

Spoiled by Mr. Russell Chapter 835

After a few days of hard work in the lab, the result finally arrived. Lily was holding a small bottle of amber-colored essential oil, handling it as if it were a priceless treasure. Olivia was also very excited as she kept saying it smelt so good. The lab was full of this unique fragrance.

She had never discovered this fragrance before. To be precise, it was as if several kinds of floral scents were fused, which one could smell precisely. It also had an aroma that herbs had, which smelled relaxed and refreshing.

Although Lily only extracted such a small bottle of essential oil, this raw material should be enough to make a themed series, which fit her vision very well.

"Olivia, please put this in a cool place. We'll move on to the next step," Lily instructed as she took off her gloves to wash her hands. Then she looked at the experimental data to ensure everything was right.

Immediately after, she sat in front of the computer to send an email. She called Lisa, "The thing you want will be ready within half a month. It should be ready in time for your event."

"That is great, Lilsy! I knew you could do it!" Lisa said happily, then paused before continuing, "By the way, I heard you seem to be in a little trouble recently. Do you need my help?"

said, it's only a little trouble. There is nothing you need to do," Lily said smilingly. Moreover, Lisa could the next few days. Do you have
