

O games 1411

Chapter 1411 Reviving the Kingdom of Mokesha!

After Lin Tianhao killed the Poison Emperor of Sand Sea, he immediately sent him to the List of Gods.

normal circumstances.

After the Poison Emperor of Sand Sea is killed and sent to the List of Gods, he should be restored to full condition.

But what disappointed Lin Tianhao was that the Poison Emperor of Sand Sea was still in a dormant state.

But Lin Tianhao was not too surprised.

Seeing that Lin Tianhao killed the Poison Emperor of Sand Sea and resurrected him, Da Mengshou and Du Jiao were both shocked.

Obviously.

This situation is a bit beyond their ability to think.

after all.

To resurrect a powerful person at the level of a great emperor, the difficulty level is extremely high.

Compared to their reactions.

At this moment, all the creatures in the entire Mokeradin Desert were in a panic !

The most important reason why they can live and work in peace and contentment in the Mokeradin Desert is that the Poison Emperor of the Sand Sea has absorbed most of the toxins in the Mokeradin Desert into his own body.

But now.

If someone kills the Poison Emperor of Sand Sea, does that mean that the toxins absorbed by the Poison Emperor of Sand Sea will erupt completely?

If so.

Then it won't take long at all, and the entire Mokeradin Desert will return to its original state of being shrouded in poisonous fog.

"The Mokeradin Desert is over. This damn Snow Emperor is simply a lunatic. Does he do things without considering the consequences?"

"We have lived in the Mokeradin Desert for such a long time, and we have always been safe and sound. The Snow Emperor came and made this place a mess. Now he wants to destroy us all. This is simply too much."

"Why are you still in the mood to complain here? Hurry up and run. If you don't run now, when the poison in the body of the Sand Sea Poison Emperor is completely released, it will be too late for you to run away."

.....

The indigenous people of the entire Mokeradin Desert were shocked by the notification sound of Lin Tianhao killing the Poison Emperor of the Sand Sea.

Because for them, Lin Tianhao's killing of the Poison Emperor of the Sand Sea was a devastating blow to them and the entire Mokeradin Desert.

At this moment.

A large number of indigenous people who originally belonged to the Mekolatin Desert began to flee frantically, as if they were afraid that if they fled too slowly, they would die in the Mekolatin Desert.

At this time, Lin Tianhao had no idea about the reactions of the indigenous people in the Mekolatin Desert.

At this time, he had already sent the Poison Emperor of Sand Sea to the List of Gods. The next thing he needed to do was to wake up the Poison Emperor of Sand Sea and complete the poisoning of the Mokesha Kingdom.

Burning Heart Nightmare raised his hand and placed it on the brow of Sand Sea Poison Emperor, quickly.

The fingers of the Poison Emperor of Sand Sea began to move, and his brows couldn't help but frown.

Lin Tianhao raised his eyebrows. This was not surprising.

It is entirely possible for a dream master at the level of the Great Emperor to awaken the Poison Emperor of the Sand Sea.

as predicted.

After a while.

The Poison Emperor of Sand Sea has awakened!!

Seeing the Poison Emperor of Sand Sea awaken, the poisonous dragon and the Poison Emperor's guards all showed excitement on their faces.

"Lord Poison Emperor, you have finally awakened."

The Poison Emperor's Guardian threw himself into the arms of the Poison Emperor of the Sand Sea like a child.

The Poison Emperor of Sand Sea glanced at the Poison Emperor Guardian and sighed heavily.

"You shouldn't have woken me up. I'm actually fine like this."

The words fell.

The Poison Emperor of Sand Sea looked at Lin Tianhao, took a step forward, and bowed to Lin Tianhao.

"Thank you, sir."

Lin Tianhao nodded gently and said, "No need to be polite. I will revive you mainly because I need you to refine the toxins in your body, or I can transfer them out."

Hear this.

The Poison Emperor of Sand Sea instantly understood Lin Tianhao's thoughts.

"You want to revive the Kingdom of Mokosha?!"

Lin Tianhao nodded slightly, but the Poison Emperor of Sand Sea frowned, looking a little reluctant.

"Just tell me what you want to say." Lin Tianhao said.

The Poison Emperor of Sand Sea said bluntly:

"Sir, if the Mokesha Kingdom revives, the entire vast continent will inevitably change."

Lin Tianhao frowned slightly, "Why?"

"Because if the country of Mokosha recovers, those behemoths in Mokosha will definitely launch attacks on other countries around it."

"When a national war breaks out, countless lives will be lost."

Lin Tianhao spread his hands and said:

"I have revived the Shanhai Empire and have taken full control of it."

"Now that I have revived the Kingdom of Mokosha, with your help, it will not be difficult for me to completely control the Kingdom of Mokosha."

That's it.

Lin Tianhao's eyes were firm.

"Besides, I have reasons why I have to control the Kingdom of Mokosha."

The Poison Emperor of the Sand Sea glanced at the Burning Heart Nightmare and said, "With me, two powerful men at the level of the Great Emperor, it is indeed very likely that we can control the entire Mokesha Kingdom."

"It is good!!"

"Since it is your Excellency's wish, I will do as you say."

The words fell.

The Poison Emperor of Sand Sea began to refine the toxins in his body.

He spat out a poisonous pill from his mouth! !

"This is the core issue that is hindering the recovery of the Mokesha Nation. Now that I have refined it, the Mokesha Nation will be able to recover."

As the voice of the Sand Sea Poison Emperor fell, the toxin in this poison channel was refined and absorbed by him.

One hour later!!

This poison pill was finally completely refined by the Poison Emperor of Sand Sea.

After the Poison Emperor of Sand Sea refined the poison pill, a beam of light fell from the sky and enveloped Lin Tianhao.

at the same time.

Above the Mokoradin Desert, the wind was rising and the clouds were surging. Poisonous dragons broke through the void and flew towards the direction where Lin Tianhao was at a high speed.

Lin Tianhao seemed to sense something, and opened his eyes of insight, looking up at the sky.

These poisonous dragons have no physical form; they are all illusions.

These illusory poisonous dragons rushed into Lin Tianhao's body frantically, and a strange mark appeared between Lin Tianhao's eyebrows.

Followed by.

A system prompt sounded in Lin Tianhao's mind.

"Ding, congratulations, you have successfully revived the Mokosha Nation. We will soon announce it to all servers. Do you want to hide your name?"

"no."

"Announcement to all servers, congratulations to the player Xue Di for successfully reviving the Moko Sand Country. The Moko Sand Sea will replace all the land of the original Moko Latin Desert, as well as certain surrounding sea areas. This announcement is hereby made, and all adventurers are requested to prepare!!"

.....

This server-wide announcement sounded one after another, instantly causing the entire Ragnarok to explode.

"What the hell, what the hell, is this the Snow Emperor? After reviving the Shanhai Empire, the Snow Emperor revived another empire, the Mokesha Empire!!"

"The Mokoladin Desert, the Mokosha Kingdom. After the Shanhai Empire was revived, I got a lot of good things. My intuition tells me that I will also get a lot of good things when the Mokosha Kingdom is revived this time."

"You can just scare me here. I'm almost at the border of the Mokolatin Desert. No one is allowed to snatch it from me. I want to be the first one to eat it!!"

.....

In the Mekoradin Desert.

Large oases sprang up from the ground, and a large number of cities emerged from the sand, revealing their majestic city walls!

Chapter 1412: Health value 9.2 trillion!

Buildings rose from the ground one after another, and the indigenous people of the Mekoradin Desert, who had fled after hearing that Lin Tianhao had killed the Poison Emperor of the Sand Sea, were dumbfounded.

Good news: The Mekolatin Desert has not been destroyed.

Bad news: It seems that they can't go back, because the Kingdom of Mekosha has revived and the real indigenous people of the Mekoladin Desert have returned.

At this moment.

A new server-wide announcement is here again.

"Announcement to all servers: Due to the revival of the Mokosha Nation, all adventurers will be rewarded with +1000 free attribute points, +1 silver-level main weapon for this profession, and +1 skill book for this profession. We hereby announce this, and hope that all adventurers will continue to work hard!!"

.....

After hearing this server-wide announcement, the adventurers from Western countries were all unhappy.

"Ah, are you kidding me? When we revived the Shanhai Empire, why was it that only the Dragon Kingdom received the reward? Now that we are reviving the Mokesha Kingdom, all countries are getting rewards. This is obviously unfair to us Western adventurers."

"That's right, this is too much!! This is a blatant targeting. This time when we revive the Mokosha Kingdom, we Western adventurers should be the only ones who will receive the rewards."

"Do you have some shame? This country of Mokesha was revived by the Snow Emperor. Logically, this country of Mokesha still belongs to us. You are able to benefit from it, and you still have the nerve to talk nonsense here."

"That's right, you are a bunch of idiots. I really don't know what's in your heads. Didn't you see that it was our Dragon Country's Snow Emperor who revived the Mokosha Country? What does this have to do with you?"

.....

On the Ragnarok forum, discussions were raging, and all adventurers were the beneficiaries because Lin Tianhao had revived the Mokosha Kingdom.

But those Western adventurers felt that this was unfair because they did not make any profit last time.

Lin Tianhao didn't care about that. He was still receiving prompts.

"Ding, you have been baptized by the Dragon of Ten Thousand Poisons, and your poison resistance has reached 99.99 percent."

Lin Tianhao's eyes narrowed slightly. This didn't seem to be of much help to him.

After all, his poison resistance is already very high, reaching 99.99 percent, so the increase is not that big.

However, this level of poison resistance is already very close to immunity to toxin attacks.

"Ding, congratulations, you have revived the Mokosha Nation. Rewards: All attributes +100%, free attribute points +100000, Mokosha Nation reputation +1 million."

Lin Tianhao's pupils suddenly shrank. It took off! !

All attributes are doubled, which is better than any other rewards for Lin Tianhao.

Originally, Lin Tianhao's health value was only 4.6 trillion, but now with this blessing, Lin Tianhao's health value directly reached 9.2 trillion! !

In addition to health points, Lin Tianhao's other attributes have also been greatly improved.

suddenly.

Lin Tianhao looked at his special attributes.

Because his special attributes such as bloodsucking and toughness have doubled, does that mean...his luck attribute can also be doubled! !

If this is true, then he is being a bit unbelievable.

With the health value exceeding 9.2 trillion, Lin Tianhao's blood recovery and other functions can be greatly improved.

If Lin Tianhao faced the monster in the blood mist again at this moment, it would be a hundred times more difficult for the monster in the blood mist to kill Lin Tianhao.

After all, Lin Tianhao's health points have increased, and his blood recovery can also be greatly improved.

Besides.

Lin Tianhao's other attributes are also growing rapidly.

After simply organizing his thoughts, Lin Tianhao prepared to take action against the Mokesha Kingdom.

Also.

He also needs to find Shangguan Taoyun to submit the task.

In order to revive the Mokesha Kingdom, Shangguan Taoyun promised him a lot of good things.

"How much do you know about the Kingdom of Mokesha?" Lin Tianhao asked.

The Sand Sea Poison Emperor hesitated for a moment and said:

"I have only heard of the country before the Mokolatin Desert was eroded by the mysterious poisonous bead. This country of Mokosha doesn't seem to have anything special about it."

"If there is one, it is that the Mokosha Nation is an extremely advanced mechanical civilization. Their best method is control, with machinery as the core. In addition, there are also beast controllers, that is, summoners."

"However, their summoners rarely focus on summoning. Most of them focus on taming beasts. Therefore, summoners in the Mokosha Kingdom are also called beast tamers."

"In addition, there are some professions such as controlling puppets. Their main focus is to control other things to fight."

After listening to the words of the Poison Emperor of Sand Sea, Lin Tianhao had some understanding in his mind.

He thought for a moment before continuing:

"What about you? Do you know who is in control of the Mokesha Kingdom?" Lin Tianhao asked.

The Poison Emperor of Sand Sea thought for a moment and said:

"The actual controller of the Mokesha Kingdom is not a national government like the Shanhai Empire, but a super chamber of commerce called the Future Chamber of Commerce."

"This Chamber of Commerce controls more than 70% of the wealth of the Mokosha Nation. The food, clothing, housing, transportation, and work of all the people in the Mokosha Nation are all affected by the Future Chamber of Commerce."

Lin Tianhao was slightly surprised. "In other words, as long as we control this Future Chamber of Commerce, we can control the Mokesha Kingdom?"

The Poison Emperor of Sand Sea nodded, "That's about what I mean."

Now that we have a direction, there is nothing more to say, just take action.

Think about this.

Lin Tianhao took the Sand Sea Poison Emperor away from the Sand Sea Poison City.

Returning to the Mekoradin Desert, the scene before him made Lin Tianhao feel a little dreamy.

A series of sci-fi passages appeared in Lin Tianhao's sight, and in the air, there were various aircraft flying around.

"this--"

This painting style is completely different from that of the Shanhai Empire.

It's not that there are no mechanics in the Shanhai Empire. In fact, there are quite a few mechanics in the Shanhai Empire.

But it can never reach this level.

Lin Tianhao opened his Eye of Insight, which soon covered an area of 100,000 kilometers in radius.

Although he did not use his Eye of Insight to its full potential, everything around him and the scenes he saw really made Lin Tianhao feel as if he had come to a future world with highly developed technology.

Just now.

A pentagonal silver-white aircraft appeared in front of Lin Tianhao and his companions.

The aircraft slowly opened, and a robot dressed in a mecha appeared.

That's right.

Not a real person, just a robot.

The robot jumped down and landed in front of Lin Tianhao and his companions.

He bowed to Lin Tianhao and the others with great respect.

Followed by.

An electronic synthesizer sounded.

"Dear guests, your strength makes me feel the unknown and fear. Please register your information and we will record it on the future network to facilitate your actions in the country of Mokesha."

Lin Tianhao raised his eyebrows slightly, this meant they were scanned by the radar.

But because the Poison Emperor of Sand Sea and the Burning Heart Nightmare were too powerful, he was targeted.

Chapter 1413 Future Chamber of Commerce!

Lin Tianhao directly revealed his game nickname.

After seeing Lin Tianhao's game nickname, the robot immediately bowed to Lin Tianhao.

"Greetings, Lord Xuedi. Thank you for your efforts, which have enabled our Mokesha Kingdom to recover."

Lin Tianhao waved his hand and said:

"I want to meet the future president of your Chamber of Commerce. Is that possible?"

The robot thought for a moment and said, "Sorry, I don't have the authority to arrange a meeting between you and our great president."

"but....."

"You are our distinguished guest of the Mokesha Kingdom. I can report your request. Please wait a moment."

Lin Tianhao was not in a hurry. It would be best if he could meet the future president of the Chamber of Commerce in the simplest way.

If that doesn't work, then we'll have to resort to some unconventional means.

Just now.

The robot seemed to have received some message and flew up immediately.

"I'm very sorry, our Future Chamber of Commerce headquarters has been invaded by an unknown strongman, and I need to rush back to help."

Lin Tianhao was a little surprised. The country of Mokesha had just recovered, and its headquarters was invaded.

who is it?

Those guys in the Alate Galaxy?

Lin Tianhao felt that this possibility was still very high.

After all, those guys in the Alate Galaxy knew that it would be difficult to confront him head-on, so they tried to win over forces in secret.

The Kingdom of Mokosha is obviously a superpower that is very worth winning over.

Now that the Mekosha Kingdom has revived, it is not surprising that those guys from the Alete Galaxy come and try to win over the Mekosha Kingdom.

"I'll go with you." Lin Tianhao said.

The robot nodded slightly and took Lin Tianhao into the aircraft.

When observing the aircraft from the outside, Lin Tianhao didn't feel anything. But after entering the aircraft, Lin Tianhao couldn't help but sigh at the level of technological development of the Mokosha country.

Lin Tianhao himself possesses the super god-level hidden profession of mechanic, the world-destroying mechanic, so he sees more things.

"Perhaps we can ask Kui Wei Changtian to come to the country of Mokesha. Perhaps he can gain something here."

Kui Wei Changtian also possesses a super god-level hidden profession, the World-Destroying Mechanic.

But Lin Tianhao's feeling is that the mechanical items made by Kui Wei Changtian are not comprehensive.

And sitting in this aircraft, observing the other mechanical objects here.

Lin Tianhao could clearly feel that the mechanical items here were more comprehensive.

Even a small mechanical item inside the aircraft seemed to have been improved dozens or hundreds of times and had reached an extremely high level.

This is what Kuiwei Changtian does not possess.

It's not that the mechanical items made by Kui Wei Changtian are not good, but the mechanical items made by Kui Wei Changtian always give Lin Tianhao a very rough sense of déjà vu.

Lin Tianhao always felt that it still had some flaws and was not perfect.

This may be the difference between a person and a country.

As the saying goes, the authorities are confused, but those who watch are clear.

The things that Kui Wei Changtian made himself only reflect his own subjective consciousness and lack the improvement and opinions of more people, so it is difficult to perfect them.

Look.

The revival of the Mokesha Kingdom may be an opportunity for Lin Tianhao.

His super god-level hidden profession, the World-Destroying Mechanic, which he had not developed much, might be able to be put on track.

The speed of this aircraft is very fast. If it is on certain specific orbits in the Kingdom of Mokesha, the speed of this aircraft can be increased exponentially.

Not only that.

When the aircraft reaches a specific location, it can actually perform a space jump.

This is a bit awesome.

Space jumping is already a means similar to teleportation array.

But currently.

The teleportation array of the Shanhai Empire is not mature yet, but judging from the current situation, the space jumping technology has become relatively mature.

The only problem is that the distance of each space jump is not too far.

but.

This is already strong.

In less than a quarter of an hour, Lin Tianhao followed the robot to the headquarters of the Future Chamber of Commerce.

This place is also full of a sense of technology. A tall building reaches into the sky. When Lin Tianhao stands in front of this tall building, he feels like an ant.

at this time.

In front of the Future Chamber of Commerce, a hunchbacked old man stood in the air with deep eyes. Just one person, he was like an army of thousands!

Standing in front of this hunchbacked old man is a burly robot.

"Have you had enough of this? I am a strong man who has reached the level of a half-step emperor after all. You want to get rid of me just by letting a robot do it? Aren't you looking down on me too much?"

The sturdy robot looked at the old man in front of him indifferently, "We cannot agree to your request. Please leave, or stay forever."

Hear this.

A cold light flashed in the eyes of the hunchbacked old man, and he said coldly:

"In that case, let me see how you can make me stay forever."

The words fell.

A huge human-shaped shadow appeared behind the hunchbacked old man.

This human-shaped shadow seemed to be himself magnified countless times.

at this time.

The huge human-shaped shadow raised its hand and slapped the towering building in front of it.

just.

He had just raised his hand when a laser cannon reached his palm.

The next moment.

The energy palm was pierced by the laser cannon, leaving a hole.

The hunchbacked old man was a little surprised, but his movements did not slow down at all, and his energy palms closed instantly.

But at the moment when his energy palms closed, a robot holding a long knife instantly chopped down.

The long sword in his hand was made of unknown material. When it came into contact with the energy shadow behind the hunchbacked old man, the energy shadow actually began to disintegrate.

"what?!"

See this scene.

The hunchbacked old man showed a look of surprise on his face.

Obviously.

He never expected that such a sudden change would happen.

Lin Tianhao narrowed his eyes and looked at the long sword in the robot's hand. The problem was with his long sword.

Lin Tianhao saw the problem at a glance.

Because he discovered that the long sword in the robot's hand was special and could dissolve other energy bodies.

"Interesting, has the mechanical equipment been developed to this point?" Lin Tianhao was a little surprised.

Not to mention this hunchbacked old man.

But he was a strong man at the level of Half-Emperor after all, so after just a slight hesitation, he took action.

A field of fire unfolded and swept towards the tall building in front.

But right now.

Robots holding special alloy shields appeared one by one, the shields flashing and blocking the advance of the flames.

This shield has the same function as the sword in the robot's hand just now, and can dissolve energy.

After the flames came into contact with these shields, they began to dissolve rapidly and were unable to cross the shield line.

Chapter 1414 Mo Ke Nan Tian!

"Humph, you do have some abilities."

This hunchbacked old man obviously also discovered the special features of the shields in the hands of these robots.

As he raised his hand, a flaming spear appeared and instantly hit the shield in front of him.

The moment the flaming spear hit, a scene appeared that amazed Lin Tianhao.

That is, starting from the bottom of this tall building, stars light up and spread upwards.

As for the robot that was bearing the spear attack, neither he nor the shield in his hand changed at all.

"This is... Damage Transfer!!"

Lin Tianhao was even more surprised.

Obviously.

He also didn't expect that this future Chamber of Commerce had developed to this extent.

"It is a method similar to space jumping. It divides the damage suffered by the first target into countless parts and then distributes them to different shields."

Burning Heart Nightmare was also a little surprised. It was already quite good that he could see so much.

But Lin Tianhao shook his head and said:

"You're not entirely right. They are not only dispersing the damage they endure, but they are also able to convert the damage they endure into energy for their own use!!"

"and."

"If my observations are correct, the conversion rate they can achieve is already over 30%!!"

Lin Tianhao was really surprised. The attack from the hunchbacked old man just now was not only resolved by the robots of the Future Chamber of Commerce.

more importantly.

Thirty percent of the power of this attack was converted into some kind of energy, becoming a boost to this future Chamber of Commerce.

Incredible! !

Lin Tianhao had fought with Kui Wei Changtian before. Apart from anything else, just looking at this skill, Kui Wei Changtian does not have it.

It doesn't mean that Kui Wei Changtian, as a super god-level hidden profession world-destroying mechanic, cannot produce weapons of this level.

It is limited by the production drawings and imagination!!

something.

You need at least some imagination to make it.

otherwise.

How can you make something that you haven't even thought of?

If this hunchbacked old man didn't have other more powerful means, he would most likely have been defeated today.

"Disperse and bear my attack!!"

This hunchbacked old man also saw the problem at a glance.

He was not discouraged, but his aura continued to rise under such circumstances.

A flaming spear appeared again in the hands of the hunchbacked old man.

This time.

This hunchbacked old man was not attacking from a distance, but was preparing to do it himself.

A large amount of flames in his fire field rushed madly into the spear in his hand, and the power of the spear in his hand became stronger and stronger.

On top of this tall building, a red laser instantly locked onto the hunchbacked old man.

Obviously.

This hunchbacked old man wanted to charge up for a big move, but these guys from the Future Chamber of Commerce did not agree.

The hunchbacked old man's expression changed and his body disappeared instantly.

Obviously.

He also realized that it would be difficult to win today, so he simply gave up fighting.

"Run away now?"

The Sand Sea Poison Emperor shook his head. "This is really lame. After all, he is a strong man at the level of a half-step emperor. He should at least hold on for a while longer."

Lin Tianhao smiled slightly and said:

"It's normal."

"Knowing that you can't gain any advantage here, continuing to fight here is just a waste of time."

Lin Tianhao stepped out and said loudly:

"I am Xuedi, and I would like to see the future president of the Chamber of Commerce."

As soon as Lin Tianhao finished speaking, a beam of light descended from the sky.

Followed by.

Lin Tianhao saw a middle-aged man in blue clothes walking towards him.

He bowed respectfully to Lin Tianhao and said:

"Mr. Xuedi, thank you very much for reviving the Mokosha Kingdom. We welcome your arrival very much."

That's it.

The middle-aged man in blue clothes said:

"My name is Mo Ke Nantian, one of the four future presidents of the Chamber of Commerce."

"One of the four presidents?"

Lin Tianhao was a little surprised, "Your Chamber of Commerce will have four presidents in the future?"

Generally, organizations like chambers of commerce have one president and multiple vice presidents.

But I didn't expect that this future Chamber of Commerce would have four presidents. Wouldn't there be any disputes over decision-making?

"Yes, Mr. Xuedi."

Mo Kenantian said to Lin Tianhao very humbly:

"Our future Chamber of Commerce will be composed of three major families and a special department. We will each have a president. We will run our own business at ordinary times, and we will hold meetings together to resolve major issues."

Lin Tianhao understood. Mo Kenantian glanced at the Sand Sea Poison Emperor and asked softly:

"I guess this is the Poison Emperor, right?"

That's it.

Mo Kenantian smiled and looked at Burning Heart Nightmare again, saying:

"I wonder what this gentleman's name is?"

Burning Nightmare shook his head and said:

"My name is Fenxin, I am just a follower of your master. You can talk to my master, don't bother with me."

Hear this.

Mo Kenantian was a little surprised, but he quickly suppressed the surprise in his eyes.

"Mr. Xue Di is truly extraordinary. Please come in."

Under the guidance of Mo Kenantian, Lin Tianhao entered a room full of science fiction.

Immediately, a robot brought pastries for the tea party.

"Your technological level is quite high." Lin Tianhao couldn't help but sigh.

Although both are countries in the vast continent, the development level of Kemokesha seems to be higher than that of the Shanhai Empire.

At least.

If it weren't for him, the Shanhai Empire would not be able to fight against the strong man who was at the level of Half-Step Emperor.

"Mr. Xue Di, if you have anything to say when you come to see us, just tell us." Mo Kenantian said straight to the point.

Lin Tianhao hesitated for a moment and said:

"I want your country of Mokesha to join our Fan Palace."

Hear this.

Mo Kenantian's face darkened instantly.

"Mr. Xue Di, although our Mo Ke Sha country has just recovered, your request is still a little excessive."

"Our country of Mokosha is an independent country with its own ideas and rules. We do not need to rely on any other forces."

Lin Tianhao raised his eyebrows and said:

"I just want a title. I won't interfere with your development. In fact, I will go to the God's Realm in a short time, so I won't be able to affect your development."

Mo Kenantian still shook his head and said:

"Really sorry."

"Mr. Xue Di, even though you are the one who revived us, this is not a reason for us to join you."

That's it.

Mo Kenantian thought for a moment and continued:

"However, Mr. Xue Di helped us to revive the Mo Ke Sha Nation. We in the Mo Ke Sha Nation will never forget this great favor. If Mr. Xue Di wants anything else, you can just ask for it."

Hear this.

Lin Tianhao knew that the other party had misunderstood.

It seems that Mo Kenantian thinks that what he just said about letting them belong to the Fan Palace is just raising the price and wants them to give more things.

Chapter 1415 The mission of the Sky Punishment Helmet!

Lin Tianhao shook his head and said:

"Nothing can help me more directly than your joining us in the Mortal Palace."

"You may have misunderstood. I invited you to join the Fan Palace not because I wanted to raise the price and ask for more compensation. I really thought so."

Hearing Lin Tianhao's words, Mo Kenantian still shook his head without hesitation.

"Mr. Xue Di, please understand that we really cannot agree to this."

"We are grateful to you and are willing to pay you. Mr. Xue Di might as well think about what else you want."

Lin Tianhao looked at Mo Kenantian meaningfully. He came with two powerful men at the level of great emperors, but Mo Kenantian was still so calm.

Just as if.

He wasn't worried at all that he would bring the Sand Sea Poison Emperor and the Burning Heart Nightmare to attack him.

Lin Tianhao thought for a moment and said:

"Okay, I respect your choice. Do you have any heavenly punishment equipment?" Lin Tianhao asked.

As a forgotten country, the Kingdom of Mokesha might have the Heavenly Punishment Equipment in their hands.

and.

This future Chamber of Commerce is somewhat different from the Fan Palace.

On the surface, Fan Dian is the actual controller of the Shanhai Empire.

However, in the Shanhai Empire, there are many other powerful holy places, and the Fan Palace does not have much control over them.

However, 70% of the wealth of the Mokosha Kingdom is in the Future Chamber of Commerce, which means that the Future Chamber of Commerce's control over the Mokosha Kingdom is far beyond imagination.

If it is said that the Mokesha country has the Heavenly Punishment Equipment, then the people in the Future Chamber of Commerce will definitely know about it.

"Have."

as predicted.

Mo Kenantian directly gave Lin Tianhao a very affirmative answer.

Lin Tianhao smiled, "How many?"

Although Lin Tianhao also knew that what he said was a little greedy.

But he felt that the Mokesha Kingdom might have more than one piece of heavenly punishment equipment.

"Two pieces."

really! !

This is really an unexpected surprise.

If I can get these two pieces of Heavenly Punishment equipment, then everything will be easy.

"Mr. Xue Di, although you have revived our Mokesha country, there are some rules that cannot be broken. I hope you can understand this."

Lin Tianhao narrowed his eyes slightly. Just by hearing these words, he understood that he was required to complete a mission.

"After all, I revived your Mokesha Kingdom, so I can't give anything away for free?" Lin Tianhao said.

Mo Kenantian shook his head and said helplessly:

"It's indeed not possible. Mr. Xue Di should know the special nature of the Heavenly Punishment Equipment. This thing is not allowed to be given away for free."

"but....."

Mo Kenantian paused for a moment before continuing:

"If Mr. Xue Di doesn't want anything else, I can give Mr. Xue Di 500,000 free attribute points."

"This is the limit of my authority now."

Lin Tianhao narrowed his eyes slightly. Five hundred thousand free attribute points, this is very tempting.

And it was a gift, he didn't need to complete any tasks.

This was already more than Lin Tianhao had expected.

"As for the two pieces of Heavenly Punishment equipment, I can also assign tasks to Mr. Xue Di. As long as Mr. Xue Di completes them, the Heavenly Punishment equipment will also be yours."

Lin Tianhao thought for a moment. With 500,000 free attribute points and his current attributes, if he had another 500,000 free attribute points, his Sky Punishment attack speed would be slightly improved.

But in comparison, this improvement is not that big.

"Son, don't let your father down."

Lin Tianhao had an idea in his mind and said:

"Can I give 500,000 free attribute points to my friend?"

Hear this.

Mo Kenantian was a little surprised, this was 500,000 free attribute points.

As the saying goes, if a man does not work for himself, he will be punished by heaven and earth! !

Nowadays, there are still people willing to give away 500,000 free attribute points!

"Okay." Mo Kenantian nodded with a smile.

Lin Tianhao sent a message directly to the monkey.

"Where are you? Send me the coordinates."

Lin Tianhao has the Kunlun Mirror. Instead of letting the monkey come over, it would be better for him to go and pick up the monkey.

The monkey did not reply to Lin Tianhao's message immediately, probably because he was fighting monsters.

Lin Tianhao was not in a hurry, but said:

"Can I take a look at the mission you mentioned for the Heavenly Punishment Equipment?"

The Heavenly Punishment equipment is too special.

Although Lin Tianhao is very strong now, he may not be able to complete it, and he is not too sure.

"Ding, Mo Kenantian has issued you the task [Lost Blueprints of the Frozen City]."

[Lost Blueprints of the Frozen City]

"Mission introduction: The founder of the ancient country of Moko is a super mechanic from outer space. He is mysterious and powerful. He used technology to create the ancient country of Moko. However, the development of the ancient country of Moko threatened the tribes of gods. Therefore, the ancient country of Moko was targeted by the gods and permanently frozen deep underground, including a large number of advanced technology drawings..."

"Mission requirements: Enter the sealed ancient country of Moko, find the sealed blueprints, and bring them out. There is no time limit."

"Mission penalty: None."

"Mission Reward: Sky Punishment Helmet +1, Free Attribute Points +100000, Talent Evolution Flower +1."

"Ding, do you accept it?"

This task has no penalty and no time limit. Let's see what happens next.

"Where is the ancient country of Mo Ke?" Lin Tianhao was still cautious and asked first.

"right here."

Mo Ke Nantian said calmly, "Those gods used the technology of our ancestors to compress the ancient country of Mo Ke from three dimensions to two dimensions and froze it."

"What?!"

Lin Tianhao almost thought he had heard it wrong.

Compression from 3D to 2D?!

Has the level of technology reached this point?

And this is not about compressing a person from three dimensions to two dimensions, but about a country!!

Mo Kenantian smiled bitterly and nodded, saying:

"The methods of our ancestors are indeed incredible. The fact that our country of Mokesha can have such a high level of technology is all thanks to our ancestors."

"But that time, too many of our ancestors' overall technological drawings were abandoned there."

Lin Tianhao nodded gently and said, "Okay, I will do my best."

The words fell.

Lin Tianhao found that someone had sent him a message.

Originally, Lin Tianhao thought that it was the monkey that sent the coordinates, but when he took a closer look, it turned out not to be the case.

The person who sent the message was the dream-chasing young man Wang, who is also the representative figure of the American Shangzi School, Niu Si Langtian.

The content sent by Niu Si Lang Tian was also very simple. First, he congratulated Lin Tianhao on reviving the Mokesha Kingdom. Secondly, he traded the scroll of the pre-quest of the Gods and Demons Blessing to Lin Tianhao.

just now.

He noticed that Lin Tianhao had not made any moves in the past two months, so he thought that it was because the scroll of the pre-quest for the blessing of gods and demons was not given to Lin Tianhao.

After getting the scroll for the pre-quest "Blessing of Gods and Demons", Lin Tianhao immediately checked the tasks on it.

The pre-quest scroll for the blessing of gods and demons: unknown.

Introduction: After completing the above tasks, you will receive a blessing from gods and demons. This is a once-in-a-lifetime opportunity, so don't miss it.

Chapter 1416: Gods and demons bless, time goes back!

"Mission requirements: Successfully transfer to a super god-level hidden profession, no time limit required."

"Mission reward: Blessings from gods and demons."

"Mission penalty: None."

"Ding, do you accept it?"

Lin Tianhao narrowed his eyes slightly. Isn't this scroll of the pre-mission for the blessing of gods and demons given for free?

"accept!!"

He already possesses a super-god-level hidden profession, and with the scroll of the pre-quest for the blessing of gods and demons, he only needs to accept the quest to complete it.

"Ding, congratulations, you have completed the pre-task of the blessing of gods and demons, and you are about to receive the blessing of gods and demons..."

"Ding, the God of Time is blessing you..."

A beam of light descended from the sky and enveloped Lin Tianhao.

"This....."

Seeing this scene, a look of surprise flashed in Mo Kenantian's eyes.

"This is....."

He felt something and murmured to himself: "It doesn't seem like a blessing from the gods..."

Followed by.

Mo Kenantian seemed to have discovered something. His pupils dilated and his face was full of disbelief.

"This is... a blessing from the gods and demons!!"

The blessing of gods and demons, these few words alone can explain so much.

Looking at the entire Ragnarok, how many gods and demons are there?

It is truly amazing that the person before him could actually receive the blessing of gods and demons.

"Ding, congratulations, you have acquired the skill: Time Reversal."

Just hearing the name of this skill, Lin Tianhao's face showed astonishment.

Time goes back!!

This is definitely not wrong, time can also flow backwards!!

Time Reversal: Unknown.

Effect: You release it actively, and time will flow back to a certain time in a certain range. The time and distance will be constant according to the energy you output. (Note: This skill consumes the maximum health value, please use it with caution.)

Cooling: None.

Cost: Starting from 100 million health points.

Proficiency: Cannot be upgraded.

Lin Tianhao's eyes narrowed slightly. This skill didn't seem as powerful as he had imagined.

Instead.

This certain range and certain time are a bit ambiguous.

Lin Tianhao tried it briefly. With him as the center, within a radius of ten meters, time flowed back to three seconds ago.

Lin Tianhao did not use it, because only after he selected it could he see the consumption of this skill.

A ten-meter radius would only return to three seconds ago, consuming one million health points! !

This is the minimum one million health points. This means that with this distance and time, he doesn't need more health points.

Ten meters, five seconds?

In just two more seconds, the life points that Lin Tianhao needed to consume increased from one million to three million.

This consumes the maximum health value!!

but.

In general.

The energy consumption of this skill was not as great as Lin Tianhao had imagined.

If he is fighting in a team, can he use this skill to revive his teammates all the time?

As long as his teammates were killed, he was fast enough to rush over within three seconds, then go back three seconds, make changes, and save the teammates who should have been killed.

This would only consume one million health points each time, and Lin Tianhao could do this a hundred times with his 100 million health points.

especially.

The time rewind skill has no cooldown, which is the real power of this skill.

correct! !

If that's the case, then can he continually use time to go back three seconds in the same area?

In this way, to go back to six seconds ago, he only needs to consume two million health points. According to his test just now, if he uses it directly, even if he just goes back to five seconds ago, he will need three million health points.

If that's the case, then he's making a lot of money, isn't he?

of course.

It is also possible that some unknown situations may arise due to such use.

but.

Lin Tianhao doesn't think so.

Because Ragnarok itself has some mechanism bugs similar to this, as long as you find them yourself, you can take advantage of them.

"Congratulations, Mr. Xue Di."

Mo Kenantian bowed to Lin Tianhao and asked, "Mr. Xue Di, did you just receive the blessing of the gods and demons?"

Although he had just guessed it, he still wanted to confirm it.

"Ah."

Lin Tianhao nodded slightly. At this time, the monkey also replied to Lin Tianhao's message and sent him the coordinates.

"wait for me."

Lin Tianhao replied, and then said to Mo Kenantian:

"Wait a moment, I'll go get my friend."

The words fell.

Lin Tianhao summoned the Kunlun Mirror and disappeared in front of Mo Kenantian.

Not long after.

Lin Tianhao took the monkey.

"Right on to him. Give him all the free attribute points." Lin Tianhao said.

Given the monkey's talent, if he could obtain these 500,000 free attribute points, his strength would definitely be greatly improved.

"it is good."

Mo Kenantian did not hesitate and directly gave all the 500,000 free attribute points that he had promised to give to Lin Tianhao to Monkey.

After receiving so many free attribute points, the monkey showed excitement on his face.

"My foster father is here, please accept my child's respect!!"

The monkey bowed 180 degrees to Lin Tianhao to express his gratitude.

Lin Tianhao smiled slightly and said:

"My son, little monkey, you must work hard. Your father has high hopes for you."

"I will definitely live up to my foster father's high expectations!!"

The monkey bowed in gratitude.

Lin Tianhao used the Kunlun Mirror to send the monkey back.

Finish these.

Lin Tianhao found Mo Ke Nantian again.

"Now, take me to see the ancient country of Moko."

A three-dimensional ancient country was suppressed into two dimensions. Lin Tianhao still wanted to see how this was done.

Mo Kenantian took Lin Tianhao into the elevator, and in just 1.5 seconds, the elevator opened again.

Lin Tianhao could feel that the elevator had just made a space jump.

This kind of technological advancement is pretty good.

Just don't know.

Among the technological drawings that Mo Kenantian is looking for, is there anything that is particularly important to him?

He is a world-destroying mechanic. If he can get some particularly precious technological drawings, it will be of great benefit to him.

Because most of the technological drawings can be reproduced.

He gave one copy to Mo Kenantian, and he could also make a copy for himself.

Under the guidance of Mo Kenantian, Lin Tianhao went through layer after layer of inspection and finally arrived at a room.

The room was very empty, with only a painting that had been frozen into an ice sculpture.

"That's it?"

Lin Tianhao walked towards the painting that was frozen into an ice sculpture.

This painting was not as huge as Lin Tianhao had imagined, it was just a city.

"The ancient city of Moko was once the core area of the ancient country of Moko. We spent a huge price to snatch this painting from the gods."

"The world in the painting?" Lin Tianhao was a little surprised.

This didn't seem to be anything special, just like him putting a city into a map of mountains and seas, it wasn't a particularly difficult thing.

Chapter 1417: Health value 30 trillion!

however.

Mo Kenantian shook his head at Lin Tianhao and said helplessly:

"Xuedi, if it were that simple, it would be great."

"The entire city has now become two-dimensional. What you see is the ancient city of Moko. There is no so-called world in the painting."

Hear this.

Lin Tianhao widened his eyes and said:

"This....."

"Then how do we get those technological drawings from this picture?"

Mo Kenantian looked at Lin Tianhao meaningfully and said:

"There is a way. That is for you, Xue Di, to also transform into two dimensions and then enter this two-dimensional world."

"No."

Before Lin Tianhao could say anything, the Poison Emperor of Sand Sea rejected it.

"If my master is two-dimensional, his life and death will be at your disposal."

"and."

"If my master becomes two-dimensional and you don't help him recover, what will happen to him in the future?"

Lin Tianhao narrowed his eyes slightly. What the Poison Emperor of Sand Sea said made sense.

After all, he has a point.

If he accepts two-dimensionalization, various changes will occur, and no one can tell for sure.

"The most important thing is, I doubt you have ever thought about restoring the ability of two-dimensional objects to three-dimensional ones."

"Otherwise, you can just restore the ancient city of Moko to three dimensions without us having to do anything."

This looks dangerous no matter how you look at it.

Lin Tianhao spread his hands and said:

"Mo Kenantian, you heard it too. There is no way I will accept two-dimensionalization. It is unfair to me. The risk I need to take is too great."

Mo Kenantian smiled bitterly and said:

"Mr. Xue Di, we can still transform a person into two dimensions and then restore him, but this is a city. Our technology is not up to the standard for such a size."

That's it.

Mo Kenantian thought for a moment and said:

"If Mr. Xue Di still has concerns, we can test it for you, Mr. Xue Di."

Lin Tianhao waved his hand and said, "I can take a look at the test, but I need to think about your request again."

"I'm going to take care of something else first, and then I'll come back to you."

If Lin Tianhao accepts the two-dimensionalization, the risk he will have to bear is indeed not small.

therefore.

To be on the safe side, Lin Tianhao needs to make some other preparations.

"it is good."

Mo Kenantian nodded gently and said with a smile:

"The difficulty coefficient of this mission is already very high, and the real difficulty is not the problem of two-dimensionalization, but after being two-dimensionalized, entering the Moko Ancient City will also be affected by the power of ice."

Lin Tianhao frowned slightly and raised his hand to place it on the ice sculpture scroll.

The ice sculpture was bone-chillingly cold, but it did not cause any harm to Lin Tianhao.

See this scene.

Mo Kenantian's eyes widened, with an expression of disbelief on his face.

"Mr. Xuedi, aren't you afraid of the ice?"

Mo Kenantian knew very well that not to mention direct contact like Lin Tianhao, even if he got a little closer, he might be frostbitten by the cold air of the ice sculpture.

"Not afraid."

Lin Tianhao said calmly, "Because of some opportunities, I am immune to most ice and snow damage."

Hear this.

Mo Kenantian couldn't help but take a breath and said:

"If that's the case, then Mr. Xue Di, you are the best person to carry out this mission."

"and."

"With your strength and immunity to the cold air, it will be very easy to complete this mission."

Lin Tianhao waved his hand and said:

"I didn't say I wouldn't do this mission, it's just that I have other things to do now."

Hear this.

Mo Kenantian seemed to want to say something but hesitated, but finally nodded.

"alright."

"But Mr. Xuedi."

"Please believe us. You have revived the Mokesha Kingdom and are our great benefactor. We can never plot against you no matter who we plot against."

"If you have any concerns, you can tell me later."

Lin Tianhao smiled slightly and said:

"Okay, see you later."

Lin Tianhao took out the Kunlun Mirror and turned to leave.

It was really hard for Lin Tianhao to accept that he was made two-dimensional.

especially.

He didn't know much about the country of Mokosha.

and.

There seems to be something wrong with the historical issues of the Mokosha Kingdom and the information revealed by Shangguan Taoyun in just a few words.

Lin Tianhao left the Future Chamber of Commerce with the Poison Emperor of Sand Sea and the Burning Heart Nightmare.

After coming out of the Future Chamber of Commerce, Lin Tianhao said:

"Fen Xin, do you think this Mo Kenantian is trustworthy?"

"No."

Burning Nightmare said without hesitation:

"If there was, he wouldn't have issued such a mission to you. If they can transform people into two dimensions and then restore them, they can send people in in batches. Giving you such a mission is problematic in itself."

That's it.

Burning Nightmare hesitated for a moment, then continued:

"and."

"This Mo Kenantian is chatting with you. Someone must have discussed this with him. He must have some equipment that allows him to communicate with other people."

"It should be what he said, the other future presidents of the Chamber of Commerce, but they are just meeting you, so there is no need to discuss everything before speaking."

Lin Tianhao didn't notice this.

"Let's not talk about this for now. Let's go find Shangguan Taoyun first. I revived the Mokesha Kingdom, so he should honor the reward."

Lin Tianhao took a step forward and headed towards the Shapai Poison City.

If nothing unexpected happens, Shangguan Taoyun should come here to find him.

After all, the key to reviving the Kingdom of Mokasha lies here.

When Lin Tianhao arrived at the Shapai Poison City, he did not see Shangguan Taoyun.

Lin Tianhao was not in a hurry. He took out the Book of Life and Death and started calling out names according to the list given by Niu Si Langtian.

This is a physical job.

Lin Tianhao kept changing the names, and all the people on the list were written down.

Then the second time, and the third time.

When Lin Tianhao wrote it for the seventh time, Shangguan Taoyun finally appeared.

"Xue Di, sorry for waiting." Shangguan Taoyun walked over and gave Lin Tianhao a warm smile.

Lin Tianhao waved his hand and said:

"It's okay. I just happened to be using a little notebook to write down people's names."

"Oh?"

Shangguan Taoyun was a little surprised and asked with a smile: "Xue Di, you know too many people. Are you afraid of forgetting them by writing them down?"

Lin Tianhao shook his head and said:

"That's not true."

"Whoever is recorded in this little notebook of mine will die."

"what--"

Shangguan Taoyun was stunned for a moment, "I see."

Lin Tianhao waved his hand and submitted the task directly.

"Ding, congratulations, you have successfully completed Shangguan Taoyun's mission [Reviving the Mokesha Kingdom]."

"Mission Reward: Grade +1, Free Attribute Points +100 million, Mokesha Kingdom Tianji Pavilion +1, Godhead +6."

Lin Tianhao showed a satisfied smile on his face.

Especially after the grade +1, Lin Tianhao's attributes changed drastically in an instant.

First of all, the health value directly broke through the 30 trillion mark! !

This amount of health can be considered top-notch not only among adventurers but also among NPCs.

Chapter 1418 Tianji Pavilion!

Lin Tianhao had just completed his rank promotion when the fat man sent an excited voice message to him.

"Oh my god, my dear grandpa, what have you done recently? Your health points have increased from over 4 trillion to 30 trillion!!"

"Oh my god, I really want to kneel down and kowtow to you, Brother Hao. You are really too outrageous. It's simply outrageous. It's outrageous to the extreme!!"

"Thirty trillion health points! I still feel like I'm living in a dream. Looking at the entire Ragnarok, my health points should be the highest!!!"

.....

Watching the fat man's continuous voice, Lin Tianhao could feel that the fat man was really excited.

Thirty trillion health points, that's really worth getting excited about.

Don't talk fat.

Even Lin Tianhao himself was a little excited at this moment.

and.

In addition to the grade +1, the other things Lin Tianhao obtained this time are also very precious.

One million free attribute points, six godheads, and this Tianji Pavilion of Mokesha Kingdom.

Jinye Mohua was still refining the Confucian and Taoist godhood at this time. It was unknown how long it would take Jinye Mohua to completely refine and absorb the Confucian and Taoist godhood.

Create a god!!

If Jinye Mohua's experiment is successful, then these six divine powers can also be used to create gods.

These people around Lin Tianhao basically have the potential to become gods on their own, so they don't really need him to use his divine power to help.

Whether it is Monkey, Fatty, Glasses, or Lin Qingqing, they all have great potential.

Glasses is not clear, but with his help, Monkey and Fatty have now grown to a very high level.

and.

Unless it is absolutely necessary, Lin Tianhao does not want the people around him to follow the path of becoming gods.

"Where is this Tianji Pavilion?" Lin Tianhao asked.

"In your heart." Shangguan Taoyun said with a smile.

Lin Tianhao was slightly startled, and after a little sensing, he actually discovered that a palm-sized palace appeared in his consciousness.

There are three words on this palace: Tianji Pavilion.

"This Tianji Pavilion is extremely precious. Taking it as a reward can also be regarded as a good relationship with you."

Lin Tianhao immediately checked the situation of the Tianji Pavilion.

Tianji Pavilion: Unknown.

Requirements for use: Xue Di only (can be untied).

Effect: You can expend energy or pay other costs to deduce everything you want to know.

Wear resistance: cannot be destroyed, cannot be stolen.

Lin Tianhao narrowed his eyes slightly.

There is very little introduction to the Tianji Pavilion, but even this little introduction allows Lin Tianhao to clearly feel the power of the Tianji Pavilion.

Can deduce everything he wants to know!!

This is somewhat arrogant.

But such arrogant words appeared in the entry of this equipment.

Besides.

The grade of this equipment from Tianji Pavilion is also very interesting.

unknown!!

Lin Tianhao doesn't have many unknown-level equipment in his hands, and each one is extremely powerful.

This Tianji Pavilion is quite special, so Lin Tianhao decided to study it later.

His eyes fell on the other person, and he said with a smile:

"The country of Mokesha has revived. I have dealt with a president of the Future Chamber of Commerce. The situation in the country of Mokesha seems to be different from what you revealed before."

Shangguan Taoyun waved his hand and said:

"It's impossible to be the same."

"The president of the Future Chamber of Commerce gave me a task that required me to transform from three-dimensional to two-dimensional in order to execute it. I thought it was risky, so I didn't agree."

Shangguan Taoyun waved his hand and said:

"The Mekosha nation has revived. The rest is not my business, but the Mekosha nation's technology is very advanced. They have a very high-level artificial intelligence system."

"Therefore, what they do tends to be more rational and less humane."

Lin Tianhao frowned slightly, "I didn't expect you to be able to give me much help."

"However, the Kingdom of Mokesha borders my Shanhai Empire, and I need the Kingdom of Mokesha to join my Fan Palace."

Hear the words.

Shangguan Taoyun said without thinking:

"You should know that this is unrealistic."

"The Mokosha Kingdom will not agree to this."

Lin Tianhao smiled and said:

"If I just rely on my mouth to say it, the Mokosha Kingdom will definitely not agree."

"You want to use force?"

Shangguan Taoyun was not too surprised. He thought for a moment before saying:

"But if you use force, the Mokosha Kingdom won't be so easy to deal with."

"They may not have anyone who can beat you, but they can use stealing tactics."

"They have too many ultra-long-range weapons. Your Shanhai Empire may not be able to withstand them."

Lin Tianhao narrowed his eyes and said:

"So, this needs to be considered in the long term."

"The Mokosha Nation is a superpower after all. I don't expect to be able to take them down in just a few days."

That's it.

Lin Tianhao changed the subject and continued:

"but."

"I'm still somewhat sure of myself."

"Let's wait and see." Shangguan Taoyun didn't say anything else.

Lin Tianhao originally thought that Shangguan Taoyun would dissuade him, but he did not do so.

seem.

He didn't care about taking action against these guys from the Mekosha Kingdom.

After separating from Shangguan Taoyun, Lin Tianhao summoned the Kunlun Mirror and headed for the inner world of the earth.

This time.

Lin Tianhao came here with two things to do.

First.

Help the Poison Emperor of Sand Sea ascend to the throne!!

The Poison Emperor of Sand Sea is a powerful being at the level of the Great Emperor. Lin Tianhao can completely use the Evolutionary Divine Liquid to help the Poison Emperor of Sand Sea complete his ascension.

the second.

It is to let Kui Wei Changtian go to the country of Mokesha.

"grown ups."

When Kui Wei Changtian saw Lin Tianhao coming, a smile appeared on his face.

Lin Tianhao nodded slightly and said:

"I came to you this time because I am planning to take you to a place where you can gain some insights and improve yourself."

"Oh?"

Kui Wei Changtian was a little surprised. What on earth could have allowed him to make a breakthrough?

"I'll take you there now, Heitian Aozhen. You stay with Kuiwei Changtian so that you can take care of each other."

Lin Tianhao summoned Hei Tianaozhen.

See Heitian Aozhen.

Kui Wei Changtian couldn't help but be stunned, because he could clearly feel that Hei Tianao's aura had undergone a drastic change.

"you....."

Kui Wei Changtian stared at Hei Tian Aozhen in disbelief. He even wondered if it was his illusion.

"You have already achieved the realm of the Great Emperor?!"

Although he had already seen it, Kui Wei Changtian still found it unbelievable.

It had been such a long time since he last saw Hei Tian Ao Zhen, and he didn't expect that Hei Tian Ao Zhen had already reached the level of the Great Emperor.

"To be precise... it is the realm of half-step to divine quality!!" Hei Tianao said indifferently.

Chapter 1419 The Poison Emperor of Sand Sea is promoted to a divine level!

"what?!"

Hei Tianao's words were truly shocking.

"Half a step...half a step to the divine realm!!"

This is indeed a bit too unbelievable.

Heitian Aozhen was already at the level of half-step emperor before, and if he could take another step forward and achieve the level of emperor, it would not be impossible for Kuiwei Changtian to accept it.

But now.

Heitian Aozhen told him that he was not at the level of Great Emperor, but at the level of Half-Step Divine Level.

"Your growth rate is too fast!!" Kui Weichangtian couldn't help but exclaimed.

Hei Tianaozhen bowed to Lin Tianhao and said:

"This is all due to your cultivation. Without you, I would never have been able to reach my current level."

"what?!"

Kui Wei Changtian looked at Lin Tianhao with surprise in his eyes.

"Sir, can you help me take another step forward sometime?"

Lin Tianhao smiled slightly, "No problem."

That's it.

Lin Tianhao looked at the Sand Sea Poison Emperor and said, "I came to the Earth's Core World this time for another purpose, which is to help the Sand Sea Poison Emperor ascend to the Divine Level."

"What?!!"

Kui Wei Changtian once doubted whether he had heard it wrong.

"God... Godly realm!!"

The shock he received today was really too great.

Hei Tian Aozhen has reached the half-step divine level, and Lin Tianhao has to help another powerful man in the great emperor level to be promoted to the divine level.

Lin Tianhao looked at the Sand Sea Poison Emperor seriously and said:

"When you advance to the divine realm, you will face a heavenly tribulation. You have just woken up. If you face a heavenly tribulation, how confident are you?"

Hear this.

The Sand Sea Poison Emperor hesitated for a moment and said:

"no problem."

"I'm in better shape than ever before."

"Oh?" Lin Tianhao was slightly surprised.

Logically speaking, the Poison Emperor of Sand Sea has just awakened and should not be in his peak condition.

"I used to have seven personalities. When I was fighting, the other personalities would affect my combat effectiveness."

"Of course, now that I'm on the Conferred God List, it also means that my personality is on the Conferred God List as well."

"Your command, sir, can command me, and it can also command all of my personalities."

That's it.

The Sand Sea Poison Emperor paused for a moment before continuing:

"My personality traits no longer affect me, but instead become my strengths."

"I see."

Lin Tianhao smiled slightly, "Come on then."

Lin Tianhao took out the divine liquid of evolution from the Beast God's treasure bottle.

After the Poison Emperor of Sand Sea took the divine liquid of evolution, his entire body was enveloped in a misty light fog.

In this misty light, the aura of the Poison Emperor of Sand Sea began to rise continuously.

The realm of the great emperor, the realm of half-step to the divine product, the realm of the divine product!!!

Feeling the change in the aura of the Sand Sea Poison Emperor, Kui Wei Changtian's eyes widened, "Amazing, so amazing."

"Just a tiny drop of liquid like this can actually allow a Great Emperor to advance to the Divine Level. This is too incredible."

When the aura of the Sand Sea Poison Emperor reached the divine level, thunderclouds rolled in front of the sky, and bolts of lightning fell from the sky, striking the Sand Sea Poison Emperor.

The Poison Emperor of Sand Sea now had a gray-green long sword in his hand.

This knife is long and slender, with a blade that is more than five meters long, giving people a strong sense of oppression.

The Poison Emperor of Sand Sea flew up towards the thunder with the long sword in his hand.

Bathed in thunder, the Poison Emperor of Sand Sea looked a little embarrassed, but he still went towards the thunder.

Under the baptism of thunder, the aura of the Sand Sea Poison Emperor became stronger and stronger, and his aura at the divine level became more and more stable.

Judging from the situation, his realm should be able to stabilize at the Divine level soon.

The thunder lasted for more than an hour before it ended.

The Poison Emperor of Sand Sea descended from the sky with uncontrollable excitement on his face.

"Thank you, sir!!"

The Poison Emperor of Sand Sea bowed towards Lin Tianhao, reaching the realm of godly quality.

This kind of state was something he had never dared to imagine before.

"This aura is too strong!!"

Hei Tian Ao Zhen couldn't help but sigh.

"I'm already half a step into the realm of the Godly Grade, but when I saw this true Godly Grade, I realized how insignificant I am."

Hei Tian Ao Zhen said this is not an exaggeration.

Lin Tianhao looked at the Poison Emperor of Sand Sea and felt an incomparable sense of oppression from him.

as if.

As long as the Poison Emperor of Sand Sea is willing, he can easily defeat him.

The gap between the half-step divine level and the divine level is truly as vast as the difference between heaven and earth.

"it is good."

Lin Tianhao also showed a satisfied smile on his face.

"You stabilize your realm first, and I will take Kui Wei Changtian to the Kingdom of Mokesha."

Lin Tianhao took the Poison Emperor of Sand Sea back from the List of Gods, and then took Kui Wei Changtian to the Kingdom of Mokesha.

With the Kunlun Mirror, it is very easy to travel.

The country of Mokosha.

Kui Wei Changtian looked at the flying machines and space jump devices, shook his head and said:

"The level of technology here is not low, but I can make all these things."

"This space jump device is a little interesting, but it's still not difficult to make."

Lin Tianhao didn't expect that Kui Wei Changtian would say that.

"Let's go to the Future Chamber of Commerce."

The technological core of the Mokosha country must be in the future Chamber of Commerce.

Perhaps Kui Weichangtian will gain something by going to the Future Chamber of Commerce.

Especially the method of transferring damage and absorbing energy is very worth learning from.

"In the future, the Chamber of Commerce will have a way to transfer damage and convert the potential energy of the damage into energy that it can use. This is worth learning." Lin Tianhao said.

Hear this.

Kui Wei Changtian finally became interested.

"This is interesting, but I don't know what level it can reach, the number of units that can be transferred, and the limit of endurance."

"There is also the specific conversion rate of converting potential energy into energy. If these values are not high, it will still not work."

Lin Tianhao thought for a moment and said:

"It can dissolve the attack of a semi-emperor master. The energy conversion rate is about 30%."

"what?!"

Kui Wei Changtian's pupils suddenly shrank, "If that's the case, then it's interesting."

"According to what you said, their technology is already very mature."

"Because the theoretical limit is to convert 50%, but you should also know, sir, that the gap between theory and reality is huge."

Lin Tianhao nodded slightly. According to Kui Weichangtian's statement, the Future Chamber of Commerce's damage transfer system was indeed very powerful.

"How far can you go?" Lin Tianhao asked.

Kui Weichangtian thought for a moment and said, "This system cannot be completed by an ordinary mechanic."

"Don't underestimate the system because it has a single function. The computing power required to run it and the amount of engineering work required to make it are both difficult to estimate."

"Especially the kind you mentioned. Even if I were given the blueprints and materials, with my personal ability, it would take at least five years to complete a system like this."

That's it.

Kui Wei Changtian paused for a moment before continuing:

"Moreover, this is just the completion, and it may not be tested successfully. Subsequent testing, debugging, and final presentation will take at least six years at the fastest."

Chapter 1420: War breaks out, and the Poison Emperor of Sand Sea dies!

After hearing what Kui Weichangtian said, Lin Tianhao could finally understand how difficult this technology was.

Kui Weichangtian did not finish his words. He paused for a moment and then continued:

"This is just based on the blueprints and materials. If we take into account the time, manpower and material resources required to develop the blueprints and find the materials, it will be an astronomical figure."

Lin Tianhao now understood how terrifying the technological value behind the attack of the hunchbacked old man in the seemingly ordinary place of the Future Chamber of Commerce was.

Although he could see that the Future Chamber of Commerce's defense system was extraordinary before, it was only after hearing what Kui Weichangtian said that Lin Tianhao realized how outrageous this defense system was.

"Their defense system should have been built by the Mokosha Nation at great expense, and there is a high probability that an expert gave them the blueprints."

Mo Kenantian had revealed the information before.

Their ancestors came from outer space and brought them unprecedented technology.

"That would explain it."

"I have some understanding of your Ragnarok. The technological level of your Ragnarok is not very high. Outside of the Vast Continent, there is also a continent that focuses on developing technology, but the level is also very limited."

Lin Tianhao smiled helplessly and said:

"Then do you think there is anything worth learning from this future chamber of commerce?"

Hear this.

Kui Wei Changtian said without even thinking:

"Of course. Their artificial intelligence, the core brain, is very worth learning."

"I even want to... deprive this core brain of its power. Its computing power is too strong!!"

Lin Tianhao narrowed his eyes slightly. He didn't notice what this core brain was.

But looking at Kui Wei Changtian like this, this core brain seems to be really very, very strong.

"Sir, do you see this? Everything here, whether it's the aircraft, the space jump device, or the signal tower, is controlled by a common mastermind behind all of these."

"To be able to control so many core masters at the same time, its computing power must be extremely terrifying."

Lin Tianhao narrowed his eyes slightly, "If what you said is true, then the one who controls the Mokosha Kingdom is not just one person, but... this core mastermind."

Kui Weichangtian smiled and nodded, saying:

"Hehe, that should be the case. If this core brain has no owner, then... it will be a bargain for us."

Hear this.

Lin Tianhao immediately understood what Kui Weichangtian meant.

Because if this core brain has no owner, then it is just a mechanical object, a mechanical object without an owner.

what does this mean?

This means that Lin Tianhao and Kui Wei Changtian can both use the Mechanical Overlord to control this core brain.

if successful.

Then it will be much easier for him to control the country of Mokesha.

"Can we find the core brain?" Lin Tianhao asked.

Kui Wei Changtian nodded gently, "Theoretically, it can be found."

"It is using its computing power to control these things, and I can use my methods to find its location."

"But it may take some time to find a core mastermind of this level."

Lin Tianhao was not in a hurry. "Then you search, and I will understand."

Lin Tianhao entered the ancient black tower and asked Heitian Aozhen and Kuiwei Changtian to go together to find the core leader of the Mokesha Kingdom.

In the ancient black tower.

Before Lin Tianhao began to gain enlightenment, he spent another hour rewriting his name in the Book of Life and Death.

Subsequently.

Lin Tianhao locked the head of another person and began his journey of enlightenment.

Three days passed in a blink of an eye.

Lin Tianhao was still trying to gain enlightenment, but was awakened by Hei Tianaozhen.

"Sir, do you want to take a look? There is a fight going on ahead, and it's a large-scale one."

When Lin Tianhao heard Hei Tian Aozhen's voice, he immediately came out of the ancient black tower.

Just appeared.

Lin Tianhao saw the hail of bullets in front of him, the fighting was extremely fierce.

Laser cannons, grenades, machine guns, aircraft scanning lasers, and various ranged technological weapons.

On the other side, mages and warriors were the main professionals rushing forward frantically.

There were also assassins attacking from behind, and the fight was in full swing.

then.

Lin Tianhao saw what was the struggle between financial resources and manpower.

Because these technological weapons are all controlled by robots. In other words, there is no living person on the side of the technological weapons!!

All of them were killed by robots and various technological weapons.

Is this the battle situation in the Kingdom of Mekosha?

"Do you want to help them? I can control all these technological weapons." Kui Weichangtian's voice sounded in Lin Tianhao's ears.

Lin Tianhao thought for a moment, "The attacking party seems to be the force from the Mokoradin Desert before."

"It seems that the Mekosha Kingdom has revived, and the original forces in the Mekoladin Desert are unwilling to accept it. They want to come back and take back the land that belongs to them."

Hei Tian Ao Zhen nodded slightly and said:

"But judging by the fighting power they are showing now, it should be difficult for them to succeed."

"The technological level of the Mokosha country is indeed not low, and the lethality of these weapons should not be underestimated."

Lin Tianhao smiled slightly and said:

"What if I take action?"

"Or...how about letting the Sand Sea Poison Emperor raise his arm and call for action?"

Originally, these forces in the Mokoradin Desert had a blind worship of the Poison Emperor of the Sand Sea.

Now that the Poison Emperor of Sand Sea has reached the realm of Godly Quality, if he were to raise his arms and invade the Kingdom of Mokosha, would he be able to reap the benefits?

even.

He doesn't even need to do it himself.

With Kuiwei Changtian, the Poison Emperor of the Sand Sea, and these major forces that originally belonged to the Mokoradin Desert, will there be any changes?

After thinking this through, Lin Tianhao smiled faintly and said:

"Help, why not help."

Lin Tianhao called out the Poison Emperor of Sand Sea and told him and Kui Wei Changtian his thoughts.

He made his move, and Lin Tianhao also wanted to see how the Mokesha Kingdom would respond next.

Although the Future Chamber of Commerce still has the Heavenly Punishment equipment, Lin Tianhao does not trust the tasks they give him.

After hearing Lin Tianhao's arrangement, the Poison Emperor of Sand Sea and Kui Wei Changtian had no objections.

Kui Wei Changtian took action, and all technological weapons ceased firing and flew to Kui Wei Changtian's side.

The Poison Emperor of Sand Sea flew out directly.

Lin Tianhao doesn't need to worry about what happens next. He will use the Tianji Pavilion next.

This was the first time that Tianji Pavilion was used, and Lin Tianhao wanted to deduce whether there would be any unexpected changes when he accepted the mission from Mo Kenantian.

After asking the Tianji Pavilion to deduce, Lin Tianhao suddenly felt that his mental strength had been greatly reduced, and he felt a little drowsy.
