

O Summoner 2191

Chapter 2191: Dragon Sealing Statue

"Are you alright, Grand Mistress Nu Wa?" Levin Cloud asked.

"I am fine, but I am currently being sealed by the Dragon Sealing Statue." Grand Mistress Nu Wa stated as she tried squirming, but the red chains prevented her from moving her own

body.

"You mean that floating small statue over there?" Levin Cloud asked as he could clearly see the artifact that is keeping Grand Mistress Nu Wa bound.

"Yes! That is the one! If you can disable it or destroy it, then I will be free from this. Also, make sure that no one with a dragon's bloodline touch it or they might suffer some abnormalities." Grand Mistress Nu Wa stated.

"Then that would just leave the three of us because all of you are of a draconic lineage." Adrian muttered as the enemy is currently in combat with the other Ryujin that courageously attacked the almost Greater God enemy.

Grand Mistress Nu Wa thought that there were no longer anymore of that wretched artifact, but it seems that she missed destroying one of them. The Dragon Sealing Statue is a special type of artifact that can subdue any dragon as long as the proper condition is met. The condition is that the mana used to subdue the dragon must be at least ten times the mana of the target dragon.

Just this condition alone is already difficult to do as normal dragons have twenty times the mana that a human can have. If they are high ranking dragons, then they would at least have a hundred times the mana of people that are of the same level as them. True dragons are beings that have dense mana bodies after all which is why trapping one is almost an impossible feat.

The Dragon Sealing Statue is different as it actually traps the Ryujin better than the other dragons as the condition for the mana needed is lessened by 20%. It might have been lessened but the mana needed is still enormous that a lot of the enemies were sacrificed by Amatsu- Mikaboshi but even he needed to give some of his mana to seal Grand Mistress Nu Wa.

When the Ryujins were first hatched, they came out from the 'moon' that exploded and looked like a lotus flower. Being born requires a lot of energy to travel back to the ground which is why the newborn Ryujin ate the 'moon' so that they could have enough energy to fly back down to the world. A lot of things could happen with the 'moon' explosion and one of it are parts of it crashing down to the world.

The rare 'moon' fragments were powerful and contained celestial energy and mana. Some of those that found it ground it up into powder and created potions to strengthen themselves. This was how some of the Lizard folk were created as they were humans that absorbed the energy of dragons but did not have enough to become a true Dragonkin. Some were able to become dragonkin as they were more compatible with draconic energy.

Some of these rare 'moon' fragments were crafted into statues as they emitted a powerful celestial glow but that also meant that they could be used to subdue the very dragons that came out of them. The material of that 'moon' is a powerful unique mineral that could incubate hundreds of dragons which meant that it is strong enough or have the properties of -containing hundreds of them.

The beings that picked this mineral up and fashioned them into statues did not know this until a Ryujin that became notorious was born. It was a story where an evil Ryujin destroyed a small town, but she did not know that a Dragon Sealing Statue was there. The Ryujin thought that the small statue was just a carved stone for giving reverence to her race, but she did not expect that this statue would be his doom.

The deaths of thousands of people and their mana that carried their grudge activated the Dragon Sealing Statue. The red chains attached to this evil Ryujin and rendered her powerless. The powerless Ryujin was reduced to becoming a mortal as she was just in her younger years. The evil Ryujin was bound until the Immortals found the state of the town.

The Immortals thought that they would never be able to cut through the tough skin of the Ryujin but were shocked when one sword attack struck her heart and killed her. All of the Immortals then found the cause of the Ryujin being reduced to that of a human's durability and that is the Dragon Sealing Statue. Seeing that they were now able to contend with a Ryujin with the help of a stone statue, the Immortals could now reign in the powerful Ryujin.

The appearance of the Dragon Sealing Statue became the start of a bloody war between the Ryujin and the Immortals. The Ryujin became less in number, but the Immortals shrunk faster than them because they were using their own lives to cull the former. Seeing the bloody war that severely devastated the eastern continent, Grand Mistress Nu Wa along with the most powerful Immortal of that time agreed to put an end to it.

Both of them took all of the Dragon Sealing Statues and destroyed them as both sides would always lose their lives regardless. Killing one Ryujin basically killed a lot of Immortals even if the former had lower numbers than before. When the bloody war stopped, both groups could no longer pinpoint why they started fighting in the first place and the agreement to never attack one another was passed.

"All of it was destroyed back then! I even made sure of it." Grand Mistress Nu Wa stated which made Amatsu-Mikaboshi laugh.

"Did you really think that all of them were destroyed back then? Who do you think even instigated the war back then? They were already making plans for their revival even back then and you will not be able to stop it." Amatsu-Mikaboshi stated as he laughed while pinning down all the Ryujin that attacked him.

Chapter 2192: Four Against a Greater God

Amatsu-Mikaboshi said something that triggered something to Grand Mistress Nu Wa as she never really knew why a group of Immortals started slaughtering the Ryujins back then. It was a given that they could have just sealed the Dragon Sealing Statue away and use it when an evil Ryujin wreaks havoc, but they actively used it to kill them. There was only one evil one that committed atrocities, and she never really held the Immortal that killed that one accountable as it was justified.

The Ryujins were like the Daemos as they mainly made sure that nature is stable and that the slaughtering of innocent normal people is not done. They also made sure to have minimal contact with the outside world and only stepping out when they are needed the most. Even the fact that Grand Mistress Nu Wa helping create kingdoms is due to the bad conditions that a place is cursed with.

"Who are they?!" Grand Mistress Nu Wa shouted as her eyes became red with anger as never really learned who started that bloody war between the Immortals and the Ryujin.

"I think you know them well as you were the one that killed them back then when you were still a goddess. I am just letting you know as you will die by my hands here anyway like the rest of your pitiful guardians." Amatsu-Mikaboshi stated as all of the Ryujin that attacked him were now writhing in pain and could not stand back up.

"You have to get through us first." Peridot stated as she released four different elemental spells of fire, water, wind, and earth towards Amatsu-Mikaboshi.

"Cull my enemies, Valkyrie's Spear!" Frey stated as she lunged towards Amatsu-Mikaboshi and turned into a streak of light.

"Wrath of Nature! Deadly Zone!" Levin Cloud chanted as he used two different spells at once. The four different elemental spells made sure that Amatsu-Mikaboshi will not be able to escape from any directions. Frey also locked the air as she was in a downward plunge while Levin Cloud made sure that Amatsu-Mikaboshi will not be able to escape below. Amatsu- Mikaboshi is cursed by Levin Cloud as long as he is within that area, and he made sure that the vines held the enemy's feet in place.

"Useless." Amatsu-Mikaboshi stated as he just let himself get hit by all the attacks.

All of the elemental spells slammed against his body while Frey's spear pierced his right shoulder. The explosion of nature energy from below him also hit him but Amatsu-Mikaboshi did not even move from his position. He was damaged but not to the extent that he would flinch. Only 5% of his maximum health was decreased by that simultaneous attack.

"All of you will... wait... where is the other one?!" Amatsu-Mikaboshi stated as he actually forgot the one that he was wary of but that was already part of the plan as the Frey, Levin Cloud, and Peridot could be seen smiling.

Adrian suddenly appeared just above the Dragon Sealing Statue as this was the main objective that they needed to do. He already told them that their winning condition would be to have Grand Mistress Nu Wa join the fight. They were handling a Greater God with just four of them and not even boosted by other gods. If Adrian and the others were being blessed by the gods, then they would have been able to fight them with just their numbers.

One could say that Adrian or Levin Cloud could use their mediator powers to combat Amatsu-Mikaboshi, but they cannot. The god in front of them is not related to life or death and is just a rogue god that is filled with Chaos Energy. Amatsu-Mikaboshi is also not aligned with the Gods of Life and Death as well as he labels himself more like another entity. He is more like a parasite that feeds of the energy from the Goddess Izanami.

"Break for me!" Adrian stated as he switched his weapon to his axe for maximum power.

Adrian slammed his axe towards the Dragon Sealing Statue and was shot backwards. He was able to perfectly hit the Dragon Sealing Statue and breaking it apart, but the explosion of intense energy made him slam into the mountain. A powerful red light blinded the surroundings but the red chains that held the Grand Mistress Nu Wa was already released.

"If I cannot get my dragon heart now then I will just need the Orb of Order!" Amatsu- Mikaboshi stated as he used the blinding red light to shorten the distance between him and Adrian.

Adrian could be seen squinting in pain as he lost quite a bit of health when he slammed into the mountain. It seems that he hit an extremely durable ore or something as he took way more damage than he thought he would get. Seeing the sharp claws of Amatsu-Mikaboshi about to reach his neck, Adrian actually ran out of way he could escape out of this one, but a risky idea came to mind.

Amatsu-Mikaboshi's claws penetrated the mountain which made the other three scramble to see if Adrian was fine. Amatsu-Mikaboshi thought that he was able to kill Adrian but did not expect that his sharp claw only grazing the neck of the demon. Adrian was able to live because of his masterful use of the Force Body.

Adrian basically coated his neck with a Kinetic Barrier that absorbed impact, but he was not able to fully perfect it as he deployed it quickly. The Kinetic Barrier absorbed the initial force of the impact which is the momentum of the claw and Adrian used that same energy to forcefully make his neck tilt sideways.

The execution was rough, but Adrian got what he needed to achieve and that is to live as his neck was only grazed. Amatsu-Mikaboshi was taken aback but he quickly used his other claw to finish the job. Just as Adrian was about to get killed, vines suddenly crawled onto his body and turned it into a patch of flowers.

Chapter 2193: Against a Chaotic Greater God

"Thanks! I almost died from that." Adrian stated as he manifested next to Levin Cloud just like what happened with Grand Mistress Nu Wa.

"I cannot do that again for another hour. By the look of things, we might even die within the hour if we are not serious." Levin Cloud stated as he used the max charges of that skill.

"Get behind me children. The nuisance is becoming erratic." Grand Mistress Nu Wa stated as she suddenly created numerous shields of different energies stacked against each other. Amatsu-Mikaboshi did not even need to look back as chaotic dark tendrils shot out from his back and accurately tried to kill all five of them. Grand Mistress Nu Wa already knew how to fight against Amatsu-Mikaboshi which is why she did not need to guess what the enemy planned to do. Still, Grand Mistress Nu Wa is still a bit weakened as she has yet to fully recover when she came down to fight.

Amatsu-Mikaboshi suddenly morphed his body into pure chaotic darkness as well and became numerous spears that tried to destroy the barriers. The only thing that could be seen different is the cracked mask that seems to be sentimental to the enemy. Grand Mistress Nu Wa could be seen struggling a bit as the strength of the enemy has entered the latter stages of a Lesser God. It would not take longer before Amatsu-Mikaboshi reaches the peak strength that a descended god could use.

"I shall aid you!" Peridot stated as she created barriers as well that is almost as powerful as the ones that Grand Mistress Nu Wa created. She even created more powerful barriers by sacrificing some mythical tier gems.

"Any idea how to defeat that thing? It is not even affected by the curses that I know of." Levin Cloud stated as he tried his best to debuff the enemy but all of it is ineffective.

"I can try something if it is a being made of darkness. It will take some time as this is not near the northern continent or the central continent." Frey stated as she wanted the help of the Goddess Freyja but summoning a goddess to descend on your body in a continent that she is not worshipped is not easy.

"All of you do your thing as I will be the one that will confront that guy." Adrian stated as he sneakily passed something to Levin Cloud which Amatsu-Mikaboshi did not notice.

"Nether Domain!"

"Netheros True Form!"

"Primordial Armament: Mirror"

"Limit Break: Summoner!"

Adrian finally used his domain skill and also his limit break skill as the enemy is getting more and more powerful. Even with the aid of Grand Mistress Nu Wa, they might be caught dead if they do not give it their all. Adrian felt something odd within him when he activated his domain and true form as if something hungered. He brushed this off as he thought that it might just be his stamina bar getting low and it is said to be a side-effect.

Adrian appeared in his true form and also summoned his mirror armament because the weakness of the enemy is none other than light. Adrian needed to gather immense light and only his mirror armament could do such a thing without being obvious. He already created invisible mirrors at the top of the sky limit that he can reach and absorb the energy from it. He also summoned all of his soulbounds to make sure and they appeared in their nether form. This time, Kenos, also joined in the battle in his nether form that looked like a gaseous monster that can rip dimension using his claws. Sirius, Kanlaon, and Kimat started the attacks as they released their enhanced attacks against Amatsu-Mikaboshi.

Sirius released shadows injected with nether energy and pierced the chaotic darkness body of Amatsu-Mikaboshi. Kanlaon used his full powered dragon breath enhanced with nether energy as well which made the golden beam become tinted with the color of black, white, and gray. Kimat also did the same as he called upon lightning that is also tinted with the color of nether energy.

Amatsu-Mikaboshi did not bother to dodge the shadows that Sirius released as only the nether energy did some damage to the enemy. For Kanlaon's dragon breath, Amatsu-Mikaboshi needed to create a shield of his own energy to make sure that the empowered golden beam of light did not hit him directly. It seems that the energy contained within the dragon breath is powerful enough to warrant some defensive measures.

The lightning that Kimat released is another thing entirely as Amatsu-Mikaboshi actually dodged it as if he feared it. Kimat's lightning is made from his own divine power after all, and it became a powerful god killing bolt with nether energy in the mix. Seeing that Amatsu-Mikaboshi is incredibly wary of the lightning, Adrian formed a plan with Kimat in the center of it all.

Amatsu-Mikaboshi did not expect that the demon is a summoner that could tame divine beasts. He already thought that the dragon was a problem, but he actually has a legitimate divine beast under him. Amatsu-Mikaboshi also noticed a peculiar dragon turtle in the mix that has natural energy reserves. It was clear that the demon was holding back earlier as he was more fixed on the Orb of Order than defeating him.

As Amatsu-Mikaboshi is dodging the lightning bolts raining from the sky, chains suddenly erupted from the ground and actually took hold of his body. The chains were able to hold onto the body of Amatsu-Mikaboshi which should have been impossible due to the unique properties of his body. The chains were not the last surprise as fear suddenly crept in when he saw the slime like monster.

"This demon! Does he not know the implications of having a Beast of Endless Devouring! Fortunately, it is still small and have yet to devour powerful beings." Amatsu-Mikaboshi thought as he recognized the terrifying power of Dodu.

Amatsu-Mikaboshi was about to use teleportation when it actually failed. He looked at the source of the anomaly and found another beast that came from the stars. He could not believe that a single demon is able to command beasts that could be said to be world destroyers and not be killed by the gods. In fact, a lot of gods do fear Adrian's soulbounds, but they are just quiet because the one backing him up is the Twin Gods.

Amatsu-Mikaboshi knew that he must use more mana in order to teleport away, but he believed that he could win. The cap on his power is slowly getting released and he just needed to wait. Just a few more minutes and he would be able to absolutely destroy everything around him. He just needed to endure the entire way there as he has done before when he was sealed for thousands upon thousands of years.

Amatsu-Mikaboshi thought that he is just bound, and his body should be sturdy enough to not fall for the remainder of the time, but he is a bit optimistic. Vines suddenly grabbed onto his body, and it was tighter than the chains. This was the first time that physical things were able to grab onto his body as only divine seals can hold him in place.

"This demon! He is dangerous! I must kill him or devour him in order to become stronger!"

Amatsu-Mikaboshi thought as his eyes darted around looking for the immense power source of the massive collection of natural energy.

Wisteria has been collecting natural energy since her arrival and the tree on her back suddenly glowed bright. The being inside the large tree peered its head out and it was a serpentine dragon head. The dragon head ate all of the natural energy that Wisteria collected and blasted it into a powerful beam that shot towards Amatsu-Mikaboshi. The powerful blast of natural energy actually made Amatsu-Mikaboshi tremble which is an unfamiliar sensation for him. The beam of natural energy shot cleanly at Amatsu-Mikaboshi's body while lightning rained down due to Kimat's roar. As if that is not enough, a powerful light exploded in the sky as Saena has finished her collection of light energy. Adrian made sure to hide Saena as Amatsu-Mikaboshi might be wary of a being like her that can release powerful blasts of light energy. Saena released the powerful blast light towards the mirror that Adrian created earlier. Adrian then focused all six major mirrors towards Amatsu-Mikaboshi as Saena's attack was multiplied by this technique. Amatsu-Mikaboshi did not think that there was another beast hidden above the clouds that evaded his detection. All of the attacks accurately hit the body of Amatsu-Mikaboshi, and a powerful explosion happened that scattered dust and stone. "Was that enough?" Adrian thought as the smoke finally cleared. Amatsu-Mikaboshi could no longer be seen entirely as only his destroyed mask and a few parts of his body could be seen remaining tethered by either vines or chains.

Chapter 2194: Against a Chaotic Greater God II

The smoke cleared but the danger that Adrian felt did not subside. He could see the broken mask of Amatsu-Mikaboshi cluttered on the ground but there was no notification saying that the enemy has

been killed. He did get a notification that he dealt damage to the enemy but only parts of the tar like body of Amatsu-Mikaboshi are scattered about.

"Impressive" A grittier voice that sounded close to that of Amatsu-Mikaboshi stated but all of them heard it being spoken by at least five people.

"A hidden holy light beast from above the skies." A deeper and heavier voice of Amatsu- Mikaboshi stated and it also sounded like multiple people spoke at the same time.

"You tried your best, but you are already too late." The voice of Amatsu-Mikaboshi could be heard by Adrian as if he was speaking directly onto his ear.

"Telepathy! He already reached the level of a Greater God!" Grand Mistress Nu Wa stated as a sonorous laugh echoed in the area.

As the laughter echoed in the area, darkness fell upon it as if a powerful spell that called it summoned it. The darkness was spine chilling as all of them felt it because this very darkness is Amatsu-Mikaboshi. A silhouette of a face could suddenly be seen in front of Adrian and the others. A face that is just like a white streak as if intricate web of lights formed it from the darkness.

"Everyone! Protect yourselves!" Grand Mistress Nu Wa suddenly shouted as numerous chaotic dark spikes came rushing towards them.

The chaotic dark spikes were swift to the point that some already bypassed the initial barriers that Peridot already created. Adrian tried to save all of his soulbounds from being attacked but some were still damaged. Adrian also created mirrors around them to absorb the damage, but the chaotic dark spikes seemed to be more on the physical side which destroyed most of them immediately.

"You cannot defeat me! I have now ascended to an even greater power. I admit that the attack you did earlier hurt a bit but that is just a scratch. Surrender the Orb of Order then I might spare all of you from eternal death." Amatsu-Mikaboshi stated but his voice did not come from a single source as it came from the darkness that surrounded them.

"You are talking death to the literal Mediator of Death at your presence. If your body is darkness itself then I guess I should cut the darkness." Adrian stated as he forcefully moved his body that was pierced by some of the chaotic dark spears.

Even though his body hurts, Adrian forcefully slapped his six hands together as all of the mirrors that were invisible manifested. He even created more mirrors at the expense of his mana being almost close to zero. The mirrors shined as all of them were already infused with the spell that he was preparing earlier.

"Dimension Cutter!" Adrian stated as he already used up the mana needed for this spell when he loaded it up into Paradox.

Amatsu-Mikaboshi actually felt chills when his literal form is chaotic darkness. Amatsu- Mikaboshi suddenly felt searing pain in his body when it should have been impossible to do so. The body that is no longer with physical form felt pain akin to being scratched. It felt like being scratched once but the sensation suddenly multiplied which made Amatsu-Mikaboshi scream in pain.

The entire area around Adrian and the others could be seen to be filled with cuts in space. It looked like someone took a knife and sliced the bark of a tree, but the bark is actual reality. The scene of the area around them filled with slices in the dimension made even Grand Mistress Nu Wa tremble. Even back when she was a Creator Goddess, she could not do the feat of manipulating dimensions as that is only reserved for the Gods of Space.

"This child. Should he become evil, this world might actually burn and be destroyed." Grand Mistress Nu Wa thought as she finally got a glimpse of Adrian's abilities.

What Grand Mistress Nu Wa thought is what other gods also thought when they witnessed how Adrian manipulated his skills. He was not like a typical demon that just wielded spatial energy or temporal energy, but he infuses them with others. No other demon could do this because Adrian's demon species is the first of his kind. This was possible because of his high concentration of Asmodian blood but not everyone could arrive at the same result given the same conditions.

"It was like I am looking at those dangerous creatures back at the beginning of time." Grand Mistress Nu Wa thought as she has met the Asmodians before when she was still a Creation goddess and even, she feared them.

"Argh! I will kill you!" Amatsu-Mikaboshi shouted as he released more chaotic darkness spears that specifically targeted Adrian.

The scene of darkness being swallowed by the cuts in the dimension and it retaliating back is something only space horror could achieve but they are now experiencing it. Seeing that Adrian could not defend against all of them at once, Grand Mistress Nu Wa and Peridot combined their spells to create a flash of light that erased the chaotic darkness. Usually, the flash of light would

have erased the spears, but they became more powerful compared to the previous ones they destroyed.

"We need an even more potent light spell! Grand Mistress Nu Wa stated as she hurriedly tried to cast one, but she knew that it would no longer be on time. Peridot even sacrificed one of her prized Mythical tier gemstones of the light element to instantly cast the spell called Burst Nova, but the spell needed some time to charge up as well.

"If light is what you need then light is what you will receive!" Frey stated as her voice suddenly echoed in different octaves as she suddenly exploded in refracted light.

Adrian looked at Frey and she finished her preparations just in time to save him. The descent of the Goddess Freyja made a powerful light explosion that destroyed all of the chaotic dark spears that were aimed at Adrian. Frey looked at the tired Adrian and gave him the look of assurance to leave this to her for the moment.

"A being of Chaos. Rare but not indestructible. To think that such a rare being exists in the land of the Beast Gods." Frey with the backing of the Goddess Freyja stated. The Goddess Freyja referred to the eastern continent as the Land of the Beast Gods as this was the term other gods use to address the eastern continent.

"I knew that girl smelled like someone from the Land of Frigid Frost. To think that she was the Avatar of the Warrior Goddess of the North. I have heard of your reputation, but such reputation is not effective here in the eastern continent where your influence is minimal or nonexistent. You are even inhibiting an avatar which means you are weaker than a lesser goddess. Killing you will make my name known to the other gods and will solidify my reign as the new master of the eastern gods." Amatsu-Mikaboshi stated as he knows of the Goddess

Freyja.

The fallen gods of the eastern continent have labeled some of the gods of other continents as dangerous. They have at least one for each continent and the Goddess Freyja is the one that they are wary of when it comes to the northern continent. The fallen gods of the eastern continent did not just want to stop their rise in the east as they planned to occupy the entire world. The Goddess Freyja is coined as the Warrior Goddess of the North and is high in the list of those to not offend.

"This body might be weaker than a greater god as yourself but dealing it to defeat you would be at the very least exciting to me." Frey with the voice of the Goddess Freyja stated as she

flew to the sky and release wings made of northern lights.

Frey condensed the northern lights into her spear and hurled it in a specific direction. One would think that they would need a wide range attack like dimension cutter to deal damage to Amatsu-Mikaboshi but that is not true. Even if the body of the Greater God Amatsu- Mikaboshi is the darkness surrounding them, the true essence should still be in one place. Even gods cannot hide their true presence from other gods and the Goddess Freyja could easily see it as her eyes can see weakness itself.

The spear coated in light flew true as it targeted a specific area. An area that could be seen to

have less damage than the others as if it was heavily protected. Amatsu-Mikaboshi could no longer pretend that the area that was targeted is not important. Amatsu-Mikaboshi created large sharp claws that intercepted the spear that Frey released.

Chapter 2195: Against a Chaotic Greater God III

The chaotic dark claws that stretched from the darkness around them protected the area that Frey wanted to hit. This made the darkness tremble as if rage started to burst out from it as this is the stretched body of the Greater God Amatsu-Mikaboshi. This is the best that the Greater God Amatsu-Mikaboshi could do though as his strength is limited by not just the world but also by the current state of the Goddess Izanami.

"I will kill all of you!" The Greater God Amatsu-Mikaboshi stated as the surroundings itself echoed his voice as if a hundred people were speaking at the same time.

"You shall do no such thing." Frey stated as she flew a bit higher in the sky and released a blinding light full of divine energy.

"Kuaahh! Ahahaha!" Numerous mouths suddenly laughed at the attempt of Frey.

"Did you really think that I would be afraid of the light?! I am born from the darkness of chaos energy. I have reached the state of a Greater God and have shed the pitiful weakness that a low divinity body could ever receive.

The only reason why light itself harmed me is due to the fact that the body that was created with my weakened divinity is incredibly fragile. I now have regained my strength that can survive even in

the Void." The Greater God Amatsu-Mikaboshi stated as he released clones of his weakened divine body to kill all of them.

Humanoid shadows that have sharp claws and tendrils made of chaotic darkness emerged from the body of the Greater God Amatsu-Mikaboshi. Frey could only lament that her connection with the Goddess Freyja is not solid enough in the eastern continent. She is also weakened when there is no night sky that could be seen. The Ryujin earlier has also been isolated from the current surrounding as the Greater God Amatsu-Mikaboshi created a barrier that separated them from the outside world.

"Children, how long can you hold on in a fight against him?" Grand Mistress Nu Wa asked as she created barriers to hold off any enemy that dares to come their way.

"Not long. If it is a greater god level enemy, then maybe five minutes at best. If he keeps playing with us like this then maybe longer than that." Levin Cloud stated but this is optimistic.

Greater God level enemies need the cooperation of at least a hundred high level players to contend with one. The odds of victory even with a hundred players is also just half which means that they can easily lose if they do not perform well. Adrian had to agree with Levin Cloud as Greater Gods are different levels of difficulty entirely. They might have been able to contend with a Lesser God, but a Greater God is difficult.

"If we got the entire guild with us then it might be possible. Can you transport all of them here with the Guild Call special skill that a guild master can do once a month?" Peridot stated.

"I tried but whatever form he is in is blocking it. It seems divinity could be used to block special skills. I should have called them earlier if this was going to happen." Adrian stated as he is waiting for his mana circuits to recover before he chugs another mana potion.

"What about your soulbounds? Where are they?" Levin Cloud asked as he knew that Adrian used Limit Break: Summoner earlier to summon all of them but they were nowhere to be seen.

"They are alive, but our enemy isolated us in a peculiar dimension. I already tasked Paradox to crack the dimension so that I could at least destroy it. My soulbounds and the Ryujins outside should be facing the same enemies as us." Adrian stated.

Adrian hit the nail on the head that his soulbounds and the Ryujins were indeed attacking the barrier that isolated them. On the other side, Adrian's soulbounds and the Ryujins were also destroying lesser copies of the Greater God Amatsu-Mikaboshi. They were also trying their best to destroy the

barrier that isolated them. Adrian's soulbounds were erratic to the point that they released their true forms to try and destroy it.

Even the fierce Ryujins could not get close to the soulbounds as they were literally in pure rage. They are not blinded by rage though but using it to fuel their power as they hit on the barrier. The soulbounds are also the reason why the Greater God Amatsu-Mikaboshi could not fully attack Adrian and the others. If he loses any control, then his barrier might shatter, and his enemies would join forces to kill him.

"To think that I would be hard pressed against beings of lower divinity. I need to kill that demon and former creation goddess before all the divine energy I have siphoned gets depleted." The Greater God Amatsu-Mikaboshi thought as he could not split his mind up when he is using this form.

"My precious child, I will leave the protection of them to you. I need to use my special skill to return some of the power that I lost. It is the only way we can defeat this fiend." Grand Mistress Nu Wa stated as she looked at Peridot seriously.

"Leave it to me." Peridot stated as Grand Mistress Nu Wa suddenly turned to her dragon form and coiled her body to look like an egg.

"I have been waiting for you to do just that. You are the one that I need to push so that you will attempt to regain your former divine form." Greater God Amatsu-Mikaboshi stated as he laughed thinking that his victory has been secured.

Six large chaotic dark claws reached out towards Adrian's group. Frey did her best, but she was only able to stop one hand from approaching. Peridot did as she promised and took out six different mythical tier gems. She crushed all of them and casted a powerful barrier that actually defended them against the remaining five hands.

Chapter 2196: Against a Chaotic Greater God IV

"Great job! How long can you hold this on for?!" Levin Cloud asked.

"Two minutes at most. Even mythical tier barriers are almost infective against the full-on assault of a greater god when they are hell bent in killing you." Peridot stated as she

maintained her concentration on the barriers.

"I will help you! Protection of Nature! I choose the barrier surrounding us." Levin Cloud chanted as he empowered the barriers that protected them from the chaotic dark claws but also noticed that his mana suddenly dropped to the red zone.

"If I did not stop myself then I would have fainted! I was only able to strengthen the barriers for a short while, but it ate up all my divine energy and almost my entire mana. I bought at least one minute at most." Levin Cloud stated.

Adrian seeing his friends struggle finally made a decision. He went out of the protective area of the barrier which made two of the claws aim for him. The Greater God Amatsu-Mikaboshi thought that Adrian lost his mind as he is also a target for him. He knew that the demon has the Orb of Order in his personal pocket space. He also knows that killing Adrian would also release the Orb of Order as it is an item that cannot be own or kept by someone dead.

"I would have wanted to study your body as demons always fascinated me, but I must kill you for my plan to go into fruition." The Greater God Amatsu-Mikaboshi thought as two of his chaotic dark claws are about to crush Adrian into meat paste.

"Let us see what will happen if this entire area is flooded with nether energy." Adrian thought as he is actually willing to overuse his body's energies.

"Nether Blast!" Adrian stated as he suddenly covered himself with his mirrors while also creating numerous mirrors around him.

He even created a mirror that transported Frey back to the protected area as he did not want her to be killed by what he is about to do. The nether energy in the area suddenly got riled up which also made the Greater God Amatsu-Mikaboshi flinch. The dangerous energy that he was a bit wary of suddenly started to go wild. This only happens when one cannot properly control it or the one that produced it has gone mad.

"You! You would sacrifice the stability of the dimension for your victory!" The Greater God Amatsu-Mikaboshi shouted as what Adrian is about to do will punch a hole in reality.

"Thanks to a certain someone that destroyed a dragon vein, punching a hole in reality here will not create consequences. The only reason why demons are holding back is due to the fact that running wild will destroy the dragon veins that create the world barrier. With no working dragon vein, I can exceed what I can output. So... Thank you for that!" Adrian stated as he curled himself into a ball and his body suddenly glowed in an eerie light.

"No!" The Greater God Amatsu-Mikaboshi shouted as the six chaotic dark claws reached out towards Adrian, but they were too late.

Even if the claws pierced Adrian's body, he did not shout in pain as he has already let go of the control of his body. Adrian's entire body glowed in a powerful bright light as he also absorbed every bit of nether energy in the surroundings. With a smile on his face, Adrian's body exploded in a powerful burst of nether energy that destroyed not only the chaotic dark hands but also the area around him.

The powerful explosion even shook the barrier that protected Levin Cloud, Peridot, and Frey. The explosion was so powerful that it erased the enhancement that Levin Cloud did. When the smoke finally cleared, the darkness that surrounded them could be seen to have patches of light seeping through as Adrian did a great deal of damage on the Greater God Amatsu-Mikaboshi. They could even see the Ryujin that were outside casting powerful elemental spells to destroy the barrier.

Adrian's soulbounds could not be seen though as they were sealed when he died. The Greater God Amatsu-Mikaboshi could be seen groaning in pain as nether energy suddenly started to creep up into his body. He could only shed off the areas infected by them as attempting to absorb it would risk weakening him. Still, the Greater God Amatsu-Mikaboshi emitted a laugh as the sacrificial bomb that Adrian did was not enough to defeat him.

"Such useless sacrifice! I am still here, and you are dead." The Greater God Amatsu-Mikaboshi stated as he looked around if the Orb of Order dropped.

"Where is it?! Where is the Orb of Order?!" The Greater God Amatsu-Mikaboshi stated as numerous eyes suddenly manifested on the darkness, but he could not see the Orb of Order.

"What is he looking for?" Frey asked as she recovered some of her mana from a potion while Levin Cloud healed her.

"I think it might be an item that Equinox gave me earlier. I thought that he was giving me something nonchalantly, but I think he must have given me something incredibly important." Levin Cloud stated as he gulped. He just took the item and placed it inside his inventory like Adrian told him without any questions.

"You! One of you must have it!" The Greater God Amatsu-Mikaboshi stated as all of the eyes that appeared suddenly focused on all of them.

The Greater God Amatsu-Mikaboshi angrily created smaller chaotic dark claws and used them to destroy the barrier protecting them. The claws did not pierce through the barrier though as the best it could do is scratch it. All of them noticed this and already came to the conclusion that Adrian's body explosion did more damage than what the Greater God Amatsu-Mikaboshi is telling them. They could even see patches of its body where light is seeping through which means that he was healing slowly.

Chapter 2197: Another Minute for Victory

"Can you revive him?" Peridot asked Levin Cloud.

"If a part of his body is still intact then I might be able to, but he basically disintegrated into nothingness. He will revive on his own as we just need to wait. We have pressing concerns as we need to endure the attacks." Levin Cloud stated as the Greater God Amatsu-Mikaboshi focused on attacking their barriers despite being weakened.

"My current form cannot last long as well. I need to do something also so that we can buy more time." Frey stated as she absorbed more of the energy needed to use her skills.

"If you do die, make sure that you have a body. I can revive that. Ouch!" Levin Cloud stated as Peridot suddenly hit him with her tail as that is not something you say to your team member. "Do not worry. I do not have crazy skills that can blow me up like him." Frey stated as she unleashed the wings made of northern lights.

Frey then proceeded to fly up and passing through the barrier as she waved her spear that radiated the same different colored lights that her wings have. The power of her spear is tremendous enough to destroy the chaotic dark hands that the Greater God Amatsu-Mikaboshi is always creating. Frey realized that the enemy that they are facing has been severely weakened as she was unable to do this earlier.

Frey made sure to use every bit of her strength to destroy the things that the Greater God Amatsu-Mikaboshi is creating where they are claws or spears. She felt like she was destroying those things for an hour, but it was actually just one minute due to the fatigue and stress that she is in. All of her senses are in hyperfocus because of the descent of the Goddess Freyja on her body. She felt everything in an extremely quick pace, and it could be seen when viewing from an outside perspective.

Levin Cloud and Peridot could not actually believe that Frey attacked so quick that their eyes could not see it. They suddenly felt goosebumps upon seeing how she fights up close as she was just

above the barrier. They suddenly felt like she and Adrian are perfect for each other as they basically pair up nicely when it comes to battle. The only difference between Frey and Adrian is that the former always maintains composure while the latter will turn on his battle maniac mode when he gets too pumped up.

"I really want to know who is more powerful when both of them fight." Peridot stated as she managed to ease her focus because Frey was doing the heavy lifting.

"If you have seen how our dear friend fights seriously then you might even think that he is a different person entirely. The past games that we did barely show his ferocity, but Pandemonium is giving him wings." Levin Cloud stated as he always remembered how fierce Adrian's battle style is when he gets pumped up.

"Ugh!" Frey exclaimed as all of the divine energy that she collected vanished from her body. The Goddess Descent ended as Frey already exerted too much and her body is slightly weakened. Fortunately, she did not stray too far from the barrier which is why she easily descended back down to the safe zone. Levin Cloud and Peridot told her that she bought them a lot of time as they can now last three more minutes under the constant barrage of the Greater God Amatsu-Mikaboshi. The minute that Frey has given them along with the minute that Adrian sacrificed for was enough for their victory.

The sphere that was Grand Mistress Nu Wa suddenly started to produce sounds. They could suddenly hear the sound of a beating heart as the pulse of the sphere actually healed the three of them. Greater God Amatsu-Mikaboshi could feel the power rising from inside the sphere as he forcefully absorbed more divine energy from his link with the Goddess Izanami. He fears that the being hatching from the sphere would be able to contend with him.

The Greater God Amatsu-Mikaboshi used all of the energy that he could currently wield to create clones of himself that attacked the barriers Peridot and Levin Cloud made. The two of them could feel the Greater God Amatsu-Mikaboshi becoming stronger and stronger as the sphere that contained Grand Mistress Nu Wa also rose in energy levels. The Greater God Amatsu-Mikaboshi was desperate as if he did not want the sphere to ever hatch.

"You left me with no choice! I shall devour even the land itself!" The Greater God Amatsu-Mikaboshi shouted as he broke the barrier that isolated them from the outside.

The Ryujins that were attacking the barrier was stunned as the barrier suddenly vanished but that is not a good thing. The darkness that was covering the area suddenly compressed as the Greater God

Amatsu-Mikaboshi created a compact form to produce a more powerful attack. He is not able to do much in his scattered form as it affects a large area and being a greater god weakens its strength.

"Darkness Devours!" The Greater God Amatsu-Mikaboshi shouted as the puddle of dark tar that was his now compressed body suddenly shot out sharp tendrils.

Some of these sharp tendrils pierced the ground, trees, and even some of the Ryujin that were unable to dodge or defend themselves. The sharp tendrils then absorbed the life energy of all the things that they are attached to. Even the energy of the ground is not spared as the sharp tendrils sucked it dry and turned the hard rock into soft sand. The trees that it pierced also died and dried up in a matter of seconds.

The Ryujins that were caught also suffered horribly as their abundant life force is suddenly siphoned away. Fortunately, no Ryujin died as they helped each other by cutting off the tendrils but a lot of them fell victim to their life energy being absorbed. Those that had their life forces absorbed fell into a coma and had to be taken away so that they will not fall victim again.

"Ah! Finally! Life force that is filled with a hint of chaos energy!" The Greater God Amatsu-Mikaboshi shouted as if he is in ecstasy.

Just as he stated, all living beings in the universe of Pandemonium have a shred of chaos energy in them as they were made by Chaos. Even a small pebble will have chaos energy, but it is so miniscule that it can barely be felt by even the gods. Also, few gods can even wield chaos energy in the first place as it is something that cannot be wielded unless your body is filled with it.

The Greater God Amatsu-Mikaboshi that had the body of a black tar puddle suddenly started to move. A tall and lean humanoid figure suddenly rose up from the puddle which resembled a mannequin that has a body made up of oil or tar. The being then created sharp claws using its body, but its face was nothing. Suddenly, something that only happens in horror movies occurred as Greater God Amatsu-Mikaboshi used up its own sharp claws to pierce holes into its face.

As soon as he used his claws to pierce eyes that looked like dead sockets of empty void, the Greater God Amatsu-Mikaboshi proceeded to rip out a mouth for it to speak. As soon as the mouth has been created, the Greater God Amatsu-Mikaboshi started speaking with limited words. With every word spoken, black sludge oozed out from the mouth which created an even more terrifying image.

The Greater God Amatsu-Mikaboshi did not move like a human would as every step it took in its new body made it creak. The creaking noise could not be described easily as there was nothing to create it organically. The new body of the Greater God Amatsu-Mikaboshi is basically the stuff of

nightmares as he twisted his body in an angle that no human could do and charged towards the barrier like a madman.

The Greater God Amatsu-Mikaboshi suddenly slammed onto the barrier that protected the group, and one could see his face planted on it while parts of his tarlike body dripped down. Peridot is not easily afraid but seeing that kind of image actually made her get goosebumps. Peridot did not back down as she reinforced the barrier even more, but the Greater God Amatsu-Mikaboshi suddenly plunged five claws onto the barrier.

Two claws were from the humanoid appearance while the other three were all created from his body. The terrifying thing is that all five claws actually pierced the barriers that Peridot created, and she felt the immense weight of the attack as she is using her own essence to strengthen the barrier to the highest degree. Peridot could feel it as she looked at the empty voids that were the eyes of the Greater God Amatsu-Mikaboshi.

"Run!" Peridot shouted as all five claws destroyed the barrier that she worked hard to build.

Chapter 2198: Stuck in Limbo

"Where am I?" Adrian stated as he looked around but did not know where he is.

[You have died.]

[You have been transported to Limbo, but you can be revived. Do you wish to be revived?]

"Yes. I want to be revived." Adrian replied as he waited for him to be transported back to the world of the living immediately, but he was strangely stuck in Limbo.

[Cannot reconstitute the body immediately due to factors. One minute will be needed to revive back to the mortal realm.]

Adrian did not expect that he would be stuck in the dimension that he has privileges over. He looked around to see if there was any soul or Anubis near but there were none. Everything around him was barren and empty as if he was in a part of Limbo that is a secret place or a sealed place. He tried calling out but there were no answers which meant that only he is present in this area.

"Strange. I feel the same energy as I get when I am in my Chaos Pierrot form." Adrian stated as he hyper focused and sensed the uniqueness of the area.

Adrian tried to follow the trail where he could feel that sliver of energy, but he did not expect that his time has already ran out. It was already strange for him to be sent to Limbo when his revival skill is still active. He usually just floats in soul form in the mortal realm and wait for his revival. He did find it odd but one minute is not enough time to deliberate on what happened.

His soul started to fade as he is being sent back to the mortal realm. The time he spent is short, but he had a glimpse of a sealed area in Limbo. He would definitely ask about it from the Anubis or other gods of death when he has the chance. For now, he should focus on defeating the enemy that is trying to kill Grand Mistress Nu Wa.

"I will make sure to find this place as I feel connected to it." Adrian stated as he totally vanished.

All of Peridot's barriers were destroyed and she was also sent flying by the impact that happened. The Greater God Amatsu-Mikaboshi actually inverted the elements of the barrier that it backfired on the one that casted them. Peridot used mythical tier stones to create them which meant that the impact on her was not small. She could be seen coughing out blood as she was sent flying.

Frey caught Peridot with great effort and Levin Cloud immediately started to heal her. The Greater God Amatsu-Mikaboshi suddenly twisted his body once again as he aimed to kill all three of them. Levin Cloud was ready to use his body as sacrifice as he could still revive. His death would buy enough time for the two girls to escape as they were given special scrolls of teleportation by Adrian that they can use in a fight.

"Your death will fuel me." The Greater God Amatsu-Mikaboshi stated as his voice is filled with chills and sounded like scratches on metal.

"You will do no such thing." A beautiful sonorous voice stated as a beautiful woman suddenly released a powerful blast of energy that sent the Greater God Amatsu-Mikaboshi flying.

The smoke cleared and showed Grand Mistress Nu Wa with divine energy brimming from her body. Her clothes even became more beautiful as a ssh even floated behind her as if it defied the gravity. When they looked down, the lower half of the Grand Mistress Nu Wa was no longer legs but a serpentine body.

"So, you have assumed your divine form, Creator Goddess Nuwa. The fact that you could do so while the other gods of the eastern continent could not do it means that you are indeed built different." The Greater God Amatsu-Mikaboshi stated as he rearranged his body back to normal.

"You have assumed your divine form as well. We are built different in that regard." The Goddess Nuwa stated as seven different colored gems rotated around her representing all elements plus a special element that only she could wield.

"The fact that you have that Chaos Fragment... you are definitely a creator goddess. I think they are all fools to betray you back then and they were rightfully punished after. Shame that you had to sacrifice your entire divine body for that and be satisfied with a Ryujin's body upon reincarnation." The Greater God Amatsu-Mikaboshi stated as he definitely knew what happened in the eastern continent and how the Goddess Nuwa became a Ryujin as well.

"Enough of your games, chaos born. I shall destroy you now to weaken those aggressors!" The Goddess Nuwa stated as she activated six of the gems.

In just one cast, the Goddess Nuwa suddenly created ten Elemental Catastrophes around the Greater God Amatsu-Mikaboshi. The latter did not expect that the Goddess Nuwa would be this masterful already despite not assuming her divine form for a millennium. The Greater God Amatsu-Mikaboshi wrapped his body with his own energy again while creating spikes that destroyed five of the magic circles.

A powerful elemental explosion happened but the Goddess Nuwa did not believe that the Greater God Amatsu-Mikaboshi fell for it. She immediately created six different barriers around her, and she was correct in doing so. Within the smoke of the explosion, fifty chaotic dark tendrils aimed for her, but it was blocked by the barrier. When the smoke cleared, she saw the deformed body of the Greater God Amatsu-Mikaboshi, but he did not look like he was in pain.

The empty void eyes of the Greater God Amatsu-Mikaboshi looked at the Goddess Nuwa and smiled. The destroyed pieces of his body soon formed once again as if all the damage that he received were mere illusions. The Goddess Nuwa did not seem shocked as she already knew that the enemy could do is because she has fought the Greater God Amatsu-Mikaboshi before. The Goddess Nuwa made use of all the elements and even using them in succession since the Elemental Catastrophe spell was not effective against the enemy. She would create a powerful blizzard which follows up with a heat wave. Once the ice melted from the heat wave, she would call upon a powerful burst of lightning.

The Goddess Nuwa used up different elemental combinations to trigger different elemental effects but the body of the Greater God Amatsu-Mikaboshi was sturdy. The body of the Greater God Amatsu-Mikaboshi is something that could not be damaged easily as it is a body made of Chaotic Darkness. He could be damaged but the resistances of gods to certain elements are powerful and the Greater God Amatsu-Mikaboshi is resistant to all elements. The Goddess Nuwa knew that her elemental spells will not be able to land a finishing blow against the Greater God Amatsu-Mikaboshi. She knew that the enemy has powerful resistances against all of the elements which is why she made sure to slip in spells that are enchanted by her special seventh element. Creator gods or goddesses have a special element called Creation which lets them manipulate anything they desire and turn it into something. Creator gods and goddesses also have tiers as some have been blessed by Chaos as they were given fragments of the original creator god. The Goddess Nuwa is one of them, but she can only control this fragment when in her divine form. Her Ryujin reincarnation could not handle this power as it is too much for a mortal's body to take in.

"Kek!" The Greater God Amatsu-Mikaboshi suddenly exclaimed as he felt a piercing pain from one of the wind blades that hit him.

"It seems that you are still weak to the power of Creation." The Goddess Nuwa stated as she imbued one of the wind blades with the energy of Creation. She manipulated the wind blade to become a wind blade that could even deal damage to gods. This is how broken the power of Creation is which is why the other gods are afraid of the Gods and Goddesses of Life since they also hold similar power as all of them can be labeled as creation gods.

"You are confident but let us see how long you can hold on while defending all you hold dear." The Greater God Amatsu-Mikaboshi suddenly laughed which made the Goddess Nuwa look towards Peridot.

The Goddess Nuwa suddenly saw Frey and Levin Cloud fighting weaker clones of the Greater God Amatsu-Mikaboshi. Despite being weaker, each of these clones have the strength of a demigod and all of them are already tired. The Goddess Nuwa tried to cast a powerful blizzard to freeze the ones attacking Peridot but that also left her defenseless.

"Made you look." The Greater God Amatsu-Mikaboshi stated as he suddenly closed in on the Goddess Nuwa. The Greater God Amatsu-Mikaboshi pierced through all the barriers just like what he did with Peridot and is about to pierce the Goddess Nuwa's neck with his claws but a powerful blast of gravity suddenly hit him.

Chapter 2199: Stuck Between the Fight of Two Gods I

"Hope that I am not too late." Adrian stated but he could feel his mana draining trying to pin down the Greater God Amatsu-Mikaboshi.

"You are not late, child. You have arrived on time." The Goddess Nuwa stated as she froze the lesser clones of the Greater God Amatsu-Mikaboshi and also released a large pillar of ice that slammed towards the latter.

The Greater God Amatsu-Mikaboshi was taken by surprise by the gravitational shift. He would normally not be affected by this, but he could be affected by spatial energy more. The Greater God Amatsu-Mikaboshi does not have resistance against Origin Magic that the demons use which is why he was wary of Adrian in the first place. He thought that the demon died already, and he also made sure to see if the priest would dare to revive him.

The large pillar of ice that slammed on the body of the Greater God Amatsu-Mikaboshi also dealt damage to him. The elemental damage was reduced but the weight and the added gravity made sure to pound him to the ground. The Greater God Amatsu-Mikaboshi might have high elemental resistance, but he is incredibly susceptible to blunt force. This was the real weakness of the body that the Greater God Amatsu-Mikaboshi has.

The Greater God Amatsu-Mikaboshi could feel another large object hovering on top of it him which is why he scattered his body into liquid. The Goddess Nuwa created another pillar of ice to slam into the body of the enemy, but the Greater God Amatsu-Mikaboshi managed to escape. The Greater God Amatsu-Mikaboshi knew that being damaged would lead to his downfall which is why he opted to escape.

The Greater God Amatsu-Mikaboshi did not just scatter his body for nothing as he opted to have another target while he reformed. His sludge-like body suddenly turned into numerous spikes that shot themselves towards Adrian. If he was unable to kill the demon before then he will kill the demon again. All of his plans started to falter when the demon intervened which is why killing the demon would be the best way to get his victory.

The spikes that were made of pure chaotic darkness shot towards Adrian, but he did not look worried. Adrian directed his gaze towards Levin Cloud as the latter took out the Orb of Order from his inventory along with a talisman. Levin Cloud immediately used this talisman that Adrian also has a copy of. The talisman that was stuck on the Orb of Order activated and switched places with the talisman on Adrian's hands.

The chaotic dark spikes which were parts of the body of the Greater God Amatsu-Mikaboshi actually stopped in mid-air when they were about to clash with the Orb of Order. Adrian could be seen to have this disappointed look on his face as the prediction he did not go as he thought it would. He would have needed to exhaust vast amounts of energy to destroy the Orb of Order which is why he opted to have it be destroyed by another.

He wanted to have the Greater God Amatsu-Mikaboshi attack it and destroy it in the process, but the latter was too intelligent. The fact that the Greater God Amatsu-Mikaboshi could control his body so masterfully even if they are practically sludges made it difficult to predict what he could do. Still, Adrian now took the attention of the enemy as the prized item that he wanted is now in Adrian's hands.

The separated sludge parts of the Greater God Amatsu-Mikaboshi suddenly grouped up once again. The full body of the Greater God Amatsu-Mikaboshi appeared once again and he repeated the steps of slitting his face to produce eyes and a mouth. The process always remained creepy and disturbing but all of them have become accustomed to it.

"It seems that I will not win unless I do something drastic." The Greater God Amatsu- Mikaboshi stated as he smiled and suddenly flew towards the Sanctuary of the Ryujins. Knowing what the Greater God Amatsu-Mikaboshi is about to do, the Goddess Nuwa immediately flew to catch up towards the enemy. The Greater God Amatsu-Mikaboshi and the Goddess Nuwa suddenly stated a fight in the skies as both of them released attacks that tried to bring each other down. Adrian also followed suit even if he could not affect the battle, he needed to check for an opportunity like earlier.

It is not just Adrian that flew in pursuit as the others did so as well. Frey rode on her pegasus while Peridot and Levin Cloud rode on the Qirin. All of them could see the traces of the battle between the two entities as even the mountain was carved by their simple spells. The both of them were not holding back in killing each other but that also meant making it more difficult for others to provide help.

"They are flying to fast while attacking that I cannot even follow the spells with my eyes." Levin Cloud stated.

"I have to use my own elemental sense to make sure that we dodge the incoming attacks." Peridot stated.

"This is difficult. We cannot contribute to this battle because they are in a league of their own. Do you think the Goddess Nuwa can win even if she does not have our assistance?" Frey stated.

"She will not win. The Greater God Amatsu-Mikaboshi is still hiding something. I can feel it." Adrian stated as he applied Chrono Liberation which is a more powerful version of his time speeding spells.

[Movement speed is increased by 200%.]

[Reaction speed is increased by 100%.]

"If we cannot join in the fight then we could at least protect the mountain. The Greater God Amatsu-Mikaboshi seems to be destroying the mountain itself. I can feel the land shifting to a great degree which means that the mountain could fall if he is not stopped." Levin Cloud stated but an arrow made of pure energy suddenly brushed past his ears to kill a lesser clone that was about to assassinate him.

Chapter 2200: Stuck Between the Fight of Two Gods II

"The skies are not safe as well." Adrian stated to remind them that the Greater God Amatsu-Mikaboshi is sneakier than they realize.

Just as Adrian warned them, lesser clones of the Greater God Amatsu-Mikaboshi with tendril wings surrounded them. They were parts of the Greater God Amatsu-Mikaboshi that he discarded while fighting against the Goddess Nuwa. It seems that he planned on using all of the clones to launch a sneak attack on the goddess, but Adrian and the others managed to notice it.

"We need to trap the Greater God Amatsu-Mikaboshi but how do we do that?" Levin Cloud stated as he knew that having the enemy be enclosed will increase their chances of winning.

"How can we do that when we are dealing with these ugly clones while the goddess is fighting with him in a battle that we cannot even follow?" Peridot stated as she blasted the lesser clones with her elemental spells. They are not easily killed but they are sent crashing down to the ground if she hits them with enough force.

"I agree with her. Do you perhaps have any sealing spells?" Frey stated as she easily skewered the lesser clones of the Greater God Amatsu-Mikaboshi while mounted on her flying mount. "I do not have all the spells needed for all occasions. I am a summoner... not a mage." Adrian replied as he shot down more of the lesser clones.

"What else can we do then?" Peridot asked.

"Can you send a telepathic message to your mother?" Adrian asked Peridot.

The Goddess Nuwa and the Greater God Amatsu-Mikaboshi are not even dealing great damage against each other. All of the hits that they receive against each other were mild and could easily be healed. The Goddess Nuwa could see that the Greater God Amatsu-Mikaboshi is making sure to dodge at the very last second. All the elemental spells that she used were all being predicted by the enemy. She was about to blast the entire sky with Elemental Catastrophe when she received a message from Peridot.

"I see. That could work but sacrifices needed to be made for that to happen. Still, that is the best solution to this current dilemma since he is also attempting to breach our sanctuary." The Goddess Nuwa thought as she continued with her onslaught of elemental spells.

The Greater God Amatsu-Mikaboshi knew about the Ryujin more compared to the other gods. He knew that the Ryujin have the special reverse dragon scale like the other dragons, but he also knows that they could detach it from their body to keep it safe. He knew that the reverse scale of the Goddess Nuwa should be in their sanctuary which is why he is headed there to attack.

"Once the physical body becomes severely weakened, I will be able to destroy everything and take what is rightfully mine." The Greater God Amatsu-Mikaboshi thought as he looked at his clones that were attempting to get the Orb of Order.

"Get out of my way!" The Greater God Amatsu-Mikaboshi shouted as he released a wave of chaotic darkness that temporarily blinded the Goddess Nuwa and even the others that were in pursuit.

"Ah!" The Ryujins that were protecting the sanctuary were startled upon suddenly seeing an entity that emanates disgusting energy.

"Protect the sanctuary!" The Ryujins shouted as they released elemental spells against the Greater God Amatsu-Mikaboshi, but the latter just scoffed at their puny attempts of damaging him.

"All of you shall die by my hand. Just patiently wait your turn." The Greater God Amatsu-Mikaboshi stated as he plunged his claws on the barrier, and it shattered like glass.

The sudden destruction of the barrier created a powerful force that swept away the weakened Ryujins. Some of the Ryujin are still asleep and those that just woke up are still trying to consolidate their energies. Attacking the Ryujins now is indeed the perfect time as they are not ready to fight against heavy hitters.

The Ryujins that managed to recover turned to their dragon forms as they could wield magic more easily in this form. They all blasted the Greater God Amatsu-Mikaboshi with elemental attacks, but he could withstand them as if it was nothing. Just as the Greater God Amatsu-Mikaboshi was about to massacre the Ryujins, time suddenly slowed down as the Ryujins that he was about to target suddenly got swallowed by small portals.

One of these portals even opened in front of the Greater God Amatsu-Mikaboshi as a warrior riding a winged horse holding a spear enhanced with divine light came out of it. The Greater God Amatsu-Mikaboshi used his claws to defend against the spear that aimed for his chest. This also left his backside open for the attacks of the Goddess Nuwa as he could feel the energy of the elements swirling from behind him.

Frey wanted to get a hit in, but it seems that the enemy reacts faster than they could execute their plan. Another portal opened up as a being made of trees appeared and plunged his arms towards the ground. Vines suddenly sprung up from below the Greater God Amatsu-Mikaboshi and bound his body. This was Levin Cloud in his true form as he infused his body with divine energy to strengthen his hold on the Greater God Amatsu-Mikaboshi.

The Greater God Amatsu-Mikaboshi could feel Frey pushing more and more as she really wanted to pierce him with her spear. The vines that strangled him did not pose a threat, but the sudden restriction made it difficult to fully defend against Frey. The Valkyrie is not the only thing aiming to kill the Greater God Amatsu-Mikaboshi as elemental blasts of six different elements rained down on the latter.

"I told you before, creation goddess! I cannot be harmed by your elements!" The Greater God Amatsu-Mikaboshi stated as he believed that there is nothing that can stop him, but it was not the Goddess Nuwa that attacked her from behind.

"I did not even attack you." The Goddess Nuwa stated as she appeared in front of the Greater God Amatsu-Mikaboshi from a mist and showed a painting to the latter.
