

## O game 84

Chapter 84: Health points exceed one million!

That is, when encountering Divine Might, he should not hesitate to run back for help.

In the village, there is a high probability that someone can fight against Divine Might.

Otherwise, with this hell-level difficulty of Divine Might, he won't be able to pass, and neither will other players.

Before the second job change, even those players with god-level talents would find it difficult to conquer this dungeon.

Therefore, things that can resist Divine Might are the most important.

It should also be the best hidden reward in the novice village.

While thinking about these things, Lin Tianhao had already seen this Doctor Liu.

This is a half-centenarian old man who is over 1.8 meters tall and has a somewhat burly figure.

His hair is gray, and his beard is very long. He doesn't look like a doctor, but more like the village chief.

"Doctor Liu, this adventurer helped us kill the Ice and Snow Werewolf. He is preparing to go deeper, but the ice and snow monsters' health regeneration ability in the snow is too strong. He wants to ask if there is any way to reduce the monsters' health regeneration."

Doctor Liu raised his eyes and glanced at Lin Tianhao, pondered for a while, and then said, "Brave adventurer, your bravery exceeds my imagination, but I don't quite believe that you can solve those hateful ice and snow monsters."

"Unless you can go forward and kill some Ice and Snow Great Snakes, I will give you rewards based on the number of Ice and Snow Great Snakes you kill."

"Ding, Doctor Liu has issued a mission to you, do you want to accept it?"

"Mission requirements: Kill Ice and Snow Great Snakes, the more the better."

"Mission penalty: None."

"Mission reward: For each Ice and Snow Great Snake killed, you can get a bottle of Severe Injury Potion."

Lin Tianhao raised his eyebrows. He seemed to have discovered something interesting.

That is, he doesn't need to kill all the Ice and Snow Great Snakes to retreat.

In other words.

When facing the Ice and Snow Great Snakes, he doesn't need to fight to the death at all.

If that's the case.

Then the Ice and Snow Great Snakes must have a aggro range.

For example... the range covered by Divine Might.

As long as he exits the range covered by Divine Might, will the Ice and Snow Great Snakes stop chasing?

As it stands, this possibility is very high.

"Okay, please rest assured, Doctor Liu, I will do my best to kill as many Ice and Snow Great Snakes as possible."

Lin Tianhao bid farewell and left.

This time, because of the previous battle, Lin Tianhao had eaten all the dishes that increased attack speed.

Lin Tianhao didn't care too much, crossed the stone tablet, and continued forward.

Divine Might descends!

Lin Tianhao still didn't care, until the first Ice and Snow Great Snake appeared.

Lin Tianhao started fighting and retreating. When he exited the boundary of the stone tablet, Divine Might disappeared, and the Ice and Snow Great Snake also disappeared.

"So that's how it is, it seems that my guess is correct."

The Ice and Snow Great Snakes here may also have the ability to reset time. As long as he exits, everything inside will be reset.

Because Lin Tianhao discovered that the health value he had stacked when attacking the Ice and Snow Great Snake also disappeared after exiting the boundary of the stone tablet.

It's resetting again!

It's just that this reset is not the same as the previous reset. This time, his reset only reset the attributes of attacking the Ice and Snow Great Snake.

After pondering for a while.

Lin Tianhao didn't step in again, but turned back to find Aunt Chen.

"Aunt Chen, the front is shrouded in Divine Might. After I step in, all my attributes will decrease by 50%, which will have a great impact on my next battle."

"I wonder if there is any way to resist Divine Might?"

Aunt Chen shook her head repeatedly, "Divine Might is left by the gods, how can we mortals resist Divine Might."

Lin Tianhao was not discouraged. He went to Doctor Liu again.

Doctor Liu's answer was similar to Aunt Chen's. They both refused outright, saying that there was no way to resist Divine Might.

Lin Tianhao didn't believe it. Therefore, the person who knows how to resist Divine Might is probably the old village chief, or someone else.

It's just that the way he opened it now is wrong, and he hasn't triggered this key figure.

At this time.

Zhou Xiaopang sent a message, saying that the nutrient cabin was ready.

Lin Tianhao smiled and went offline to replace the nutrient cabin.

The nutrient solution in this nutrient cabin can support up to half a month without eating or drinking.

[Note: You can refer to the hibernation cabin in The Wandering Earth, but it is not as awesome as the hibernation cabin, it can only last for half a month]

After logging in with the nutrient cabin, Lin Tianhao's confidence was even greater. He could stay online for half a month, and he didn't believe he couldn't conquer this dungeon.

Crossing the boundary of the stone tablet again, affected by Divine Might, and without the blessing of the Purification Jade Pendant, Lin Tianhao's various attributes plummeted.

Especially attack speed and movement speed, which directly decreased by 75%.

This is extremely abnormal no matter what stage it is placed in.

When the first Ice and Snow Great Snake appeared, Lin Tianhao did not attack with feather arrows first, but chose to use the Book of Life and Death.

"Sure enough."

Lin Tianhao showed a smug smile on his face.

Because it was similar to what he thought, monsters with the same name as Ice and Snow Great Snake could still be locked with the Book of Life and Death.

As long as he could see it, he could use the Book of Life and Death to lock it, so as to continuously lose health.

Here, Lin Tianhao's all attributes are halved, but even so, the damage per second reached over 23,000.

Because the fixed 10,000 damage is not affected by Divine Might.

Immediately afterwards, Lin Tianhao continued to output.

It's still the same old way, knock it into the air, and then continue to output.

Because of the extra health value stacked in the Ice and Snow Werewolf, Lin Tianhao's damage was even higher.

The damage of each normal attack can be maintained at around 40,000.

That's 120,000 per second, plus 23,000 from the Book of Life and Death, Lin Tianhao's damage value per second reached 143,000.

The damage output in one minute is as high as 8.58 million. In the knocked-up state, 30 million damage can be dealt in four minutes.

Even if you count the health regeneration in the domineering state, he can solve an Ice and Snow Great Snake in five minutes.

This output ability can be described as terrifying!

Compared to the previous 40 minutes to fight an Ice and Snow Great Snake, the time it takes now is directly shortened to one-eighth of the original!

Moreover.

The actual time is faster than Lin Tianhao estimated, because in just four and a half minutes, this Ice and Snow Great Snake is about to be killed.

But this made Lin Tianhao have crooked thoughts, and he was not in a hurry to kill the Ice and Snow Great Snake.

Let it land!

This is interesting.

After the Ice and Snow Great Snake landed, Lin Tianhao was still in full swing, stacking nine points of health per second, which is 540 points of health per minute.

Lin Tianhao doesn't know what will happen next.

But one thing is certain.

That is, the higher his health is stacked, the greater the help to him!

The second Ice and Snow Great Snake appeared...

Lin Tianhao couldn't help frowning.

The impact of the previous seven hours of high-intensity five-arrow volley on his mental strength was huge.

Now even a two-arrow volley feels a little overwhelming.

There's no way.

Lin Tianhao can only kill the first Ice and Snow Great Snake first, and then attack the second one.
