

Chapter 574

"Arguing? What's going on?" Henry was shocked. They had just arrived, why did they start arguing?

"I don't know. Boss, you should go and have a look." Alex shook his head like a rattle drum and pointed to a direction for Henry.

Henry walked along the place Alex pointed at. Before he could see Future with the Third patriarch of the Tang family, he heard a quarrel.

"It's so stupid!" The Third patriarch of the Tang clan's voice rang out. "Such a good material and a good position. How can you arrange such a simple thing? It's a waste!"

"Old man, talk nicely with me. How can it be called a waste? Your stuff looks exquisite, but it is troublesome to use. When the enemy comes, will you come and shoot the crossbow arrows?" Future didn't hesitate to talk back, and her words were not polite at all.

"Look at this again. What's this? With some slight improvements, it could exert at least three times its power. In the end, it's just a waste!"

"Haha, old man, don't pretend. You're no better than me. It can be controlled from a kilometre away, normally, it can fire five times at once. But according to your saying, if it can launch once, I will admit you are right!"

"Come on, little girl, look at this again..."

Henry heard the quarrel and suddenly stopped. He thought it was something serious, but in the end, it turned out just to be like this. Henry had already thought of this.

Future and the Third patriarch of the Tang clan were both very stubborn. Only a person with this type of personality could make some achievements in the field of scientific research.

Future specializes in technology, and the Third patriarch of the Tang clan would mainly focus on the precision of the instruments. If they got together, they would fight against each other. Such a quarrel was inevitable, and it was a good thing because only in this way could both of them see each other's lack of research and could make up for it.

Henry did not look at the two people again but went back to his residence. Everything was arranged by Peze. As for Future and the Third patriarch, he let them quarrel with each other. The fiercer the quarrel, the better.

Most of the kings of Radiant Island were out of the island. Only Peze and Alex were often on Radiant Island. And Future... Wherever there was scientific research, Future would be there.

When the people of the Tang clan came to the island, they had to adapt to the life on the island slowly, and the people on the island had to adapt to the existence of the Tang clan gradually. This process was slow. Even Henry, the Conqueror could not take charge of all this.

Henry had always thought that they had to rely on each other to get along with each other and could not force each other. As the owner of Radiant Island, he had never asked the people on the island to maintain harmony. He only set rules that they could not fight on the island. If anyone wanted to fight to the death, it was acceptable to go outside the island, and no one would care.

However, for such a long time, there were only some small frictions between the people living on the island, but there had never been any big dispute. Because everyone was very clear that what they wanted was to come to this island, not to fight against each other. This was because the owner of this island was the most powerful man in the world!

After leaving all the things to Peze, Henry went back to his room and fell asleep. During the past few days while he was in the valley, Henry did not have a good rest. On the first day, the lotus flower above his head prevented him from sleeping for a whole night, and it made him extremely tired. The next day, he was tied with chains and listened to the roars for an entire night. Now that everything had been settled, he could finally rest.

Henry had slept for more than ten hours. When Henry was in a deep sleep, an invisible lotus floated above his head. The lotus was emitting a layer of Qi curtain, which covered Henry.

If someone was to attack Henry with a long-range weapon now, the Qi curtain that enveloped Henry's body could protect him. If this curtain reached a certain degree, Henry would not be afraid of bullets even if he was asleep.

When Henry woke up, he found that there was no one around. The guards who were guarding the castle had also disappeared, which made Henry puzzled.

"Boss, you're awake." Peze appeared at a corner of the corridor.

"What's going on?" Henry glanced around the corridor and asked.

"I retreated everyone." Peze knew what Henry was referring to, so he

replied.

"Retreat? Where did they go?" Henry asked in confusion.

Peze only answered with two words. "Qi training."

"Qi training!" Henry's eyes widened all of a sudden.

After walking out of the castle, Henry saw many figures in the open space in front of the castle, including people from Radiant Island and the Tang clan. They sat cross-legged in the open space in front of the castle.

"The patriarch of the Tang family said that when he uses the Energy Emitting Formation here, it could cover 60 percent of the entire island. With this place as the centre, the Qi could be spread around. Everyone is here to practice Qi. The Tang clan has also provided a simple method of Qi training." Peze explained to Henry.

Henry nodded. Initially, he wanted to take the initiative to mention this matter to the patriarch after resting. Still, he didn't expect that the patriarch had already taken the initiative to do it. It seemed that the patriarch had approved of the island.

"Attention, you need to concentrate and sense the flow of Qi. The Qi is mysterious. Everyone's telepathic connection with Qi is completely different. Be careful, the breathing I'm talking about should not be fast nor slow. The Qi in the Spiritual Stone is being released through the Energy Emitting Formation. The air is full of it. If you make the Qi remain in your body, you'll get one more benefit. Even if you can't control the Qi, you can also strengthen your body!"

The voice of the patriarch sounded so clear that everyone sitting here could hear it clearly.

Henry saw that Alex was also sitting cross-legged, looking like a student.

"Patriarch, thank you for your hard work." Henry walked to the patriarch and said.

"Young man, you're awake." The patriarch smiled at Henry.

Henry nodded and said, "Patriarch, it seems that you are quite satisfied with us."

"Young man, if it weren't for you, our Tang clan would have disappeared," the patriarch said. For the patriarch, he was already delighted with the current situation, and even the people of the Tang clan were fully satisfied.

The island was beautiful and surrounded by the sea. It was a perfect

choice for the clan to live.

The patriarch was also a reasonable person. He took the initiative to train the people on the island how to use the Qi even without Henry mentioning it.

Chapter 575

The patriarch and Henry chatted for a while, and they let the crowd sense the Qi.

Henry saw that everyone was immersed in feeling the Qi, so he did not disturb them. He was in the Qi-controlling Realm, so he knew very well how significant the Qi influence was. Once a person could learn how to use it, the effect on his body and strength would be unimaginable.

Henry glanced around in the crowd, but he didn't see Future, so he asked Peze.

When he heard Henry mention Future, he smiled bitterly. "That girl is still quarrelling with that man. She is in her lab."

Henry walked to the laboratory. If a person wanted to enter Future's lab, he had to pass at least ten rounds of identifications. If he made more than three mistakes, countless laser beams would appear and cut him into pieces.

Coming to the laboratory, Henry saw Future sitting in front of a pile of instruments thought the wall made of glass. The Third patriarch of the Tang clan was also in the lab.

The glass door opened, and Future looked up. "Boss, you're here."

After that, Future continued with her research.

As for the Third patriarch, he did not even look at Henry. Instead, he kept his head down and was trying to figure out the things in his hand.

Henry had no contact with the Third patriarch of the Tang clan, but he knew what kind of character he probably was. If he were in the academic field, he would be a stubborn old man. He only cared about his own things. The scientists were stubborn, and the Third patriarch of the Tang clan was also a kind of scientist.

"Old man, I've figured it out. It's so simple. " Future picked up a mould casually and threw it in front of the Third patriarch.

Henry noticed that when the Third patriarch saw the mould Future threw to him, there was a hint of amazement in his eyes, but he still refused to admit defeat. "Little girl, I thought you were very capable. As a result, this is all you can do. Check this out."

When the Third patriarch spoke, he also threw a mould to Future.

When Future saw the mould thrown by the Third patriarch, she immediately went silent, and her eyes lit up. After a long while, she

said, "Old thing, you are just so so."

Henry looked at the two of them and covered his head. Both obviously approved each other's level, but both of them refused to admit defeat.

"Future, if you are done with your work, I have something to ask you."

Henry said to Future and walked out of the lab.

About ten minutes later, Future came out of the lab. When Henry was about to speak, she said in advance, "Boss, I know what you want to ask. I've already checked it out."

Future handed a document to Henry.

Henry glanced at it and saw the three words "Energy Emitting Formation" written on the top of the document.

He looked at the dense data in the document and felt a headache.

"What do you mean?"

"It's similar to a magnetic field." Future lazily stretched and said, "The stone of Energy Emitting Formation has an ordinary composition, which is similar to the most common kind of rocks, but it forms a strange magnetic field. This kind of magnetic field has a strong decomposition power, but it can't cause harm to the human body. It only affects the energy body. In other words, if were you to stand in the Energy Emitting Formation, even the impact of the ordinary bomb couldn't affect you. The so-called Energy Emitting Formation can also release the energy inside the Spiritual Stone and merge it into the air particles so that it can be absorbed."

"How did it do that?" Henry was confused. How could an ordinary stone produce such a decomposed power?

She shook her head, and there was a rare look of doubt on her face. "I don't know either. Unless I can break the Energy Emitting Formation and study it, I can't realize why this stone can behave like that."

Henry thought for a moment and asked, "Can you simulate this kind of magnetic field?"

Future nodded and said, "It can be simulated. Boss, do you want to try on Fire Crystal?"

"Yes." Henry snapped his fingers. There was no need for him to say anything. Future had already guessed what he was thinking about.

It could be seen that her eyes were lit up. "Boss, I knew it! When are you going to do the experiment?"

"How long will it take for you to simulate this kind of magnetic field?" Henry asked.

"Ten minutes!" Future said firmly.

"Ten minutes then."

Henry put on loose shorts and took off his shirt. All kinds of instruments were inserted in his body so that Future could observe the changes in Henry's body.

They were back to the lab. In the lab, there was a mill-sized porcelain disk. Future made this disk in order to simulate the magnetic field the similar way the Energy Emitting Formation did. Porcelain was easier to control than the stone.

A piece of red crystal, which was as big as an adult's fist, was placed on the top of this disk. Henry sat quietly three meters away from the disk.

This red crystal was the Fire Crystal!

There had been rumours that the last drawing design of the Fire Crystal was in the hand of the Island Owner of Radiant Island, the king, The Conqueror. However, people did not know that the so-called Fire Crystal drawing design was nothing more than Henry's own creation. He had made so many designs and used all kinds of methods to send them to all the countries. He did not want to see any other countries want to use the Fire Crystals again.

There was no drawing design for the Fire Crystal. This crystal was found in the deep sea by Henry. It was full of mystery.

At this moment, the Fire Crystal was placed within this simple Energy Emitting Formation. Only ten seconds later, Henry clearly saw that there was some redness in the air.

"Boss, your body temperature is rising, and it reached to 38.5 degrees. Do you feel any discomfort?" Future's voice came to the lab through the microphone.

Henry shook his head slightly. "No."

Generally speaking, 38.5 degrees was already a high temperature for the human body, and it would make people feel dizzy and powerless, but it had no effect on Henry.

Henry breathed slowly. Every time he breathed in, he felt a little hot and dry.

"Boss, your body temperature is close to 40 degrees. If you feel uncomfortable, tell me immediately!" Future spoke again, and she became more worried.

Henry nodded and did not speak. He continued to breathe.

After several consecutive cycles of breathing, a huge air current suddenly burst out from Henry's abdomen.

Through the observation device, Future could see that the whirlpool in Henry's abdomen was spinning rapidly at this moment. A stream of airflow was rushing through his whole body, and then a protective cover was formed on the surface of Henry's body. On the observation device, the whirlpool was white.

On the outside, the airflow of the Fire Crystal was red. The red airflow and the white airflow touched Henry's body, and then... merged!

Chapter 576

Future kept looking at the screen.

When the white and red airflows gradually merged, the airflow returned into Henry's body. At the same time, a stream of white airflow was separated from the merged airflow and then it was absorbed again.

Nobody knew how many times this process was repeated. It could be seen that with every absorption, the white whirlpool in Henry's abdomen would become redder. This process was slow, but in fact, in the blink of an eye, the airflows merged and separated. Such a scene seemed to carry some magical power. The merging of the airflows was like the most beautiful picture, which made Future unconsciously immersed in it.

"Clap!"

A crisp sound snapped Future out of her thoughts.

Future suddenly came to her sense and quickly looked at another data map. On the data map, Henry's body temperature was close to 45°C! This was absolutely a temperature that could put people in danger, but Henry was not affected at all. He was still sitting cross-legged and breathing steadily.

The crisp sound just now came from the ceramic disk in front of Henry. This was a simple way of simulating Energy Emitting Formation made by Future. After holding on for a few minutes, it completed its mission and broke apart.

At this moment, half of the whirlpool in Henry's abdomen had turned red, and the other half was white.

After Henry took another few breaths, the temperature of his body dropped sharply and soon returned to normal. The Fire Crystal no longer emitted energy, and the redness in the air also disappeared completely.

"Boss, you can come out now." Future said to the microphone, and then he looked at the display screen with a complicated expression.

Henry slowly spat out a mouthful of foul air and walked out of the laboratory. When he was absorbing the Fire Crystal's internal Qi, he had no other feelings except for hotness and dryness.

"Are there any changes?" Henry asked as soon as he came out.

"No." After thinking for a while, Future didn't tell him about the changes

in his body. The red airflow emitted from the Fire Crystal gave Future a bad feeling. In terms of the situation just now, it was better to say that two kinds of gas were blending together. However, if she wanted to be more precise, it was more like an invasion of the red airflow. The white airflow itself tried to resist the red airflow, but it was forced to be merged with the red.

"Boss, this Fire Crystal should have nothing to do with Spiritual Stones. Let's not bother about it for the time being," she said. She kept the Fire Crystal and did not plan to let Henry come into contact with it until she fully understood what it was.

"Okay." Henry nodded and didn't think much about it.

When he was absorbing the Qi from Fire Crystal, he did not feel any stronger. He just regarded it as ordinary energy.

At this moment, a fishing boat was floating on the surface of the sea around 3,700 miles from Radiant Island.

The fishing boat dropped a rope into the sea. The rope stretched to a depth of 9,000 meters. This depth was something that most instruments in the world could not reach. But now, there was a person wearing a simple protective suit moving under the sea.

The man held an instrument and continued to explore the bottom of the sea. There was no living creature around him. Even the deep-sea fish would not swim around him. The surging seawater did not affect him at all. There was an invisible wall of air that separated him from the turbulence.

The man lifted a stone, swept away the silt on the rock, and then squeezed it hard. The surface of the stone fell off, revealing a piece of red crystal. It was a Fire Crystal! It was a three-centimetre-cubic-shaped stone.

After getting the Fire Crystal, the man pulled the rope on his body, and then the rope rose up at a breakneck speed.

Ten minutes later, the man emerged from the water.

"How's it going? Did you get it?" A man on the fishing boat asked nervously.

"I did." The person emerged from the water and threw away the Fire Crystal casually.

The man on the fishing boat nervously caught the Fire Crystal and held it in his hand. It could be seen that he was trembling. He excitedly looked at the crystal in his hand and murmured, "I didn't expect. I didn't expect that the fragments of the ancient demon recorded in the

ancient books really existed! In this world, it really exists this kind of thing!"

"All right, let's go. This thing is a hot potato. If the group of people from Li family from China knew about it, they would definitely come to us immediately. We are no match for them now!" The man who was in the sea quickly climbed up the fishing boat. It was absolutely shocking that he could withstand the water pressure of 9,000 meters under the sea without much protection.

The water pressure at 9,000 metres under the sea was equivalent to a high barometric pressure that could even crush a tank instantly! It could be seen that this person was extremely powerful.

The fishing boat quickly sailed away.

Being far away from Radiant Island, it was evident that people from the island could not monitor what had happened here.

Future carefully stored the Fire Crystal and continue her research with the Third patriarch of the Tang clan.

Henry returned to the castle and sat cross-legged with everyone else, feeling the Qi from the Formation.

In the past two days, Henry sat cross-legged in front of the castle every day, but he didn't get much. In the past few days, some talented people had obviously felt the existence of Qi. Henry found that he had reached the Qi-controlling Realm, but he couldn't control his Qi to do anything.

"Could it be that my talent is not enough?" Henry asked himself in his heart. Although he had never agreed with the saying that talent was important, his guess at this time still made him feel uncomfortable.

Henry stood up from the ground. Since he didn't feel anything, he didn't intend to keep his attention on it. If the traditional method was useless, Henry planned to use easier methods to improve the Qi in his body, such as directly drinking the liquid.

Of course, Henry would not use this method immediately. He was very clear that it was not a good thing to be strong and fast instantly. Everyone's muscles and nerves had a limit. Once they went beyond this limit, there would be an unexpected consequence. He had to consolidate it more before strengthening himself. This process needed time.

During the past few days, Radiant Island had a good relationship with the Tang clan, which made Henry completely relieved and planned to leave.

A cruise ship slowly arrived at Radiant Island. A young man stepped

down from the cruise ship, with a respectful look on his face, and went to the island.

The young man held a wooden box, in which there was a piece of broken leaf.

"This is Mr. Peze's token. I want to see him!" The young man said to the guards on the island.

Chapter 577

In the castle in the centre of Radiant Island.

Peze was sitting in a large leather chair. A young man in black stood respectfully in front of him.

Peze was holding a wooden box with a wilted leaf.

He looked at the wilted leaf quietly. After a few minutes, he raised his head and looked at the young man in black. "Who is the owner of this wilted leaf?"

"Mr. Peze, the owner of this leaf is the master of my family." The young man in black said respectfully.

"Is your lord's last name Zhao?" asked Peze.

The young man in black nodded. "Yes."

"That's right." Peze took a deep breath. This wilted leaf was a gift from him many years ago. He thought that he would never see it again in this life. Who would have thought that he would see this wilted leaf close to the end of his life? Thinking of his life many years ago, Peze smiled bitterly. At that time, he was running around and had nothing to rely on.

Peze closed the wooden box and put it away. Then he said, "Tell me, why did your lord ask you to come here?"

"My lord wants to kill one person. That person is on good terms with Radiant island, so he specially asked me to ask for Mr. Peze's favour." The young man in black said.

"Oh?" Peze raised his eyebrows. "Whose life?"

"Master of the Su Family in Yanjing!" The young man in black said firmly.

Peze's face changed. He knew very well who the Master of the Su Family in Yanjing was.

"Do you want to kill the Master of the Su Family in Yanjing?" Peze confirmed again and clenched his fists at the same time. Although the leaf was his token, he would not hesitate to choose his loyalty to the island over this token. Even if such a choice got him killed, he would not care.

"Yes!" The young man in black nodded vigorously. Then he took out a photo and handed it to Peze with both hands.

At the moment when he saw this photo, he suddenly laughed.

"Hahaha! Hahaha!"

"Mr. Peze?" The young man looked at him with a puzzled face. He didn't understand why Peze suddenly made such a reaction.

Peze' eyes suddenly narrowed. He looked at the young man in black and asked, "I want to ask you. Did the owner of this leaf directly send you to come here? Was there anyone else in between?"

Under the gaze of Peze, the young man in black subconsciously took two steps back. He felt chills all over his body and could not help but shiver. "Mr.. Mr. Peze, there is no one else in between."

Obviously, the young man in black was not confident enough, because this leaf was a gift from President Zhao's father, and President Zhao gave it to him. So President Zhao was in the middle.

Hearing this, Peze nodded and smiled. "Do you know? I can kill you if you lie to me. But for the sake of the leaf's owner, I will spare your life. Get out of here!"

When Peze spoke, a powerful momentum pressed toward the young man in black.

The young man in black was shocked. "Mr. Peze, I don't understand."

"You don't understand?" Peze stood up from his seat, picked up the picture handed over by the young man in black, and questioned, "Do you know who the person in the photo is?"

As soon as he took a step forward, the young man in black took two steps back.

"The person in the photo is none other than the master of the Su Family of Yanjing..." Before the young man in black could finish his words, he was interrupted by Peze.

"Master of the Su Family?" Peze sneered. "The man in the photo is named Henry Zhang. Have you heard of him?"

"I've never heard of him." The young man in black shook his head.

He asked again, "Have you ever heard of the Conqueror? The Lord of Radiant Island?"

The Conqueror!

The Lord of Radiant Island!

These two names shocked the young man in black. Everyone in the underground world had heard of these two names.

It was impossible for Mr. Peze to mention these two names for no

reason. Could it be...

The young man in black suddenly thought of a terrible reason, which was unacceptable to him. He looked at the photo in the hands of Peze and muttered, "Is... is he..."

"You came to Radiant Island and threatened to kill the owner of this island. If it weren't for the fact that you were holding with this leaf, I would have killed you now. Get out of here!" Peze shouted and tried his best to resist the killing intent in his heart.

The young man in black panicked and his legs were weak. He did not expect that this young man who President Zhao wanted to deal with was actually the owner of Radiant Island!

The seemingly ordinary young man turned out to be the Conqueror!

Looking at the anger on Peze's face, the young man in black scrambled out of the hall.

As soon as he walked out of the hall, the young man in black saw Henry walking toward him, which made him shrink his neck and run away in disgrace. He must quickly tell President Zhao about this matter.

Henry saw the young man in black, but he didn't care too much. He didn't know that the young man came to ask Peze to kill him.

The last time in the restaurant, Henry only felt that someone approached the private room, and it was Megan who dealt with the young man in black.

Henry found Peze in the castle and told him that he wanted to leave and that Peze should manage everything on the island.

Peze understood. As for the young man in black, he didn't mention him. In his eyes, this was just a group of small characters. It was not worth mentioning.

After saying that, Henry went to found the First patriarch and spoke briefly with him. Then he took a private plane and flew directly to Yinzhou City.

For Henry, the final result of his contact with the Tang clan was positive. His body was full of Qi, and the people on the island were able to come in contact with Qi, which was much better than he had hoped for.

Henry looked at his mobile phone. Sylvia hadn't contacted him these days, but Henry asked Sylvia what she was doing. Her reply was very slow. Henry also knew that Sylvia was very busy every day. Besides, she hadn't returned to Lins Group for more than a month. There must

be a lot of things waiting for her to deal with, so he didn't disturb her. At the same time when Henry took the plane, a cruise ship also gradually left Radiant Island. The young man in black sat on the cruise ship and kept calling President Zhao, but he couldn't get through. In the scope of the island, except for some specific people, the outsiders did not have a signal.

When the cruise ship gradually sailed out of the sea area of Radiant Island, the young man in black had just made a phone call when he heard a strong sound of airflow coming from the sky. He looked up and saw a fighter plane hovering above the cruise ship.

"Bang!"

With a light sound, the phone in the young man's hand broke into pieces.

A voluptuous woman with silver hair jumped off the jet. Her exquisite facial features made the young man in black stunned.

"Did you bring Peze's token to the island?" The silver-haired beauty asked with a charming voice.

The young man in black nodded his head dazedly.
