

O games 1801

Chapter 1801 is stuck, a new way out!

The Evil Emperor's tone was calm, but it was like a sharp blade, striking deep into Lin Tianhao's heart.

Although he didn't want to admit it, the current situation seemed to be moving in that direction.

"This means it's a dead end for you."

The evil emperor said helplessly:

"The elite adventurers will be the core force in dealing with those guys in the Alete galaxy later."

"With this move by the Alet Galaxy, if you hold on and fail to become gods, the level and equipment of the elite will continue to decline."

"On the contrary, if the elite choose to become gods, after the fusion, you will lack the power of the elite."

"It is difficult to turn the tide relying only on a few top adventurers and those ordinary adventurers."

have to say.

What the evil emperor Wudao said is absolutely right.

"Perhaps, this is the only option left."

"If we allow the gods to intervene, our galactic world will not be able to go very far."

"Except for a few top adventurers who can contend with the gods in the Alate galaxy, the others, even the elites, are nothing but cannon fodder," said Lin Tianhao.

The Evil Emperor Wudao shook his head and said:

"Except for you, most people in the galaxy world are probably cannon fodder."

"I don't know how many people will die this time."

Lin Tianhao hesitated for a moment and asked:

"Senior, don't you really consider staying and helping us?"

The evil emperor Wudao is very strong.

Very very strong.

If the Evil Emperor Wudao is willing to stay, they will have a better chance of winning when facing the Alite Galaxy.

"I can't stay."

The Evil Emperor Wudao shook his head and said, "If I'm not here, I'll let those evil people under my command stay and they'll just be cannon fodder."

Lin Tianhao was not surprised to hear these words.

"alright."

"Now that the mission has been completed, I'll trouble you during this period of time."

Lin Tianhao bowed and said, "Maybe I should go do something."

"The Milky Way is already weak, and we can't let those guys from the Alite Galaxy continue to mess around like this."

The Evil Emperor Wudao hesitated to speak, but after a while, he finally spoke:

"Someone should have told you this before, and I want to say it now."

"The Galaxy World has little chance of winning. This defense war will not have a good outcome if we fight to the end."

"Just like when I was in Heaven, after the old Heaven left the stage, from my point of view, Heaven was a lamb to be slaughtered, and the few tricks it used were just to reduce losses."

"Now... maybe you are the same."

Lin Tianhao took a deep breath and said calmly:

"I know, but I'm going to do it anyway."

"This is something that there is no choice about."

The Evil Emperor Wudao nodded and said, "Young people, you have to fight hard. If you surrender without a fight, you may develop a demon in your heart in the future."

"It's just that it's probably difficult to use your Heavenly Dao-level Talent Awakening Stone successfully."

"That thing is one of the three cornerstones of the Galaxy World. The powerful people in the Galaxy World will not allow you to use it. Those who are eyeing this piece of fat meat in the Galaxy World also don't want you to use it."

Lin Tianhao smiled bitterly, "But I have to use it."

His job change to Sky Punishment Archer is stuck now. If his talent awakening gets stuck again, it seems that he has no choice but to change to World-Destroying Mechanic if he wants to improve his strength.

But the reason why the Sky Punishment Archer is so powerful in Lin Tianhao's hands is because this hidden profession complements Lin Tianhao's Sky Punishment series of talents.

The World-Destroying Mechanic might not be that powerful.

Even so.

If there is no way to improve your strength in the future, then you can only start with the super god-level hidden profession of World-Destroying Mechanic.

After all, Lin Tianhao has basically improved his strength in all aspects that he can.

The only thing left to improve my strength, besides the Heaven Devouring and Earth Devouring Techniques, is the World-Destroying Robot.

As for enlightenment.

Lin Tianhao has attained enlightenment on his own, so there is no need for him to attain enlightenment himself.

As for the Sky-Swallowing and Earth-Devouring weapons, they stack up basic attributes. If the opponent is too strong, even if the basic attributes are slightly higher, it will not be of much help.

Some core skills are still required, and as a super god-level hidden profession, the skills that come with the World-Destroying Mechanic are still of a very high level.

"I may be leaving soon, please take care of yourself."

The Evil Emperor Wudao smiled at Lin Tianhao and then disappeared.

Send away the evil emperor Wudao.

Lin Tianhao looked at the Heavenly Grade Talent Awakening Stone in his hand, feeling somewhat annoyed.

"use!!"

"Ding, you are using the Heavenly Dao Level Talent Awakening Stone, friendly reminder..."

"use!!"

"Ding, you are using the Heavenly Dao Level Talent Awakening Stone, friendly reminder..."

.....

Same as before.

As long as he uses this Heavenly Level Talent Awakening Stone, there will be such a prompt.

However, he was never able to successfully use this Heavenly Grade Talent Awakening Stone.

Lin Tianhao couldn't help feeling a little headache.

I got the Heavenly Level Talent Awakening Stone, but I can't use it.

Lin Tianhao locked the Heaven-Devouring and Earth-Devouring Sword on the ancient bronze coffin.

"Ding, you are devouring unknown metal, comprehension +10000, magic resistance +20000, armor +20000, free attribute points +20000."

"Ding, you are devouring unknown metal..."

.....

This Heaven-level Talent Awakening Stone cannot be used for the time being, so Lin Tianhao can only settle for the second best and choose to improve his own understanding first.

It would be good if his comprehension could continue to improve and he could comprehend a few more heavenly laws of power.

At least.

Some recent battles.

Lin Tianhao could already feel quite clearly that the heavenly-level laws of space were more useful than other laws.

The inner world.

Lin Tianhao came here and found Kui Wei Changtian.

Kui Wei Changtian sensed Lin Tianhao's breath and walked out of his iron castle.

"grown ups."

"Have you finally remembered that you have a super god-level hidden profession?" Kui Weichangtian looked at Lin Tianhao with a smile.

Lin Tianhao smiled helplessly and said, "I was too busy before. Now I want to take some time out from my busy schedule to change my job to World Destroyer Mechanic."

"You know the requirements for becoming a World-Destroying Mechanic, which requires super-god-level mechanical materials. I don't have any of them either," said Kui Weichangtian.

"There may be some in Mokesha Country. You can try your luck there."

Lin Tianhao nodded slightly and said:

"You are not originally from our Galaxy World. A catastrophe is about to happen in the Galaxy World. Do you want to stay there?"

"Isn't it up to you, the adults, to decide whether I stay or go?" Kui Weichangtian said with a smile.

"My Lord, are you going to let me leave?"

Lin Tianhao hesitated for a moment and said:

"I definitely don't want you to leave. A late-stage mechanic's battlefield support capabilities are unmatched by ordinary professionals."

Kui Wei Changtian nodded, "That's it. If you want me to stay, I'll stay!"

Chapter 1802 The Lord of Qingtian Source appears, Lin Tianhao's request!

Lin Tianhao hesitated for a moment and said, "I promised you before that I would do my best to help you change your job. Now... it's the same."

"You stay with me from now on. I will take you to find super god-level mechanical materials."

Lin Tianhao is only at the first level of World-Destroying Mechanic, this level is too weak.

With only six months left, it was somewhat difficult for him to reach the twelfth turn.

and.

Any profession requires certain operations.

Although Lin Tianhao is very capable now, he is not familiar with the profession of mechanic.

And now he starts looking for super-god-level mechanical materials to see how far he can grow in the end.

Lin Tianhao didn't know either.

Nine turns?

Ten turns?

Or higher?

But if he can reach the ninth and tenth turns, then Kui Wei Changtian can basically reach the twelfth turn.

When a super god-level hidden profession reaches the twelfth level, its combat power is immeasurable.

especially.

This is a mechanic!!

Mechanic is the most destructive profession in Ragnarok, bar none!!

Even for a mage, the gap between him and a mechanic is huge.

As long as he can train Kui Wei Changtian to the twelfth level, he will have more protection when dealing with the Alate galaxy next time.

"Let's go, let's go to Mokesha Country and ask."

Kui Wei Changtian shook his head and said, "The Mokesha Kingdom probably doesn't have any super-god-level mechanical materials."

Lin Tianhao was slightly startled, then smiled and said, "It seems that you are working hard even when I'm not here."

Kui Weichangtian smiled awkwardly and said:

"I definitely need to work hard. Troubled times are coming. How can I survive without working hard?"

"Then are the super-god-level mechanical materials you have collected now enough for you to complete your next job change?"

"Not enough, still a little short."

Kui Wei Changtian said helplessly, "After reaching the tenth level, changing jobs becomes increasingly difficult."

"Okay, since you are working hard, do you know where to find super god-level mechanical materials?"

"There are some clues, but not enough."

"As far as I know, the land of China developed based on scientific and technological civilization a long, long time ago."

"Later, when technological civilization reached a certain level, it began to ascend mechanically and came into contact with civilizations of other cultivation systems."

"It makes the people of China feel that although mechanical ascension is good, the weakness of the mechanics themselves is also very obvious."

"After that, various professions evolved, and mechanics began to be marginalized in the process of evolution, so that now the number of mechanics is getting smaller and smaller."

"But the former Shenzhou was a technological civilization after all. There must be super-god-level mechanical materials, and the number should be quite large."

Listening to Kui Weichangtian's words, Lin Tianhao couldn't help but nodded and asked:

"I'm not too sure about this. From the few times I know about the creation of gods, there doesn't seem to be any civilization based on technology in the past."

"The first era of god creation was quite long ago. In the second era of god creation, in addition to the birth of some law-based gods, a group of technology-based gods also appeared."

"This group of technological gods created technological civilization and even spread it to the whole world."

Lin Tianhao's eyes narrowed slightly, "You mean that in the second era of god creation, two groups of gods with different directions were born, and among them, one group is a technological god?"

"Yes."

"I am now trying to find this technological civilization."

"I looked up some information, and the final result is that the Pyramid Civilization, the Kingdom of Mekosha, and even the ancient Kingdom of Meko were actually influenced by the Pyramid Civilization and became a complete technological civilization."

Lin Tianhao was stunned.

Pyramid civilization?

Lin Tianhao naturally knew about the pyramids.

The pyramids are not from the Dragon Kingdom, but they are more famous than some important buildings in the Dragon Kingdom.

To be precise.

The most famous building on Blue Planet, the building that most people know about, is undoubtedly the pyramid.

Just when Lin Tianhao wanted to continue inquiring about the situation of the pyramid civilization.

A figure suddenly appeared, as if she had always been there, but Lin Tianhao just saw her now.

Kui Wei Changtian noticed the sudden appearance of the figure, his expression instantly tensed up, and an inexplicable feeling of oppression surged in his heart.

"You are... the Blue Sky Source Master?"

Although Lin Tianhao couldn't see her face clearly, based on his observation of her, he could still roughly know her identity.

The Blue Sky Origin Master nodded gently, "Not bad."

After confirming the other party's identity, Lin Tianhao couldn't help but bow.

"Senior, I am here in person. Do you have any instructions for me?"

Hear this.

The source master of Qingtian spoke lightly.

"You can't use the Heavenly Dao Level Talent Awakening Stone now, I want to make a deal with you."

Lin Tianhao frowned slightly, although Qingtian Yuanzhu had a close relationship with his sister.

But now the identity of the Lord of Qingtian Source is still difficult to clarify, so we naturally have to treat him with caution.

"Senior, the Heavenly Dao Grade Talent Awakening Stone is so precious, I really don't want to trade it."
Lin Tianhao gritted his teeth.

The pressure from the Lord of Qingtianyuan was still very great.

"If you don't take it out for trading, the Heavenly Dao Level Talent Awakening Stone will be of no use."

"You've tried it before. You can't use the Heavenly Dao-level Talent Awakening Stone in Ragnarok."

Lin Tianhao grinned, "Senior, I heard that you look exactly like my sister..."

at this point.

Lin Tianhao was ready to get close to her.

If the Lord of Qingtian Source is willing to help him, perhaps he will be able to successfully use the Heavenly Dao Level Talent Awakening Stone.

"You said this because you probably want me to help you use the Heavenly Dao Level Talent Awakening Stone."

The Lord of Qingtianyuan saw through Lin Tianhao's thoughts at a glance.

"Your idea is a little naive. Your sister and I do have a close relationship, but there are many people watching the Galaxy World right now, and I can't help you."

"Even if I want to help, I can't help you."

Lin Tianhao sighed helplessly, "So, this Heavenly Dao Grade Talent Awakening Stone is trash to me."

"You can't say that."

The Blue Sky Origin Master shook his head and laughed:

"At least....."

"You can still take it out and make a deal with me. I believe that what I have can impress you."

That's it.

The Blue Sky Origin Master paused for a moment before continuing:

"For example... your two good brothers, I can eliminate the soul seeds in their bodies."

Lin Tianhao hesitated and said:

"Your conditions are somewhat tempting, but since it is a deal, I also want to talk to you, Senior."

"I wonder if Senior can let me use this Heavenly Dao Grade Talent Awakening Stone."

"As a price, I am willing to use this equipment as a bargaining chip and trade it to Senior."

Chapter 1803: Western Fengzhou, no-man's land!

While saying this.

Lin Tianhao took out the Evil Tomb Dividing Ruler.

See the evil tomb in Lin Tianhao's hand.

The gaze of the Blue Sky Source Master fell on the Evil Tomb Dividing Ruler.

"This thing is good, but it is of no use to me."

Lin Tianhao frowned slightly. "Eternal-level things are of little use to the seniors, so shouldn't Heaven-level things be even more useless?"

"Whether it is useful or not depends on one's own needs."

Lin Tianhao pondered for a moment, "Give me the Space-Time Training Pagoda, and I will give you the Heavenly Dao Level Talent Awakening Stone."

Hear this.

The Blue Sky Origin Master smiled and shook his head, "You, how dare you bring that up? The things in the City of Disasters are not mine, so how can I give them to you?"

"In that case, I still don't want to trade." Lin Tianhao said.

The Blue Sky Origin Master nodded and said:

"I respect your decision. Before Ragnarok merges with reality, you can call my name if you change your mind."

Lin Tianhao nodded. He wanted to ask the Source God of Tao, but before he could open his mouth, the Source God of Qingtian had already left.

"Where is the pyramid civilization you are talking about?" Lin Tianhao asked.

This pyramid civilization is very well-known, but Lin Tianhao still doesn't know the details.

"According to the information I have learned, the pyramid civilization seems to be in an uninhabited area in the west of Fengzhou."

"but."

"No matter where the headquarters of the pyramid civilization is, the area that can be developed is very wide. The entire land of China, the five continents, even the Heavenly Palace, and some planets in the sky, all have some traces of the pyramid civilization."

Lin Tianhao was a little surprised. Was this pyramid civilization ever so prosperous?

"I haven't even heard of it." Lin Tianhao said.

He had heard of the pyramid civilization on Blue Star, but after coming here, he had never heard of the pyramid civilization.

"It's normal that you haven't heard of it, because according to legend, this pyramid civilization only existed during the Second Age of God Creation. After the Second Age of God Creation, it completely disappeared."

"They are not like other eras of god creation, whether it is the super powers like Pangu and Hongjun in the first era, the well-known Western gods like Zeus and Poseidon in the second era, or the gods of the Cthulhu mythology in the third era."

"After their era of creating gods ended, they still existed, or there were legends about them that were widely circulated."

"But the Pyramid Civilization is different. After the second era of god creation, they seemed to have evaporated from the face of the earth and disappeared completely."

Listening to what Kui Weichangtian said, Lin Tianhao was slightly surprised.

"According to what you said, the pyramid civilization was once extremely prosperous and developed to many places."

"How could such a super civilization disappear just like that?"

Kui Wei Changtian shook his head helplessly and said:

"I don't know. I don't have much information. If you hadn't appeared, I would have been ready to go to the western part of Fengzhou to see if I could get anything out of it."

Lin Tianhao nodded and said:

"Come on, I'll go to the western part of Fengzhou with you."

Lin Tianhao used the Starry Sky Step and took one step, and he arrived at the uninhabited area in the west of Fengzhou.

The Starry Sky Step is much more useful than the Kunlun Mirror. Now that we have the Starry Sky Step, the Kunlun Mirror is no longer used very often.

Just a pity.

Only he can wear this Kunlun mirror, otherwise it can be given to other people so that they can use it.

The western part of Fengzhou is an uninhabited area.

Lin Tianhao was a little surprised.

Because his spiritual consciousness was released, there was no human habitation or town within a thousand miles around him.

There are some wild monsters, including some high-level ones.

Within a thousand miles, Lin Tianhao sensed a level 10,000

There are forty-three refresh points.

That's a lot.

Because of the level 10,000 wild monsters, especially those that spawn in groups.

They generally have a strong sense of territory.

Except for a few rare cases, generally only one level 10,000 wild monster will spawn within a radius of 100 miles.

There are forty-three species in this area of a thousand miles, and although they meet the requirements, they are also very rare.

Because you can't have so many just by meeting the requirements.

Apart from these forty-three spawn points of level 10,000 wild monsters, there are no wild monsters below level 2,000 within a thousand miles radius.

It's really strange that there are so many high-level wild monsters in this uninhabited area.

Because the purpose of Ragnarok is to create gods, most of the wild monsters spawn near towns.

There may be wild monsters in some places farther away, but it is unlikely that the situation we are facing will occur.

Unless... there is a mission, a secret realm, or an unopened... city, or ruins.

"looking around."

Kui Wei Changtian smiled at Lin Tianhao, and then Lin Tianhao saw densely packed nanorobots like a tide drilling into the ground and then disappearing.

Countless nano drones also flew towards the distance, spreading out across the sky.

"The mechanic is really awesome." Lin Tianhao couldn't help but sigh.

Kui Wei Changtian smiled and said:

"That's nothing. I have a special assembly line that can mass-produce such nanorobots and nanodrones."

"They are mainly to help me explore whether there are any remains of other technological civilizations nearby."

"After all, most of these high-level civilizations have the means to deceive divine consciousness."

Lin Tianhao nodded slightly.

suddenly.

Lin Tianhao grabbed Kui Wei Changtian, and the next moment, the two appeared in the Gobi Desert.

In front of the Gobi Desert, there is a well. At this moment, an old man is drawing water from the well with a wooden bucket.

This was the first human being Lin Tianhao saw in this uninhabited area.

Lonely Old Man (King Level): Level 19521.

Introduction: A lonely old man lives alone in the vast Gobi Desert. He lives alone and is always unwilling to leave here. It seems that he has some special feelings for this place.

Seeing this lonely old man, Lin Tianhao was a little surprised.

The king grade is not too high.

But for a level approaching 20,000, it's actually worth mentioning.

It is almost reaching the limit of ten turns.

"Hello." Lin Tianhao smiled at the lonely old man.

The lonely old man raised his eyes to glance at Lin Tianhao, then his gaze fell on Kui Wei Changtian.

The next moment.

This lonely old man actually teleported to Kui Wei Changtian.

"It's quite interesting. It's rare to find someone making medium-level combat mechas nowadays."

Hear this.

Kui Wei Changtian was a little surprised, "Senior, do you know the mecha I'm wearing?"

"I know. You have an external mecha. Your body has not been modified by the mecha. You should be a conservative. However, a true mechanic should only retain consciousness and choose mechanical ascension to maximize his combat effectiveness."

Kui Wei Changtian nodded, "Senior, what you said is very true, but I still don't want to abandon this body of mine."

Chapter 1804 Lonely Old Man!

"Your mecha is pretty good. It can be considered a relatively outstanding one among ordinary human mechas."

"But your mecha's computing power is still too low."

"Although we are capable of simulating and deducing the results of battles, if we encounter a true master, our computing power is simply not enough."

Hearing what the lonely old man said, Kui Wei Changtian nodded slightly and said:

"Indeed, I am also thinking about how to improve the computing power, but this thing is too difficult. I don't have the blueprints, and I rely purely on my own research. Although there will be some improvement, the improvement speed is too slow."

"You're alone?" The lonely old man was a little surprised.

"My senior may not have left. Among the mainstream mechanics in today's Shenzhou, I should be a very, very powerful existence."

"It's hard for other mechanics to help me."

The lonely old man shook his head and said, "Indeed, mechanics have long been eliminated now."

"Mechanical ascension and spiritual sublimation sound good, but they are not recognized by the public."

"But without mechanical ascension and soul sublimation, it is impossible to reach the pinnacle of mechanics."

Lin Tianhao listened from the side without interrupting.

This old man is obviously also a mechanic, and should be a mechanic of a higher level than Kui Wei Changtian.

"It seems that senior is also a flesh and blood body?" Kui Weichangtian asked.

Hear this.

The lonely old man nodded gently, "Yes, I am the same as you, I don't want to give up this body."

Kui Wei Changtian bowed and said:

"Senior, are you from the Pyramid Civilization?"

Obviously.

Kui Wei Changtian is ready to get straight to the point.

"Me, I guess so. My ancestors are from the Pyramid Civilization."

"Why did the pyramid civilization disappear?" Kui Wei Changtian asked.

There must be some important reasons for such a prosperous civilization to disappear.

"Mechanical Ascension."

The lonely old man smiled and said:

"We were not originally called the Pyramid Civilization, but... the Tongtian River Civilization. We compared technology to rivers. Studying technology will definitely lead us to the road to heaven."

"The reason why it was renamed the Pyramid Civilization is because a certain mechanical genius developed a pyramid that can receive mechanical signals from distant places."

"Then, in order to explore the source of the signal, this mechanical genius uploaded his consciousness and thoughts to the pyramid database, and transmitted his consciousness through this unknown signal source."

"This is really crazy!!" Kui Wei Changtian couldn't help but sigh.

You don't even know what the source of the signal is, but you dare to do this. Aren't you afraid that the signal you transmit may not be transmitted back?

"It was this transmission of consciousness that became the fuse and a milestone. Later, someone discovered that the world where the signal source existed was a world that was very suitable for mechanics to discover."

"In the following hundred years, people began to ascend mechanically, and some tried to find other signal sources. They began to build pyramids in different locations to receive signals from unknown worlds."

"The final result is that they all completed mechanical ascension, and their consciousness left this world. The pyramid civilization will only be glorious for a short time before disappearing completely."

"Although there are still a very small number of people who are unwilling to leave, when their lifespans are about to end, they all choose mechanical ascension."

Lin Tianhao didn't know what to say.

Is mechanical ascension good?

It seems pretty good.

As long as there is a signal source, the consciousness can continue to exist and will not die.

But if one abandons the body and exists as a pure consciousness, can it still be considered a living being?

Can it be considered an intelligent mastermind with its own thoughts?

Artificial AI?

The lonely old man waved his hand and said:

"Shouldn't you come here to ask more than just questions about the history of Tongtianhe civilization?"

Kui Weichangtian nodded slightly and said seriously:

"Senior, the galaxy world is in danger, I..."

"okay!!"

The lonely old man raised his hand to interrupt Kui Weichangtian's words, "There's no need to use the banner of justice to prepare for this. Just tell me directly, what do you want when you come here?"

"Super god-level mechanical materials!"

Kui Wei Changtian stopped beating around the bush and directly stated his needs.

"They have quite a lot of ambitions. Many people in the Tongtian River civilization have left this world consciously, and many of their things have been left here."

Hear this.

Kui Wei Changtian's eyes lit up and he was slightly surprised.

"But what? If you want to get it, it will probably be difficult."

"Because what they left behind were not only mechanical materials, but also a lot of intelligent masterminds. These intelligent masterminds are constantly learning, evolving, devouring each other, and eliminating each other, eventually forming several super powerful intelligent masterminds."

"They have divided up almost all the mechanical materials of the Tongtianhe civilization. The super-god-level mechanical materials you are looking for are all must-haves for those super brains, and they are unlikely to fall into your hands."

"When several intelligent masterminds are fighting, they should use technological weapons. Why are there no signs of war at all?" Lin Tianhao asked.

The lonely old man smiled and said:

"They are all intelligent mainframes. Even when fighting, they are relatively rational. Under normal circumstances, how could they consume mechanical items in battle?"

"They usually set up a virtual arena and then duel in the virtual arena to compete for the ownership of some resources."

"But in recent years, they seem to have disappeared, and I haven't heard of any fights between them for a long time."

The question is this.

Lin Tianhao showed a faint smile on his face and said calmly:

"So, as long as we deal with those super brains you mentioned, the problem can be solved?"

When the lonely old man heard Lin Tianhao's words, a meaningful smile appeared on his face.

He said calmly, "Your combat power is assessed to be very high, but you are only a mortal after all. With a mortal body, you will definitely have concerns."

Hear this.

Lin Tianhao asked: "Can they attack my relatives?"

"Not really."

The lonely old man shook his head and said:

"They are able to take action on this world."

"If faced with enough crisis, they will choose to perish along with the world without hesitation."

"Do they have this ability?" Lin Tianhao was a little surprised.

If these so-called super brains have such abilities, then he should really try to win them over.

Because if these guys from the Tongtian River civilization really have such great abilities, then they would be targets very worthy of being won over.

"It's a bit exaggerated, but in a short period of time, it will be no problem to raze all the important towns in the entire Fengzhou continent to the ground."

Lin Tianhao was slightly startled, and the lonely old man continued:

"If your relatives are on other continents, they may be spared. Otherwise, the end will not be good."

Chapter 1805: Senior, will you give face to the Saint of Heaven?

"Moreover, if so many people died because of you, you would definitely feel guilty in the future, and when you break through the critical realm, you will definitely develop inner demons."

Hearing what the lonely old man said, Lin Tianhao couldn't help but reveal a strange smile on his face.

"First, I have personally slaughtered more than 10 billion lives, so I don't care about this so-called threat of world destruction."

"Secondly, I've already been possessed by a demon, so why would I worry about the birth of a demon in my heart in the future?"

After saying this, demonic patterns began to appear on Lin Tianhao's face, and he became cruel, bloodthirsty, and terrifying!

"If I really have an inner demon one day, I will swallow it without hesitation."

Lin Tianhao's entire body was covered in magic patterns, and when he said this, he exuded a chilling and evil aura.

after all.....

Lin Tianhao also inherited the legacy of the Evil Sword Immortal. When he was in the possessed state, some of the evil of the Evil Sword Immortal was also reflected in Lin Tianhao.

When the lonely old man saw Lin Tianhao's current state, his brows were twisted into a "川" shape.

Lin Tianhao looked at the lonely old man with a half-smile and said:

"Senior should also be a mechanic, right? Since you have been here for such a long time, you should not be without any mechanical items in your hands, right?"

The lonely old man frowned and said in a deep voice:

"Boy, you don't want me to give you my mechanical items."

"Yes, but more importantly, why didn't those super brains search for the mechanical items on you?"

"Is it because I can't beat you, or is it because... you are one of them?"

Hearing Lin Tianhao's words, the lonely old man said in a deep voice:

"Because I am from the Tongtian River Civilization, these masterminds were given instructions when they were born that they cannot attack people from the Tongtian River Civilization without the master's order."

"This command is a super command. When the intelligent main brain was first born, the rulers of Tongtianhe civilization required it to be set. They were afraid that one day these intelligent main brains of Tongtianhe civilization would act recklessly after being out of the control of their masters."

Lin Tianhao narrowed his eyes slightly, he did not question this statement.

instead.

he thinks.

Under these conditions, this lonely old man should have a lot of good things in his hands.

"What's that look in your face?"

The lonely old man felt very uncomfortable when he saw Lin Tianhao's undisguised greedy eyes.

Lin Tianhao opened his mouth, revealing an extremely ferocious smile.

"What do you say?"

"senior!!"

"I am a demon, a super demon with blood on my hands. How can I have any good intentions?"

Looking at Lin Tianhao's hideous smile, the lonely old man couldn't help but feel frightened, and he subconsciously took two steps back.

"Even if you kill me, you won't get what you want." The lonely old man said with some lack of confidence.

"wrong!!"

Lin Tianhao's smile changed from ferocious to weird.

He raised his hand and the List of Gods fell into his hands.

"I have the List of Gods!!"

"I'll kill you and put you on the Conferred God List, and then you'll have to obey me. When that happens, won't all your things be mine?"

"you--"

The lonely old man opened his eyes wide, with an expression of disbelief on his face.

"How come you have the List of Gods?!"

"Impossible, ever since Jiang Taigong's Conferred Gods Contest ended, only the Lord of Heaven and Earth can hold the Conferred Gods Contest!!"

"You are just a mortal, and a mortal possessed by a demon. How could you possibly be on the Conferred God List?"

Looking at the lonely old man who was so surprised, Lin Tianhao's smile became more and more weird.

"Is it impossible?"

"Then please take a look at the Investiture of the Gods in my hand. Is it real or fake?"

Lin Tianhao keeps calling you "senior", but he feels uneasy when he hears you, a lonely old man.

The lonely old man looked at the List of Gods in Lin Tianhao's hand with serious eyes.

He was reluctant to admit it, but he had to admit it.

What Lin Tianhao holds in his hand is truly the Investiture of the Gods!!

"Although I don't know why you have the Investiture of the Gods, I can be sure that the Investiture of the Gods in your hand is not obtained legitimately."

The lonely old man said righteously:

"Put away your face. You want super god-level mechanical materials, but I have them. I have more than one kind. But if you have this attitude, I will immediately give the materials to those super brains. By then, even if you kill me, you will get nothing."

That's it.

The lonely old man paused for a moment before continuing:

"Moreover, I don't think you have the ability to kill me. I am one of the few living people in the Tongtianhe civilization. Those super brains can't just watch you kill me."

Kui Wei Changtian watched from the side without saying a word.

Because he knew that Lin Tianhao's decision was not something he could influence.

"Don't be so nervous."

The magic patterns on Lin Tianhao's body disappeared, and a faint smile appeared on his face again. He was completely different from the evil young man with magic patterns all over his body! !

Seeing the changes in Lin Tianhao, the lonely old man was also a little surprised.

"You are a demon that can be completely controlled at will. Who are you?" asked the lonely old man.

Lin Tianhao smiled slightly and waved his hand:

"It doesn't matter who I am. What matters is whether you are willing to hand over the super-god-level mechanical materials in your hands."

"I don't want to."

The lonely old man answered with a firm voice.

"As I said, it won't be easy for you to kill me."

Lin Tianhao grinned and said:

"Don't answer so absolutely. What if that's the case?"

Behind Lin Tianhao.

The shadows of saints appeared one after another.

First it was Patriarch Hongjun, then it was Queen Houtu, and then it was Patriarch Shichen!!

The shadows of the three great saints of heaven stood behind Lin Tianhao, and the deterrent power was still very terrifying.

“Dao...Dao Zu!!”

"Empress Hou Tu!!"

“This person... could it be the Ancestor Shichen!!”

The lonely old man looked at Lin Tianhao in disbelief.

Of course he knows.

These projections cannot participate in the battle, but these projections mean that Lin Tianhao has received their blessings.

These...are all incredible beings!!

“You... who are you?!!”

Three Heavenly Saints blessed a mortal at the same time! !

Moreover, this mortal also holds the List of Gods. The shock this brings cannot be described in a few words.

“You... who are you?!!”

Lin Tianhao waved his hand and said:

"Don't ask me that all the time. We are here to seek wealth. How about you give these Heavenly Dao Saints some face and give them a few hundred pieces of super-god-level mechanical materials?"

As soon as Lin Tianhao said this, Daozu Hongjun, who was already in the Divine Realm, suddenly sneezed.

"What's going on? Is someone teasing me behind my back?" Daozu Hongjun said while rubbing his nose.

Chapter 1806 Please help me, or... die!

"How many? Hundreds?"

The lonely old man almost thought he had heard it wrong.

There are hundreds of things wrong with just one mouth. It's simply not humane.

"No, even if you have been favored by the Heavenly Saint, what will happen?"

"If everyone is like you, and comes to show me their skills, I will have to hand over my things. Then what am I? A soft persimmon?"

"Senior misunderstood."

Lin Tianhao smiled slightly and said, "I just hope that you can understand the current situation."

The lonely old man looked at Lin Tianhao meaningfully and said:

"I do have super god-level mechanical materials, but you can only take them if I am willing to give them to you. If I am not willing to give them to you, you can't take them!!"

"The man next to you is indeed talented in mechanics. If he is willing to become my disciple, I can consider giving him three sets of super-god-level mechanical materials as a gift."

Hear the words.

Kui Wei Changtian hesitated a little, after all, his goal was to obtain super-god-level mechanical materials.

As long as the thing can be obtained, it does not matter whether one becomes a disciple or not.

But Lin Tianhao's next words made Kui Wei Changtian at a loss as to what to say.

"So there's nothing to talk about?"

These words not only made Kui Wei Changtian at a loss as to how to respond.

Even the lonely old man was slightly startled.

He thought that Lin Tianhao might ask for more, but he never thought that Lin Tianhao would answer like this.

"I have already made concessions, but you still want to be so aggressive. Then do as you wish, and fight!!"

The lonely old man also became a little more angry.

"You are just an ordinary person. You will pay the price for being so overbearing."

"maybe."

Lin Tianhao said indifferently:

"But the person who can make me pay the price is definitely not you."

Lin Tianhao had a firm expression, with a cold gleam in his eyes.

"Although it may seem reasonable to you, in my opinion, this is something that must be done!!"

"The galaxy is in danger, and we don't have much time."

"If you are unwilling to help me, then I will have no choice but to ask you to die!"

Finished.

Lin Tianhao bowed to the lonely old man and said with a stronger tone:

"Please help me, senior!!"

Kui Wei Changtian also followed suit and said, "Please help me, senior!!"

The lonely old man looked at Lin Tianhao meaningfully, then looked at Kui Wei Changtian beside Lin Tianhao.

"I am also a part of the galactic world. From this perspective, I should help."

"But there are so many people in the world, why should I sacrifice myself?"

"It's not easy for me to collect super god-level mechanical materials, why should I help you?"

Lin Tianhao took a deep breath and said:

"You are right, Senior. But if you and I don't care about this galaxy world, and no one in the world cares about it, then who will save this galaxy world?"

"Your Tongtianhe civilization has basically all ascended mechanically. You may not care, but in the Milky Way world, there are still many people, many races, and civilizations!!"

The lonely old man shook his head and said, "You don't have to blackmail me like this. I'm not a child."

"If I keep these super-god-level mechanical materials, I will still have a place in the galaxy world when I leave."

"But if I give it to you, will you definitely be able to save the Galaxy World?"

Lin Tianhao sighed helplessly and said:

"I must save the Galaxy World. To do this, I don't mind killing some people, even if we have no grudges against each other."

When the words fell.

Lin Tianhao immediately activated the power of the heavenly space law to confine the surrounding space and prevent the lonely old man from leaving.

"You want to be a hero, you want to save the world, what does it have to do with me? Why do you have to force me?!"

The lonely old man was shocked and angry, and scolded.

Lin Tianhao grinned and said:

"Did I force you? I was just pretending to be someone from the Arlate Galaxy in advance!!"

"You should be thankful that you met me first. If it was someone from the Alete galaxy, they wouldn't have given you a chance."

Lin Tianhao had a deep memory of the way those guys in the Alate Galaxy did things in his previous life.

This is also the real reason why he and those guys from the Alete Galaxy are fighting to the death.

"Don't try to comfort yourself like this. You're robbing and plundering under the guise of saving the world, and you're also trying to build a memorial arch for yourself."

Lin Tianhao smiled without comment and said:

"Are you done? If you are, then I will send you on your way."

The words fell.

Lin Tianhao no longer hesitated, and the feather arrows of heavenly punishment poured out.

Now that Ragnarok and reality were getting closer and closer, he no longer had time to procrastinate.

He needs to improve his strength in the shortest possible time.

The lonely old man frowned, and his sleeves turned into countless nanorobots, rushing towards Lin Tianhao.

But these nanorobots were crushed by Lin Tianhao before they could get close to him.

When the realm of thunder is unfolded, these nanorobots can be easily destroyed with ultra-high voltage.

The feather arrow of heavenly punishment has already locked onto this lonely old man.

When the feather arrows of heavenly punishment were about to approach the lonely old man, a huge black hole appeared in front of the lonely old man and sucked all of Lin Tianhao's feather arrows of heavenly punishment in.

Followed by.

Lin Tianhao felt a sharp pain in his heart, which made him dizzy instantly.

"Ultra-frequency high-voltage electromagnetic waves."

Kui Wei Changtian's face was a little solemn, "This kind of frequency is simply not something that mortal technology can achieve."

"That's a bit of insight. How about you take a look at this?"

When the words fell.

A ten-centimeter-long, finger-thick, chalk-like object flew towards Lin Tianhao.

Lin Tianhao's space instantly froze the chalk-like thing, but the moment Lin Tianhao's space froze this thing, countless powders instantly spread out.

"Ding, you are affected by the special powder, your movement speed is reduced by 90%, and your attack speed is reduced by 90%."

Lin Tianhao's eyes narrowed slightly, but just as Lin Tianhao was about to fight back, the powder began to explode.

"Boom boom boom——"

The continuous explosions knocked Lin Tianhao out with the impact force.

However, Lin Tianhao immediately put Kui Wei Changtian into the map of mountains and seas, and he himself was fine.

-192 million! !

-195 million! !

-193 million! !

.....

It is undeniable that the damage is indeed very, very high.

With Lin Tianhao's current damage reduction and double resistance, he can still inflict more than one million damage to him, which is really powerful.

just.

When the lonely old man saw such a large number of injuries, he couldn't help but widen his eyes and reveal an expression of disbelief.

"Senior, it doesn't hurt much. Your injuries are not serious enough." Lin Tianhao said with a smile.

Seeing Lin Tianhao's asking-for-a-beating look, the lonely old man gnashed his teeth in hatred.

"Since you want to see the big killer, then I will grant your wish!!"

The lonely old man raised his hand and pointed at the air, and a coin flew into the air.

Chapter 1807 7 pieces of super god-level mechanical materials!

Looking at the coin flying in the air, Lin Tianhao didn't even wait for the coin to fall before he rushed to the lonely old man with the Evil Tomb Dividing Ruler in his hand.

An electromagnetic protection shield lit up around the lonely old man, but Lin Tianhao ignored it and smashed it down with the Evil Tomb Dividing Ruler in his hand.

After getting the Evil Tomb Dividing Ruler, Lin Tianhao has not tried it yet.

Now we can give it a try with this lonely old man.

A king-level expert who is close to level 20,000 should still have some skills.

"Zizzizi..."

Countless electric arcs coiled around the Evil Tomb Dividing Ruler, as if trying to block Lin Tianhao's Evil Tomb Dividing Ruler out.

Unfortunately.

After these electric arcs touched the Evil Tomb Dividing Ruler, they actually began to dissipate.

The Evil Tomb Dividing Ruler fell completely unaffected.

"Shhh!!"

Just as the Evil Tomb Dividing Ruler was about to fall, a huge black hole appeared in front of Lin Tianhao, trying to swallow Lin Tianhao into it.

Lin Tianhao moved and flashed behind the lonely old man.

The heavenly-level laws of space, combined with the Starry Sky Step, allow Lin Tianhao to move almost instantly.

however.

Lin Tianhao just appeared behind the lonely old man, and a black hole also appeared behind the lonely old man.

Lin Tianhao frowned slightly, dodged and created some distance, then launched the Heaven-Swallowing and Earth-Devouring Technique.

"Senior is worthy of being a senior. He is still a bit difficult to deal with."

"Ding, you are devouring the lonely old man, Mechanic's comprehension +2000, magic resistance +2000, armor +2000, free attribute points +2000."

"Ding, you are devouring the lonely old man..."

.....

The lonely old man felt that the strength in him was being drained away by Lin Tianhao, and the expression on his face became increasingly gloomy.

"Senior, you still have a chance."

Lin Tianhao looked serious for once, "If I really use all my strength, you will definitely die."

The lonely old man looked at Lin Tianhao coldly without saying a word.

Lin Tianhao continued:

"To put it another way, you can also choose mechanical ascension like the ancestors of Tongtianhe civilization."

"You won't be able to take anything with you anyway, so why not leave your things behind and make some contribution to the galaxy world?"

The lonely old man's eyes were cold, "Some things I can't give just because I want to."

Hear this.

Lin Tianhao frowned. Did he need another mission?

"Senior, is there anything I need you to do?"

If one must complete a task to obtain a reward, then Lin Tianhao can only complete the task and give it a try.

"Not really."

"I obtained these super-god-level mechanical materials myself."

That's it.

The lonely old man sighed heavily, "Since you are able to accept the mission and have such fighting power, I think you must be the Snow Emperor."

That's it.

The lonely old man took a deep breath and said seriously:

"The super god-level mechanical materials are in my hands. Those super brains won't do anything because I am from the Tongtianhe civilization."

"But if I give something to you, the result will be completely different. They will definitely grab it, and they will act absolutely rationally without worrying about any consequences."

Lin Tianhao smiled without comment and said:

"Senior, you are right. They are intelligent brains and they act absolutely rationally. Therefore, they know who they can offend and who... they cannot offend."

The lonely old man hesitated to speak and finally just sighed.

He immediately took out seven mechanical materials and said calmly:

"This is what you want. Seven pieces of super-god-level mechanical materials are all I have."

Lin Tianhao glanced at Kui Wei Changtian, who nodded and collected all seven sets of super-god-level mechanical materials.

"Thank you, senior." Kui Weichangtian smiled.

"If he wasn't Xue Di, I probably wouldn't give it to him, even if I died... I wouldn't give it to him."

"But Xue Di... I still believe in you and your determination to deal with the Alite Galaxy."

Lin Tianhao nodded gently, "Thank you for your trust, senior."

"You shouldn't thank me, you should feel the crisis."

"You should think about it carefully. How many people in the galaxy world are trustworthy?"

"I question you, not because you really have problems, but based on big data, there are many people with problems in the galaxy world."

Lin Tianhao took a deep breath and said:

"I know that some people will turn against me, but I still believe that more people will stand on the same front as me."

"Or, I was forced by those guys in the Alete Galaxy to stand on the same front with me."

"It won't be long before they realize that surrendering and compromising will hardly lead to good results."

Hearing what Lin Tianhao said, the lonely old man just smiled and said nothing more.

The next moment.

The lonely old man seemed to sense something and looked up into the void.

"Look, here it comes."

Lin Tianhao narrowed his eyes slightly. Do these super brains really dare to touch upon someone else's fault?

They had just gotten the super-god-level mechanical materials when these guys showed up.

"You can give it to us directly, why give it to an outsider."

At this moment.

An extremely calm voice sounded.

The lonely old man smiled and said:

"If I give it to you, or to Xue Di, you will both fight, right?"

"The Snow Emperor will not let go of the super god-level mechanical materials, and neither will you."

As the lonely old man's voice fell, a pink humanoid robot wearing armor and over two meters tall appeared in the void.

Her eyes emitted a faint red light and her gaze fell on Kui Wei Changtian.

"You are also a mechanic, and you have good talent. Hand over the mechanical materials in your hands and join our Tongtianhe civilization. I can take you to the pinnacle of mechanics."

Kui Wei Changtian shook his head and said, "I have my own path to follow, but if you are willing to communicate and learn, I would still be happy to do so."

The technological level of Tongtianhe civilization is still very high.

The fact that the lonely old man was able to exchange several moves with Lin Tianhao just now is actually very telling.

Although Lin Tianhao did not give his all, it still proves the power of Tongtian River civilization.

That black hole is an extremely powerful means of defense, and at the same time, it is also an extremely powerful means of attack.

"Have you ever analyzed whether you can escape unscathed if you come to rob our things?" Lin Tianhao asked.

"Analyzed."

The pink mecha's extremely calm female voice rang out.

"The analysis results show that our probability of failure is 1.3%, the probability of stalemate is 0.8%, the probability of both sides losing is 23%, and our probability of success is 74.9%."

Lin Tianhao was slightly startled and said, "If you can deduce such a result, then I really have to doubt the technological level of your Tongtianhe civilization."

"You don't agree with our calculations." The pink robot's voice was as calm as ever.

"If you don't believe it, you can give it a try."

Chapter 1808 Super Robot!

"We can simulate this battle in a virtual battlefield. I believe you can get the result." said the pink robot.

Lin Tianhao smiled without comment and said:

"I don't believe in that stuff."

"The war situation changes rapidly, and some changes will only occur when you feel a crisis."

"A virtual battle lacks a very important element, which is the mentality of being in crisis."

"Only humans can change like that, robots can't," said the pink robot.

Lin Tianhao shook his head and said:

"Ordinary robots don't have that, but you do. At least, you already have the emotion of greed."

"You have devoured a large number of main brains and are trying to snatch super-god-level mechanical materials. This shows that you have derived self-awareness from the intelligent program."

"If you have self-awareness, you will definitely have emotional fluctuations."

That's it.

Lin Tianhao swallowed the sky and the earth and landed on the pink robot.

"Ding, you are devouring a super robot, Mechanic's comprehension +1000, armor +3000, magic resistance +3000, free attribute points +2000."

"Ding, you are devouring the super robot..."

.....

The reminder sounds are incessant.

The super-powered robot told him that his understanding was not as good as that of the lonely old man.

However, the armor and magic resistance it provides are higher than those of the lonely old man.

Eight black holes appeared in succession around the super robot, completely covering it.

It seems that the location where the super robot is located is itself a huge

Black hole.

This super-powered robot seemed to be prepared to use it to stop Lin Tianhao's plan to devour the sky and the earth.

But for Lin Tianhao, these black holes also contain energy. As long as there is energy, he can devour it.

"Ding, you are devouring the mechanical black hole, Mechanic's comprehension +1000, armor +1000, magic resistance +1000, free attribute points +10000."

"Ding, you are swallowing the mechanical black hole..."

.....

The rewards from swallowing the mechanical black hole are also not low.

Lin Tianhao didn't care.

But right now.

The lonely old man seemed to have sensed something extremely terrifying. His body blurred for a moment and then disappeared.

"Kuiwei Changtian."

Lin Tianhao knows.

There must be some super brain that used some extremely powerful means, otherwise the lonely old man would not have such a reaction.

therefore.

Lin Tianhao immediately included Kui Wei Changtian into the map of mountains and seas.

As for himself.

With his current health bar, dual resistance, and ridiculously high damage reduction, it would be extremely difficult to kill him! !

and.

He is an adventurer, even if he is really killed, he can still be resurrected on the spot.

"If this senior ran slower, would he also be affected?"

"It seems that your procedure of not attacking people from Tongtian River civilization is not so absolute." Lin Tianhao thought and said.

No one responded to Lin Tianhao. Instead, there was some wave in the sky coming towards him.

"Space Barrier!!"

Lin Tianhao will be in front

The space is frozen, and he wants to use the space barrier to test whether the attack of this super brain is really that strong.

"boom--"

Accompanied by a loud bang, Lin Tianhao's space barrier began to tremble.

"Kaka...kaka..."

What surprised Lin Tianhao was that cracks appeared in his space barrier, showing signs of being broken.

Fortunately.

It was blocked after all.

"There are indeed some tricks, but they are still a little lacking." Lin Tianhao said lightly.

Although his spatial barrier is not a skill or a magical power, nor does it have any great secret bonuses, it is simply condensed from the pure power of laws.

However, because Lin Tianhao's level of space law is high enough, such defensive means should not be underestimated.

The attack just now almost broke through his spatial barrier, which was indeed extraordinary.

"It seems that you all have been hiding very well and have been reluctant to show up." Lin Tianhao said lightly.

This super-powered robot is only controlled by the super-brain, and is not the super-brain itself.

"If the divine sense can't detect it, then this is the only one."

"Thunder Realm, open!!"

"Heart is one with heaven and earth, open!!"

The realm of thunder alone is definitely not enough.

But if we add that the heart is one with the heaven and earth, the scope of the realm of thunder will be as big as Lin Tianhao's heart.

With the blessing of Heart One with Heaven and Earth, the range covered by the Realm of Thunder is increasing at a speed visible to the naked eye.

In just a breath, the realm of thunder had covered an area of one hundred kilometers in radius.

As for why it is the realm of thunder, it is because thunder can more easily detect mechanical objects.

Most mechanical items are powered by electricity.

It is not ruled out that there may be mechanical items driven by other energies, but they are only a minority after all.

Followed by.

Two hundred miles, three hundred miles...

With Lin Tianhao's full efforts, the scope is still expanding.

"You are just a mortal, yet your realm can cover such a large area."

The black holes around the super robot disappeared, and there was a hint of surprise in its tone.

Lin Tianhao did not respond, and the scope of the domain continued to expand.

"I won't play with you anymore. Let me find where your headquarters is."

Lin Tianhao unfolded the realm of thunder and used space travel without hesitation.

As long as he is fast enough, he can clear out this uninhabited area in a short time.

"found it."

Lin Tianhao had a faint smile on his face.

"It seems that you guys are not hiding as deeply as I thought!!"

Lin Tianhao landed on a Gobi desert.

"What should this move be called?"

"A million volts?"

Lin Tianhao raised his palm, and endless thunder gathered in his palm.

The next moment.

Lin Tianhao's palm fell, and the thunder that seemed to destroy the heaven and earth instantly blasted the descending Gobi Desert into pieces.

Lin Tianhao blasted a thousand-meter-deep pit across the entire surface of the earth.

Beneath the deep pit is a fortress made entirely of metal.

The moment this metal fortress appeared, a laser with a diameter of more than 30 meters shot towards Lin Tianhao at a high speed.

Lin Tianhao took just one step and appeared next to the laser cannon.

Subsequently.

Lin Tianhao slammed the Evil Tomb Dividing Ruler in his hand down fiercely, and the terrifying force instantly smashed the laser cannon into pieces.

"Xuedi, let's talk."

The pink robot appeared not far away.

"You could have just used your realm to indiscriminately destroy this place, but you didn't. Instead, you used weapons from a distance to destroy the laser cannon. This shows that you want to talk to us."

Lin Tianhao smiled and said:

"Not too stupid."

"I didn't really break up with you because I wanted to invite you to join the Fan Palace."

They almost represent the technological pinnacle of the Tongtianhe civilization. With their participation, the effect that can be achieved in a large-scale war is immeasurable.

Chapter 1809 The joining of Tongtian River civilization!

"You want us to join the Fan Palace and fight against those guys in the Alete Galaxy with you?"

"Not bad." Lin Tianhao nodded slightly.

"You are absolutely rational and should know that the arrival of the Alet Galaxy will be a devastating blow to the Milky Way world."

Hearing Lin Tianhao's words.

The pink robot shook its head and said:

"In the face of force majeure, appropriate compromise is acceptable."

"Besides, those guys in the Arlet Galaxy should want your faith and some resources of the galactic world."

"It doesn't matter who rules this world. Why do we have to rebel?"

When Lin Tianhao heard this, a meaningful smile appeared on his face.

"Then, we pray that they will treat us equally and lead us on the path of prosperity and strength, right?"

"That's not impossible." said the pink robot.

Lin Tianhao shook his head and said:

"You don't know them, but come to think of it, our Dragon Country has also been invaded before."

"If our ancestors of the Dragon Nation had thought like you at that time, our civilization would have ceased to exist long ago."

"civilization?"

The pink robot shook her head, "Our Tongtian River civilization is almost non-existent."

"But how much of an impact does this have? What difference does it make if it develops in different places and under the rule of different people?"

"How do you know that it is right for you to fight against the Alite Galaxy?"

Lin Tianhao was so angry that he laughed and said:

"I told that senior before that I could play the guys from the Arlate Galaxy?"

"So, what is your decision now?"

The super robot shook his head. "If you want to play the guys from the Arlate Galaxy, you need to have the strength to do it."

Lin Tianhao couldn't help laughing and said:

"Do you think that since that old senior was able to fight me for a few moves, you are no longer afraid of me?"

"I know you didn't use your full strength before, and coupled with your realm of thunder, it is indeed difficult for us to defeat you."

"But our ultra-long-range technological weapons are capable of launching long-range strikes against other continents."

"You can handle it, but what about them?"

Lin Tianhao took a deep breath and said:

"It seems that you have misunderstood me!"

The words fell.

An image of a saint instantly condensed behind Lin Tianhao.

Saint Vision: Nine Heavens Immortal Thunder Lord!!

"Let me see how many of your weapons can fire."

"Saint Vision!!"

There was a hint of surprise in the super robot's voice.

It stared at Lin Tianhao for a while, "You never really tried your best from the beginning to the end. Tell me, what is your purpose?"

"In the beginning, my purpose for coming here was to obtain super-god-level mechanical materials. Now, I want you to join the Mortal Palace."

"Impossible." The super robot shook his head.

"No matter how powerful you are, even if we are no match for you, we can still consciously leave this world."

"So, regardless of success or failure, we are naturally invincible."

Lin Tianhao frowned slightly. This was indeed not a good idea.

If they are pushed to the limit, they can just leave.

Lin Tianhao's current means are unable to stop the departure of this consciousness data.

"You won't leave easily."

Just now.

Kui Wei Changtian's voice sounded.

"The people of Tongtianhe Civilization chose to leave, which means that the world where they received the signal through the pyramid must have more advanced technology than this world. Otherwise, even if the mechanics don't mind the mechanical ascension, I will not leave this world collectively."

"You are just super brains after all. You are here to devour other super brains and become stronger."

"But similarly, after your consciousness data is transmitted, there will be other more advanced super brains that will devour you."

"If you compromise, there is still a glimmer of hope. If you don't compromise, you will almost certainly die."

That's it.

Kui Weichangtian smiled slightly and continued:

"What's more, no matter whether you compromise or not, we can gain enough benefits, because as long as we drive you away, the mechanical items and materials here will all belong to us."

After hearing what Kui Weichangtian said, the super robot fell silent.

It seemed to be calculating, or perhaps communicating with other super brains.

"Aren't you afraid that we will indiscriminately bombard those towns?" asked the super robot.

Lin Tianhao shook his head and said:

"Why should I be afraid? Adventurers can be resurrected, but as for the NPCs in this world, it's hard to say how many will be left when the real war begins."

Anyway, Lin Tianhao knew in his previous life that after the catastrophe, not many NPCs in Ragnarok remained.

"Tell me your choice." Lin Tianhao said lightly.

"We choose to join Fandian." The super robot did not hesitate too much and made the decision directly.

"Just like the person next to you said, we dare not leave this world for the time being. As long as we stay here, we will definitely run into those guys from the Alite Galaxy."

"Compared to those guys who defected to the Alite Galaxy, I would rather join you."

Lin Tianhao showed a satisfied smile on his face and said:

"Then from today on, you are the elders of our Fan Temple."

While talking.

Lin Tianhao took out several tokens of the elders of the Fan Palace.

"How many of you are there?" Lin Tianhao asked.

"Four." The super robot replied.

"Okay." Lin Tianhao took out four tokens.

Lin Tianhao showed a faint smile on his face and asked:

"How many super-god-level mechanical materials do you have?"

The super robot hesitated for a moment, then said:

"Between the four of us, there are thirty-seven copies."

"But most of them have been installed on some big killer weapons. If they are removed, it will have an impact on those weapons."

Lin Tianhao nodded and said:

"Can you show us your arsenal? I might need to familiarize myself with it. This person next to me is Kui Wei Changtian, who has the hidden profession of a super god-level mechanic."

"You can learn from each other and communicate with each other, and perhaps make some progress."

The super-powered robot took Lin Tianhao into the steel fortress.

"There are a total of 17 steel fortresses in this no-man's land. We have dispersed the bases."

"There is a pyramid under each steel fortress. This is also the backup plan we have prepared for ourselves."

"The pyramid is the key to sending consciousness data out of this world."

In this steel castle, the sense of technology is at its peak.

Various instruments and equipment make it seem like we have entered a future technological world.

"The weapons controlled by our four super brains are actually similar, nanorobots, electromagnetic waves, laser cannons, super missiles, etc."

"These weapons have good lethality, but compared to weapons with super-god-level mechanical materials, there is still a big gap."

Chapter 1810 Idiot Missile!

"The reason why I came to negotiate with you, Lord Palace Master, is because my computing device contains a super-god-level mechanical material. My computing power is 3.75 times that of the other three super brains."

"Kui Wei Changtian is a super god-level hidden profession of mechanic. He should know how difficult it is to increase the computing power by 3.75 times. But he did it with just an ordinary super god-level mechanical material."

"Especially, this super-god-level mechanical material is not the core component of my computing device."

Kui Wei Changtian nodded gently and said:

"I feel like the four of you control so much technology in the Tongtianhe civilization, your computing power should never be enough."

"really."

The super brain nodded slightly, "Even if we use all our computing power, we can only operate one-fifth of the mechanical devices we control at the same time."

"We have been trying to improve computing power over the years, but we have not come to any good conclusion."

"Where are the other three?" Lin Tianhao asked.

"coming."

Just now.

Three more super robots flew over.

"In order to distinguish us, we can print our names on our chests." said the super robot who communicated with Lin Tianhao at the beginning.

An electronic screen appeared on its chest, and the words "Luo Ya" appeared on the screen.

"I'm Luo Ya, you can also take a look at the names of the three of them."

Lin Tianhao looked at the other three, Fenglu, Beimu, and Kuzhong.

The names are all very simple.

"This time, I will focus on showing you the weapons and devices installed with our super-god-level mechanical materials."

Luoya's voice was calm. It quickened its speed and soon arrived at a room that required layers of verification before entry.

In this room, there are devices that emit various lights.

"This is my computing system. Of course, it's one-fifth. We are also worried that the computing system will be destroyed, so it is better to hide it."

"I have a total of eleven pieces of super-god-level mechanical materials. One of them is here, and the other ten are on four weapons."

"Because of the distribution of weapons, I can explain it to the Lord Palace Master through projection."

The words fell.

A very ordinary missile appeared in the void ahead.

"This is a camouflaged missile. It looks no different from an ordinary missile. It has an anti-spiritual coating on it. After launch, it also has a stealth simulation device that changes its color according to the surrounding conditions, thus achieving a pseudo-stealth state."

"It is equipped with two pieces of super-god-level mechanical materials. It is a disposable weapon. After being detonated, it can raze an area of 150,000 kilometers to the ground. The shock wave generated by the explosion can reach more than one million kilometers."

"The most important thing is that after the explosion, a super electromagnetic wave will be generated, which will cause brain nerve damage to all living things within a radius of one million kilometers. I also jokingly call it the idiot missile."

"In a missile zone, all living things within a million kilometers will either die or become idiots."

"Not bad, but it's a pity that they are disposable. Two sets of super god-level mechanical materials are somewhat wasteful."

Luo Ya nodded slightly, "This missile will not be used easily unless it is absolutely necessary. It is usually aimed at the core area of the enemy unit."

Lin Tianhao smiled and said, "If we don't reach an agreement, will this idiotic missile fall on our Fan Palace?"

Luo Ya was stunned for a moment before saying:

"It's hard to say. Rationally, I still won't use it easily, but if I'm really forced into a desperate situation, I will definitely use it."

The words fell.

As Luo Ya waved his hand, the idiotic missile disappeared and a second weapon appeared, which was a robot.

A robot that also looks very ordinary.

"I call this robot a universal robot. Five of my eleven mechanical materials are used on it."

"It has two field-related means: super-strong radiation and super-electromagnetic waves. In normal mode, it can attack all living things within a radius of tens of thousands of kilometers."

"Its normal movement speed has reached 31 times the speed of light. If it is running at full power, it can reach times the speed of light."

"In addition, its own combat power is also extremely strong, and it can easily kill a ninth-level Grandmaster-level wild monster in seconds."

"As for the defense system, it is also extremely powerful. It is difficult for a 9th level King or even an Emperor to harm it."

Lin Tianhao nodded slightly, this thing seemed to be just average.

Perhaps for many ordinary professionals, this is already very impressive.

But for Lin Tianhao, this was still not enough.

Next.

They displayed their weapons one after another.

The mechanic's biggest problem was still exposed, that is, there was no support from the laws.

There is a pretty good weapon in the North Tomb that can instantly decompose matter within a radius of 100,000 kilometers. Its killing range is not as good as the Idiot Missile, but its killing power should be more terrifying than the Idiot Missile.

but.

Overall, their weapons are still not very strong.

Without water drops or two-dimensional foils, these weapons are more like upgraded versions of some of the weapons on Blue Star.

The range and lethality have increased, but other than that, there doesn't seem to be anything special.

"According to what you said now, you only have five unused mechanical materials?"

These ones used all the super-god-level mechanical materials.

There are only five left, and I'm afraid they are not enough.

"Yes, Lord Palace Master."

Loya explained:

"Troubled times are coming, and we definitely want to make everything we have into weapons, so that we can feel more secure."

Lin Tianhao nodded slightly. There was nothing wrong with their behavior.

"Is that enough?" Lin Tianhao looked at Kui Weichangtian.

"Eleven turns are definitely enough, but as for whether twelve turns are enough, I don't know." Kui Weichangtian said.

"Then let's do eleven turns first."

That's it.

Lin Tianhao hesitated for a moment, then asked:

"You are considered to be relatively ancient beings in this world. Do you know of any place that can enhance soul power?"

Lin Tianhao hasn't forgotten about the fat man and the glasses.

In order to delay them longer, strengthening soul power is something that must be done.

"It has always been difficult to increase soul power. Perhaps there is something in the underworld that can increase soul power. In the land of Shenzhou, there is a kind of soul crystal that can increase soul power."

"Moreover, soul crystals usually exist in the form of mineral veins. If you can find a soul crystal mineral vein, you will be able to obtain a lot of soul crystals."

Luo Ya said this with some helplessness:

"But soul crystals are extremely precious. Many people have searched for them in the past. There may still be soul crystal mines today, but it should be very difficult to find them."
