

Spoiled by Mr. Russell Chapter 690

Alexander was not pretending but truly did not care about such a thing. That made Lily's smile widen because he understood her so well. Back then, she did not take the exam for the perfumer certification because she felt it was too formalized. She decided to take the perfumer's grade exam because, as a newcomer to the field, she was eager to demonstrate her competence but needed more confidence in her ability to create fragrances.

The second reason was that Nathaniel convinced her to. He had just started a business and was looking for a perfumer to head the Research and Development department. No matter how well-known a perfumer was, having a certificate attesting to their proficiency benefited the company.

On the other hand, Nathaniel knew little about the perfumer certificate and did not care much about it. On top of that, Lily discovered via her research that most of the required syllabi for the certification were rigid, theoretical items. In contrast, creating scents was a creative endeavor that called for talent..

She had spent a week perusing the reference books before giving up on studying for the exam because she had discovered numerous errors inside them. Besides, she had no plans to take on the industry's established veterans.

companies. She started at MN Inc., but after cutting ties with Nathaniel, she moved to Rebirth. No one had
