

O game 82

Chapter 82: Ice and Snow Snake, Extreme Pull!

But Lin Tianhao was not discouraged. After experiencing the difficulty of this instance, he didn't even consider clearing it in one go.

Now, he would try to clear it as much as possible, treating it as a way to familiarize himself with the instance and understand its mechanics.

From the current perspective.

When he was farming the Icefield Werewolves before, he was too fast. If he slowed down, he should be able to stack an additional 50,000 to 100,000 health points.

That way, his basic attack damage and health point上限 would both be improved.

Perhaps the direct increase wouldn't be much, especially since it would be greatly reduced here due to the influence of Divine Might, but even a mosquito's leg is still meat.

Every little bit helps!

Whoosh!

Whoosh!

Whoosh!

... ..

Arrows constantly pierced through the air.

Lin Tianhao finally managed to knock back the Icefield Serpent.

The difficulty was dozens of times higher than knocking back ordinary monsters.

The mental strain on Lin Tianhao was enormous.

If it followed the Icefield Werewolf's script and activated its Super Armor, what would happen?

It would quickly regenerate health.

In other words, with his damage output, it would take him about forty minutes to kill an Icefield Serpent.

And that's assuming there were no mistakes and no second Icefield Serpent appeared.

Just thinking about it made Lin Tianhao's scalp tingle.

However, thinking about it from another angle, it wasn't impossible.

Stacking nine health points per second meant 540 health points per minute, and 21,600 health points in forty minutes.

Killing an Icefield Serpent would allow him to stack so many health points, and his damage would also increase accordingly.

Of course.

These were just Lin Tianhao's calculations for now. Whether or not there would be any unexpected events was unknown.

But sometimes, accidents just happen so suddenly.

Lin Tianhao had been fighting the Icefield Serpent for half an hour, and just when he was about to succeed, a second Icefield Serpent appeared.

Damn it!

This is going to be difficult!

Lin Tianhao's movement speed was greatly affected now, and it was almost impossible to kite them by moving around.

Besides that, Lin Tianhao had one more trick he could use to kite them, which was Twin Dragons Playing with a Pearl.

Twin Dragons Playing with a Pearl meant firing two arrows at the same time.

This was different from firing two arrows simultaneously, because both arrows fired with Twin Dragons Playing with a Pearl were fired using the String Twisting Arrow Technique, which had a certain knockback effect.

But even with Lin Tianhao's skill, he couldn't use Twin Dragons Playing with a Pearl to knock back two Icefield Serpents at the same time.

If they were two ordinary monsters, maybe it would be possible.

The knockback conditions for snake-type monsters were too harsh.

However.

If he only knocked back one and kited the other, he could still do it.

It was about as Lin Tianhao had expected.

After forty-one minutes, the first Icefield Serpent died.

Next was the second Icefield Serpent.

Still the same routine, knock back, follow up.

But this time, Lin Tianhao had only been fighting for twenty minutes when the third Icefield Serpent appeared.

Lin Tianhao had now figured out the situation.

An Icefield Serpent would appear every half hour.

He could only continue to kite them.

The previous one had stacked 22,000 health points, and the second one, which appeared eleven minutes early, had stacked a total of 28,000 health points for Lin Tianhao.

With the amplification from the Tear of the Goddess of Life and Zhou Xiaopang's talent, the increased health points reached over 36,000.

But due to the effect of halving all attributes, the actual amount was over 18,000.

In other words.

Only these 18,000 health points could be converted into damage.

Each basic attack damage increased by over 500, and the damage per second increased by over 1,600.

This increase was simply not enough in the face of the Icefield Serpent's 30 million health points.

In the blink of an eye.

By the time the second Icefield Serpent was killed, twenty minutes had passed since the third Icefield Serpent had appeared.

In other words, there were still ten minutes before the fourth Icefield Serpent would appear.

As it stood, he could still handle it.

But what if he had to face three Icefield Serpents at the same time next?

Lin Tianhao's scalp tingled just thinking about it.

Because facing three Icefield Serpents at the same time meant that he had to tank the damage of one Icefield Serpent.

This would put a lot of pressure on him.

But since things had come to this, Lin Tianhao could only take things one step at a time.

After killing the second Icefield Serpent, his basic attack damage per second increased by over 1,900.

Adding to the over 1,600 damage per second that he had increased when he killed the first Icefield Serpent, Lin Tianhao's damage had now increased by a total of over 3,500.

Over 3,500 more per second, 210,000 more per minute.

Even in ten minutes, he could only deal an additional 2.1 million damage.

This damage increase was still too low compared to the Icefield Serpent's health points.

Lin Tianhao went all out and finally killed the third Icefield Serpent.

Next, his real nightmare came.

Facing three Icefield Serpents at the same time.

Lin Tianhao was still doing the same thing, Twin Dragons Playing with a Pearl.

In fact, with Lin Tianhao's skill, he was already able to use three arrows at the same time to perform the String Twisting Arrow Technique.

But that would make it impossible to knock back the Icefield Serpent, not even one.

Now Lin Tianhao could only pray that he could withstand the damage of one Icefield Serpent.

-10000!

-9998!

... ..

Lin Tianhao began to take damage. As it stood, he could still withstand this damage.

Because compared to the Icefield Werewolf, although the serpent's attack power was higher, its attack speed was slightly lower, and it didn't have a bleeding effect.

He just didn't know if this Icefield Serpent had any particularly outrageous skills.

As Lin Tianhao continued to kite, the floating Icefield Serpent activated its Super Armor and landed.

At this time, Lin Tianhao did not hesitate and chose to fire three arrows simultaneously, kiting three Icefield Serpents at the same time.

This kind of kiting could reduce the damage Lin Tianhao took by a lot.

At this time.

The 20% slowing effect of the Ice Command Token came into play.

In this kind of tug-of-war, Lin Tianhao's movement speed was impaired, and their movement speed was also severely impaired.

In addition to fighting three at once, Lin Tianhao didn't need to consider knocking them back, so it would be much easier to fight.

As long as he rhythmically used the String Twisting Arrow Technique to knock them back, he would be able to stand firm and remain invincible.

This kind of rhythm.

However, Lin Tianhao only thought about it briefly before giving up on this tactic.

He knocked back another Icefield Serpent and continued to output damage, maximizing his output.

When the Icefield Serpent in Super Armor state ended its Super Armor, he continued to output damage to the Icefield Serpent whose Super Armor had ended, killing it.

Then, he attacked the fifth Icefield Serpent that he had just dealt some damage to.

Due to the snow's health regeneration, the fifth Icefield Serpent's health points had recovered a lot, but it had not fully recovered after all.

This feeling was really about maximizing damage, otherwise he might accidentally get himself killed.

As it stood now, he could still deal with three Icefield Serpents with extreme kiting.

If it were four, according to Lin Tianhao's calculations, it wasn't impossible to kite them, but the mental strain would be very terrifying.
