

## **N. Machine 261**

Chapter: 261

'It is true that he had entered supreme level.'

Lee Hameng got up and walked up to him with intrigued look.

"Leader Chun. This is unbelievable."

Chapter: 262

"So, there is a time limit to this?"

"It will only take maybe an hour to two hours. But if you can't come out within the timeframe, we will stop the machines and enter to see if you got into an accident."

The accidents killed three cadets already. These traps were very dangerous. Instructors then checked Yeowun's body to see if he had any tools to start a fire.

Chapter: 263

Yeowun then quickly ran through to get away. He would have been squashed by the ceiling if he had been late. With such a trap in such darkness, it was easy to see why even grandmaster level warriors were killed by these. It was still dangerous even when Yeowun could clearly everything. Yeowun then walked carefully. After looking, he was able to identify the trap triggers. Most of them were made to trigger when taking the wrong steps.

'I just need to be careful of those.'

As Yeowun had help from the night vision, he was able to avoid stepping on those triggers. And after moving through a bit, Yeowun realized something was off. He wasn't worried about getting lost since he was moving toward the breeze, but there were more directions in this cave. There were other open areas that were connected to others. Without the breeze, one could get lost by going the other way.

Chapter: 264

The writing was so large that it was hard to recognize what it said from close up. And the writing was written with a sword.

'This writing...'

It was the same writing style that was written on blue pearl stone pedestal. Surely this was written by Father Chun Ma.

Chapter: 265

'It's not equal in durability. This IS blue pearl stone.'

It was covered with other stone, but inside was blue pearl stone.

"Hmm..."

Chapter: 266

It was giant, but the speed was too fast. Yeowun quickly used his running skills to run across the cave wall, avoiding the dragon serpent's poisonous fangs. The fangs struck the cave floor, destroying it. The snake then turned and glared at Yeowun with glowing red eyes.

"Dammit!" Yeowun spat. He destroyed the wall in hopes of finding treasure left by Father Chun Ma, but in fact, he had awakened the demon sealed in the Demon Seal Cave.

The black dragon serpent charged at Yeowun. He quickly took steps to avoid being attacked, but the dragon serpent quickly followed Yeowun. Each time its fang struck the wall, the wall crumbled down. Yeowun had to be on the move entire time to not get struck by the dragon serpent's powerful attack.

Chapter: 267

'Wait a minute...'

The water was still up to Yeowun's knee. If that large monster came charging in, then it should have raised the water level, but it was the same. Yeowun ordered Nano.

'Nano, activate augmented reality.'

Chapter: 267

'Wait a minute...'

The water was still up to Yeowun's knee. If that large monster came charging in, then it should have raised the water level, but it was the same. Yeowun ordered Nano.

'Nano, activate augmented reality.'

Chapter: 268

'I did it!'

Yeowun then turned.

"So... this was it!"

Chapter: 269

'Is it growing?'

The horn also began to grow longer, looking like if it was going to turn into a true dragon. But when the dragon moved, the area around it thundered and trembled. The surface also shook like a sea under a huge storm. It was then — with the sound of something being cut down, the white dragon serpent screamed in agony.

'Ah!'

Chapter: 270

[Little less than an hour, Master.]

'Wheeeeew.'

Yeowun then sighed in relief. He was worried if he failed by not keeping within the time limit, but that wasn't the case.
