

Chapter 817

In front of the Lins Group.

Frederic and Yvonne walked out of the entrance of Lins Group and got into a Benz that had been waiting in the parking lot.

As soon as they got into the car, the person in the driver's seat turned back with a flattering face and said, "It seems that things are going well."

"The Lins want to complete this trial. They must rely on us. What would they dare to do?" Frederic looked disdainful. "You've already received the money, haven't you?"

"Yes, yes, we have already got it!" The driver nodded repeatedly. "Chairman Sun just called and said that your share will be transferred to your account tonight."

"Not bad." Frederic nodded with satisfaction. "A hundred million yuan for security. We agreed on twenty to eighty per cent. Twenty per cent is still a lot of money."

"Professor, you've misunderstood us. With such a large sum of money, we have to pay taxes and find someone to transfer to our accounts. We're just making a hard-earned amount of money. Besides, if we hire a security team, we'll still need to pay hundreds of thousands."

"All right, that's enough. Take us to the hotel first." Frederic waved his hand.

The Benz driver nodded quickly and started the car.

In the office on the top floor of Lins Group.

Henry looked at the bill that Secretary Lee had just brought in. "Honey, the security fee is a hundred million yuan. It seems that the amount given by the government this time is quite big. No wonder they can't retain their

composure."

The fees for a security team were naturally not 100 million. The rest of the money was obviously the sum that the government had offered to support the Lins Group this time. If the government directly gave large amounts of money, some companies would definitely be dissatisfied with it. If people gossiped about it, security money would be used as a gimmick.

Sylvia sighed, "I see this sort of thing a few times every year. I'm already used to it."

"The unspoken rules in the industry are nothing more than like this." Henry touched Sylvia's hair. "You've taken this project and so many people are staring at it. I'm sure you'll have to spend 100 million on it."

Sylvia frowned slightly, "If it's just like that, it doesn't matter. It's just that I'm afraid there's something else going on. I keep having this feeling that Frederic isn't an easy person to satisfy. His follow-up research funds aren't a small either."

"It doesn't matter. If his appetite is too big, it's no big deal to kick him out of the game. I'll call Future over to help you." Henry said as if he didn't care.

Sylvia rolled her beautiful eyes and said, "Forget it. Future's research project is monitored by the whole world. If you call her here, our Family Lin will become the target of public criticism, my Lord."

"Haha." Henry laughed. "Honey, we have plenty of ways to do it. If we can do it normally, we'll do it normally. If someone wants to play tricks on us, we shouldn't be afraid of him. Let's go to the welfare home and pick up Lisa. Then we can go to buy some food. What do you want to eat for dinner?"

Upon hearing this, Sylvia's big eyes immediately

narrowed into the shape of crescents. She tilted her head, with a happy smile on her face. While thinking, she said, "I want to eat sweet and sour pork ribs, sweet and sour fish, spicy chicken, braised pork..."

While thinking of the delicious food in her mind, Sylvia couldn't help but drool. Her face immediately turned red and she looked at Henry shyly.

"Okay, I'll make all of those today!" Henry patted his chest.

At 10 o'clock at night.

Henry walked out of the house with Sylvia, who was full after having a nice dinner, heading for Glory Hotel.

The research team brought by Frederic and others had arrived. Cathy, the secretary, just took them to the hotel.

At this moment, Henry and Sylvia were rushing to the hotel to plan the pilot business residence.

The top floor of the Glory Hotel was booked for Frederic's research team.

When Henry and Sylvia arrived, the researchers had just finished the midnight snack, washed up, and waited leisurely here. There were about more than 20 people on the team.

"Why are you so slow? Did you bring the plan?" Frederic was lying on the sofa leisurely.

Sylvia took out a laptop and placed it in front of Frederic. "Professor, everything is here."

Frederic lazily turned on the laptop, and a complete PowerPoint presentation was revealed in front of him.

After checking it for about two minutes, Frederic directly locked the computer screen and said, "President Lin, I'm afraid some places are not quite suitable."

"Professor, please tell me." Sylvia frowned slightly. This

presentation was made by herself, and there was so much information in it that he couldn't finish reading it in two minutes. Obviously, Frederic hadn't read it at all.

"There are too many things in your plan. The research funds provided by the superiors are limited. If the Lins wants to make it look like this, I'm afraid you'll have to worry about the budget."

Sylvia frowned. This afternoon, she was thinking that Frederic might make some trouble about the funds, but she didn't expect that he would say things like this. She took a deep breath and asked, "Professor, how much money do you think we need?"

"I am not sure." Frederic shook his head. "Based on the research progress, it's initially worth 30 million."

"30 million yuan." When Sylvia heard the number, she was still able to accept it. "Well, Professor, I'll pay 30 million yuan first. I need to know how long will it take to see the results?"

"A week." Frederic thought for a moment and answered, "The preliminary results will be visible in a week."

"Okay, then I hope we will have a happy cooperation."

"Of course." Frederic smiled proudly.

After saying some polite words to each other, Frederic and his team returned to their rooms. Henry, Sylvia, and secretary Cathy left the hotel.

As soon as Henry and the other two left, Yvonne came to Frederic.

"Are we asking for too much money? Originally, we got 80 million from the security fee. Now, if we take the money from the Lins Group, I'm afraid that the Lins will be dissatisfied." Yvonne said with some worry.

"Too much?" Frederic sneered. "I told you it's just the beginning. This plan is to lay a foundation for the

development of the entire northwest. If the Lins can achieve it, they'll be able to make money on the spot. I'm glad that we can get more money from them. It's a good chance to obtain both fame and fortune. If they don't want this project, there's plenty of people who want it!"

Yvonne was silent for a few seconds before nodding her head forcefully. "Alright, Professor, I'll listen to you. I'll do whatever you say!"

A plain-looking young man also came over at this time and said to Frederic, "Uncle, don't forget the thing I told you. You should also tell President Lin about the marriage. I really like Daisy Xu."

"Don't worry!" Frederic sneered. "When I achieve my goal, even if you want to sleep with her, let alone her sister, it will be just a matter of my words!"
