

Chapter 526

As Yetta was the beloved daughter of the Nangong family, her every move in Yanjing attracted much attention. Similarly, Yetta was also a talented woman. In terms of personal charm, she was also very popular. As soon as she made a sound, she instantly attracted many people's attention.

The people who were talking looked at Yetta and Yetta's eyes were on Henry, who was in the crowd.

"Girl, don't talk like that." Henry rolled his eyes, swung his sleeves and walked to the side.

Yetta looked at Henry's expression and stamped her foot with hatred. At the same time, she was wondering which woman would make him say what he said while facing the enemy.

Those who were talking looked at Yetta and then at Henry who was walking away.

"Who is this? He doesn't respect the Nangong family's daughter at all."

"Who knows?"

When Henry came to the main hall, he saw that it was already covered with red decorations, and the faces of Su Family also showed a happy look.

Henry bypassed the main hall and came to the back of the main hall where there was a room, and Sylvia was in it.

When Henry first entered the Su Family's manor, he had already found out where Sylvia was. At this time, he didn't have any extra consideration and directly pushed the door open and walked in.

Inside the room, Sylvia was still sitting in front of the dressing table. Her beautiful hair was smooth and shiny. A hollow gold hairpin was inserted into her hair obliquely. She wore a lotus-green fairy-like dress, and a golden censer hung on her waist. With every small movement of

Sylvia, the tiny golden bead in the censer would collide with the wall of censer, making a ringing sound. She was like a fairy who had fallen to the mortal world, aloof and refined.

Her face was painted with light makeup, and her eyebrows were curved, showing a strange charm.

The door of the dressing room was suddenly pushed open.

Henry walked in from outside the door.

"Wow, honey, you are too beautiful!" As soon as Henry entered the door, he shouted loudly. He looked at the woman's face reflected in the mirror, and his eyes were slightly dull.

The moment Sylvia heard Henry's voice, her eyes were filled with joy, and even her body trembled slightly. For a long time, she missed Henry too much, but her character did not let her show that.

"You're back. Have you recovered from your injuries?" Sylvia tried to make her voice sound calm.

"Yeah." Henry nodded vigorously and rushed to Sylvia in a few steps. "Honey, let me see. I missed you so much!"

Megan was standing behind Sylvia immediately bowed to Henry as soon as she saw him. "Greeting, Mr. Zhang."

In fact, Megan still could not believe that this man in front of her was actually the famous The Conqueror! All the people in the underground world were curious about him. Megan also fantasized about the image of The Conqueror many times, such as tall, fierce and strong protector. Some people even said that the Conqueror had four hands, but Megan did not really believe in that. After all, The Conqueror was too famous.

But Megan had never thought that The Conqueror was just such an ordinary person.

Sylvia looked at Henry, who was jumping up and down. She rolled her eyes and said, "Are you really The Conqueror? You don't look like him at all."

"Tsk." Henry curled his lips. "In front of my wife, I'm not a king. Honey,

you're my queen, hehe."

Henry giggled at Sylvia.

Sylvia looked at Henry's silly smile, and her heart was full of sweetness.

This was her man, the one who could make people kneel down and shout "My Lord" when he was domineering, the one who could fly in the air and destroy hundreds of fighter jets by himself, and the one who created countless legends in the underground world. No matter how powerful he was, he was still so normal in front of his family members.

"Well, don't be loquacious," Sylvia stood up from the table and took Henry's hand on her own initiative. "Today, I will take over as the Master of the Su Family. If your island didn't prepare a proper gift, I have to go to your island to make trouble."

"Honey, don't worry." Henry patted his chest and said, "The gift will absolutely be worthy of this opportunity."

Sylvia covered her mouth with her hand and smiled gently. She didn't actually want any gift. It was just a woman acting coquettishly at her husband.

At eleven o'clock in the morning, Sylvia walked out of the dressing room.

At this moment, many guests had arrived.

The father and son of the Jiang family looked at these people who came to the Su Family disdainfully and put on their attitude at the same time. Now that they came to the Su Family, except for the Nangong family, they didn't care about the others at all. After they spoke out the name of the Jiang family, many people immediately came up to show their respects.

The Jiang family sat in the main hall of the Su Family. Although they did not sit in the main seat, judging from their posture at this moment, they seemed to be the masters of this place.

Victor stood in front of the main hall of the Su Family and welcomed the guests.

"Master Su, congratulations."

"Master Su, congratulations."

"Haha, I'm really jealous of you. You have a descendant who can inherit the legacy. Unlike the disappointing things in our family, none of them is responsible enough."

One person after another entered the Su Family's manor and came to the main hall to congratulate Victor.

At this moment, Victor was grinning from ear to ear. The one who was about to take over as the Master of the Su Family was the wife of the owner of Radiant Island. The Su Family had risen from a well-known small family in China to a top family in the whole underground world. Victor could wake up from his sleep with a smile.

Before that, Victor was worried whether his niece could attract the attention of The Conqueror. He was afraid that The Conqueror was just playing with her. But when Megan brought back the news of the battle on the island, she completely dispelled Victor's worries. The Conqueror was absolutely in love with his niece. In this way, who would dare to offend the Su Family in the future?

As time went by, more and more guests came to the Su Family. There were only 20 minutes left before Sylvia's ceremony of taking over as the Master of the family began.

This time, there were not only people from the major ancient kungfu family but also from the official families. After all, the Su Family had a high position in Yanjing, and the parking lot in the manor of Su Family had been filled with luxury cars. The rest of the vehicles could only be parked outside the Su Family's property.

When it was eleven fifteen at noon, the hall of Su Family was already full.

Victor came to the hall and sat on the main seat.

The people who were chatting gradually stopped talking and looked at the person sitting in the main seat.

Eight servants of the Su Family stood on both sides of the main seat,

with trays in their hands. The trays were covered with red silk. There was a big drum in front of the main hall of the Su Family. At this moment, the drum was sounded.
