

Mysterious 801

Chapter 801 Wedding Photos

Qin Xi's outfit today was very casual, but it gave people a refreshing feeling.

She was wearing a loose beige dress that reached her knees. There was a white belt around her waist. Her hair was loose and she did not put on any makeup, but her facial features were so exquisite that she looked like she came out of a painting.

Han Shi's black suit accentuated his slender figure. When the two of them stood together, they looked like male and female leads from a comic.

The surrounding people glanced over from time to time, attracted by the two of them.

Qin Xi smiled faintly and held Han Shi's arm as they walked to the door. She smiled and nodded at the Gu couple. Before they could walk in, they heard a surprised female voice.

"Doctor Qin?"

Qin Xi and Han Shi looked over and saw an elegant woman in a cheongsam walking over quickly. When Qin Xi turned around, the woman was overjoyed. "It's really you, Doctor Qin. Do you still remember me?"

"Kai's mother?"

Qin Xi had an amazing memory and could tell at a glance that this woman was the mother of the boy she saved in the amusement park last year.

Tang Ling said with a smile, "Yes, my name is Tang Ling. I didn't expect to see you here. What a coincidence! Doctor Qin, you saved my son. I haven't thanked you properly. You have to tell me your contact number today. Otherwise, I won't be able to find you."

Qin Xi nodded.

"Doctor Qin, are you a friend of my brother-in-law?" Tang Ling asked.

"Yes. I'm invited to his wedding."

As soon as Qin Xi finished speaking, she saw Gu Qing walk out in a well-ironed suit with a groom's flower on his chest. He had no expression on his face. Perhaps everyone knew that he had the tendency to pull a long face, so they didn't find it strange.

However, when Gu Qing saw Qin Xi, a smile immediately spread out on his face. His voice was no longer as cold. "Qin Xi, you're here!"

Han Shi's face darkened. Just as Gu Qing was about to walk up to Qin Xi, he went forward and put his arm around Gu Qing's shoulder. He said with a fake smile, "Congratulations on getting married today. I heard that your wife is very beautiful. I didn't expect you to get married so early!"

Gu Qing glanced at him but didn't say anything.

Han Shi smiled at him provocatively and forcefully brought him to the banquet hall. Before he left, he did not forget to turn around and say to Qin Xi, "Wifey, continue chatting with your friend. I'll talk to the groom about how to be a proper husband..."

Qin Xi was speechless, but she still nodded at him.

"So you all know each other. That's great. Let's go in and talk." Tang Ling held Qin Xi's hand and led her into the banquet hall.

In the blink of an eye, it was ten o'clock.

Soon, the bride and groom walked out together, and the crowd burst into applause.

Han Shi pursed his lips. At the thought of his wedding with Qin Xi being so rushed and simple, he was immediately in a bad mood.

He held Qin Xi's hand tightly and whispered into her ear, "Wifey, let's get married again. I want to see you in a wedding dress too. Also, we want to take wedding photos too. It's been so long, but we haven't taken a photo together."

Qin Xi thought for a moment and nodded and said, "Why don't we buy a camera? We can buy a better one and take a family photo. We can also find someone to take wedding photos for us. We can take photos wherever we want. How about that?"

"Alright, let's do as you said."

Chapter 802 Earthquake

In June, the weather in Luoyang City had already become hot. In just a year, Luoyang City had undergone a tremendous change.

Not only was the shopping center in the middle of the city starting to take shape, but there were also new enterprises that were very popular. Sweet Dew Winery and Sunshine Pharmaceuticals were officially established.

Sweet Dew introduced medicinal wine, fruit wine, and dozens of new wine products.

Even the herbal tea released by Sweet Dew became a must-have tea for summer in every household.

Moreover, due to active publicity and good reviews, the influence of Sweet Dew quickly expanded during the summer.

Now, Sweet Dew was already a popular brand in the entire eastern region. Many businesspeople rushed to Luoyang City to seek opportunities to work with Sweet Dew.

Sunshine Pharmaceutical stepped onto the international stage earlier than Sweet Dew Winery. It had to be known that the medicines were all produced by Qin Xi, and there were no side effects.

Although the medicines were purported to be Chinese medicine, none of the medicines were bitter. Instead, they had a faint sweet taste.

Even the ones used to treat children were sweet and soft. Those who did not know better would think that they were made of candy.

Therefore, in the beginning, many people did not think highly of it. Some even thought that it was actually candy.

The real reason that got Sunshine Pharmaceutical famous was because of an earthquake. It was a magnitude 8 earthquake that shook the entire country.

Qin Xi discussed with Han Shi and decided to donate resources on the name of Sunshine Pharmaceuticals and the Sweet Dew. The couple did not stay idle. They brought Wang Zhiqiang, Blood Stealer, Saber, and Thunderkill to the front line of the earthquake.

In the beginning, Sunshine Pharmaceuticals encountered many obstacles. Because it was a newly established company, it was very difficult to be recognized.

During the process, many big drug companies made things difficult for Sunshine Pharmaceuticals and intercepted their medicines from being distributed to the victims of the disaster.

Fu Sheng was not anxious. He got a few volunteers who knew medicine to take all the necessary medicine to the disaster area secretly.

It was specially used to treat patients who were bleeding non-stop, had a high fever, and needed amputation for serious infections. Fu Sheng was certain that as long as their medicine was used, it would definitely help the victims.

In fact, that was indeed the case.

When a little girl whose artery was pierced by a steel bar and needed amputation used the styptic powder made by Sunshine Pharmaceuticals, the bleeding wound stopped in seven seconds.

Chapter 803 Gain A Foothold

“This... is too magical. How is this possible?!”

A middle-aged senior doctor looked at the girl who had sneaked into the medical team and asked sternly, “Who are you and why did you sneak into our medical team? Also, what kind of hemostatic medicine was that just now? Why did the wound stop bleeding in seven seconds? This doesn’t make sense.”

The girl who had sneaked into the medical team was called Song Jia, a staff member of Sunshine Pharmaceuticals. She shrugged and said innocently, “Doctor, the fact that you think it doesn’t make sense is because your knowledge is limited.”

“Let me tell you the truth. Not only does the hemostatic medicine our Sunshine Medicine produces has such an amazing effect, but the rest, such as fever medicine, is also effective. With two pills, the fever will naturally go down in 20 minutes.”

“That’s impossible. You’re just bragging,” the senior doctor immediately retorted.

Song Jia pointed at the little girl’s leg and looked at him. “Then how are you going to explain that?”

“If not for the hemostatic medicine, I wonder how you can stop the bleeding from the patient’s artery so quickly.”

The senior doctor's expression changed, but he couldn't retort.

"Sister, can I use this medicine?" After the pale and weak little girl felt the cold and comfortable feeling of the hemostatic medicine on her body, she endured the pain and raised her head to ask. Her voice was as soft as a mosquito.

Song Jia squatted down and patted her forehead to comfort her. "Of course. Sunshine Pharmaceuticals is a company that brings sunshine and hope to the patients. I think you're in a lot of pain. I have a piece of candy here. Do you want to eat it?"

She took out a red candy in the shape of a strawberry and brought it to the little girl's mouth. "Little girl, do you want to eat it?"

The little girl was in too much pain. When she saw that the red candy was in the shape of a strawberry, she immediately said sweetly, "Thank you, Sister!"

After the girl ate the candy, Song Jia told the doctor, "I just gave her hematinic medicine. Doctor, there's not much time left. If you don't want her to be in a wheelchair for the rest of her life, please use our medicine."

The doctor and the medical team looked at each other. In the end, they looked at the hemostatic medicine and gritted their teeth. "Alright, now, I need disinfectant and fever medicine..."

He said a lot of medicine in one go. Song Jia's eyes lit up and she immediately took out what he needed from the large medical kit she was carrying.

When the doctor used the medicine from the Sunshine Pharmaceuticals, the treatment process shortened greatly. Although the little girl's leg still needed surgery, the good news was that her leg did not need to be amputated.

This time, the doctor was so excited that he immediately informed the dean of his hospital. When the dean found out about this, he was also shocked and immediately asked the doctor to continue using the medicine from Sunshine Pharmaceuticals.

The most important thing now was to increase the efficiency of the treatment and save as many people as they could.

Hence, in just a day, Sunshine medicine became the first choice to save the dying and heal the injured, squeezing out all the old pharmaceutical companies.

Chapter 804 Let's Join Too

When Liu Jingye, the person-in-charge of KangMao Pharmaceuticals, heard this news, his face immediately darkened.

KangMao Pharmaceuticals was the top corporation in the country. It had tens of millions of employees and hundreds of millions of customers in the country. It could be said to be influential and powerful.

Under KangMao Pharmaceuticals, there was KanMao Pharmaceutical Factory and KangMao Hospital. They controlled hundreds of chain hospitals in the country and could be said to be the leader of the industry.

Now that the conglomerate had been replaced by an unknown small company, how could Liu Jingye stand the humiliation? If the higher-ups blamed him, he would be done for.

He frowned and looked at his assistant fiercely. "Is the Sunshine medicine that magical?"

The assistant's heart skipped a beat. He quickly handed over the investigation report and explained, "According to the test results by the experts from the various hospitals, the effect of the Sunshine medicine is more than twice as strong as that of all the medicines on the market."

Liu Jingye suddenly stood up. His eyes widened in disbelief. "Impossible, absolutely impossible."

The assistant was taken back by his jump and said in a daze, "Manager Liu, it's true. Now, the frontline of the disaster has already started using the medicines from Sunshine Pharmaceuticals. Moreover, the number of casualties has clearly decreased a lot. According to the current trend, in less than two days, Sunshine Pharmaceuticals will completely replace us in the frontline."

Liu Jingye gritted his teeth. "Damn it, we have to suppress this matter. We can't let it spread. Otherwise, KangMao Pharmaceuticals will become a laughing stock in the industry."

"But..."

The assistant hesitated and wanted to say something, but Liu Jingye glared at him. "I'll leave this matter to you. I want to hear good news today. Remember, I don't want a single word to leak out."

Looking at Liu Jingye's bloodthirsty gaze, the assistant's eyelids twitched. He opened his mouth, but in the end, he nodded helplessly and left.

After the assistant left, Liu Jingye paced back and forth in the office. He picked up the cigarette box on the table and took out a cigarette. Just as he was about to light it up, he suddenly realized something and put it back.

He picked up the phone and dialed a number. "Hello, Boss, there's something I need to report to you..."

On the other side, Qin Xi and Han Shi led Wang Zhiqiang and the others to the frontline of the earthquake. Although a day had passed since the earthquake, the aftershock was still there. Irrelevant personnels weren't allowed to enter.

The earthquake-stricken area was in a mess. The ground was filled with shattered stones and mud. Some collapsed houses and abandoned cars were lying on the ground. Corpses were carried out and placed at the side.

When Qin Xi saw this tragic scene, her pretty face changed slightly. She closed her eyes and took a deep breath. She said to Wang Zhiqiang and the others, "Go and save them with your best efforts. Save as many as you can. Also, prioritize your own safety. Do you understand?"

Wang Zhiqiang, Blood Stealer, Saber, and Thunderkill's expressions turned solemn. After receiving the order, the four of them turned around and quickly ran into the earthquake-stricken area.

Qin Xi looked at the four of them and sighed. She muttered, "I hope they can be safe and sound."

Han Shi put his arm around her shoulder and comforted her. "Don't worry, they can protect themselves."

“Stone, let’s join too!”

Chapter 805 Secret Formula

Han Shi nodded. Before he left, he reminded, “But we can’t go to the frontline. You’re still pregnant. Don’t make me worry!”

Qin Xi waved the acupuncture bag in her hand. “Don’t worry, with my medical skills, going to the frontline is a waste of my talent. I will stay in the rescue area to save the people.”

There were already enough people going to the front line, but the doctors who stayed in the rescue area to help were not enough, especially the divine doctor who could bring the dead back to life.

“Hey, doctor, come here quickly. Someone needs treatment.”

When a soldier saw Qin Xi in a white coat, he thought that she was a medical staff member and immediately shouted anxiously.

When Qin Xi and the others came in, they had already secretly changed into the clothes of soldiers and doctors.

Wang Zhiqiang and the other three were soldiers to begin with. When they put on the soldiers’ uniform, their aura was immediately revealed. Everyone thought that they were really soldiers.

It was even easier for Qin Xi to walk around the earthquake-stricken area. She had a doctor’s license hanging on her neck, so she was allowed entry no matter where she went.

As for Han Shi, although he had never been in the army or learned medicine, he had been with Wang Zhiqiang and the others for a long time and was naturally influenced by them.

The six of them sneaked in without arousing any suspicion.

Qin Xi quickly ran over and saw two soldiers carrying a stretcher with a young man lying on it.

At this moment, his eyes were closed, and the cold sweat on his forehead was mixed with mud and blood. He looked very miserable. His clothes were dirty and messy, and his feet had been cut off by something, revealing his white bones. His breathing was extremely weak, as if he would die at any moment.

Qin Xi quickly took out the Ice Soul Silver Needles and said to the soldiers carrying the stretcher, “Put him on the ground.”

The soldiers saw the doctor’s license hanging on Qin Xi’s neck and immediately placed the stretcher on the ground. Then, one of the soldiers took a step back and said to another soldier, “Go and help the others. I’ll help here!”

Qin Xi squatted down and checked the man’s injuries before taking out the needles. Her movements were fast and agile, and the silver needles seemed to be alive in her hand.

The soldier looking at the side was dumbfounded.

Soon, Qin Xi finished treating the man’s injuries. Then, she took out a red pill and stuffed it into his mouth. The soldier frowned and asked, “Doctor, what did you feed him?”

Qin Xi wiped the blood off her hand and said calmly, "It's a pill refined from a secret formula. It can reduce pain, prevent fever, and prevent infection."

The soldier was skeptical and wanted to ask about the details, but not far away, someone was shouting "doctor" crazily. Qin Xi turned around and ran towards the source of the voice.

The soldier opened his mouth, but in the end, he did not call her back.

Qin Xi ran over and saw that on the stretcher, a mother who had been pierced by a sharp piece of wood was protecting the five-year-old girl in her arms.

The mother's body was stiffened and she was clearly dead, but the sharp wooden tip still pierced into the child's lower abdomen. It had to be noted that this was a little girl. If it was not handled properly, it might affect her fertility in the future.

As Qin Xi ran over, two male doctors in their forties also ran over from the other side. They did not look at Qin Xi but observed the little girl's condition. The two of them discussed something in low voices. Then, they wanted to pull out the wooden tip that had pierced into the girl's lower abdomen.

Chapter 806 Bold Idea

Qin Xi stopped them sternly. "Stop. If you act rashly, you'll harm the little girl. Also, look at the awful conditions around you. Do you want to perform surgery here after removing the wooden tip?"

"Who are you? Go away. Don't disturb our treatment." One of the men raised his head and shouted at Qin Xi.

"Treatment?"

Qin Xi sneered and grabbed the wrist of the other man who wanted to remove the wooden tip. She said seriously, "Don't you know that pulling out the wooden tip like this will leave wood dust in her body? Do you call this treatment? Which hospital are you from?"

She shifted her gaze to the man's name tag. On it was clearly written: Lai Qi, Inpatient Department of KangMao Hospital.

"The inpatient department of KangMao Hospital? It's no wonder that you don't even know such simple common sense. I really don't know how many patients have been harmed by your ignorance."

When Lai Qi heard this, he immediately flew into a rage out of humiliation and said, "What does a young girl like you know? Who is causing trouble here? If you delay the treatment, can you afford the consequences?"

"I want to ask you the same question. If there are serious consequences, can you take the responsibility?"

Qin Xi was furious. These two doctors clearly didn't take the patient's life seriously. If they pulled it out just like that, the wood dust left in the child's body would kill her.

"This female doctor is right. If you pull out the wooden tip, wood dust will definitely fall into the child's body. Not only will she not be treated, but her injury will worsen, unless you perform surgery

immediately and remove the wood dust from the child's body, but the conditions here are obviously not suitable for surgery."

At this moment, a man in a military doctor's uniform walked over and checked the patient's injuries. He said seriously, "I think we should stop the bleeding first and send her to the hospital."

When Lai Qi and the other doctor heard that, they glared at Qin Xi.

Lai Qi snorted. "It's up to you. Anyway, we want to save this child, but you're the one who kept stopping us. If anything happens, don't blame us."

However, Qin Xi and the military doctor ignored him. Qin Xi said with a serious expression, "Use my disinfectant. Not only can it disinfect, but it can also dissolve ordinary minerals, such as small stones and wood dust. I guarantee that there won't be any residue."

No one believed what she said. Lai Qi almost laughed out loud and said sarcastically, "I think that's not disinfectant, but sulfuric acid!"

Qin Xi couldn't be bothered to explain. Instead, she took out a bottle of disinfectant and dripped a few drops on the wood dust on the ground.

With a hissing sound, the wood dust was instantly dissolved. Everyone retreated and looked at Qin Xi in horror.

Before Lai Qi could say anything, Qin Xi made a cut on her finger and dripped the disinfectant on the cut. There was a hissing sound as well, and white foam emerged from the wound. After that, nothing happened.

Seeing this, the military doctor's eyes lit up and he immediately had a bold idea.

Seeing the effect of Qin Xi's disinfectant, he immediately worked with Qin Xi to remove the wooden tip from the little girl. Qin Xi used a lot of strength to wrap the Mystic True Qi in her body around the wooden tip. This way, she could lessen the pain caused by pulling out the wooden tip.

When the wooden tip was successfully removed, Qin Xi immediately poured all the disinfectant into the wound. After the white foam was gone, blood was gushing out. Qin Xi quickly applied the hemostatic on it.

Then, a shocking scene appeared.

Chapter 807 Magical

In just a few breaths, the wound stopped bleeding. It had to be noted that the wound was bleeding profusely just now.

Qin Xi's hand was as steady as a mountain, and her expression did not change at all. She did not even blink as she sprinkled some white powder on the bleeding spot. Then...

The bleeding stopped.

This was too magical.

The military doctor's eyes lit up and his body trembled violently from excitement. He suppressed the shock in his heart and took a deep breath to calm himself down.

However, he stared at the thing in Qin Xi's hand with a burning gaze, wishing he could snatch it and study it.

Looking at Qin Xi's skillful way of handling the wound, Lai Qi and the other male doctor looked at each other before sneaking away.

In less than ten minutes, the little girl's wound was stitched up. Qin Xi sprinkled some healing powder and wrapped the wound with gauze. The entire process was smooth.

When they looked at the little girl's face again, it was much rosier than before. This undoubtedly reassured everyone.

"Doctor Qin?" The young military doctor glanced at the doctor's license on Qin Xi's neck. "Are you a Chinese medicine doctor?"

He looked very surprised. "You're the youngest person I've ever seen who studied Chinese medicine."

Qin Xi smiled and said calmly, "Age shouldn't be the standard by which you judge people's ability. Whether the medical skills are good or not should be the standard."

The military doctor immediately apologized in embarrassment, "I'm sorry. I mean no offense."

"It's fine." Qin Xi wiped the stains on her hands with a tissue and looked at the military doctor. "Do you have something to say?"

The military doctor immediately nodded and his expression became serious. "Doctor Qin, can I ask you where you bought the medicine you used just now? To be honest, what we lack in the army are special medicines. With these special medicines, we can greatly reduce casualties."

"You can ask the person-in-charge of Sunshine Pharmaceuticals about this. These special medicines are all produced by Sunshine Pharmaceuticals. Of course, if your organization needs them, we can modify the medicines to make it extra effective," Qin Xi said meaningfully.

The military doctor said in disbelief, "Doctor Qin, are you saying that the effect of these special medicines can... be improved?"

It was a special medicine that could stop bleeding in seven seconds. If it was improved further, how unbelievable would the effect be?

He couldn't believe it.

However, Qin Xi did not give him a chance to doubt her. She took out a small bottle and sprinkled the content on the finger she had cut open.

The military doctor looked at it in confusion, not understanding what Qin Xi was doing. Just as he was about to ask, he saw that Qin Xi's wound seemed to be healing slightly.

Five minutes later, the military doctor was so shocked that he didn't know what to say. Was he seeing a miracle?

The wound had already scabbed over. He looked at Qin Xi nervously. "Doctor Qin, this is too magical. Please, don't leave. I'll report to my leader immediately..."

As he spoke, he turned around and ran away, disappearing in the blink of an eye.

Chapter 808 Impossible

In the first-aid center.

At this moment, Song Jia and a few employees with nursing licenses from Sunshine Pharmaceuticals were helping the doctors treat the wound on the patients and bandage it.

A man in a white coat led a middle-aged man with a dignified expression and an imposing aura in. Behind the middle-aged man were a few young people with equally serious expressions.

The man in the white coat pointed at Song Jia and shouted, "It's her, it's her. Director Zhou, it's her. I saw her feeding that little girl something strange with my own eyes. Also, I suspect that the medicine she gave the patient is all illegal. How can real medicine take effect so quickly?"

Song Jia's expression changed drastically. She looked at the slightly plump man in the white coat and her anger was instantly ignited.

"What nonsense are you talking about? Our medicines are all tested by the relevant departments. They are all legal! On the other hand, you said that our medicines are illegal. What evidence do you have? If you don't have evidence, I can sue you for slander!"

The man in the white coat sneered. "Then tell me, if there's no illegal substance in your medicine, why was there a patient who was poisoned and fell into a serious coma after taking your medicine?"

The man called Director Zhou locked his sharp eyes on Song Jia and asked in a thick local accent, "Which hospital are you from?"

"You are?" Song Jia took a deep breath and looked Director Zhou in the eye.

Director Zhou's attitude was very firm. He frowned and said, "Answer my questions."

Song Jia was so angry that she laughed. She put the bandage in her hand aside and asked, "I don't even know who you are. Why would I answer your question? Also, I'm not a criminal. If you talk nicely, I might consider answering you, but if you treat me like a criminal, I'm sorry, I won't tell you anything."

She knew that she shouldn't be so tough and cause trouble for her company.

However, she could also tell that these two people were clearly here to cause trouble. No matter what her attitude was, they would definitely not give her an easy time. In that case, what was the point of being nice to them?

Director Zhou's eyes immediately darkened as he stared at Song Jia. Although Song Jia was panicking, she tried her best to remain calm.

When the man in the white coat saw this, he added fuel to the fire. "Young lady, you're too arrogant. This is Director Zhou. Behave yourself."

Song Jia's heart skipped a beat, but she still said firmly, "So it's Director Zhou. Why are you looking for me?"

Director Zhou narrowed his eyes and said domineeringly, "Answer my question."

"I'm not from any hospital. I'm a staff member of the Sunshine Pharmaceuticals in Zhejiang province. I'm here to volunteer." Song Jia tried her best to remain calm as she answered.

Director Zhou did not seem to believe her. He glanced at her sharply. "Is that so?"

Song Jia met his gaze and nodded. "Of course."

Director Zhou looked at her for a few more seconds before suddenly turning to the man in the white coat beside him. The latter immediately understood and looked at Song Jia fiercely. He questioned, "You're talking nonsense. The little girl you treated this morning who lost both her legs is about to die. You must have fed her something. Or, there's something wrong with the medicine you used."

Hearing this, the people who had just been treated by Song Jia immediately felt like something was not right. They did not know if it was a psychological effect, but they felt that the wound on their bodies was worsening.

Song Jia's expression changed drastically. "That's impossible. When I went to check, she was fine. How could she be dying?"

Chapter 809 Framed

"No matter what, you need to come with us."

After Director Zhou finished speaking, he looked at all the volunteers and said, "There might be a safety problem with Sunshine Pharmaceuticals' medicines. Now, my department needs to take the medicines back for testing. Please cooperate and don't use Sunshine Pharmaceuticals' medicines for the time being."

Song Jia's expression changed drastically as she said in a low voice, "I've said it before. Sunshine Pharmaceuticals has a business certificate and is a legit company. Director Zhou, if you have evidence, please show it. Don't slander us here. This will affect the reputation of our company."

"Evidence? I'll show you the evidence. Now, you have to come with us. Take her away!"

Director Zhou did not give Song Jia a chance to refute. He gave his subordinates a look, and Song Jia was held down on the spot and taken away.

When many patients saw this scene, they immediately panicked. They cried and asked the medical staff to stop feeding them the medicines.

A staff member who came with Song Jia immediately put down her work and ran out.

On the other side, Qin Xi was still unaware of what had just happened. She was actively treating the victims who had just been saved from the ruins. She was very efficient, almost treating one patient every few minutes. This greatly reduced the pressure on many doctors.

Just as Qin Xi was busy, the military doctor ran to her side excitedly. "Doctor Qin, our leader is here and wants to talk to you about the cooperation. Can you come with me?"

Qin Xi said without looking up, "Go to Area A to find a man called Han Shi. He's the person-in-charge of Sunshine Pharmaceuticals. He has the final say in this matter."

Just as the military doctor was about to say something else, he saw that Qin Xi had already begun treating another patient. If he disturbed her rashly, he might harm the patient.

Helpless, he could only run to Area A of the earthquake-stricken area. He did not know Han Shi and could only shout his name.

Han Shi had just pulled out an old man covered in dust from the ruins when he heard someone call him. He frowned and replied, "Hey, who are you? Why are you calling me?"

The military doctor was overjoyed. He immediately ran over and asked, "Are you Han Shi, the person-in-charge of Sunshine Pharmaceuticals?"

Han Shi wiped the sweat and dust off his face. However, his expression was very cold.

"I am. What's the matter?"

The military doctor said excitedly, "That's great. Doctor Qin asked me to look for you. Our leader wants to see you and talk to you about the cooperation."

Han Shi looked at the busy people on the ruins and said to the military doctor, "I don't have time now. If you want to talk, let's talk after everything is over."

With that, he threw himself into the ruins and quickly disappeared, ignoring the shouts of the military doctor.

The military doctor said helplessly, "...Alright then!"

However, when he went back to report to his superior, the latter was not angry at all. He kept praising Qin Xi and Han Shi for being good people.

**

The earthquake this time was violent. Not only did the local people suffer an unprecedented disaster, but even the neighboring cities were affected. The higher-ups took it very seriously.

Therefore, volunteers and donor companies swarmed in from all directions.

However, just as the disaster relief began, a nasty poisoning incident happened, pushing Sunshine Pharmaceuticals into the limelight.

By the time Qin Xi heard this news, all the members of Sunshine Pharmaceuticals had already been locked up. It was the military doctor who found her and recounted the matter in detail.

"KangMao?"

Chapter 810 Seeing Gu Worms Again

If she remembered correctly, Fu Sheng's fake mother seemed to be behind KangMao Pharmaceuticals. Back then, Qin Xi's ability was limited and she could not get to the bottom of it. However, she was certain that there were many nasty secrets about KangMao Pharmaceuticals.

For example, Elder Wang and the elders of the archeological team back then were all poisoned by Gu worms.

Qin Xi lowered her eyes and fell into deep thought. Seeing that she was silent, the military doctor didn't disturb her.

After a while, Qin Xi suddenly said to the military doctor, "Bring me to see the poisoned victim."

The military doctor nodded and turned to lead Qin Xi in a certain direction. However, after taking a few steps, he stopped in his tracks and looked at Qin Xi's side profile with a strange expression. He wondered to himself when he had become Qin Xi's lackey and let her order him around.

Soon, the two of them arrived at the overcrowded hospital. After asking around, they found out about the little girl's ward. When they went to the ward, there were many injured people standing, sitting, and lying in the hospital corridor. These were all people who had survived the earthquake. Of course, they were also the most injured.

The military doctor and Qin Xi came to a ward that was guarded. Before they could approach, they were stopped by the guard at the door. "Unrelated people are not allowed to enter!"

The military doctor frowned and took out his identification card. "This is my identification card. We want to see Cui Xiaoxiao." Cui Xiaoxiao was the little girl's name.

The guard did not even look at the military doctor's ID. With a wave of his hand, he almost slapped it off. He said in an unfriendly tone, "I told you, unrelated people are not allowed to enter. Don't you understand?"

The military doctor's face suddenly darkened. Just as he was about to say something, Qin Xi waved her hand and said indifferently, "Get lost. I want to go in!"

Then, to the military doctor's shock, the guard, who had been unyielding just now, actually retreated obediently with a blank expression. He did not stop Qin Xi from pushing the door open.

He did not understand what Qin Xi had done to the guard. He only felt that Qin Xi was becoming more and more mysterious.

After pushing open the door, Qin Xi's expression changed drastically. She quickly walked up to Cui Xiaoxiao and checked her condition. Her eyes suddenly burned with anger as she gritted her teeth and said, "These scumbags actually killed a child for the sake of benefits. They're simply beasts."

The military doctor looked at Cui Xiaoxiao and saw that she was only sleeping quietly. Although her breathing was a little weak and her face was a little pale, there was nothing unusual about her. Why was Doctor Qin reacting so strongly?

He couldn't help but ask, "Doctor Qin, what... happened to Cui Xiaoxiao?"

When he asked this question, he felt a little ashamed. After all, as a doctor and a military doctor, he was actually clueless about the patient's condition.

However, since it was a serious matter, he didn't pretend to know and asked humbly.

Qin Xi calmed down and rolled up Cui Xiaoxiao's trouser leg. There were three triangular red dots there. She said, "Someone cast a Gu worm on her. This Gu worm specializes in eating people's internal organs. On the surface, the people who are poisoned by the Gu worm look normal, but they are actually suffering unimaginable pain. It's like thousands of ants are biting them. Even adults can't withstand the pain. They actually did this to a child."

The military doctor's expression changed drastically as he asked in disbelief, "Gu worm? There's actually such a thing in this world?"

"There are all kinds of strange things in the world." Qin Xi glanced at him calmly. "Now, go and inform your leader. It's best if someone from the upper echelon can come and handle this matter."
