

## **O games 1461**

Chapter 1461: Mist Monster: Skeleton Man!

Looking back at the vast continent, Lin Tianhao felt a little complicated.

He also didn't know whether his decision to come to Zhongzhou Continent this time was correct.

But since he has come here, it is not his style to leave without doing anything.

not to mention.

The task that Li Hanli mentioned is still very tempting.

Accommodating one or two fog monsters may not be worthwhile, but what if you could accommodate tens of thousands or even hundreds of thousands of fog monsters?

This number is terrifying.

Suppose it could accommodate 100,000 monsters, what would that mean?

That's 1 billion free attribute points. If it's given to Monkey, with Monkey's talent, one free attribute point is equivalent to 50.

That monkey is equivalent to obtaining 5 billion free attribute points.

Five billion free attribute points, even if used on a pig, can make the pig take off.

and.

The monkey was strengthened, which indirectly strengthened the fat man.

Take back your thoughts.

Lin Tianhao drove the golden chariot forward in the fog.

With the map of the Poison Emperor of Sand Sea, Lin Tianhao decided to go to the Angry Dragon City among the nineteen golden cities in the Zhongzhou Continent first.

Because Nulong City was the closest to his current location, he went to Nulong City first to get a better understanding of the situation on the Central Plains continent before thinking about what to do next.

The monsters in the fog were not as dense as Lin Tianhao had imagined. After walking for more than half an hour, Lin Tianhao still hadn't encountered a single fog monster.

"Is it because I'm driving this golden chariot that these fog monsters don't appear?"

According to the information Lin Tianhao learned from various sources, gold has a very strong inhibitory effect on these fog monsters.

Since I was driving the golden chariot, it seemed reasonable that no fog monsters appeared.

but.

In more than half an hour, Lin Tianhao has passed through two towns and several villages.

These villages were deserted and severely damaged, looking as if they had been crushed by a tide of beasts.

Besides.

Lin Tianhao also discovered a problem.

Many things in these villages and towns have been looted.

Judging from the looting, it was obviously a team effort, and nothing useful was left behind.

After driving the golden chariot for more than half an hour, a small town appeared in front of Lin Tianhao.

This small town, like the previous villages and towns, is only left with ruins and has been severely damaged.

Lin Tianhao drove the golden chariot through the edge of the town.

"What do these monsters look like? Judging from the damage they've done, they're ferocious wild monsters."

Just as Lin Tianhao was thinking this, the voice of Burning Heart Nightmare suddenly rang out.

"coming."

As the sound came, Lin Tianhao saw a skeleton man walking towards him in the fog.

There were two balls of dark green flames dancing in the eyes of this skeleton man. With this appearance, he looked almost the same as the skeleton soldiers in the vast continent.

Lin Tianhao opened a small hole on the golden chariot, through which his feather arrows could attack the target range outside.

Heavenly punishment lock!!

Although Lin Tianhao's health has decreased now, his output capacity should not be underestimated.

As Lin Tianhao's feather arrow broke through the air, it accurately hit the skeleton man.

But the expected damage numbers did not appear. The skeleton man seemed to be hit by a feather arrow and staggered back several steps.

"Is this the reason why it can't be killed? It has no health bar and won't lose health even if it takes an attack."

Thinking like this.

Lin Tianhao took out a golden feather arrow. Since these fog monsters were so afraid of gold, what if he used the golden feather arrow to attack these monsters?

Although these guys in Zhongzhou Continent may have done such tests, Lin Tianhao doesn't know the results.

The golden feather arrow cut through the sky and hit the skeleton man in an instant.

The skeleton man was directly blown away by the golden feather arrow.

Lin Tianhao immediately rushed over in the golden chariot.

The skeleton man was blown away for thousands of meters and his body became weak, but Lin Tianhao could see that there was no damage to its vital signs.

Even the place where the golden feather arrow hit did not leave any trace.

This indicates that.

These golden feather arrows are likely to increase their lethality against them, but they cannot cause fatal damage to them. At most, they can only weaken them.

But Lin Tianhao's experiment was not over yet, he shot out another golden feather arrow.

as predicted.

This time, the skeleton man was blown away by the golden feather arrow just like before.

but.

This time the skeleton man was only a little weaker than before, but not too weak.

"Is there a limit to weakness? Has this skeleton reached its limit of weakness?"

While Lin Tianhao was thinking about this, the skeleton man had already started to run away.

However, it seemed that because he was too weak, his speed was very slow. In order to confirm his guess, Lin Tianhao shot the third arrow.

Just like before, the skeleton man was blown away.

However, the skeleton man's weakness did not change.

This indicates that.

Lin Tianhao's speculation was not wrong.

These fog monsters cannot be killed. The attacks from the golden weapons can weaken them, but this weakness should have a limit.

Then.

How long will it take for this skeleton to recover?

For now.

The danger level of this skeleton man is not high, so Lin Tianhao can use this skeleton man to confirm his guess.

Under Lin Tianhao's observation, the skeleton man's body began to absorb the mist, and then his weak state began to recover.

"So... ordinary feather arrows really can't weaken this skeleton man?"

Lin Tianhao took action again.

This time he did not use the golden feather arrows, but just used normal energy feather arrows to attack.

Results prove.

Lin Tianhao's energy feather arrows can still weaken the skeleton man.

Weakness also has its limits.

"Nedlif, tell me, why can't it be killed? Is it because of the mist?"

This skeleton man was obviously absorbing the mist to restore himself.

therefore.

There is a high probability that these fog monsters cannot be killed because of the fog.

"I really don't know about this."

Ned Liv's somewhat helpless voice came.

"But in theory, there are no unkillable monsters in this world. Either there are rules under certain conditions, or there is intervention from a higher level of power, or there is some kind of survival method that we don't understand."

"For example, you are the result of the intervention of a higher-level force and the blessing of rules under certain conditions. This is the reason why you can be resurrected infinitely."

Lin Tianhao nodded slightly, and Ned Lifu continued:

"This fog monster cannot be killed. It may be blessed by the power of higher-level rules."

Chapter 1462: Containing Monsters: Crazy stacking of health points!

Lin Tianhao raised his eyebrows slightly and said with a smile:

"I don't think so."

The Poison Emperor of the Sand Sea denied Nidlifu's guess and expressed his own guess.

"There is a plant-type monster in the Mokoradin Desert that can share life with its offspring."

"Life sharing, I believe you are all familiar with it. Most top summoners can share life with one or more of their summoned beasts."

"What if... this fog is a monster? What if these fog monsters are its parasites?"

"Your arrows have enough damage and are powerful enough. There's no reason why they can't kill a tiny skeleton."

Nidlifu nodded. "What you said is possible, but even if it is the case, it will not help."

"The area covered by these fogs is so large that even the fog that appears in Zhongzhou now is only a very small part of the entire fog."

"You should know how vast the endless starry sky is."

Lin Tianhao listened to their words and said slowly:

"According to you, what should I do?"

"Attack the mist directly?"

The Sand Sea Poison Emperor nodded and said:

"You can give it a try."

"Due to the nature of the fog, most attacks are unable to cause any substantial damage to it."

"But you are different, my lord. My attacks are sure to hit the target. They also have many other advantages, such as no cooldown, high damage, true damage, and high frequency."

"Maybe it can really have miraculous effects."

Do it when you think of it.

Lin Tianhao used an energy feather arrow to lock onto the fog, and then the arrow broke through the air.

The energy feather arrow successfully hit the fog, but the fog did not change at all.

Lin Tianhao this time.

Switched to golden feather arrows.

With the help of the Heavenly Punishment Lock, the golden feather arrow also hit the target.

After the golden feather arrow hit the fog, the fog in that area obviously became a little lighter.

"it works!!"

Lin Tianhao's eyes lit up.

"This is a huge development. My Lord, you may even be able to solve the fog problem in the Central Plains."

Both Burning Heart and Nightmare were a little excited.

after all.

Even the strong men at the level of the Great Emperor are helpless in dealing with the problems of the entire Central Plains continent. It would probably be difficult for Lin Tianhao to solve it by himself.

The fog had just been dispersed by Lin Tianhao with his golden feather arrow, but fortunately it has recovered.

Lin Tianhao frowned and said:

"If the speculation of the Poison Emperor of Sand Sea is true, it will be difficult."

"For such a huge monster, its own recovery ability should be extremely terrifying."

The moment Lin Tianhao finished speaking, the skeleton man stopped running away. He stood in place, and a bone knife appeared in his hand.

Followed by.

He actually rushed towards Lin Tian's golden chariot with a bone knife in his hand.

Lin Tianhao did not dodge, nor did he fight back or defend.

Because he wanted to see how much damage this skeleton man would cause to the golden chariot.

If these fog monsters can also cause a certain degree of damage to gold, it would be really difficult to deal with them.

"clang--"

There was a loud bang.

The skeleton man flew backwards, and a very tiny trace appeared in front of the golden chariot, without even a groove.

"It can leave a mark, but it can't cause much damage, and after attacking the gold, it will be bounced back with great force."

Lin Tianhao already had the answer in his mind.

suddenly.

Lin Tianhao found that he had overlooked a problem.

That is... Li Hanli can also sell the equipment to other people.

such as.....

Those guys from the Arlate galaxy, people from the United States and other countries, and... those holy places outside the territory.

even.

Some holy places and major forces in the Shanhai Empire may purchase equipment from Li Hanli.

In this way, their strength will definitely be greatly improved.

But then I thought about it.

Lin Tianhao felt that there was no need to worry too much.

Because at this price, there are too few people who can afford it at this stage.

Even the U.S. government has very limited purchasing power.

Take back your thoughts.

"Heitian Aozhen, take it in." Lin Tianhao said.

Heitian Aozhen controlled a golden chain in the air to wrap around the skeleton man, and then dragged him back.

Followed by.

He rubbed a golden box with his hands and put the skeleton man inside.

After entering the golden box, Lin Tianhao could feel the breath of the skeleton man inside the golden box.

But the skeleton man inside the golden box seemed to be completely unable to move, and was lying quietly inside the box.

The first fog monster was very weak and was taken in without any pressure.

Lin Tianhao also experimented with some of his ideas on this skeleton man.

After putting the skeleton man into the backpack, Lin Tianhao continued to drive the golden chariot towards the Nulong City.

Along the way.

Lin Tianhao encountered more than a dozen fog monsters one after another, some of which were quite ferocious.

But it was too weak to face the threat from Lin Tianhao.

It was very easy for Lin Tianhao to accommodate them.

and.

Lin Tianhao also found a great way to improve his proficiency from these fog monsters.

Because these fog monsters cannot be killed and they are living things.

Doesn't this perfectly meet Lin Tianhao's need to increase the health of the Hand of Heavenly Punishment?

therefore.

Lin Tianhao let Fenxin Nightmare drive the golden chariot, while he himself began to frantically stack health points in the mountain and sea map.

The space inside the mountain and sea map is large enough, and Lin Tianhao can fully utilize his passive skills.

Feather arrows continued to cut through the sky, and Lin Tianhao's health began to increase steadily.

The most important thing is proficiency. If you can do 200+ times per second, you will get 12,000 times per minute and 720,000 times per hour.

This stacking speed is still quite terrifying.

As for health points, there are even more.

Because in addition to normal attacks being able to stack health points, Lin Tianhao's various passive skills can also help Lin Tianhao stack health points.

In addition, hard work can make up for shortcomings, which doubled the life value accumulated by Lin Tianhao's talent. This made the amount of life value accumulated by Lin Tianhao every hour exceed 10 million! !

As for the containment issues encountered with other fogs.

With the Burning Heart Nightmare taking action, Lin Tianhao doesn't have to worry at all.

For a strong person at the divine level, with sufficient gold as support, it is completely easy to contain these fog monsters.

And Lin Tianhao.

It is outputting as much as possible.

While adding up health points and proficiency, Lin Tianhao also wanted to see if these monsters were really unkillable.

Because before in the Dragon Cave, Lin Tianhao had also encountered things that were difficult to destroy with his feather arrows.

The result is that it's not that I can't do it, but that I don't have enough feather arrows.

Not only that.

Lin Tianhao firmly believes that these fog monsters should be life symbionts.

because.

A monster was so powerful that it could not be killed, and he could accept that.

But there are so many monsters in the entire Zhongzhou Continent, and they can't be killed. This is too outrageous! !

Chapter 1463 Lie Fusheng: Submit the task!

and so.

The best explanation is.

They are not unkillable, but rather extremely rare shared life forms.

It can be understood as Lin Tianhao's damage transfer, or it can be understood as the future Chamber of Commerce's defense system. The damage will be transferred and distributed to multiple points.

Compared to the fact that all these monsters cannot be killed, Lin Tianhao prefers to believe that they are a community of life, sharing life and sharing damage!!

How many monsters are there in the entire fog?

100 million? 1 billion?

Maybe more than that!!

Because the area of Zhongzhou Continent is much larger than that of Haomiao Continent.

The population of the Haomiao Continent is in the hundreds of billions, so it is not surprising that the population of the Zhongzhou Continent is in the trillions.

These fog monsters were able to destroy a supercontinent with a population of trillions in a short period of time, which meant that their number must be large, possibly exceeding 10 billion or even more.

If Lin Tianhao's speculation is correct, and the lives of these tens of billions of fog monsters are shared, then it is not difficult to understand why they cannot be killed.

Because these fog monsters are of high level and have very high health points.

Their very high health points mean that their ability to recover health is not too bad.

and.

They can also absorb fog to restore health, which is an amazing ability.

There are 10 billion monsters, and each monster recovers 10,000 HP per second. With the blessing of the life community, the HP recovered per second is 100 trillion.

Combined with the health recovery in the fog, these fog monsters can recover up to millions or even more health in one second.

After all, these are just Lin Tianhao's own speculations.

With this level of health recovery, it is normal that these fog monsters cannot be killed.

This was because these fog monsters had to endure at least trillions of damage per second before they could actually lose blood.

and.

It is not ruled out that these fog monsters have means of reducing damage such as physical transformation, then it would be even more difficult for them to lose blood.

Theoretically, Lin Tianhao's current output cannot break their blood recovery limit.

Because with Lin Tianhao's current output capacity, even if he goes all out, it is only hundreds of trillions of damage per second.

Compared with the health points that Lin Tianhao estimated that the fog monster could recover in one second, Lin Tianhao's output ability is somewhat insignificant.

and.

Lin Tianhao also has the opportunity to test whether his speculation is valid.

Because as long as these fog monsters suffer enough damage, they may pose a threat to them.

of course.

These are just Lin Tianhao's speculations.

What Lin Tianhao is thinking about now is to capture as many of these fog monsters as possible.

Whether it is used to enhance oneself or given to the monkey, it is a huge gain.

Just so much time.

Lin Tianhao has already taken in more than a dozen fog monsters.

If this is converted into free attribute points, it would be over 100,000.

If Lin Tianhao stays here for a few months, how many free attribute points can he get?

But there is one thing to say.

This reward is indeed generous.

It seems that the Zhongzhou continent has spent a lot of money to deal with these fog monsters.

The next day, early morning!!

The early morning in Zhongzhou Continent is still foggy, and visibility has improved slightly, but not much.

These fogs covered the sky and the sun, making the situation in Zhongzhou Continent not very good.

And this morning.

Lin Tianhao finally arrived at Nulong City.

The golden Nulong City still looks very eye-catching.

Lin Tianhao drove the golden chariot to the gate of Nulong City. A window opened at the gate, and a head popped out and said:

"Go into the city and pay 100,000 gold coins."

Lin Tianhao raised his eyebrows. The entrance fee to the city is not cheap.

However, given the current situation in the Central Plains, it is obviously safest to be able to enter the Golden City.

Lin Tianhao paid 100,000 gold coins and successfully entered the Golden City. The area of the Golden City was not as large as he had imagined.

The height of the entire Golden City's wall is less than ten meters. Unlike other cities, the Golden City has a capped roof.

The entire city is like a huge golden round box with gaps around it, which should be used to observe the outside and for ventilation.

In this golden city, there are also container-like buildings, which are supposed to accommodate more people and can be regarded as a second layer of protection.

"Speaking of which, there is something like a small world in here, so can't it accommodate many people?"

Lin Tianhao thought of a new possibility.

He himself owns a treasure like the Map of Mountains and Seas, which can accommodate hundreds of billions of people.

The Zhongzhou continent has been developing for such a long time, it is highly likely that there is something similar to the Shanhai Map.

I thought to myself.

Lin Tianhao wandered around here.

However, I found that there were very few people on this street, and they all seemed to have relatively clear places.

"Little brother, you're new here, right? You seem unfamiliar with everything."

Just now.

A cheerful voice came.

Lin Tianhao turned around and saw that the person who spoke was a fat man with a beard.

He looked amiable, but his state of mind gave Lin Tianhao an invisible sense of oppression.

Lie Fusheng (half-step emperor level): level 14214.

This fierce Buddha is of high grade and not low level.

More than 14,000 levels are still relatively rare.

"Yes, I'm new here. What's your name, senior?" Lin Tianhao asked.

Although he already knew the other person's name.

"Liefuosheng."

Lie Fusheng seemed very enthusiastic, "Little brother, if there is anything you want to know in this Nulong City, you can ask me."

Lin Tianhao bowed and said, "Senior, you are so enthusiastic. I am really humbled. I am just a rookie at level 17. I am not at the same level as you."

Lie Fusheng waved his hand and said:

"Xue Di, you are joking. Others may not be able to tell your identity, but I can still tell it."

Lin Tianhao smiled awkwardly. The other party could actually see through his disguise.

But it seems normal.

After all, he is a half-step emperor level master, so it is normal for him to have some tricks.

"I heard from Li Hanli that you have a common task. I wonder if it will be the same if I give it to you?"

Hear this.

Lie Fusheng's eyes lit up, "As expected of the famous Snow Queen, she has just arrived in the Central Continent and has already taken in those unkillable monsters."

"How many have you contained? Just hand them over to me."

"Twenty-three."

Lin Tianhao took out all the fog monsters he had captured.

Lie Fusheng couldn't help but give Lin Tianhao a thumbs up, "Incredible."

"Even for me, it's a bit troublesome to contain so many fog monsters."

After Lin Tianhao submitted the task, he successfully obtained 230,000 free attribute points and 230,000 contribution points.

This reward is still very generous.

"Come on, Xue Di. You have created so many miracles. I believe you can create new miracles in Zhongzhou Continent as well."

Chapter 1464 Plan for Zhongzhou Continent!

Lin Tianhao smiled and nodded, saying:

"You are so generous in giving rewards, so I am naturally willing to do my best."

"But then again, how much do you know about the fog monsters? I'm a newcomer here and I know very little."

Upon hearing this, Lie Fusheng said very readily:

"These fog monsters should not be lower than the ninth-level diamond level. Each of them is very powerful and has a very outrageous point, which is that they cannot be killed."

"They are very powerful and cannot be killed. In the fog, they also have an extremely fast recovery speed. If you fight against them at the same level, your chances of winning are almost zero."

Lin Tianhao nodded slightly. He actually discovered this.

The fog monsters are all very powerful, although they don't seem that good in his hands.

But if you are facing a master of the same level, these fog monsters are basically unsolvable.

"Our speculation about these fog monsters is that they are not truly unkillable. They are most likely transformed into a living community because of this strange fog. They share life and also share life recovery."

"This is also the core reason why they cannot be killed."

Lin Tianhao nodded slightly. It seemed that the people of Zhongzhou Continent were not fools.

They guessed this too.

After all, if every fog monster cannot be killed, then every fog monster needs to be blessed with the rule of being indelible.

however.

The level of this rule is simply too high to be erased.

Under normal circumstances, the power of rules at this level is extremely rare and cannot be used on a large scale.

"but."

"We speculate that after these fog monsters are contained, their connection with the outside world will weaken, which means that their life sharing will weaken."

Lin Tianhao's eyes lit up and he said:

"If that's the case, does that mean that the contained monsters can theoretically be killed?"

Lie Fusheng nodded heavily and said:

"Yes, we are currently working on this experiment with all our strength. The result is that there is a chance of killing."

"Because if you attack these monsters inside the golden box, they will become weaker than if they are outside."

"But you won't die."

"We also tried covering them with golden water, and even boiling them directly in the golden water, but the result was still that they became weaker, and we were unable to kill them directly."

That's it.

Lie Fusheng's face turned serious. "But after many experiments, we are basically certain that these guys can be killed. It's just that gold can only restrain them, but cannot completely cut off their connection with the outside world."

"We haven't made any major breakthroughs in gold, but we speculate that there must be some kind of metal that can completely isolate them from the outside world, allowing us to kill them."

Lin Tianhao nodded with a smile and said:

"You really are open with me and tell me everything."

Hear this.

Lie Fusheng looked very serious and said:

"Xue Di, this is different. This is the destructive power of our entire Zhongzhou continent. Too many people have died in our Zhongzhou continent because of these fogs and these fog monsters."

"We are now more united than ever before, because if we don't unite at this time, then only destruction awaits us."

"to be honest."

"Now, life forbidden areas have appeared one after another in our Zhongzhou Continent. Even the strong men at the level of the Great Emperor dare not easily set foot in these life forbidden areas."

Lin Tianhao had heard the Poison Emperor of Sand Sea talk about such places before, but according to Lie Fusheng, these places are still increasing in number.

"There is one more thing I think I should tell you."

"What's the matter?" Lin Tianhao was a little curious.

Judging from the way Lie Fusheng looks, this matter is most likely related to him.

"We have considered taking the fog monsters away and going to other continents to conduct experiments to see if we can kill these fog monsters in places far away from the fog."

Hear this.

Lin Tianhao was not too surprised, because Zhongzhou Continent would make this assumption, and from their point of view, there seemed to be nothing wrong with it.

"You haven't done that yet?" Lin Tianhao asked.

Lie Fusheng shook his head and said, "No."

"Because some of us speculated that if we take the fog monster to other continents, there is a certain probability that the fog will be led to other continents."

Lin Tianhao's pupils suddenly shrank. He had never thought about this question.

But when Liefusheng said this, he also felt a little chilly.

If what they said is true, this is indeed a very dangerous move.

Because no one can guarantee that there won't be any problems if they do this.

"We are now working hard to find various metals to experiment with these fog monsters."

"at the same time."

"We are also constantly containing these fog monsters and trying to reduce the damage they cause to the Central Plains as much as possible."

Lin Tianhao nodded, "Is this the reason why you went to the Haomiao Continent to exchange gold coins recently?"

"Not only in the Haomiao Continent, but also in other continents, we are sending people to exchange gold coins."

"After all, gold coins are the most useful thing we have found so far."

"Because we still have a plan for Qiankun's cage."

"A golden box that is over a hundred meters thick. Inside the box is a small world that can easily accommodate over five billion living beings."

"Currently, this small world is used to imprison the contained fog monsters. And because this small world belongs to a senior at the Great Emperor level, he can sense every situation in the small world."

"The worst outcome is to contain them all!!"

Lin Tianhao took a deep breath.

have to say.

These powerful people in Zhongzhou Continent have put a lot of effort into solving the problems in Zhongzhou Continent.

"Is this also the reason why you are willing to offer such a high reward for sheltering the fog monsters?"

Lie Fusheng raised his head and smiled, saying:

"Is that high?"

"It is indeed a bit high, but it is equivalent to our entire Zhongzhou Continent, so it is not high at all. The amount of free attribute points I can issue every month is more than five million, and it will increase every month."

Hear this.

Lin Tianhao was slightly surprised.

Because he is the master of the Mortal Palace, the task rewards of free attribute points that he can issue every month are only more than five million.

This is still the result of the increase every month.

This Lie Fusheng actually has a credit limit of more than five million.

But it seems normal when you think about it. After all, he is a half-step emperor level master, so there is nothing wrong with a higher amount.

and so.

In the past life, the Central Plains continent was a very popular place, but most of them did not seize this opportunity.

Perhaps in the previous life, the Central Plains was also eroded by fog, and this coveted item was destined not to be obtainable by ordinary adventurers.

Chapter 1465 Lin Tianhao's current damage!

"Xue Di, you are the master of the vast continent. You should be able to find a lot of rare metals. If possible, you can also give it a try."

Lin Tianhao thought for a moment and said slowly:

"I actually thought of a possibility. If life is really shared, then is it possible to weaken all the fog monsters in the entire Zhongzhou continent by continuously destroying a few or a dozen monsters, and then let experts lead the team to contain them."

Hearing Lin Tianhao's words.

Lie Fusheng was stunned for a moment, "Xue Di, I cannot deny that your idea is crazy, very, very crazy."

"There should be hundreds of millions, or even billions, of fog monsters in the entire Zhongzhou continent."

"How much output is needed to weaken all the monsters in Zhongzhou Continent?"

Lin Tianhao took a deep breath and said:

"I have my own way. It depends on whether the great emperors on your side are willing to sacrifice themselves."

Hearing Lin Tianhao's words, Lie Fusheng looked at Lin Tianhao in shock.

"Do you really think this is feasible?"

"With so many monsters, even if each one can only recover 100,000 HP per second, how much is that?"

Lin Tianhao pointed at himself and said:

"If I go all out, the damage per second will be no less than 500 trillion, and this is just my conservative estimate."

"What?!!"

Lie Fusheng almost thought he had heard it wrong. Five hundred trillion damage?

"I haven't calculated my damage in detail. There are some secrets that I can't reveal, but believe me, my damage output is terrifying."

It is already very terrifying that he can withstand the power of Lin Tianhao's arrow.

Lin Tianhao's health value has increased too fast recently, especially the recent quality +1, which has greatly increased his health value.

Although the Alite Galaxy and some superpowers joined forces to cause him some trouble, his health value was still extremely terrifying.

Lin Tianhao's current health is 1.4 trillion, and the Hand of Heavenly Punishment is five stars. The true damage of the Hand of Heavenly Punishment alone is trillion! !

Lin Tianhao also has the Hundred Slaughter God, double true damage, guild damage bonus, blood moon and the night attribute bonus of the dark night god Moirai.

Besides.

Because these fog monsters are not creatures of the galactic world.

therefore.

Lin Tianhao's title of Galaxy God of War can also cause an additional 100% damage to these monsters.

Taking all the increased damage into account, in a moonlit night, the damage value of Lin Tianhao's arrow can exceed 8 trillion.

Even without the moon and not in darkness, the damage of Lin Tianhao's arrow was more than 5.7 trillion!!

Lin Tianhao's current Sky Punishment attack speed has exceeded 5.7, which means that according to the lowest damage of trillion, with Lin Tianhao's three heads and six arms and arrows shot from the heart, the damage per second can reach a terrifying trillion! !

therefore.

The 500 trillion that Lin Tianhao just mentioned is a completely conservative statement.

If the blood moon and the amplification of the dark night god Moirai are added together, the damage that Lin Tianhao can inflict will be an astronomical figure.

The key is.

Lin Tianhao has not used the Beast God Bottle yet.

"If you can give me a mission of level +1, I am sure that I can weaken these fog monsters by myself."

"of course."

"The premise is that these fog monsters are really sharing life as we speculated."

After hearing what Lin Tianhao said, Lie Fusheng felt that his three views had been overturned.

"Is what you said true?" Lie Fusheng couldn't help but ask.

The main reason is that what Lin Tianhao said was too far-fetched.

Five hundred trillion damage per second, and that's just a conservative estimate. Is this wrong?

Trillion, not billion!!

Just listening to it makes people feel incredible.

"Of course it's true. If you don't believe me, you can test it."

Hear this.

Lie Fusheng laughed bitterly, "This is really hard to test. With your output ability, I'm afraid only the great emperors can withstand it. Others can't withstand your damage at all."

Lin Tianhao grinned and said:

"It's not as outrageous as you think. The damage of one of my arrows is probably only several trillion."

"If your health points exceed 10 trillion, you should have no problem taking one of my arrows."

"Trillions..."

Lie Fusheng just felt like he hadn't woken up yet.

Trillions!!

This is simply not too outrageous.

"We learned before that the damage of one of your arrows was hundreds of billions, but now it has become trillions. Your growth rate is too outrageous."

That's it.

Lie Fusheng glanced at Lin Tianhao meaningfully and said slowly:

"But if that's the case, I can discuss with the higher-ups and find a way to increase your rank by 1, and then you can try again."

Lin Tianhao nodded.

Now, if we were to ask how to greatly increase his life value, it would definitely not be to conquer other countries, but to increase his rank by 1!!

Grade +1, Lin Tianhao's health points increased exponentially.

and.

What increased was not only Lin Tianhao's health, but also other attributes.

Not only that.

Lin Tianhao's skill level can also be improved.

For some skills, the proficiency required to upgrade stars is very terrifying after reaching a certain level.

And a grade of +1 can overcome the proficiency limit and upgrade the skill star.

"Come on, I'll take you to meet the Lord of Nulong City."

Lie Fusheng led the way in front, while Lin Tianhao continued to ask:

"Do you know the power behind the Vast Wuji Palace?"

Hearing Lin Tianhao's words, Lie Fusheng's expression turned very ugly.

"Wuji Dengtian Palace, the super power of our Zhongzhou Continent."

Lin Tianhao chuckled and nodded, saying:

"You all in the Zhongzhou Continent are in such a state, and this Wuji Dengtian Palace is still idle and comes to target me."

"Do you know how many people in our Shanhai Empire died because of Wuji's ascension to the Heavenly Palace?"

"This....."

Lie Fusheng hesitated to speak, and finally sighed heavily and said:

"I have also heard about what Wuji Dengtian Palace did to the Shanhai Empire."

"to be honest."

"After learning what they did, I was shocked and angry. Given the current situation in Zhongzhou, if we offend you to death, we will be left with no chance of survival."

Lin Tianhao smiled noncommittally and said:

"It wasn't just the people from Wuji Dengtian Palace who attacked me."

"There are quite a few powerful forces from your Zhongzhou Continent."

When Lie Fusheng heard Lin Tianhao say this, his expression became more and more ugly.

"Xue Di, can you tell me the truth? How do you want to deal with the Wuji Dengtian Palace?"

Lin Tianhao raised his eyebrows and said:

"If I say I want to get to the bottom of this, what will you do? No, I should say what will you do?!"

## Chapter 1466: Lord of Nulong City: Liehongyu!

Hearing Lin Tianhao's words, Lie Fusheng's expression became a little unnatural.

"do not know."

"The current situation in our Zhongzhou Continent does not allow us to create strong enemies."

"Wuji Dengtian Palace is a super power in our Zhongzhou Continent, and the other two who attacked you are also top powers in our Zhongzhou Continent."

"In this situation, there is no room for error."

Lin Tianhao smiled playfully and said:

"Yes, you Zhongzhou Continent are already like this, but Wuji Dengtian Palace and the others still want to attack me and slaughter tens of billions of people in my Haomiao Continent!!"

"Do you know how much this affects me? Do you know what these tens of billions of people mean?"

"When Zhongzhou is in trouble, we should have united as one and faced the outside world together, but what happened?"

"How did they do that?!"

Lie Fusheng was silent for a while, then he said helplessly:

"Xue Di, I have nothing to say. They were wrong, and I have no right to apologize to you on their behalf. Too many people died, and it is not something that can be explained in a few words."

Lin Tianhao sneered and said:

"It's really not something that can be explained in a few words. If I'm not mistaken, this should also be your plan on the Central Continent."

"You are testing me. If I cannot resist your test, our Fan Palace will be destroyed. Then you can enter the Haomiao Continent and take over these people from your Zhongzhou Continent, right?"

Hear this.

Lie Fusheng immediately shook his head and said:

"That's absolutely not the case. If we really wanted to take over the Haomiao Continent, we wouldn't use these despicable means, but would directly confront you, Xue Di."

"We still have several powerful people at the level of Great Emperors in Zhongzhou Continent. They have profound backgrounds and will not and are not ashamed to do such things."

Lin Tianhao frowned slightly, even though there were powerful people at the divine level around him.

But very few people know that he is a powerful person at the level of God-grade.

"Whether it is as I guessed or not, it is a fact that Wuji Dengtian Palace attacked me."

"This matter must be explained."

Liefersen nodded and said:

"clear."

Lin Tianhao grinned and said:

"If you can allow me to upgrade my rank, I can help you deal with the fog monster first."

"As for the matter of Wuji ascending to the Heavenly Palace, we can discuss it later."

Hear this.

Lie Fusheng bowed to Lin Tianhao, "Snow Emperor's righteousness."

Lin Tianhao waved his hand and said, "It's just that everyone gets what they need. There's no such thing as righteousness or not."

While talking with Lie Fusheng, Lin Tianhao finally arrived at the city lord's residence.

It was almost the same as Lin Tianhao expected, that is, there was an entrance to a secret realm in the golden box, and they lived in the secret realm.

Look.

Gold can isolate the secret realm from being eroded by fog. The existence of these secret realms can give them more living space.

This secret realm is very large. From afar, you can see cities one after another, and people coming and going on the road in an endless stream.

Lie Fusheng and Lin Tianhao sped up a bit and finally stopped in front of a small building next to a lake.

"Snow Emperor."

A voice came from the small building, and then a charming woman in a red dress appeared on the second-floor balcony of the small building.

"You are a rare guest. Our Central Continent is already in such a state, I never thought you would be willing to set foot here."

Lin Tianhao smiled noncommittally and said:

"We all belong to the same land of China. As the saying goes, when one side is in trouble, all sides will come to its aid. I am also willing to do my best for the Central Plains."

The woman in the red skirt smiled slightly and said:

"You came here, aren't you planning to deal with the people from Wuji Dengtian Palace?"

"They have caused you a lot of trouble recently."

Lin Tianhao shook his head and said:

"My original intention for coming to Zhongzhou Continent was not to deal with them. The conflict between me and Wuji Dengtian Palace can be dealt with after I have dealt with the fog monster."

"Oh?"

The woman in the red dress was a little surprised. "This is different from what was rumored."

"rumor?"

"I wonder what I'm like in the rumors?" Lin Tianhao asked.

"Your reputation in the rumors is not very good. You are greedy, lustful, vindictive, cold-blooded and ruthless. There are all kinds of things about you, but few people praise you."

Lin Tianhao was not angry and said:

"It's almost the same. I'm not a good person. I'm greedy and lustful by nature. Not being greedy and lustful is not a good thing. Only fools are not greedy and lustful."

"To take revenge for a slight offense is to follow one's heart. To endure being bullied in silence is something that only cowards and weak people would do."

"Cold-blooded and ruthless, that's a bit of a slander. I'm very generous to my own people. I'm ruthless only to my enemies."

"I would rather let the world down than let the world let me down!!"

When the woman in the red dress heard this, she couldn't help but nodded.

"There is nothing wrong with what you said. Let me introduce myself. My name is Lie Hongyu, Lie Fusheng's eldest sister. People outside call me Emperor Hongyu."

Lin Tianhao raised his eyebrows but said nothing.

Lie Hongyu continued:

"My brother has just told me about your situation through voice transmission. If it is true as you said, then we can give it a try."

"but."

"According to our calculations, the health recovery of these fog monsters should be no less than 60 quadrillion per second."

"It's difficult to achieve what we set out to do."

Lin Tianhao looked at Lie Hongyu meaningfully and said:

"What if there are a few strong men at the God level who can help?"

"God... Godly realm!!"

Even a powerful emperor like Lie Hongyu showed astonishment on his face when he heard Lin Tianhao talking about the realm of divine quality.

Divine product!!

These are two very simple words, but anyone who has a little understanding of them knows the special meaning behind them.

"Can you ask a strong man at the Divine Level to take action?"

Lie Hongyu still found it a little unbelievable.

In the entire Ragnarok, there should be no strong people at the level of God.

Even if there is.

It is highly likely that they will not take action. They can go to the divine realm to pursue a higher realm.

"I'm just saying that." Lin Tianhao waved his hand.

"The simplest way is to upgrade my rank. If my rank can be upgraded once more, I will be able to inflict more than 500 trillion DPS."

"If the grade is upgraded twice more, the damage I can deal may even reach tens of trillions."

Lie Hongyu took a deep breath. A man at the seventh level told him that he could possibly deal tens of trillions of damage. This sounded like alarmist talk.

"Rank +1, belongs to the special mission, I don't have it."

Lin Tianhao was stunned for a moment. "As a strong man at the level of the Great Emperor, you don't have a mission of level +1?"

"No."

Lie Hongyu's answer was very affirmative, which made Lin Tianhao feel a little cold.

Chapter 1467 Black Qilin, Black Qilin Water!

"You don't have it, but there should be someone you know who has it, right?" Lin Tianhao asked.

Lie Hongyu hesitated to speak, but finally nodded and said:

"I do know that there is someone who has a mission of level +1, but..."

Seeing the change in Lie Hongyu's expression, Lin Tianhao already had a guess in his mind.

"But he is from Wuji Dengtian Palace, right?" Lin Tianhao asked.

Lie Hongyu smiled bitterly and nodded, "Yes, given your relationship with Wuji Dengtian Palace, it's a bit of a pipe dream to expect them to give you such a mission."

Lin Tianhao chuckled and said:

"Now in the Central Plains, fog monsters are rampant. Given this opportunity, why can't we cooperate?"

Lie Hongyu nodded, "Yes, we can cooperate, but Wuji Dengtian Palace will help you grow. After solving the fog monsters, you will still destroy them."

"With such an irreconcilable hostility, how could they possibly give you such a reward?"

Lin Tianhao thought for a moment and said:

"The others?"

Lie Hongyu shook his head and said:

"I don't know anything else."

"There are too few missions like this, and not everyone will share missions with each other."

Hear this.

Lin Tianhao couldn't help but ask:

"The people from Wuji Dengtian Palace are discussing the mission rewards with you, is it because you have a good relationship?"

As soon as Lin Tianhao said this, Lie Hongyu inexplicably felt an invisible pressure.

It was as if this adventurer in front of him, who was only at the seventh level, could take his life at any time.

This feeling of oppression made him very uncomfortable, and he even thought that if he said something wrong next, Lin Tianhao would kill him.

"There are only a few great emperors in Zhongzhou. As long as they are not enemies, they will communicate with each other."

"I just happened to know this."

Lin Tianhao grinned and said:

"You don't need to explain so much to me. After all, you are a strong man at the level of a great emperor. You should have the character of a great emperor."

Hear this.

Lie Hongyu smiled slightly and said:

"What kind of character is this? I just feel that when I face you, Xue Di, I have an indescribable sense of intimacy."

Lin Tianhao nodded and said:

"Is that so? That's great. If you don't mind, you can join our Fan Palace. How about I give you the position of deputy palace master?"

Lie Hongyu waved his hand, "Xue Di, I am the master of one faction myself, and it is not appropriate for me to join other factions."

That's it.

Lie Hongyu changed the subject and his expression became serious.

"It's not possible here at Wuji Dengtian Palace, I can help you ask other people, maybe they have a task with such a reward."

"After all, such special rewards are not limited to those at the level of Great Emperor. Perhaps some people below the level of Great Emperor also have such tasks."

What Lie Hongyu said seemed to make sense, but when Lin Tianhao heard it, he felt that Lie Hongyu was just trying to reassure him.

"Or, you should introduce me to someone else. I still want to meet the great and powerful emperor of Wuji Dengtian Palace." Lin Tianhao said.

Hear this.

Lie Hongyu was shocked. She always felt that Lin Tianhao wanted to meet the powerful emperor of Wuji Dengtian Palace in order to kill the powerful emperor of Wuji Dengtian Palace.

"Don't worry. Although I am a decisive killer, I won't kill just anyone."

"and."

"I definitely cannot implement the plan I proposed by myself. It would be best to discuss it with the other powerful people in the Great Emperor Realm in your Zhongzhou. This will be good for everyone."

Lie Hongyu nodded and said:

"You are right, but because of the fog, we have lost the ability to send messages remotely."

Lin Tianhao frowned slightly. Before he could say anything, Lie Hongyu said:

"How about this, you stay here for a while, and I'll arrange for someone to go out and notify them."

Lin Tianhao frowned. Lie Hongyu seemed to be polite to him, but whether someone who had reached her level was an enemy or a friend could not be determined from superficial conversation.

However, as he had just arrived, it would still take him a lot of effort to find other powerful men at the level of the Great Emperor.

Instead of wasting time like that, it would be better to let Lie Hongyu do the notification.

this time.

He can just take in the fog monsters and earn more free attribute points.

Because if the damage transfer plan is successful, it means that it will be difficult to find these fog monsters and contain them in the future.

"Okay, as soon as possible." Lin Tianhao said.

After coming out of the secret realm, Lin Tianhao went straight out of the city to contain the fog monster.

"Sand Sea Poison Emperor, where is your old friend?" Lin Tianhao asked.

The Poison Emperor of Sand Sea smiled awkwardly and said:

"I really don't know. As you know, the entire Central Plains has undergone tremendous changes. I don't know where he is."

"and."

"If I go to him in my name, it will most likely cause him trouble."

"What's his name?" Lin Tianhao asked.

"Mo Linshui, his true form is a Mo Qilin. When I separated from him, he had already reached the peak of the Emperor level. It would not be surprising if he has reached the Great Emperor level now."

"But when I was asking about the situation in Zhongzhou Continent, I had already done some research. There is very little information about Mo Linshui. I only know that he hasn't made a move in Zhongzhou Continent for a long time, and few people know his whereabouts."

Lin Tianhao frowned. If that was the case, then it would be quite troublesome. There was no news at all.

"Actually, sir, I think you can kill Lie Hongyu and put him on the Conferred God List. That way, you will be able to know almost all the information about the entire Zhongzhou continent."

Lin Tianhao shook his head and said:

"Killing Lie Hongyu rashly will affect my plan to catch them all in one fell swoop."

"Since we are going to take action, we must kill as many powerful people in the Great Emperor Realm as possible."

That's it.

Lin Tianhao paused slightly.

"and."

"If I kill those powerful emperors now, and then take in these fog monsters, who will reward me?"

Lin Tianhao was more focused on his journey before, and did not deliberately take action to capture the fog monsters. If he had deliberately taken action against the fog monsters, the number of fog monsters he could capture every day would definitely not be low.

Next.

Lin Tianhao began to look for fog monsters, and he took in all the fog monsters he found without exception.

and.

This process does not require Lin Tianhao to take action himself. He can gain enlightenment or use the fog monster to stack his health.

but.

Lin Tianhao still wants to attain enlightenment.

Because he has no shortage of health points now, what he really lacks is the understanding of the Tao.

His control over the Tao is still too weak compared to his current attributes.

Chapter 1468: Avenue of Space: The 4th Level of the State of Asking for the Way!

This is another reason why Lin Tianhao rarely uses Tao when fighting.

Because the level of his Tao is too low, it can only play a small role in his current battle.

The power that can be talked about is the foundation, and most other powers can be destroyed from the root.

For example, the physical transformation, even Lin Tianhao's hand of heavenly punishment could not escape.

Not only that.

The damage reduction effect of physical transformation is still outrageous.

The improvement of Tao is theoretically endless.

and.

Tao is also one of the few means that can continuously improve one's grade.

The skill levels of most other attacks, skills, and magical powers are fixed.

The skill level cannot be upgraded, and as time goes on, the effects of these skills will become worse and worse.

For example, Lin Tianhao's lightning jump has a very high triggering probability, but many high-level creatures are not affected by lightning jump.

even.

Lin Tianhao's god-level skills such as Frozen Heart and Origin Burning are basically useless when facing opponents of too high a level.

This is because the skill level is not high enough, so it will not be convenient to use later.

It can be said differently.

The power of Tao can improve its rank in the process of continuous upgrading.

The Dao of the Heart Realm is far inferior in rank to the Dao of the Law Realm.

The Tao in the realm of asking for the Tao is far inferior to the Tao in the realm of Tao.

Lin Tianhao still continued with his previous idea, first reaching the extreme in one path and pursuing perfection.

Before, Lin Tianhao had already comprehended the Great Dao of Space to the eleventh level of the Asking Dao Realm. Now he can continue to comprehend along the Great Dao of Space.

In the blink of an eye.

Half a month passed.

Lin Tianhao suddenly opened his eyes, with a look of disbelief in his eyes.

Because the Unity of Heaven and Earth had cooled down in the past half month, Lin Tianhao used the Unity of Heaven and Earth.

But the result was that he reached the unprecedented 14th level of the Asking Dao Realm! !

When Lin Tianhao comprehended the great way of power in front of Emperor Fusheng, he reached the twelfth level of the realm of asking for the Tao and took another step forward to achieve the realm of Tao.

But this time.

When I was comprehending the avenue of space, this unexpected change occurred.

This... made Lin Tianhao feel a little bit unbelievable.

When he comprehended the great way of power before, Lin Tianhao felt that everything was natural, as if there was a divine will guiding him.

After the Avenue of Strength reached the twelfth level of the Asking Dao Realm, there was no feeling of strangeness, and it naturally reached the first level of the Asking Dao Realm.

However, on this avenue of space, when Lin Tianhao was enlightened, he always felt that there was a mysterious power enveloping him.

This Dao realm broke through the twelfth level, then broke through the thirteenth level, and now reached the fourteenth level! !

The most crucial thing, and the one that makes Lin Tianhao shudder the most, is this.

Lin Tianhao could feel that his spatial avenue seemed to have not yet reached the end in the realm of asking for the way.

Judging from this, it is possible for him to reach the fifteenth level of the spiritual realm through his spatial avenue.

"Do you know what's going on?" Lin Tianhao asked.

Hei Tian Ao Zhen shook his head repeatedly and said:

"The fourteenth level of the Dao Realm. I've lived for so many years, but this is the first time I've seen it. No, let alone seen it. I've never even heard of it before."

The voice of the Poison Emperor of Sand Sea was also very surprised.

"Sir, I am increasingly suspicious that you are the reincarnation of some super powerful being. Otherwise, the situation happening to you is really hard to explain."

"You are too ridiculous, you are at the fourteenth level of the Dao Realm!!"

"Ned Lifu, what about you? After all, you were once a strong man in the realm of God King, so you should know." Lin Tianhao said.

The projection of Ned Leef appeared in front of Lin Tianhao, her expression extremely solemn.

"I've heard of the thirteenth level, but I've also heard that the twelfth level can be reached by someone with incredible talent. But the thirteenth level, no matter how incredible your talent is, how monstrous your aptitude is, or how powerful your lineage is, is impossible to reach."

"Those who can reach the thirteenth level are all the reincarnations of super powerful beings above the saint level. Only with the blessing of the saintly karma in the previous life can they comprehend the thirteenth level."

It would have been better if Ned Lev hadn't said anything.

Her words shocked Shahai Poison Emperor, Heitian Aozhen and others even more.

This is a bit unbelievable!!

"The senior said it was the thirteenth floor, but sir, this is... the fourteenth floor!!"

Hei Tianaozhen's voice was trembling a little when he spoke.

"so....."

Hei Tianao really didn't dare to continue.

"Your Excellency is the reincarnation of a super-powerful being above the Saint Realm!!!"

The Poison Emperor of Sand Sea took over Heitian Aozhen's words and spoke in the same shocked tone.

"I have previously speculated that you are not as simple as you seem. I even suspected that you might be the offspring of a certain God Emperor or even a Saint."

"But now it seems that you are not a saint of the second generation. You are a saint yourself."

Listening to their words, Lin Tianhao couldn't help but smiled awkwardly and said:

"I'm probably not the reincarnation of a powerful being. If I were, and had grown to where I am now, I would have awakened some memories of my past lives."

"But I don't have it!!"

Lin Tianhao does have memories of his past life, but in his previous life he was a little Karami, a little Karami who struggled at the bottom of society and tried to survive carefully.

"It's hard to say. The more powerful one is in the previous life, the longer it will take to awaken the memories of the previous life."

"If you were an ordinary god in your previous life, you may be born with strange visions when you are reincarnated and have the blessing of cultivation techniques in your mind."

"If you were a Divine King in your previous life and were reincarnated to cultivate again, you might be born ordinary. You need to grow older and have your talent tested before you can awaken some of your cultivation memories."

"By analogy, the higher the realm, the later it will be to awaken the memories of the past life."

"Otherwise, if the saint's reincarnation directly causes strange phenomena in heaven and earth, then the enemies will come immediately after hearing the news."

Hei Tian Ao Zhen said from the side:

"Isn't it the same with reincarnation of gods?"

Ned Lifu didn't even need to answer this question, the Sand Sea Poison Emperor said:

"There are so many gods, even in this world abandoned by the gods and belonging to the era of the emperor's fall. In the past, if any super power did not have 100,000 heavenly soldiers and generals, it would be embarrassed to call itself a super power."

Hei Tianao smiled awkwardly, "It's funny too."

Lin Tianhao waved his hand and said:

"We'll know this later. How many fog monsters have you taken in during this period?"

These fog monsters all have free attribute points. Lin Tianhao still trusts the Sand Sea Poison Emperor and the Burning Heart Nightmare together.

Seeing that Lin Tianhao took the initiative to change the subject, the Poison Emperor of Sand Sea and the others did not say much.

"Sir, the harvest was not very rich. A total of 298 fog monsters were captured."

Chapter 1469 Devouring each other, super high conversion!

Lin Tianhao's eyes lit up. Two hundred and ninety-eight was indeed not a lot, but this was the result of half a month's shelter.

These fog monsters are not fools and will run away when they encounter danger.

In addition, their levels are basically above the ninth-level platinum level. If they discover the danger in advance and run away in advance, it will be very difficult to contain them.

"Have you found anything unusual in the past half month?" Lin Tianhao asked.

Burning Nightmare thought for a moment and said:

"There are no abnormal situations. The only thing worth mentioning is that the relationship between the fog monsters is not as simple as we think."

"We have encountered situations where fog monsters devoured each other and became greatly enhanced in a short period of time."

"For normal devouring methods, being able to absorb 5% of the target's power to permanently enhance oneself is considered very powerful."

"But we estimated before that the fog monster can devour the fog monster and plunder about 30% of its power to strengthen itself."

"It's a permanent enhancement."

Burning Heart Nightmare emphasized again.

When Lin Tianhao heard these words from Fenxin Mengyao, he couldn't help but gasp.

Just as Burning Heart Nightmare said, this kind of devouring transformation is very terrifying.

The Future Chamber of Commerce can also convert 30% of the attacks it endures, but that 30% will not permanently improve the Future Chamber of Commerce.

It's more like a compressed spring that can bounce back after being compressed.

After devouring the target unit, it can permanently improve itself, just like a spring that becomes tougher and stronger after being attacked.

Similar to the future Chamber of Commerce, not only will it not become more resilient, but it will also become more and more dangerous because of too much transformed power.

"Actually, I think that's what happened when the fog monsters started devouring each other."

The Sand Sea Poison Emperor took over the words of Burning Heart Nightmare and said with a little seriousness:

"Because in the past twelve days, we haven't encountered any cases of fog monsters devouring each other."

"But in the past three days, we have encountered fog monsters devouring each other five times."

When Lin Tianhao heard this, his expression became a little unnatural.

"I just discovered this recently. This growth method of big fish eating small fish is very scary."

"Is there any limit to their mutual devouring?" Lin Tianhao asked.

For example, a fog monster can only be devoured once, or the cooling time for this devouring is very long, and a longer interval is required before devouring it a second time.

"do not know."

Burning Nightmare shook his head. "This was only discovered recently. We don't have much data yet. Unless we use the monsters we have contained to conduct experiments."

Lin Tianhao nodded slightly, and he immediately put the two fog monsters into a golden box.

As expected, the two fog monsters started fighting, and then one of them was swallowed.

and.

The fight between fog monsters is simple, just like a simple contest of strength, if you can't win, you will be eaten.

It would be more accurate to say that he slurped noodles rather than ate them. He opened his mouth and sucked the other fog monster into his mouth.

however.

The aura of the fog monster that had devoured its companion began to rise noticeably.

And after climbing up, there is no sign of falling back.

"It shouldn't recede. We once contained a fog monster that devoured our companions, but it has been three days and its aura hasn't receded."

Burning Heart Nightmare saw what Lin Tianhao was observing and couldn't help but explain it to Lin Tianhao.

"Come again."

Lin Tianhao put in another slightly weaker fog monster.

He just wanted to see whether this fog monster that had devoured his companion could continue to devour other fog monsters.

What happened next made Lin Tianhao's face turn very ugly.

Even the Burning Heart Nightmare, the Poison Emperor of the Sand Sea, and Hei Tian Ao Zhen had extremely serious expressions.

It was because the golden box contained a fog monster that had just devoured its companions, so it devoured all the newly imprisoned fog monsters.

Continuous Devouring!!

This kind of devouring can greatly plunder the attributes of companions and can be released continuously.

What does this mean?

Lin Tianhao suddenly thought of a question.

Those are the fog monsters that Nulong City has taken in, all imprisoned in a secret realm.

Does this mean...

The fog monsters in the secret realm can devour each other and continue to grow! !

possible.

In that secret realm, there was only one fog monster left, an extremely terrifying fog monster! !

Lin Tianhao shuddered just thinking about it.

Just as Lin Tianhao was thinking this, Burning Heart Nightmare immediately controlled the golden chariot to drift.

Followed by.

Then a stone man dragging a huge axe was seen walking towards the golden chariot.

"The fog monster has started to actively attack the golden chariot?!"

Lin Tianhao glanced at Burning Heart Nightmare, obviously wanting to know the answer from Burning Heart Nightmare.

After all, Lin Tianhao knew before that these fog monsters would stay away from the golden chariot.

"No, this is the first time."

The axe that the stone giant just swung was obviously intended to destroy the golden chariot.

"I come."

Golden chains flew up and flew towards the stone giant.

The soul power of the Burning Heart Nightmare was extremely damaged. He controlled the golden chains, which turned into streams of light, sweeping in all directions.

The stone giant swung his axe, trying to block the golden chains.

He looks huge, but his movements are not slow at all.

The giant axe hit a golden chain and cut it in half.

He was also shaken back by the power of the golden chain.

"Gold still has a counteracting effect on it."

The Burning Nightmare spoke slowly, and the other golden chains had already entangled the stone giant.

"I'm afraid it's not that simple."

The face of the Poison Emperor of Sand Sea darkened slightly, because the stone giant did not surrender after being entangled by the golden chain, and he was still struggling.

The enormous force caused cracks to appear on the golden chain.

Gold is not a particularly indestructible metal. The reason it was able to contain monsters before was that the monsters would basically not resist after being suppressed by gold.

It is even defined as being unable to resist.

after all.

Given the power level of these fog monsters, if they resist, gold is so tough that they can break through it with just a little effort.

But they didn't do that, which is worth pondering.

"Have they developed an immunity to gold?"

"Or is it because they devoured each other?"

The aura of this stone giant is indeed stronger than some of the monsters that Lin Tianhao had taken in before, but in terms of how much stronger it is, it is actually not much stronger.

Chapter 1470 You look so attractive like this!

"Ned Liv, do you know what's going on?"

Although both the Burning Heart Nightmare and the Poison Emperor of the Sand Sea are very powerful, when it comes to being knowledgeable and experienced, it must be Ned Leef.

After all, Nidlifu was once a powerful being in the realm of God King, so she must know more than ordinary people.

"do not know."

Ned Lev's answer was very straightforward.

"But the situation you are facing now is even more terrifying. These fog monsters are a community of life."

"Because apart from a community of life, it is almost impossible for such an outrageous engulfment conversion rate to occur."

"The only explanation is that they are of the same origin, or even once a whole."

Hear this.

Burning Nightmare seemed to have thought of something and said slowly:

"Have you ever heard of the legend of the God of Creation?"

"The God of Creation?" Lin Tianhao raised his eyebrows. What kind of mythological system is this?

"Rumor has it that a long, long time ago, there was only one person between heaven and earth. He held up the sky with his head and stepped on the earth with his feet. His realm and strength were unknown. When heaven and earth were in chaos, he held up the heaven and earth."

"What you said is a bit like Pangu creating the world." Lin Tianhao said.

It seems that there are similar legends in the parallel world.

"There is a key point. After the death of this unknown being, his body turned into all things in the world, including all kinds of living beings."

"Therefore, we respect them as the gods of creation."

When Lin Tianhao heard what Burning Heart Nightmare said, he understood what Burning Heart Nightmare wanted to express.

"You mean, this fog and these fog monsters are a whole."

"It's just that this whole died and dispersed into these mists and mist monsters."

"right!!"

Burning Nightmare nodded heavily, "I think this possibility is still very high."

"Because of the special nature of these fog monsters, they are very unusual no matter how you look at them."

"If we say they are a group, I also think that their phagocytic conversion rate is hard to explain."

"The best explanation is that they are a whole."

Ned Liv took a deep breath and said:

"Burning Heart Nightmare, do you know what this means?"

"The weakest of these fog monsters has the power of the ninth level platinum. What kind of existence is this whole being when it is alive?"

"The Saint realm is definitely not enough. Heavenly Saint? Or above Heavenly Saint? Or even a higher realm?"

Burning Nightmare shook his head and said:

"Isn't it obvious?"

"Sir, we have some saint-level methods. If these fog monsters are not powerful, we can kill them directly."

"and."

"It is not impossible for a Heavenly Dao Saint-level attack method to appear in the entire Zhongzhou Continent."

"You should know what I mean."

Niederlif was silent.

Although she didn't want to admit it, she seemed to have to admit that these fog monsters were really terrifying.

"Now is not the time to think about these things. Something might happen in Nulong City."

"The fog monsters they imprisoned in the secret realm level may break the secret realm from the inside."

"There may still be monsters wreaking havoc outside the city." Heitian Aozhen said.

Burning Heart Nightmare shook his head and said:

"It shouldn't be that bad. Maybe some people hiding outside the city and using the Golden House to survive will encounter a disaster."

"But the city should still be safe for the time being."

Lin Tianhao waved his hand and said:

"It's almost time. Let's go back and take a look. Submit these fog monsters first. They will be transformed into rewards later."

Burning Heart Nightmare controlled the golden chariot and headed towards Angry Dragon City.

We also encountered more than a dozen fog monsters on the way.

"These fog monsters really don't seem to be afraid of our golden chariot. We haven't encountered so many fog monsters before." said Burning Heart Nightmare.

It should be a happy thing that more fog monsters were accommodated.

But now Lin Tianhao couldn't be happy at all.

Because the Zhongzhou continent may really be facing a catastrophe of epic scale.

Wait until we reach Nulong City.

The number of fog monsters that Lin Tianhao has taken in has reached three hundred and twenty.

Along the way, Lin Tianhao encountered fog monsters more and more frequently.

Some of them were fighting and devouring each other, while others were directly attacking Lin Tianhao's golden chariot.

However, although they are more powerful than before, all beings are equal when they come to Lin Tianhao.

Not to mention the Burning Heart Nightmare and the Poison Emperor of Sand Sea, even Hei Tianao, who is half a step away from being a god, can easily defeat them.

Angry Dragon City.

Lin Tianhao arrived at the secret entrance of the Nulong City Lord's Mansion with ease.

Perhaps because Lie Hongyu had already given instructions, Lin Tianhao entered very smoothly.

When she saw Lie Hongyu, she was still the same as before, with no discernible change.

"Where are the other powerful emperors?" Lin Tianhao asked.

Lie Hongyu stared at Lin Tianhao for a while and said:

"Don't you know what happened recently?"

"The fog monsters will devour each other and become stronger, and the conversion rate is very high. If the fog monsters I sheltered in the secret realm were not discovered early, they might have caused a disaster."

Lin Tianhao nodded and said:

"Found it. What's going on? You've been dealing with fog monsters for a long time. Do you have any experience in this area?"

"Absolutely not."

"Originally, two great emperors had come, but because the fog monsters devoured each other and evolved, they both left."

Lin Tianhao hesitated to speak.

Lie Hongyu said helplessly:

"I asked for you, and they don't have any quests of level +1. They are too rare."

Lin Tianhao remained noncommittal. It was hard to say whether he had nothing or was just unwilling to take it out.

"Then I'd better submit the task first." Lin Tianhao directly submitted the fog monster he had captured.

Three hundred and twenty fog monsters, that's three million, two hundred thousand free attribute points.

"Okay, I'll continue to contain the monster."

It's very satisfying to earn these free attribute points, and it would be a waste if Lin Tianhao didn't make some.

If you miss this village, it will not be easy to find a task that can easily gain free attribute points.

"Come on." Lie Hongyu said.

That's it.

Lie Hongyu continued:

"But you still have to be careful. These fog monsters are changing faster and faster. Someone who can threaten you might appear."

Lin Tianhao frowned and said slowly:

"If something happens to me, you may not be able to leave Zhongzhou alive."

"No kidding."

Lie Hongyu glanced at Lin Tianhao meaningfully and said:

"You are still so confident, as if everything between heaven and earth is under your control."

"You look so attractive like this."
