

Oh My God 1461

Chapter 1461 Centipede

In order to prove his words, Shen Yulin easily lifted Meng Chao up with only one arm.

Meng Chao struggled desperately and kicked Shen Yulin's arm, which was thicker than a rhinoceros' thigh, but not a single shallow mark was left.

Thick white smoke then spurted out of Shen Yulin's nostrils. His arm, which looked like a giant pillar, smashed down heavily and threw Meng Chao onto a corner of the SUV that was exposed to the mud.

Boom!

The fierce collision not only caused the SUV to sink into the mud, but also caused a series of cracking sounds to be heard inside Meng Chao's body. Meng Chao coughed up a mouthful of blood and had no more strength to struggle.

Like an empty broken sack, he let go of Shen Yulin's arm and collapsed on the ground. His eyes, which were filled with disbelief, were the only ones left. He was staring at Shen Yulin's neck.

It was not only because of the thick veins on Shen Yulin's neck that were like giant pythons that slowly raised their heads.

It was also because, along with Shen Yulin's blood surging and raging flames, a terrifying mark gradually appeared on the right side of his neck.

It was a pair of eyes that were crossed and formed an "X" shape.

Two thin and long eyes that were like a lancet shared a pupil.

The pupil was unfathomable, like a small black hole that wanted to swallow the soul of the signer and the person who was staring at it.

No one was more familiar with this mark than Meng Chao.

His pupils contracted into two needle tips, and his heartbeat almost stopped. He tried his best to control his voice, but he was still so excited that his whole body trembled. "Blood-Blood Alliance!"

Shen Yulin was slightly stunned.

He subconsciously covered his neck.

Then, thinking that the prey in front of him was already meat for him to slaughter, there was no need to hide it. He put his hand down again and deliberately tilted his neck, showing the symbol of Blood Alliance on his carotid artery.

"Since you've heard of our name, it'll be easy for us to deal with this."

Shen Yulin smiled and slowly wiped off the blood that had sprayed onto Meng Chao's face.

"This is impossible."

Meng Chao looked as if he had seen a ghost. He coughed up blood and said in a daze, “Didn’t the Blood Alliance fall apart long ago when the nine big families joined hands? After that, the nine big families evolved into the nine big corporations today, creating the Survival Committee together. “We are all from the nine corporations. How could you, how could you be—”.

“You are too naive.”

Shen Yulin sneered. “The Blood Alliance was the first organization in Dragon City to excavate the ancient ruins, explore spirit martial arts, and research the superhuman forces. It was known as the ‘source of the superhumans.’

“At its peak, we ruled the entire Dragon City firmly, controlling more than half of the superhuman forces in the city.

“Even the former number one expert of Dragon City, Battle God Lei Zongchao, was created by the Blood Alliance’s genetic laboratory. “The predecessor of the nine corporations and the nine families from decades ago, which one of them didn’t receive cultivation resources, research materials, and experimental data from the Blood Alliance? Which one of them didn’t have a close relationship with the Blood Alliance? And which one of them didn’t bow down to the Blood Alliance?”

“How could the Blood Alliance collapse so easily?”

“No...”

Meng Chao clutched his chest and struggled to crawl away as if he was hiding from an evil monster. He did not care about the long bloody scar on his back. He groaned as he crawled. “If I find out that your organization is the Blood Alliance, I wouldn’t join it even if I’m beaten to death. I won’t join you demons!”

“Demons?”

Shen Yulin was deeply infuriated by this attitude of avoiding Meng Chao as if he was facing a plague. He strode forward and stepped on Meng Chao’s ankle. Amidst the latter’s bone-cracking and miserable screams, he raised his thumb, stabbed his chest heavily, and spoke with a ferocious face. “We were the ones who discovered the mysteries of the immemorial era. We were the ones who created the first batch of superhumans. We were the ones who laid the foundation of the spirit energy cultivation building. We were the ones who saved Dragon City in the dark years when the flood was raging and the zombies were rampaging. We were the ones who brought a brand-new order to the chaotic era where order was broken and lawlessness was rampant!

“Without the Blood Alliance, Dragon City would have been destroyed a long time ago! “Is there such a devil in the world?”

“Cough, cough, cough, cough, cough!”

Meng Chao curled up like a prawn on an iron plate in pain and coughed out a lot of blood and foam. He coughed so hard that his face was pale and he could not breathe. After a long time, he finally managed to speak. “You... You forced innocent citizens to go deep into the treacherous and dangerous ancient ruins to carry out a near-death adventure. You also sent the lucky ones who managed to escape into the laboratory to carry out experiments that destroyed humanity. Behind every superhuman that you

successfully created were the corpses of tens of thousands of innocent people. You... You have trampled on the bottom line of humanity!"

"So what? If a general succeeds, thousands of bones will perish. In order to win the battle for survival, someone has to pay the price!" Shen Yulin said disapprovingly.

"Based on the actual situation at that time, other than the Blood Alliance's approach, was there a better way for mankind to awaken extraordinary strength and master such a powerful spirit martial art without paying any price or breaking the morals, laws, and the old era's so-called 'bottom line of humanity'?"

"Don't be silly. This is not a peaceful earth. You can talk about the bottom line of humanity when you are full.

"This is a dangerous foreign world. It is a bloody and cruel arena where the strong prey on the weak. The competition for survival is extremely fierce!"

"With the transmigration of Dragon City, the monster civilization was activated. In just twenty to thirty years, the overwhelming beast horde would engulf the entire city. "If we couldn't unlock the ancient mysteries and awaken extraordinary power before the beast horde arrived, everything would be over!"

"Yes, the Blood Alliance may have consumed tens of thousands of lives, but we saved tens of millions of people!"

"Tens of thousands against tens of millions. Even elementary school students can tell the difference!"

"This..."

Meng Chao's eyes were absent-minded. His face was deathly pale, and every muscle on his face was trembling.

It was as if he had heard a shocking theory, but he could not think of a reason to refute it. Instead, he was deeply shocked by the other party. His mental defense had suffered a huge blow, and it was on the verge of collapse.

He could only say dryly, "We are superhumans. We should protect ordinary people. How can we treat precious lives as numbers and test subjects!"

"Of course, superhumans should protect ordinary people."

Shen Yulin said, "However, if ordinary people are not used for experiments, how can superhumans know how to cultivate and become stronger?"

"If superhumans can't become stronger, how can they protect more ordinary people?"

Meng Chao was dumbfounded.

"You are crazy. All of you are crazy. You are a bunch of complete lunatics!"

He seemed to finally realize this as he shook his head like a rattle-drum. "No, I will not team up with lunatics like you. Your extremely crazy plan has no chance of success. The only outcome for all of you is to be dragged out one by one by the Supernatural Tower and sent to the judgment platform! "I don't want to lose my reputation like all of you. No, definitely not!"

“The Supernatural Tower?”

It seemed like Shen Yulin had heard the biggest joke, as he could not help but say, “I said just now that the organization’s strength extends to all walks of life in Dragon City. The elites from all walks of life are our members. Naturally, that includes the Supernatural Tower.

“As the saying goes, the winner takes all. When our ‘crazy plan’ really plunders a hundred times more land, slaves, and resources for Dragon City, and we also use these resources to cultivate to a level that is even more powerful than the former battle god, Lei Zongchao, may I ask, who else has the right to judge us?” “No, I don’t believe it!”

Meng Chao’s eyes were bloodshot, as though the last pillar of his spirit was about to collapse, “How can the demonic claws of the Blood Alliance extend into the Supernatural Tower? As for the people of the Lu family and Sky Pillar Corporation, it’s impossible for them to join the Blood Alliance. You’re lying to me. You must be lying to me!”

“Are you still unwilling to face reality? To tell you the truth, your Lu family—”.

Shen Yulin suddenly narrowed his eyes as he spoke.

However, he stopped abruptly as if he had smelled danger.

Tilting his head, Shen Yulin pondered for a moment, and his smile became increasingly intense.

He waved his finger gently at Meng Chao.

“I have to admit that you are a rare talent. I admire you more and more,” Shen Yulin said with a smile.

“You’re still thinking of ways to get crucial information from me even at this stage? “Your brain and willpower are really commendable. It’s weird. A talent like you should have stood out in Sky Pillar Corporation like an awl in a sack. Why is it that I don’t have any impression of you even though you weren’t famous in the past?”

“It doesn’t matter. After we bring you back to the Blood Alliance and accept the modulation, we still have a lot of time to resolve the misunderstanding and become friends.

“However, first of all...”

Shen Yulin stopped talking.

He raised his fist.

As spirit energy gushed out, his veins were like seven or eight giant pythons that coiled around his entire arm, making his right arm look like an indestructible stone pillar instead of flesh and blood.

More than ten lumps of bone protruded out of his knuckles instantly. They were also as hard as granite. Just by raising them high in the air, one could feel the excruciating pain of bones cracking and bones piercing through flesh and blood.

Swoosh!

Shen Yulin’s fist disappeared.

In front of his right arm, a meteor tore through the atmosphere and caused high-speed friction with the air.

It was like a meteor that was as fast as lightning, piercing straight into Meng Chao's chest!

Chapter 1462 You Can Still Be Saved

Shen Yulin was ready to enjoy the pleasure of his prey's broken ribs and the complete collapse of his chest.

This incomparable pleasure always reminded him of when he was young, personally driving a large shield machine to rush through the deepest rock layers, using a high-frequency vibration tunneling system to blast the rock into powder.

It was simply the most wonderful feeling in the world.

However, the satisfying feeling that he had expected did not come.

His fist was like a meteorite surrounded by electric arcs. After tearing through the atmosphere, he plunged into the deep sea. He did not even cause the slightest ripple.

It was as if Shen Yulin had punched cotton. It was indescribably uncomfortable.

No, it was not cotton but steel that was wrapped in cotton.

His punch that was as fast as lightning was casually grabbed by his "prey"! "This..."

Shen Yulin felt his hair stand on end. He could not believe his eyes.

Compared with his deformed, bulging, and indestructible iron fist, his "prey's" palm was clearly very small, and it was not even enough to cover the surface of his fist.

However, the hollow palm of his "prey" seemed to form a terrifying swirl under the swallowing of spirit energy, which sucked his fist tightly.

No matter how hard he bulged his veins and tightened his muscles, he could not move at all.

Meanwhile, his "prey" was not paying attention to him at all. Instead, its eyelids were drooping, and it was deep in thought as if it was... distracted!

No, it was not "prey."

Looking at the other party's sudden change in temperament, as if he was a completely different person, and smelling the deadly aura that was comparable to that of the apocalyptic beasts, Shen Yulin's rock-hard skin could not help but break out in goosebumps, every single hair that was as sharp as a sword and halberd was shivering, and there were beads of perspiration dangling from the tip of each hair.

The current him could no longer differentiate who was the prey and who was the true hunter!

Hearing the groans of confusion, fear, and despair coming from the depths of Shen Yulin's throat, Meng Chao finally recovered from his long period of thinking and searching through the memories of his previous life.

“I’m sorry, I was distracted.”

He apologized to Shen Yulin, “Let’s continue.”

As he said that, Meng Chao gently exerted force. With a “kacha” sound, his five fingers were deeply embedded in Shen Yulin’s iron fist, literally crushing the latter’s fist!

Shen Yulin stared at his bare wrist with his mouth agape.

Above his wrist, where his fist should have grown, was now empty. Only broken bones and blood flew like flowers from heaven.

It was as if he was holding a heavy train shell in his fist.

This train shell was detonated by Meng Chao in the depths of his clenched palm.

For a moment, the indescribable pain had yet to reach the center of Shen Yulin’s brain.

His heart had yet to squeeze the blood out of his bloody wrist.

Time seemed to have frozen as Shen Yulin fell into an absurd nightmare.

“That’s right, it must be a dream.”

Shen Yulin said to himself in a trembling voice, “How can such an unbelievable thing happen in reality!”

However, in the next second, pain and blood came down at the same time, forcing him to face the cruel reality.

Shen Yulin’s bare right wrist began to spurt blood like a fireman’s water cannon.

The intense pain stimulated his adrenaline.

Before the tide of fear completely paralyzed his neural network and motor functions, his body, which had been meticulously modified by the Blood Alliance and was as strong as a ferocious Hell Beast, had already reacted instinctively.

He let out a beast-like howl and ruthlessly punched Meng Chao’s temple with his left fist.

This time, under the stimulation of intense pain, fear, anger, and adrenaline, the speed of his fist increased by a third.

With his flesh and blood body, he blasted out a piercing scream after the armor-piercing bullet was fired.

However, no matter how shrill the scream was, it could not escape the cracks between Meng Chao’s fingers.

Shen Yulin could not see clearly how Meng Chao had locked onto, captured, clenched, and crushed his fist.

By the time he reacted, the second “kacha” sound had already drilled into his ear canal like a little bug covered in thorns.

The end of his left wrist was also spitting out a ball of burning blood flames like his right wrist.

In the blood flame, his left fist, which was bigger than the head of a fierce beast, also disappeared.

Shen Yulin was at a loss. He raised his bare wrists in front of him.

The illogical but shocking scene caused him to temporarily lose his ability to think.

The wave after wave of intense pain destroyed his will to resist.

He took two steps back, and his slightly dull expression began to crack. Like a mute, he uttered, "Ah ah ah ah ah ah," a meaningless syllable from the depths of his throat.

His arms, which had lost both his fists, waved wildly, causing the blood to turn into a thick blood mist, trying to use the blood mist to block the terrifying monster in front of him.

Unfortunately, the "monster" easily tore through the blood mist.

In one step, it was right in front of him. With a "pfft" sound, the "monster's" hand knife, which looked at his hard flesh and blood as if it was nothing, pierced deeply into his chest.

This was exactly what Shen Yulin wanted to do just now!

Faced with such a horrifying "monster," Shen Yulin's mental defense line collapsed.

The meaningless syllables finally converged into a heart-wrenching scream.

As a monster, Meng Chao did not plan to let this Blood Alliance member off so easily.

Using the anatomical principles that he had mastered after harvesting thousands of monsters, Meng Chao's seemingly unstoppable hand knife perfectly avoided all the vital points between Shen Yulin's chest and abdomen.

His heart, liver, spleen, lungs, and kidneys had not been damaged at all.

However, the biological electricity that shot out from Meng Chao's fingertips had wrapped around Shen Yulin's heart, liver, spleen, lungs, and kidneys, and invaded his nerve endings, causing him to have a feeling that.., "My internal organs have been firmly grasped in the palm of this monster."

As the saying went, "The greatest fear is the fear of the unknown."

If one were to say, "my fists burst open, blood spurted out, and only two bare wrists were left," Shen Yulin could clearly see and understand the damage the consequences would cause. However, with his internal organs firmly grasped, he had no idea when and how the other party would inflict fatal damage to his heart, liver, spleen, lungs, and kidneys. The fear of the unknown was, without a doubt, a hundred times more terrifying than the bursting of his fists.

Shen Yulin's face was as pale as a sheet.

He was trembling uncontrollably, and his body temperature plummeted.

In a short moment, about one-third of his blood had been spurted out from his wrists.

If it had been an ordinary person, they would have died of shock or even excessive blood loss.

Even if they were superhuman individuals with abundant spirit energy, once they lost one-third to two-thirds of their blood, they would be paralyzed on the spot like a tank without fuel, turning into scrap metal.

However, Meng Chao still had no intention of stopping.

He skillfully controlled the biological electricity spurting out from his fingertips.

He had hijacked some of Shen Yulin's nerve endings.

He had sent many wrong messages to Shen Yulin's brain.

One of them was that his upper abdomen was getting more and more intense, even more painful than the broken wrist.

"Do you feel that your upper abdomen is getting more and more painful?"

Meng Chao's hand knife was still deeply embedded in Shen Yulin's chest and abdomen. He stared at Shen Yulin's eyes and said calmly, "That's because I just tore the capsule of your liver and created five bleeding spots on your liver.

"Liver trauma is one of the more common and serious types of abdominal trauma. It is second only to splenic rupture. There are many complications and a high mortality rate. You must not let your guard down.

"By the way, I seem to have forgotten to disinfect my palm.

"There must be many bacteria and viruses in the mud in the wilderness. They will cause serious pollution to your chest and abdomen. All the more reason for you to need prompt debridement, disinfection, and treatment.

"Speaking of which, the self-healing and regeneration abilities of human beings are actually very powerful, especially for superhuman individuals. Even if two-thirds of their livers were removed, the bleeding would stop in time, and the cells would be injected with regeneration fluid. It would not be impossible to save them.

"Now that the rune technology is so advanced, the mechanical palm driven by crystals can almost replace 80% of the functions of a real hand.

"Of course, you can't do any more evil things, but it shouldn't be a big problem for you to eat, drink, and wipe your excrement. "Therefore, you can still be saved. "Of course, I know that the members of the Blood Alliance are all fearless outlaws.

"We don't have much time. If you are determined to kill yourself, I won't stop you. If you want to die, die quickly!" Of course, Shen Yulin did not want to die.

If he really had the courage to kill himself, he would have had countless chances to burn himself to ashes in the SUV just now.

At this moment, the intense pain had instead aroused an extremely strong desire to live.

Meng Chao had used the biological electric current to stimulate the nerve endings and implanted the information into Shen Yulin's brain center, causing him to hallucinate.

Other than the waves of pain in his upper abdomen, Shen Yulin seemed to see that his torn liver was flooded with blood. In a short while, it filled his entire abdomen.

The temperature of his body was much lower than the real temperature.

He felt like he had fallen into an endless ice cave.

It was so cold that he could not burn his life and ended his own life!

Meng Chao's unfathomable strength triggered Shen Yulin's wild thoughts.

Although Shen Yulin had not broken through to the Deity Realm, he was still a well-known senior expert in the circle of superhumans in Dragon City. He was comparable to Luo Wu. After the Blood Alliance's careful adjustment, he had mastered many secret techniques that could burst out instantly.

He did not expect that he would still be suppressed by Meng Chao so easily, forcefully, and completely!

'Who... Who is he?

"To be able to toy with me, when I've erupted to the extreme, is he... a Deity Realm expert?

'What kind of joke is this? Where did such a young Deity Realm expert come from in Dragon City?

'This... This... How is this possible!'

Every cell in Shen Yulin's brain was screaming.

Chapter 1463 Omniscient Powers

His brain was still unable to believe this shocking fact.

However, under pressure from Meng Chao, which felt like the end of the world, his body had already given up on resisting.

Shen Yulin collapsed to the ground like a pile of mud. His arms, which had lost their hands, were like giant pythons that had lost their vertebrae, dangling on both sides of his body. "I don't want to die."

He said in a trembling voice, "Spare me. Save me. I'll tell you everything. I-I've been forced into a corner. As long as you spare me, I'll tell you everything!"

"Very well. Let's resume the topic we were talking about just now." Meng Chao nodded and injected a stream of gentle spirit energy into Shen Yulin's body, which temporarily sealed the blood vessels at the ends of his arms and stopped his blood from spurting out like fireworks.

At the same time, he injected a few weak biological currents into his cerebral cortex, stimulating his central nerves to maintain his sharpness. It would ensure that his thoughts would not become chaotic and blurry due to excessive blood loss.

After completing all those steps, Meng Chao continued to ask, "Who are your accomplices, the Blood Alliance members that infiltrated the Supernatural Tower, Universe Corporation, and Sky Pillar Corporation? Tell me their names."

"This..."

Shen Yulin looked conflicted. "I don't know."

Meng Chao perked up his brows in surprise. "I don't mind. After all, your liver is torn, and I'm not the one bleeding internally."

Meng Chao reminded him, "You really don't know?"

"I, I really don't know!"

Shen Yulin's face was filled with despair, "I'm only a peripheral member of the Blood Alliance. My communication with my superiors has always been one way. I don't even know the true identity of my superiors. Under normal circumstances, it's my superiors who take the initiative to contact me through a disposable communicator, deep web mail, or a dead drop. I really don't know the names of any other Blood Alliance members apart from myself!"

"That's impossible, isn't it?"

Meng Chao said, "How do you explain that team of accomplices disguised as orcs? Didn't you recruit them?"

"I did recruit them, but they don't answer to me. In fact, I was only cooperating with my superiors."

Shen Yulin explained with an innocent look on his face, "I reported the difficulties that I encountered in my current work to my superiors. So, they'll naturally solve those problems in their own way. I don't need to know the details of the plan or the name of the executor. I just need to follow the instructions of my superiors and transfer the searchlights, drones, and guards at the rear of the crystal mine. It's that simple."

"What about the female doctor?"

Meng Chao stared at Shen Yulin. "Didn't you send her here to silence her?"

"No, this is our first time working together. I don't know her name, and what I saw may not be her real face. Following my supervisor's orders, I only gave her a fake badge and exposed a loophole in Universe Corporation's internal management system so that she could plant a fake identity," Shen Yulin said with a pained expression. "She's in charge of filling in the gaps in this operation. I can temporarily dispatch her, but there's no superior-subordinate relationship between us!" "So, what you said earlier was a lie?" Meng Chao said, "Everything about the Blood Alliance including elites from all walks of life, be it the Supernatural Tower or the nine corporations, you have your people, and your foundation, connections, and strength are so powerful that I can't imagine it—Was that all a lie?"

"No, no, no. I wasn't lying to you. Even if I had ten guts, I wouldn't dare lie about such a thing!"

Shen Yulin hurriedly said, "The Blood Alliance is indeed very powerful. We... Their members are from all walks of life in Dragon City. That includes the Shen family and Universe Corporation. There are definitely

members of the Blood Alliance who are of a higher level than me. I-I'm just a peripheral member, an insignificant pawn!" "How do you know that?"

Meng Chao narrowed his eyes and scratched Shen Yulin's Adam's apple like an old razor blade. "Since you don't know the name of any Blood Alliance member, how do you know that the Blood Alliance is 'powerful and omnipresent'? Even those in Universe Corporation, whose ranks are higher than yours, are members?"

"No, you don't need to know their names. You can tell a lot of things!"

Sensing Meng Chao's suspicion and killing intent, Shen Yulin became so scared that his head was about to fly up. He continued to speak like a cannonball. "Take the project to develop the crystal ore veins outside Monster Mountain Range as an example. In the beginning, there were four parties competing for project leadership in Universe Corporation.

"Among the four parties, my team was the weakest in terms of experience, capability, funds, and connections.

"No one, including myself, thought highly of me. They all thought that I had been temporarily recruited to make up the numbers and 'accompany the bid' in order to satisfy Universe Corporation's internal competition regulations. "In the end, one of my three competitors became mentally deranged during training and got seriously injured. Although his life was not in danger, he had to lie in the medical cabin for at least a year and a half.

"Another one got involved in a scandal when people found out that three years ago, he had faked his military exploits in a competition for a key position. He had also used monster materials secretly purchased from the black market as proof that he had been hunting monsters. You know, military exploits are everything for superhumans. Faking military exploits is a high-pressure line that can't be crossed no matter what. When his scandal was exposed, forget competing for the crystal ore mine, even his current position was wiped out. He could only guard the warehouse in the wilderness.

"The last competitor was the strongest. Not only does he hold a key position in Universe Corporation, but he's also my uncle in the Shen family. He's highly trusted by the entire family. I wasn't qualified to compete with him.

"Just when everyone thought that this uncle of mine would possess the crystal mine, he gave up on the project of his own accord. He even publicly expressed that he greatly appreciated my talents and believed that I was the most confident person amongst the Shen family's younger generation to make this project sound and impressive. He's already old, so in the future, the Shen family will have to be led by someone from the younger generation like me. Therefore, he's going to give me more opportunities to train, and he'll spare no effort to support me from behind.

"It was because of my uncle's endorsement that I was able to manage the crystal mine successfully.

"The problem is that my uncle and I don't have a deep relationship at all.

"In fact, due to the internal competition in the group, there were some minor conflicts in the past.

“My uncle also had his beloved sons, disciples, and trusted subordinates. Logically speaking, even if he only wanted to find a puppet, it wouldn’t be me!

“One could say that it was a coincidence or luck if something like that happened once.

“It happened three times in a row. Three strong competitors were all ‘defeated’ for no reason. If it isn’t connected to the Blood Alliance’s power, what else could it be?” Meng Chao nodded thoughtfully.

He did not think that Shen Yulin would lie in such detail when his hands had been cut off at the same time and his heart was literally in his hands.

Besides, the contact methods he mentioned one-way contact, disposable crystal communicator, deep web mail, dead drop, etc.

—were indeed the best choices for a secret organization with a tight structure.

“Tell me about your superior.”

Meng Chao continued to ask, “Since you don’t know his real identity, how did you contact him in the beginning? Under what circumstances did you join the Blood Alliance?”

“From the beginning, it was the other party who took the initiative to contact me.”

Shen Yulin’s face was pale as he regretfully said, “Yes, it was an anonymous letter. An anonymous letter that lay quietly in my desk drawer. The letter was filled with dirt on me.”

“Dirt on you?”

Meng Chao said with great interest, “What could be so shameful that the other party could use it as dirt on you?”

“I-I pretty much didn’t do anything!”

Shen Yulin shouted, “I swear to the heavens that I didn’t do anything wrong. I was the same as all the superhumans. To protect Dragon City, I pinned my heart on my sleeve and fought bloody battles with the monsters on the front lines. I left dozens of scars on my body and escaped the overwhelming beast horde five times!

“However, you know the unspoken rules in the circle of superhumans. In order to constantly break through the limits and surpass the peak, it’s impossible to be too cautious and behave!

“I hid some of the spoils of war.

“I found a new crystal ore lode, but I didn’t send the relevant information to the Supernatural Tower to register it. Instead, I sold it to someone else in private.

“The purchaser from the black market is unknown to this day. However, the materials weren’t very stable. There was a possibility of going crazy and harming others and themselves.

“The superhumans had a small conflict with their competitors as they competed for battle merits.

“In short, they were all trivial matters.

“Everyone does it. As long as there’s no real evidence and no big mess, no one will take something like this seriously.

“However, many things did not merely weigh two or three kilograms on the scale. They could not be weighed because the scale would not have been able to hold a thousand kilograms!

“The anonymous letter was filled with evidence against me. There was also a large amount of evidence that I thought I had erased. Thinking about it makes me shudder and sweat profusely.

“Anyway, the person who wrote the anonymous letter did not make me panic. He did not mean any harm.

“The real culprit was someone inside Universe Corporation, who was jealous of my outstanding performance at that time because I had blocked their way. That’s why the person gathered all the evidence in secret and tried to bring me down with the scandal. “As a ‘friend,’ the person who wrote the anonymous letter couldn’t bear to see such an outstanding talent like me being defeated by such a trivial scandal. Therefore, without my knowledge, he had already taken action in secret and helped me solve all my problems.

“He asked me not to take this small matter to heart and didn’t ask for anything in return, except my precious friendship. “Of course, if I valued his friendship and was willing to offer a small favor to a friend, like help him get the details of a project that Universe Corporation was working on at that time, he would be even more overjoyed and grateful!”

Chapter 1464 Becoming Deeper and Deeper

There was a glint in Meng Chao’s eyes. “What project?”

“A very, very small, insignificant project.” Shen Yulin said, “I swear to God, I really didn’t do anything that would harm the interests of the company or the family. That project was not the focus of Universe Corporation’s work in the first place, and there were dozens of people handling it. Everyone had detailed information on it a long time ago. Even the higher-ups didn’t think highly of the project, and it could be shelved at any time.

“Under such circumstances, it didn’t matter whether I was willing to help or not. The other party had a hundred ways to get detailed information. Moreover, ninety-nine of those ways would be much cheaper than going through all the trouble to find me!”

“That’s true.”

Meng Chao nodded. “If you had been asked to seriously damage the interests of the group and the family right from the start, you definitely wouldn’t have given in.

“First, he made you take a few insignificant projects that don’t violate the principles. At most, it would be a side project that would make you lower your guard and sink deeper and deeper. Only then would you completely sink.

“So, you fell for it?”

“I couldn’t not fall for it!”

A few scarlet blood spots formed on Shen Yulin's pale face. "I'm not a three-year-old child. Although the other party's tone in the anonymous letter was gentle and he told me to be at ease, claiming that all the evidence had been destroyed, how could I really relax?"

"I can guarantee that if I hadn't done as the other party said, this anonymous letter would have appeared on the home pages and forums of all the major media and self-media in Dragon City the next day. I would have become the shame of the Shen family, the shame of Universe Corporation, and the shame of the entire circle of superhumans in Dragon City!"

"I, I could only follow that person's orders!"

"Understood," Meng Chao said.

"What happened after that?"

"On the second day after I helped that person obtain information on the project, he sent me a gift that I couldn't refuse."

Shen Yulin said, "It was the poison stinger of a mutated silver rattlesnake."

"Back then, in order to treat my internal injuries, I was concocting a gene reagent. I urgently needed this ingredient. "It's true the silver rattlesnake's grade is lower than that of its close relative, the golden rattlesnake. However, the problem is the number of silver rattlesnakes is even lower than the latter, more so when it comes to the mutated version."

"I searched for a long time in the Supernatural Tower and the black market, but I still couldn't find such the ingredient. I could barely use the poison stingers of ordinary silver rattlesnakes to replace it, and the effects of the gene potion that I concocted were always unsatisfactory."

"In the end, the mysterious person somehow heard about my plight and directly left the poison stinger of a mutated silver rattlesnake by my bed!" "Wait..."

Meng Chao said, "By your bed?"

"You didn't hear me wrongly. It was by my bed!"

Shen Yulin revealed an extremely terrified expression and said in a trembling voice, "Can you imagine how I felt when I woke up and found that a mutated silver rattlesnake's venomous stinger had been neatly placed on my bedside table along with a 'passionate' thank-you letter underneath it?"

"You must have felt a chill down your spine."

Meng Chao said, "Since that person had the ability to place the poisonous stinger on your bedside table while you were asleep without anyone's knowledge, he obviously had the ability to stab it into your heart too."

"Therefore, I had no choice," Shen Yulin said dejectedly.

"After that, I helped him a few more times. It was just as you said. It was not important, it did not violate my principles, and it did not hurt anyone. They were just minor matters."

“And that person gave me an extremely generous reward every time. Of course, it wasn’t sent to my bedroom, but to a public warehouse that we had agreed upon beforehand.

“Whoever it was even took the initiative to help me deal with a competitor in the family, allowing me to get a position that I yearned for day and night.

“Don’t misunderstand. ‘Deal’ doesn’t mean killing the competitor. Instead, it entails exposing the other party’s scandal. That way, the other party would have no choice but to leave the scene miserably—no man is rich without a windfall, and no man is fat without fodder. If superhumans want to reach the peak, they need to have more cultivation resources than others. In the process of fighting for resources, who can remain clean and never be reprimanded by others?

“When I saw what happened to my competitor, I was both delighted and terrified.

“I couldn’t help but wonder if my competitor received the same anonymous letter as I did, and he made a different choice than I did. Is that why he ended up in a situation where his reputation was ruined?

“After the incident... no, you could say that from the very beginning, I didn’t know how this matter should end. “There were many times that I wanted to reprimand that person in a righteous manner, break away from him, and never listen to his orders again.

“But I couldn’t make up my mind.

SC

“Every time that person asked me to do something, it was something that didn’t go against my principles or betray my conscience. Moreover, the rewards that I was given were too generous.

“When I got stuck in my latest dilemma, the other party took the initiative to ask for my help for the final time. Since I was always so loyal, that person wasn’t willing to make things difficult for a precious friend. From now on, he would completely disappear and never bother my life again.

“Of course, if I ran into any difficulties and wanted to ask for help, that person would definitely do whatever he could to help me.

“At first, I thought that I was mistaken. How could it be so easy to talk to a mysterious fellow like that? “I was already a fish on the chopping board, but they let me off at the last moment. How could this be possible?

“I was on tenterhooks for months, but whoever it was kept his promise and never showed up again.

“It should have been a good thing.

“But for some reason, I, I—” “You missed the mysterious and powerful guy?”

Meng Chao asked, “Do you miss the life where you were rewarded handsomely by helping that person a little?”

Perhaps because the spirit energy that Meng Chao had injected into his body had helped him recover some of his vitality, the red spot on Shen Yulin's face spread into a cluster of red spots. He spoke with a flushed face, "I would never have taken the initiative to look for him.

"But, I needed money, a lot of money! "At that time, I was barely in the middle level of Universe Corporation.

"Before I climbed to this position, I looked at the 'supervisors, managers, and directors,' all of whom were so well-behaved and glamorous.

"Only after I really reached the middle level did I realize that this was an unlucky position where I had to suffer at both ends.

"The higher-ups would only press the target regardless of how many monsters were killed. If the target was to kill a set number of monsters, it would still be possible to complete through gritted teeth. However, it was stipulated that a brand-new crystal lode should be discovered every month. How was that possible?

"The employees below were not good either. At most, everyone would only spend 30% of their energy on their work. The remaining 70% would be spent on training. Only a fool would think of working wholeheartedly for the corporation and the family. Smart people... no, normal people would invest their time, energy, and resources into themselves. They would continue to train and become stronger! "You can't hit or scold such an employee. If you dared to give him a hard time today, tomorrow, he would train to a higher level and rebuke you until you were drenched in blood in front of everyone. Then, he would leave without a word. In the end, he won't be the one to take the blame. Instead, it would be the so-called middle-level people who were proud on the surface!

"I had enough, and I told myself that if I wanted to do it, I needed to be the biggest person in Universe Corporation. At the very least, I had to be the biggest person in a subsidiary company. I needed to be a high-ranking official who could say whatever I want!

"Of course, it was not easy to sit in such a position.

"First of all, the hardest, most important target is the cultivation level.

"At that time, although I had already stepped into the Heaven Realm, if I wanted to stand alone, I would still be required to cultivate crazily.

"Plus, to not be exhausted or even go crazy during my crazy cultivation, I needed resources that were a hundred times more abundant than others.

"I am a member of the Shen family, but the Shen family is full of talented people. There are many experts, and the internal competition is very fierce.

"Among my peers, there are already many talented people who have stood out and soared to the sky.

"Even among the younger generation, there are many who have shown astonishing cultivation potential. They are known as the future of the family.

"The limited resources and opportunities in the family have to be invested into these brilliant geniuses and rising stars. When it's finally my turn, even dog sh*t will be cold.

“The path of cultivation is like sailing against the current. If I don’t advance, I will retreat. As I get older, the path ahead of me will become darker and narrower.

“If I don’t find a way to break through, I’ll probably have to stay in my position and realm for the rest of my life. No, I can’t stay there for the rest of my life. In three to five years, at most seven to eight years, I will be pushed down by the new generation who are getting increasingly aggressive!

“I, I had no other choice but to participate in the gambling

“I wanted to win back a lot of cultivation resources from the black market and try to break into a new realm.

“I didn’t expect to lose.

“Not only did I lose all my assets, but I also lost some of the company’s money.

“At that point, I was completely panicking. “The company was about to have a debt. Where was I supposed to find such a large sum of money to fill the hole in one or two weeks?

“Once the scandal of embezzlement of the company’s assets was exposed, I wouldn’t even have a chance to guard the doors of Universe Corporation, let alone the warehouse!

“I could only brace myself and take the initiative to contact that guy.

“It was the first time that I had taken the initiative to contact him.

“I thought that he would make things difficult for me.

“I didn’t expect him to be so straightforward. He didn’t bother with any details. With a wave of his hands, he helped me fill the hole and even supported me with a large amount of cultivation resources.

“That person even criticized me for not treating him as my friend. Why was he gambling? Couldn’t I just ask them directly?

“Since he was so straightforward, it was only natural that I would do him a small favor.

“This time, that person invited me to deliver a letter to the office of a certain big shot of the Universe Corporation.

“The request is to deliver the letter directly to the big shot’s desk without anyone noticing.

“I used to be this big shot’s subordinate, and trusted and appreciated me greatly.

“To be more precise, this big shot was one of my backers in the group. Therefore, I was very familiar with his office layout and his schedule. Even if I appear around his office, it won’t arouse suspicion.

“The mission wasn’t too complicated.

“There was no need to go against your principles and betray your conscience.

“Without much effort, I placed the letter neatly on the big shot’s desk and pressed it gently with his favorite monster Fang paperweight.

“At that time, I did not know what I had done.

“In fact, until today, I don’t know the specific content of the letter.

“But, but, that night, this big shot killed himself in his own practice room!”

Chapter 1465 The Rebirth of the Blood Alliance

Shen Yulin mentioned a name that was like thunder.

Even Meng Chao had heard of that big shot’s death.

“Is it ‘Senior Shen?’” Meng Chao said in surprise.

“Didn’t he die of a cultivation accident and suffer from spirit energy deviation?”

“According to Universe Corporation’s public statement, his cause of death is very strange.”

Shen Yulin said, “That night, the big shot practiced a very aggressive martial art without any warning, and before he injected gene drugs into his body. However, he injected more than 500% of the safe dosage, and during his practice, he made several mistakes that even beginners wouldn’t make, such as intentionally channeling violent spirit energy into his heart and brain. That led to fatal mental derangement.

“Moreover, he also turned off the real-time monitoring system for his vital parameters in the training room in advance. As a result, the people outside the training room could not notice his abnormality at the first moment and rescue him in time.

“All the signs indicate that the waters run deep.

“The problem is that no one knows why this big shot killed himself. At that time, he was in a key position in Universe Corporation. He was also a highly respected existence in the Shen family. There was no problem with his cultivation progress, the few projects he had on hand, or his cash flow. Even his family was harmonious, and his children were all outstanding

“The internal investigation team of the Shen family has been investigating for more than a month, but they still couldn’t find anything. This matter can only be left unsolved. “However, I know very well that the death of this big shot is definitely related to the letter I sent.

“What I sent was not a letter at all, but a life-hastening talisman!

“After discovering the truth, I was both shocked and angry.

“What is shocking is that the power of these mysterious people is far beyond my imagination. They can actually use a light life-hastening talisman to force our Shen family’s big shot to kill himself. In the entire Dragon City, is there anything that they can’t

do?

“What is infuriating is that this death warrant is not only for the Shen family’s big shot, but also for me. Moreover, I am so stupid that I personally stuck it to my forehead!

“If people knew that I was the one who sent this letter and forced the Shen family’s big shot to a dead end, not to mention the universal group and the Shen family, even the entire Dragon City, no matter how big the entire monster mountain range is, there would be no place for me to stay!

“However, the big mistake had already been made. No matter how furious I was, it was impossible for me to bring the dead back to

life.

“At this time, the other party found me again and said that I had displayed sufficient strength and loyalty during the organization’s series of tests. I was already qualified to officially join the organization and see their true colors.

“With a death wish on my forehead, how could I still have any room to struggle?

“I could only be led by their nose and let them manipulate me!”

“How did they manipulate you?” Meng Chao said, “Your iron bones should be the products of their modulation. Did you not see their real faces when they modelled you?”

“No.”

Shen Yuling shook his head, “According to the instructions left in the deep-net Mailbox, I went to a black market warehouse that anyone could rent without registering the identity of the hirer. I injected myself with an anesthetic left by the hirer in an isolated cubicle in the depths of the warehouse. Then, I didn’t know anything. “When I woke up, I was already lying in a laboratory. The shadowless lamp above my head was emitting blinding light, so that I could only see a vast expanse of whiteness from the beginning to the end. I could not see the faces of the operators around me clearly.

“No matter how much I poured spiritual energy into my eyeballs and tried to scan the facial contours of these guys, I could only see that they were all wearing cold masks. Even their eyes were hidden deep behind the black crystals.

“The guys wearing the masks injected a lot of messy things into my body, which made me suffer the most twelve hours of my life. Now that I think about it, it was still as painful as being in the hell of Asura for twelve years.

“After enduring the pain, I felt like I had been cleansed and reborn. I felt that an unknown door was slowly opening in front of me. “Before I could calm down from the excruciating pain and ecstasy, the other party planted a brand on my neck — the cross-shaped eye that you saw, the symbol of the Blood Union!”

“Only then did you know that you had joined the Blood Union?” Meng Chao asked.

“That’s right. As the former overlord of Dragon City, I naturally know the symbol of the Blood Union.”

Shen Yuling said, “Before this, I had guessed the identity of these mysterious people countless times, but I never dreamed that they came from the blood union, which should have fallen apart long ago.

“The Blood Union was destroyed by the nine corporations and the martial god Lei Zongchao. As a member of the Shen family, I naturally had a deep understanding of the evil and cruelty of the Blood Union.

“At that time, I was overwhelmed with grief and indignation. I rubbed my skin desperately, trying to erase the brand of the Blood Union from my neck.

“These masked members of the Blood Union only looked at me coldly from the side and did not stop me.

“Very soon, I realized that the cross-shaped eye had already seeped deep into my flesh and even my bone marrow. The more excited I was, the more violent the spiritual energy magnetic field would be, and the clearer and more vivid it would be.

“Unless I’m willing to cut off my own neck, I’m afraid that I won’t be able to get rid of the brand of the Blood Union for the rest of my life.

“Besides, even if I can erase the brand completely, what’s the point? “The evidence that I worked for the blood union, including the evidence that I helped the blood union to force the death of my own boss, is all in the hands of the other party. The other party coughed softly, and I’m going to die without a burial place as a survivor of the Blood Union!

“Upon realizing this, I was like a dead fish that had been slapped onto the beach by the wind and the scorching sun. I was filled with helpless despair.

“Seeing that I had finally given up on struggling, the other party consoled me by saying that I had been bewitched by the transcendental tower and misunderstood the blood union’s purpose. He also thought too highly of the current situation. “The other party said that all primitive accumulations are bloody and cruel. Yes, the Blood Union a few decades ago did have many cruel, bloody, and brutal places, but with the collapse of order and lawlessness, everyone was in danger. The entire city was about to be destroyed. If any other organization had accidentally discovered an ancient ruin and Beyond powers, they would have made the same choice as the Blood Union.

“The purpose of the blood union is not wrong — to explore the mysteries of the primordial era, to explore the potential of the human body, and to allow mankind to survive in the cruel and unknown New World. What’s wrong with that?

“If I have to say it wrong, it’s just a small deviation from the blood union’s methods.

“The one who should be responsible for this ‘small deviation’ is the former leader of the Blood Union and the entire leadership.

“Those heinous and inhumane fellows have long been dismembered into thousands of pieces and turned into ashes by the experts of the nine corporations led by ‘martial god’ Lei Zongchao.

“Then, why can’t the Blood Union, which has been destroyed once and has learned its lesson, turn over a new leaf and usher in a new life after a great change of leadership? Why Can’t they atone for their past deeds in a completely different way and continue to fight for Dragon

City?

“What the other party said is very reasonable. I can’t think of how to refute it.” “Besides, the power that the other party injected into my body is too huge.”

“Just like that, I, I, just became muddle-headed and joined the Blood Union.”

“Believe me, I’m definitely not a cold-blooded, natural-born murderer. I’ve never thought of betraying Dragon City and hurting anyone. I just, just made a choice that all extraordinary people would make. All extraordinary people will make this choice after encountering everything that I’ve encountered!”

“There’s no need to explain. I’m not a judge.

So?!

Meng Chao pressed, “What did the other party ask you to do after you joined the Blood Union?”

“Nothing.”

Shen Yuling said, “Before I joined the Blood Union, the other party often asked me to play some minor games, perform some illegal operations, disclose all kinds of insider information, and so on.

“After I became an official member of the Blood Union, not only did the other side forbid me from doing such shady business, they also asked me to abide by the law, work hard, and fight bravely. The Other Side would also provide me with all the resources, opportunities, and conveniences to help me climb up the ranks.

“Until I became the chief supervisor of the ‘Red Creek Creek Project’, the other side never asked me to do anything that violated the laws and regulations, the internal control regulations of the corporation, and the laws of the Shen family “Understood.”

Meng Chao said, “Would the blood union want to borrow your hands to control a few large crystal ore veins before secretly providing them with crystals?”

Shen Yuling did not deny it, he only said, “If everyone does that, even the Universal Corporation wouldn’t be honest and report every gram of crystals we excavated to the transcendental tower. That would not only result in a high resource tax, but it would also be very inconvenient to use.

“I don’t know who you are, but since you can cultivate to such a terrifying realm at such a young age, you must know better than anyone else that a true expert consumes astronomical amounts of cultivation resources every day. As for the source of these resources, it is the ‘Eight Immortals crossing the sea, each displaying their own divine powers’.

“In any case, I have never seen any beyonder who can cultivate to become a peerless expert just by relying on legal resources that are publicly available.

“Originally, in my position, I was going to intercept a batch of crystals every month and secretly send them back to Dragon City for the elders of the Shen family, the backbones, and the future stars to cultivate.

“Right now, I’m just going to intercept some more and send them to the blood union “Then, I don’t understand —“

Meng Chao said, "According to you, the Blood Union will spare no effort to rope you in and support you. They have poured a lot of resources on you and pushed you to your current position. It's obvious that they want to do long-term business.

"The Red Creek Creek Creek project has just been launched, and the Crystal Mine is still expanding in scale and depth. For the time being, how many crystals can you withhold and send them to the Blood Union? "In just a few months, I'm afraid that you will not be able to recover the capital that the Blood Union has invested on you.

"If that's the case, why is the blood union in such a hurry to attack the Crystal Mine disguised as orcs?

"You must know that, no matter what the final outcome of the matter is, you, as the person in charge, will not be able to escape the accusation of 'negligence'. By then, if you 'resign', Will the Blood Union not pay for your long-term investment

Chapter 1466 Negative Equity

"This..."

Shen Yulin looked hesitant as if he had something to hide.

"Wait, you just said that Dragon City urgently needs a war in order to ensure the valuation of the nine corporations and fulfill the promises made to the investors."

Meng Chao's sense of smell was extremely sharp, and he went straight to the point. "In other words, the development of the Red Creek Project and the surrounding mining area alone will not be able to fulfill the promises made to the investors?

"In other words, the development of this mining area is not as smooth as advertised to the investors. The crystals produced are far from meeting expectations?

"Under the situation where the production capacity of the crystals is seriously insufficient, you have to secretly withhold a portion of it and secretly send it back to the Shen family without the other shareholders and the Supernatural Tower knowing.

"On that basis, you have to withhold another portion and send it to the Blood Alliance.

"Will the hole be dug too big? Will the accounts be settled?"

Shen Yulin was shocked.

He did not expect Meng Chao to hit the bull's eye with just his words. His expression was the answer. "Then, I understand." Meng Chao nodded and said, "The Blood Alliance wanted to invest in the Red Creek Project in the long run and treat it as a long-running gold mine. "Who knew that the Red Creek Project was a huge pit in itself? The crystal lode under our feet was not as large and rich as the Universe Corporation boasted to the investors.

"Once the real reserves of the Crystal Lode were exposed, it would definitely cause a great uproar.

“Before you realized that, the first phase of the project had already been put into production. You had already secretly taken a large number of crystals and sent them to the Shen family and the Blood Alliance, which resulted in a shocking hole in the account.

“If the second phase of the ‘Red Creek Project and the subsequent development could be carried out smoothly and the crystal production capacity was constantly expanding, then the hole would be easily filled by time.

“But right now, in the situation where the ticking time bomb could explode at any time, you can’t hide it for too long. There is a serious discrepancy between the account numbers and the inventory of the warehouse. “Once the bomb is detonated, it is needless to say that you yourself will be blown to pieces. The painstaking efforts of the Blood Union will also be revealed to the world. It will really be a case of robbing the goose that lays the golden eggs.

“Therefore, you and the blood union can only take the risk and pretend to be orcs to attack the crystal mine. ‘for the advancement of Dragon City, a war must be launched’is a long-term and dignified reason. At the very least, the blood union will be able to continue hiding after the water is completely muddled and the imminent threat is resolved. This is the short-term and most direct motive, right?”.

Shen Yuling’s eyes were filled with shock and fear, as if he was looking at an omniscient demon.

“Who... who exactly are you?” He muttered, “You really got involved in this matter unintentionally. Before this, did you really not know anything?”

“Who I am is not important. What is important is who you want to be — a living person or a dead person.”

Meng Chao said, “In my eyes, you are already a dead person.”

“No!”

Shen Yuling became agitated. “I’ve been honest and told you everything. You promised not to kill me!”

“I won’t kill you, but the blood union might not.”

Meng Chao said, “Since the truth of the ‘Red Creek Creek Project’is completely inconsistent with the propaganda, this is not a gold mine that can provide the organization with endless resources. Instead, it’s a thunder that could blow up the organization at any time. Under such circumstances, if I were the leader of the Blood Union, I would definitely think of ways and means to cut off the ‘Red Creek project’without leaving any trace of the blood union’s activities here. “And the biggest trace is undoubtedly you. “Whether it’s the storm tonight or the orcs’attack, as long as the Red Creek Creek Project Explodes, you won’t be able to escape. You’ll be subjected to endless investigations and even interrogations. Who asked you to be the first person in charge of the project, specifically to take the blame? “What if during the investigation of financial fraud and illegal operations, you accidentally find out that you’re actually a member of an evil organization that has been theoretically destroyed for many years? Wouldn’t the Blood Union be very embarrassed? “The problem is that the ‘Red Creek Creek Project’has become a hot potato. I think that even if you want to find someone to take over the project, you won’t be able to find a suitable candidate for the time being, right? “Even if you find someone to

take over the project, when the mine explodes, as the first person in charge of the development of the project, you will still be doomed.

“Therefore, to the Blood Union, you have become an out-and-out negative asset. You are a piece of Stinky Dog Sh * t that has been injected with superglue and stuck to the soles of your shoes. You Won’t be able to get rid of it. “I don’t think it will be possible to transfer you from the ‘Red Creek Creek Project to other key projects of the universal group.

“Even if it is possible, the cost of investment will be very high. You will also have to worry about your loyalty after the ‘Red Creek Project’explodes.

“Then, the best solution is undoubtedly to make you disappear completely. “Let me think. ‘during the orcs’attack, Shen Yulin, as the general manager of the Red Creek Project, took the lead and fought bravely. In order to protect the crystal mine, he sacrificed himself at the forefront.’No matter which aspect it is, this should be the most perfect ending, right?”

Shen Yulin’s face changed greatly.

His eyes were spinning rapidly.

He was not a fool.

Ever since he found out the truth about the Red Creek Creek Creek project and knew that he had been hit by a ticking time bomb, he had imagined his ending more than once.

Meng Chao’s words hit the nail on the head.

His face was so pale that one could see the blood vessels and nerves that were twitching under his skin.

But he said, “No. Will the Blood Union kill me to silence me? They have invested so much in me

“Any mature and rational investor should know what is ‘Sinking Capital’, ‘cutting out of the market’, and ‘cutting off one’s arm to survive’.”

Meng Chao said calmly, “It seems that the leader of the blood union is very mature and rational.”

As he spoke, he pulled out his palm that had been inserted between Shen Yulin’s chest and abdomen.

Shen Yulin let out an “AH”and instinctively felt an intense illusory pain.

For a moment, he thought that his heart was about to be pulled out by Meng Chao. However, although Meng Chao’s palm was dripping with blood, the illusory pain in his chest did not last long. It was replaced by a numbness.

Shen Yulin looked down in fear.

He saw that Meng Chao had torn a large and shocking hole in his chest and abdomen.

However, the wound was as fine as a surgical knife. Other than the flesh wounds, the internal organs were all intact.

Even when Meng Chao used his spiritual energy to seal and glue the wound, not much blood spurted out and body fluid flowed out.

The physical quality of extraordinary individuals was different from that of ordinary people.

As long as their internal organs were not seriously damaged, such skin and flesh injuries could be solved with a bandage.

“This...”

Shen Yuling was both surprised and delighted.

But Meng Chao was expressionless as he opened his palm to him.

In Meng Chao’s bloody palm, there was a crystal clear capsule lying upright.

At the two ends of the capsule, there were a few sharp and thin needles.

Inside the capsule was a shiny, slightly trembling chip. “I found this in your body. It’s installed near your cervical vertebrae. If I’m not mistaken, the female doctor who tried to kill you has a similar chip in her body.”

Meng Chao said, “This is the tool that the blood union will use to control you, isn’t it?”

Shen Yuling hesitated for a moment, he nodded and said, “Yes. This is what is implanted into our bodies along with the brand of the cross eye. It usually stays dormant and only monitors our physiological parameters. Once the mutation of our physiological parameters is detected and we are in trouble, the chip will automatically activate and send our coordinates to the organization. It can also transmit some simple messages by controlling the rhythm of our heartbeat and Morse code.

“However, due to the torrential rain and the intense interference from the spiritual magnetism tonight, the power of the chip is not enough. It has been running intermittently

“I see.”

Meng Chao said, “Therefore, your heartbeat suddenly became very weird for a while just now. You were trying to communicate with your accomplices, weren’t you?”

Shen Yuling’s face was red.

He knew that the messages that he had sent with his heartbeat had been blocked and interfered by Meng Chao. Playing such a trivial trick in front of a god-level expert was just asking for humiliation.

“How interesting.”

Meng Chao said, “The Blood Union shouldn’t have received the messages that you sent, but I sensed that the chip had received a tremendous amount of data from the outside world for a period of time, which made it abnormally active and intense.

“It was as if it wanted to stimulate your central nerves, hijack your brain, and send extremely wrong commands to your body. It made every cell of your body vibrate at a high frequency to the point of burning your life. In the end, it detonated your spiritual energy and burned you alive.

“In your opinion, is this the style of the Blood Union?”

Shen Yulin was drenched in cold sweat.

He knew very well that Meng Chao was not exaggerating

This was the style of the Blood Union.

He had seen with his own eyes how the blood union would “Solve the problem”.

If Meng Chao had not inserted his hand between his chest and abdomen to control the chip in time, he would have been dead.

The current him had already turned into a charred corpse and a pile of ashes!

Shen Yuling’s mouth was parched. He wanted to cry, but no tears came out.

“Save... Save Me!”

He begged bitterly, “This... senior, please save me!”

“Right now, the only person who can save you is yourself.”

Meng Chao said coldly, “Even if I send you to the hospital immediately, stuff you into the medical cabin, sleep for ten days and ten nights, and install the most advanced artificial limbs, what use will it be?”

“If you can’t completely dismantle the blood union, at the very least, you can force your accomplices out of the dark corners and turn them into street rats. Everyone will be shouting at you and running for their lives. They won’t be able to care about you anymore.

“Can I still be your nanny and never leave your side?”

“What you’ve just said is not enough to dismantle the blood union.

“Therefore, this is your last chance. Think carefully about whether or not you have missed any important clues.”

Shen Yulin’s face was as ugly as a corpse that had just been dug out of the ground and had been soaked in the flood for three days and three nights.

However, his eyes gradually focused on Meng Chao.

He was like a gambler who had lost all his money and put all his hope on the last dice.

“I, I know a few names!”

Shen Yuling’s eyes were red. He panted and gnashed his teeth. “The names of a few members of the Blood Union!”

Chapter 1467 The Devil Is Ten-Foot Tall

“Oh?”

Meng Chao stared at him. “You just said that you didn’t know.”

“I-I haven’t seen their true faces, but I can roughly guess their identities.”

Shen Yulin explained, “I have a list of my suspects. The accuracy may not be 100%, but there must be someone from the Blood Alliance. There must be!”

“Guess?”

Meng Chao asked, “How?”

“Ever since I was coerced by the Blood Alliance and branded with the Cross Eye Mark on my neck, I’ve always been angry and worried. These two emotions clashed back and forth. The feeling of being treated like a puppet and a fish, being manipulated by others, is really uncomfortable.”

Shen Yulin said, “I’m thinking that even if I do join the Blood Alliance, I can’t be the lowest level chess piece. If I end up in that position, I might be consumed at any moment.

“I have to grasp some chips that will allow me to climb higher and higher.

“At the very least, I have to know the identity of the guy who dragged me into this mess in the beginning and contacted me directly. If necessary, I have to have the ability to perish together with the other party. Only then can I make the other party hold back and not dare to act rashly.

“Although the other party acted carefully and did not leak a single drop of water, I still identified the person I suspected.

“After all, the fact that he was able to place the letters and gifts on my desk and on my bedside table without anyone noticing means that he must be someone from the universal group. He might even be a member of the Shen family, someone close to me. “Perhaps, this guy even came into my office in broad daylight and discussed official business with me in a serious manner. However, he was secretly giving me orders as the leader of the Blood Union.

“Of course, there are no more than a hundred people from the Shen family by my side. There are eighty of them. This list is still too long. I have to constantly narrow down the scope of my suspicions.

“Although I don’t have any real evidence, I had a sudden inspiration. Based on my own personal experience, I deduced that if the other party was like me and was coerced into joining the organization by the Blood Union, then the other party must have also accepted the modulation of the Blood Union and received a lot of opportunities and benefits.

“Therefore, I secretly collected the information of all the members of the Shen family around me and investigated their experiences. I wanted to see how many of them had improved by leaps and bounds. They were also very pleased with themselves in the workplace and had inexplicably received a lot of opportunities. They had been promoted and received raises, and they had stepped into important positions.

“After a round of investigation, I really found a few members of the Shen family. They were like me and did not have strong backers. In the past, they were not valued much within the family, and their cultivation talent could only be said to be above average. For a long period of time, their realms had stagnated.

“However, at a certain point in time, they seemed to have been injected with a heart-strengthening drug. They suddenly broke out and advanced rapidly. They were unstoppable, and they became the pillars of the group and the family.

“I saw my own shadow in these guys.

“Some of them had very solid reasons for their advancement. For example, they were favored by the godly state experts. Or, they killed high-level monsters in front of everyone and received generous rewards. Or, they were lucky enough to discover an astonishing amount of crystal lodes and obtain an astronomical amount of cultivation resources. I first excluded these guys who could clearly explain their source of strength.

“Then, I sorted the people on the list who came from unknown sources according to the distance between them and me. Naturally, it was not difficult to find the most likely suspects.

“Later, I expanded the scope of my investigation. I shifted my focus from the Shen family to the Lu family, from the universal group to the Atlas Group.

“Peers are enemies. The Universal Group and the Atlas Group have been competing intensely for twenty to thirty years. Many times, if we want to do our project well, we need the support of our own people and the cooperation of our competitors.

“I have noticed that the few members of the Shen family that I suspect are on their way to higher positions. Their direct competitors, very few members of the Lu family, are suspected to have gone easy on them. “Similarly, I have noticed that the few members of the Shen family will occasionally go their own way and make low-level mistakes that others can not understand. In the end, they let one of the members of the Lu family take advantage of them.

“It is impossible to explain such things with the usual techniques of business competition.

“However, if the members of the Shen family and the Lu family are all members of the blood union, it would make sense if they conspired with each other to steal the members of their respective groups and families!

“This is why I told you that ‘even the big shots of the Lu family have joined our organization’ in the beginning. I didn’t lie to You

“I believe you.”

Meng Chao raised his voice. “Tell me their names.”

Shen Yuling hesitated for a moment.

He had no other choice.

He was still conflicted about whether he could use this list to negotiate with Meng Chao.

“There’s no time.”

Meng Chao said sternly, “The people from the blood union might find this place any minute. Tell me quickly!”

“Alright, I –“

Shen Yuling finally made up his mind.

But just as he was about to speak, his head suddenly twitched nervously. Then, it twitched again.

Accompanied by the strange twitching, his neural network seemed to be completely paralyzed. He could no longer control his facial muscles, causing his facial features to collapse. It was as if he had completely changed his face.

Meng Chao, on the other hand, looked over Shen Yulin's shoulder in the direction of Red Creek Creek Creek, which was deep in the dark night behind him.

Meng Chao keenly sensed that an enormous and dangerous spiritual energy was brewing, fermenting, reacting, and erupting inside the crystal mine in the middle of Red Creek Creek Creek Creek!

This is –“

Meng Chao's pupils suddenly constricted into two needle tips.

He dragged Shen Yulin to the ground.

The ground was shaking and the air was burning. Bubbles of varying sizes were popping up in the mud as if it were boiling. Thousands of snakes, insects, rats, and ants crawled out from the depths of the mud, they were fleeing desperately in the direction of the Red Creek Creek Creek Creek, forming a black tide that was panicking. A deafening explosion was heard. It was as if a train cannon had been blown up into the sky by a crystal cannonball that had gone out of control. Meng Chao and Shen Yulin, who were lying on the ground more than ten kilometers away, both shook a little. They felt that a great storm was surging from the depths of the Earth.

Meng Chao turned his head and saw a burning cloud of fire rising slowly from the red creek ditch like a ferocious demon, killing the layers of dark clouds until blood flowed like a river.

Meng Chao felt that something wet was flowing out of his ears and eyes.

He wiped his red hands with his fingers.

In his realm, no matter how powerful a conventional explosion was, it was unlikely that it could tear his eardrums apart with sound waves from more than twenty kilometers away.

Unless, it was the spiritual energy that was compressed to the extreme and suddenly released, the sharp whistle that could tear everything apart.

In a non-military facility like the crystal mine, there was only one possibility for such a strong explosion. "It's the Crystal Warehouse. You actually destroyed the warehouse that stored the raw crystal ore!" Meng Chao was so furious that he grabbed Shen Yulin's collar. "Is this what you meant by 'never harming the interests of Dragon City'?"

"This, this is impossible!"

Shen Yulin was also completely shocked by this shocking scene. He said with his mouth agape, "This is different from what we agreed. We agreed to set a fire in the crystal warehouse and burn the warehouse instead of blowing up the entire warehouse. This..."

His voice gradually became unclear.

His expression also became more and more out of control.

Under the stimulation of some mysterious force, the two eyeballs expanded at a speed visible to the naked eye. In an instant, they burst out of the eye sockets and rotated 90 degrees to the left and right respectively.

It was as if there was a lump of minced meat stuck in his throat, and he kept making gurgling, gurgling, gurgling sounds. Meng Chao cut open the space between his chest and abdomen with knife-like precision. It could be considered a perfect wound, and it was simply and brutally torn apart by this mysterious force, his organs were exposed, wriggling, trembling, and twitching.

It was as if Shen Yulin's heart, liver, spleen, lungs, and kidneys had been injected with an evil will, trying to escape from his master's body. His heart, in particular, had expanded to the size of a football in just a few seconds. His heart and blood vessels were like the tentacles of an octopus, waving wildly in his body.

This was an acute qi deviation.

It was the precursor to spontaneous combustion, no, self-destruction.

Shen Yulin obviously could not commit suicide.

However, Meng Chao had already removed the control chip in his body.

He followed the direction of Shen Yulin's head, twitching and spinning. Meng Chao's gaze continued to extend towards the clouds.

He activated his extraordinary vision to the limit until his eyes were stinging and his retina was about to be filled with densely packed blood spots.

Finally, he managed to distinguish a spooky black dot between the dark clouds and the night sky.

It was a drone.

In order to avoid being detected by units on the ground, the drone flew very high.

It should not have been able to detect Meng Chao and Shen Yulin who were hiding in the mud.

However, the drone did not even need to accurately lock onto their coordinates.

It could release an extremely special infrasonic wave from the clouds to a large area on the ground.

This infrasonic wave was very similar to the background noise of nature, so it was easy to ignore it.

When it entered Shen Yulin's ears, it activated the fatal command that had long been implanted between his cerebral cortex and the central nerve.

A godly state expert could be called a walking nuclear weapon.

Although Shen Yulin had not broken through to the godly state, he was still a peak heaven state expert. At least, he had reached the level of a heavy earth-drilling bomb.

The power of a heavy earth-drilling bomb could easily destroy a target the size of a football field.

The chain reaction had already begun.

Shen Yulin's cells trembled to the extreme and exploded one after another.

Every cell explosion would shoot out a surge of spiritual energy from between the mitochondria and the cell nucleus.

When thousands of streams of spiritual energy gathered together, the quantitative change would trigger the qualitative change, and the microscopic change would reach the macroscopic level. A big explosion that shocked all the extraordinary individuals at the cost of their lives would happen.

Even if the 'War God' Lei Zongchao came personally, it would be impossible for him to stop Shen Yulin's self-explosion.

It was even possible that he would be affected and contaminated by Shen Yulin and fall into the danger of mental derangement!

Chapter 1468 New Clue

At the critical moment, Meng Chao only had time to activate his spirit shield.

At the same time, he summoned a large number of spirit magnets from his body and condensed them into a silver totem shield in front of him.

Boom!

Before his totem shield was fully formed, Shen Yulin had already turned into a blood-red fireball.

It was unclear whether it was a blood ball or a fireball, but it expanded a hundred times in an instant and swallowed the space within a radius of dozens of meters with a crushing force.

Even with Meng Chao's Deity Realm abilities, he felt a destructive storm of lightning and thunder crashing onto his double shield.

It made his skin feel the pain of being licked by the raging flames, and even his blood was boiling.

His vitality magnetic field was also stirred up by Shen Yulin's interference.

Not only were illusions appearing in his mind, but even within his veins, his peaceful spirit energy was stirring like a hydra that had just awoken from hibernation.

Meng Chao hurriedly focused to calm his restless cells.

After a while, Shen Yulin self-detonated shock wave, only gradually weakened and annihilated.

Meng Chao slowly opened his eyes and let out a long sigh of relief. Shen Yulin had literally disappeared from the world.

In the place where he was lying on the ground, there was a huge pit that was three to four meters deep. It was steaming hot and was still emitting green smoke. The mud had been soaked in the rain for a whole night. It had good mobility and was slowly flowing into the pit. It would not take long for the pit to be completely filled up.

Other than a few drops of blood that were stained on the surface of the Totem Battle Shield, Shen Yulin did not even have half a tooth or half a hair. There was not even the slightest clue that could be traced back to the Blood Union.

Meng Chao raised his head and narrowed his eyes, trying to search for the drone that had issued the "Self-destruct order".

The drone seemed to have realized that the enemy on the ground was likely to have a strong air-resistance ability. The moment it scanned Shen Yulin's self-destruct, it pulled up its altitude and disappeared.

The caution of the Blood Union had exceeded Meng Chao's expectations.

From the looks of it, even if Shen Yulin said a few names, it would not mean much.

Without real evidence, just the accusation of a dead person wouldn't be able to bring down these powerful people in the Universal Group and Atlas Group.

Instead, it would alert them and make them wary.

They would even make the Blood Union give up on Shen Yulin, just like they gave up on these suspicious big shots. Now, it seemed that Shen Yulin was right about one thing

The blood union was indeed a hundred-legged insect. They did not die, and they had more than one head.

With Meng Chao's identity and strength, it was not difficult for him to cut off three to five heads and seven to eight claws of the blood union in the simplest and most violent way.

However, what Meng Chao wanted to do more was to cut off their throat with a sword and pierce through the only heart of the Blood Union. He wanted to nail this evil organization that treated human lives like dirt to the pillar of shame in history.

Then, he needed more clues and evidence.. At this moment, Meng Chao heard a very strange sound, "Zhi Zhi Zhi Zhi Zhi".

He was slightly startled and lowered his head to look at his totem battle shield.

He saw that the few blood beads that were stained on the battle shield that originated from Shen Yulin's body were like water droplets that had accidentally dripped into a pot of oil. They jumped around and quickly evaporated. Before the last drop of blood was completely evaporated, Meng Chao used a ball of gentle spiritual energy to wrap it in time. "Strange, Shen Yulin's blood seems to have some strange and intense reaction with my totem battle shield. "Why is this?"

"In such a hurry, I didn't have the time to activate any totem power on this shield. It's just a pure liquid metal-like substance. It shouldn't have such an intense reaction with human blood!"

Meng Chao Stared at Shen Yulin's blood drop and fell into deep thought.

He was quickly thinking about how his totem battle shield was different from ordinary metal.

After thinking about it, he only thought of one thing

His totem battle armor had been injected into a unit by the last researcher of the Tulan civilization. It was a “Strong brain neuron suppressant drug” that was specifically targeted at the “Mother”, which was also known as the “Hope Drug”.

The killing statue and the mandala tree roots that were controlled by the mother had a similar intense reaction when they touched their totem armor.

They were like wild beasts that were afraid of flames, afraid of the Hope Potion.

Thinking of this, Meng Chao took out a dropper from his pocket.

Inside it was the remnants of the Hope Potion.

The hope potion that the last researcher of the Tulan civilization had given to Meng Chao had been injected into the body of the mother.

However, there was still a tiny amount of liquid left on the wall and bottom of the syringe.

Meng Chao considered that mother origin, who was hiding in the underground of Tulan ZE, was most likely the same thing as the main brain of the monster that was hiding in the underground of Dragon City. They were all the eggs of chaos recorded in the ancient classics of the temple of Holy Light.

Then, he carefully scraped the remaining liquid and carefully stored it, hoping to send it back to Dragon City. Together with the formula in his brain, he would create more hope potions to drive away Lu Siya and the other people controlled by the main brain of the monster.., the evil energy in his body.

He wrapped the remaining liquid with his spiritual energy.

He moved the remaining liquid to Shen Yulin’s blood drop.

As he expected, the remaining liquid had not come into contact with the blood drop yet. The blood drop was already agitated. It was bouncing on his palm and hissing weakly. “So, Shen Yulin was infected by the egg of chaos like many Tulan Orcs?”

Meng Chao put the remaining liquid into his bag.

Then, he put away Shen Yulin’s blood — the only proof that he had left in this world — carefully.

After pondering for a moment, Meng Chao wrote five names on the wet mud with his fingers.

Shen Yulin, Blood Union, egg of chaos, monster brain, Lu Siya. He drew the equal sign between the first four names.

However, he hesitated when he tried to draw a fourth equal sign between ‘Monster Mastermind’ and ‘LÜ Siya’.

He had seen with his own eyes that LÜ Siya had been corrupted and controlled by the monster mastermind.

However, judging from Shen Yulin's words, not only did he not think that Lü Siya was a member of the Blood Union, he even believed that Lü Siya was on the opposite side of the nine corporations and the majority of the ordinary citizens.

What was Lu Siya up to, this evil forest banshee?

Meng Chao became more and more curious about what had become of Lu Siya.

And when she saw the brand-new him ruthlessly suppressing her, how interesting would her expression become? Meng Chao gently wiped the five names on the mud.

He waited quietly near the place where Shen Yulin self-detonated.

The blood union members never showed up.

It seemed that these guys had predicted that an expert they couldn't figure out for the time being might hide near the place where Shen Yulin self-detonated and ambush them.

They wouldn't show up.

When Meng Chao returned to Red Creek Ditch, the aftermath of the explosion of the crystal warehouse hadn't subsided yet.

Even though the drizzle was still pitter-patter, it could not extinguish the heat flow in the entire valley, which was like a steamer.

Countless people were shouting loudly. Countless people were gritting their teeth and digging. Countless people were rushing over from all directions, working together to resist the aftermath of the explosion.

Fortunately, because of the raging flood, most of the workers and guards in the Crystal Mine were gathered on the temporary dam.

There were not many people in the crystal warehouse.

Moreover, the crystal warehouse had been emptied by Shen Yulin a long time ago. The raw crystal ore stored in it was less than one-third of what was on the books.

The shocking explosion of the crystal just now was mostly a magnificent sound, light, and electricity effect. It was like a giant firework.

The real destructive power was not as big as Meng Chao had expected.

Except for blowing up the crystal warehouse, it did not affect more facilities and innocent people in the crystal mine.

However, Meng Chao believed that Shen Yulin had kept a large number of crystals privately and caused a deficit on the account, which was certainly accounted for in the big explosion.

Therefore, a shocking loss was obtained.

And the main culprit of the disaster was naturally the "Heinous orcs".

Shen Yulin was right.

Dragon City needed war.

To be more precise, many experts in Dragon City needed war.

After all, without war, what reason did experts have to exist?

Meng Chao hid in the darkness and circled around the debris of the burning crystal warehouse.

The other party was a professional and didn't leave him any clues. No, to be more precise, the other party left too many clues and even witnesses.

But all the clues, such as the hair and claws that had fallen unintentionally, the footprints that were completely different from human footprints, and the witness testimony, all pointed to the orcs.

On a stormy night, a group of hideous-looking, baring-fangs, and half-human, half-beast fellows emerged silently from the depths of the darkness.

It was indeed in line with everyone's imagination.

Meng Chao heard that many people were talking about the "Evidence" they had discovered.

Some people were even filled with righteous indignation and couldn't wait to mobilize the steel torrent of dragon city to crush the Tiger Nu River Valley.

Thinking about it, in the future that "Hu Lang" kanus dreamed of, the war between Dragon City and Tulanze, where both sides suffered heavy losses, was also started for a similar reason, right?

However, amidst the numerous discussions and shouts, Meng Chao also heard a particularly sharp and piercing female voice that was particularly confident. "Let go of me. You Don't have the right to treat me like this. I'm a reporter, a reporter for 'Light of Dragon City', and also a good friend of President Shen. It wasn't easy for President Shen to invite me to do an exclusive interview with him. How can you treat me like this!"

Meng Chao looked in the direction of the voice.

He saw two big and burly mine guards with ashen faces. They were like a big bear catching a small hen. They grabbed a petite and petite woman who was struggling but was full of energy. She was kicking and biting desperately.

Chapter 1469 Ms. Ai

This woman was wearing a professional suit that not only accentuated her figure but also made her look capable.

Her makeup had also been exquisite.

Compared with the dusty, noisy, and polluted crystal mine, her appearance made her seem more suited to appear in a clean and bright office building

However, at that moment, her expensive professional suit had been torn into pieces by the shock wave.

Even her exposed skin was covered with blood marks from the scraping of gravel.

Her exquisite makeup had long been burned to ashes.

After being washed by the storm, she had become a ragged cat with Tongchui Hualian[1]'s face.

Even her shiny long hair had been burned to the point that it curled up like an upside-down chicken coop.

Following her intense struggle, the "chicken coop" swayed on her head, making her look more like a hysterical crazy woman.

However, Meng Chao narrowed his eyes.

He could tell that this woman was not as simple as she appeared.

She seemed to be powerless. She was tightly bound by two strong men. No matter how hard she struggled, she could not escape from their grasp.

However, Meng Chao could tell from the distinct muscle lines on her arms and legs, as well as her habitual movements when she exerted her strength that she had concealed a part — a large part of her strength.

The woman was pretending to be a pig to eat a tiger.

If she went all out, the two muscular men who looked strong but were not as strong as her were no match for her at all.

Interesting

The burns on the woman's face and the abrasions on her body were enough to prove that she had been near the crystal warehouse when the explosion occurred, Meng Chao thought.

No matter what happened in the Crystal Warehouse, she is likely to be the first witness

At that moment, a round fat man appeared in Meng Chao's sight.

The Fat Man's face was full of smiling lines. He was usually a very cheerful person, or at least, he pretended to be.

However, at that moment, his entire face was covered in dark clouds. Every smiling line was twisted into lightning. His small eyes looked like they were about to spurt out magma.

When the woman saw the Fat Man, she was like a drowning man who had found a life-saving straw, she hurriedly shouted, "Director Wang, you are here to testify for me. It was your universal group that invited me to do an exclusive interview for President Shen. Is this how you treat your guests?"

"Miss Ai, it is indeed our universal group that invited you to Hong Xi Valley as a guest."

The Fat Man suppressed his anger. "However, your interview ended half a day ago. Right now, you should be sitting on an armored airship back to Dragon City.

“Please give us a reasonable explanation. Why did you sneak out of our Crystal Warehouse when you were supposed to be back in Dragon City?”

“Because of the torrential rain!”

The female reporter named ‘miss ai’ blurted out, “The torrential rain has blocked the route. Nobody can go back. You should know that!”

“Yes, we do.”

“However,” fatty said, “On the mining area, a temporary refuge camp on the highland has been prepared for all the stranded passengers. Red Creek Creek Creek Creek is a low-lying place. It is not a good place to hide from the torrential rain and floods.

“Tell me. Why did you sneak back and sneak into the Crystal Mine?”

“I –“

Miss Ai’s face was flushed. “I just wanted to interview a few of the staff at the bottom level of the universal group and make the exclusive interview more flesh-and-blood!”

“I remember that half a day ago, I told you that there would be no more exclusive interviews. President Shen has already refused your interview, and he has even refused to allow you to leak the completed interview in any form. Otherwise, you will be responsible for the loss of the universal group caused by the false information, both financially and legally!”

“That’s right!” Fatty snapped. “I didn’t expect that you wouldn’t give up and take the risk to sneak into our crystal mine.

“Not long after you snuck in, a world-shaking explosion took place in the Crystal Warehouse.

“I really doubt that you did anything to our Crystal Warehouse.”

Miss Ai’s eyes were wide open.

She seemed to have suffered great humiliation and injustice.

“How could I have done anything to the Crystal Warehouse? Do you suspect that I caused the explosion? Are you kidding me? How could I have the ability to detonate so many raw crystals in one go?” “Director Wang!” Miss Ai shouted. “You don’t have the right to make such ridiculous accusations against me until the matter is investigated!

“Where is director Shen? Where is director Shen? Ask him to come out and see me!

“I have a lot of questions to ask him about the inexplicable explosion of the Crystal Warehouse. As the first person in charge of the Red Creek Creek Creek Creek project, he has the responsibility to tell all the citizens of Dragon City the truth!”

Fatty’s face changed.

“Don’t worry. The matter will be investigated. When the time comes, the universal group will naturally give all the citizens of Dragon City, including Miss AI, a satisfactory explanation. As for now, please calm down, Miss AI. Don’t cause any more trouble for president Shen and US, right?”

Fatty gestured to his left and right. “It’s too chaotic here. Please go down and rest for a while, Miss AI.”

The two brawny men nodded and lifted Miss AI up.

“What are you doing? What are you doing? Let Go of me! Let Go of me, you bastards!”

Miss AI’s feet seemed to be stepping on an invisible bicycle as she stomped around in midair, “You are illegally confining me. What right do you have to deprive me of my personal freedom? “You are just a company. You are not the investigation bureau, the Tribunal, the transcendental tower, the Red Dragon Army, or the survival committee. You have no right to do so!

“I will sue you. I swear that when I return to Dragon City, I Will Sue Your Universal Corporation. I will sue you until you are bankrupt!”

As she struggled violently, her tattered sleeves were unintentionally torn off by the Brawny man on her right.

Miss AI revealed her pale arm. There was a scar that looked like a tear but had radioactive markings around it.

“This is...”

Meng Chao’s heart skipped a beat.

He recognized that it was an extremely tricky nightmare beast. The ‘intentionless spider’ had gnawed and injected poison into it, leaving behind a special scar.

The intentionless spider itself was not considered a very powerful monster.

Even among insect-type monsters, its combat ability was not worth mentioning.

However, it could secrete an extremely insidious poison that could destroy the spiritual veins of low-level extraordinaires, leaving an incurable sequela for them.

And this poison also had a very strange anesthetic effect.

During the twelve hours when the poison gradually took effect, the victim would not even realize that he had been poisoned. He would still cultivate and fight as usual, which would speed up the circulation of his blood and the circulation of his spiritual energy, as a result, the poison would invade the depths of his cells, making it difficult for even the golden immortals to get rid of it.

According to Meng Chao’s incomplete statistics before he left Dragon City, there was over a 70% chance that the extraordinaire who was bitten by the intentionless spider would be severely injured and disabled, their cultivation would plummet, and they would become a remnant star extraordinaire, the possibility of breaking through the one-star boundary is lost forever.

reï

The reason why Meng Chao is so familiar with this scar.

It's because there are so many members in the remnant star society... who regret their lives because of the inanimate spider.

In fact, the name "Intentionless spider" implied that once they were hit, they would be "Incurable and hopeless."

On the other hand, the range of activities of the intentionless spider was very small.

It only lived in the depths of the monster mountain range, in a place called "Corpse Insect Valley."

Inside the corpse insect valley, miasma filled the air, poisonous fountains spewed out, and strange insects ran rampant.

It was a notoriously dangerous and treacherous place.

Only the extraordinary ones who were the least afraid of death and the ones who did not believe in evil dared to venture deep into the Corpse Bug Valley. They tried to use the poisonous fountains and insect juice in the valley to stimulate cell division, induce genetic mutation, and allow their cultivation to soar, they would climb to the peak that they would never be able to reach by relying on the nourishment of conventional genetic drugs!

From this point of view, all the people who had such 'Teardrop Scars' on their bodies were hopeless gamblers.

were

They could only accept their loss.

"So, this seemingly harmless female reporter used to be a ruthless and audacious monster hunter. She had no choice but to leave the jungle and become a reporter because she was bitten by the intentionless spider in the corpse insect valley? "If that's the case, these seemingly strong men are no match for her." Meng Chao thought of the remnant star society's remnant star transcendents who had also been attacked by the intentionless spider and their cultivation had plummeted.

Although their spiritual meridians had been corroded by the poison, their combat strength had plummeted to a fraction of what it had been in the past.

However, the intentionless spider's poison would not damage the cerebral cortex and central nervous system. They still had their experience, and their sense of smell was as keen as before. In order to make up for their lack of combat strength, they often taught themselves all sorts of unorthodox methods, when they were ruthless, they were even more difficult to deal with than many academic sects who had trained to two-star and three-star in greenhouses. "What is Miss Ai trying to do?" Meng Chao asked

"She is not Shen Yulin's friend," Meng Chao mumbled. "But Shen Yulin did accept her interview, too. However, the two parties did not seem to be on good terms.

"When the explosion happened, she was hiding near the crystal warehouse. What did she see?"

Chapter 1470 There Is No Turning Back

Supervisor Wang first sent Ms. Ai to the medical room for a comprehensive examination.

After confirming that she had only suffered superficial injuries and a mild concussion caused by the shock wave, he heaved a sigh of relief.

After all, she was a reporter from The Dragon City Light. If anything happened to her during such a sensitive period, no one would be able to bear the pressure of public opinion. While receiving bandages, Ms. Ai scanned her surroundings with her two rolling eyes.

When she was looking at the chaotic scene, many rescuers were running around like headless chickens. Some people even had different opinions. When they had an argument, she suddenly asked, "What's going on? Is Director Shen not here?"

Supervisor Wang was shocked, and his eyebrows perked up.

"You look like a group of dragons without a leader."

Ms. Ai stared at him. "My intuition tells me that Director Shen doesn't seem to be in the crystal mine."

The fat on Supervisor Wang's face trembled slightly. He emphasized his tone and said, "Ms. Ai Lei, this has nothing to do with you. You should worry more about yourself. You are in big trouble!"

Supervisor Wang waved his hand. The two muscular men took the female reporter named Allie away and locked her in a container in the other corner of the crystal mine away from the explosion. She could neither see nor hear anything.

Naturally, most of the people were gathered near the explosion.

Except for the two muscular men who were guarding the container, there were not many guards here.

The scanning range and frequency of the searchlights and drones were also quite limited. There were often blind spots that were forgotten.

After supervisor Wang left, the sound of knocking could be heard from the container.

The two burly men guarding the container did not pay attention to it at first.

Ai Lei, on the other hand, was very patient. She knocked on the container until the two burly men were annoyed. "What are you doing?"

One of the Brawny men asked in a gruff voice.

"I need to go to the bathroom."

Ai Lei said gloomily from inside, "I can't hold it anymore!"

The two brawny men looked at each other.

"Supervisor Wang didn't say that I can't go to the bathroom, right?"

Ai lei continued, "Even if you're escorting a prisoner, the prisoner has the right to go to the bathroom!"

The two strong men hesitated.

“I’m begging you.”

Ai Lei’s voice carried a sobbing tone as she pleaded like a little girl, “Big Brothers, Big Brothers, I know that you’re all following orders, but I’m just a part-time worker. It was my boss who asked me to come to Red Creek Creek Ditch to dig up more news material. I, I know that I’ve caused trouble for you, but I really just want to go to the toilet!”

The two brawny men lowered their heads and discussed for a while.

One of the Brawny men walked three steps away. His right hand firmly held the defibrillator at his waist, while his left hand held the walkie-talkie.

The other brawny man pulled open the latch on the container’s door and let ai lei out.

“Thank you, thank you, two Big Brothers.”

Ai lei seemed to have been shut in the dark container. Her eyes were red, and her face still had a panicked expression. The naivety of “I have rights, I have freedom” just now had completely disappeared.

She bowed respectfully to the two burly men and scanned her surroundings with the corner of her eyes.

Everything that happened next happened in three seconds.

Ai Lei jumped up like a bobcat that had revealed its true form. Her arms, which seemed slender but were like steel bars, wrapped around the neck of the burly man beside her. She pulled him hard and pushed her knee heavily against the burly man’s lower abdomen, with just one push, the brawny man’s entire body trembled. His eyes bulged and he could not even scream.

Following that, Ai lei seemed to be carrying a huge battle shield as she carried the brawny man with a strong back and a strong waist. She rushed towards another brawny man who was holding a defibrillator.

The second brawny man did not expect that the seemingly harmless female reporter would actually be able to erupt with such fierce fighting strength.

He was somewhat flustered as he pulled out the electric defibrillator and walkie-talkie. For a moment, he did not know which to use first.

At this time, Ai Lei had already thrown the first burly man at him.

He randomly stabbed the electric defibrillator forward, causing his companion to Grimace and foam at the mouth.

Ai Lei took the opportunity to slide over from under the first burly man with a slide shovel. The tip of her foot directly kicked the ankle of the second burly man.

She first shoveled the strong man to the ground, then kicked off the walkie-talkie in his left hand. Finally, she wrapped her strong legs like two pythons around the neck of the second strong man. Soon, the blue veins on the strong man’s neck were exposed, he passed out.

Before the searchlight came, Ai lei dragged the two strong men to a blind spot in the dark.

She tested their breathing again to make sure that they were only unconscious and that their hearts were still beating strongly.

Allie whistled softly.

She gave herself a thumbs up.

“Miss Allie, the sword is not old.”

She praised herself.

Then, Allie quickly stripped off the clothes of the relatively small strong man.

The two men were wearing camouflage battle suits that were tough and durable, and were easy to use in battle.

Of course, they were filled with the stench of sweat and mud from the night of heavy rain.

However, Ai Lei’s eyelashes did not even twitch.

Without hesitation, she tore off her gaudy business suit and threw it far away with a disgusted expression.

She put on her dirty and smelly camouflage combat suit. Her overly wide sleeves and trousers were tied tightly with strips of cloth, making her look clean and neat, just like a strong female hunter.

Ai Lei moved her hands and feet, as if she had found herself again. Her eyes sparkled in the darkness.

“I’m Rich.”

The female reporter and female hunter had a greedy look on her face. “I’m really going to be rich this time!”

She continued to search the two burly men.

She found work permits, powerful flashlights, multi-purpose folding military knives, and other items.

After putting all these things away, Ai lei patted the faces of the two sleeping burly men lightly. Before the next searchlight beam swept over, she silently dashed out like a ghost.

For the time being, no one had noticed her presence.

However, the Red Creek Creek project was located in a narrow and long valley, which meant that there were only one end and one end of the valley, and two very narrow passageways.

It was a sleepless night.

Both ends of the valley were crowded with people.

The two entrances and exits were illuminated by searchlights and flares as if it were daytime.

Ai Lei knew that her camouflage combat suit didn’t fit her well.

No matter how hard she tried to lower the brim of her hat and cover her face with mud, it was still full of flaws.

After careful observation, it was still full of flaws.

Supervisor Wang could contact the two strong men with the walkie-talkie at any time.

If he didn't get a response after a long time, he would definitely realize that something was wrong.

He had to escape as soon as possible.

Ai lei looked around and locked onto a small maintenance workshop not far away that was empty.

Inside the crystal mine, all kinds of rune machines were operating at extremely high intensities. A malfunction was a high probability event.

Most of the simple mechanical failures could be fixed on the spot to ensure that they were running round the clock.

Ai lei found a heavy truck outside the small maintenance workshop.

The crystal engine was intact, and the runes engraved on it were still fairly clear. There weren't too many signs of wear and tear.

It was just that there were some problems with the shock absorbers and suspension. They were only halfway through maintenance, so they probably couldn't increase their speed.

Time was tight, so ai lei didn't have much choice.

There was another advantage to choosing a truck.

The chassis of a truck was higher, and the tires alone were half the height of a person. If she sat in the driver's seat, it would be difficult for others to see her face clearly.

Before the maintenance staff left, they pulled out the keys of the truck.

This was not difficult for Ai lei. She pulled out a screwdriver from the multifunctional folding saber.

Soon, the front of the truck produced a sonorous roar.

Yellow smoke was also rising from the exhaust pipe. The smell of inferior crystals that were not fully responsive and the unique smell of garlic was coming from it. At this moment, Red Creek Creek Creek was already full of hostility and killing intent.

With the flashing red alarms, many guards and miners had been allocated powerful weapons of destruction and were patrolling everywhere, searching for the 'orcs who destroyed the mines'.

However, their eyes, which were full of fury and vigilance, rarely fell on Ai Lei's truck. After all, it was impossible for the orcs to drive a human vehicle.

Ai Lei's truck had an open hopper instead of a fully enclosed design, so it couldn't hide anyone.

As for the empty truck leaving the Crystal Mine, it wasn't surprising. The entire mining area was in a state of chaos, and there was a need for heavy trucks and various disaster relief supplies everywhere. It was normal to temporarily dispatch a few empty trucks to the units of their brothers or to the shore of the branch of the Tiger's Fury River.

This was because there were too many vehicles coming and going from Hongxi Valley.

The few sentry posts stationed at the entrance and exit of the valley simply turned on the green light and allowed all small vehicles and large vehicles with open compartments to pass.

Only when they encountered closed compartments would they make a slight inspection.

Seeing this scene, Ai lei let out a sigh of relief.

The only problem was that the entrance to the valley was too narrow. The second phase of the widening project had not been completed, and the road was half blocked by the landslide caused by the heavy rain. The speed of the traffic was rather slow.

Regardless of whether it was a large car or a small car, it was like a snail crawling.

“Hurry up, hurry up, Hurry Up!”

Ai Lei’s fingers were on the steering wheel, acting neurotically bit by bit.

She stared at the walkie-talkie on the right-hand seat.

She was afraid that supervisor Wang would find out that she had escaped.

What she was afraid of came true.

Just as there were only two cars left in front of Ai lei.

The walkie-talkie screamed like a death wish.

Ai Lei’s whole body jerked as if the seat was leaking electricity.

She couldn’t imitate the gruff voices of the two burly men.

She could only bite the bullet and ignore them.

Another car was waved through.

There was only one obstacle left in front of Ai lei.

The walkie-talkie screamed for half a minute before it suddenly quieted down.

But ai lei noticed that the guards at the sentry post in front suddenly became more vigilant.

One guard tried to pull down the brake.

The other guard jumped onto a heavy truck in front and stuck his head into the driver’s seat to check.

Ai Lei cursed in her heart.

There was no turning back. She stepped on the accelerator and pushed the crystal engine to its limit. Then, she turned to the right and almost jumped onto the steering wheel.

The truck was like a giant steel beast that had just woken up. It let out a deafening roar and scraped against the vehicle in front of it, creating a large number of sparks as it rushed out.
