

Medical road

Chapter 114

"Let me think about it. I haven't decided which hospital to study in!" Zhang fan can't say no, otherwise how can the others speak. You can only prevaricate it first.

"OK, don't worry. And you. " Ouyang asked again.

"Water jar! Spinal surgery. I must have surgery every day. " Chen Qi said that most doctors studying in higher hospitals just look at it, and then write medical records. Sometimes they don't even have the opportunity to write medical records in top hospitals. A group of advanced students, doctors, postgraduates and interns are scrambling to do it.

"Oh, no problem." The woman said with a smile. Ouyang glanced at Chen Qi, "this worthless goods."

"Well, I'll go to the golden mean. My request is the same as director Chen, ha ha! " Yu Bin said.

"I also went to the water jar to study arthroscopy." Lao Li, said Li Hongtu.

"No problem. Thank you very much. I'll make arrangements when I get back. Uncle Zhao, can I talk to the doctor alone?" Then the woman said to the leader of the municipal Party committee.

"OK, no problem. President Ouyang arranges it."

The woman knew at a glance that Zhang Fan didn't want to study. What she was doing was specialized in studying people's hearts. She knew at a glance that as long as Zhang Fan didn't ask too much, she would agree. The grace of saving lives cannot be lightly appreciated. Besides, Zhang Fan not only saved her brother.

People who enter society have nothing more than money and power. Most people who

pursue progress are for these two points.

"Dr. Zhang, it's just the two of us now. We can speak freely. As long as I can do it, I will never put off. "

Zhang Fan really didn't want to put forward any conditions. But I don't want to miss this opportunity. If such a rich family doesn't cut a knife, God can't see it.

"Well! This is what we should do. Even if we study, I really haven't thought about it yet. " There are many opportunities for further study. He is still young. It's a big deal to go to Qingniao to find Lao Lu. He's no worse than anyone.

"Hehe, but you are too young to be the dean." The woman said with a smile. She thought Zhang Fan wanted power.

"No! no I really didn't think of any Dean, and I'm not the material for that. " Zhang Fan is frightened. If Ouyang knows this, she can eat Zhang Fan!

"Oh! It's easy to do. I got it! My brother has bothered Dr. Zhang a lot this day. "

Zhang fanleng, I didn't think about it. What do you know.

In ICU, directors of Cardiology, respiration, neurology, neurology and orthopedics are on standby. In one day, the hospital went all out. At this time, he is not a generation, but a hero! A dignified national hero.

"All indicators are very stable!" Every half an hour, the nurse will report to the doctor in the backup group.

Ouyang always accompanied the woman, and the municipal Party committee leaders also wanted to accompany her, but the woman didn't agree. After one night, Zhang Fan was also tired. He sent a message to Shaohua and fell asleep. No reward or commendation can resist the attack of drowsiness and fatigue.

Ouyang was also tired, but he was excited and didn't feel sleepy at all. Maybe this is an opportunity for the hospital to build an emergency center, ranging from staffing to infrastructure, which are all interests.

The next day, the wounded were all stable. Lao Guo and Lao Liang agreed to transfer after consultation. After all, the medical conditions in the capital are more perfect and advanced, which is more conducive to postoperative recovery.

Before leaving, the woman talked to Zhang Fan alone, "Dr. Zhang, I really thank you this time. I won't say much else. After my brother recovers, let him come and thank

you in person. Here is a card. Please be sure to take it. It's a little token of my family and me. " The next meaning is that if her brother has any sequelae from the operation, the reward will be like this. There is no follow-up.

Zhang Fan refused a little and hurriedly installed it. He felt that there must be at least 50000. The house can start decoration! Besides, for this money, for people like her, it's just pocket money.

Lao Guo said to Zhang Fan, "Hey! It's a pity that you stay here. Really, talent is not light. I hope you won't be confused by the immediate interests. The world is big. This is my phone. I'll wait for you for two years! I hope you can come to me early. "

The hospital was equipped with the most comprehensive nurses, who accompanied the wounded on the helicopter with first-aid drugs and instruments.

After leaving, the leaders of the municipal Party committee and Ouyang were relieved. The huge interests attached great danger. As long as they got on the plane, the danger was far away from them, and the rest was interests.

"President Ouyang, very good, really good." Before leaving, the leader of the municipal Party committee said to Ouyang.

Ouyang carefully sent the leader to the car and looked at the far away car. She was excited and happy. In the future, the only real voice in this hospital is her voice.

After arranging the things in the hospital, she can't rest. She also wants to talk to Zhang Fan. Zhang Fan's technical level is already very high, and the transfer has been a bit wasteful.

"Dr. Zhang, you have done meritorious service this time. The hospital will not treat you badly, and I will not treat you badly. The hospital will start building employee houses next year. I will order one for you in advance. And the transfer can be over. Have you decided which department you want to go to? " The woman didn't worry about how to repay Zhang Fan.

"Thank you, Dean. I still want to transfer all departments. This transfer is very helpful for my promotion. The system formulated by the dean is really good. I think after I transfer to another department, I can better understand which department I want to go to. "

Ouyang was even happier. "Well, no wonder Dr. Zhang's operation level is so high, so you can understand my good intentions. Come to me directly if you have anything in the future. Go and have a good rest and relax these days. "

"OK! Thank you, Dean. "

Zhang Fan left the office and had nowhere to go. The dean asked him to rest. It's not appropriate for him to go to the Department. Although Zhu Qianqian is eager to wait for Zhang Fan to go back and write the medical record, ordinary doctors don't know what happened in the hospital these two days.

Shao Hua was at work in the daytime. He must have no time to accompany him. He suddenly remembered that there was a card in his pocket. He was busy taking care of the patient yesterday.

Zhang Fan happily goes to the bank to see how much money Cary has. If he has 50000, he will decorate the house immediately. It's not good to live in someone else's house all the time.

There is a self-service ATM at the door of the hospital. Insert the card with six zeros in the conventional password. Results a look at the numbers on the display, Zhang Fan's mouth is dry and his tongue is dry. One three, five zeros.

"Gollum!" Zhang Fan swallowed a mouthful of water. Rich, really rich! You don't have to pull anymore. Pull out the card and run to Shaohua's unit. I have to share this pleasure with close people. This person is Shaohua, regardless of whether she is busy or not.

Shaohua looks at Zhang Fan who is a little crazy. Zhang Fan is very stable at ordinary times. There is little expression of such excitement. Although strange, it's a good thing to see Zhang Fan's expression.

Shaohua smiled and asked, "what's the matter?" Shao Hua has no customers. In front of his desk, he looks at the excited Zhang Fan.

"I'm rich! Rich! "

"What? Rich? Has the company paid a bonus? "

"Ha ha, no, yesterday ~" Zhang Fan briefly said what happened yesterday.

"Really!" Shaohua is also happy for Zhang Fan. There are still a lot of 300000 in 10 years.
