

## Multi skilled 941

Chapter 941 You've Been Infected By a Virus, and It's Very Serious

After the robot appeared and passed something to the man, it disappeared.

Qin Ze hastily asked, "Little Loli, that robot disappeared, do you want to chase after it?"

Having said that, he turned around and realized that Little Loli was no longer there.

He quickly looked at his surroundings but did not see her. He guessed that she must have gone after that robot and so, he breathed a sigh of relief.

Just then, the man holding onto the package was about to go inside.

An alarm went off in Qin Ze's mind. He subconsciously felt that he cannot let him go. Without a second thought, he walked out from his hiding place.

"Where are you going?"

Looking at Qin Ze who had suddenly appeared, traces of panic streaked across the man's eyes.

Qin Ze looked at him with a sharp gaze and waved his phone. "I've already captured your previous actions with my phone. Leave the thing in your hand behind, or else I'll send the King this video right away."

The man's pupils shrank for a second but then he laughed out loud in the next second. His laughter was very eerie.

"I came here to retrieve this item on the King's orders. You had best leave right away. Otherwise, if I press this, the guards will have you surrounded and killed right away."

While he was speaking, he took out something that looked like a communicator.

Qin Ze furrowed his brow. He did not believe that someone who came up to the rooftop so sneakily would be acting on the King's orders. If it was really something that the King wanted, he would not have acted so sneakily.

"Do you think I will believe what you said? Go ahead and call the guards." Qin Ze waved his phone again and said, "Why don't we make a call together and see if you would get killed first or I would get killed first when the time comes."

Having said that, he acted as if he was going to make a phone call. "It just so happens that I'm a guest of the King. I believe as long as it's my call, the King would be able to receive it right away."

Killing intent flashed past the man's eyes.

In the next second, he threw the communicator-like device on the ground and took out a gun, before aiming at Qin Ze.

Qin Ze cursed in his heart. How could he have forgotten that anyone and everyone in other countries can carry a gun around?

“Aren’t you going to make a call? In that case, let’s see whose speed is faster. Will it be the speed of you making the call or the speed of me pulling the trigger.”

Having said that, he aimed the gun at Qin Ze’s hand that was holding onto the phone.

Qin Ze felt his heartbeat drumming uncontrollably. He was quickly thinking of how he would be able to dodge that man’s bullet.

At the same time, he was praying for Little Loli to come back sooner.

However, he looked very calm on the surface. He even said in a carefree manner, “Sure, let’s give it a try then.”

Following that, he quickly dodged to the side.

In the next second, a bullet flew past in the direction where he was standing just moments ago.

Subsequently, the man fired several rounds of shots.

Qin Ze ducked behind a nearby object and he managed to dodge the bullets for some time. But when a bullet injured his arm, he suddenly recalled that Zi Yi had passed him a circular ball in the past. He quickly reached for it from his pockets and threw it at the man.

The circular ball transformed into something shaped like a disc and it quickly blocked the man’s incoming bullet. At the same time, the bullet was sent back.

BAM... BANG...

Qin Ze smiled as he looked at the man’s expression of disbelief when the bullet struck him. At the same time, Qin Ze came out from hiding.

“Weren’t you trying to kill me? Why don’t you continue?”

The man did not have any spare hands to press on his wound. His wound continuously bled. At the sight of Qin Ze walking over, he looked at him warily and stepped back.

Qin Ze sneered and increased his pace.

At this moment, the man suddenly opened the bottle he was tightly gripping onto and poured it on himself.

In the next second, his expression started to change. Not long afterwards, he seemed to be controlled by something and lost consciousness. He threw away the gun in his hand and headed for Qin Ze.

Qin Ze was startled by the man’s current appearance.

A strong sense of crisis made him subconsciously retreat.

He quickly took back the circular ball after retreating and threw it toward the man.

The circular ball transformed into something that looked like a frisbee and landed a cut on the man’s thigh.

Fresh blood gushed out, but the man seemed to have lost all his senses, as he continued heading toward Qin Ze.

“F\*ck! What’s wrong with this person?”

Qin Ze looked at him with wide eyes.

When the frisbee turned back into a ball and returned to his hands, he threw it out again.

Whish~ Whish~

The frisbee cut off another two pieces of flesh, but similarly, the man did not react

Instead, he started approaching Qin Ze at an even faster speed.

“F\*ck! Why does he look like a zombie from some end-of-the-world movie?”

Qin Ze was only momentarily stunned for a second before the man had closed the distance between them. When he was around one meter away, he raised his hand and pounced towards Qin Ze.

“Oh my gosh...”

Qin Ze turned with the intention to run. However, at the same time, the man grabbed onto the tail of his tuxedo.

He got a fright and subconsciously pulled while cursing continuously.

At the same time, he threw out the circular ball and cut off the tail of his tuxedo. Only then was he able to escape.

He did not expect the man to chase after him again.

“F\*ck! Don’t tell me I’ve really encountered a zombie!”

Just then Qin Ze was about to start running at full speed, when the sound of a body crashing to the floor was heard.

Subsequently, Little Loli’s teasing voice could be heard. “Brother Qin, I just left for a short period of time, why are you in such a miserable state?”

Qin Ze suddenly stopped and turned around to look at Little Loli. He gasped for air while feeling lingering fear. “Little Loli, you don’t know what happened. The man’s behavior was identical to how zombies in those end-of-the-world movies act. It was so terrifying.”

Little Loli looked at him and revealed a complicated expression.

“Little Loli, what’s with your expression?”

“Brother Qin, you’ve been infected with a virus and it’s very serious.”

“Ugh... What virus is it? What kind of symptoms will I have?”

“I don’t know yet. In any case, the virus is the same as that man’s.”

Little Loli then pointed at the man lying on the side that was either dead or had just lost consciousness.

Subsequently, she contacted Zi Yi.

Zi Yi and the group had just returned to the Count's Mansion at that time.

The moment they stepped into the mansion, they sensed something amiss.

There were many guards and maids walking around nervously in the mansion.

Lu Jingye asked the leader of the guards that had led them inside, "What happened in the Count's Mansion?"

The guard's expression was also a little stern. "The Madam suddenly went crazy at noon and went around biting everyone. As long as it's someone who was bitten by her, they all felt unwell."

"Unwell? What do you mean?" Zi Yi hastily asked.

"Well..." The guard thought about it for a moment and said, "All of them said that their bodies felt very stiff and uncomfortable."

All four of their expressions turned serious.

When Zi Yi and the group were led to the courtyard where the Count stayed, there was not a single soul around. It was extremely silent to the extent that it gave off a creepy and strange feeling.

Dou Xiangling thought of Ian and asked worriedly, "What's going on here? Why is there not a single guard or maid around? Where's Ian?"

Chapter 942 Didn't We Discuss This Last Night That We Would Give Birth to More Babies Than Your Cousin?

The guard shook his head gravely. "Ever since Young Master Ian returned, he has sent me to guard the gate and I don't know the exact details of what happened inside."

Dou Xiangling's face turned white due to worry. She could not be bothered about anything else as she pushed open the courtyard gates and headed inside.

Zi Yi and the rest also hastily chased after her.

Nothing could be seen from the courtyard, but the situation inside the spacious living room had caused their hearts to sink.

Broken items were scattered all around the ground. Moreover, there were several guards and maids lying in a pool of blood.

Dou Xiangling was about to make her way inside when Zi Yi hastily pulled her back.

"Cousin, don't go in first."

Dou Xiangling turned her head and looked at Zi Yi. Even the rims of her eyes were red.

Zi Yi said with a serious expression, "There's a virus spreading inside. Don't get too close."

She said to the rest, "Let's stay back first."

With that, she pulled Dou Xiangling's arm and the group took a few steps back.

Subsequently, Zi Yi called out Shadow and Shadow II. "Shadow II, go and search for Ian and the rest. Shadow will scan the situation inside and identify whether there are any unknown viruses in their bodies."

"Yes, Master."

After the two robots responded, both of them moved at the same time.

Looking at Shadow walking into the living room, Lu Jingye asked, "Yiyi, what is going on?"

Zi Yi explained to them about her conversation with the Third Princess and said, "If my guess is right, everyone here was infected with a virus that will make them act like a zombie."

"A zombie virus?" Dou Zerui widened his eyes in astonishment. "Do you mean they are like the type of zombies from those fantasy movies that show the end of the world?"

"It's different." Zi Yi said, "Those types of zombies are caused by the deterioration of the environment, but this virus is man-made. It's possible that there are many people all around the world that have this virus lying dormant in their bodies."

"Siii-" Dou Zerui gasped.

Lu Jingye asked, "How long can this type of virus remain dormant? Would it cause a large outbreak? What would be the most severe consequences if there is an outbreak?"

"I don't know."

Dou Zerui and Dou Xiangling's expressions changed after hearing Zi Yi's response.

If even Zi Yi did not know the answer, how terrifying would the consequences be?

Zi Yi said, "This virus is quite different from the zombie virus. The research lab that the Third Princess is in has done a study on this virus but to no avail. To understand more, I have to do research on someone who has been severely infected by the virus."

"Where will you be conducting the research? What do you need?" Lu Jingye would always think a step further than the others. With that, he took out his phone and said, "I'll get people to prepare them right away."

Zi Yi thought about it and said, "After finding Ian and the rest, I'll make a trip to the Third Princess' laboratory first to have a look. Get people to prepare... these items. After that, send the following equipment and materials from the laboratory at home..."

"Ok." Lu Jingye dialed a number and soon he had passed the orders down.

Just then, Zi Yi said to the guard, "Bring some people to block off the Count's Mansion. Don't let outsiders in nor allow anyone outside. Also, get everyone to take safety precautions. It's best that no one gets close to here."

It was obvious that there were many people infected with the virus inside the Count's Mansion. At this moment, they could only prevent anyone from leaving.

"I understand." Even though the guard was frightened, he immediately acted on her orders.

The four of them stood there and waited for around five minutes before Shadow II brought Ian out.

At the sight of Ian, Dou Xiangling hastily asked, "Ian, are you alright?"

There was some dust on Ian's face and he no longer gave off his usual gentlemanly demeanor and clean look. He did not make his way over at the sight of them. Instead, he remained where he was standing and answered Dou Xiangling, "I'm fine."

He even gave her a smile. However, one could sense that he was not smiling sincerely from the bottom of his heart.

Dou Xiangling wanted to approach him.

Ian quickly shouted and stopped her, "Xiangling, don't come over. There's dust all over me, I'm dirty."

At the same time, Zi Yi pulled Dou Xiangling and said with a serious tone of voice, "Ian's infected with the virus."

"What?" Dou Xiangling and Dou Zerui cried out in alarm simultaneously.

Dou Xiangling covered her mouth and she was so worried that tears were about to spill from her eyes.

Ian was worried at her behavior and hastily said, "Xiangling, don't cry. I'm really fine. We have Zi Yi here and even if I'm infected with a severe virus, she is capable of curing me. What's more, didn't we discuss last night that we would give birth to more babies than your cousin?"

Dou Xiangling did not expect Ian to reveal such a private conversation in front of such a large crowd. She was angry and embarrassed at the same time. She glared at him with watery eyes.

Ian smiled at her.

Dou Xiangling looked away and turned to Zi Yi. "Yiyi, what should we do with Ian now?"

Zi Yi gave her a look to calm her down before she asked Ian, "Where's the Count and Countess?"

"I tied up Father in the attic. Mother is also locked in the basement."

It seems like Ian had noticed something amiss with them when he returned and he had also made many preventive measures.

Zi Yi nodded her head in satisfaction and asked again, "Do you know how many people here were injured by the Countess?"

"There are many of them. I have also tied them up."

"Mhmm. You did well." Zi Yi praised him and asked, "Are you injured?"

"I have a few small cuts on my body."

“How are you feeling right now?”

Ian fell into silence.

Dou Xiangling and Dou Zerui started to get anxious.

Ian said, “I feel that it’s hard for me to move my legs to walk. I can’t quite lift my arms either.”

When the group looked at Ian carefully, they discovered that he was standing there rather stiffly.

“Cousin, what should we do? Is Ian about to lose his consciousness very soon?”

In fact, Ian was also a little afraid. However, to prevent Dou Xiangling from worrying about him, he maintained a calm look on his face.

Zi Yi was unable to give an accurate diagnosis as to when Ian would lose his consciousness. She got Shadow to pass her a few silver needles and said to Ian, “I don’t know how long it will take for you to lose consciousness. So, I’ll seal your main acupuncture points which will stop the virus from spreading to your brain.”

Ian nodded his head. “Ok.”

With a wave of her hand, a few silver needles were accurately inserted into Ian’s acupuncture points.

“Shadow II, send Ian back to his room and lie him down on the bed.”

Shadow II carried Ian and left.

Dou Xiangling wanted to give chase, but Dou Zerui pulled her back.

“Sister, you shouldn’t go.”

“But...”

“We shouldn’t cause trouble for Zi Yi at this moment.”

In the end, Dou Xiangling nodded her head in defeat.

After they waited for Shadow II to return, she said, “Activate the sterilization system in your body and kill all the viruses on your body.”

The two robots activated the system right away.

Just then, Zi Yi’s phone rang.

She took out her phone and saw that Little Loli sent her a video.

Little Loli explained the situation that happened on her end to Zi Yi.

Zi Yi asked, “Does Qin Ze still have his consciousness now?”

“Yes, but I knocked him out.”

“You’ve done well.”

## Chapter 943 You Cannot Touch Anything Inside

Lu Jingye asked Little Loli, "You said the person you were following received a bottle. What is contained in it?"

"It's the source of the virus."

Zi Yi suddenly breathed a sigh of relief after hearing that. "It'll be easier if we have the source."

At least they would be able to save some time if that was the case.

Zi Yi said to Little Loli, "Bring Qin Ze and that man to... bring them to the second laboratory."

"Ok."

Zi Yi put away her phone and said to the others, "Now that we have the source of the virus, the experiment will be much simpler."

"However, you have nothing in the laboratory right now. The equipment you need will take at least ten hours before it is delivered. What should we do during this period of time?" Speaking of this, Dou Zerui suddenly thought of something extremely important. "The Count was mingling around so enthusiastically with the guests at the banquet today. Would everyone he touched get infected by the virus then?"

His questions resulted in a change in everyone's expressions.

"Even if everyone is really infected, there's nothing we can do but wait."

Zi Yi was helpless since she did not have any tools to work with.

"I'll go take a look at the Third Princess' laboratory later. You guys return to the winery first."

With that, Zi Yi took out her phone and gave the Third Princess a call.

The Third Princess was surprised to receive Zi Yi's phone call. Upon learning that Zi Yi wanted to visit the laboratory right now, she agreed readily.

After they made arrangements to meet outside the school gates, they ended the phone call.

Lu Jingye was worried about Zi Yi going alone and so he said, "I'll send you there."

"No need. It's safer for you to return to the winery." Zi Yi pulled his hand and said, "You can go back and check whether there is an outbreak of this virus elsewhere. The most important thing is the diamonds we purchased from South Africa. I feel that someone will definitely make use of this."

Lu Jingye had already anticipated this to happen and he nodded his head. "Be careful when you're there."

"Got it."

Subsequently, the group split up.

By the time Zi Yi reached the school gates, the Third Princess had also just arrived.

“Zi Yi, I didn’t expect you to request to visit our laboratory so soon. I’m so excited! Let’s go, it just so happens that I informed the members of my group. They should have arrived by now.”

Zi Yi nodded her head. Both of them got in the car and headed for the medical laboratory.

The architectural style of the medical university was different from M.Uni. The buildings here adopted a western classical architectural style and the colors used were very vibrant. Moreover, it resembled buildings from the 18th century.

It was currently lesson time and there weren’t many people walking around on campus. The Third Princess introduced to her the various schools along the way.

The car drove inside the school campus for around dozens or so minutes, before it stopped in front of the medical laboratory building.

There were already some people standing outside by the time they reached.

When Zi Yi and the Third Princess alighted from the car, they then made their way over.

One of the bespectacled women asked, “Professor Isa, why did you call us to gather here at this time?”

Princess Isa introduced Zi Yi to them with a smile. “This is Zi Yi from China. I brought her here to take a look at the virus we’ve been studying recently.”

“Zi Yi?” The woman’s eyes behind her spectacles sized up Zi Yi from head to toe. Her expression was very cold and even though she clearly praised Zi Yi, it did not feel like it was sincere. “I’ve seen videos of you treating patients with incurable illnesses before. Indeed, you do have some skills.”

Zi Yi nodded her head.

Other than the bespectacled woman, there were three other men.

One of the middle-aged men with curly brown hair spoke up. “You’re very beautiful.”

The other two merely nodded in Zi Yi’s direction.

The four of them seemed to be rather indifferent to her. As professors, they didn’t think much of her skills and they would not look up to her just because of her fame.

They felt that unless she shows them some real skills, everything else is just rumors.

The Third Princess saw how coldly everyone was treating Zi Yi but when she pondered over it she decided to not bring it up. “Let’s go inside the laboratory first.”

The Third Princess’ laboratory was located on the third floor.

The laboratory was very big and there was a lot of equipment placed around.

Before they went in, the Third Princess brought Zi Yi elsewhere to wear a protective suit. While they were putting on the suit, she repeatedly reminded Zi Yi. “Many of the experiments we conduct involve viruses. In particular, we have yet to confirm if that virus can attach to other things in the laboratory. Zi Yi, you must be careful later when you’re inside.”

Zi Yi nodded her head. "I'll just look at the experiment."

The Third Princess was relieved.

Melina who was standing next to them and wearing the protective clothes furrowed her brows as she said, "Not only do you have to be careful, you cannot touch anything inside."

Zi Yi glanced at her and did not say anything.

After the three of them got dressed, they entered the laboratory.

The other three professors were already waiting inside the laboratory at this moment.

They started with a discussion on the side.

Melina said, "Since we're here, let's continue with the experiment then. I feel that the direction we previously proceeded with is still wrong. Why don't we change it and try another method today?"

"How do you plan to change it?" The red-haired man, called Sangji, said, "We've always mentioned changing the method, but halfway through the experiment, we will also return to the starting point."

Bently, the middle-aged man with curly brown hair said, "I feel that there's something wrong with our equipment. Why don't we apply for more precise equipment instead?"

The Third Princess saw that they had started a discussion right away. She thought that it would be alright to dive into the experiment and when the time comes, they could also have a discussion with Zi Yi. "If we were to apply for more precise equipment, it'll take at least a week for it to arrive. We still can't confirm if it's the problem with the equipment. Why don't we split the virus by the XX method first and see if it'll be a success? Moreover, today can be considered an impromptu gathering. I wish to let Zi Yi take a look at our previous experiment."

The professors turned to look at Zi Yi standing over there after hearing what the Third Princess had to say.

After a wave of silence, Melina said with an expression of slight displeasure, "Professor Isa, we have been conducting this experiment for nearly half a month. This experiment was supposed to be in a confidential stage and it wouldn't be good for us to show all the results of our research just like that, right?"

What Melina did not say outright was that perhaps Zi Yi was a spy from China's medical community. She would then summarize their failed experiments and then continue to conduct experiments after returning to her home country. When the items come, if they were to identify the components of the virus faster than them, wouldn't their previous efforts be for naught?

The other three professors also disapproved of the Third Princess' suggestion.

The Third Princess' expression sank. "Zi is very skilled in the medical area. We haven't managed to make any progress even after such a long time and perhaps she can provide us with good suggestions. It's alright if this virus doesn't spread on a wide scale basis. However, if there is a huge outbreak, are you all still planning to slowly research it like this?"

“But... isn’t this the type of research that would be conducted by each individual country?”

Melina felt that all humans are selfish. If they were to take out all their experimental data, perhaps Zi Yi might bring it back to her home country and complete the experiment. When the time comes, whose name would it be under?

The opinions of the Third Princess and the professors diverged.

Chapter 944 Yiyi, Something Happened to the Batch of Diamonds We Imported

Zi Yi stood there and looked at them arguing without saying anything.

However, she used her brain waves and connected to Shadow. “Copy all the data of the experiments they had conducted before.”

Sometime later, Zi Yi saw that they still had opposing opinions and so, she said to the Third Princess, “I won’t look at the results of the experiments you guys have conducted before. Why don’t you work on it now.”

The Third Princess understood the overall situation and knew that her father wanted to forge a good relationship with Lu Jingye and Zi Yi.

However, her group members were all dragging her back. She could not possibly use her position to pressure them either. Following that, she thought of showing Zi Yi the data in private after this and so, she agreed to her suggestion.

The other professors could not possibly offend the Third Princess either and they went to make the necessary preparations.

Their experiment objects were a few pieces of diamonds.

Zi Yi stood next to the Third Princess and asked, “Before you guys received these diamonds, how many people had been infected with the virus?”

“Not many.” The Third Princess answered, “Only two people were infected by this virus. It was discovered only when they had been wearing the diamond necklace for several days and accidentally received an open wound. Both of them just so happen to be my friends so the professors and I set up this research group.”

People who studied medicine were very sensitive in this aspect. When the Third Princess discovered that her friends were suffering from such terrifying symptoms, she subconsciously thought that there was definitely a problem. And so, she gathered a team together and underwent a thorough examination. Only to find out that the virus was transmitted to them through the diamonds.

Moreover, she managed to resolve and stopped the transmission of this news.

The reason why she was telling Zi Yi all this was because Country M really wanted to befriend Zi Yi.

“After that, we examined more than hundreds of individuals who wore diamonds originating from different places. We discovered that only diamonds from South Africa had this virus.”

The Third Princess was telling Zi Yi too much and the other professors wanted to remind her to keep the information confidential.

However, they could not tell the Third Princess to shut up just like that. Therefore, Melina purposely found something for the Third Princess to do. "Professor Isa, we need your help here."

In the following period of time, as long as the Third Princess was about to delve in deeper and touch on sensitive information, the other four professors would find all sorts of excuses to divert her attention.

Zi Yi originally wanted to ask for more information related to this virus. However, when she saw that they were unwilling to say, she was not in the mood to ask further.

She stood there and watched the five of them conduct the experiment.

The equipment they had here was considered pretty good, but it was crude from Zi Yi's point of view. In particular their experimental techniques were simply an eyesore for her.

Unknowingly, an hour had passed.

Zi Yi saw that their progress was slowing down and knew that they were going to fail soon. In the end, she kindly suggested. "Why don't all of you have a rest first."

The Third Princess thought that Zi Yi was feeling bored standing there and so, she agreed.

Zi Yi and the Third Princess went to take a rest in the lounge.

The other four professors said they weren't tired and so, they continued with the experiment.

The moment they left, Melina's expression sank. "I really wonder what Professor Isa is thinking. How can she allow an outsider to spectate the experiment, not to mention a Chinese national? If she were to steal our important experimental data, bring it back to her country and get their country's scientists to summarize our experiments' results, they would be able to achieve concrete results very soon. In that case, all the glory would belong to them."

Bently agreed with Melina. "I think so too. Our country finally has a medical experimental project that is ahead of other countries. How could we let an outsider take advantage just like this?"

"Then what should we do? Professor Isa is a princess and we can't possibly stop her from passing the data to Zi Yi."

"Why don't we have a discussion with Professor Isa? This is something that concerns the whole team and I don't believe she would stick to her standpoint with the four of us opposing it."

"I think it's feasible. Melina, find a way to bring Zi Yi out for a walk later and the rest of us will have a chat with Professor Isa."

"Ok."

...

In the rest area.

The Third Princess said apologetically to Zi Yi, "I'm really sorry. It's all my fault that I didn't explain to them clearly in advance, which led to their behavior toward you."

"It doesn't matter." Zi Yi did not take it to heart. "This is human nature. It's normal that they would not want me to learn of your experimental results."

The Third Princess felt that Zi Yi was being polite and she got even more angry at the other professors.

All the experiments they had conducted previously failed and after she finally managed to invite Zi Yi over, what she intended was for Zi Yi to provide a different opinion. However, these people turned against her at this crucial junction.

If she had known earlier, she would not have called for them but instead, brought Zi Yi straight to the laboratory to take a look.

At the thought of this, she decided to lure them away later.

"Zi Yi, have a seat here first. I'll go to the washroom for a moment."

She planned to have a talk with the professors.

Zi Yi sat there and waited for a short while, when her phone suddenly rang.

The phone call was from Lu Jingye.

His voice sounded very serious. "Yiyi, something happened to the batch of diamonds we imported."

Zi Yi already had a hunch something would happen, but she did not expect it to happen so soon. "Is it serious?"

Lu Jingye said, "The bodies of many noble ladies in Europe's high society are in rigidity... Just moments ago, news that this disease is related to our jewelry was spread all over Europe."

Zi Yi furrowed her eyebrows. "Why wasn't I aware of this?"

She had gotten Shadow to keep an eye on the online trends but Shadow did not report anything to her.

"It was not spread on the internet. Someone spread this news directly in high society circles within European countries."

Speaking of this, Lu Jingye also then said, "Find a way to return right away. It's unsafe outside."

Zi Yi was not worried about being in danger, but she still agreed. "Alright, I'll come back right away."

"Mhmm."

...

It was as though a severe infectious disease had broken out overnight in the high societies of Europe. Moreover, the infectious disease was all spread from the various noble ladies.

This type of infectious disease was extremely contagious and it spread around very quickly. The most obvious symptom was that one's body would slowly turn rigid.

Originally, everyone had no idea of the root cause, but all of a sudden someone said that there was something wrong with Song Jewelry's diamonds.

The infectious disease spreading among the noble ladies would certainly attract great attention and so, the upper echelons within various countries immediately ordered for an examination of the jewelry from Song Jewelry.

The results of the test was that all of their diamond jewelry carried the virus.

In a mere short span of an afternoon, all the Song Jewelry outlets were sealed.

At the same time, Lu Jingye had been summoned by the courts of various countries, as he had been sued.

Moreover, at this crucial moment, the equipment Zi Yi needed had yet to arrive.

"Cousin, what should we do? If this continues, I feel that the King of Country M would hand you over."

It was already night time by then and Zi Yi and the rest were in the winery.

When Zi Yi left the medical university in the afternoon and returned to the winery, Country M received summons from various countries. The summons were all asking for them not to interfere, or else they would make Country M regret.

Country M could only be considered a developing country and it was still lagging far behind compared to those developed, powerhouse countries.

Therefore, it was still unknown whether the King would protect them or not.

#### Chapter 945 Lu Jingye Summoned By the Courts of Various Countries

Country M's Palace.

The King and his group of ministers were in the middle of an emergency conference at this moment. Everyone had solemn expressions on their faces and the atmosphere inside the room was so serious that it was hard to take a deep breath.

The King saw that everyone was remaining silent, even after a long time, and he finally said with displeasure, "I called everyone here not for you to act as mutes but because in times like this, what I need are your opinions."

The group of ministers looked at each other and someone finally broke the ice. "Your Majesty, I feel that we should hand over Lu Jingye at the very first opportunity. This time around, what he is facing is the combined court summons of more than twenty different countries all over Europe. If we were to allow him to remain here, it would certainly bring great trouble to our country."

After someone started to speak, the switch seemed to have been flipped and everyone started to voice out their opinions.

"I also think that we should hand him over. Even though we decided to cooperate with him before, with the current situation, Lu Jingye is dead meat."

"I agree. Right now, he is regarded as the enemy of the entirety of Europe. If we allowed him to remain, it would certainly incur dissatisfaction from other countries towards us."

"This kind of person should be handed over immediately!"

"But China's Embassy has already sent over a team of guards to protect them. We can't possibly go against the Chinese Embassy."

"That's right. They have invested in several major construction projects in our country and we can't have a conflict with them openly."

"Then what should we do? If over twenty countries were to join forces and question us, wouldn't we be in deep trouble?"

"That's right. For the safety of our citizens, we shouldn't lose the big picture due to small gains."

...

Everyone expressed their thoughts and the majority of them agreed to hand Lu Jingye over.

The King did not say anything else, other than to ask Edward and Justin seated next to him, "Edward, Justin, what are your thoughts?"

Edward immediately answered, "I also advocate for handing over Lu Jingye right away. The incident of Song Jewelry is not a simple quality issue problem. Instead, it is carrying a deadly virus. I heard that this type of virus is extremely terrifying. During the early stages, one's body would slowly stiffen before they lose all reasoning and attack everyone they see indiscriminately."

"Sii--"

Many ministers gasped at Edward's explanation.

Also, there were many who felt fortunate.

"Fortunately Song Jewelry had yet to settle down in our country. Otherwise, we would be part of the twenty countries right now."

Some people started to worry. "Even if they do not have outlets in our country, some of the noble ladies traveled to other countries to purchase the jewelry. Could they have already been infected?"

This caused everyone's expressions to change greatly.

The King immediately gave an order. "Alva, immediately take people to check. Whoever is in possession of jewelry from Song Jewelry should be placed under quarantine."

"Yes, Your Majesty."

Alva stood up and went out.

The ministers' expressions looked even worse.

“We must hand Lu Jingye over right away. I feel that even our country wouldn’t be able to escape from the virus. When the time comes, without the help of the big countries, we won’t be able to survive this crisis.”

“I agree. We must hand him over.”

“I don’t agree.” Just then, Justin spoke out.

Everyone looked at him and thought that he was crazy.

“Justin, have you gone crazy? Are you still trying to protect Lu Jingye at this moment?” Edward asked with a solemn voice. “You have to think this through. If our country were to protect Lu Jingye, we would be placing ourselves against the other countries.”

Justin looked at his eldest brother’s furious expression and said in a calm tone, “Eldest Brother and various ministers. Please let me finish explaining my thoughts.

“We have always been on good terms with China and Lu Jingye is also their country’s official merchant. They will definitely protect him this time. Most importantly, the virus was found on the batch of diamonds Song Jewelry imported from South Africa. This means that someone is trying to frame them.”

“Justin, what nonsense are you spouting?!” Edward shouted, “No matter where those diamonds came from, why didn’t the Song Jewelry conduct a test beforehand? If they did their due diligence, would that batch of diamonds still enter the market? Most importantly, that batch of diamonds was sold to the nobles and ladies in high society. Do you know how terrifying the situation would be once this virus spreads on a large scale?

“If you advocate for protecting him, it means that you are going to be opposing the other big powerhouse countries. How capable do you think you are to fight against them?”

There was a strong accusation in Edward’s words. The other ministers also agreed with him and accused Justin of disregarding the overall situation.

Justin received disapproval from all directions and he swallowed the words he originally wanted to say.

Just then, the King seated next to him suddenly reached out from under the table and patted his hand.

It seemed as though he was comforting and encouraging him to speak out.

Justin suddenly had newfound courage as he said loudly, “I believe that Lu Jingye was set up. Moreover, this type of virus is similar to what those extremists would spread!”

Everyone was stunned by his loud voice and they stopped talking.

Justin quickly said, “The whole world knows how skilled in business Lu Jingye is. Also, his wife has also gained a reputation for her skills in various fields. China values them greatly and I believe that they will definitely bring about a tremendous change in our country!”

“Do you want our country to be besieged by all the big countries?” Edward sneered. “I only know that if he remains here, we will be in a miserable state. Perhaps the citizens would suffer greatly and in that case, it would indeed bring about a tremendous change in our country.”

“How is that possible?!”

“How is that not possible?”

The two brothers’ faces were flushed red with anger as they shouted at each other.

Justin said, “It’s impossible that China and Lu Jingye would allow things to deteriorate like that. Perhaps they have already come up with a countermeasure. Right now, we only have to express our stand and our country can develop together with China in the future. If we hand him over right now, it won’t solve the virus spreading around. In addition, perhaps our citizens have already been infected. Zi Yi is very skilled in medicine...”

“Justin, are you trying to make a fart sound like music?”

“You-”

“Enough.” Seeing that both his sons were about to get into a fight, the King finally spoke up with a heavy voice. “Since you have your own opinions, act accordingly based on your individual opinions.”

Everyone looked at the King in disbelief.

The King stood up and said, “I’m old now. It’s up to you young people to find a way to deal with these things.”

Having said that, he took his leave.

The moment the King left, Edward sneered. “Justin, since you want to jump into the pit yourself, from now on, it’ll be each to their own.”

Edward stood up and left after he left behind those words for Justin. When the ministers saw that he was leaving, the majority of them also followed suit.

Only a few who supported Justin remained.

“Prince Justin, what should we do now?”

“Eldest Brother will definitely find a way to capture Lu Jingye and hand him over. Let’s stop him first.”

He decided to pay a visit to Lu Jingye.

Chapter 946 How Do You Know If Country M Won’t Betray Us?

As soon as the court order was issued from various countries, the winery was surrounded and protected by the guards sent by the Chinese Embassy in Country M.

In addition, there was the space magnetic field that Zi Yi had installed. Even if those people wanted to force their way in and capture them, they would not be able to do so.

In a mere span of a few hours, Lu Jingye and Zi Yi had received more than fifty phone calls.

Currently, Zi Yi was discussing the virus with a group of renowned doctors in China.

Zi Yi said with certainty, “Even though my equipment has yet to arrive, I am very sure that this virus also includes sources from the universe that are from species other than those found on Earth.

Her words caused the expressions of the group of doctors to look stern.

Elder Tang said, "If that's really the case, is it very difficult to cure this virus?"

"It's not very hard." Zi Yi said, "As long as we can detect the virus' components and find the corresponding methods to counter each component, we will be able to cure the people who are infected."

The way Zi Yi said it made it sound so simple. The group of doctors across the screen did not know whether to laugh or cry.

Elder Hu asked, "If there are really those types of alien components as you mentioned, how are you planning to find a cure?"

"The furthest constellation we can reach is the X constellation of the X galaxy. When the time comes, we just have to check the travel log of each country's aircraft."

All she had to do was to hack into the Space Agency of Country A and dig out the information, and she will be able to find the source of the virus with great accuracy.

After chatting with Zi Yi about a serious question like this, in the end, the group of doctors loosened up and were not as stern-looking as before.

Dou Xiangling who was seated next to Zi Yi was amused by what she said.

However, she was not in the mood to smile at this moment either.

Even though the way Zi Yi talked sounded casual, Lu Jingye's end did not seem to be the same case.

Currently, Lu Jingye was on a call with Second Master Lu.

This was the third call from Second Master Lu on the same day. During the conversation, he said in a stern voice, "The Embassy's guards won't be able to protect you for long. It's best that you guys find a way to come back first."

Lu Jingye said, "Father, we are unable to return right now, and neither will we go back now."

If they were to go back to China, all the attention and arrows would be pointed at them. Wouldn't that be acting in accordance with some other party's plans?

Lu Jingye said, "Yiyi will be conducting the research and experiment here. Right now, we are waiting for the equipment to arrive."

"Ok."

As soon as Lu Jingye disconnected the call, he received a call from a bodyguard who was stationed outside.

The bodyguard informed him that Prince Justin wanted to meet him.

Lu Jingye only considered for two seconds and said, "Invite him inside."

After Prince Justin came in, he was invited into Lu Jingye's study room.

Looking at their back profiles, Dou Zerui said out of concern, "I wonder why Prince Justin visited us at this time. Could he be here to capture Little Lu?"

Dou Xiangling immediately became nervous at his words.

"Then what should we do? If the royal family is here to arrest Little Lu, it certainly means that they are planning to hand him over to the other countries."

Dou Zerui thought about it for a moment and felt that his previous guess was wrong. "Cousin Yiyi has control over the magnetic field here and not to mention, there are so many bodyguards and robots keeping guard. Moreover, this Prince Justin came alone, and perhaps it's not as what we had assumed just now."

Subsequently, Dou Zerui looked at Zi Yi.

Zi Yi was more or less done with her discussion with the group of doctors. She ended the call and turned to her cousins who were standing next to her.

Dou Zerui and Dou Xiangling asked at the same time, "Yiyi, what shall we do now?"

Zi Yi tilted her head and thought about it before she said, "You guys can check up on the latest news and help me appease Grandpa, Uncles, and Aunts."

She did not have the spare time to appease them right now.

Both of them nodded their heads.

Just then, Zi Yi's phone started to ring again.

The caller was Mr. Qin.

Mr. Qin was silent over the phone for a few seconds before he said anything. "Little Zi, what do you need me to do right now?"

Zi Yi knew that he was masking his worries for Qin Ze and said, "Don't worry. As long as my equipment arrives, I will immediately start treatment for Qin Ze."

Mr. Qin took a deep breath and his voice sounded a little sterner than before. "Little Zi, we might not be able to deliver the equipment you need within a day's time."

Zi Yi furrowed her brows. "What happened?"

"All the aircrafts for transporting equipment are restricted. Our Ministry of Foreign Affairs is currently negotiating with other countries. Even if we do manage to deliver the equipment, I calculate that it would take two days at the very least to arrive."

"Two days is too late," Zi Yi said, "The equipment has to be delivered here before tomorrow morning."

Mr. Qin was silent. He sighed and said with a hint of helplessness, "There's really nothing we can do."

Zi Yi pursed her lips and thought for a moment. "Mr. Qin, please ask them to take back what we requested and deliver it to my courtyard right away."

“Little Zi, what are you planning to do?”

“Since traveling by sky doesn’t work, then I can only use the space tunnel.”

“Space tunnel? What’s that?”

“I am unable to explain clearly in a short amount of time, but right now, you have to get back all of that equipment quickly.”

Mr. Qin was honestly very curious about the space tunnel Zi Yi had mentioned. However, he also knew that it was not the appropriate time right now. “Alright. I’ll apply for a fighter plane from the higher-ups to recover that equipment.”

Having said that, he did not hang up the phone right away. He was silent for some time before he suppressed his emotions and said, “Little Zi, if that boy can’t be saved, you can experiment on him.”

He hung up the phone after that.

Zi Yi could sense a hint of choking from Mr. Qin when he said the last sentence.

She looked at the disconnected call and muttered, “For those that I want to save, unless they are thoroughly dead, it’s impossible that I won’t be able to save them!”

Lu Jingye and Prince Justin’s conversation lasted for more than two hours before it ended.

When they came out to the living room, Justin said to Zi Yi, “Mrs. Lu, if you require any assistance right now, you can tell me. As long as it’s something within my means, I will do my utmost to assist you.”

Zi Yi did not reply to him right away. Instead, she turned to look at Lu Jingye and asked him with her gaze whether this person was trustworthy.

Lu Jingye gave her a nod.

Zi Yi said, “Can you find ways to help us prepare equipment?”

“Mrs. Lu, what kind of equipment do you require?”

Zi Yi told him a list of equipment she needed.

Justin took out his phone and recorded what Zi Yi needed. In the end, he asked, “Mrs. Lu, when do you need these things by?”

“Right now.”

“Ok. I’ll search for them right away.”

Justin took his leave after he said that.

Lu Jingye came back inside after he sent Justin away.

Dou Zerui hastily asked, “Little Lu, is this prince here to help you?”

“Yes.”

Dou Zerui breathed a sigh of relief. "Thank God! At least we didn't get stabbed in the back by Country M."

"How do you know if Country M will betray us or not?" Zi Yi found his logic weird.

"Since Prince Justin came here to express his stand, this also proves Country M's attitude."

Speaking of this, Dou Zerui suddenly stopped talking.

He thought of Prince Edward who was supposedly even more enthusiastic than Justin.

Chapter 947 As Expected, Zi Yi Is Too Amazing

"Prince Justin expressed his support for us." Lu Jingye revealed what Dou Zerui guessed. "But Prince Edward is planning to hand me over."

"As expected."

Dou Zerui asked, "Little Lu, what are your following plans? Even if Prince Justin is on your side, it doesn't seem to make much of a difference, right?"

"We wait."

"Wait?"

Dou Zerui gave him a puzzled look.

However, Lu Jingye did not say anything else. Instead, he turned to look at Zi Yi and asked, "When will the equipment from China arrive?"

"If nothing goes wrong, it should arrive at twelve o'clock tonight."

Lu Jingye nodded his head. "The equipment from other places and the materials you need will also arrive at midnight."

"That's good."

Dou Zerui and Dou Xiangling, who were standing by the side and unable to get a word in, made eye contact with one another. Dou Zerui asked, "Little Lu, Yiyi, what can we do to help?"

If they were to remain here doing nothing, they would feel even more anxious deep down inside.

Zi Yi looked at their unconcealed concern and worry. She thought for a moment and said, "Cousin Xiangling can prepare some snacks for me. I have to stay up tonight. Whereas you can come and help out later."

When both of them heard that they could be of help, they hastily nodded their heads. "Ok."

In the following period of time, Zi Yi and Lu Jingye continued to be busy.

The various European countries started to exert pressure on Country M.

Edward led his men with the intention to take Lu Jingye into captivity and hand him over to the other countries. However, he was stopped by Justin.

The two brothers got into a fight.

Someone informed the King about this incident, but he refused to see anyone on the pretext of being unwell. Moreover, he mentioned that he was letting the two brothers make the decision themselves.

Many people were unable to understand the King's train of thought.

The equipment Justin had collected for Zi Yi was delivered at nine o'clock in the evening. At this moment, Prince Justin was actually wearing body armor and holding onto a gun. After he personally delivered the equipment, he said to Zi Yi, "This is all the equipment I found in M Medical University. Please have a look to see if they are usable. If not, I'll think of other ways."

Justin had not only brought the equipment Zi Yi asked for but he was clearly in a rush when he grabbed the equipment, as he had practically grabbed everything in his sight.

Zi Yi nodded her head. "Thank you. I'll give this equipment a try first."

Justin finally breathed a sigh of relief. "Alright. If you have any other needs, you can call me right away."

Having said that, he took his leave.

As soon as Justin walked out of the area within Zi Yi's control, he was met with Edward whose face was as dark as storm clouds and currently glaring at him.

The moment he opened his mouth, his words were filled with sarcasm. "As expected of a dog. You're being so helpful to Lu Jingye right now. Even if I can't catch him tonight, other countries will also dispatch their men tomorrow. How do you think you'll be able to help him then? Justin... I'll wait to watch the scene of you being taken away together with Lu Jingye tomorrow."

Justin looked back at him coldly and said, "I believe Lu Jingye was framed. He has the ability to find out who was behind this too."

"Pft-! Are you dreaming?" Edward's expression turned fierce. "To prevent our country from getting involved due to your ignorance, you had better come with me."

"Impossible!"

"Then sorry about this."

After Edward said that, he raised his hands and motioned for the guards behind him to take action.

Justin also brought quite a sizable number of people. How could he possibly allow them to arrest Lu Jingye?

When both sides were about to get into a fight, two people suddenly appeared out of thin air in the middle of the two groups.

Everyone got a fright.

Edward and Justin immediately guessed who they were.

"Mrs. Lu's robots!"

Looking at the two robots, Edward was only momentarily stunned. In the next second, his expression turned cold, and he commanded in a loud voice. "Open fire!"

Before the group of bodyguards could press the triggers, the two robots suddenly disappeared.

Following that, everyone looked at the destroyed guns in their hands.

Both the robots made their appearance once again.

One of the robots spoke up. "Leave here at once. Otherwise, don't blame us for being rude!"

Having said that, the two robots stretched out their hands. Their hands transformed into machine guns.

The sight frightened Edward's group of guards and they subconsciously stepped backwards.

Edward's expression turned even more livid. He glared at Justin and said, "Don't think this is over. Tell Lu Jingye that after various countries send their representatives tomorrow, I won't hesitate to lead them here. At that time, I'd like to see if these robots can do anything to them."

With that, he led his men away and left.

The two robots turned invisible after Edward's group left.

Justin breathed a sigh of relief. However, at the thought of the situation he would face tomorrow, his expression turned heavy.

...

After receiving the equipment delivered by Prince Justin, Zi Yi headed for the laboratory.

She decided to transform them into other types of equipment first and then combine some of the experimental medicine into something else.

At around ten o'clock in the evening, the fighter jets sent by China retrieved Zi Yi's equipment.

Second Master Lu and Mr. Qin were standing in Zi Yi's courtyard and Second Master Lu gave Zi Yi a call.

She answered the call and said, "I have already programmed all the robots inside. You just need to place the equipment in the courtyard and that will be enough. They will transport them to the basement."

Second Master Lu said, "Ok."

Just then, Mr. Qin who was standing next to Second Master Lu said, "Little Zi, can I go and take a look at your laboratory?"

He received a sharp glare from Second Master Lu due to the request he made.

With a gentle expression on his face, Mr. Qin said, "I was only a little curious. If I am not allowed inside, it's fine too."

Zi Yi thought about it and said, "You can... but you can only head down together with my Father. Also, you are only allowed to take a look outside. You can't enter the laboratory."

Mr. Qin said, "Ok."

Zi Yi was not worried that Mr. Qin would be able to enter her laboratory if he went underground. Without her permission, no one was allowed to enter.

After hanging up the phone, Zi Yi brought out the virtual screen.

Only Zi Yi and Lu Jingye were in Country M's laboratory. While connecting to her underground laboratory at home, she said to him, "I will create a space shuttle shortly. Once this machine is made, it is capable of sending over what I want right away."

Lu Jingye was shocked to hear that. "Do you have sufficient materials to create the machine?"

"Yes. I got Mr. Qin to gather practically all the special materials that can be found in China."

Having said that, Mr. Qin and Second Master Lu followed the robots moving the equipment to the basement.

This was also Second Master Lu's first time coming here.

The moment they entered the basement, they were shocked by the variety of equipment inside.

In particular, there were many robots in different laboratory rooms doing experiments.

Looking at the laboratory rooms, Mr. Qin felt his heartbeat quicken. He said with great excitement, "As expected, Little Zi is too amazing."

At the same time, he was even more confused as to how Zi Yi managed to do all these experiments that were beyond the current stage of their technology.

#### Chapter 948 Zi Yi's Space Shuttle Machine

No matter how confused Mr. Qin was, he did not reveal it.

He and Second Master Lu continued to follow the transporting robots.

After walking for some time, they arrived at a large laboratory.

After the robots moved all the equipment inside, the room of the laboratory was automatically locked.

Second Master Lu and Mr. Qin stood on the other side of the glass window and looked in.

What happened next only left them with shock.

Zi Yi really managed to control the robots from a long distance away to create the machine.

"Number one and two robots prepare XX materials. Number three and four robots prepare YY material..."

The entire process of smelting, manufacturing, and assembling the machine... had only taken them three hours.

Within these three hours, Mr. Qin and Second Master Lu were practically holding back their breaths.

Just then, Zi Yi announced. "Alright, let's test the effects now."

As soon as she finished saying that, they saw a robot lifting a piece of equipment and feeding it into the mouth of the large machine.

In the next second, there was a flash of light and the equipment disappeared from their sight.

Nearly a minute later or so, Zi Yi's voice sounded. "We've received it on our end."

The composed Mr. Qin and Second Master Lu felt their hearts thumping uncontrollably when they heard her words. This excitement that was beyond what they could tolerate caused them to reach out and hold each other's hands.

"That's great!"

Subsequently, the entire load of equipment was sent over one by one.

Mr. Qin gave Zi Yi a call. He suppressed his internal excitement and asked, "Little Zi, what else do you need?"

Zi Yi did not hold back on him. "I require some experimental bodies and auxiliary drugs."

"Ok."

On the day itself, all laboratories and large hospitals in the capital received an S-class secret notice. As long as they are in possession of the drugs Zi Yi requires, all of them have to be sent to the Ministry of National Security.

Following that, the items were secretly sent over to Zi Yi's courtyard.

It could be said that it was the power and contribution of the whole country.

The moment the items arrived, Zi Yi started on her experiments.

As soon as she started, she did not leave the laboratory again.

Lu Jingye came out of the laboratory at around five o'clock in the morning.

Dou Zerui and Dou Xiangling did not sleep for the entire night. At the sight of Lu Jingye coming out, they hastily walked up to him.

"Little Lu, how is the experiment going?"

"It's still undergoing."

"Little Lu, I've made some food for Yiyi. Why don't you send it to her? We didn't have the chance to deliver the food I made last night."

When Zi Yi started to command the robots to create the space shuttle machine, she sealed the laboratory. Other than her and Lu Jingye, no one was allowed to go in.

"No need. Yiyi doesn't have the time right now."

Zi Yi had prepared some nutrients that could allow the body to function normally and so, she was currently living on them.

Lu Jingye also drank some and it was true that he did not feel hungry or sleepy even until now.

Just as Lu Jingye was about to walk upstairs, his phone suddenly rang.

After he answered the call, he headed outside.

Dou Zerui hastily followed along. "Little Lu, did something happen?"

"There is an accident on Prince Justin's side. I will be going out. You guys should stay here and don't go anywhere."

Dou Zerui stopped walking and said, "Ok."

Lu Jingye walked to the courtyard and got into a car and drove away.

When he arrived at the end of the barrier Zi Yi had set up, Lu Jingye brought along Little Loli and one of his invisible robots before he continued to drive outside.

"Brother-in-law, what are we going to do?"

"Rescue Justin."

...

Justin never imagined that Edward would aim for his wife and child since he was unable to enter Lu Jingye's winery.

Looking at his wife and child that was being held hostage on the other side, Justin's eyes were bloodshot.

"Edward, you better not harm my wife or child. Otherwise, I won't ever forgive you!"

Edward snorted and said coldly, "You are now a sinner in the country. If you continue with your obstinacy, then all Country M's citizens will be in dire straits. If you don't make a choice today, then I can only teach you a lesson on behalf of all the citizens."

As soon as Edward said that, the guards holding onto Justin's wife and child placed a gun to their heads.

"Justin!"

"Daddy..."

Justin's wife and child were frightened and they started crying out loudly.

Justin clenched his fists and tried to control the flames of fury that were about to explode. He gnashed his teeth and said to Edward, "They are your sister-in-law and nephew. Do you really have to do this?"

"If not for you acting on your selfish desires, would I do this? Do you know how serious the international situation is right now? The European countries have already sent us an ultimatum. If we don't hand them over today by noon, they will march in directly with their army. When the time comes, the whole of Country M will be goners!"

Having said that, Edward suddenly exploded and said, "Justin, are you out of your mind? Or do you think you can do whatever you want just because Father has a soft spot for you? I'm telling you, for the sake

of the overall situation, you must stand by my side today. Otherwise, don't blame me for taking it out on your family."

Justin was feeling extremely anxious as he listened to the frightened cries of his wife and child.

At the same time, he started to doubt his choice.

Was it right or wrong for him to support Lu Jingye at this point in time?

Just then, a car quickly drove over from one side.

When Edward saw the individual seated in the car, he hastily shouted, "Quick, Lu Jingye is here. Have him surrounded. We must arrest him today!"

The car drove directly to their side and stopped.

The group of guards immediately surrounded Lu Jingye's car with weapons in their hands.

Lu Jingye opened the door and alighted with two other robots. His gaze landed on the faces of the woman and child for two seconds before he looked at Edward.

Edward finally revealed a triumphant laugh. "Hahaha... Lu Jingye, you've finally fallen into the trap!"

Lu Jingye looked away from him and turned to Justin.

There were traces of surprise in Justin's eyes. "Mr. Lu, why are you here?"

Lu Jingye said with a calm expression, "Since you've chosen to stand on my side, I can't possibly watch on the sidelines and see my allies get hurt."

Traces of emotions flashed past Justin's eyes.

"Hmph!" Edward sneered at this. "You yourself are in dire straits and yet, you're thinking of someone else's safety? As expected of Lu Jingye, you're the best at gaining people's trust. Since you're so loyal, follow me and leave."

Having said that, he took a step backwards. At the same time, Edward's bodyguards aimed their weapons at Lu Jingye.

"Mr. Lu, be careful."

The guards on Justin's side also raised their weapons and aimed at the guards on the other side.

Lu Jingye gave him a look of assurance and called out, "Little Loli."

Little Loli's bell-like voice sounded. "Brother-in-law, just leave it to me!"

With that, she quickly transformed into a three-meter-tall King Kong with a giant pike, which was around one meter long, in her hands.

Chapter 949 Country D's Runge Came In Person

The guards were all frightened.

Edward's arrogance was distinguished in an instant.

He quickly retreated while shouting out loudly, "Hurry and use Ariel and Joe as shields!"

Justin stomped his foot in anger. "Edward, if you dare hurt my wife and son, I'll bury you with them!"

"You're the one that's forced me." Edward revealed a twisted smile. "As long as that robot attacks, she and Lu Jingye are the culprits behind Ariel and Joe's death. What does that have to do with me?"

"You!"

Justin quickly turned his head to look at Lu Jingye.

There was a somber expression on Lu Jingye's face right now. It was to the extent that it was terrifying.

He looked at the hundreds of people standing opposite him, and a cold glint flashed past his eyes. "Fire."

BOOM!

Everyone stared at the fist-sized bullets flying in their direction in horror. They even forgot to breathe and react.

Edward, who was standing on the opposite side, was also frightened. When he finally reacted, he shouted violently, "Get out of the way!"

However, it was already too late.

BOOM!

The ground shook and dust flew everywhere, instantly covering everyone's visibility.

What remained was Justin's heart-wrenching cry. "Ariel! Joe! AHHHHH-"

Justin was overwhelmed with sadness and he felt as though his head was being hammered. He went crazy and wanted to rush over, but a large palm pressed on his shoulders which prevented him from moving.

At the same time, Lu Jingye's calm and powerful voice sounded in his ear. "They are fine. Let's go."

Before Justin even managed to react in time, a powerful force grabbed his arm and pulled him.

When he finally came to a realization of the situation, he was already standing next to a car where his wife and child were seated inside.

Ariel and Joe were also frightened and Ariel was hugging Joe while trembling. She seemed to have sensed something and quickly looked up. When she saw Justin standing outside the car, she finally revealed a relieved smile.

Justin also revealed a smile as though a heavy burden was lifted off his shoulders.

Lu Jingye motioned to him. "Get in. Let's leave this place first."

Justin shook his head. "No, I can't leave now, not yet."

He said to Lu Jingye in a serious tone, "Mr. Lu, please protect my wife and child. As long as they are safe, I will never let anyone disturb Mrs. Lu."

Lu Jingye looked into his determined eyes and nodded his head. He then walked to the driver's seat.

When he got into the car, he said to Justin, "I'll leave Little Loli behind to help you. Give me a call if you need anything."

"Ok."

Soon after, the car drove away. Little Loli, who had transformed back to her original appearance, stood in front of Justin and asked, "Prince Justin, what are we going to do now?"

By now, the dust had already dissipated. Justin looked at the ground in front of him and his heart sank. Even though these people threatened him with his wife and child, he did not have any intention of killing his eldest brother.

Little Loli seemed to have seen through his thoughts and she said, "Those people aren't dead. My bullets are sedatives. They'll wake up after twenty-four hours."

Justin suddenly breathed a sigh of relief.

He hastily said to his guards, "Bring them all away."

Just then, his phone rang.

He answered the call and the other party's anxious voice could be heard. "Prince Justin, the armies of eighteen countries have arrived at our national borders."

The moment Justin learned of this news, his pupils shrank. He quickly stabilized himself and said to the other party, "I'll be there right away. Hold them off first and don't let them in."

After he hung up the phone, he ran to the car.

Little Loli turned invisible and followed him.

...

At the borders of Country M.

Leaders from more than a dozen different countries were all gathered in a makeshift conference room. Everyone was discussing how they should force Country M to hand over Lu Jingye.

"Hmph! This Country M must have left their heads in the clouds during these recent years. How could they not hand Lu Jingye over at this point in time?"

"I think that's not only the case. Lu Jingye must have promised them plenty of benefits too. For a country this insignificant, would they dare to oppose a coalition that consists of so many countries if not for the absolute benefits they would receive?"

"It's also likely that China had promised them benefits. The higher-ups in China are ridiculous. Do they think they can really protect Lu Jingye after all this?"

"Lu Jingye's jewelry company has caused harm to so many people and it has caused the spread of the virus throughout Europe. If we don't arrest him, it'll be hard to eliminate the public outrage!"

“That’s right. If Country M continues to protect him, we’ll launch an attack!”

Everyone’s tone of voice sounded very agitated. Currently, all of them could not wait to arrest Lu Jingye and chop him into pieces.

The more they talked, the more agitated they became. Just then, someone’s phone rang.

He took out his phone and took a look. Immediately, he revealed a shocked expression and informed everyone. “Quieten down. Country D’s Major General Runge is personally making a trip over!”

After a moment of silence, everyone became even more excited.

“It seems like Lu Jingye is really finished this time round. Who doesn’t know that the Major General Runge of Country D is extremely ruthless? What he hates the most are people who cause harm to society.”

“It’s better this way. As long as Major General Runge comes, the King of Country M would then be so frightened that he hands Lu Jingye over right away.”

...

“Your Majesty! Bad news! We just received news that Country D’s Major General Runge is personally making his way here to arrest Lu Jingye!”

The King was currently in the courtyard outside his bedroom and fiddling with an antique he had received a long time ago. When he learned of the news, his hands trembled and he nearly dropped the antique.

He quickly held on to the antique and with a solemn expression, he looked at the person who had disregarded his orders and intruded inside his bedroom. He said with a displeased tone, “Prince Alder, as I’ve said before, Edward and Justin are in charge of this matter. No matter what happens, there’s no need to inform me.”

Prince Alder was infuriated. He could not be bothered about showing respect to the King. He gritted his teeth and said, “Prince Edward was arrested by Prince Justin and currently, Prince Justin is the one calling the shots. Your Majesty, are you really going to watch on and see your favorite son leading the country to its demise?”

The King furrowed his brows and he finally put down the antique in his hands. Even though he was worried, he was the one who gave the order. Therefore, he would not retract his orders at this point in time. He planned to look for Justin in private.

“You can go back first. I will investigate this matter.”

Prince Alder was itching to say that with the facts laid out in front of them, was there still a need to investigate? However, the King gave him a sharp look at this moment.

Prince Alder could only swallow all his words and leave with a dark expression.

The King immediately sent his men to call for Justin.

As to what the two of them discussed, only they themselves know.

At the winery.

Lu Jingye also received the news of Runge's arrival at the borders from the very first moment he arrived.

He immediately called for several of his subordinates and quickly gave them a few orders before returning to the laboratory.

Chapter 950 I Believe Yunxiao Has Encountered Danger

Zi Yi was still focused on the experiment at this moment.

Lu Jingye stood next to her and just remained watching her from the moment he came in. He did not disturb her at all.

This lasted until Zi Yi sensed his presence and turned to look at him. He asked her, "Yiyi, how is the experiment going?"

Zi Yi raised the corner of her lips and pointed to the petri dish. "I am currently decomposing the virus."

Having said that, she pointed at the virtual screen and said, "In another ten minutes at most, the results will be out."

Lu Jingye looked at the data flashing on the virtual screen. After looking at it for some time, he asked, "Will you be able to create the antidote next?"

"Yes."

Both of them waited for the results together.

Ten minutes later, sure enough, the data on the virtual screen finally stopped. In the end, the screen reflected various formulas and data that Lu Jingye was unable to understand in the slightest.

Zi Yi looked at the screen and explained to him, "This type of virus comes with an X lesion. After it survives in the human body, it will generally mutate into another virus. However, this virus isn't created using a single virus. Instead, it is a super virus composed of dozens of viruses."

Lu Jingye digested her words and asked, "Then do you know what is needed to create the antidote for these viruses?"

"I know." Zi Yi pointed at the red letters in the upper right-hand corner. "Those are the ingredients needed to create the antidote."

Lu Jingye was still unable to understand.

Zi Yi explained to him in detail. Moreover, she said with a hint of relief, "Several medicinal ingredients in our yard shall come in handy. Right now, what we need is to look for... these few poisonous plants and animals. Oh, there's something else I need. Z virus that originates from space. I've encountered such a virus before and it can be found in the polar ice meteorite belt in space."

However, at present, only the spaceships of Country A and Country D are able to travel to the polar ice meteorite belt.

Lu Jingye and her furrowed their brows right after realizing this.

“Country A’s National Space Agency is definitely unreliable. Perhaps everyone in there belongs to the male worm. Right now, we can only start with Country D’s National Space Agency.”

Lu Jingye nodded and informed her. “Runge is here.”

“Mhmm?” Zi Yi looked at him in surprise. “Don’t tell me he personally led his troops here to arrest you?”

“Yes.”

“Hmph! How dare he?!”

Zi Yi was still unaware that there were nearly twenty different countries’ troops that had arrived at the borders of Country M. Lu Jingye told her about this.

Upon learning of this, Zi Yi’s frown deepened.

“In that case, we have to increase our pace.”

Speaking of this, she thought of something and hastily asked, “How’s Yunxiao doing on his end?”

If there was still no news from Lu Yunxiao at this time, that means there was probably some trouble on his end.

After all, they still needed Lu Yunxiao to bring them the evidence that the virus originated from a secret laboratory in Country A.

Lu Jingye said with a serious expression, “There’s still no news from Yunxiao’s end.”

Zi Yi turned on the map of the area and connected it to Lu Yunxiao’s tracker.

When they realized he was still at the bottom of the sea, their voices became serious. “I believe Yunxiao has encountered some danger.”

Lu Jingye also had the same guess. However, they had no way to rescue him at this point in time. “Right now, only he can save himself. Otherwise, no one else can.”

“Mhmm.”

...

Borders of Country M.

Runge arrived at the borders at half past ten in the morning. Everyone invited him into the makeshift conference room.

Country E’s leader said, “Our ultimatum to Country M is for 12 noon today. If they still refuse to hand Lu Jingye over by that time, we will directly head out to arrest him.”

Runge sat there with a straight posture and a cold expression. He did not say anything in response.

The others paid no heed and continued to discuss how they would plan to arrest Lu Jingye later.

“We’ve sent people over to inquire about it in advance. Lu Jingye set up something in the area they are living in. If the people inside don’t come out to lead the way inside, those outside have no way to enter.”

“That should be a space magnetic field. Country A has created this in the past. It just so happens that Country A has also sent people over. When the time comes, we’ll let them break the space magnetic field.”

“Where are the people from Country A?” Runge suddenly spoke out. His voice sounded so chilly that the person who spoke felt a chill down his back for no reason.

The speaker felt slightly displeased deep down inside. He wasn’t from Country D, so why should he be afraid? In the end, without a change in expression, he said, “Their men will arrive in half an hour at most.”

Runge’s expression turned even colder. “Did the virus break out in their country too?”

“No. But they are here to help us.”

“Hmph! It’s our own affairs, would we require their help?”

In Runge’s mind, he was thinking that everyone in Country A had been taken over by the disgusting worm race. They were coming over and yet, these people in front of him were still so happy about it. They don’t even have the awareness that their bodies would be taken over by those worms.

At the thought of this, he stood up.

“Major General Runge, where are you going? Our meeting has yet to end.”

“There’s nothing more to discuss,” Runge left after he said that.

The representatives of a few countries were even more displeased at his attitude.

However, they did not dare to point fingers at him in his face due to his reputation.

Before long, everyone received news that Runge had directly made his way to Lu Jingye’s place.

The group of representatives was all extremely surprised.

“What does Runge mean by this? He went there alone?”

“Runge is coldhearted and ruthless. Since he went there alone, isn’t it even better? Let him take the lead. If he manages to arrest Lu Jingye, it would save us time from making another trip.”

“That’s right. We just have to unite and send Lu Jingye to the international military court when the time comes.”

“We must let him pay a heavy price. Isn’t he very good at business? I’d like to see if the assets under his name are sufficient to compensate for our losses or not!”

“Hmph! What I want is his life. If not for him, my wife and daughter wouldn’t have been infected with such a terrifying virus. Right now, our country hasn’t even managed to analyze the main components of the virus.”

“That’s right.”

The more they talked about it, the angrier they became and they started to curse and swear at Lu Jingye.

...

The higher-ups of Country M were still unaware when Runge led his men and entered the country. However, Lu Jingye had long already received news on this.

At this moment, he and Zi Yi came out of the laboratory and walked toward the winery.

After Lu Jingye received the news, he informed Zi Yi about this.

Zi Yi coldly snorted. "To think that he only brought his men here, how confident is he of himself that he is able to capture you?"

Speaking of this, she thought about it and said, "However, we can capture him when the time comes and force him to order Country D's National Space Agency to launch a rocket to the polar ice meteorite belt to fetch what I need."

Lu Jingye thought for a moment and said, "If we do this, he might not necessarily cooperate with us."

"If he doesn't cooperate, we will use force. In any case, he's no match for you."

Lu Jingye laughed and said, "Let's talk about it after he arrives. I feel that since he came here alone, he might not necessarily be here to arrest me."
