

Chapter 538

The young man saw that Henry had already reached the Qi-controlling Realm, so he did not doubt Henry's words. He said, "Brother, you have the Spiritual Stone, and we know how to use Spiritual Stones, so we can cooperate."

"Oh? How?" Henry was really interested this time.

"It's very simple." The young man looked at Henry seriously. "We will tell you how to use the Spiritual Stones. And you will share it with us!"

"Pfft." Henry burst out laughing.

"What are you laughing at?" The young woman puffed out her mouth and glared at Henry.

Henry waved his hand. "Is this a deal? To put it bluntly, I can take out this Spiritual Stone. Wherever I go, I can find a partner. Everyone can tell me how to use it, right?"

After Henry finished speaking, he looked at the young man. He thought that the young man would defend himself, but he didn't expect that the young man nodded directly.

"Yes, but brother, it's much better for you to work with us than to look for other clans."

"Oh?" Henry grinned. "Why?"

"Because we are equally weak." The young man laughed at himself. "Our family has also declined. Brother, to tell you the truth, in our family, except for the patriarch, no one can achieve the Qi-controlling Realm. But the other clans are different. For a big clan like the Li family of the Longxi, there are at least a hundred masters of Qi-controlling Realm in their clan. If you take the Spiritual Stones to them, I'm sure you won't get what you want."

It was the Li family from the Longxi again!

Henry was still thinking just now, how powerful the Li family was, it was able to make the 4th Chieftain show up in such a small village.

But now, the young man in front of him just casually mentioned this clan. It could be seen that this clan was so powerful that it

was deep-rooted in their hearts!

"Brother, you can consider my suggestion." The young man looked at Henry with keen eyes.

From his fiery eyes, Henry could see how eager he was to get the Spiritual Stone in his hand.

"I'll think about it. Give me your phone number." Henry patted the front of his shirt and got up.

The young man quickly took out a business card from his pocket and handed it to Henry.

Henry looked at him and said, "Director of the PS Group of Mountain City?"

The young man smiled awkwardly. He also knew that the business card didn't match with what he was showing now. Not to mention anything else, he had never seen a group's director who had been staying in a motel for 60 yuan per night.

"Okay, I will contact you after thinking over this matter." Henry put away his business card and strode away.

After Henry left, the young man and the young woman looked away from him.

"Senior brother, do you think he will agree?" The young woman asked with a worried face.

"I don't know." The young man shook his head. "Now, I can only hope that he will agree. Otherwise, I'm afraid that we won't be qualified for the clan ranking this time."

Henry left the barbecue restaurant. He had to go to Mountain City. After all, he couldn't get in touch with any other clans except for this one. It was the first time that Henry had heard of a crystal.

Henry had a feeling that once he figured out this thing, he could also figure out the origin of the Fire Crystals!

Compared with the pure energy inside the crystal, the energy inside the Fire Crystal was more irritable.

When Henry returned to the hospital, it was already late at night. Sylvia had already fallen asleep beside the hospital bed.

Henry knew that Sylvia had been exhausted these two days. She had not had a good rest since she took over as the new

Master of the Su Family.

"Strength is still important. Sometimes you don't want to make trouble, but trouble will come to you." Henry took a towel and covered Sylvia with it. He didn't disturb Sylvia's rest.

After Henry came to the hospital to have a look, he did not stay long. There were still a lot of things waiting for him to do.

Henry hadn't figured out the background of James Wong, who came together with the Li family and the other two people to the Family Lin's party last time. The reason why James could do that at that time was definitely not as simple as displaying his strength to him. A force that dared to provoke Radiant Island was not simple.

As for the man in black on the island, they also wanted Fire Crystals. Henry didn't know who they were. They could make Cesia willing to serve them, so the power behind them couldn't be underestimated.

These matters had to be checked by Henry. Many things were placed in front of him, and Henry had never met them. Clans, the Recluse Association, every one of them made Henry feel intense pressure. At the same time, it also aroused Henry's fighting spirit.

In those days, he had grown from a nobody who couldn't provide food and clothing to an owner of Radiant Island. It proved that he was definitely not a person who would easily admit defeat!

Of course, these things were not what Henry needed to do immediately. What he needed to do now was to find out the foreman who secretly asked people to start the construction work. This man ran away on the second day after the work had begun. Someone must have instructed him. The foreman must also know the existence of the clan. Henry had to figure out why the person behind this was trying to frame the Family Lin.

Henry had already had some guesses about this matter. At that time, the Zhao family and the Family Lin fought for that piece of land. At the most critical moment, the Zhao family suddenly gave up. This was not because of the Zhao family's good intentions.

Glancing at the moon hanging high in the night sky, Henry made a phone call and strode out.

As Henry's phone rang, a huge intelligence network was starting to operate slowly. A few minutes later, an address was sent to Henry's mobile phone.

Henry looked at the address on his mobile phone. It was a bar in Luohe City.

The address indicated that it was precisely where the foreman was now.

The information network of Radiant Island was enough to cover the whole world. It was easy to find an ordinary person.

Tonight was bound to be a sleepless night for Henry.

He took a taxi and went straight to Luohe city.

Luohe city was a small city. In the past two years, because of the rapid development of Yinzhou City, there were fewer and fewer people in Luohe city.

Small cities had the disadvantage of small towns but also had benefits. Luohe city was a very livable city. In Du Hai, an international city, people might still be working at 10 p.m. Yet, most people living in Luohe city maybe had been lying on comfortable beds or sitting on barbecue stalls, which led to Luohe city's bizarre industrial chain. It was a small city with few residents, but the entertainment industry was prevalent – the most entertainment projects in Luohe city connected to bars and drinking.

When Henry arrived at Luohe city, it was already one o'clock at night. It was obviously not the weekend, but the bar street of Luohe city was also full of people.

The sound of clinking cups and shouting could be heard all the time.
