

## O game 83

Chapter 83: Start over, new strategy!

However, based on Lin Tianhao's output progress, he could still withstand it for the time being.

Moreover, because he was simultaneously fighting three Ice Serpent, Lin Tianhao's health regeneration speed was even faster.

He could regenerate twenty-seven health points per second.

Even with the interspersed Stringing Arrow Technique, he could still regenerate fifteen health points per second.

That's nine hundred points per minute.

The damage was slowly increasing.

Although it wasn't a lot, it was very stable.

After Lin Tianhao killed the seventh Ice Serpent, he suddenly faced four Ice Serpents at the same time.

The pressure began.

Moreover, Lin Tianhao could already foresee that the upcoming battle would be very unfavorable to him.

There was no other reason.

At this time, Lin Tianhao's damage was not enough to quickly kill the Ice Serpents, and continuing to fight would not break the situation.

So, Lin Tianhao simply put away his weapon and waited to die!

Because Lin Tianhao had already thought of a way to break the situation.

The Ice Werewolves were his biggest opportunity. As long as he used them well, he might be able to defy fate.

He might even be able to use the characteristics of this instance to increase his health to an unbelievable level.

With Lin Tianhao not resisting, even with the damage reduction and life steal ability of the Bloodthirsty Dragon Armor, he was still killed in a short time.

After all, they were all level 50 Bronze Bosses, and their damage was beyond doubt.

After Lin Tianhao died, he returned to the place where he first entered the instance.

Everything was reset.

The Ice Order he obtained was gone, the accumulated health returned to the original starting point, and the attributes gained from eating vegetables were also gone.

Even the added free attribute points came back, turning into three hundred and eighty free attribute points, displayed as before the allocation.

Most notably.

The damaged Purification Jade Pendant, its wear and tear returned to one hundred, and it was repaired.

This was, time reset!

At first, Lin Tianhao thought that death was attribute reset, but now it seemed that it was time reset.

"Since that's the case, then I can try my plan just now."

Lin Tianhao directly added all the free attribute points to attack speed, and the attack speed increased from the original 5.73 to 11.65.

The following plot did not change.

The first Ice Werewolf appeared.

Lin Tianhao used the Stringing Arrow Technique to knock the Ice Werewolf in mid-air down.

Then.

He did not use the Floating Arrow Technique as before, and he did not even wear the Tears of the Goddess of Life. He just attacked the Ice Werewolf like this.

The Ice Werewolf regenerates 100,000 health per second in the snow. Lin Tianhao's attack speed of just over eleven, even without wearing the Tears of the Goddess of Life, can still knock off 180,000 health from this first Ice Werewolf per second.

Therefore, Lin Tianhao would deliberately slow down some attack speed, so that this first Ice Werewolf would not be quickly crippled.

Then came the second.

The third.

Lin Tianhao was firing two arrows at the same time, three arrows at the same time!

But he just didn't kill the Ice Werewolves.

Until the fifth Ice Werewolf appeared, Lin Tianhao began to kill the first Ice Werewolf.

Because currently, firing five arrows at the same time was the limit Lin Tianhao could do.

Lin Tianhao's mouth turned up, and a faint smile appeared on his face.

Everything was developing in the direction he expected.

When the first Ice Werewolf was killed, the sixth Ice Werewolf happened to appear, and there were five Ice Werewolves in the field again.

Lin Tianhao still fired five arrows at the same time, maximizing the efficiency of stacking health.

Calculating the time, when the next Ice Werewolf was about to appear, he selectively killed one Ice Werewolf.

This was wonderful.

This kind of bug-fixing method allowed Lin Tianhao's health to increase rapidly.

Firing five arrows at the same time, fifteen health points at a time, even if he could control the output, the average normal attack was more than six times per second.

He could stack ninety health points per second!

Five thousand four per minute!

Three hundred and twenty-four thousand health points could be stacked in an hour.

Although with the increase of Lin Tianhao's health, the damage would also increase, which would affect his health stacking progress to a certain extent.

But with this degree of influence, Lin Tianhao was still not worried.

Later, when two were refreshed at a time, Lin Tianhao's fighting style was still the same as before, keeping five Ice Werewolves in the field at all times.

And in the end, when there were five left, Lin Tianhao simply stopped killing them.

He turned on the crazy health stacking mode.

Unlimited health regeneration in the snow, that was unlimited health stacking for Lin Tianhao.

Although firing five arrows at the same time consumed a lot of mental energy, and with the passage of time, Lin Tianhao's damage increased, the health that could be stacked per hour would also decrease.

After all, his damage increased, and to ensure that he would not kill these Ice Werewolves, he could only reduce the attack frequency.

Just like that.

Lin Tianhao still struggled for more than seven hours. The main reason was that firing five arrows at the same time consumed too much mental energy, and he had reached his limit.

In these seven hours, Lin Tianhao's health stacked up to over 1.5 million.

If you add the Tears of the Goddess of Life and Zhou Xiaopang's passive blessing, the actual health blessing Lin Tianhao obtained had reached two million.

With two million more health, even if affected by Divine Might and reduced by 50% of attributes, he still had a blessing of one million health.

One normal attack can deal 30,000 more true damage.

Even if the attack speed is affected and reduced to 3.0, his damage per second is still 90,000 more.

This 90,000 is directly damage explosion!

Moreover.

Lin Tianhao was still thinking about whether there was a way to obtain more things in the village.

While Lin Tianhao was thinking about these things, the villager Aunt Chen appeared.

Lin Tianhao had experienced the plot, so he was familiar with it.

Only when eating, Lin Tianhao sighed and said:

"These monsters recover too fast in the snow, otherwise I would definitely be able to kill them very easily."

Hearing Lin Tianhao's words, the villager Aunt Chen said: "That's true, but there is a traveling doctor in our village who seems to have researched a way to restrain these monsters' health regeneration."

Lin Tianhao's eyes lit up.

Sure enough.

There were other rewards in this village, but he hadn't developed them yet.

"Okay, Aunt Chen, can you help me introduce me to this Doctor Liu later?"

Aunt Chen nodded and said: "Of course there is no problem. You are the hero of our village. I believe Doctor Liu will definitely be able to help you."

Lin Tianhao was a little surprised.

Because after he triggered Doctor Liu, Village Chief Li did not appear.

Could it be that only two rewards can be triggered in the novice village?

But for the time being, it is not certain.

The reward mechanism in this kind of instance still needs to be explored well.

But Lin Tianhao already had a guess.

In the novice village, the most useful thing should be something to resist Divine Might.

So.

Lin Tianhao was preparing to try a new way to play!
