

## O Summoner 2401

### Chapter 2401: Greed is Good II

"They finally broke the formation!" Adrian thought as he looked at the direction of the Primordial Beast of Greed before suddenly vanishing from his location.

Adrian immediately commanded Kenos to gather the injured Immortals that were inside of the formation originally. He also quietly stored the two bodies of the jiangshis that they have collected. He slipped personal teleportation scrolls inside each of the bodies of the Immortals. He needed to do this because the real battle is now going to start.

The formation that oozed out its energy suddenly started to shudder. The immense energy that was dissipating suddenly started to gather into one place. Branch Leader Goldenclaw suddenly looked different compared to before as his strength surged to that of a demigod level threat in an instant. The eyes of Branch Leader Goldenclaw suddenly glowed in a pure yellow color as the energy around him started to coalesce inside of him.

Branch Leader Goldenclaw floated to the sky as a powerful aura exploded from his body which actually damaged anyone that is around him. He raised his hands up to gather all the energy that is dissipating from the formation. All of it was his and all of it should return back to him for he is Greed and Greed is Good.

Branch Leader Goldenclaw's actions also affected the surroundings as Kunlun is no longer at the protection of the formation. The real buildings and street started to shake as the sheer amount of power that Branch Leader Goldenclaw is absorbing could easily level a mountain. Some Immortals wanted to charge at him and kill him while he is busy absorbing energy, but the intensity increases with the distance.

The closer they are to Branch Leader Goldenclaw then the more powerful the pressure that they are going to contend with. Every building around Branch Leader Goldenclaw has already been reduced to rubble as they could not withstand the intensity of the energy. Just as everyone thought that Branch Leader Goldenclaw would succeed in absorbing all of the energy, a sharp sound suddenly pierced the loud explosion of energy.

All of a sudden, the body of Branch Leader Goldenclaw is sliced in half and dropped to the ground. Before them was the absolute powerhouse residing in Kunlun. The leader of the Murim Alliance where thousands upon thousands of Immortals join just to gain his approval. The most powerful being of the Murim Alliance which is none other than the Sword Saint Namgung Myeong.

"Alliance Leader!" The Immortals that saw the scene of Branch Leader Goldenclaw getting sliced in half cheered.

All of the Immortals thought that the fight is now over because the Sword Saint Namgung Myeong has already sliced the enemy in two. They would have continuously cheered if not for the sword saint to suddenly empower his sword and charge once again. The Sword Saint Namgung Myeong charged but he suddenly felt time and space bend as he returned back to his location.

"What is the meaning of this, demon!?" The Sword Saint Namgung Myeong stated as he looked at the being behind him.

"I just saved your life that is all. Kunlun will be wiped out at this rate so command all the formation masters that are under your banner and create one right now." Adrian stated but the sword saint did not take kindly to his words and actions.

"Why should I heed the words of an outsider?" The Sword Saint Namgung Myeong stated.

"You should do so because I saved your life. You can stop pretending now, Primordial Beast of Greed." Adrian stated as he looked at the sliced body of Branch Leader Goldenclaw.

The body that was sliced in half suddenly smiled as its two halves moved in unison even if they were separated. The Primordial Beast of Greed could only glare at Adrian as he would have taken a much better body should the sword saint attacked him the second time. The Primordial Beast of Greed is greedy for such a perfect body such as the Sword Saint as it could definitely hold his essence well.

The Primordial Beast of Greed could sense it when his current host was sliced in half. The Sword Saint Namgung Myeong was a man that has full of desires and greed. The greed that he felt might not be material, but it was greed to become stronger and become truly one with the blade. Should the Sword Saint Namgung Myeong go closer to the Primordial Beast of Greed then it would have tried to take the body of the Murim Alliance Leader without any question.

Adrian noticed that the Primordial Beast of Greed was waiting for something and observed first. The moment that he felt that something stirred inside of him as he contains a small fragment of the Primordial Beast of Greed is the moment he needed to act. When Adrian saw

the Sword Saint Namgung Myeong charge a second time, he felt the energy of greed inside of him resonate.

"Such a pesky little demon! You already stole some of what is mine and yet you still get in my way!" The Primordial Beast of Greed stated as he used the body of Branch Leader Goldenclaw to speak.

"So, the host is already dead then. I cannot even see the soul of the body owner." Adrian stated as he cannot see the soul of the real Branch Leader Goldenclaw.

"Do you wish to save the soul of this body? You cannot do that anymore because I have already absorbed him as nourishment. The fact that he gave up his body willingly when I told him that he will enjoy immense wealth and fortune is something that I can truly relish. We were incredibly compatible, but his body was not built for battle.

I would have gotten another vessel that is perfect for battle and with a greed for something almost unattainable, but you stopped me. I guess, I should destroy you and rip apart the part of me that you have devoured. A demon devouring a Primordial Beast is a being that should never exist! We should always be at the top of the food chain!" The Primordial Beast of Greed stated as the body of Branch Leader Goldenclaw suddenly turned into yellow particles.

The yellow particles swirled around and gathered all the remaining energy of Greed in the area. It did not even take long for the real form of the Primordial Beast of Greed to manifest. A large golden toad that has streaks of jade and diamond armor around its large body. Below the large golden toad are numerous golden coins that represent unimaginable wealth but all of them are illusory as it is the aura of the monster itself.

[You are in the presence of the Primordial Beast of Greed.]

[The Primordial Skill, Greed is Good, is now activated.]

[All beings that have a low Persona level will have status reduction that varies from 10% to 50%.]

[All beings around the Primordial Beast of Greed will have their money stolen at a rate of one gold every minute.]

[When the Primordial Beast of Greed has collected a total of 100, 000 gold coins from everyone around it, it will launch a powerful attack that deals 100, 000 Health as True Damage.]

[All beings around the Primordial Beast of Greed will have their desires amplified when it comes to owning something.]

[The Primordial Beast of Greed is the embodiment of Greed itself. All healing that is done in its presence will be reduced by 10%. The reduced healing percentage will be owned by the Primordial Beast of Greed as it claims ownership of everything around it.]

[The Primordial Beast of Greed also reduces the effects of potions by 10%. All potion effects that have been reduced will be applied to it instead.]

[The Primordial Beast of Greed also takes 0.001% of stats of all beings around it every minute. When it reaches its maximum capacity for stats taken, the Primordial Beast of Greed will double in size and double in stats as well.]

"It really is the embodiment of greed. So, are you not going to erect a formation to seal that beast?" Adrian stated as he looked at the dumbfounded Sword Saint Namgung Myeong.

The Sword Saint Namgung Myeong has killed his fair share of beasts, but nothing is as large as the Primordial Beast of Greed. The current size of the Primordial Beast of Greed easily dwarfs the size of a normal person as people are like ants beside it. The Sword Saint Namgung Myeong also only saw beasts of this size and they were the four divine beasts that protected the eastern continent.

"Formation Masters! Create an isolated space that will not affect the real Kunlun! Maintain it with your life or else this monster will destroy everything in its path!" The Sword Saint Namgung Myeong commanded as all of the formation masters in his employ nodded and created a large formation that covered the entirety of Kunlun and isolated them from the real world.

### Chapter 2402: Greed is Good III

As soon as the command of the Sword Saint Namgung Myeong was heard, the formation masters that were on standby hastily created a powerful formation that covered the entire city. The entire city of Kunlun was wrapped in a powerful formation that utilized at least the coordinated chanting of a hundred formation masters. The world became isolated as the real world and the isolated world split apart. The civilians and those that were not part of the Murim Alliance were all separated.

The Primordial Beast of Greed looked at the formation that as created and spat out a large gold coin from its belly. The large gold coin crashed unto the formation, but it did not break. The formation masters were dealt with a slight shock though as any damage to the formation will come back to them.

"Foolish beings! You have only locked yourself in a realm where I am present! I am all powerful!" The Primordial Beast of Greed stated as it released its powerful aura that created immense pressure on all of those that were not strong enough.

"You are not the first beast of this power level that I have slain!" The Sword Saint Namgung Myeong stated as he sliced through the pressure that is created by the Primordial Beast of Greed.

"Oho! An Immortal that has already attained the power close to that of a demigod. No... you are already a demigod but have yet to solidify your divinity. You alone will not be able to defeat me!" The Primordial Beast of Greed stated.

"You are correct. The Sword Saint Namgung Myeong will not be able to defeat you but remember that there are other Immortals here even if not on his level. I am also here as well." Adrian stated as he revealed himself in the air with his wings and horns blazing in nether flames.

"Hah! You cannot stop me even if you join hands with the demon. Now that I am in my real form, no one in this continent will be able to stop me! Gods cannot descend onto the eastern continent because of the curse plaguing this land! We, Primordial Beasts, will become the new gods once the divine beasts are killed!" The Primordial Beast of Greed stated proudly.

"For that to happen, you must kill all of us here first. Meteros!" Adrian stated as the sky suddenly spit apart to reveal the universe which made anyone that sees it be amazed.

The amazement was short lived as a large space rock came hurling from the rift and headed straight towards the Primordial Beast of Greed. The meteor that Adrian summoned instantly met with the powerful shield of the Primordial Beast of Greed that took on the form of coins stacked against one another. Adrian knew that the Primordial Beast of Greed will not be easily defeated but that shield does not even use mana as it was burning another resource entirely.

"You cannot defeat me! My funds are unlimited!" The Primordial Beast of Greed shouted as the meteor disintegrated even before damaging the enemy.

"All of you will die and I will seize everything that you all have! I am Greed incarnate!" The Primordial Beast of Greed declared.

"All warriors! Attack altogether! If we damage it enough, then its barrier will surely shatter! Do it for all of your descendants! If that monster does not fall today, then it will wreak havoc to all of the continent!" The Sword Saint Namgung Myeong shouted as he vanished from his location and slammed his sword against the barrier of the Primordial Beast of Greed.

The Immortals did not run as they already became determined. Even if this place becomes their burial ground, they will fight to the death to ensure that their descendants will live peacefully. Their deaths will bring glory to their family as they have fought against a being that rivaled the power of a divine beast.

"Attack all you want, insects! I will never be touched by your filthy hands!" The Primordial Beast of Greed stated but something caught its attention as two beings were flying in the sky.

"Let us test that then. Meteoros!" Adrian stated as he once again used a large amount of mana to split the sky open and call upon a large meteor.

"Moon! I need your help!" Peridot called upon the moon that is now looming in the night sky.

"Kanlaon, empower all of our attacks with elemental buffs." Adrian declared as he summoned Kanlaon in place of Sirius as the latter was still resting.

Kanlaon's large body drew the attention of all the people but that is not the only thing. Six magic circles suddenly appeared in the sky and each of them carried different elements to it. The large meteor and the moon rocks that Peridot called upon have all made contact with the magic circles.

Each falling rock that enters a magic circle will get imbued with that specific element and Kanlaon used all six. By the time the rocks pass all through the magic circles, the attacks that Adrian and Peridot did are now transformed into a different element. A special element that only appears when all six elements perfectly converged.

"Should we call this attack, Elemental Meteor Catastrophe?" Adrian stated with a smile as they literally created a version of elemental anomalies.

The Elemental Meteor Catastrophe hit the barrier of the Primordial Beast of Greed. The first one that hit the barrier did nothing and it carried on until the tenth one, but something changed passed that. Each falling rock created the elemental catastrophe explosion that deals all elemental damage and each of them hits are powerful. So powerful that the barrier of the Primordial Beast of Greed actually shook.

The Primordial Beast of Greed suddenly lost its smug grin as it saw the large meteor that was covered in elemental catastrophe. The Primordial Beast of Greed suddenly swallowed hard and then spat out a large golden coin that met with the boosted meteor.

#### Chapter 2403: Greed is Good IV

The boosted elemental meteor clashed with the large gold coin that the Primordial Beast of Greed spat out. The clash of the two created a powerful explosion that actually made a storm of elemental energy lash out in the area. The formation masters had to conjure up a barrier to protect the Immortals while the Primordial Beast of Greed relied on its barrier to deter the effects of the explosion.

[You have gained the buff, Lethal Piercing for one skill.]

"Andromeda." Adrian calmly stated as mana gathered on his arrow.

Amidst the confusion and explosion of elemental energy, Peridot crushed a Mythical Tier stone called Sharp Obsidian. It was a stone that lets her cast one of the most powerful buffing spells that she could cast. A spell that lets any skill ignore the defenses of enemies by 80% but a special effect of bypassing barriers.

Adrian blazed this arrow with pure nether energy as the galaxy itself is contained on the tip. This powerful pressure was not detected by the Primordial Beast of Greed because of the elemental storm still blocking the view and attacking its barrier at the same time. Adrian silently let this arrow lose and it pierced through the dark clouds that was created by the elemental storm.

The Primordial Beast of Greed sensed it too late as the arrow itself was only the size of a needle if compared to its body. The arrow filled with the aura of a galaxy suddenly reached one of the eyes of the Primordial Beast of Greed. As soon as the arrow hit the eye of the Primordial Beast of Greed, it suddenly burst into a large cosmic storm that also blazed with nether flames.

"ARRGHH!" The Primordial Beast of Greed shouted in pain as this was the first time it actually felt pain in its entire lifetime.

The triple-colored flames burned its eye as it devoured and then extinguished the primordial essence that it has on its body. The Primordial Beast of Greed did not want to admit it, but these triple-colored flames scare him. It was something that actually went against its nature as if its duty was to erase all existence. Primordial Beasts are the symbols of existence itself as they are created by the world and will never truly die but the nether flames negated that.

"Bullseye. Literally or maybe Bull Frog Eye?" Adrian stated as his attack successfully bypassed the barrier of the Primordial Beast of Greed but also managed to deal large amounts of damage.

"You were only able to shave off 5% of that thing's health though. I even used up a mythical tier gemstone that I only have one more left." Peridot stated which really did let the mood down.

"I think I need to go all out then. We need to pull all the stops, but I fear that the Primordial Beast of Greed will have another form at the very least. I can handle myself for now and the Primordial Beast of Greed will surely pay attention to me once the pain on its eye subsides. Go and assist near Levin Cloud as we do not know who among the people here are really allies." Adrian replied.

"You think there might be a spy still?" Peridot asked.

"Not really a spy but the opponent is the Primordial Beast of Greed. He might be able to bring out the immense greed in people to control them. He cannot protect himself against pure attackers that get close to him." Adrian replied.

"You are right. I guess, you should bring chaos to the enemy then. Be vigilant as well." Peridot stated as Adrian opened a portal that sent her next to Levin Cloud.

"DEMON!" The Primordial Beast of Greed shouted as it finally recovered from the feeling of pain that it has never felt before.

"You have something in your eye. Oh wait... my bad." Adrian stated which taunted the Primordial Beast of Greed even more.

"I shall kill you myself!" The Primordial Beast of Greed shouted as it suddenly gathered the strength in its large body and then jumped towards Adrian.

The sight of a large beast trying to swat a small being in the air could be seen as Adrian is basically like the size of a mosquito when compared. Adrian did not think that the Primordial Beast of Greed was immobile despite its large body. He knew that beasts of large sizes move much faster than they appear, and the Primordial Beast of Greed even left a large crater on the ground from where it jumped from.

"I never knew frogs could fly." Adrian taunted the Primordial Beast of Greed again.

"Die, pathetic bug!" The Primordial Beast of Greed shouted as its large hand swiped towards Adrian, but he easily dodges it by using Blink.

"You need more exercise as you cannot even hit me." Adrian taunted again as the Primordial Beast of Greed became more irritable.

The Primordial Beast of Greed swallowed quickly again and fired off smaller golden coins like bullets towards Adrian. He was able to easily maneuver against all of the golden coin bullets as he just made himself faster and also slowed down time when he needed to. Adrian looked at Kanlaon and noticed that even his dragon breath cannot pierce through the barrier of the Primordial Beast of Greed.

"Look up, froggy!" Adrian stated but the Primordial Beast of Greed did not do so.

The Primordial Beast of Greed knew that the demon was just trying to take away its attention, but it suddenly saw a large shadow casting over it. The Primordial Beast of Greed thought that Adrian was playing with it but that is not the case. While Adrian was dodging the attacks of the Primordial Beast of Greed, he already summoned his largest soulbound and also the heaviest.

Wisteria showed up in her gigantic form that actually is half the size of the Primordial Beast of Greed. Wisteria slammed her body towards the Primordial Beast of Greed but is met with a barrier instead. She might have not dealt any damage, but her weight did assist in bringing down the Primordial Beast of Greed to the ground.

## Chapter 2404: Greed is Good V

"Let us make gravity heavy!" Adrian exclaimed as he increased the gravity that affected both the Primordial Beast of Greed and Wisteria.

The Primordial Beast of Greed felt its body falling much faster than before and the weight pressing down on its barrier also added to the increase in speed. The monster summoned by the demon was almost as large as it was, and it even released leaves made of spirit crystals that are on the tree on its back. The spirit crystal leaves did not pierce the Primordial Beast of Greed's barrier, but it is doing damage to it.

The Primordial Beast of Greed's barrier is tied to all of the assets that it possesses. The barrier is not maintained by the mana it has but by the gold coins and precious artifacts that it is keeping inside of its body. The Primordial Beast of Greed has a special pocket dimension that is located inside of its body where all of its treasures are stored.

The large gold coins that it is spitting out is not something it created but real gold coins that it empowered with its own energy. The gold coins that it uses for attacks will eventually dissolve into nothingness as the energy of greed will corrode the material used once it dissipates. The Primordial Beast of Greed is literally burning money as it attacks but that also means that it has yet to become tired.

The Primordial Beast of Greed never once used mana, and a primordial beast has a sizeable amount of mana that it could use. Mana so powerful and pure that even the organization that bound them made sure to never offend the primordial beasts unless necessary. Out of all the Primordial Beasts of Sin, the danger level for the Primordial Beast of Greed is high because of its special abilities.

In a drawn-out fight, the Primordial Beast of Greed is not an opponent that you want to face. This is also the reason why the Primordial Beast of Greed is biding its time. It knows that the beings that are attacking it will tire out eventually. The amount of fortune and precious items that it has amassed could literally buy a country.

"I can wait until they are tired but why does it hurt!" The Primordial Beast of Greed thought as it crashed to the ground and the dragon turtle that plunged with it suddenly floated in the sky to gain distance from it.

The Primordial Beast of Greed would be calculative and calm which is why it can create scenarios that will benefit it more. There are times when its powerful greed would blind it from

things, but it can always recover after a few days. This calm mind of the Primordial Beast of Greed is the result of never feeling pain.

The Primordial Beast of Greed might have lost against those angels back then and had its power stolen. It might have been sealed away because of the fear of those angels but it never felt pain in battle. The Primordial Beasts of Sin are beings created from natural negative emotions. They are the embodiment of those emotions which means they are made purely from it.

A being purely of greed which meant that no other emotion or feeling could register. The Primordial Beasts of Sin might show other emotions but that is all tied to the emotions of the others. All Primordial Beasts of Sin are connected in some way because of an unknown history that even they do not know of.

When the Primordial Beast of Greed actually felt pain for the first time, the very same feeling was actually transmitted to all other Primordial Beasts of Sin. The sensation might not have been as tantamount to what the Primordial Beast of Greed have felt but they also felt it. A tingling sensation that is incredibly irritating and an overloading sensation sent to the brain as if you are being hit on the head multiple times.

"I do not want to feel it anymore!" The Primordial Beast of Greed shouted as its remaining eye suddenly turned red.

[The Primordial Beast of Greed has become berserk.]

[The Primordial Beast of Greed's attack damage has been increased by 10%.]

"First, I must deal with the annoying bugs!" The Primordial Beast of Greed shouted as its remaining eye suddenly circled around but then focused on the Immortals that are releasing sword waves and energy waves to attack his barrier.

"Golden Army!" The Primordial Beast of Greed shouted as it slammed its hands on the ground.

The golden clouds filled with coins that the Primordial Beast of Greed is standing on suddenly expanded around it. From within the golden cloud, gold coins suddenly started to morph into humanoid beings. These humanoid beings imitated all of the Immortals that the Primordial Beast of Greed has made trades with.

There are even some copies of the Immortals that are presently fighting against the Primordial Beast of Greed. The most powerful one created were made of ten gold coins as it exuded the aura that could cut through anything. It was a clone of the Murim Alliance Leader, the Sword Saint Namgung Myeong himself.

"Kill all of the worthless trash! Offer their fortunes to me, my golden army!" The Primordial Beast of Greed shouted as it also released a powerful pressure.

[You have lost ten gold coins due to the Greed is good aura blast of the Primordial Beast of Greed.]

"I might actually go broke if I do not kill that golden toad." Adrian stated as his money was still decreasing as the entirety of the formation is actually affected by the aura of the Primordial Beast of Greed.

"Now! To deal with you, demon!" The Primordial Beast of Greed shouted as it spat out ten large golden coins that transformed into flying beasts of different races.

"What the heck?! You even traded with demonic beasts?" Adrian thought as there are demonic beasts in the eastern continent that have sentience.

Chapter 2405: Greed: Golden Army I

Ten golden flying beasts charged towards Adrian, but he had no problem with dealing with them. Kanlaon, Wisteria, and Charon easily brought them down with their attacks but that is not the problem. These golden beasts that were destroyed would turn into liquid gold and then materialize back into their previous forms.

"A regenerating golden army. What a cheat!" Adrian stated but a smile could be seen slowly forming from his mouth.

Adrian looked towards the battlefield, and it was filled with numerous golden humanoids and even beasts. He wanted to see if he will have any allies that will aid him against the Primordial Beast of Greed, but it seems they have all been caught up with their respective opponents. The one with the most enemies is actually the Sword Saint Namgung Myeong as he is fighting three golden humanoids including his golden clone.

The golden army do not have the same power as their copies as they only show about 50% to 70% of their combat prowess. Still, the strength of the golden army is not that they are clones but their quantity. Even if they are shabby and shiny clones of the originals, the moment you are overpowered by three of them then one can still die.

"Levin Cloud is basically the only healer in the area that can actively heal large areas. Peridot cannot move as well because she is busy protecting Levin Cloud. I guess I need to prepare for this fight to drag on." Adrian thought as he immediately released his limit.

Adrian summoned all of his soulbounds in the fight, but he made sure to give something to Kenos before it disappeared. The Primordial Beast of Greed released more and more flying beasts to deal with Adrian but his soulbounds fought all of them. Adrian did not know when, but the Primordial Beast of Greed was no longer the focus of their attacks. All of them were now focused on the onslaught of the golden army created by the Primordial Beast of Greed.

"I guess there is no choice then. I really did not want to summon someone as the Realm of the Dead in the eastern continent is not stable. Even the power of the Gods of Death might falter here but I have to take a chance." Adrian thought as he concentrated and unleashed a powerful aura made of nether energy.

All of the living beings suddenly felt all of the hairs on their body tingle. Even the special cultivators that deal with the dead felt like they are looking at a being of death. Not just a being that can bring death but a being that looked like death itself. The Primordial Beast of Greed felt this energy, and this was the same one that made it suffer immense pain.

"Stop him!" The Primordial Beast of Greed shouted as it also jumped towards Adrian while the flying golden monsters closed in on Adrian.

"I, the Mediator of Death, call upon a brave warrior of these lands! Soul Recall!" Adrian stated as he switched his weapon to his scythe and then slashed at the dimension itself to create the Soul Door.

The Soul Door responded to the call of the Mediator of Death despite the fierce resistance of the eastern continent's special energy. The special door looked like a face of a demon interpretation of the people of the eastern continent. The mouth of the demon suddenly opened as a powerful force came out of it. A powerful aura that sent a powerful pressure to all beings appeared.

[You have successfully summoned Emperor Wu.]

[All allies gain 20% boosted stats due to the Dignity of Emperor.]

Emperor Wu appeared in the battlefield and all of the people in the area felt it. The being that the demon summoned was someone that is an Ascendant. The Primordial Beast of Greed saw the enemy that the demon summoned but paid it no heed. The aura of the being that the demon summoned is still not enough to deal with it.

Emperor Wu wore a blue warrior's robe with a dragon embroidered in gold with numerous interpretations of the sky. A sword as his main weapon while a mystical scroll is flying next to him. He had an aura that is befitting of his title as an emperor as he rightfully commanded even the power of the heavens.

"Fall down foul beast!" Emperor Wu stated as his sword made with pure white steel and a jade hilt glowed in a radiant glow.

Emperor Wu's sword that glowed also resonated with the mystical scroll flying next to him. The scroll then released an oppressive aura that created the silhouette of a dragon. With the blade coated in this aura, Emperor Wu and the Primordial Beast of Greed clashed against one another. The Primordial Beast of Greed tried to shake off Emperor Wu, but the ascendant level summon is easily able to stick to the enemy.

"A mere beast is actually ignoring me. Die by my blade!" Emperor Wu shouted as the mystical scroll released more energy that enveloped the body of its master.

A green silhouette of an eastern dragon manifested as Emperor Wu charged towards the Primordial Beast of Greed. The Primordial Beast of Greed could no longer pay no attention to the being that is trailing it. It released blasts of golden coins towards Emperor Wu in an attempt to stop him. The golden coins that missed became beasts that charged towards Emperor Wu.

"Remember that he is not the only you are dealing with." Adrian stated as he created six magic circles with each of the elements present.

Six elemental dragons were summoned and all of them flew towards the Primordial Beast of Greed. Adrian did not stop there as he held his chest and activated the summoning spell tied to it. Flames that manifested in feathers suddenly appeared before Adrian. A crimson gold magic circle appeared behind him and the cry of a divine beast emerged from it.

Chapter 2406: Greed: Golden Army II

[You have summoned a divine spark of the Divine Beast Vermillion Bird.]

Adrian understood why the Vermillion Bird itself did not come but a divine spark is enough to deal significant damage to the enemy. Numerous creatures were summoned by Adrian in order to deal with the enemy on both sides. Emperor Wu attacked from below while the elemental dragons attacked from the sides. The divine spark of the Vermillion Bird that has its essence attacked at the front.

The Primordial Beast of Greed has no choice but to use much of its resources in order to tank the hit. A fierce explosion resulted in all of the attacks hitting one location. The Primordial Beast of Greed came out unscathed though as it has descended back into the ground without any notable damage on its body.

The Primordial Beast of Greed felt its resources drying up by the second as it not only used its own funds for its barrier but also in the continuous resurrection of the Golden Army that it has summoned. The Golden Army is not an infinitely respawning army because of mana but it is an unkillable army because of money. As long as the Primordial Beast of Greed could pay for the revival of the golden army then they would execute the command given to them.

The Primordial Beast of Greed now had half of its funds down the drain, and it is getting lower by the second. The golden army might be powerful, but they have yet to truly kill any of the forces that the Murim Alliance have brought. The reason why the Immortals have yet to fall is due to the fact of one individual that is carrying this battlefield with his heals.

Levin Cloud's precise use of healing magic made it impossible for the Immortals to sustain heavy damage. Immortals themselves are beings that rely heavily on cultivation which meant that their bodies are extremely solid. The only times they can be injured are when they make a mistake, a sneak attack, or when they get overpowered. The golden army is not powerful, but they do have quantity which can overpower even an Immortal.

Levin Cloud will just heal a specific Immortal that is heavily injured, and the latter would just save themselves. In fact, Levin Cloud liked how the Immortals are self-aware that there is no one that will save them but themselves. If this were the central continent, then he would have need others to haul the heavy butts of knights away from the battlefield even if they were healed.

Levin Cloud also dealt healing in a very natural way that perfectly utilized the ley lines of the eastern continent. Unlike the other continents where the ley lines are incredibly hidden and cannot be easily tapped into, the ley lines of the eastern continent are very active as long as one

has access to use them. He had free reign when it comes to the ley line in the eastern continent as he has restored one in this place.

Levin Cloud would also use the ley lines to detect any injured person which made him almost have clear vision across the entire battlefield. The area might be closed off by a formation, but it seems that the ley lines are always present as it is also enclosed inside of it. Levin Cloud would use the ley lines to deliver his healing spell which would create an eruption of holy power to the location of the injured Immortal.

"Why did I not try this earlier? I could have escaped if I used the ley lines but that would also mean leaving them." Levin Cloud stated as he looked at his friends.

"Kill that pesky human!" The Primordial Beast of Greed commanded as he looked fiercely at Levin Cloud.

"Where are you looking at, froggy!" Adrian stated as he now has activated the skill Galactic Titan.

Adrian wielded the sword and grew twice his size even if the Primordial Beast of Greed is still quite large compared to him. The sword struck the barrier of the Primordial Beast of Greed but there were still no signs of it breaking. Emperor Wu recovered from the attack earlier and tried plunging his sword against the barrier again but to no avail.

"Even with the added bonus of sword-based attacks, it still cannot pierce." Adrian stated.

"Pierce, you say?" Emperor Wu stated as he looked at Adrian.

"You cannot destroy my barriers. Even if you bring back all the powerful emperor existences in this continent, you will never be able to defeat me." The Primordial Beast of Greed proudly declared.

"Is that a challenge, beast?" Emperor Wu stated as his eyes burned with passion.

When he was alive, Emperor Wu was a fierce tactician, poet, and great warlord. He was also a man that is always burning with passion with the mindset of always rising to adversity. He also does not stop until he reaches his goal, and the Primordial Beast of Greed suddenly triggered a goal for Emperor Wu.

"I will rise up to your challenge beast! A barrier should always be pierced as the Mediator said! Come to me, Dao of the Sword! This emperor has summoned you to defeat my enemy!" Emperor Wu shouted as he rose to the skies and the mystical scroll that was flying beside him suddenly unfurled even further.

Emperor Wu suddenly got coated with a supreme sword aura that was mightier than the Sword Saint. The Sword Saint Namgung Myeong could only look at the powerful sword aura that was sharper than his. Something inside of the Sword Saint Namgung Myeong's mind that blocked him suddenly crumbled as he attained a clue to enlightenment. The Sword Saint Namgung Myeong looked at the demon that summoned Emperor Wu and did a slight bow to him as Adrian unknowingly became a benefactor of the Murim Alliance Leader.

"My sword can pierce through the heavens!" Emperor Wu boldly stated which would typically anger the heavens above, but he was already dead... so he had no qualms of saying that loudly.

"Your toothpick will never be able to pierce me!" The Primordial Beast of Greed shouted as it released gold coin projectiles to hit Emperor Wu, but Adrian switched his weapon to his mirror and redirected the coins back to the enemy.

"Foolish demon, even with the borrowed power of the Vermillion Bird, you cannot hope to defeat me! Why do you think a dead person can!" The Primordial Beast of Greed shouted as it continued releasing gold coins towards Emperor Wu as it actually is panicking.

The Primordial Beast of Greed did not want to show it, but it felt threatened by the attack that Emperor Wu is charging. An instinct of fear that was never there before has bloomed for the Primordial Beast of Greed. An instinct that was created because of its missing eye and the pain it felt being burned by the nether flames. It did not want to admit it, but the Primordial Beast of Greed felt the danger from Emperor Wu.

Emperor Wu's sword took all of the sword energy that his mystical scroll released. The sword suddenly looked like it was emitting some sort of light but that is actually condensed sword aura. Sword aura so compacted that merely touching it will slice your hand off. Emperor Wu casually waved his sword and all the golden monsters that came near him became sliced into pieces.

"An assist would be appreciated, mediator." Emperor Wu stated, and Adrian nodded.

Vines and then chains suddenly came out of the ground as all of them grasped at the Primordial Beast of Greed. The vines and chains were not able to touch the Primordial Beast of Greed as the barrier prevented even those from getting near its body. Still, the barrier was not off limits of being rooted in place as the chains and vines grasped at the barrier itself to prevent the Primordial Beast of Greed from moving.

"Aha! As expected of the mediator! Your aid is topnotch! Come, beast! Let us see if my sword cannot pierce you! If it does not, then I will kill myself again!" Emperor Wu boldly declared as he prepared a stance and then proceeded to thrust his sword forwards to the direction of the Primordial Beast of Greed.

The sword thrust looked ordinary except those that are sensitive to aura or energy. Adrian felt it and even saw the energy flow that was released in an instant as soon as Emperor Wu performed the thrust. Adrian could vividly see a sharp sword aura extend all its way across the air and then slammed directly to the barrier of the Primordial Beast of Greed.

The barrier of the Primordial Beast of Greed suddenly created a loud sound as something hard hit it. A violent sword energy so powerful that it created a shockwave when it directly hit the barrier of the enemy. The Primordial Beast of Greed snickered though as the violent sword aura was unable to destroy its barrier. The smile did not last long though as a thin sliver of aura pierced through the barrier and directly hit the throat of the Primordial Beast of Greed.

#### Chapter 2407: Greed: Golden Army III

A piercing sword aura managed to damage the throat of the Primordial Beast of Greed. The pain of having one's throat get pierced and internally bleed made the Primordial Beast of Greed thrash about. All of the golden army members also momentarily lost their control as each of their movement is somewhat connected to the Primordial Beast of Greed.

The golden army might have the ability to do the commands of the ones that summoned it, but it is also a weakness as well. The golden army is still connected to the summoner and could be interfered with as seen as what is happening now. The Primordial Beast of Greed might not have intended for the golden army to even show any unusual behavior but the pain it felt has overshadowed its control.

Adrian grinned because he knew why the Primordial Beast of Greed is in great pain despite the attack not destroying a large part of its body. Emperor Wu is someone Adrian basically summoned using his nether energy and any attacks that he does is affected by it. The devastating effect of Emperor Wu's attacks is only showcased now as this is the first time that it has truly hit the Primordial Beast of Greed.

The barrier of the Primordial Beast of Greed prevented any meaningful damage to hit the large golden toad. This also counted the attacks that have nether energy on them as the special effect of the barrier of the Primordial Beast of Greed is to block every type of damage. The barrier of the Primordial Beast of Greed is designed to shut out any type of damage to the enemy, but it cannot deflect attacks that are absolute piercing in nature.

Attacks that are absolute piercing are those that are designed or enchanted to bypass the defenses regardless of the nature of the attack. A sword slash would definitely pierce through the barrier of the Primordial Beast of Greed should it have an absolute piercing feature. Peridot's enhancement of Adrian's attack with Andromeda earlier are an example of the absolute piercing status.

There might have been attacks that can have the piercing enchantment but that does not mean they can pierce through special barriers like the one the Primordial Beast of Greed is using. The Barrier of Greed that the Primordial Beast of Greed blocks out all types of damage in exchange for the monetary value that one has. It is also able to block off regular status ailments and enhancements which is why normal piercing attacks can also be blocked.

The attack that Emperor Wu did is a combination of piercing and absolute piercing as it is the culmination of his skills and understanding of the sword. The initial attack is a powerful burst of sword energy that contained the piercing enhancement while inside of it is the true understanding of the sword which contains the absolute piercing. The Primordial Beast of Greed did not expect that a silent attack would be able to reach it as it has already bumped up its defenses even more when one of its eyes got destroyed.

The pain of nether energy destroying the inside of your body until the depths of your throat is felt by the Primordial Beast of Greed. The large golden toad was thrashing about as an unbearable pain reverberated all throughout its body. If having one of its eyes was already painful for the Primordial Beast of Greed, then the feeling it is having has been multiplied by five. Some of the golden army even became liquid gold as the erratic mind of the Primordial Beast of Greed had messed with the controls it had of the inanimate army.

"Alas, I am not the expert that I thought that I am. It has taken all of me to even just damage the beast but not enough to shatter its barrier completely." Emperor Wu stated as his body started to turn into wisp like energy.

"You have done well, Emperor Wu. Thank you for heeding the call for a champion that can turn the tide of battle to our side. Your contribution is massive in dealing with the calamity before us. Rest assured as I will make sure that it will die to restore balance in your home continent." Adrian stated as he knew what Emperor Wu had done.

"Thank you, mediator. Give us victory!" Emperor Wu saluted as he turned into pure particles of light.

"IT HURTS!" the voice of the Primordial Beast of Greed could finally be heard as it spat out blood.

The Primordial Beast of Greed tried to boost its own regeneration to counteract the burning sensation of the nether energy invading its body. It burned through a quarter of the wealth it currently has just to make sure that it will never feel any pain whatsoever. The pain subsided for the Primordial Beast of Greed but the effects on its wealth could be seen as the barrier that protected it has become thinner in energy.

Adrian could feel that the barrier of the Primordial Beast of Greed has definitely weakened since he is very susceptible to changes in energy levels. Emperor Wu did not burn his remaining summon time for nothing as the invincibility of the barrier that the Primordial Beast of Greed has been shattered. As long as attacks contained absolute piercing, it will definitely reach the body of the Primordial Beast of Greed.

The only problem for them is that absolute piercing is not something everyone can have as an enchantment to any skill. Even Peridot had to sacrifice a high tier gemstone to empower one of Adrian's skills at a cost. Even Adrian does not have any skills that have the absolute piercing enchantment which is a testament to how rare it is.

"I guess there really is no other choice. If I do not have absolute piercing, then an irrational type of power is the only thing that can be used." Adrian thought as he looked at Kimat.

Kimat was busy destroying the golden army members when he noticed the gaze of his master. Adrian sent a command directly to Kimat and the latter understood. With a powerful roar, Kimat suddenly released a terrifying aura that made even the Primordial Beast of Greed swallow the pain it was feeling.

[Your soulbound Kimat has used the Gha Agsheblah Domain. The Gha Agsheblah Domain makes all spells be inside have a 50% chance of failing. (Increased chance for healing type spells which is 75%.]

[Your soulbound, Kimat, has activated Gha Agsheblah domain.]

[Your soulbound, Kimat, has doubled his stats for the duration of the domain.]

[Your soulbound, Kimat, has automatically activated the Disturber of All Things skill and has transformed.]

[Your soulbound, Kimat, has gained 50% more base stats for the duration of the transformation.]

[All harmful effects on your soulbound, Kimat, has been cleansed.]

[Your soulbound, Kimat, will be immune to any status ailments and status debuffs for the duration of the transformation.]

Kimat finally changed to his true form as a large feline creature floated in the skies. With each of Kimat's roar, the mana in the surroundings itself vibrated as if they cannot remain stable. Even the barrier that the Primordial Beast of Greed is proud of has started to actually vibrate as Kimat's own presence disrupted it.

"Such unnatural power! How could such a being have it!?" One of the Immortals stated as even they were affected by the aura that Kimat was releasing as their sword auras were disrupted as well.

It is not just the sword auras that were affected because the mana that stabilized the golden army were affected as well. Most of the golden army that were around Kimat turned into dust as they could not maintain their form. Just by being near Kimat created a bizarre mana disruption phenomenon that made inanimate summons unstable.

"Attack and destroy the barrier with all your might!" Adrian commanded as the large Kimat that almost reached the size of the Primordial Beast of Greed slammed his claws towards the barrier of the enemy.

Kimat's attack looked and sounded like lightning came down on the barrier of the Primordial Beast of Greed. When the claw first connected, the barrier did not even shake as it looked stable. The Primordial Beast of Greed could even be seen to have a look of relief on its face. Adrian only raised his eyebrows on this as it seems that Kimat's playful nature still affected him despite his almost godlike form.

Another claw slammed down towards the barrier of the Primordial Beast of Greed which created a powerful explosion as if lightning hit the ground. The Primordial Beast of Greed thought that this would also be blocked by its Barrier of Greed as the initial attack was easily blocked but it was not. The Primordial Beast of Greed felt it as an unnatural force suddenly reverberated around it as the barrier vibrated unnaturally. Kimat released a roar as he transformed himself into black lightning and slammed directly onto the barrier for the third time.

#### Chapter 2408: Fall of Greed I

The black lightning slammed onto the barrier of the Primordial Beast of Greed. The Primordial Beast of Greed that was incredibly confident on the stability of its Barrier of Greed is stunned as soon as it felt the dangerous energy that permeated it. The Barrier of Greed suddenly started to quiver as the intense and disruptive energy of the black lightning that Kimat released has hit it.

"Impossible!" The Primordial Beast of Greed shouted as a notification is received by Adrian.

[Your soulbound, Kimat, has used its own life force to power his attack.]

The black lightning that was just a streak at first suddenly became a lightning curtain. The entire Barrier of Greed is literally showered by this black lightning until cracks started to appear. After a few seconds of the cracks appearing, the barrier itself could no longer hold back the intense energy and shattered completely.

The sound of golden coins suddenly getting scattered on the ground could be heard. Along with that sound is the shattering of the golden barrier that deflected and defended all attacks against the Primordial Beast of Greed. The Primordial Beast of Greed also felt a powerful backlash against it as the Greed Storage (belly) where it stores all of its assets suddenly ached.

[The Barrier of Greed that the Primordial Beast of Greed uses to defend itself has been destroyed.]

[The Barrier of Greed will regenerate in ten minutes. It can become lesser if the Primordial Beast of Greed can concentrate on regenerating it.]

[Your soulbound, Kimat, has died due to excessive use of his life force.]

[Kimat has returned back to your Soul Chamber and cannot be summoned for two hours as it is recovering.]

The scene of the Barrier of Greed shattering did not only shock the Primordial Beast of Greed but also the Murim Alliance. Adrian smiled and is about to charge at the Primordial Beast of Greed when Kenos returned back to him. Kenos reported that the slight alteration to the formation has been completed by the formation masters as per his requests on the paper.

"Did you think that you can defeat me just because my barrier is gone?!" The Primordial Beast of Greed growled as it released numerous golden army members once more to replenish the soldiers that is fighting for it.

"You cannot attack much can you?" Adrian suddenly exclaimed as the Primordial Beast of Greed did not look pleased with his statement.

As Adrian said, the Primordial Beast of Greed does not have any means of attack that can deal special effects. The reason for this is the specifications of the monster itself as it was greedy. Greed does not show itself and is sneaky about it. It is often defensive when brought to light, but it can never attack outright.

The reason for the incredibly tough defense of the Primordial Beast of Greed is due to this nature. It also has a passive ability that can collect gold coins from those that try to attack it. All it needs to do is basically stand there and be protected by its luxurious barrier while it drained the coffers of those around it. A perfect way of defensive attacks if there was no such thing as absolute piercing.

"Perfect then. We were at the mercy of your minions earlier, but the time is now. I always wanted to use this skill as it is one of the privileges I have a guild leader. A custom guild skill that can only be created depending on the race of the guild leader. Guild Skill: Summon Pantheon!" Adrian stated as magic circles suddenly appeared on the ground and in the sky.

[Solstice has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Lycan has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Vayu has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Soleil has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Creepysoo has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Hexy has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Ark has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Pana has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Basil has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Brew has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

[Gourmet has accepted the call of the Guild Leader of the Pantheon guild. The guild member is being summoned to the location of the guild leader.]

...

The summoning continued on as the guild members of the Pantheon guild started to get summoned one by one. Adrian already told them to stand by as they were going to get summoned by him when possible. He also briefed them that they are going against the Primordial Beast of Greed.

He even live streamed the current battle to the guild room to make sure that all guild members are informed of the move set of the enemy. Adrian would have wanted to summon the guild alliance members, but his guild exclusive skill can only be used on guild members. He did see that the skill is upgradable which means that summoning members of the alliance might be possible someday.

[All guild members that accepted the call of the guild leader has been summoned. The skill will now enter its seven-day cooldown.]

==

Skill Name: Guild Skill: Summon Pantheon

Skill Tier: Guild Skill - Epic

Skill Type: Guild Leader Exclusive Skill

Skill Effects:

-Summons all guild members that accept the call to the location of the guild leader. This can be blocked depending on the current place the guild leader is currently at.

Cooldown: 7 days

Resource Cost: 100 Mana Stones per member or 1, 000 gold coins per member (Can be increased or decreased depending on the number of members that answer the call.

Cast Time: Instant

Skill Description: An exclusive guild skill that can only be wielded by Daemos Guild Leaders. They must have at least Mastery Level 5 for their Spatial Magic in order to use this skill. A skill that can summon unlimited allies to bully the guild leader's enemies! Show them the power of the guild!

==

Magic circles that can bend time and space appeared before the Murim Alliance and they all knew who was responsible. The demon that was in the air that also shattered the barrier of the Primordial Beast of Greed now summoned all of his allies to the battlefield. All sorts of unique

characters appeared before the Murim Alliance members, but they all noticed that their numbers are not large.

"What do you hope to achieve by summoning such meager numbers before me!" The Primordial Beast of Greed shouted as the number that was added was not even more than fifty.

"That can be arranged." Adrian stated as a large tree with robust life and death energy suddenly sprouted behind him.

[The Tree of Life and Death has been summoned.]

[All abilities that use Life energy and its variants will be doubled in effects.]

[All abilities using Death energy and its variants will be doubled in effects.]

"I guess it is my turn to shine! I can feel the souls and regrets of warriors lingering in this city!" Creepysoo stated with a lot of excitement.

"I will supply you more miasma if you need as you must not spend your own level to summon a lot of undead like last time." Hexy stated as she empowered Creepysoo with miasma she specially tailored for him.

Creepysoo thanked Hexy as the Necronomicon flared up in a pale blue flame as it is in the presence of the Tree of Life and Death. The book cover of the Necronomicon is actually made from the bark of the real Tree of Life and Death. The book suddenly increased in efficiency by 50% as a result of the synergy.

"Arise! Fallen Warriors of the East! Protect your country once more before you rest in peace!" Creepysoo declared as numerous undead suddenly appeared before them. Some undead were even in the level of a Doom Knight. The most interesting thing is that all of them looked human if not for them floating above the ground.

"The numbers are met. Destroy the froggy." Adrian smugly commanded as all of his guild members attacked the Primordial Beast of Greed.

Chapter 2409: Fall of Greed II

"Insolent Insects!" The Primordial Beast of Greed raged as it used its own body to physically deter any being from getting close to it.

The undead that Creepysoo spawned more than made up for the needed number in taking down the remaining golden army and even damaging the Primordial Beast of Greed. The aura of death is also applied to all of the undead which meant that any attack they do will infect the being with it. The Primordial Beast of Greed felt a stinging sensation whenever an undead comes to attack it. It might not be as painful as nether energy, but it is still quite irritating.

The Primordial Beast of Greed is not an easy target though as it can still do some attacks that can be dangerous. The size of its body is still enormous enough to easily kill off any being that is not careful. Some immortals even lost parts of their limbs when they got scratched by the Primordial Beast of Greed. If Levin Cloud did not heal them back, then they might have died from blood loss.

"I guess that thing is still a primordial beast." Adrian thought as he changed his form to his Aetheros Form.

Adrian then proceeded to change to his mirror demon form to spread out the aether dust that he is producing. All beings that were affected by his aether dust got increased defense, increased health regeneration, and increased mana regeneration. Some of the Immortals even surged in power as some use their own life energy in order to use their skills.

The dust that Adrian released even became a powerful drug that buffs the Immortals as they often use energy in their cultivation. Adrian is basically giving them a free boost to their cultivation as he is giving about fifty to a hundred years' worth of internal energy to them. Even the most powerful of the Murim Alliance felt his strength increase by half as a result of the beautiful jade, gold, and blue dust.

"I should start with you!" The Primordial Beast of Greed shouted as it glared at Adrian before using all of its strength to jump towards the latter.

The Primordial Beast of Greed thought that no one would be able to deter it when it jumped in its full speed. It thought that it would be able to capture the demon before him and use him as a hostage. If he cannot use the demon as a hostage, then he could easily kill him to weaken the morale of everyone around. The demon was the start of when things went south as the Primordial Beast of Greed never expected that the unbound teleportation scroll was just a bait.

"Namgung Sword Arts: Light Vanisher!" The Sword Saint Namgung Myeong stated as he infused his sword with his own aura.

The Sword Saint Namgung Myeong casually flicked his sword that shined in a pure and thin light but the intensity of the attack was undeniable. A thin yet tyrannical sword wave suddenly flew towards the Primordial Beast of Greed. The Primordial Beast of Greed felt the danger of that sword wave and is about to use all its strength to evade it in mid-air but the demon in front of him smiled.

Six large mirrors suddenly appeared in different directions as large chains came out of them. The Primordial Beast of Greed suddenly found itself momentarily bound by these chains. It would have been fine for the Primordial Beast of Greed as it easily destroyed the chains in under five seconds, but the attack of the Sword Saint Namgung Myeong was incredibly quick. The best way to describe the attack is a sharp laser in the form of a sword wave.

Unable to use its own body to easily maneuver in the air, the Primordial Beast of Greed lashed out its tongue towards Adrian. The tongue met with the mirrors that Adrian created and each of them shattered as well. The Primordial Beast of Greed managed to slightly influence its body in mid-air because of this but Adrian was not going to let this be.

Adrian conjured up more mirrors, but it was not just chains anymore. Vines and chains came out of the mirrors as Wisteria along with Levin Cloud used the power of the Tree of Life and Death that descended. The vines were strong enough to actually pull the Primordial Beast of Greed back into its original position. Unable to defend itself, the Primordial Beast of Greed got directly hit by the powerful sword wave that the Sword Saint Namgung Myeong released.

The Primordial Beast of Greed remained quite sturdy though as the sword wave did not penetrate easily but it eventually did. The right arm of the Primordial Beast of Greed got cleanly sliced, but the sword wave grew weaker from there. The sword wave would have damaged the other arm as well if not for the Primordial Beast of Greed coughing out a river of gold to dissipate the sword wave.

"Curse you, demon!" The Primordial Beast of Greed shouted as it plunged into the ground.

"The beast is down! Kill it!" The Sword Saint Namgung Myeong shouted, and all of the Immortals charged towards the Primordial Beast of Greed.

The Primordial Beast of Greed could no longer easily defend itself as it got blasted by Wisteria using a spiritual particle cannon. The follow up attacks from all of Adrian's soulbounds did not

help the Primordial Beast of Greed from recovering. If the Primordial Beast of Greed wanted to even rise up, Creepysoo would send a group of undead there and use Corpse Explosion. The powerful explosion would make the enemy get pinned down back to the ground.

"All of you greedy bastards! I can feel all of your greed, but it is not enough to power me! Why?!" The Primordial Beast of Greed thought as it tried feeling the energy of greed and a silhouette of another being could be seen behind Adrian.

#### Chapter 2410: Fall of Greed III

"Devil! That damn demon teamed up with the devils!" The Primordial Beast of Greed wanted to shout out but the strength on its body slowly started to fade.

The body that it currently can no longer function properly as it is being assaulted with energy that can make it feel pain. The number of treasures it has inside its Greed Vault has diminished to the point that it can no longer create an appropriate defense. The start of the demise of the Primordial Beast of Greed is when its powerful defensive skill was rendered useless. It became an easy target dummy once its main source of protection vanished.

"I cannot die like this! I must live! I am greedy to live!" The Primordial Beast of Greed thought as it wanted to live properly once more.

The Primordial Beast of Greed did not want to admit it, but it wanted to be free from the control of the secret organization that it has formed a pact with. The Primordial Beasts of Sin agreed to the pact because they thought they would gain absolute freedom but that was not true. The secret organization of fallen gods managed to create vessels that made them their lapdogs.

The Primordial Beast of Greed wanted to be released from control as greed can only become powerful when left unchecked. Getting the unbound teleportation scroll was one of the ways that the Primordial Beast of Greed thought of leaving. The people of this world might not know but the Primordial Beast of Greed thought of using the scroll for hopping into another plane of existence or world altogether. The control of the secret organization would surely vanish once it was already off world.

"It is because of that damn demon! It used my own greed against me!" The Primordial Beast of Greed thought as it saw the sword of the Sword Saint Namgung Myeong burning bright like the sun.

"Wait! That demon has my own Greed inside of him! Why did I not think of this sooner! A young demon like that will definitely be unable to defend against me!" The Primordial Beast of Greed suddenly thought as a last resort because the current body it has must be discarded.

"It is time to die, foul beast of sin!" The Sword Saint Namgung Myeong shouted as he waved his sword that carried the speed of light and the intense heat of the sun.

"Now!" The Primordial Beast of Greed thought as its own body got sliced in numerous pieces by the Sword Saint Namgung Myeong.

The Sword Saint Namgung Myeong released his most powerful sword art that utilized or rather copied the power of the sun. The body of the Primordial Beast of Greed got sliced into thousands of pieces before burning up. The Sword Saint Namgung Myeong thought that everything has ended but he suddenly felt that something was amiss.

[The body of the Primordial Beast of Greed has been destroyed.]

[An extremely large amount of experience points is given to all that participated as the Primordial Beast of Greed burned all of the assets it has inside of its Greed Vault.]

All of the people would have started celebrating as the Primordial Beast of Greed has been defeated and incinerated. Everyone started to cheer when they suddenly saw the demon flying in the skies fall down. Kanlaon safely caught its master that was suddenly induced in a state of sleep. The soulbounds knew what happened to their master and tried to intervene but they were repelled when they wanted to enter the subconscious of their master.

[Your soul has been targeted by the Primordial Beast of Greed using Greed is Everything.]

[You will now be sent into your own subconscious to fight against the Primordial Beast of Greed.]

Adrian did not expect that he would suddenly get possessed by the Primordial Beast of Greed. He did not think that this is possible as the primordial beasts are very proud of their body. The fact that the Primordial Beast of Greed had to discard its body like nothing and then possess the body of another means it is incredibly desperate.

"It might have reacted to the skill that I have absorbed from eating its fragment." Adrian muttered.

"You are correct, idiotic demon! Who told you to go around absorbing parts of someone's soul!? Even if you are the current Mediator of Death, a soul will still have their unique markers. The fact that the piece of my soul has already attached to you means that I have already one! I will take over your body and use it to lay waste to all you hold dear! Now, come to me my soul fragment!" The Primordial Beast of Greed now in the size of a human sized toad shouted inside of Adrian's subconscious.

The Primordial Beast of Greed thought that the piece of its soul that has been absorbed by Adrian still has some form of autonomy and just sleeping. What it did not know is the fact that the part of its soul has already been a blank slate that has no ego whatsoever. The thing that the Primordial Beast of Greed felt inside of Adrian are just mere lingering feelings that the erased ego possessed.

"What! What have you done to my soul fragment?!" The Primordial Beast of Greed exclaimed as it suddenly felt that the world is closing in on it.

"Me? I merely erased the ego that was in it and used the parts that are usable. Who told you to go inside my subconscious though? Did you not look around when you came in here?" Adrian stated and the Primordial Beast of Greed suddenly noticed the area they are in, and it made the latter shudder.

The Primordial Beast of Greed finally saw the area around it and all of it represented the soul of the demon before him. The Primordial Beast of Greed thought that Adrian's soul was the small figure it met but that was just a small projection meant to represent the real soul. The real soul that was grasping at them with its two open palms that they are currently standing on.
