

National Forensic Doctor

Chapter: 16

"Uh... It's still from Longli County." Jiang Yuan still knows how to read people's eyes. After all, it is forensic medicine, the face of the dead must be seen, and the face of the living must also be paid attention to.

Huang Qiangmin didn't even try to hide it. He now suspected that Jiang Yuan had some unclear relationship with Longli County, so he asked directly: "Do you have Longli County in your family?"

"without."

"Then... Forget it, you can have a look at the fingerprints of our Ningtai County." Huang Qiangmin's style was tough, and he directly asked.

"Okay." Jiang Yuan responded obediently, and seeing Huang Qiangmin seemed to want to watch, said: "It may take a long time to do fingerprint comparison, and it will not be done in a short while. Is there any requirement for the type of case?"

"Let's prioritize the accumulated case. Do it well, and if you get the result, you can notify me directly!" Huang Qiangmin is not too sure about Jiang Yuan's ability, but in a place like Ningtai County, it is easy to find a man with eight-pack abs and a skilled forensic doctor Still very rare.

After leaving a special call for Jiang Yuan, Huang Qiangmin nodded to Wu Jun again, and said, "Tell him about our ranking list."

Then, Huang Qiangmin ignored Yan Ge and Wang Zhong and left the room directly.

Jiang Yuan looked at Wu Jun curiously: "The ranking list of combat power?"

This name sounds a bit like a middle school.

Wu Jun smiled and said, "That's the name of the performance evaluation list made by the provincial department of our Shannan Province. The province is ranked by prefecture-level cities, the cities are ranked by counties, and the counties are also ranked by counties. The rankings of each township are the

same, very detailed, you can see it when you open your police communication. Use a fashionable name, it is the KPI of our police.”

Jiang Yuan listened in a daze, and said dumbly: "KPI is not as fashionable as the 'combat power ranking list'. Is it really called this name?"

"En." Wu Jun nodded heavily, and continued: "The ranking list of combat power is now our baton. If you do well, the leader will be promoted and awarded collectively. If you don't do well, the leader will make it at the plenary meeting." Reviews, guarantees, and those who still can't do it, there are those who have been transferred and dismissed. And it's a layer-by-layer increase, and each level has requirements for each level.”

Unlike other government departments, the performance appraisal mechanism of the public security system has always been complicated. In addition to Shannan Province, other provinces and prefectures also have similar rankings, but the names may be different. For example, Zhuhai has a list of police resources and combat strength. (Note)

Qinghe's combat power ranking list is extremely detailed. The basic business of more than 30 police departments and more than 600 sub-items are all given points with different coefficients, updated in real time, and PK at the same time. In just one criminal case, there are multiple items ranging from homicide to property theft.

Wu Jun gave a general introduction, and said: "At the level of the county criminal police brigade, the total score of a year is about 1,000 points. If you solve a robbery backlog, or other seven categories of backlogs, you can get about 30 points. There will also be bonuses. The homicide case has the highest score, and it can get 70 to 100 points for solving a long-standing case and arresting people. For cases of property infringement, such as theft, it is about 0.1 to 0.5 points for solving a case, and serial cases or If you catch someone, you can increase a little..."

"The murder and robbery cases you mentioned just now are backlogged cases, what about the current cases?" Jiang Yuan couldn't help asking.

"The current cases of the eight major serious cases are all under the buckle mechanism." Wu Jun paused, and said solemnly: "This is very scary. For example, if you have a murder case with a score of 100, a murder case has been solved and someone has been arrested. , that is 100 points. If there are two or three cases, if the person is detected and caught, the 100 points will

still be the same. But if there are two cases and one of them is not detected, then 70 points will be deducted directly, and two cases will not be detected. Just deduct 140 points, three times 210 points, and so on..."

"Then if there are 10 unsolved murder cases, wouldn't 700 points be deducted?"

"Theoretically so."

"Actually?"

"Actually, the city can bear five of you, but the county can't solve up to three murder cases. The criminal police chief should be replaced."

"Then if a homicide case is successfully solved, wouldn't it be able to get one-tenth of the score of the entire criminal police brigade?" Jiang Yuan was surprised.

Wu Fayi laughed "heh": "Don't be modest, you can score one-fifth, and you can also receive awards for meritorious service. Our team only had more than 700 points last year, and there are still a lot of basic points in it. You know that our team has When was the first homicide case solved? Two years ago. Moreover, fingerprints are important, but they also have their limitations. Not every case has important fingerprint clues, and if there are, it may not be comparable. If you can win one of the other serious cases, you are the biggest donkey in the production team, the one who can pick the female donkey first."

"No wonder..." Jiang Yuan understood the captain's mood a little bit now, he had earned 30 to 40 points for Longli County.

Wu Junkuan explained: "There are also points for helping other units solve cases. This is cooperation. If it plays a key role, you can get one-fourth, one-fifth of the points... In short, it is a good thing to be able to solve the case, but it is better to solve the case for yourself. It's more comfortable than being broken by the next door."

A quarter is also much less than solving cases by itself, but it can roll other counties.

Jiang Yuan recalled it a little bit, no wonder the captain asked his master to introduce the combat power ranking list to him, but, next, he didn't know how to choose a case.

Wang Zhong cleared his throat at this moment, and said, "I know a case..."

Note 1: Some provinces have indeed made a "combat power ranking list", the name is exactly the same, and the function book is described, with slight changes.
