Yue family came, they would not say anything.

Hearing Saul father's words, Henry curled his lips and ignored him. If Saul's father provoked him like this half a month ago, Henry would slap him in the face.

However, this battle on the island and the Recluse Association and the appearance of the mysterious man in black had broadened Henry's horizons. He was no longer concerned about trivial matters like this.

Moreover, today was the day when Sylvia would inherit the family crown, so Henry didn't want to cause any trouble. He didn't say anything to the father and son of the Jiang family and went straight to the entrance of the manor.

When the father and son of the Jiang family saw Henry like this, they naturally thought that Henry was admitting defeat. They disdainfully glanced at Henry and also strode into the manor.

At this moment, there were already a lot of people in the Su Family, but there were not many well-known prominent families.

The guests gathered together to discuss something.

"Have you heard of that matter?"

"Of course I've heard about it."

"I haven't told you which one and you've already heard of it?"

"Nonsense, it must be about the matter of Radiant Island. It's said that one of the ten kings of Radiant Island betrayed and brought hundreds of fighter jets to sink Radiant Island, but The Conqueror destroyed all the jets alone. It's too horrible!"

Some exaggerated rumours were even magnified.

During the battle on Radiant Island, although Henry reversed the situation on his own, it was exaggerated to say that he had destroyed hundreds of fighter jets alone. Of course, he did destroy more than 100 still.

"Do you think that one of the ten kings of Radiant Island, with such a high status, would suddenly betray Radiant Island?" someone asked curiously.

"What else could it be? Such a drama!" The man crossed his arms in front of his chest and pretended to know everything.

His words immediately attracted the attention of countless people, including Henry, who also looked over here.

When the man saw that his words had attracted so many people's attention, he became the main character in an instant. He was very proud and deliberately coughed dryly. Then he whispered, "I'm telling you, his battle on the island, the family head of my cousin's second younger brother, my third sister-in-law, all seen with their own eyes. You should know that the owner of the king's ring who betrayed the island was Cesia, who had the Colourful ring and was known as a seductive witch! She is an absolute beauty. It's not too much to say that she is like a fairy. She betrayed the island because The Conqueror found a wife!"

"No way!" Some people didn't believe it. In the big battle on the island, hundreds of fighter jets were sent out. Such a big scene, was it just because of a woman's jealousy?

"Why not?" The man curled his lips. When he saw that someone was

questioning him, he was a little angry. "I'm telling you, before the battle, Cesia told The Conqueror that if he were willing to give up his wife, she would make the jets retreat. Otherwise, she would kill all the people on the island!"

"Damn it! It's too exaggerated!"

"Jealous women are terrifying!"

"To kill all the people on the island? Those people who go to the island are the leaders of all the major forces. If they were all killed, the whole underground world would be in chaos. That seductive witch did play a big game."

"What about The Conqueror? What did The Conqueror say?" Someone couldn't wait to ask.

"The Conqueror, he deserves to be The Conqueror. He said that the life and death of everyone on the island had nothing to do with him. He will never give up the people he loves!"

"What the f*ck, domineering!" One of them couldn't help but say on the spot.

But some people held different views. "What's so domineering? Obviously, it's selfish. For a woman, he was willing to risk the lives of thousands of people on the whole island. Such a person doesn't deserve to be a king!"

Among these people who gathered together to chat, everyone had different opinions. Some believed that the behaviour of The Conqueror was the same as the behaviour of ordinary men. He dared to love and hate, and he could do whatever he wanted to do.

Some people also thought that the behaviour of The Conqueror was too selfish. Since he was called The Conqueror, he should have made a choice like a true king. He could not risk losing the whole island.

"In my opinion, no matter whether he is a real man or a selfish man, from a woman's point of view, he is a man worthy of being entrusted for the whole life." A faint voice sounded, and Yetta also came to the crowd without being noticed.
