

## Chapter 813

As soon as Sylvia finished her words, the reporters and the apartment owners, who had just broken in, breathed a sigh of relief at the same time.

Seeing Sylvia solve the problem in front of them so easily, many entrepreneurs present had to give her a thumbs up.

Sylvia was no more than twenty-two years old. At this age, she was younger than the children of many entrepreneurs present.

But when they saw Sylvia so calm, and then thought of their own family's children who only knew how to spend money on drinking and eating, they suddenly felt sad.

"This should be the first lesson you need to learn." Henry said to Faustina, "When you face your opponent's questions, you can't answer them all the time. The more you answer, the more you will be caught by others."

Faustina bit her lip and said nothing.

"Hahaha." Not far from Sylvia, there was a burst of laughter, accompanied by the sound of clapping. Hanley Wang, the head of the Belief Group, came over and said, "President Lin, I've heard a lot about you. I've heard of your great name. Today, I've seen you. You're really excellent. It's an eye-opener for me."

Everyone saw the moment Hanley took the initiative to say hello to Sylvia.

Everyone's attention was also focused here.

A group that claimed to have 30 billion working capital had the first meeting with the leading enterprise of Yinzhou. This was likely to become a scene written in the business market's history of the whole of Western China.

Just when everyone was thinking that Sylvia and Hanley would passionately talk, they found that Sylvia didn't pay much attention to him when she looked at him.

"Who are you? Do we know each other?" Sylvia looked at Hanley with a strange face.

As soon as Hanley heard what had happened in the mall yesterday, he thought that today's contact would definitely be a bit unpleasant, but he didn't expect that Sylvia would be so direct.

The people in the banquet hall were also surprised by Sylvia's attitude.

Some well-informed people whispered.

"I heard that there was a conflict between President Lin and the people of the Belief Group yesterday."

"I also heard that the HR manager of the shopping mall was fired yesterday. President Lin kicked him out."

"What does this mean? Doesn't the Belief Group have 30 billion yuan of working capital? If that is true, it's much more than the Lins Group."

"Could it be President Lin is a little afraid and doesn't want to get involved in the matter?"

"It's possible. After all, she is sitting in a very comfortable position."

Whispers came from the crowd one after another.

Hanley was a little surprised, and then he said with a smile, "President Lin, let me introduce myself. I am the chairman of the Belief Group, Hanley Wang."

"Oh." Sylvia replied with no expression, "The Belief Group? I have never heard of it. This is a gathering of the Trade Association of Western China, have you received an invitation?"

Hanley's face darkened when he heard this.

Now, everyone present could see that Sylvia was trying to find trouble with the group.

"President Lin, I don't understand what you mean." Hanley frowned.

"I don't understand what you mean, either. Is this our party?" Sylvia crossed her arms in front of her chest. Although she was twenty years younger than Hanley, she wasn't inferior to him in any aspect.

Standing behind Sylvia, Faustina frowned and ran up in a hurry. Pulling Sylvia's sleeve, she whispered, "President Lin, I invited President Wang."

"Faustina Tian!" Henry shouted and stepped forward. He grabbed Faustina's wrist and said, "Do you need to teach President Lin when to do things? Hum?"

Faustina was shocked by Henry's shout. Before she could react, Henry grabbed her wrist and pulled her aside.

"Faustina, it seems that you didn't listen to what I just said." Henry sneered at Faustina. "Remember, you are only a vice president. How can you interrupt President Lin's words? You should restrain your jealousy!"

"I..." Faustina opened her mouth and was about to speak when Sylvia's voice rang out.

"It is okay, don't blame Faustina. She just recently graduated and is a bit naive. It's normal for her to be cheated."

"Cheated?"

Everyone present, including Faustina, had noticed the keyword in Sylvia's words.

"President Lin, I don't understand what you mean!" Hanley opened his mouth and said, "The Belief Group is sincere when we say that we want to cooperate with all the people in Western China. But we've been accused of this!"

"Cooperate? Interesting." Sylvia's mouth curved into a smile. "What makes you think that we want to cooperate with you? Based on the 30 billion working capital you made up?"

Sylvia's words caused a huge commotion in the crowd.

Hanley pointed at Sylvia and shouted on the spot, "Sylvia Lin! I'll give you face and call you President Lin. But in terms of qualifications, you are just a little girl. When I was in the business world, you were not born yet! I warn you that you can think whatever you want, but you can't talk nonsense!"

"I'm talking nonsense?" Sylvia showed a puzzled look. She looked at Henry and asked softly, "Honey, did I talk nonsense?"

Henry shrugged. "I don't think so."

"Sylvia, what do you mean?" A young man shouted loudly. This young man was the HR manager who had a conflict with Henry and Sylvia yesterday in the mall.

"I don't mean anything." Sylvia smiled slightly, as beautiful as a blooming flower. "Since you have 30 billion working capital, you might as well show it to us."

Faustina saw that Hanley's face became more and more gloomy. She directly got rid of Henry's hand, strode to Sylvia, and said, "President Lin, President Wang is a very prestigious entrepreneur. Our Lins Group has also investigated it. There is no problem at all."

"Is that so? Then why haven't I found them out?" Sylvia's face was filled with curiosity.

"Sylvia, do you know what fake goods are? Our Belief Group has 30.6 million in financial currency. You can let people know how much a single financial coin is worth!" The young man of the faith group said.

"President Lin, I have investigated. Now the total price of the financial currency is 983 yuan." Faustina said to Sylvia in a low voice, "There is absolutely no problem with the Belief Group."

"Oh." Sylvia looked at Hanley with great interest and said, "The financial currency. It's a good name."

Hanley snorted. "Our currency is recognized by 13 countries around the world. It can be exchanged into cash at any time."

Hanley's words caused a scream of surprise. 13 countries around the world accepted the virtual currency. If so, how strong the Belief Group was!

Faustina said anxiously, "Yes, President Lin, I have investigated all these, those countries..."

"Let me guess, are these the countries you mentioned?" Henry took out his mobile phone and waved it in front of Faustina.

## Chapter 814

As Faustina looked at what was written on Henry's phone, her face froze instantly.

"It seems that I'm right." Henry smiled and said, "No currency exchange is enabled in these 13 countries. Even if they admit that the financial coin is one is worth one hundred thousand yuan, it won't have any effect on us."

"What?!" Faustina was shocked.

Including the people in charge of the major enterprises, all of them also showed a surprised look.

As for the Belief group's financial currency, they had also investigated it. The 13 countries all recognized the existence of this currency and it made them believe in the strength of the group. But now they heard that the 13 countries had not opened a channel for the currency exchange.

What did it mean? No matter how much money they could exchange, they couldn't bring it to China. In the deeper words, if there was no land for currency exchange, they could stamp as much money as they wanted. They could just use the money as toilet paper!

Most people didn't know much about currency exchange, because, in most people's eyes, all the currency in the world could be exchanged.

Henry shrugged his shoulders and said, "This trick of using virtual coins has occurred many times in China. However, today, he has done a better job. Unfortunately, this is just a trick. He can't get on the right track. Faustina, if I were you, I'll immediately check the accounts. Let's see how much Lins Group has suffered during the time you cooperated with the Belief Group."

Upon hearing this, Faustina did not hesitate at all. She immediately made a phone call. In less than a minute, Faustina's face took on a ghastly expression.

"30 million yuan?" Henry asked with a smile.

"37 million..." Faustina lowered her head and whispered the number, "Lins Group has lost a total of 37 million during this period of time."

"Ah, it's really a low-level fraud." Henry shook his head and looked at Hanley. "If I were you, I would be able to do more in this period of time and get at least 50 million yuan."

Hanley's face suddenly changed. He looked at the young man beside him and rushed out of the banquet hall. Seeing that the situation was not good, the young man also rushed out with Hanley.

With Henry around, how could he let them run away so easily?

Someone had been waiting for them outside for a long time. Hanley and the young man had just left the banquet hall when they were pressed to the ground.

"It's a simple trick. You should have found it a long time ago. Unfortunately, you are more stupid than President Lin expected." Henry looked at Faustina with a sarcastic look. "They obviously wanted to use Lins Group as a pedal and put their hands on the newly opened trade channel of Hengyuan, but you were deceived by them with just a few words and even didn't know that you were used as a gun. You are really stupid."

"It's okay. Honey, Faustina just has no experience. Everyone has experienced this kind of thing." Sylvia came over and said to Faustina, "Faustina, Henry and I have something to do. You don't have to worry about today's things. You can be responsible for here. I've seen your proposal during this period of time, and it's done very well. It's better than I expected. It's just that you should be more careful in the future. Don't be so naive, understand?"

"President Lin, I..." Faustina looked at Sylvia with an apologetic look on her face. The current her did not have the same haughtiness that she had when she called her father last night. She only felt that she owed Sylvia.

"Well, you don't have to say too much. I know your ability, and your experience will be accumulated slowly. You deal with things here." Sylvia patted Faustina's shoulder, and then held Henry's arm, "Honey, let's go."

"Okay." Henry nodded. Together with Sylvia, he strode out of the banquet hall.

After leaving the banquet hall, Sylvia suddenly breathed a sigh of relief. She looked at Henry with a worried face and said, "Honey, do you think this will offend Faustina?"

"No." Henry shook his head. "My words were not too exaggerated. If she can't stand this kind of stimulation, you don't have to work with her anymore. I can see that she just wants to prove herself."

"Ah." Sylvia sighed and said, "I hope she can understand."

"Oh, by the way, my wife." Henry suddenly pointed to the side. "How to

deal with these people?"

They saw that Hanley and the young man from yesterday were pressed in the corner.

The young man was shouting at Sylvia yesterday, questioning if Sylvia didn't know who the Belief Group was. Now, he was like an old tree full of fear, shivering in the corner.

"Leave it to the inspection bureau." Sylvia waved her hand indifferently. "There are a lot of things waiting for me to solve in the company. I don't have time to waste on them."

"Okay, I'll contact Captain Richard and ask him to come to arrest them." Henry took out his mobile phone and dialed a phone number.

As for the fraud this group made, it might be a big thing in other people's eyes, but for Henry and Sylvia, it was just an insignificant thing. For them more important was to have dinner. The reason why they did not deal with them yesterday was just to teach Faustina a lesson.

The 30 billion made up by the group, even if it was real, in Henry's eyes, was nothing.

During this period of time, Sylvia had been hanging around the clans and the ancient martial arts families. Thus, she had taken these matters a lot less seriously.

The two of them arrived at the entrance of the hotel.

"Honey, I'll go to the company first." Sylvia walked to a Maserati.

"Okay, go ahead. I have something to do." Henry waved to Sylvia.

Sylvia got on the car and left with the roar of the motor.

When Sylvia was completely far away, Henry looked around and said, "Sackcloth Visitor, do you need to follow me all the time? Didn't you agree to give me two months? Do you think I am as single as you?"

A figure wrapped in an army green overcoat appeared behind Henry. The other party was wearing a cotton hat that covered his entire face tightly. His figure emitted a hoarse voice. "I don't know how many people are staring at you now. They're staring at the city you have built in Sosasmo desert. His Excellency has given the order that I naturally have to protect you."

Henry looked at the direction in which Sylvia left and shook his head, saying, "No need. You just need to arrange for someone to protect my wife. Send the message out. If anything happens to my wife, don't blame me for opening the Gates of Hell."

"You are threatening all the people in the underground world."  
Sackcloth Visitor made a sound.

"Whatever they want to think." Henry held his hand and said  
indifferently, "Anyway, I don't want anyone to bother me during these  
two months."

After saying that, Henry strode forward.
