Chapter 190: Aren't You Close With Second Brother?

The Robot Exhibition was held in Commercial Building A, Block B, Level 2. The entire second level was used for the exhibition.

Zi Yi entered with a group of people. She discovered that it was separated into several areas, which displayed robots with various functions.

She originally wanted to take off her sunhat but just then, from the corner of her eye, she saw a few familiar faces. They were all the young masters she had met when she visited Ouyang Ming's bar previously.

He Fei was one of them.

Their group were basically all men and all of them were wearing suits, which made them look presentable.

Zi Yi turned away and started to browse through the robots.

On the other end, Li Tao elbowed He Fei who had been listless for the past few days. "Say, Ah He. That's more or less enough. Isn't it just a woman? I can't believe you're pinning over her day and night."

Zhang Hongpeng added. "That's right. You're just being difficult. What kind of beautiful woman can't you get? Why do you insist on being a love saint?"

"Zhang Hongpeng, your words are too much." He Fei's expression darkened. He could not tolerate it any longer and said, "You guys don't understand."

The feelings he had towards Zi Yi were complicated. After pondering for the past few days, he realized he was very confused. At first, he was purely fascinated by her gorgeous beauty that appeared handsome in some moments. He thought that rather than having an arranged marriage, he would rather marry her instead. However, during these few days, he would think of what she said that day, whenever he thought of her.

That caused him to be even more confused.

Could it be that he had truly caused her great inconvenience?

"Sigh! Ah He, what are you daydreaming about?"

He Fei recovered his senses and adjusted his suit. "I'm here to check out the robot exhibition today. No one is allowed to mention anything else. I'll get angry with whoever brings up unrelated topics."

The few men glanced at each other and none of them brought up Zi Yi again.

They then started to discuss the main purpose of this trip.

"I heard from inside sources that Second Brother would be coming today too. Say, he already has a technology company and with his trip here today, is he planning on entering the robots industry?"

“It’s likely. Even though the Lu Group has never revealed to the public that they are developing robots, I believe they definitely have a professional R&D group. Perhaps they’re here to network with talents... Ah He, what do you think?”

“How would I know?” He Fei was baffled by his question.

“Aren’t you closer with Second Brother these days?”

“...”

He Fei thought to himself, *“I am more or less a love rival with Second Brother now, can you stop mentioning him!”*

The Lu Group and the He Group have a collaboration and so, we have met a few times. Also, Second Brother merely brought me back to the capital from S City in passing, so how did it become ‘the two of us are close’?

Are these people idiots?!”

“If I am really close to Second Brother, would I still be standing here and discussing with you if their company has an R&D team for robots?”

He did indeed wish to get closer with Second Brother as he could reap profits together with him. Also, he would not be rushed to get married by his family every single day.

He suddenly recalled Zi Yi saying that she liked Second Brother. If she really did chase Second Brother, he felt that he would become even more irritable.

What if Second Brother fancies Yiyi? Wouldn’t I lose my chances?

Just as He Fei was mulling internally, someone suddenly pushed him “Ah He, Professor Dou, and his team are here. Let’s hurry over.”

He Fei finally threw out all his random thoughts and walked towards Professor Dou, who was surrounded by a group of reporters.

Not only were there company teams attending today’s robot exhibition. There were also school teams and other individuals entering the exhibition with their own names.

There was a wide range of people who came today, so naturally, there would also be reporters here too.
