

## Multi skilled 831

### Chapter 831: Her Mind Is Up In the Air, You Have To Pull Her Back

While Elder Dou was playing chess with another neighbor, everyone else stood around them and spectated.

Elder Dou explained to Zi Yi about the rules and tricks of playing chess and she listened with relish.

It was not known how long had passed when there was a sudden inquiry from the crowd. "Is Elder Dou and Little Zi here?"

The spectating crowd turned around and someone reminded Zi Yi who was engrossed with the game of chess. "Little Zi, someone is looking for you."

Zi Yi turned around to take a look. The crowd behind her had made some way.

Elder Dou also turned around at the same time.

"Elder Dou." The one talking was a middle-aged man who lived in this neighborhood. Standing beside him were two foreigners.

Elder Dou asked, "Little Wu, why are you looking for Yiyi?"

Mr. Wu hastily explained, "I'm not the one looking for her. It's these two who are looking for Little Zi."

He pointed to the two foreigners standing next to him.

The first thing Owen did was to greet Elder Dou. "Hello, Elder Dou. We are Dr. Ellis' assistants. He is a reputed academician in nuclear fusion engineering in Country A and a researcher in the nuclear weapon laboratory. Today, we're here to meet with Miss Zi specially."

Before Elder Dou and Zi Yi had the chance to speak, the elders standing around them started discussing among themselves.

"Why did those studying nuclear fusion from Country A come looking for Little Zi? Could it be that she's interested in further research in this aspect?"

"But that doesn't seem to be right. Little Zi did not major in this specialization nor have I heard that she's interested in this topic. Why did Dr. Ellis come looking for her?"

Everyone turned to look at Zi Yi.

However, Zi Yi looked at the two foreigners with a cold expression.

To think that they had come looking for her over here!

Owen's expression was still considered polite, but Anri sized her up with an unfriendly gaze, as though if Zi Yi were to reject their invitation, she would be someone who's unappreciative and doesn't know her place.

Zi Yi snorted deep down and said rudely, "I have no intentions or interest to study this specialization. Is your Dr. Ellis out of means to find new students? Why is he coming after me repeatedly?"

"What do you mean by that?" Anri was unhappy. She was about to get angry when Owen stopped her.

Owen said, "Miss Zi, Dr. Ellis just wishes to have a conversation with you. As to whether you are interested in this specialization or not, you can make a conclusion after talking with Dr. Ellis. He is very sincere in extending you an invitation."

He then looked at Elder Dou and purposely said, "I believe that since Miss Zi has such a grandfather like Elder Dou, you will definitely make the best choice for yourself."

Zi Yi knew that Dr. Ellis must have other motives for him to insist on finding her. Since they even came here to look for her today, she could not ignore this matter anymore.

She lowered her eyes and thought for a moment before she said, "I have time this weekend afternoon. If Dr. Ellis is in the country, I'll meet him. If not, please refrain from looking for me in the future."

It was Thursday today and there were only two more days before the weekend arrived.

Anri was clearly unhappy with Zi Yi's attitude. Her expression was so ugly as though she was about to throw out curses at Zi Yi.

Owen was worried that she would make things even more difficult and hastily agreed. "Ok, I will inform Dr. Ellis of the time."

He then said, "We shall not bother you any further."

Having said that, he pulled Anri away and left.

After the two of them walked out of the neighborhood, Anri finally unleashed her anger and said, "Owen, why did you stop me? Who does Zi Yi think she is? Dr. Ellis is willing to meet her and not only is she ungrateful, she even dares to make things difficult for him!"

Owen said to her with a cold expression, "You're too rash. Dr. Ellis said that we have to get Miss Zi to meet him and we can get lost if we can't complete this task. Don't tell me you really want to be kicked out?"

Anri's expression turned even more ugly, but she ended up keeping her mouth shut.

Owen drove the car out of the vicinity.

Sometime later, Anri spoke up again. "I really have no idea why Dr. Ellis insists on meeting this Zi Yi. With her appearance and group of relatives who are of high intellect, I really wonder how her fame came about.

"Also, I've checked everything Zi Yi had studied last semester. She didn't study any major similar to nuclear fusion at all. Why does Dr. Ellis want to take her in as a student?"

Speaking of this, she made a guess. "Could it be that she's too pretty so Dr. Ellis is interested in her?"

Owen glanced at Anri and warned her. "You better not make random guesses about Dr. Ellis' matters."

He then reminded her. "You can inform Dr. Ellis about what Zi Yi said."

...

Country A.

When Dr. Ellis received the call, there were several officers seated next to him.

After he ended the call, he said to the group, "Zi Yi has agreed to meet me this weekend."

The officers made eye contact with each other and one of the grim-faced officers said, "Go meet her then. This person isn't as simple as she seems. You must bring her here."

Dr. Ellis hastily nodded his head and revealed a confident expression. "Please rest assured that I will be sure to bring her over."

Following that, Dr. Ellis left to prepare for his flight to China. After he took his leave, a man wearing a cloak appeared out of thin air in the conference room. His face was not visible as he had a cloak covering his face.

The moment he made his appearance, the air in the conference room seemed to freeze.

The expressions of the officers seated there looked stern.

The cloaked man spoke. His voice resembled someone that came from the depths of hell. "This woman isn't easy. Find a way around her by starting with people close to her and causing trouble for them."

The officers mindlessly answered, "Ok."

...

In the scholarly community.

Elder Dou waited for the two foreigners to leave before he turned to Zi Yi and asked, "How did you get acquainted with this Dr. Ellis?"

"I don't know him," Zi Yi said, "I received tons of email offers and one of them was from this so-called Dr. Ellis. I didn't even know of his existence before that."

Elder Dou pondered for a few seconds and reminded her. "No matter what purpose he has, you have to pay attention to your safety."

Zi Yi nodded her head. She wasn't concerned about this person at all. Instead, she was more interested in playing chess. "Grandpa, continue with the chess game. I'm about to learn it."

The elderly man seated opposite Elder Dou chuckled in response. "You little lass, aren't you too confident by saying you're about to learn it after watching for a short while?"

Zi Yi gave him a smile. "Isn't this game learned just by looking at it for a short while?"

"How arrogant," the elderly man said, "How about this? You can play the next game. We can see if you really learned how to play."

"Sure."

Elder Dou burst out laughing after he heard their conversation.

Following that Elder Dou and the elder continued the game.

After the game ended, Elder Dou stood up and made way for Zi Yi.

When Zi Yi sat down, the first thing she did was to say, "Grandpa Zhang, be sure to keep your guard up later."

"Haha, look at her, look at her!" Leader Zhang's mouth widened as a smile surfaced on his face. "Look at how arrogant this little lass is."

The others also chimed in.

"Old Zhang, you have to extinguish Little Zi's arrogance then! Haha."

"That's right. This girl's mind is up in the air and you have to pull her back down to the ground."

"Hahahaha..."

Even though everyone said that as a joke, their fondness for Zi Yi was real.

All of them were educators and what they liked the most were students with good grades.

### **Chapter 832: Do You Accept Defeat?**

The chess game lasted for forty minutes and as expected, Zi Yi lost.

Leader Zhang who was seated opposite her asked with a smile, "Little lass, do you accept defeat?"

Zi Yi touched her tummy. She became hungry halfway through the game. She was originally not skilled in this type of chess and she only learned the basics just moments ago. It would be strange if she didn't lose.

"Nope."

"Is that so? Let's have another round then."

Elder Dou who was standing next to Zi Yi said, "Old Zhang, stop bullying a child. Yiyi only lost to you by a bit when it's her first time playing chess and it's considered pretty good already; I'm starting to get hungry, Yiyi let's go back now."

"Ok." Zi Yi stood up and held Elder Dou's arm before she waved at the elders. "Grandpas, Uncles, bye-bye."

Having said that, she followed Elder Dou and returned to the Dou Family's residence.

Old Zhang's voice sounded from behind. "Little Zi, come play chess with me again when you're free~"

Zi Yi replied cheerily, "Okay~"

When Zi Yi and Elder Dou returned home, the First Madam had already prepared a big bowl of red bean soup for her. Zi Yi took a seat and scooped the soup as she sucked up to the First Madam. "The red bean soup First Aunt makes is so yummy. I feel that I can eat another two bowls."

The First Madam was amused by her remark and said, "If you like it, I'll cook it for you again when you're here. But don't drink too much, else you'll be too full for dinner."

Zi Yi nodded her head. "Ok."

Just then Dou Yurui came in through the doorway with hasty footsteps.

"Grandfather, Mother, Cousin Yiyi."

Dou Yurui was obviously in a hurry as she headed further inside after greeting them.

The First Madam asked, "Yurui, why did you come back at this time? Are you going out later?"

"I came back to get some things. I'll be leaving right away."

Dou Yurui headed to the backyard after saying that.

The First Madam stood there and shook her head. "Why is she so busy these days? She's so busy that I barely get to see her every day. Even if I do see her, she'll leave right away."

Zi Yi looked at the First Madam.

She came and sat down next to Zi Yi while grumbling. "There were several times during the middle of the night when I saw her leaving after getting a call. I wonder what's going on these days. Why is there so much work to do in her department? I'm really worried that her body can't take it."

Zi Yi held the bowl of red bean soup and said, "Eldest Aunt, don't worry. I'll write a prescription to boost one's health. All of you can drink it then and I guarantee that all of you will be in good health."

The First Madam smiled and nodded her head. "Alright."

Just then, Dou Yurui came out with a black bag in her hand and she said to them, "Grandfather, Mother, Cousin Yiyi, I'm off."

She left after having said that.

After Zi Yi finished the bowl of red bean soup, she wrote a prescription while the First Madam went to make arrangements for dinner.

There were not many people who came back for dinner today. After dinner, Zi Yi received Lu Jingye's call, telling her that he would come to fetch her at around eight in the evening. As such, she sat in the living room with everyone and chatted.

They mentioned the military exercise Country A had conducted recently.

Dou Jingning said, "If the intercontinental missile they took out was really successful, it would be a great threat to our country."

Dou Xiaoyong nodded his head. "Yes. The missile's range can reach the moon and as long as the time and location are set, it is basically impossible to defend against."

Dou Zerui said, "At that time, I prayed for someone to come out and intercept their missile. I didn't expect there was really someone who managed to achieve this feat. At the very least, their arrogance has been diminished by half and this was simply so refreshing to see."

The First Madam laughed and said, "I wonder who was the one that's so skilled. Right now, Country A's military exercises have become an international joke and they most probably hate the person who interfered to death."

The Third Madam said, "I hope that Country A can't find the culprit. I also hope that this person is from our country."

Dou Zerui said, "How is that possible? How could there be someone so skilled in our country? I feel that they should be someone from the international hacker alliance or perhaps this was done by a group of people."

Zi Yi sat there and listened to their guesses without interrupting. Just then, Dou Jingning asked Zi Yi, "Little Zi, did Little Lu do anything that night?"

Zi Yi considered for a moment but thought that it was better not to reveal anything. "Nope. Father didn't allow him to do anything."

Dou Jingning nodded his head. "It's also good that Little Lu didn't do anything. Look at how Country A has issued an international wanted order. I'm sure they won't give up until they find the culprit."

Zi Yi responded with a nod. Looking at everyone who was smiling, she asked, "If you accidentally discovered that the culprit was someone around you, what would you do?"

"Of course, I will pretend not to know anything," Dou Zerui said with a laugh, "They're a hero and if I accidentally discover their identity, I will definitely be friends with them and protect him secretly."

Zi Yi sized him up and down after hearing what Dou Zerui said. Her gaze seemed to be saying: "*With your body, do you think you can protect them?*"

Dou Zerui glared at her with displeasure. "What's with your gaze? Do you think that I can't protect him? Cousin Yiyi, don't underestimate intellectuals alright. Intellectuals can protect people even without using force."

Zi Yi nodded reluctantly but still said, "We'll I hope that you won't discover who the culprit is."

If he does discover the culprit, she would still have to protect him when the time comes.

Dou Zerui was unhappy with Zi Yi's words and just as he wanted to say something, Zi Yi changed the topic.

At eight in the evening, Lu Jingye arrived and picked up Zi Yi.

After he arrived, he first greeted the Dou Family members.

The First Madam said, "Little Lu, come in and take a seat. I'll go pour you a cup of water."

“Eldest Aunt, there’s no need for the trouble,” Lu Jingye said, “Everyone is busy tomorrow and it’s best to rest early for the day.”

Since Lu Jingye said that, the Dou Family members did not ask them to stay.

The car drove back home. The Dou Family’s residence was located near M.Uni, but Mrs. Lu was alone at home and so, the both of them got the driver to drive back to the Lu Family’s residence.

The city was filled with lights at this time and was filled with bustling activity. Zi Yi told Lu Jingye about how Dr. Ellis’ assistants came looking for her in the neighborhood.

“These two people actually came looking for me at the Dou Family’s place. I feel that Dr. Ellis has other motives for looking for me.”

Lu Jingye thought for a moment and said, “This person should be sent by Country A’s military department to test you.”

Zi Yi nodded her head. “As long as it’s from Country A, it’s possible that they have something to do with that male worm. I know how to get rid of their people.”

Lu Jingye was still worried about her. “I’ll accompany you to meet this Dr. Ellis when the time comes. No matter if he wants to test you or not, just rejecting him will do.”

“Mhmm.” Zi Yi put her hand into his palm and Lu Jingye interlocked their fingers.

Just then, Zi Yi’s wristwatch vibrated. She tapped on it and Little Loli’s image appeared.

“Sister.”

Little Loli was clearly standing outside the bar. There were many people crowded in front and from the looks of it, something had happened.

Zi Yi asked, “What’s the matter?”

Little Loli said, “Several incidents of poisoning happened in the bar street tonight. I’m outside right now to watch the show.”

Zi Yi asked, “What poison?”

### **Chapter 833: Engineer Yang Sprained His Waist**

“Some got poisoned due to drinks while some got poisoned due to fruits,” Little Loli said, “This is the third case tonight. Moreover, the cases are not from a single bar.”

This incident sounded rather odd and so, Zi Yi said, “Get A to increase the security in the bar. In particular, the fruits that we purchase. Don’t let similar situations happen.”

The drinks in the bar were arranged by Lu Jingye and she was not worried about them. Instead, she was worried about the fruits.

Little Loli said, “Ok.”

Zi Yi thought for a moment and said to her, "Go closer. I want to see the characteristics of the person who got poisoned."

No matter how or why these people got food poisoning, Zi Yi decided to see the victim's reactions after the poisoning. Perhaps she can identify something.

Little Loli followed her orders and walked towards the crowd.

The victim of the food poisoning was carried on a stretcher by the doctor while surrounded by the police.

Little Loli was stopped at around two meters away. Zi Yi looked at the poisoned individual through her eyes and at the same time, she called out the detection system pre-installed inside Little Loli's eyes and started to check.

Before the individual was carried into the ambulance, Little Loli had finished checking and she retreated from the crowd while returning back to the bar.

Zi Yi said to her, "Send the data to the laboratory."

"Okay~"

Little Loli soon sent the data over to her.

Zi Yi quickly gave instructions to the experimental robot in the laboratory inside her courtyard.

After she was done with all these things, she said to Little Loli, "Initiate the body detection system at the entrance. From now on, as long as it is detected that the guests have some physical problems, they are not allowed to enter."

"Ok."

After ending the video call, Zi Yi subconsciously placed her hand on her tummy.

Just then, a large hand pressed on top of hers and held her hand.

Lu Jingye said, "Recently, there have been many strange phenomena in the capital and these cases should be man-made. The authorities are investigating vigorously."

Zi Yi nodded her head. "These incidents must be related to the last robot exhibition."

Country D was used to being the top country in robot technology. The robots which Zi Yi had revealed to the public the previous time must have caused them to panic. In addition, Zi Yi refused to take part in the international robot competition and the other party would certainly do some small tricks in retaliation.

"They must be thinking of forcing me to take part in the competition."

When Zi Yi said that, she sneered. "If I really participated, I will make them incapable of showing off airs in the department of robot technology anymore in the future."

Lu Jingye squeezed her hand and furrowed his eyebrows together. "The robot exhibition held in Country D just so happens to be the period where you are three months pregnant. You can't go."

No matter if she would be taking out the two babies by that time or not, she would be physically overwhelmed.

Zi Yi tilted her head and looked at his side profile. When she saw his grim expression, she raised her hand and touched his face. "Don't worry. If I really plan to go, I'll take out the babies in advance. I'll be fine if I soak in the nutrient solution for two days afterwards."

Lu Jingye still had a frown on his face.

Zi Yi continued speaking, "Country D must have joined forces with Country A, or perhaps the worm races have infiltrated into the level of the higher-ups in Country D. The female worms of the worm race are responsible for reproduction, but there are many skilled crafters among the male worms. Their ability to create high-end weapons isn't weak."

The worm race was the most troublesome existence in the interstellar era. Their reproductive ability was too strong and they were capable of creating weapons and spaceships. They would often plunder freely across the interstellar and therefore, the organization would organize large-scale removal of the worm race every few decades.

"The worm race is even more disgusting than the pirates in the interstellar era. The pirates would never create items themselves and only rely on robbing. But the worm race are similar to cockroaches who can't be completely eliminated."

Lu Jingye saw how her cheeks were puffed up and held her hand tightly. "Don't you have any abilities that can destroy them?"

"There is, but the worm race is different from humans. Even if their queen worm is killed, their race can still make a comeback after decades or hundreds of years. Their reproduction abilities are different from humans. When the queen worm breeds, she would choose a few eggs each time and conceal them in the meteorite zones. After a few decades, those eggs will automatically hatch."

Even though Lu Jingye could not imagine the scene of interstellar humans fighting the worm race, he could still guess that it must be a fierce battle.

Fortunately, they had killed the female worm on Earth previously.

By the time they went back, it was already nine o'clock in the evening and Mrs. Lu had yet to fall asleep. She was currently on the phone as she sat in the living room.

At the sight of their return, she hung up the phone and said with a smile, "You're back. Yiyi, are you hungry?"

"Mom, it's alright. I'm not hungry."

Zi Yi walked over to the sofa and sat down. She held Mrs. Lu's arm and asked, "Mom, what happened to have made you so happy?"

Mrs. Lu said with a smile, "I have a best friend who has been staying abroad all these years. She told me that she will be coming back to visit me for a few days. That best friend of mine only has a daughter and her granddaughter is already 4 years old. When she comes back, she will be bringing her granddaughter here for me to take a look."

Zi Yi smiled in response and said, "Your relationship with your best friend must be really good."

"Indeed, we do have a good relationship. Before we got married, we were neighbors and even university classmates. A few years back, our two families still kept in touch, but then her whole family went abroad five years ago. Everyone has been rather busy in recent years and there has been less contact."

Zi Yi nodded her head. "When she arrives, we have to take good care of this auntie."

"Mhmm."

Zi Yi thought for a moment and asked, "Will that auntie be staying here?"

"Yes. She will be bringing her daughter and granddaughter here and I don't feel comfortable having them stay outside."

Zi Yi nodded her head. She did not have any opinions on that. There were plenty of guest rooms in this villa and it was not a problem for three more people to stay here.

Having said that, the three of them went to rest.

When Zi Yi arrived at the Robot R&D Center the next day, she noticed that Engineer Yang was not around.

Engineer Meng said with a sour expression, "Old Yang went on a date with Team Leader Li last night. When he came back around 10 o'clock in the evening he said that he had sprained his waist."

Zi Yi: "..."

It's no wonder they seemed to be jealous.

When it was lunchtime, Zi Yi and the engineers walked into the canteen and they saw Team Leader Li carrying two thermos containers as she came in.

She directly made her way to the engineers and placed one of the thermos flasks in front of them with a slightly embarrassed expression. She then said with a gentle and sweet voice, "This is the soup I prepared for Engineer Yang. Could I trouble you to bring this to him later?"

Engineer Meng looked at the thermos flask and nearly lost control of his expression. He quickly nodded his head and said, "Team Leader Li, don't worry. I will send this to Old Yang after I finish my lunch."

"Thank you." Team Leader Li then placed the other thermos container on their table and said, "Here are cakes I made for all of you. I'm not too skilled at it and I hope you don't find it a bother."

"Of course not, of course not."

"That's good. I won't stop you all from eating any longer then."

Team Leader Li left after she said her piece.

Zi Yi looked at the engineers whose expressions turned sour in an instant and pointed at the cakes. "Are you going to eat this?"

Engineer Peng said, "No. I dislike cakes the most."

The other three also expressed their dislike. Zi Yi looked at their expressions and held back her laughter as she opened the container. Inside were strawberry cake rolls. They weren't big, but they looked particularly delicious.

Zi Yi used a fork to pick out one of the cakes. Just as she was about to take a bite, she suddenly came to a stop.

#### **Chapter 834: We Waited All Afternoon But No One Came In**

The four men who were looking at Zi Yi asked, "What's wrong, does it taste bad?"

Zi Yi was amused by their questions. She took a bite and said, "No, it's delicious."

The expressions on their faces turned even more sour.

Engineer Chu snorted and said, "Engineer Yang has surely gotten lucky. In just two days' time, he managed to take down Team Leader Li."

Zi Yi did not answer his comment. After all, this was a matter between the two of them and she was not in the position to say anything.

They continued doing work in the afternoon.

After some changes and upgrades, Moonlight's functions increased. The four engineers were preparing to test Moonlight.

"Moonlight, invisible mode."

Looking at the invisible Moonlight, there were finally smiles on the engineer's faces. At the same time, all sorts of ideas surfaced in their minds.

Engineer Chu made a suggestion. "Why don't we get Moonlight to take a walk inside the base and see when the security system will detect him?"

Engineer Peng said, "That's so boring. Why don't we get Moonlight to see how Old Yang is doing?"

Engineer Meng, and Engineer Chu said, "I agree."

Zi Yi saw through their thoughts. What they really wanted to do was to go and check up on what Engineer Yang was doing.

However, she did not say anything to stop them. After all, it was indeed a good idea to test out Moonlight's functions.

Soon, Engineer Meng gave Moonlight an order. "Go to our dormitory and broadcast what Engineer Yang is doing. Don't get discovered by the base's security system."

After Engineer Meng said that, Engineer Chu went to open the door. At the same time, he opened the main entrance with his permission level.

The others stood in front of the controller that was connected to Moonlight. They watched the situation outside the building through the display system linked to Moonlight.

As Moonlight was currently invisible, he did not get discovered by anyone when he went out.

Zi Yi was a little surprised. "Moonlight is able to escape all the detectors?"

Zi Yi was well aware of Moonlight's abilities. According to reason, it was still a little difficult for him to avoid all the detectors here.

Unless the higher-ups had given special orders and lowered the security level on purpose it wasn't possible for him to remain completely undetected.

"Well... we walk through this road every single day and we are well aware of which places have monitoring and detection equipment. Therefore, we had set up a route program for Moonlight in advance."

Zi Yi: "..."

So based on what they were saying, they had already planned this ages ago.

After Moonlight avoided all the monitoring and detection equipment, he soon arrived at the lobby of their dormitory.

It then went up the building and stopped outside a room on the third floor.

Unexpectedly, the door to Engineer Yang's room was half-closed. Engineer Chu giggled and said, "Coincidentally, it saves us the trouble of thinking how to get Moonlight to get inside the room."

Soon, Moonlight made his way inside the room.

All of them had a room to themselves. When they saw how clean and tidy Engineer Yang's room was, the other engineers felt jealous again.

Engineer Peng said, "When did this lad's room become so tidy and neat? He must be waiting for Team Leader Li to visit him later and purposely cleaned his room."

The room was a suite with a small living room, a bedroom, and a semi-opened washstand.

Moonlight's field of vision looked around the small living room and finally settled on the bedroom door.

The room to the bedroom was also wide open. Moonlight's field of vision headed in that direction.

When they saw Engineer Yang lying on the bed with a pair of underpants and without a quilt cover, the four engineers subconsciously blocked Zi Yi's line of sight.

"How restless is Old Yang? To think that he's lying there naked without a quilt."

"I didn't expect Old Yang to be an exhibitionist in private."

"It seems like I had belittled Old Yang. Not only is he an exhibitionist, but he also didn't even close the door. Was he waiting for someone to visit him?"

"F\*ck! He's too shameless!"

Zi Yi whose vision was blocked had narrowed her eyes. She had caught a glance at Engineer Yang's face earlier. His complexion did not seem right. She thought for a moment and said, "Are you all planning to continue looking at Engineer Yang sleeping naked?"

The men collectively spat in distaste.

Engineer Peng said, "Move Moonlight to the living room and wait. Looking at his shameless sleeping position, I'm pretty sure someone will go and visit him later."

Engineer Chu immediately agreed. "That's right. We have to protect Old Yang's chastity."

Zi Yi: "..."

These four people must have been soaked in lemon these days, every comment they made was so sour.

As someone who was married, Zi Yi simply could not understand the feelings of the four single otakus.

Soon, Moonlight headed to the living room.

All of them widened their eyes and waited.

Half an hour passed.

Zi Yi found it too boring to wait and so, she turned around to the other materials.

After she had worked on the materials for around an hour or so, she even went to enjoy some snacks. When it was almost time to knock off from work, she walked over to the four men standing there who were about to turn into stones and asked, "Did anyone enter Engineer Yang's room?"

The engineers suddenly recovered their senses.

Engineer Peng touched his face and seemed a little unwilling to admit defeat. "We waited all afternoon but no one came in."

On the other hand, Engineer Chu seemed to have detected something amiss. "Since no one came, why did Old Yang leave the door open? Moreover, didn't he sleep for a little too long?"

Engineer Chu made a guess. "It must be because he sprained his waist last night and didn't sleep a wink. That's why he's sleeping like a pig right now."

The thermos flask that Team Leader Li had prepared for Engineer Yang was brought over by Engineer Meng. He said to the others, "When I brought the food over for him in the afternoon, he woke up and ate some. However, I can't remember if I had closed the door for him when I left."

After Engineer Meng said that, the four of them suddenly felt that it was boring.

"Get Moonlight to come back. It's so uninteresting. I thought that someone would go and visit him."

In fact, they wished that no one had gone to visit Engineer Yang.

Engineer Meng ordered Moonlight to come back.

It just so happened to be time for dinner and the four of them left to eat.

Zi Yi purposely left later. She walked to Moonlight and checked up on him for a short while before she left.

Mr. Tang was available today and he was the one who sent her out of the base today.

After Zi Yi got into the car, the first thing she did was to say, "Get your men to pay more attention to Engineer Yang and Team Leader Li."

Mr. Tang's expression turned serious. "Did you discover anything?"

"Mhmm." Zi Yi thought for a moment before she said, "Engineer Yang's complexion seemed off. He seems to have been poisoned."

Mr. Tang pondered for a few seconds and nodded his head. "Ok, I understand."

...

When the engineers were making their way back to the dormitory at night, Engineer Chu suddenly made a suggestion. "Old Yang has spent the whole day in his room. Why don't we go and visit him?"

Even though they were jealous, he was, after all, a teammate whom they had hung out with for half a year together. It was impossible for them to really ignore him.

However, when Engineer Gong knocked on Engineer Yang's room, there was no movement even after a long time.

"Hmm? Don't tell me Old Yang went out?"

"Knock again. Perhaps he's fallen asleep."

He increased his force and knocked a few more times. However, there was still no movement inside.

"Where did Old Yang go?"

"Don't tell me he went on a date with Team Leader Li again?"

In the end, the four of them lost interest and went back to their rooms.

Engineer Yang had indeed left to look for Team Leader Li.

Both of them were standing in a dark corner and playing kissing games. Team Leader Li pushed the man who was burying his head in her shoulder and said, "You should go back."

### **Chapter 835: Why Does It Seem Like Something Is Moving Inside This Pendant?**

Engineer Yang only wanted to hold hands with Team Leader Li when he got so unlucky enough to sprain his waist. Since he was able to take such advantage of Team Leader Li today, how could he be willing to leave?

Team Leader Li put her hands on his shoulders and her tone of voice contained a hint of dissatisfaction. "Was the lunch and dinner I prepared for you delicious?"

Engineer Yang did not immediately notice what she said. His blood was boiling. As someone who had been a virgin for thirty years, the only thought he had in mind was to take advantage of Team Leader Li. It was only a few seconds later that he vaguely responded. "It was delicious."

"Really?" Team Leader Li asked, "Did you finish all the food?"

Engineer Yang anxiously tried to reach his hand into her clothes. "I finished it."

Finally, a trace of displeasure flashed across Team Leader Li's face before disappearing. She suddenly blew a breath of air in his ear and whispered, "Get off early from work tomorrow. I'll bring you to my dormitory."

The moment Engineer Yang heard that, his body trembled with excitement.

He hastily raised his head from her shoulder and nodded repeatedly. "Ok, ok!"

Team Leader Li tidied up her clothes and said, "Go back early tonight. Your colleagues will definitely come looking for you later."

Following that, she took out a cross pendant and passed it to him. "I specially bought it for you."

Engineer Yang looked at the pendant Team Leader Li handed him and he was absolutely elated. He hastily took the pendant and looked at it closer before he said in surprise, "Why does it seem like something is moving inside?"

"That's glitter powder. I had it added inside. Doesn't it look beautiful?"

Since Team Leader Li said that it looked beautiful, Engineer Yang would certainly agree with her. "Yes, it's beautiful."

Team Leader Li smiled and said, "Then you should always wear it on you. You can regard it as always having me by your side... Hurry and go back, you still have work tomorrow, so don't tire yourself out."

Engineer Yang was captivated by Team Leader Li's gentleness and he put the pendant in his chest pocket before he took his leave.

After Engineer Yang left, the smile on Team Leader Li's face disappeared and she turned around. She then headed in the other direction.

The first thing she did when she returned to her dormitory was to take a shower.

After she finished showering, she saw a man standing by the bed.

Team Leader Li only had a bath towel wrapped around her body. She was delighted at the sight of the man and hurried over as she hugged his waist from behind. She then leaned her head on his back and her tone of voice contained traces of grievance. "Did you see how that guy took advantage of me? I'm disgusted to death."

The man did not turn around, but he gently appeased her. "It's been hard on you."

Team Leader Li felt a little better deep down inside and she asked, "Can I stop being in contact with that engineer from tomorrow evening onwards...? He's so ugly and short and acts as though he has never

seen a woman before in his entire life. He even wanted to sleep with me just after meeting me a few times!”

Speaking of this, Team Leader Li recalled the scene where Engineer Yang gnawed on her shoulder and she felt nauseated. Her hands on the man’s waist reached the buckle of his belt. She wanted to have the man in front of her remove the disgusting feeling that the engineer gave her.

However, as soon as she was about to unbuckle his belt, the man stopped her hand and spoke in displeasure. “It’s dangerous here. Do you want our relationship to be exposed?”

“But...” Team Leader Li felt even more aggrieved.

The man’s voice turned gentle. “As long as this matter is complete, I’ll take you abroad. At that time, I’ll be yours.”

Team Leader Li’s heartbeat suddenly accelerated and she asked, “Really?”

“Yes. I have a villa abroad and you will then become the female owner of it. I will let you live a life of luxury.”

“Mhmm.”

“However, you still have to follow the plan tomorrow night. It’s the only way we can get out of here faster.”

“Ok.”

The man removed her hand and left after he said his piece.

Team Leader Li looked at his back and placed her hands on her chest. She imagined the scene of her living with her beloved in a foreign country, and living the life of a wealthy lady, and the corner of her lips curved up unconsciously.

...

Zi Yi and Lu Jingye returned to the villa near M.Uni today.

She wanted to check what kind of poison those people on the bar street were inflicted with.

The robot in the lab had already gotten the results. Zi Yi took a glance at the results and said to Lu Jingye, “The poison they were inflicted with can be transmitted, but it will remain latent for a week.”

After Lu Jingye heard what she said, he unconsciously furrowed his brow. “What kind of reaction will this poison cause?”

“At the beginning, there will be red spots all over the body. In slightly serious cases, their whole body will start shaking and they will get hallucinations. For the more serious cases, they will die.”

“Can you detoxify the poison?”

“I can, but I need someone who is poisoned for me to research on.”

Lu Jingye furrowed his brow further upon hearing what she said.

She was currently pregnant and he did not wish for her to be involved at all.

Both of them came out of the lab and were about to rest for the day, when Zi Yi's phone rang.

The call was from Dou Yurui.

Dou Yurui's voice sounded a little anxious. "Cousin Yiyi, can you recommend me a doctor that treats skin diseases?"

Zi Yi was a little surprised. "What's wrong? Is there something wrong with your skin?"

"Mhmm. There are many red spots on my skin that suddenly appeared during these past few days. I wanted to find a doctor to get a check-up."

Zi Yi furrowed her brow and she asked, "Where are you right now?"

"I'm at the workplace." Dou Yurui said, "I've been too busy these days and I haven't had time to go home."

Zi Yi was relieved and asked, "Other than you, does anyone else in your unit have the same symptoms?"

"Yes. The whole group of us are showing the same symptoms." Speaking of this, Dou Yurui's voice sounded more constricted. "Cousin Yiyi, do you think we are infected with some kind of virus from the corpse?"

Zi Yi responded affirmatively and did not hide it from her. "Come to the courtyard of my villa near M.Uni... Forget it, I'll get someone to fetch you."

"Ok."

After hanging up the phone, Zi Yi called out Shadow II. "Immediately head to the forensic department to pick up my cousin."

Shadow II drove out with Zi Yi's racing car.

Zi Yi and Lu Jingye sat on the sofa. Both their expressions looked very serious.

Zi Yi said with certainty, "This has been done by either Country D or Country A."

"Mhmm." Lu Jingye held her hand. "We should inform Father about this first. If this is really something that either of the two countries did, we cannot settle it in private."

Zi Yi nodded her head.

Lu Jingye took out his phone and dialed his Father's phone number.

Second Master Lu and Lu Jingye were on the same wavelength. They would not allow Zi Yi to settle this problem in private. "Little Zi, you can give your cousin a check-up first. I'll report this incident to the higher-ups right away and they will come forward when the time comes. Little Zi, it's best that you don't do anything."

After hanging up the phone, Lu Jingye said, "If this problem becomes serious, many other things will happen and it's not convenient for us to step out then."

What Lu Jingye meant was appeasing the citizens.

Zi Yi nodded her head. After thinking for a moment, she said, "Then I'll break down this type of poison first and create the antidote. When the time comes, I'll hand it to Teacher and the rest."

"Ok."

They did not have to wait for long before Shadow II brought Dou Yurui over.

There were red spots in many different places on her skin, but her mind was still sober, which proved that the poison had not been active for a very long period of time.

### **Chapter 836: It's My Perfume. A Male's Scent!**

Zi Yi wanted to stand closer to see Dou Yurui's situation more clearly.

At the sight of Zi Yi coming closer, Dou Yurui quickly retreated. "Cousin Yiyi, don't come over. I'm pretty sure this is contagious. Stay away from me."

"It's fine, it won't spread to me." Zi Yi took out a circular ball and threw it in the air. Immediately after, an invisible barrier covered Dou Yurui.

Zi Yi said, "Follow me."

She then led Dou Yurui down to the underground lab.

This was Dou Yurui's first time going into Zi Yi's underground lab. As soon as she went in, there was a corridor where the end could not be seen. On both sides of the corridor were different laboratories. The walls were all made of transparent materials so everything inside the lab could be clearly seen.

There were all kinds of different experiment equipment she had never seen before, robots who were doing experiments, all kinds of experimental carriers, and ongoing chemical reactions.

Dou Yurui could not hold herself back anymore and asked, "How many different kinds of experiments are you doing here?"

"Many."

Zi Yi led her inside. They walked for a few minutes and stopped outside one of the laboratories.

Zi Yi pressed a button near the door and it opened. She then took a step inside first.

Dou Yurui remained standing outside as she did not dare to take a step. Everything inside was of cutting-edge technology and she was suddenly worried that she could not afford to compensate if she were to damage anything.

After Zi Yi made her way inside, she directly headed to the operating bed and brought up a virtual screen. Subsequently, a series of data appeared on it.

After the data finished flashing, the screen turned blue.

Zi Yi tilted her head and looked at Dou Yurui standing outside the door. "Cousin, come in."

Only then did Dou Yurui carefully make her way inside.

Zi Yi pointed at the operating bed beside her and said, "Lie down here. I'll check the toxins in your body."

Dou Yurui walked over and lay down.

"The test will last half an hour. If you're tired, you can take a short nap first."

Dou Yurui: "..."

She suddenly had a thought that the disease she was infected with did not seem to be serious at all.

At the thought of this, Dou Yurui realized that she was really exhausted. As soon as she closed her eyes, she fell asleep.

Zi Yi finished setting up the program and the robot soon extracted Dou Yurui's blood and skin cells.

Just then, Lu Jingye came in from outside and told her, "Right now, there are more than two dozen people with this infectious disease in the city. The higher-ups are paying more attention to this."

Zi Yi nodded her head and the two of them looked at the virtual screen in front of her.

The data was constantly fluctuating. Around five minutes or so later, the blood test and analysis of the skin cells were completed.

Zi Yi took a glance and said to Lu Jingye, "There is a toxin that is extracted from poisonous algae found in the deep sea and the toxin of the worm race's mucus."

Lu Jingye furrowed his brows. "The culprit behind this is that male worm?"

"Yes... the worm race is a vengeful race. In particular, since we killed the female worm."

"Is this type of poison easy to detoxify?"

"It is, but there are two types of medicinal ingredients that are a little hard to find."

"What are the medicinal ingredients?"

Zi Yi told him the names of the two ingredients.

Lu Jingye nodded his head. "I'll send someone to look for it right away."

Zi Yi thought about it for a moment and quickly created a list on the virtual screen. "In case you can't find those two medicinal ingredients, you can send someone to prepare these things for me. I can extract the elements I need from these ingredients and it's the same if I create them through chemical reactions."

After Zi Yi said that, she sent the list to Lu Jingye's phone.

He took out his phone and took a glance before sending it out.

When they were done, both of them looked at Dou Yurui who was lying on the bed.

Lu Jingye asked, "Are you planning to keep your cousin here?"

“No. I’ve developed a medicine that can suppress hundreds of poisons before, I’ll have her eat it later. The red spots on her body will subside tomorrow morning. As long as the antidote can be developed within a week, she’ll be completely fine.”

“What will happen if the antidote can’t be developed in time?”

“Nothing much. At most, she would feel the whole process of the disease attacking her body.”

Lu Jingye realized that he was the only one who was nervous.

Zi Yi seemed to have sensed his thoughts and suddenly chuckled before she explained, “The infectious diseases on Earth are not exactly a big deal. As long as I can find the source of the infection, I can create the antidote. The reason why other people can’t create the antidote is that the medical equipment is too backward and many elements cannot be extracted. What’s really terrifying is interstellar viruses. The source of the virus cannot be found at all.”

Lu Jingye’s lips could not help but curve up. He raised his hand and touched her face.

Zi Yi rubbed her face in his palms and said, “We can wake her up now.”

Dou Yurui was a little confused when she woke up. “Cousin Yiyi, have you finished the examination for me?”

“Mhmm. The check-up is done.”

Zi Yi pointed to the medicine and water placed on the side and said, “Take this medicine first. It can suppress the poison in your body for a week. I will create the antidote in a week.”

Dou Yurui got even more confused. “That’s all?”

Zi Yi nodded her head and her tone of voice sounded light. “Yes, that’s all.”

Dou Yurui: “...”

She thought that at the very least, she had to be isolated and she would suffer plenty from the toxin attacks.

Zi Yi and Lu Jingye waited for Dou Yurui to finish the medicine and arranged a room for her. Following that, they went to rest.

The next morning, Zi Yi passed Dou Yurui a bottle of medicine. “Take these to your colleagues. As for the remaining ones, you can give them to infected individuals that you encounter along the way who are suffering from the same symptoms. However, you should keep them under control. When I make the antidote, I will get someone to send them over.”

Lu Jingye added and said, “Don’t mention that Yiyi is involved in this for the time being.”

Dou Yurui glanced at Lu Jingye and knew that this incident was definitely not as simple as it seemed. She nodded and said, “I understand.”

Dou Yurui left soon after. Zi Yi contacted Elder Tang and told him about this incident.

Elder Tang was already aware of this situation. He was preparing to study this infectious disease with several other traditional Chinese medicine organizations. He didn't expect Zi Yi to already have a countermeasure and he immediately agreed to her plan.

Zi Yi headed out to the Robot R&D Center.

The moment she entered the building, she smelled a strange smell. She asked the engineers who were making preparations, "What's that smell?"

"Zi Yi, isn't your nose too sensitive?" Engineer Yang smiled triumphantly. "It's my perfume. A male's scent!"

Zi Yi: "..."

Her Ah Jing had never sprayed such pungent perfumes before and as it turns out, there were such perfumes.

"How is it? Doesn't it smell good?"

Zi Yi looked at him sullenly and warned him. "Don't get too close to me. I can't take the scent of this perfume."

Engineer Yang: "..."

The other four engineers did not hold back at all and started laughing loudly. "Hahaha..."

"See what I told you? You suddenly started spraying perfume and Zi Yi definitely can't stand it. To be honest, Zi Yi's not the only one. All of us can't take it either."

After Engineer Chu said that, he quickly increased his distance from Engineer Yang.

The other three engineers also stayed far away from him.

Engineer Yang clicked his tongue. He felt that these people were just jealous of him.

### **Chapter 837: How Did You Come In When You're Wearing a Necklace?**

Engineer Yang wanted to show off so he purposely exposed the necklace hanging around his neck.

Zi Yi saw it and asked, "How did you manage to come in when you're wearing a necklace?"

Engineer Yang said with a smile, "There weren't any problems with this necklace when undergoing the checks. As long as the detector did not sound any alarms, it's fine for me to wear it."

Speaking of this, he even proudly showed it to Zi Yi. "What's more, Team Leader Li gifted me this necklace. How could the things she gave me have any problems?"

Zi Yi looked at the necklace for a few seconds and said, "There's something moving in this pendant."

"That's glitter powder. Isn't it very beautiful?"

Before Zi Yi could answer, Engineer Chu who was standing on the side could not take it anymore and said, "Aren't you embarrassed carrying such a girly-looking necklace? What's there to see?"

"I think you're just jealous of me."

Engineer Yang did not care about him at all and deliberately looked at the necklace as he admired it. "This colorful glitter looks so beautiful inside this cross-shaped pendant. I find it pretty and how dare you say it's girly-looking? I think you're just claiming grapes are sour since you can't eat them."

"Haha."

The work continued.

When they returned to the lab after lunch, Engineer Yang did not rest and instead, he sat there and looked at the necklace Team Leader Li gave him.

Zi Yi took a glance in his direction before she went to rest in the lounge specially prepared for her.

While Engineer Yang was admiring the pendant, he noticed that there was something crawling inside. He gasped in surprise and rubbed his eyes before he continued staring at it. After looking at it for some time, there was still something crawling around.

"Could it be that an impurity was mixed in it?"

Out of curiosity, Engineer Yang intended to open the cross to take a look.

The cross was movable. If one pressed a bump on the side, there would be a hole.

When he opened the cross, a black spot flashed around. Engineer Yang blinked and muttered, "Could it be that my eyes failed me just now?"

Having said that, he looked at the glitter inside the cross. As he was worried he might spill it, he closed the hole.

However, after he closed it, he felt his eyes go blurry before returning back to normal in the next second.

The others returned to the work area after taking a short rest.

Halfway through, Engineer Yang made a suggestion. "Let's test out the performance of Moonlight. I have a new idea. Didn't we install a barrier for Moonlight the previous time? Let's test to see if Moonlight can walk out of the R&D Center."

The engineers thought that it was a good idea.

Engineer Yang said with great enthusiasm, "I'll give Moonlight the orders today."

Having said that, he walked to the control panel beside Moonlight and quickly entered a set of instructions.

Zi Yi walked to his side and looked at the data displayed on the screen.

Just as Engineer Yang was halfway through entering the instructions, he suddenly paused.

Zi Yi looked at how Engineer Yang seemed to be unaware of how he entered an additional code and she pursed her lips.

After Engineer Yang finished entering the instructions, he ordered Moonlight to turn invisible and at the same time, he opened the door for the robot.

The other four engineers went to the control panel on their side and looked at the image projected from Moonlight's point of view.

Moonlight did not manage to make it out of the base. He was soon detected by the monitoring system.

The engineers were a little disappointed. "I didn't expect Moonlight to be detected so soon."

"It seems like we have to try other methods."

For the whole afternoon, all the engineers were trying out other methods.

When it was almost time for Zi Yi to knock off from work, she casually gave them a pointer or two. When they heard her pointer, they immediately sobered up.

"Zi Yi, you're so smart. I didn't know we could do it like this."

"We'll change the program right away."

"After that, we can test it out."

When they mentioned they wanted to change the program, Engineer Yang stopped them and said, "Let Zi Yi do it. Since she can put forward such an idea, perhaps she might think of other ideas when she's changing the program."

Everyone thought that what he said made sense and ended up having Zi Yi change the program.

After the change, the engineers got Moonlight to take a stroll around the base once again. This time round, Moonlight went undetected.

The engineers were all extremely happy and there was no need to mention how excited they all were.

After Zi Yi got off work, the engineers studied the program Zi Yi had changed until they got off work.

After work, Engineer Yang excitedly made his way to Team Leader Li's place.

The place where Team Leader Li stayed was a little far from their dormitory. When Engineer Yang made his way over, he did not encounter a single patrol guard.

Engineer Yang's mind was full of Team Leader Li and he did not notice the unusualness.

There were not many women inside the base so most of them lived in a single building.

When Engineer Yang arrived outside of Team Leader Li's dormitory, he was suddenly puzzled. He did not know which floor she lived on.

Unexpectedly, just as he was straining his neck to take a look around, Team Leader Li came out of the building.

“Engineer Yang, you’re here.” Team Leader Li gave him a charming smile and said, “Follow me.”

Engineer Yang followed behind her like a dog on a leash.

Team Leader Li brought him into her room and Engineer Yang immediately held her from the back and was about to kiss her shoulders.

Team Leader Li hastily stopped him and said softly, “What’s the hurry? Come, I prepared some food for you. Let’s eat something first.”

“But I have to go back before midnight.”

“Then let’s have a glass of wine first.”

When he heard that they were going to drink, Engineer Yang thought that having a glass would not delay things and could even improve the mood. He immediately replied excitedly, “Ok, sure!”

Team Leader Li poured half a glass of wine for both of them.

Engineer Yang finished the glass in one gulp and was about to pounce on Team Leader Li, when in the next second, he felt his body stiffen.

Subsequently, there was an expression on his face that seemed as though he was consumed by lust.

Team Leader Li looked at Engineer Yang and felt extremely disgusted at the sight of him. Just then, a man suddenly appeared.

The man said, “He’s drugged right now. Get him to open the door to the S-Class laboratory later. I’ll transfer away all the guards over there just moments before he arrives.”

“There are tons of surveillance over there. What if the surveillance captures the scene?”

“Don’t worry. I already had people taking care of the surveillance.”

Team Leader Li nodded her head. Looking at Engineer Yang’s face, she had the urge to give him a few slaps across his face. “I don’t want to see this disgusting man at all.”

The man walked over to Team Leader Li and hugged her as he said softly, “Don’t worry, he will be disappearing from here very soon.”

Team Leader Li smiled.

Engineer Yang did not expect that he really slept with Team Leader Li. When he recovered from the drug, the way he looked at her was as though his eyes would turn into hearts.

Team Leader Li got down from the bed while wearing a thick robe. She fiddled with the tie with her back facing him and said in a slightly embarrassed tone, “Now that I’m yours, will you listen to me on everything in the future?”

“Of course, of course.” Engineer Yang hastily sat up and looked at Team Leader Li’s back view. If not for the fact that he was lacking in strength, he felt like pouncing on her again. That type of feeling was simply too great. He felt that if Team Leader Li wanted him to die right now, he would be willing to do so.

Team Leader Li turned around and gave him a wink. "Then go to your workplace. I want to see your appearance when you work."

### **Chapter 838: Little Zi, Something Happened To Moonlight**

At 11 in the evening, the moonlight was shining into the base through the windows, and coupled with the light source from the street lamps, it gave off a solemn feeling.

It was not the first time Engineer Yang came back to the research lab at this time. However, tonight was a little different compared to before. The 24-hour guard at the entrance was nowhere to be seen.

Even though something was different, Engineer Yang whose mind was filled with flowers did not sense anything amiss. He went in after verifying his identity.

Only Engineer Yang's footsteps could be heard in the corridor. After opening the doors to the building, the robots in the hall were still working. Engineer Yang directly made his way into the lab.

He went over to Moonlight and stood in front of him. All of a sudden, his mind buzzed, and shortly after, his hand stretched toward the control panel.

Soon, a string of code appeared on the control panel and while the program ran, it gradually became chaotic.

Two minutes later, Moonlight opened his eyes and a red light flashed from his eyes. In the next second, he closed his eyes once again.

...

Zi Yi and Lu Jingye returned to the Lu Family's villa tonight.

Second Master Lu came back today and after having dinner, the father and son headed to the study room.

After Second Master Lu sat down, he came straight to the point and asked, "Did Little Zi get involved that night?"

"Yes." Lu Jingye did not conceal anything.

Second Master Lu was silent for a long time before he sighed and said, "I knew she would make a move. Her actions have indeed made us feel better, but if Country A gets wind of the culprit, have you ever thought of the consequences?"

Speaking of this, he tapped the table with slight irritation and said, "Only the three of us can know of this. You can't tell anyone even if it's the Dou Family."

"Father, don't worry. We will not tell anyone about this."

"Mhmm."

A moment of silence passed by before Second Master Lu changed the topic to the recent poisoning in the capital.

“The authorities are paying attention to this. Get Little Zi to stop concerning herself with this incident and let others do it.”

Second Master Lu felt that his daughter-in-law was too high-profile these days and this was not good for her. He wishes that she would be a little more low-profile.

Lu Jingye naturally would not object to his suggestion.

In the living room.

Zi Yi and Mrs. Lu were seated on the sofa.

Mrs. Lu was obviously in a better mood, as Lu Jianlin had come back. She started talking to Zi Yi about how she would be dealing with the university student.

“I gave her two choices. One is to leave the company and I will not get into a dispute with her about how the design was sold. The second choice was for her to find a way and take the person who stole the design draft to court.”

“What was her choice?”

“The first one.”

Speaking of this, Mrs. Lu sighed disappointingly.

“Mom, why did you sigh?”

“This child is very talented in designing. It’s a pity.”

“Since she chose the first one, what’s there to feel pity about? These types of people won’t make it far in the future. Besides, there are still many talented and capable designers under you and it’s not a must to have her around.”

When Zi Yi explained it like that, Mrs. Lu felt that it was reasonable and let go of the knot in her heart.

Night time, before Zi Yi and Lu Jingye fell asleep.

Zi Yi leaned in Lu Jingye’s arms and he told her about what his Father said.

“For this matter, you only have to create the detoxification medicine. The higher-ups will deal with the subsequent matters.”

Zi Yi nodded her head. This did not matter much to her and so, she started telling him about what happened in the Robot R&D Center.

“We have already confirmed that Deputy Director Huang and Team Leader Li are the spies. We should be able to obtain evidence tonight.”

Lu Jingye hugged her from behind and placed one of his hands on her slightly protruding belly.

Zi Yi moved around and said, “Today, Engineer Yang sprayed a perfume and it smelled terrible.”

Lu Jingye was a little dumbfounded at the sudden jump in topic and did not know whether to laugh or cry. He then sniffed around her ears and asked, “Then do you think my scent smells good?”

Zi Yi's lips curved up. "It smells good. You don't spray perfume, but there's a scent coming from you that I like."

There was only a light aftershave scent on Lu Jingye.

"Then what scent is it?"

Lu Jingye was breathing on Zi Yi's shoulders. She shrank her neck a little due to the ticklish feeling and turned around while looking at him with a smile. "The scent of a man."

The next second, her lips were sealed.

...

Early the next morning, when Zi Yi made her way to the lab, there were several guards standing outside the building. At the same time, many of the leaders had grim expressions.

When they saw Zi Yi alighting from the car, Deputy Director Huang strode over to her and said with a serious face, "Little Zi, something happened to Moonlight."

Zi Yi revealed a surprised expression. "What happened?"

"He rioted. The engineers are currently trying to control him. Mr. Tang and Director Zheng are both inside too." Having said that, he then turned around. "Follow me."

Zi Yi nodded and followed him as they headed to the door.

While walking, Deputy Director Huang said, "Moonlight has never had such a big riot before and the engineers said that you mentioned an idea to improve Moonlight yesterday."

Speaking of this, Deputy Director Huang suddenly stopped talking.

Zi Yi remained quiet and did not say a single word.

Soon, they passed by several doors.

The hall was very chaotic right now and Moonlight was causing damage all around.

The engineers were so anxious in trying to control Moonlight. Mr. Tang and Director Zheng stood to the side and their faces were also filled with anxiety.

"Mr. Tang, Little Zi is here."

When Deputy Director Huang called out, Mr. Tang and Director Zheng looked over at the same time.

Zi Yi walked to where they were and stood there as she looked at the rioting Moonlight.

Moonlight was equipped with several different kinds of weapons. Right now, he had revealed all the weapons. The engineers tried to stop him, but they could not approach him at all.

"Little Zi, do you have any way to turn off Moonlight's program?" Deputy Director Huang asked.

"Yes."

When Zi Yi said that, the three of them looked in her direction at the same time.

Zi Yi pointed at Moonlight. Just as she was about to speak, they saw Engineer Yang grabbing a huge wrench and he threw it toward Moonlight's control panel.

"Stop it!"

The other engineers all yelled at the same time, but they were too late. The wrench had accurately struck the control panel on Moonlight. The next moment, spurts of electric current were emitted from Moonlight's body, and in the end, it fell down with a thud.

Everyone quickly went forward and surrounded Moonlight.

After Engineer Meng checked the robot, he shouted angrily at Engineer Yang, "Why the f\*ck did you destroy Moonlight's control panel?!"

Engineer Yang's body shook all of sudden and he looked at Moonlight with an expression of horror. He shook his head and said, "I didn't... I didn't want to do that."

Having said that, he looked at his hand. What had he done just moments ago? Why did he not have any recollection of it?

Engineer Chu angrily shouted, "Everyone saw what you did, Yang Changpeng. Now you're telling us you didn't?"

"I-"

"Stop arguing. The most important thing right now is to export the programs in the control panel or else our hard work for the past six months would be completely destroyed."

Engineer Meng quickly took out the control panel from Moonlight's chest and connected it to another display panel. They wanted to export all the programs, but the moment they made the connection, garbled codes appeared.

### **Chapter 839: Do You Think of Us As Blind Men?**

"Gasp!"

All the engineers had ashen complexions and they gasped at the same time.

"What's the matter?" Mr. Tang asked.

"There's a virus in Moonlight's program. Everything in here is destroyed."

The moment someone said that, there was a huge change in the expressions of both directions.

Deputy Director Huang anxiously asked, "Why did it get infected with a virus? The protection system in our base is top notch and how could a virus possibly infiltrate into here?"

"It might not necessarily be a virus implanted by an outsider." Zi Yi looked at him and said, "Clearly, someone inside the base had planted the virus."

Deputy Director Huang's expression turned even more serious. "Since that's the case, immediately begin investigations!"

Having said that, he turned to Mr. Tang.

Mr. Tang said to Director Zheng, "Immediately send someone to bring out the surveillance for the past two days."

Director Zheng nodded his head and quickly called the monitoring room. "Check the surveillance of the S-Class robot laboratory and transfer the visual over."

Soon, an image of the surveillance was transferred to one of the monitors here and everyone stared at it.

The video started to play back quickly starting from the morning of yesterday.

When the image of Zi Yi controlling the control panel was seen, Deputy Director Huang suddenly asked, "Little Zi, what are you doing here?"

"Zi Yi thought of an idea to improve Moonlight's concealment function yesterday and she's currently inputting the codes."

The moment Engineer Meng finished explaining, Deputy Director Huang's expression turned stern as he said, "I'm not trying to suspect Little Zi on purpose, but ever since Moonlight was created, there hasn't been such a huge riot that happened. Why did something like this happen right after Zi Yi made changes to the program?"

His words clearly meant that he was suspicious of Zi Yi.

The engineers turned to look at Zi Yi and their expressions also changed slightly.

A sneer curved up on Zi Yi's lips.

She was not in a hurry to explain. She looked at Mr. Tang and said, "We have yet to finish watching the video of yesterday's surveillance."

Deputy Director Huang said, "In that case, let's continue and watch. However, if it's because of the new codes Zi Yi entered which ruined Moonlight, I hope that Mr. Tang would handle this matter impartially. Otherwise, it'll be letting down half a year's worth of hard work by these engineers."

Deputy Director Huang spoke as though he was a sword of justice and this caused the other engineers to look at Zi Yi in an even more doubtful manner.

Mr. Tang and Zi Yi made eye contact for two seconds and he nodded his head. "Let's keep watching."

The video continued playing and soon, it was nighttime.

Just then, Zi Yi tilted her head and glanced at Deputy Director Huang.

He had a serious expression as he stared at the screen.

However, when Engineer Yang returned to the laboratory after 11 o'clock in the evening, his pupils shrank and he quickly recomposed himself as he sternly asked Engineer Yang, "Why did you come back to the lab at this time?"

"I..." Engineer Yang suddenly furrowed his brows. He had forgotten why he returned to the lab last night.

When Engineer Yang got anxious, cold sweat trickled down his face.

Deputy Director Huang's expression looked fiercer than before. "What did you do to Moonlight?"

"I didn't do anything." Engineer Yang subconsciously retorted.

Deputy Director Huang snorted coldly and continued looking at the video as he said in a heavy voice, "You had been standing next to Moonlight's control panel for so long and clearly, you've entered tons of programs. The evidence is conclusive and yet you're denying what you did?"

Following that, he turned to look at Mr. Tang. "Mr. Tang, now it's confirmed that Engineer Yang did something to Moonlight, how should we deal with him?"

When Engineer Yang heard that they were going to deal with him, his legs went limp and he almost fell to the ground. He quickly stabilized himself and argued back loudly. "I really didn't do anything tMoonlight..."

"Do you think of us as blind men?!" Deputy Director Huang shouted back.

"I-"

"Hmph! I think it's because the truth has been exposed and you're still trying to argue your way out."

Deputy Director Huang turned to Mr. Tang and said, "Mr. Tang, hand this man over to me to interrogate. I feel that he must have other accomplices too."

"There are indeed other accomplices." Just then, Zi Yi suddenly chuckled.

Her laughter was inappropriate for the current situation and Deputy Director Huang's heart clenched tightly. However, he did not reveal anything and merely glanced in Zi Yi's direction for a second before turning back to Mr. Tang.

Mr. Tang looked at the ashen-faced Engineer Yang and asked, "Why were you here last night?"

"I..." Engineer Yang wanted to tell them the reason, but his mind was in chaos and he could not recall anything.

Just then, Zi Yi walked to Engineer Yang and said as she walked, "It's possible that Engineer Yang had been drugged last night. I have a method that can make him remember what happened last night real quick and we can give it a try."

The moment Deputy Director Huang heard what Zi Yi said, his fingers next to his side bent and he subconsciously followed her.

"Little Zi, what do you intend to do? I'll help you control Engineer Yang."

When Engineer Yang heard that they were going to control him, his body trembled and he subconsciously tried to run.

Deputy Director Huang quickly dashed over.

Looking at them where one was escaping and one was giving chase, the other engineers were dumbfounded.

Just then, Mr. Tang said to Director Zheng, "Stop Deputy Director Huang."

Director Zheng nodded and chased after him.

Engineer Yang was very familiar with this place as he dodged and evaded Deputy Director Huang. Even after some time had passed, Deputy Director Huang was still unable to catch up with him.

It seems like Deputy Director Huang started to get anxious. He suddenly picked up a sharp iron bar from the side and jumped up as he tried hitting Engineer Yang.

Seeing that the iron bar was about to hit the back of Engineer Yang's head, a hand quickly stretched out from the side and stopped him.

While Director Zheng was running toward Deputy Director Huang to stop him, Zi Yi walked to the control console in the hall and quickly pressed a few buttons.

At the same time when Director Zheng stopped Deputy Director Huang, two robots managed to catch Engineer Yang.

"Old Zheng, what are you doing?"

"Ahh... let go of me. It's not me!"

Deputy Director Huang and Engineer Yang shouted at the same time.

Director Zheng grabbed Deputy Director Huang's wrist and said, "Mr. Tang told me to stop you."

Deputy Director Huang suddenly turned to look at Mr. Tang.

Mr. Tang had a stern expression on his face right now. His eyes seemed to contain a penetrating sharpness and there was a surge of an ominous feeling.

Mr. Tang said to Zi Yi, "Little Zi, get rid of the hallucinogens in Engineer Yang."

"Ok."

Zi Yi headed towards Engineer Yang.

Deputy Director Huang stared at Zi Yi as his heartbeat quickened.

However, he could not move right now. Otherwise, he'll be a goner.

Zi Yi walked to Engineer Yang who was struggling to escape from the robot's grasp and said, "You're being controlled. You better stop struggling otherwise it'll worsen your crime."

Engineer Yang immediately stopped struggling. He looked at Zi Yi with fear and helplessness in his eyes. "Zi Yi, I didn't touch Moonlight. Please help me."

He subconsciously felt that since Zi Yi was someone Mr. Tang brought into this team, she would definitely be able to speak up on his behalf in front of Mr. Tang.

Zi Yi did not answer him. A silver needle flashed from her fingertips and Engineer Yang felt something connecting in his head. In the next second, he shouted, "I came to the lab yesterday because Team Leader Li wanted to see me work."

Deputy Director Huang's eyes flashed and he asked in surprise, "You came here just because Team Leader Li told you to come. Could it be that it was also Team Leader Li who told you to touch Moonlight?"

Engineer Yang felt confused again. "She didn't."

Deputy Director Huang felt at ease and snorted coldly. "In that case, you were still the one who decided to touch Moonlight on your own accord, right?"

#### **Chapter 840: You've Used the Trick of a Robber Acting Like a Cop Very Well**

Engineer Yang anxiously explained, "No, I didn't. At that time, my mind was in a blank state and my body was being controlled."

"Ha!"

Deputy Director Huang sneered and Engineer Yang's body trembled involuntarily.

Zi Yi tilted her head to look at Deputy Director Huang. His expression was as though he hates evil and his gaze was as if he was facing their enemy.

She said to Mr. Tang, "Why don't we bring out the surveillance on Team Leader Li's side? I feel that there's something wrong with this Team Leader Li."

Speaking of this, she purposely paused for a second and made eye contact with Deputy Director Huang.

He felt his heart clenching tightly, but his face still looked calm. "I agree with what Little Zi said."

Zi Yi smiled. "Since Deputy Director Huang agrees, I'll really bring out the surveillance~"

With that, she snapped her finger in the air and a virtual screen appeared while everyone was staring at her.

Other than Mr. Tang, everyone else revealed a surprised expression.

"Little Zi, how did you bring this virtual screen inside?"

While Deputy Director Huang asked that question, his voice unconsciously tightened.

His heart started beating faster as he tried his best to think about whether there was any monitoring equipment in Team Leader Li's room.

After thinking for a few seconds, he was at ease.

There was a signal barrier in Team Leader Li's room and nothing could be detected.

Zi Yi quickly brought out a virtual keyboard and her ten fingers quickly tapped on the keyboard.

When the scene of what happened last night along with the sound was played in front of everyone through the virtual screen, Deputy Director Huang knew that he was dead meat.

Before everyone could react, he suddenly dashed toward Zi Yi's direction.

"Little Zi, look out!"

"Zi Yi, look out!"

BAM!

When Deputy Director Huang's body shot out, the group of people who were about to rush over ended up standing rooted to their positions.

They looked at the robot that suddenly appeared and gave Deputy Director Huang a kick and following that, the robot swiftly dashed toward Deputy Director Huang to restrain him.

Deputy Director Huang did not even have the opportunity to struggle. He felt an excruciating pain in his arm and when the sound of a bone cracking was heard, his arm had been dislocated.

"OWWW-"

Mr. Tang looked at Deputy Director Huang and said to Director Zheng, "Go and arrest Team Leader Li. Both of them will be handed over to the higher-ups for interrogation."

"Yes."

Deputy Director Huang knew that he was dead meat, but he still wanted to try and struggle. "Mr. Tang, I'm not the one. Someone must be trying to frame me. I've been working for the base for so many years. Don't you know my personality?"

Speaking of this, he looked at Zi Yi with reddened eyes. "She must be the culprit. She possesses cutting-edge robot technology and she can do anything she likes in the base. She must be the spy."

Zi Yi's lips curved up and she said, "You've used the trick of a robber acting like a cop very well."

She then put away the virtual screen and looked at him coldly.

Unexpectedly, Deputy Director Huang felt a chill run down his spine from her gaze.

Soon, Deputy Director Huang was brought away.

Mr. Tang walked to Zi Yi and said to the five engineers who were still in a confused state, "Do you know why I had brought Little Zi here?"

The engineers suddenly recovered their senses and looked at Zi Yi with a complicated expression.

Mr. Tang said, "Little Zi alone can compete against the whole lab. Your skills are merely small tricks in her eyes."

Having said that, he pointed at the man standing next to Zi Yi and said, "This is the robot she made."

The engineers: "..."

Mr. Tang continued to speak, "When you entered the lab, you had signed a life-and-death contract of not betraying the country, and not revealing any information from here. Following on, I hope that you can continue abiding by that. If not..."

He did not finish saying the second half of his sentence. He was originally a leader who seemed to be easy to get along with. Even though he did not finish making the threat, it somehow was even more of a deterrent.

The five engineers hastily nodded their heads. Right now, they had received an even stronger shock than when they realized that Deputy Director Huang was the spy.

Their minds were buzzing and chaotic.

Zi Yi spoke at this moment. "There's still one month to go. I will only be staying here for another half a month. During this period of time, I will lead you and complete an upgraded Moonlight."

...

After catching Deputy Director Huang and Team Leader Li, the evidence was soon obtained from interrogation.

When Country D was still asking China to hand over Zi Yi and Lu Jingye, the latter had already taken out the confessions and evidence of Deputy Director Huang and Team Leader Li.

At the same time, Lu Jingye took out evidence that the man Country D caught was already dead.

Without any more strong pieces of evidence, this matter seemed to have ended like that.

In the following period of time, Zi Yi no longer acted like a bystander and she managed to finish the upgraded version of Moonlight rather quickly.

Even the bottlenecks the engineers encountered previously had been successfully solved by Zi Yi.

In the blink of an eye, it was the weekend afternoon

Zi Yi went to the appointment she had with Dr. Ellis.

Both of them arranged to meet at a fancy coffee shop.

The weekend in the capital was bustling with activity and there were many people inside the coffee shop.

When Zi Yi and Lu Jingye made their way inside, they immediately became the focus of attention.

"Isn't that Second Young Master Lu and Miss Zi? I didn't expect to run into them here."

"Second Young Master Lu is so handsome! Miss Zi is so gorgeous!"

“As expected, they are the perfect couple.”

...

The both of them headed to the booked room under the staff member’s lead. Along the way, many people were whispering about them.

There were a few rooms in the coffee shop.

Dr. Ellis had already arrived and was waiting in one of the rooms.

Besides Dr. Ellis, there was a man who appeared to be in his thirties or forties seated next to him.

When Zi Yi and Lu Jingye appeared at the door, Dr. Ellis greeted both of them. “Mr. Lu, Miss Zi. Good afternoon. Come in and have a seat.”

Both of them came in and sat opposite the man and Dr. Ellis.

The man seated next to Dr. Ellis was wearing casual clothes and looked taciturn. He merely nodded at them and did not have the intention to speak.

Dr. Ellis introduced him. “This is also my assistant. You can address him as Hunter.”

Zi Yi did not care, but Lu Jingye and Hunter had made eye contact.

Following that, both men sat there in silence and acted as though they would not speak.

Zi Yi cut to the chase. “Dr. Ellis has been wanting to meet me time and time again. I don’t believe you just wish to accept me as your student.”

Dr. Ellis clearly did not expect Zi Yi to take the initiative. After losing the initiative, he could only continue speaking with a serious expression, “Miss Zi, you’ve thought of this thing in a complicated manner. I sincerely just wish to take you in as my student.”

Zi Yi’s lips curved up. “I didn’t take any subject related to the topic you are researching and it could be said that all my majors also have nothing related to your research. Why does Dr. Ellis think I’m suitable to become your student?”

“What I like is Miss Zi’s talent in learning. You were able to learn so many subjects in a single semester and win all the scholarships. This feat has already proved your abilities.”

Dr. Ellis continued to speak, “It doesn’t matter if you were not knowledgeable about nuclear in the past. I believe you’ll excel in it if you learn.”

Zi Yi laughed at his words. “However, I don’t like this.”

Having said that, she casually glanced at Hunter seated next to him.

She continued to speak afterwards, “I’m not interested in this topic and so how could I possibly excel? Don’t tell me Dr. Ellis is planning to force me to learn while holding a weapon against my neck?”
