

O Summoner 551

Chapter 551 - Fenris Unbound II

The area became a living apocalyptic wasteland as the ground became full of magma veins. Steam or bursts of lava would come out of the ground which would deal damage to those near it. The clouds became filled with toxic fumes that even the flying monsters do not want to fly in that direction.

Fenris that grew in size also changed in some aspect as its black fur became almost like spikes as some of it stood up. The world boss now looks like it has spiky armor that will deal damage to those that will attack it with physical attacks.

Another thing that changed is that the runes on the chains that bound Fenris is now glowing. The runes were not glowing when Fenris was smaller. The runes activated as soon as Fenris activated his domain skill so that it would still remain in the realm that is acceptable in the mortal plane.

A godlike being's domain does not temporary change the landscape but permanently change it like what is happening in the capital of the empire. The battle against a demigod being will still be difficult especially in their own domain as they will be the most powerful individual that is present in that area.

[Fenris, The Wilde's World Boss, has used his domain skill, Ragnarok.]

[Fenris will have 50% increased stat for the whole hour that the domain skill is active.]

[All of Fenris' attacks will deal bonus darkness elemental damage for one hour.]

[All of Fenris' attacks will deal bonus water elemental damage for one hour.]

[All of Fenris' attacks will deal bonus light elemental damage for one hour.]

[All of Fenris' attacks will deal bonus fire elemental damage for one hour.]

[Fenris receives the passive armor called Spiky Fur during the duration of Ragnarok.]

[All of Fenris' attacks have a 1% chance to execute his enemies.]

[Movement speed of Fenris' enemies will be decreased by 10%.]

[Defense of Fenris' enemies will be decreased by 10%.]

[Evasion rate of Fenris' enemies will be decreased by 10%.]

Only one thing could be uttered by the Adrian's group members and that is 'Unfair'. The fact that Fenris became a living nuclear bomb is a total downer. The only way to counter this would be for those who have other domain skills to be present.

The eastern and western overlord could no longer use theirs as they already used it in a battle against Skoll and Hati. The only ones possible to use a domain skill will be Adrian, Levin Cloud and the Sacred Snake. Adrian does not know if King Leonidas has a domain skill, but he would welcome it if that is the case.

"The fact that this world boss could use the domain skill for an hour while I am here that can only extend it to a minute. The world is really unfair. We would get wiped out first before the domain of the world boss finishes." Adrian thought as mist suddenly rolled in in the Apocalyptic Landscape.

"Haos Mystique Primus!" The Sacred Snake stated.

"Darkside of the Moon!" The Lunari Fenrir stated.

Both the southern overlord and the former northern overlord used their domain skills. The Sacred Snake used the domain skill that The Wilde's will has given it. The Lunari Fenrir used the domain skill that is innate to its race.

Golden white mist rolled in the surroundings that slowly healed those that are injured. Not only that, but the mist also itself gave them increased defenses. The biggest thing that changed is that the body of the Sacred Snake suddenly dissipated with the mist. Fenris suddenly had its guard up as this is what the Sacred Snake used to defeat him in battle.

[The Sacred Snake, the Southern Overlord, used her domain skill, Haos Mystique Primus]

[All allies in the area will have a 15% increase in physical defense.]

[All allies in the area will have a 15% increase in magical defense.]

[All allies in the area will have a 10% increase in Evasion rate.]

[All allies in the area will have a 100% increase in health regeneration.]

[All allies in the area will have a 50% increase in health regeneration.]

[The Sacred Snake has transformed itself to a pure spiritual being.]

[All physical attacks against the Sacred Snake will not connect or deal no damage.]

[As a spiritual being of light, the Sacred Snake is immune to attacks that deal light attribute damage.]

[As a spiritual being of water, the Sacred Snake is immune to attacks that deal water attribute damage.]

[As a spiritual being of light, the Sacred Snake will deal increased damage to those possessing the darkness attribute.]

[As a spiritual being of water, the Sacred Snake will deal increased damage to those possessing the fire attribute.]

[As a spiritual being of light, the Sacred Snake will get increased damage to those possessing the darkness attribute.]

[As a spiritual being of water, the Sacred Snake will get increased damage to those possessing the earth attribute.]

The buffs that the Sacred Snake received is more than welcome. The area became misty but those who are affiliated or in a group with the Sacred Snake could easily pierce the veil. The vision inhibition of the mist did not affect the those that are fighting with the Sacred Snake.

The next domain that affected the area is the domain skill of the former northern overlord. The world became darker than what it was as it has already been dark due to the dark clouds blocking the sun. Not only that but a giant moon suddenly showed itself peering out from the dark clouds.

[The Lunari Fenris, Adrian's temporary summon, has used her domain skill, Darkside of the Moon.]

[All allies with darkness attribute will deal bonus damage to the opponents.]

[All allies that dies can be revived as shadow soldiers that will have 80% of the stats of the original.]

[Players revived by the domain can still control their shadow avatar.]

[The Lunari Fenrir will spawn about one to four shadow soldiers every tens seconds for the duration of the skill.]

Chapter 552 - Fenris Unbound III

The world became dark as the Lunari Fenrir's domain skill enveloped the battlefield. It seems that the domain skill of the Lunari Fenrir is not as powerful as it was before since she was just revived temporarily using Adrian's skill.

The Lunari Fenrir should have disappeared by now if it was summoned normally but it is not. As long as Adrian does not cancel the 'contract' with the Lunari Fenrir then she would remain in the battlefield. The only downside of that is Adrian not being able to use certain skills because of his current mana capacity.

"Yewdrassil's Descent!" Levin Cloud stated.

A blinding ray of light shone down from the dark clouds and as seed that is half rotten, and half lush dropped down. The seed fell on the scorched earth that accepted it like a hungry individual. A huge tree suddenly started to grow but its current features is different.

Yewdrassil still has its dead side and lush side but there is lava flowing in its veins which is quite new. If this is the case, then Yewdrassil also receives some sort of buff from the area it is currently planted upon.

Levin Cloud wanted to know how this is possible, but he can only have the skill for twenty minutes. The usual buffs that the Yewdrassil is given to everyone in the area that is allied with Levin Cloud. The only difference is the newly added buff due to the new feature that Yewdrassil has.

[All allies in the area will have 50% increased resistance towards fire attribute attacks during the duration of the skill.]

Adrian saw the tree of life and death sprout which is why he tried his luck in attacking the world boss. He used his wings and flew behind the world boss. He used the enhanced basic attack when he is using Shadow Walker. He wants to at least deal 5% of the world boss' health if he uses all empowerments on himself.

Fenris is being wary of its surroundings as the domain that made him almost die is in effect. The world boss did not notice the looming heavy attack that Adrian did until it connected. The world boss uttered a squeal due to being shocked by the unexpected attack.

Adrian smiled as he managed to deal damage to the world boss but suddenly frowned upon seeing the fangs of Fenris up close. Out of nowhere, the mist swallowed Adrian and Fenris bit into nothing. Fenris now enraged that the rat that he forgot for a moment managed to actually hurt it.

Fenris now charged upon the fox princess that dared to covet its prized flower. He would teach the insects that wanted to feast upon what is his. Numerous shadow soldiers in the forms of wolves that is much bigger than what Sirius controlled came and attacked the world boss.

Not only that but the world boss' own shadow extended and rooted it in place. The huge strain on the face of the Lunari Fenrir could be seen as she could not easily control the empowered world boss. What the others did not know is the roots of Yewdrassil suddenly crawling up the coffin that swallowed Creepysoo.

The coffin that swallowed Creepysoo suddenly burst open with different colored smokes. What came out is the same Creepysoo but in a style of Baron Samedi. He is now wearing a different attire as he looked like a cool dandy with a suit and a top hat.

"The Baron is here for the party!" Creepysoo stated in his high pitch voice as the Baron Samedi controlled his body.

"Ooh...the soul of a disaster is always a welcomed addition to my collection. It is worth to borrow the kid's body for this project. I am coming. You must be the undead knights of the kid. You two do not look fashionable...let me change that." Baron Samedi stated as he snapped his fingers and tapped his staff on the ground.

Don Quixote and Robin Hood became enveloped in a puff of smoke. Don Quixote suddenly changed in an armor that is more of a suit while its horse became a decorated one. Robin Hood changed as well as it is now in a suit, but it still has a hood to cover its face.

[Undead Knight Don Quixote has been enhanced to an Undead General.]

[Undead Knight Robin Hood has been enhanced to an Undead General.]

The arrival of Baron Samedi had such an impact that Fenris changed its target to him. Fenris looked at Baron Samedi as if its lunch just arrived and he is so hungry. The world boss managed to break the shadow binding and it even ate some of the shadow soldiers.

"Finally, something worth eating!" Fenris shouted as he charged towards Baron Samedi.

"Sit down, dog!" Peridot suddenly stated as she punched the world boss down to the ground which shocked her friends and even the overlords that tried to stop the world boss but failed.

Peridot is now in her full Ryujin form that is a bit different than her humanoid form. Her arms became thick and became covered with dragon scales. She even has talons to claw away her enemies. Her tail also sprouted from her lower back while half her body is covered in scales of different colors.

The skill that Peridot used is Dragon Impact that will definitely knockback the opponents regardless of their defenses. A skill that can only be used when she is in her Ryujin form that has a ten-minute cooldown. Since she attacked from above, she managed to pin down Fenris and even break some of his teeth.

"Silly dog. The party is just beginning." Baron Samedi stated as he threw out vials of potion that decreased the stats of the world boss.

[Fenris is affected by the Voodoo Vial's unknown debuff. Movement speed will decrease by 5%.]

[Fenris is affected by the Voodoo Vial's unknown debuff. Attack speed will decrease by 5%.]

[Fenris is affected by the Voodoo Vial's unknown debuff. Physical defense will decrease by 5%.]

Chapter 553 - Devoured Army

Fenris got afflicted with numerous small debuffs but even small things become big if they get piled up. Baron Samedi, who is controlling half of Creepysoo's body, looked at the world boss and pitied him.

"I see that the poor dog was not taught to respect others. He must not be good with people seeing that it barks and bites everyone that comes its way. Your owner is not a reliable trainer for you. To think that you came from a god yourself." Creepysoo stated as he tapped his cane on the ground.

When Creepysoo tapped the cane on the ground, numerous boy hands came up and pinned the world boss to the ground. It did not hold the world boss for even a minute though as the level gap against Fenris is about a hundred.

"Thought so. I never seen a dog this energetic. Even the gatekeepers of the underworld are not that energetic during their guard duties. You will be a perfect fit to be my guard dog. It is about time to change my current one as he is a bit old." Creepysoo stated.

Before Fenris could even bite Creepysoo's head off, a coffin suddenly swallowed Creepysoo and vanished into a puff of smoke as soon as the world boss' jaws bit. The Coffin once again appeared about ten meters away with even party poppers launching out from inside the coffin.

Fenris did not like being made fun of by someone weaker than it. Every time the world boss' attack will connect with its enemies, someone would actually stop him from even reaching. He would get knocked back or rooted in place thereby missing his opportune moment in attacking.

====

Meanwhile, Solstice is busy trying to dispel the blood magic circle that is used to bind Ashana. Thankfully, the world boss is not trying to fight them as it is confident on his enchantment. Fenris is confident as even he proved to not break his own enchantment using force.

Fenris only knows how to seal but not to take out the seal as his father only used such means. The world boss is just like its father, who is the God of Mischief, as they only do things halfway when it comes to very serious things.

"Forget about me and break the enchantment on the Wilde Flower. If you manage to break it then we will be assured that the Wolf of Disaster will not become permanently unbound. The more you idle with my barrier, the stronger the Wolf of Disaster will become." Ashana stated as she wanted to stop the ascension of the Wolf of Disaster no matter what.

"Even if you say that, the enchantment is linked with yours which means that we must break yours first. You might see it, but the barrier is sucking out your life force from you. If we do not break you out first, then you will die before we break the barrier surrounding that flower." Solstice stated.

"I think you guys should support the others. I will stay and protect Solstice. Peridot is already almost out of stamina from continuously trying to knock back the world boss. Even Creepysoo is almost out of mana from continuously dodging using that special skill of his." Kabrakan stated as he kept tabs on what is happening in the battlefield.

Vayu, Lycan and Soleil agreed and joined the subjugation of the world boss. The only problem that the group is facing now would be the decreased damage that Fenris is taking. The health bar of the world boss looked like it is not getting lower than 55% as even his defense increased.

====

Fenris is not being given time to recollect himself as the eastern overlord would attack it using its earth and water element abilities. If the world boss is still standing from the attacks of the Grand Toad, then the Storm Vulture will make it rain thunderous wind blades.

Adrian, who got swallowed by the mist, is in some sort of different dimension. The surroundings are full of mist as if he is inside a cloud that is tangible. In that world of mist, two red dots could be seen peering from the mist and is staring at Adrian.

Adrian also noticed this gaze but did not immediately react as it is not full of bloodlust. He could more or less guess that this is the owner of this pocket dimension that is inside the mist itself. Adrian immediately knew that the place that he is in is a pocket dimension due to the feeling of stuffiness that all demons feel if they are in a tightly enclosed pocket dimension.

"Greetings, Blind Demon God. Welcome to my own dimension which I call the Mist Corridor." The Sacred Snake stated in a weak voice as she is still heavily damaged.

"You are growing weak. You need to get healed. Thankfully the tree of life and death has already been summoned. You need to get close to it in order to hasten your regeneration." Adrian stated but the Sacred Snake shook her head.

"Look closely, Blind Demon God." The Sacred Snake stated as she materialized the part of her body that is heavily damaged.

Her pure white snake scales are now tainted by a dark looking small flames. The dark flames are preventing her to recover quickly which is why she is still at 40% of her current health. The Sacred Snake is not going to let this weakness bother her as she is only a small step away from killing the Wolf of Disaster.

"How can I help get rid of that? You must know of a way?" Adrian asked as he felt guilty that the Sacred Snake got critically injured due to him.

"You need not worry as I will fight until the end. You must no longer go back as it will not be long until that darned wolf will show its real power. I shall support you in your fight and do not worry about me." The Sacred Snake stated but Adrian could feel that she is lying.

"I will do as you say and use my domain skill again. It seems that your mist and mines somehow resonate, or you can borrow the power of mine's." Adrian stated as the Sacred Snake opened a door that leads to the outside.

"It seems that the cycle is calling for me. To think that my old body will last this long. I must do everything I can so that the Blind Demon God wins this battle." The Sacred Snake stated as if she is already predicting her coming end.

====

"I am done playing with you insects!" Fenris stated as he released this ghastly aura that sounded like multiple souls crying for help.

Baron Samedi heard the pleas for help and became sullen compared to his usual happy personality. The souls that suffered injustice from being devoured and used so that Fenris could ascend to become a god are all crying for help.

"Now this just makes the party go stale. To think that a party pooper has arrived in my glorious welcoming party." Baron Samedi stated with great sarcasm, but his eyes are burning with hatred.

The thing that Baron Samedi hates most is souls of the innocents suffering or souls being treated unjustly. Even the underworld does not treat souls as commodities to become stronger but a trial for those that want to repent.

"A lowly god borrowing the body of an undead because he is too weak to manifest into the world has no right to say what I cannot do. I have been born to devour gods and destroy everything in my path." Fenris stated as the souls that are held in his body started to materialize.

This ability is due to Fenris devouring the two miasma souls that was his children. Numerous humanoid beasts of four different attributes suddenly manifested. The monsters are mostly only humanoid in appearance but look like wraiths since they are featureless.

The monsters are like that of the elementals that got deformed or experimented in by Cristobal, but they are made purely of elemental mana. The four types of elemental monsters are light, fire, darkness and water. The monsters are also mindless as the souls that was once living is now like a blank slate that only follows the commands of the world boss.

Baron Samedi is no longer happy with the turn of events and summoned his coffin. The only difference is that the coffin did not swallow him, but he stood atop of it. Baron Samedi then tapped the cover of the coffin in a rhythmic fashion as if he is creating music.

All allies that heard this tapping sound became calm and composed. The enemies that heard this looked distressed and disturbed by the tapping sound that baron Samedi made. The coffin cover then opened with a loud thud as it sucked every tormented soul in the vicinity like a vortex for over five minutes.

Chapter 554 - Death Of An Overlord I

All allies that heard this tapping sound became calm and composed. The enemies that heard this looked distressed and disturbed by the tapping sound that baron Samedi made. The coffin cover then opened with a loud thud as it sucked every tormented soul in the vicinity like a vortex for over five minutes.

The vortex that is inside of the coffin is swallowing the army that the world boss has spawned. The souls of the ones devoured could not resist the pull that the vortex used. The vortex that sucked all the souls for about five minutes, but the number is too numerous.

The vortex of the coffin sucked Baron Samedi last as that is also the end of the transformation. Fenris did not stay idle while this is happening as the three overlords are in combat with the world boss. They could no longer easily fend off the world boss as long as an endless array of enemies are attacking them too.

The coffin swallowed Baron Samedi and spit out Creeysoo in the process. The great thing for him is that the buff that Baron Samedi used has yet to dissipate for his undead knights. He decided to join the battle once more by trying to apply debuffs to the world boss while his undead knights killed the soul army that Fenris summoned.

Peridot is the same as Creepysoo but she buffed the others by increasing their elemental affinity if they have the elements that she could control perfectly. She could buff Vayu, Soleil and Levin Cloud since each of them have a respective element.

She also cleared the souls that attacked her by using their opposing elemental attribute. She might be a Ryujin but that does not mean that her stamina is endless. She could be seen breathing heavily as her skills are now taking a toll on her body.

Vayu glided like he is walking on air in the battlefield as he assisted the Storm Vulture with attacking the world boss. He would randomly summon small twisters with his attacks which greatly diminished the number of elemental souls in the battlefield. Fenris might have quantity in his favor now, but the quality is subpar.

Soleil did her best in killing off the fire elemental souls that spawned. Unlike her father that excelled in attacking, she has gained a peculiar ability from one of the Fire Elemental Kings due to her kind heart. She managed to gain the ability to eat the fire element around her which would invalidate fire attribute damage against her as well since her body is now fully resistant to it.

Lycan, who is now feeling the effects of the domain that the Lunari Fenrir summoned, is doing quick work of the elemental souls. His empowered attacks are so strong due to the buff during night but also the presence of the Lunari Fenrir.

He seemed to have gotten a hidden buff that made his stats soar. He also could feel that his control of his transformation seems to have gotten better to some extent. He usually has difficulty controlling himself if the battle prolonged and night is at its peak.

The Grand Toad would use its masterful control of the earth and water element to slow down the world boss, but his attacks are barely doing any damage as the souls would block his attacks. The Storm Vulture did not fare any different as her close-range attacks might be doing decent damage, but she is also getting damaged herself.

The one who is having the biggest contribution to the fight is the Lunari Fenrir as she and Sirius teamed up to support the others using their shadows. They would interject whenever the world boss will deal a lethal hit upon their comrades.

One of such intervention included the sudden creation of a shadow blade to attack the neck of the world boss. Fenris would dodge this attack thereby missing his current target. This only made the anger of the world boss worse, but he could not easily stop them.

Fenris eagerly waited for the domains of the others to stop working. The one person that Fenris is most displeased about is Levin Cloud. His timely heals and quick assists made the team increase their survivability. He could be described as a god level support player due to his great reflexes and judgement.

====

[You have exited the pocket dimension of the Sacred Snake.]

From the misty veil that covered the land, Adrian suddenly materialized out of nowhere. He also got restored to full health and mana with his stamina restored to about 80%. It seems that the Sacred Snake not only saved him but also restored all the essentials that he needs in order to fight the world boss.

Adrian finally arrived back to the battlefield. The sentiment of the Sacred Snake resonated with Adrian as he is not fighting alone. He just wishes that they could kill the world boss without worries. The beastkin royal knights are contributing less to the battle now since they have to take care of their wounded and exhausted king.

King Leonidas pushed himself to the extreme, but he was able to give great contributions. The battered and exhausted sight of the King of the Selvaggian race could only be seen as pitiful. He gave it his all and now he paid the price since he can no longer move.

King Leonidas finds it shameful that he is relying on his knights for protection against measly enemies like the elemental monsters. The royal knights could still move but the pain that their boy is expressing should not be undermined. They could only move like that due to the timely assist of Saena and Charon.

The hits that the beastkin royal knights could not tank is tanked by the shields that Charon is deploying. The healing that they receive that lets them fight until their last breath is given by Saena. If they cannot handle the number of enemies, Kimat would use its clones to disable them by altering their elemental bodies with its lightning.

"I need to get serious. Nether Domain." Adrian stated as the nether mist started to crawl into the battlefield.

The nether mist spread faster than before thanks to the presence of Yewdrassil. Not only that but the resonance with the two skills became apparent as a hidden interaction occurred. The nether mist covered the tree of life and death and replaced the empty leaves of the dead side of the tree with the tri-colored mist.

[The duration of the Nether Domain will increase until Yewdrassil is standing in the battlefield.]

[All enemies in the area are affected by Paranoia.]

The souls that the world boss devoured then screamed in agony due to the effect that the nether mist has on them. Each of the souls are getting hurt just by being in the area of the nether mist. Even

Fenris got chills upon getting in contact with the nether mist, but he did not get damaged unlike the soul army that he summoned.

Fenris seeing the drastic change in the battlefield could no longer contain his rage much longer. The world boss started to grow bigger than before as everyone could see that the wolf's body is increasing. After increasing for about a quarter of its current size, the runes on the chains reacted even more and glowed.

The world boss became injured because of his reckless action. Fenris is now as big as a small mountain which made him twice the size of the current Kanlaon. He could easily devour his opponents with his current size. The runes on the chain are burning his skin due to curse placed upon it.

"I shall first deal with the greatest nuisance." Fenris stated as he charged towards Levin Cloud will clouded in his unsightly aura.

Levin Cloud saw what the world boss is attempting and activated Sanctuary on himself. When the world boss rammed against Levin Cloud, the invincibility effect of Sanctuary kicked in, but he is still sent flying. The one that greeted the jaws of the world boss is now Levin Cloud.

Thankfully, the direction that Levin Cloud got sent flying is near Charon's. Adrian immediately commanded Charon to use Soul Prison on Levin Cloud to save him from getting eaten. Charon maned to save Levin Cloud but now the animosity is directed towards the Lifeless Lord.

"Use Incorporeal!" Adrian commanded via their soul link.

Charon's body turned into his spirit form, but the claws of the world boss is coated with magic. Charon got sent flying and got reduced to 30% health with just one magical attack despite his large magical defense. This attack from Fenris did not continue again as the wolf could be seen growling from the pain of being bound.

"Sirius! Phantom Rush!" Adrian commanded as Sirius obeyed his command.

Sirius became free from the restrictions of time and space. Adrian particularly told him to attack the eyes of the world boss. As Sirius is in a frozen time, the claw of the world boss suddenly attacked him. Sirius is sent flying and immediately fell to the red bar.

Chapter 555 - Death Of An Overlord II

"Sirius! Phantom Rush!" Adrian commanded as Sirius obeyed his command.

Sirius became free from the restrictions of time and space. Adrian particularly told him to attack the eyes of the world boss.

As Sirius is in a frozen time, the claw of the world boss suddenly attacked him. Sirius is sent flying and his health immediately fell to the red section. Seeing Sirius immensely injured, Kanlaon used his breath attack to deal damage to the world boss.

The Lunari Fenrir used the shadows to temporarily halt the movements of the movements of the world boss. Fenris took a full blast of the dragon breath that had two elements. Unlike what the others expected, the dragon breath dealt great damage to the world boss instead of Fenris resisting it.

Fenris did not get down despite getting blasted by spells and abilities. The world boss changed his target towards Kanlaon as Fenris jumped high and bit Kanlaon's body. The world boss dragged Kanlaon down to the ground and even managed to pierce his scales.

"Invigorate!" Adrian hurriedly casted but also revealed his position that is being hidden by the nether mist.

Adrian used Invigorate to heal all of his damaged soulbounds but that also made him a target. A sharp claw suddenly came down from beside him. Adrian managed to react quickly because he used Quantum Shift to react faster. He parried the attack with his scythe, but the force of the attack became too much to bear as he is sent flying.

Adrian managed to stabilize himself by spreading his wings as he flew in the air. Fenris did not let him escape as the world boss followed up by breathing fire from its mouth. Adrian got shocked by the sudden change of attacks because he did not even know that a Fenrir could use breath attacks.

Kanlaon dove down and created a shield made of the pure ice element to stop the fire breath attack. Creepysoo's two undead knights then used the opportunity to attack the world boss as it was busy breathing fire towards Kanlaon and Adrian.

The two undead knights flanked each side of the world boss. Don Quixote charged with its spear and tried to pierce the right side of the world boss. Robin Hood used his arrows that has a piercing effect to deal significant damage to the left side of the world boss.

Adrian then received a message from Peridot. Adrian agreed and casted Blink on Peridot. He transferred the Ryujin player below the world boss. With her enhanced fists, Peridot used an uppercut to shut the mouth of the fire breathing Fenris.

Fenris' attack stopped due to what Peridot did, but it did not mean it cancelled the skill. The remaining fire breath particles blew up on Fenris' face as its fur became singed by the flames. Fenris snarled and trapped Peridot in a sphere of pure darkness that is similar to the dark attribute spell called Dark Prison.

Dark Prison is a skill that normally traps a player for about one whole minute, but it should be stronger since a world boss is using it. Peridot tried punching her way through as a prison is also some sort of barrier since the one inside can break it with an appropriate amount of force.

No matter what she did, the prison did not even produce a crack despite her powerful strikes. Adrian got worried for Peridot but noticed that she is not being attacked which means that even Fenris will not break that skill by himself. She just needs to safely recover stamina while waiting to get out of the skill.

Vayu, who has been cutting down enemies left and right, eyed for an attack against the world boss. Most of his previous skills have improved and are now evolved. His katana is swirling with the unbridled force of a storm. He is just waiting for the right chance to unleash it as the western overlord is also using an intense ability.

The western overlord rose to the skies as became the thunderous clouds herself. Numerous howling winds started to envelop the area that hindered Fenris to jump. Large wind blades started to pour down from the sky while an actual tornado came crashing down towards Fenris.

"Wrath of the Storm Vulture!" The Storm Vulture stated as she used her strongest signature move that is named after herself.

The huge tornado came down on the world boss and pinned it down to the ground. Numerous vines then spread towards the world boss as it engulfed its limbs so that it cannot move. Even the shadows bound it and is attempting to bury it alive as the Grand Toad soften the ground beneath the world boss.

"You dare!" The world boss stated as its health dropped to 30% and emitted a shockwave more powerful than before that dispelled all the abilities affecting it.

Fenris howled and summoned a chilling wind that covered the whole battlefield. Its fur started to get covered in frost like spikes as its body emitted a chilling aura. The freezing temperature made the chaotic temperature monotonous as it brought intense cold winds.

From the cold winds came a flurry of ice shards flying which dealt damage to everyone in the area. Kanlaon could protect Adrian, but the others did not fare very well. Levin Cloud had to use a skill that made him invulnerable but also unable to attack or move from his position.

Creepysoo got protected by his undead knights with armors that are getting ragged and rundown. Peridot is still protected by the sphere of darkness as she is still locked inside. The ones that are not faring well is the group associated with collecting the Wilde Flower.

Kabrakan could only tank so much and in only one direction. The ice shards that came with the freezing winds came from different directions. Lycan used his body to protect Solstice as she needed to focus in breaking the blood magic applied towards the herb.

Soleil used her elemental magic to protect the injured beastkin royal knights and the Selvaggian King. She did so with ease as this type of cold does not affect her, but she could see that her shield is getting thinner as time passes by.

"Master, that wolf is making the surroundings drop below acceptable levels. If we do not stop him then the whole area will become frozen. You might be the only one left if this continues." Kanlaon told him via the soul link.

"I see. In that case, I need to fuse with you for the time being. I need your immunity as all the shields embedded in my armor are already broken." Adrian replied.

"Perfect Synchronization." Adrian stated as Kanlaon and his body started to fuse to create a dragon demon hybrid.

Adrian's bluish white skin started to grow dragon scales while another set of horns grew on his head. The new horns looked more draconic than demonic as it has a robust and scaly texture. It also made him look like he is wearing a crown. He grew a dragon tail while his hands and feet turned to that of a dragon.

The Primordial Armament: Scythe also changed a little as the handle looked like it is covered in dragon scales as well. Adrian looked like he is actually a direct descendant of a demon and dragon. The odd thing about him is the different colored eyes and horns. He also exuded two types of auras.

[You have successfully fused with your soulbound Kanlaon.]

[All stats will increase by 100% for the duration of the transformation.]

[Stamina will sharply decrease during the transformation.]

[All fire based, and water-based attacks will be increased by 100%. All attacks will have fire and water attribute enchantments attached to them.]

[Attacks have a 10% chance of inducing a burn.]

[Attacks have a 10% chance of inducing frost.]

[If you attacked a burned area with a frost enchanted attack, you could apply 'Frostburn' on your opponent that deals extra 100% damage.]

Adrian then spread his wings and used Blink. He then used the second skill of the scythe armament 'Burning Souls'. Adrian sent a wave of energy that is in the form of a shadow, and it latched upon Fenris. Fenris' soul emerged from below him and attacked the world boss while it is stunned.

[The enemy's shadow will deal 50% increased damage due to being in the presence of the Queen of Shadows.]

Fenris did not like that he is being bound one more as it never liked being bound. Its hatred from the gods has turned itself to hating being stunned or rooted as that is what the gods did to him. They bound him using a powerful artifact so that he could never become stronger than anyone.

Fenris used its strength and managed to partially cancel the stun that is affecting it. Fenris then did the unthinkable and ate its own shadow. For the first time, they could actually hear a shadow wailing for help. The half-eaten shadow dissipated into black smoke and returned below Fenris. If one looked closely then they would see that the world boss' shadow looks incomplete.

Chapter 556 - Death Of An Overlord III

"It actually ate its own shadow! Ah!" Levin Cloud stated as he finished healing all the overlords.

"Even I got shocked when it did that. To think that it would eat something that is a part of it. Also, why did you just scream?" Adrian stated as he appeared beside Levin Cloud using his Blink skill.

"I told you to not suddenly appear before me like that. I almost got a heart attack." Levin Cloud stated as he continued to heal the ones in battle against the world boss. Saena also healed those that she can heal because only the two of them are the healers in the group.

"I think that we need to transform to join in on the battle because we look like ants compared to the overlords." Adrian stated as he knew that Levin Cloud also has a transformation skill like he does.

"We only got ten minutes left for the tree of life and death. Might as well use it now." Levin Cloud stated as he agreed.

"Netheros True Form!" Adrian stated.

"Elder of the Forest!" Levin Cloud stated.

Skill: Elder of the Forest

Tier: Racial

Type: Transformation

Effect: Transform to your real form as an Elder Leshy. All stats will be doubled, and nature magic will deal increased damage. The skill bearer will also get wrapped in overgrowth that acts as an armor that nullifies damage by up to three times. The skill bearer will receive more damage from fire based spells and attacks.

Duration: 3 minutes (Increased when Yewdrassil's descent is active)

Mana Cost: None

Cooldown: 36 hours

Cast Time: 30 seconds

The nether mist started to converge towards Adrian while his soulbounds started to get sealed once more. Roots from underground started to crawl towards Levin Cloud and warp around him. The intense energies that are being released while the two of them are transforming is felt by Fenris.

Fenris immediately noticed the two individuals that are accumulating huge amounts of death and life energy. He felt insane fear from the energy that the two best friends are releasing but also felt greedy. He thought that by eating the two then he might finally ascend as they are bursting with life and death energy.

The Grand Toad saw this and conjured a mud dome that covered the two best friends, but Fenris did not care. With one swipe, the mud wall dried up as if it lost moisture from the attack. The Storm Vulture assisted by crashing her body against the world boss, but she got attacked in return as the power of Fenris is at its peak right now.

The Grand Toad only had one choice and he had to elongate his tongue. The tongue of the Grand Toad stretched and caught the claw of the world boss. The fierce tug of war started to happen against two gigantic creatures.

Fenris wanted to cut the tongue of the Grand Toad with his other claw, but he got attacked by two undead. The world boss looked at the two undead and used its remaining claw to pulverize the two undead. Don Quixote got reduced to dust while Robin Hood managed to evade the attack, but the shockwave sent it flying.

"I cannot believe that my debuffs are not affecting it." Creepysoo stated.

Fenris then covered its body in flames which burned the tongue of the Grand Toad. The world boss could have done that earlier, but he is conserving his mana as he needs it to convert what he eats into power. As Fenris is about to swipe his claw against the growing mist and viny spear, the Sacred Snake materialized and tanked the hit that is supposed to come for Adrian and Levin Cloud.

Fenris easily broke the scales of the Sacred Snake as her last health dropped to zero. The Sacred Snake did not look sad though as she knew that she used her life effectively. She used the last skill that she can in order to turn the tides for the last time.

"Crystal Particles!" The Sacred Snake stated.

The skill of the Sacred Snake called Crystal Particles is the skill that she used when she is usually low in health. This is her final resort when it comes to battle that she used against Fenris when he ran away and what made him fear her.

The Sacred Snake's white scales became small particles of light that hardened and launched itself towards the world boss. Fenris realized this attack and immediately backed down as it jumped backwards in order to dodge the attack. Some scales still managed to land on his body that lodged on his fur.

Fenris squealed in pain as the scales have a cleansing holy power that deals greater damage to those evil miasmas. Fenris' eyes became red as the darkness inside its body started to swallow the other elements that it absorbed. The world boss' body started to get clad in armor made of pure darkness attribute that even swallow the light.

[The Southern Overlord, the Sacred Snake, has been finally laid to rest.]

[The southern territory of the Wilde will have no overlord for the time being. The birth of the next overlord will come near.]

[The Wilde is wailing in grievance for the death of the Southern Overlord.]

[All player party members will have their health and mana restored to full due to the power of The Wilde.]

The Sacred Snake saw this, but she has a smile on her face before she became particles of light as her death came for her. The Grand Toad and the Storm Vulture saw this and became enraged as the southern overlord died by the hands of the Wolf of Disaster. They would not have been that mad if the world boss is not trying to actually eat the soul of the Sacred Snake.

It is then the Lunari Fenrir tried to stop the world boss, but her time is finally up. She used all the strength that she could muster to try and pin the world boss down to the ground with her shadows before finally disappearing. This bought more time, but Fenris still managed to see the floating soul of the Sacred Snake.

Fenris eyed the soul of the Southern Overlord in order to strengthen himself from the damage that he has taken. He is now just below 25% health due to the numerous attacks that came towards him. The world boss used its unique ocular skill in order to locate the soul of the Sacred Snake.

When Fenris found the soul, he tried biting it down but a giant hand from the nether mist grabbed the Sacred Snake's soul. The hand that reached out is a bit different from before as it was a mixture of both demonic and draconic. Adrian used his Netheros True form while he is still fused with Kanlaon.

Adrian's form is now different from normal as his face looked like he is wearing a dragon helm with six horns that adorned his head like a crown. The nether mist that covered his body also has a red and blue tinge on them while the scythe changed in form as well.

Adrian can only be described as a mixture of a dragon and a demon in wraith form as he has no legs as he is floating using the nether mist itself. He would be something called the harbinger of death of the dragons as he looked like the Grim Reaper of Dragons since his scythe is now adorned with the Kanlaon's head with the blade coming out from its mouth.

Levin Cloud is equally powerful as a burst of life energy could be felt upon turning into his Elder Leshy form. The surroundings became filled with grass or flowers as long as he stood on the ground. His form could actually change the state of the domain just by being present. The tree of life and death resonated with his form as it also boosted his fire resistance due to the unique nature of Yewdrassil.

Levin Cloud looked like what others called a forest god as he had the head of a deer's skeleton head with eyes that glowed in a blue light. He looked like he had a mane because the bushes that covered his chest to the head is in great volume.

Levin Cloud's whole body is so lanky and thin because it is made of only vines and roots that are both lush and dried up. His five fingers became three and his humanoid feet just looked like tree stomps. There are also two types of wisps that revolved around his body that is black and green.

Levin Cloud looked like the incarnation of a forest god from his new form. The others who have yet to see his new form got shocked since they thought only Adrian has receded his humanity but now even Levin Cloud has become monstrous himself.

Adrian grasped the soul of the Sacred Snake and looked at it tenderly. He then led the soul of the Sacred Snake towards the tree of life and death. He gently placed the soul of the Sacred Snake on the tree of life and death which Yewdrassil received with great care.

Yewdrassil immediately sent the soul of the Sacred Snake to Paraiso instead of Limbo as she died with valor and heart. Yewdrassil emitted a golden beam as everyone saw the soul of the Sacred Snake ascend to the divine realm of the twin gods.

Chapter 557 - Blessing Of The Wilde

[You have been empowered by the Blessing of the Wilde.]

[The blessing has been enhanced by Yewdrassil.]

[You can now cast the Void Demolition skill, but the damage will be adjusted depending on the restriction since you have yet to fully qualify.]

Skill: Void Demolition (Death Energy Half)

Tier: Divine

Type: Synchro Skill

Effect: Commune with the powers of the God of Death, Abbadon, to gather all Death attribute energy in the surroundings and form it into a sphere of astronomical energy. Once sufficient energy has been accumulated, combine this energy to its other half Void Demolition (Life Energy Half). When both halves combine, fire a beam of concentrated null energy in a straight line of about 100 meters and 10 meters wide.

This skill deals 10,000% of both users physical and magical damage as true damage. Gains 10% chance to execute enemies under 20% Health Points. Cannot be disrupted when channeling but both users are still vulnerable to damage. Cannot be used when the other half has not been channeled together with the user. Both users must be at least two meters apart in order to cast.

Cooldown: 30 days

Cast Time: 30 minutes

Mana Cost: 90% of Maximum Mana Points of both users and 30% Maximum Health Points of both users.

Restrictions: Obtain Third Status Awakening

Skill: Void Demolition (Life Energy Half)

Tier: Divine

Type: Synchro Skill

Effect: Commune with the powers of the Goddess of Life, Gaea, to gather all Life attribute energy in the surroundings and form it into a sphere of astronomical energy. Once sufficient energy has been accumulated, combine this energy to its other half Void Demolition (Death Energy Half). When both halves combine, fire a beam of concentrated null energy in a straight line of about 100 meters and 10 meters wide.

This skill deals 10,000% of both users physical and magical damage as true damage. Gains 10% chance to execute enemies under 20% Health Points. Cannot be disrupted when channeling but both users are still vulnerable to damage. Cannot be used when the other half has not been channeled together with the user. Both users must be at least two meters apart in order to cast.

Cooldown: 30 days

Cast Time: 30 minutes

Mana Cost: 90% of Maximum Mana Points of both users and 30% Maximum Health Points of both users.

Restrictions: 150,000 Devotion Stat

[Your skill Void Demolition (Death Energy Half)]

[You are currently Level 179.]

[You will deal 60% of the total amount of damage when using the Void Demolition (Death Energy Half).]

[Levin Cloud has 95,246 Devotion stat.]

[Levin Cloud will deal 63.5% of the total amount of damage when using the Void Demolition (Life Energy half).]

[Both of you combined will deal 6,175% physical and magical damage combined as true damage.]

[Due to the reduced damage, the total cast time will be 19 minutes instead.]

"We just got our ticket to win. The only problem is lasting enough to actually cast the skill. We will need to ask them to protect us." Levin Cloud stated as he read the numerous system notifications that they have received.

"I can deal with that. Once we start casting the Void Demolition skill, we will also transform back to our miniature forms. That will be the time where we are the most vulnerable." Adrian stated.

Adrian then proceeded to summon all of his soulbounds in their nether forms. He commanded all of them to defend them with all they got as this will be the last stand. Adrian is confident that the Void Demolition skill will definitely kill Fenris as long as they could hit him.

All of Adrian's soulbounds then charged at Fenris with the intent of stalling. The others got informed of the situation and decided to support the two. Even King Leonidas and his royal knights started to join since they saw the death of the Sacred Snake.

Adrian and Levin Cloud started casting Void Demolition as both of them are accumulating energy beyond what can be called 'what a human can handle'. Adrian and Levin Cloud stood two meters apart from each other. Adrian raised his left hand while Levin Cloud raised his right hand.

"Void Demolition!" Both of them simultaneously stated with Adrian's voice echoing while Levin Cloud's voice being abysmally low.

Adrian used all the death energy in the surroundings as a small gray orb is created in the middle of his left hand. Levin Cloud used all the life energy in the surroundings as a small green orb is created in the middle of his right hand.

For each minute that they are channeling, the orbs started to expand by about an inch per ten seconds. Fenris and the others felt this enormous energy and focused on the demon and the leshy that is channeling two different energies. Fenris' very existence is shouting that he will get killed or rather erased from existence if he does not stop them.

Fenris shook off the spells that the Grand Toad and Storm Vulture cast against him. Fenris is charging towards Adrian first as he saw that the Levin Cloud is covered by some sort of armor that will nullify his attack. Fenris thought that he would be successful when Sirius suddenly popped out from the nether mist and used the mist to constrict the movements of the world boss.

Sirius stopped the momentum of the world boss by tying him with the nether mist. Chains then sprouted from the mist and bound the world boss as Charon used his chain's new ability to materialize but will lose their health siphoning effect. Nether lightning then struck at Fenris as he is surrounded by a thunder cage.

Fenris tried to stand up, but he got shocked or rather his soul got shocked. The world boss howled, and the nether thunder cage, chains and nether mist shadows got dispelled. Fenris thought that he will be free, but a giant nether slime greeted his face. The world boss howled as his eyes started getting melted by the slimes' body, but it is still not enough to deal great damage towards Fenris.

Chapter 558 - The Wilde Flower Is Released

Dodu attached itself to the world boss in an attempt to disintegrate Fenris' face. Fenris swayed his head violently until Dodu could no longer attach itself as the latter is also blasted with darkness spell that the world boss caast. Before the world boss could charge once more, King Leonidas used his immense strength to punch the left cheek of Fenris.

Fenris got knocked back a little but retaliated by trying to kill King Leonidas with his teeth. The tongue of the Grand Toad then extended and caught King Leonidas mid-air so that he would not get mauled. The Storm Vulture then blasted the world boss with air cannons.

Fenris started getting pushed back more and more by the Storm Vulture. Creepysoo no longer tired applying curses on Fenris but rather used his crowd control skills since he could not even affect the world boss with his strongest curse skill.

After continuously punching the dark sphere that cover her, Peridot finally got released from her prison. The only downside is that she returned to her human looking form since she already exhausted almost all her stamina. She dropped down on the ground as she meditated a little since she is a bit far away from the main battlefield.

Soleil once again summoned Regulus as she also bombarded the world boss with her spells that deal low damage but knocks the enemy backwards. Fenris even tried to kill her using a skill, but she became flames that scattered in the wind and reformed a few seconds later.

Soleil got nervous because that is her life saving skill that saves her from one instant death skill. The fact that it activated meant that she would have died if the world boss' skill would have hit her.

While Fenris got busy trying to shake off all the opponents that are trying to stop it from getting close to both Levin Cloud and Adrian. A shockwave is then released in an area that is very important to Fenris. The shockwave had the scent of blood that stimulated Solstice' appetite.

"I finally did it!" Solstice stated as he slumped down to the ground as she is hungry and extremely exhausted.

"I thank you for helping me, Solstice. The fox clan will be greatly indebted to you. Now that the barrier is gone, we must scoop up the Wilde Flower before Fenris comes." Ashana stated as she healed her wounds using mystic arts.

"I think it is already too late for us to run. Seeing as the world boss is actually running towards us." Kabrakan stated as he started to use his Beastification skill.

Kabrakan swelled in size as his human head started to morph to that of a bull while his body tripled in size. His horns also started to get sharper while his shield also shifted in size in accordance with how big he is.

"Astral Body!" Kabrakan stated as a copy of his spirit went out of his physical body.

"Seismic Stomp!" Kabrakan stated as his left hoof stomped on the ground and released a physical shockwave.

Kabrakan's physical body released a shockwave that dealt physical damage while his astral body released a shockwave that dealt magical damage and would induce slumber. The magical shockwave hit Fenris, but he did not get induced with the sleeping status ailment. The world boss did slow down a bit when it got hit with the magical shockwave.

The physical shockwave made Fenris trip though as the slow reaction made it lose focus for a second. The Grand Toad used that time and jumped high into the air and slammed his body against

Fenris. The Grand Toad managed to pin the world boss to the ground while numerous bony hands clasped Fenris' body.

Adrian's soulbounds once again used their strategy to pin down the world boss. Peridot joined as well as she used the remaining crowd control skills that she has in order to keep Fenris pinned down. The world boss howled once again, and all crowd control skill got erased.

Everyone is maintaining a safe distance from Fenris since getting close will definitely spell instant doom. Fenris stood up and charged towards the Wilde Flower as he wanted to eat it now in order to forcefully ascend. If he does not ascend then the deadly skill that is being accumulated by the demon and the leshy.

"You shall not pass!" Kabrakan stated as he clashed with the world boss.

Kabrakan then used Rebound in order to knockback the world boss. Fenris got knocked back but only by a few meters which is not much as Fenris used his huge mouth to try and bite Kabrakan's head off. Kabrakan reflexively raised two of his shields and it caught Fenris' jaws.

The strength of the Legendary Weapons that Kabrakan is starting to wane as it started to crack. Kabrakan is both pleased and nervous about this happening. He is pleased because his weapon would once again increase in tier but nervous as him failing will mean their deaths.

"Awoo!" The piercing howl of another wolf echoed.

A silver streak then went past Kabrakan and headed towards Fenris' face. With a great swipe, Fenris' right eye got damaged and spurted blood like a fountain. The silver streak is non-other than a bipedal wolf that has silver fur.

The bipedal silver wolf is none other than Lycan that has transformed. The full moon is shown in the sky since the Lunari Fenrir summoned it. Fenris winced in pain and released his bite on Kabrakan's shields. The world boss fell back and started releasing more darkness aura that started to decay the surroundings.

Fenris looked at the direction of the Wilde Flower using his remaining eye but got enraged when it saw that the herb is no longer in the location. He then saw Ashana and Solstice quietly slipping away from the battlefield so that the world boss does not ever get the miraculous herb.

"Why can't I put it in my inventory?! This suck!" Solstice stated as she escorted Ashana away from the battlefield but the world boss' attention shifted to them.

Chapter 559 - Void Demolition

Due to the Wilde Flower being a special quest item that will dictate the flow of the events in the world, it cannot be hidden in the special space of players called the inventory. Solstice also got notifications as soon as Ashana managed to scoop the soil where the Wilde Flower grew.

[The NPC Ashana has uprooted the Wilde Flower.]

[You must protect her or else the Wilde Flower will fall under the possession of the Wolf of Disaster.]

[You can either kill the Wolf of Disaster or escape the northern territory in order to successfully carry out your mission.]

[If Ashana dies then the wolf clan will no longer have any favorability towards any of your group members.]

All of them received the last notification but Solstice received all of them which means the pressure is on her. Ashana and Solstice are now running away from the battlefield. The direction that they are heading towards is Adrian and Levin Cloud's location.

Solstice knew that the world boss is now targeting them, and the safest place would be the place with the strongest amount of energy. It is also the most strategic location to get defended as Adrian and Levin Cloud are also getting protected by the team. It would do them better to group up than spread out and split up the resources of the team.

Solstice summoned her yeti and grabbed Ashana on top of him as they rode towards the location of Adrian and Levin Cloud. Fenris stood up as he shook his head in order to shake off the blood of his face as his eye started to slowly recover. The fact that Fenris started to heal worried everyone because he is now below 20% health, but it is rising steadily.

The Grand Toad decided that Fenris must fall now and that they could not wait for the attack of both Adrian and Levin Cloud. The Grand Toad and the Storm Vulture decided to do what needs to be done even if they start burning their life. Should they fall, another overlord will be chosen in their place which is why they have decided to get rough.

The Storm Vulture coated her body with wind elemental attribute magic and started ramming the world boss. She kept ramming Fenris until the world boss retaliated by jumping and slashing at her back. The Storm Vulture crashed towards the ground and Fenris is about to finish her off, but the Grand Toad kicked the world boss away.

Despite the huge body of the world boss, Fenris managed to maneuver its body in mid air and land on its four feet. It did not have a breather though as Dodu once again showed up from the mist and clung on the world boss' face.

Fenris could not easily shake off the giant nether slime as it is immune to physical damage. Fenris had to use its energy and release a burst of darkness attribute magic so that Dodu would retreat. The howl of a wolf is heard inside the mist as the mist itself started to grasp at the limbs of the world boss. Sirius is using the nether mist like what he would of his shadows.

The nether mist grasping at the limbs of the world boss is accompanied by lightning chains. A spontaneous burst of lightning is also added to that as Kimat is supporting Sirius. Fenris is easily taking in the damage of the skills as it barely decreases his health.

Fenris already knew that his enemies are not planning to utterly kill him but buy some time. If the Wilde Flower is out of his grasp, then he would ultimately lose in due time. With the help of Solstice' companion, they managed to reach the location of the two large existences that are Adrian and Levin Cloud.

Saena appeared from the mist and covered the Storm Vulture with nether mist in order to heal her. Fenris saw this but did not bother as the Wilde Flower is now slipping away from his grasps. If he does not eat it now, then he will surely die in due time.

Fenris is not running away from the attack of both Adrian and Levin Cloud because he is confident that he could dodge it. He is only having difficulty getting close to both Adrian and Levin Cloud as they are protected by numerous posies.

"It seems like all of you have a death wish. I should aid all of you then." Fenris stated.

Fenris absorbed something in the surroundings and released a giant explosion of miasma that inflicted different status ailments towards his enemies in the area. The status ailments are all random as it differs depending on the individual.

[Vayu has been paralyzed for ten seconds.]

[Soleil has been silenced for 1 minute.]

[Kabranken has been poisoned. He will lose 1% health every 10 seconds.]

[Peridot has been afflicted by slumber. If she gets attacked, she will be awoken.]

[Lycan has been afflicted by the weakened status ailment. All of his stats will be reduced by 10% for five minutes.]

[Creepysoo has resisted the paralyzing status ailment.]

[Levin Cloud has resisted the status ailment.]

[Sirius has been paralyzed for one minute.]

[Saena has resisted the status ailment as she absorbed it.]

[Dodu got infected with poison. Dodu will lose 2% health every ten seconds.]

[Kimat got put to sleep. Getting attacked by an enemy will be able to awaken him.]

Charon has resisted the status ailment as he cannot be put to sleep.]

[You have resisted the status ailment.]

"Saena! Absorb all the status ailments from the others!" Adrian commanded via their soul link.

Saena carried on with the task that she was given as her figure can be seen flying inside the nether mist. She started getting the status ailments of the soulbounds first before she went to the others. She first absorbed the poisoned individuals as they will die from poison if they do not get cured.

The only way that Adrian and Levin Cloud resisted the status ailments is that they cannot be stopped when casting the spell Void Demolition. They could still die if they get damaged since they will be vulnerable to damage despite being immune to status ailments.

The Grand Toad got poisoned and paralyzed as he was near Fenris when he cast that wide area curse. The Storm Vulture got weakened and could not get up since she is heavily injured. Saena had to pause her healing because she also got poisoned.

King Leonidas and the royal knights also got two status ailments since they were close to Fenris. The ones that are not affected because they are out of reach are Ashana and Solstice while those that resisted have natural immunities to status ailments.

"Robin Hood now! Death Piercer!" Creepysoo shouted as he wanted to attack Fenris immediately after it released a skill.

The most common tactic in fighting a world boss is to attack it immediately after it casts a spell or ability. He is waiting for this chance as the skill Death Piercer is a skill that trades the current life of his undead knight for a special effect.

Skill: Death Piercer

Tier: Legendary

Type: Active Special

Effect: Using the life of the caster, the arrow pierces the soul of the target and separates a copy of it. The separated copy of the soul is sent out of the target's body. The separated copy will then be able to be attacked by allies to deal damage towards the target.

Duration: 10 minutes

Mana Cost: None

Cost: -1 level

Cooldown: None

Cast Time: Instant

[The world boss, Fenris, got hit by the Death Piercer skill.]

[You can deal damage to the boss by attacking the copied soul of the target.]

[The effect of this skill will dissipate if Creepysoo dies.]

Fenris got hit by the Death Piercer and a copy of its soul got separated from its body. The soul looked exactly like Fenris but more ghostly. It is also connected with a ghoulish chain that goes towards Fenris' chest where his heart is located.

"Everyone go and attack the soul copy!" Creepysoo shouted as he activated a skill that turned himself invisible since the effect will dissipate if he dies. An important skill like this must not be wasted since it cost a whole level for Creepysoo's undead knight.

Fenris saw this and already tried its skill to cancel all skills afflicting it. Fenris howled but the chain connecting him, and the soul copy did not disappear. The laugh of Creepysoo could be heard all around as his giggle filled the area since he knew what Fenri tried to do.

The others believed Creepysoo and started attacking the soul copy. All the damage that the soul copy got is transferred towards Fenris. The damage transferred is not a one-to-one ratio though. The damage that they deal towards the soul copy will only deal 50% towards Fenris but that made the world boss become more violent.

"May you be returned to nothingness! Void Demolition!" Both Adrian and Levin Cloud stated.

Chapter 560 - Sombre Victory I

When the ten-minute mark passed, Yewdrassil finally returned to its seed form and rose towards the heavens once more. The odd thing that happened is that Adrian and Levin Cloud did not transform back. They found it odd, but it is also the effect cancelling immunity of the Void Demolition skill.

The two best friends have yet to turn back to their normal selves. The energy that they are also accumulating is still as strong as when they started. Adrian and Levin Cloud has found out a loophole in the synchro skill although they can only use it once they reach level 300 again to test if the same situation would be true.

The Wilde Flower also started glowing and the energy that it produced is sent to the enormous pool of energy that both Adrian and Levin Cloud are siphoning. The remnant red aura that the Wilde Flower holds is transferred to Adrian's death energy while the flower itself sent some energy towards Levin Cloud's life energy.

[The Wilde Flower has assisted Levin Cloud in accumulating Life energy.]

[The cast time of Void Demolition will be reduced by one minute.]

[The Blood of a Grim Reaper has provided enormous death energy for Adrian's accumulation of Death Energy.]

[The cast time of Void Demolition will be reduced by one minute.]

The cast time being reduced by two minutes is a huge help for the entire party. The soul copy is also easier to target, and they could definitely kill the world boss just by targeting that. Creepysoo gave them a way to win the fight with the world boss.

"We just need to finish casting and it will be our complete victory." Adrian and Levin Clou thought as their eyes glowed on an eerie but powerful light. They might not be able to speak but their real forms show their emotions with gestures or quirks.

====

Fenris could not believe that he is now tied up in this area. He also gets hurt because his soul copy is an easy target. He could mitigate the damage to an extent by completely consuming the souls of those he has eaten. The only problem is that his own soul would become unstable if he continued doing it.

"I shall not fall like this!" Fenris stated as he finally consumed the soul that he kept as his trump card.

The soul of the avatar of a dark god that visited him has yet to be fully consumed. He might have recovered some of his strength when he ate that cursed soul but even the world boss fears that his own soul would be polluted. Even he has slight fears of what might soul will become is he really fully consumes a distorted soul.

Fenris consumes the soul by breaking it down and integrating it with his own soul. That soul will become part of his own soul which means the unique characteristics will be copied as well. This is the secret of the ability to consume the abilities of others by eating them. This ability will not work if the soul of the eaten has left the body.

Fenris already received the ability to create false bodies by offering a lump of the flesh of those that want a copy. His enraged eyes could not help but see his soul copy. That very copy will be the thing that will save him from his defeat as he needs to make another copy of himself.

Fenris consumed the rest of the souls that he eaten except for the avatar of the dark god. The world boss did that in order to restore his life back to 50%. This is the real ability of Fenris which is why some of his abilities do not cost mana or have a cooldown.

As long as the world boss has souls to consume, he could cast his crowd control immunity skill indefinitely. Healing wounds would be another matter as that will consume more souls which is why the world boss could only heal back to half health. Fenris immediately bit his bleeding body and took out a lump of flesh from it.

[Fenris, the world boss of The Wilde, has been restored back to full health.]

[Fenris, the world boss of The Wilde, sacrificed 25% of its health to use Flesh Animation.]

The world boss then threw this flesh towards the soul copy that is inanimate. As the flesh travelled forward, it started growing and growing until it fused with the idle soul copy. Lycan, who is about to attack the soul copy, got hit back in return. He did not take as much damage though as a copy will surely not be as powerful as the original.

[Fenris, the world boss of The Wilde, has used Flesh Animation and recreated a copy of himself.]

[The Flesh Copy has been given 25% of the world bosses' health.]

[The Flesh Copy will only have 60% of the original's stats but full 25% health of the world boss.]

"There is two now?" Kabrakan grumbled as he is already extremely exhausted from blocking just one. He is already sacrificing his health so that the effect of Beastification is empowered and lengthened.

"I will join as well. Blood Queen!" Solstice stated as she also joined the battle but the full moon in the horizon only boosts his strength by 50% unlike when there are moonless nights which vampires get 100% bonus stats. She also used 50% of her own health to purposefully vanish the cooldown of one of her skills.

She collected the blood from the battlefield once more and fashioned them back into weapons. Peridot then noticed that the soul chain that connected both the original and the copy still. It means that they can still damage the original as long as they defeat the copy.

If they defeat the copy, then Fenris will become more vulnerable as it is basically destroying a piece of the world boss' soul. Saena did not hold back and released every status ailment that she has took in her body. Fenris might have been immune to them but that does not mean his copy would not.

[Saena has spread the Curse of Weakening and it affected the Flesh Copy (Fenris).]

[The Flesh Copy (Fenris) stats will be reduced by 5%.]

[Saena has spread the Toxic Curse and it affected the Flesh Copy (Fenris).]

[The Flesh Copy (Fenris) will receive 1% total health damage every minute. This curse can be dispelled using an antidote or with cleansing. This curse cannot kill the target and will be lifted if they lose 10% of their total health.]

[The Flesh Copy (Fenris) has resisted the Slumber status ailment.]

[The Flesh Copy (Fenris) has resisted the Paralyze status ailment.]

Even though the copy is inferior, it still has resistances that can help with becoming immune to status ailments. Fenris used the chance that he bought himself by attacking the remaining two overlords which are his greatest obstacles. If he kills the two overlords, then he could easily wipe out the other enemies.

Since there are two of him now, Fenris decided to split his forces as he attacked the two overlords at the same time. Since the Storm Vulture has yet to fully recover, the real Fenris tasked himself with killing her first. He sent the copy to play with the Grand Toad and distract him.

Fenris tried to pounce on the Storm Vulture, but he is met with the Selvaggian King. King Leonidas filled all his fist with his fury and hit the unsuspecting world boss. Fenris noticed immediately and changed his angle to attack King Leonidas, but the fist of the Selvaggian King extended and showed the image of a lion.

"Fist of the Beast King!" King Leonidas stated as he and Fenris clashed mid-air.

"Fool! That is but a distraction." Fenris stated as he pounced once more.

"I only needed to distract you." King Leonidas stated as the voice of the two best friends is heard in the battlefield.

"May you be returned to nothingness! Void Demolition!" Both Adrian and Levin Cloud stated.

King Leonidas crashed to the ground with a smile on his face despite his arm being pulverized. Fenris looked at the direction of the beam and saw that he is not the target but his soul copy. The world boss did not pay great attention to the copy as it will not greatly affect him.

Fenris saw his soul copy being pinned down by the eastern overlord and Adrian's soulbounds but he must finish his objective. If he kills the Storm Vulture, then he could recover his health once more. Fenris aimed for the neck of the western overlord unknown to him that he has sealed his fate.

The beam of cosmic energy that can delete anything is headed towards the flesh copy and struck true. Everyone that pinned down the flesh copy all avoided the beam as told by the two best friends. It could also hurt them as it does not have a concept of friendly fire.
