

O game 69

Chapter 69 Blood-Eyed Dragon Turtle!

After seeing Zhou Xiaopang off.

Lin Tianhao continued to grind monsters.

He had already killed the Bloodback Xuan Turtle twelve times, and with only six more to go, the Blood-Eyed Dragon Turtle would appear.

With Lin Tianhao's current damage output, the biggest thing he had to wait for to summon the Blood-Eyed Dragon Turtle was the respawn of the Bloodback Xuan Turtle.

In the blink of an eye.

An hour passed.

"Ding, due to your killing of a large number of Blood-Eyed Xuan Turtles, the Blood-Eyed Dragon Turtle sleeping in Blackwater Lake has awakened, please move away as soon as possible."

Move away?

That was impossible.

His goal this time was to hunt the Blood-Eyed Dragon Turtle.

Ahead.

The Blackwater Lake rippled, and a turtle shell the size of a basketball court emerged from the water.

Blood-Eyed Dragon Turtle (Bronze): Level 45.

Health Points: 6,850,000 / 6,850,000.

Attack: 17,590.

Skills: Rapid Water Cannon, Healing Body, Dragon's Roar Tsunami, Nine Pillar Impact, Blackwater Whirlpool, Bloodthirsty Dragon Armor, Water Arrow Array, Blood-Eyed Poison Mist, Super Armor, Frenzy.

Lin Tianhao raised his eyebrows.

Close to seven million health points, over seventeen thousand attack power, and the unrevealed magic power.

The Blood-Eyed Dragon Turtle was a magic monster, and its magic power was bound to be higher than its attack power.

However, Lin Tianhao was not afraid at all. Even without wearing the Tears of the Goddess of Life, his health points already exceeded 530,000.

He still had a good chance to kite it.

Whoosh!

An arrow shot out.

-16369.

A huge damage number appeared above the Blood-Eyed Dragon Turtle's head.

At the same time, there were two particularly noticeable health recovery prompts.

+5258.

+3000.

The Bloodthirsty Dragon Armor's lifesteal and the Blood-Eyed Dragon Turtle's own health recovery ability.

Lin Tianhao felt his scalp tingle.

He knew that the Blood-Eyed Dragon Turtle's health recovery ability was very strong, but he didn't expect it to be this strong.

If it were an ordinary level 45 player, they probably wouldn't even be able to deal as much damage as it could recover.

Of course, this was ignoring the grievous wounds effect.

Generally speaking.

You don't need to be level 45. Around level 30, weapons or skills with grievous wounds would start to appear.

With grievous wounds suppression, the boss's health recovery effect would inevitably be greatly affected.

This made Lin Tianhao think of something interesting.

Could he consider getting some grievous wounds equipment so he could remotely gank those world bosses?

The grievous wounds attribute was a special attribute, and the harder it was to stack the further you went.

Before the second job advancement, being able to stack grievous wounds to thirty or forty percent was already amazing.

However, that little bit of grievous wounds wouldn't help Lin Tianhao much.

He was thinking in his heart.

But the battle didn't stop at all because of this.

Lin Tianhao's arrows kept piercing through the air, and he didn't rashly approach Blackwater Lake.

Instead, he used the attack distance increased by his normal attack amplification to kite from a distance.

The Blood-Eyed Dragon Turtle roared, and the water in Blackwater Lake churned, creating waves several meters high that crashed towards Lin Tianhao.

This was a range-based skill.

Lin Tianhao's movement speed was fast, but it was still not very realistic to avoid the impact of such a large area of waves.

-19859.

A huge damage number floated above Lin Tianhao's head, and at the same time, he was knocked away by the waves.

This kind of large-scale skill, with such abnormal damage, was really a headache.

After a brief knockback, Lin Tianhao had already landed.

But as soon as he landed, he noticed a circle of watermarks appearing under his feet.

"Not good."

Lin Tianhao jumped out.

Behind him, a pillar of water shot up from the ground.

If he was a little slower, he would have been knocked into the air by the water pillar.

He had just landed, and another pillar of water immediately shot out from under his feet.

Lin Tianhao leaned back and somersaulted, narrowly avoiding the second pillar of water.

Supporting himself with one hand, Lin Tianhao was still upside down when he saw the watermark appearing below him.

"Bang!"

A huge pillar of water hit him, knocking him away while also reducing a large amount of his health points.

-18850.

Another damage value close to 20,000.

And taking advantage of Lin Tianhao being in the air, the fourth pillar of water came crashing down.

Judging by the skill name.

The Blood-Eyed Dragon Turtle's water pillar impact should have nine pillars.

Lin Tianhao rotated his body 360 degrees sideways in the air, narrowly avoiding the fourth pillar of water.

He immediately retreated after landing.

With enough movement speed and preemptive dodging, the remaining pillars of water would not pose a threat to him.

Lin Tianhao was even able to attack the Blood-Eyed Dragon Turtle with arrows in the gaps between dodges.

"Whoosh!"

"Whoosh!"

The arrows kept shooting out. Lin Tianhao was dealing a lot of damage, but the Blood-Eyed Dragon Turtle's health recovery was also considerable.

Moreover, the surrounding area of Blackwater Lake was its territory.

The range of its skill casting was comparable to Lin Tianhao's normal attack distance after amplification.

After enduring the water pillar attack, Lin Tianhao began to output frantically.

Trying to deal as much high damage as possible.

-16398.

-16407.

.....

Lin Tianhao's damage was not low.

The Blood-Eyed Dragon Turtle's health recovery was good, but passive health recovery was calculated per second, and Lin Tianhao's attack speed was still above five.

Being able to deal more than 80,000 damage per second, the Blood-Eyed Dragon Turtle's passive health recovery per second was not enough.

The main health recovery was still based on the lifesteal effect of the Bloodthirsty Dragon Armor.

However, facing Lin Tianhao's high damage output, it was still a drop in the bucket.

The Blood-Eyed Dragon Turtle already possessed some intelligence and knew very well that this kind of fighting method wouldn't work.

"Whoosh!"

What surprised Lin Tianhao was that the Blood-Eyed Dragon Turtle actually retracted its limbs and head into its shell.

In the next instant.

The Blood-Eyed Dragon Turtle's shell floating on Blackwater Lake actually turned into a stream of light, rushing in front of Lin Tianhao in the blink of an eye.

Lin Tianhao only had time to roll sideways, but the Blood-Eyed Dragon Turtle's shell was about the size of a basketball court.

Lin Tianhao didn't completely avoid this sudden impact and was still knocked away by the impact.

-19999.

Lin Tianhao's health bar dropped a bit.

Lin Tianhao continued to attack after landing.

The Blood-Eyed Dragon Turtle's attack range was very large, but the output was not as high as Lin Tianhao had imagined.

Next.

Lin Tianhao knew why the Blood-Eyed Dragon Turtle wanted to rush over.

After it stopped, it directly slapped Lin Tianhao on the head.

-34980.

Critical Hit!

Lin Tianhao only felt his head buzzing from the Blood-Eyed Dragon Turtle's slap.

But he didn't stop and immediately retreated.

At the same time, arrows kept shooting out.

He had to create distance, otherwise close combat would be very unfavorable to him.

However, the Blood-Eyed Dragon Turtle's movement speed looked slow, but because of its huge size, it only had to take one step to be equivalent to Lin Tianhao running more than a dozen steps.

The result was that Lin Tianhao couldn't create distance at all.

"Hmph, since you want to fight up close, then I'll play with you."

Lin Tianhao snorted coldly, gave up on creating distance, and instead rushed towards the side of the Blood-Eyed Dragon Turtle, using the Blood-Eyed Dragon Turtle's huge body to block his vision.
