

## O game 56

Chapter 56 The King Tests the Black Wind Village!

Qing Fuyun and Le'ona involuntarily lowered their heads, scolded by the female general.

"Eldest sister, I will work harder," Qing Fuyun said.

Di Xuejian snorted coldly, "Qing Fuyun, what was with your ultimate move attack on that female assassin just now?"

"Scheming so much, fighting for power and profit, backstabbing each other, is that how you play? I will definitely report this to Father, you better behave yourself."

With that, Di Xuejian turned and left.

Seeing this.

Qing Fuyun was anxious, "Eldest sister, I know I was wrong."

However.

Di Xuejian didn't give her a chance to explain at all, and left straight away.

After Di Xuejian left, Qing Fuyun gritted her teeth and muttered:

"What are you pretending for? You want to take the opportunity to eliminate me, a competitor, and you still say it so righteously!"

"I really don't understand, you could have kicked out Third Sister without doing anything, why did you still have to act?"

Her voice was very low, but the resentment in her eyes was hard to conceal.

But as soon as her voice fell, a faint voice sounded behind her.

"Yun'er, you are confused."

Qing Fuyun's expression changed drastically.

Because she already understood the problem.

The royal palace is full of experts!

But when the Nightwalkers took action just now, why didn't any of the experts in the royal palace take action?

Was it that they were unwilling to take action, or was it that someone instructed them not to?!

Obviously, it must be the latter!

Even if some people were unwilling to take action, her father's confidants would definitely have taken action.

But none of them did!

The reason was already very clear.

This was a test of people's hearts by her father.

Graylorin's roar made Qing Fuyun worried that Le'ona would really kill Graylorin.

She didn't want Le'ona to kill Graylorin, and for a moment, she was so overwhelmed that she ignored this most crucial issue.

Her ultimate move attacked the female assassin instead of the Shadowman, this intention was too obvious.

"Mother, what should I do now?"

Qing Fuyun was a little flustered.

Eldest sister Di Xuejian was already at the height of her power in the kingdom, if Le'ona rises again, coupled with her performance today, she would basically have no chance with the throne.

"Let's go, there is one thing your eldest sister said is right, you are too weak, really too weak."

When she said this, Fiodinne's gaze fell on Le'ona.

Her eyes were deep, as if she had already seen through Le'ona.

"Mother."

Le'ona squeezed out a smile.

The other party was not her biological mother, her mother's departure was even related to Fiodinne.

If they were not in the royal palace now, they could directly tear their faces apart.

"Na'er, my good daughter, you have suffered these years outside, do you have time to sit in my Listening Rain Palace?"

Le'ona bowed, "I will definitely go when I am done with my work."

The conversation between the two ended.

Fiodinne then left with Qing Fuyun.

Le'ona breathed a slight sigh of relief. Facing this queen, she felt tremendous pressure, even greater than the pressure she felt when facing her own father.

... ..

Outside Blackwind Stronghold.

Lin Tianhao finally arrived here.

The task Le'ona gave, he accepted.

The reason why he came.

There is another reason.

In this Blackwind Stronghold, there is a hidden quest, a hidden quest that can reward luck attributes.

Luck attributes are hidden.

Therefore, in the early and mid-stages of the game, no players paid attention to the luck attribute.

But Lin Tianhao was very clear.

The luck attribute is crucial.

Critical hits, crit rate, and probability-based skills such as jumping lightning and death reincarnation.

After the luck attribute is increased, they will all be improved, but they will not be directly reflected on the attribute panel.

This is also the reason why many players in the early and mid-stages did not pay attention to the luck attribute.

Not only that, but some special tasks must also have a certain value of luck attribute to be triggered.

Otherwise, even if there is a strategy, it cannot be triggered.

Blackwind Bandit (Normal): 28.

Health: 3680 / 3680.

Attack: 251.

Skills: Consecutive Slash, Upward Thrust.

Lin Tianhao sighed, this attribute is so weak.

He shot an arrow.

"Ding, you have killed a Blackwind Bandit above your level, experience + 476."

"Ding, you have killed a Blackwind Bandit above your level, experience + 476."

... ..

One arrow!

Triggering Lightning Jump, all six Blackwind Bandits standing in front of Blackwind Stronghold were killed.

Killing six Blackwind Bandits, he stacked three points of health.

The efficiency of killing monsters is fast enough, but the efficiency of stacking health is a bit low.

But it doesn't matter.

The second leader of Blackwind Stronghold is a tank boss, with enough health, which can be used to farm health.

After killing these six bandits, the gate inside Blackwind Stronghold quickly closed, and no more bandits appeared.

As humanoid monsters.

These bandits in Blackwind Stronghold are very smart.

Judging from the damage Lin Tianhao just displayed, they already knew that they could not fight.

"Who is it? State your name."

A head stuck out from the gate of Blackwind Stronghold and asked loudly.

"I am your ancestor."

Lin Tianhao replied, and then an arrow pierced through the air.

"Bang!"

The powerful lethality forcibly shot a hole in the gate of Blackwind Mountain.

Seeing this scene, the bandit on the gate said timidly.

"Little brother, we have no grievances in recent days, and no grudges in the past. There is no need to be so aggressive, right?"

"Shush!"

What responded to him was still a cold feather arrow.

One arrow, two arrows, three arrows... ..

Holes kept appearing on the gate of the stronghold.

"Bullying too much!"

"Boy, do you really think our Blackwind Stronghold is unmanned?"

As soon as the voice fell.

One bandit after another appeared on the gate of Blackwind Stronghold, holding bows and arrows, and attacked Lin Tianhao.

"Shooting at each other?"

Lin Tianhao smiled playfully. With his current 400,000+ health, he was not afraid of shooting at each other.

One arrow, two arrows, three arrows, four arrows!

In just four arrows, in one second.

All the Blackwind Stronghold bandits on the gate were killed by Lin Tianhao.

There is no other reason.

Lin Tianhao triggered Lightning Jump twice.

After solving the bandits above, Lin Tianhao continued to attack the gate.

Before the gate could be breached by Lin Tianhao, it was kicked open from the inside.

"Boy!!"

"There is a road to heaven but you don't take it, and there is no door to hell but you break in. Today, I must let you see the power of our Blackwind Stronghold!"

Along with the sound, a bald strong man rushed out with hundreds of Blackwind bandits.

Blackwind Stronghold Third Leader (Black Iron): 30.

Health: 375000 / 375000.

Attack: 1998.

Skills: Whirlwind Slash, Five-Stage Slash, Mad Demon Dual Blades, Super Armor, Berserk, Instant Slash.

Lin Tianhao raised his eyebrows.

Behind this Blackwind Stronghold Third Leader, there were also more than a dozen elite-level bandits, and nearly a hundred ordinary bandits.

But Lin Tianhao was not afraid at all.

This attribute is too weak.

"Shush!"

The feather arrow was shot, and a huge damage number popped out above the head of the Blackwind Stronghold Third Leader.

Critical Hit!

- 28384!
