

Oh My God 871

Chapter 871: A Lifetime of Collaboration

“I absolutely understand.”

Meng Chao said, “And I completely support you.”

“I knew you would understand and support me. That makes things easier!”

Lu Siya happily said, “You see, in my situation, it’s too difficult for me to find a suitable marriage partner. I have my own requirements too!

“My ideal marriage partner should have a simple family background. He shouldn’t be like those from the nine great families, who have complicated interests behind their backs. They would ask me to waste a lot of my time and energy on meaningless court battles.

“Nevertheless, I hope that my marriage partner can have a certain capability at the same time and play the role of a ‘good wife’ to help me instead of dragging me down.

“Based on this foundation, both parties will be smart people who can communicate calmly and not seek common interests.. At the very least, they can speak freely. That would be even better.

“Finally, and most importantly, my marriage partner must have a strong combat ability. This is because a strong combat ability represents outstanding genes. Only genes that are outstanding enough are qualified to combine with my genes and give birth to a new generation that is even stronger to inherit everything I have.

“The problem is that among the third generation of the nine great families, there are no true powerhouses. They are all a bunch of worthless trash. If I get serious, they won’t be able to even last three minutes. Tell me, how can I allow such trash genes to contaminate my excellent genes?”

Meng Chao was silent for a long time. He could only squeeze out one word, “Yeah.”

“It’s really hard to find such a candidate!”

Lu Siya sighed and focused her gaze on Meng Chao’s face again. She smiled and said, “Meng Chao, you said just now that we’re best friends. No matter what I do, you’ll definitely support me, right?”

“No, Sister Ya. My exact words were ‘completely support.’

“There was no ‘no matter what you do’ in front of it,” said Meng Chao.

“Don’t be impatient. Let me finish. Just now, I only mentioned the benefits for me. Now, here are your benefits.”

Lu Siya said, “You should have noticed that since our victory in the Monster War, Dragon City has gradually sailed into a mysterious and unpredictable new waters. There are countless invisible whirlpools and reefs here. If we are not careful, we will all be defeated.

“As for you, while your strength has soared, you have also been pushed to the forefront.

“In the past, your strength was low, and Superstar Resource was only one of countless small and medium-sized enterprises. Many problems could be solved with a smile.

“However, the speed of your improvement and the expansion of Superstar Resource have been too fast. They’re so fast that many people feel threatened.

“At this moment, you need to further integrate all your resources at hand and tie yourself more closely with the stakeholders. Only after you complete your transformation and upgrade from strength to mentality to status can you move forward quickly and steadily toward the future that you hope to see.

“Yes. Right now, we are, of course, best friends. We are comrades who have shared life and death together. We are training partners whose magnetic fields are similar. But based on this relationship alone, do you believe me when I say that I am willing to betray the Lu family, Sky Pillar Corporation, as well as the nine mega corporations, and stand on your side wholeheartedly?”

Meng Chao opened his mouth...

But he was rendered speechless.

“If you don’t believe me, I don’t believe you either.”

Lu Siya said, “By the same logic, everybody knows that we are the best partners. But I went to talk to Long Feijun of the Red Dragon Army about a collaboration based on this relationship alone. Do you think that he would believe me, someone who was born in the nine noble families? You must be kidding me!

“Do you understand now? In order to expand and strengthen our respective businesses, provide each other with enough material foundation to break into the Deity Realm, and trust each other 100% for protection, this deal is our best choice.

“Also, the bloodline inheritance is not a problem for me alone. For a powerhouse like you who is not even 30 years old and already qualified to reach Deity Realm, your genes are a hundred times better than those guys from the nine great families who rely on astronomical amounts of resources to build themselves up. You are destined to establish your own family. Don’t you consider the issue of genetic optimization at all?

“Since we are the best partners, and we are both facing the problem of integrating resources and inheriting bloodlines, as the saying goes, ‘it’s better to be more experienced than to be less experienced.’ Isn’t it great if we continue to work together happily for the rest of our lives?”

Meng Chao took a deep breath and said with mixed feelings, “Sister Ya, is this the conclusion you came to after weighing the pros and cons as well as analyzing the costs and benefits?”

“You’re a smart person. I don’t want to lie to you, and I can’t lie to you either. Why don’t you just be straight with me? It’s fine if you can do it, but it’s fine if you can’t either. Just pretend that I didn’t say anything. If the deal doesn’t work out, it won’t affect our friendship.”

Lu Siya said, “I know that you’re a person who values relationships. You might not like such a deal. If you had a girl who you liked, I would never propose such a deal to humiliate myself. With or without this deal, we’re all friends. There’s no need to push my luck and force you into an enemy.

“However, through my observation, I found that you don’t seem to be interested in women.

“Since you don’t like women, I won’t like men anymore. Aren’t we a match made in Heaven?”

“Wait a minute!”

Meng Chao was shocked. “Who told you that I didn’t like women?”

“It’s meaningless for you to be so stubborn.”

Lu Siya sighed and said, “Meng Chao, don’t forget that I am a ‘sensitive person.’ Do you know what is the most unbearable thing for a naturally sensitive person, especially a sensitive female, in her daily life?”

Meng Chao was at a loss.

He did not know what this subject had to do with clairvoyants.

“Yes, since I was a child, I’ve been ten times more sensitive than an ordinary person. I can smell extremely strong poisonous, stinky, and fishy smells, hear all kinds of deafening noises, feel the rough bedsheets and blankets, and scrape my body with all my might. But all of that can be endured through gritted teeth.”

Lu Siya said, “What I can’t stand the most is my ability to observe people’s micro-expressions. I can hear their breathing and heartbeat. I can sense the faintest changes. I can sense the rhythm of their organs and the secretion of their hormones. Finally, through the integration of their micro-expressions and micro-changes, I can read the voices in their hearts.

“I can... see through people’s hearts at a glance!

“Let me tell you, this isn’t a talent at all, but a terrifying curse.

“Can you imagine how a three-year-old child felt when she saw her smiling uncle and aunt walking toward her with a toy in their hands, yet their hearts were filled with venom. They would be filled with envy, jealousy, and hatred toward me for inheriting my grandfather’s talent as a Spirit Sensor. They would wish for my brain to explode and for me to die on the spot.

“Can you imagine how every time my father put on a kind and loving look and seemed to be playing with me wholeheartedly, but I could tell that his mind was full of schemes, and his thoughts were not focused on me at all?

“It got even worse once I entered puberty and began to develop.

“As you can see, I have developed very well.”

Lu Siya showed Meng Chao her strong thighs and her voluptuous curves.

Meng Chao had to admit that although everyone had their own preferences, Sister Ya’s facial features were very three-dimensional, aggressive, and suitable for heavy makeup. Not everyone liked her.

However, her figure was indeed... well-developed by the standards of Earthlings.

Of course, compared with the ice giants and other alien races that Meng Chao had met in his previous life, she was nothing.

Therefore, Meng Chao was still able to hold back.

“Many girls are harassed by the opposite sex when they enter puberty and begin to develop.”

The corner of Lu Siya’s eyes twitched. She gnashed her teeth and said, “However, the harassment I suffer is ten times more serious than that of any other girl.

“Because, as a ‘sensitive’ person, I can not only see the men’s greedy eyes, hear their dirty breathing, and endure their filthy language, but I can also sense the rising temperature in some parts of their bodies, the accelerated accumulation of their blood, the crazy secretion of their hormones, and all kinds of disgusting physiological changes.

“It would be fine if he were just a vulgar street urchin.

“Unfortunately, even the teachers and seniors whom I have always respected, the heroes who once risked everything to protect Dragon City, would experience subtle changes when they see me, more or less. So, I could see through the filth in the deepest part of their hearts at a glance.

“It’s a terrible feeling. You couldn’t possibly understand it. It made me instinctively disgusted and defensive whenever I saw men. I felt like vomiting when I smell the scent of testosterone. However, my special body made it impossible for me to block out the stench of those pigs. It kept drilling into my nose!

“I used to think that all the men in the world were the most disgusting creatures. Even my father, who raised dozens of women in the name of ‘continuing civilization,’ was the same.

“That was until I met Lin Chuan.

“Do you know why I had a good impression of Lin Chuan? Because he did not have a strong, disgusting reaction toward me, which was very rare!

“It made me feel that his heart was very clean and that he was a trustworthy gentleman.

“Now that I think about it, was that considered liking him? I don’t know.

“But at that time, his side was indeed the only place where I could breathe fresh air in this stinking pig pen. His existence allowed me to have the last bit of confidence in men.

“Who knew that, in the end, I realized that Lin Chuan was not a gentleman who would sit still and do nothing. He had low self-esteem. He was so low that not only did he not dare to like me, he did not even dare to like any girl. Instead, he ran into the depths of the wilderness and got mixed up with a monster.”

“This...”

Meng Chao really wanted to defend Lin Chuan and White Spirit.

However, looking at Lu Siya’s gradually hysterical appearance, he felt that she had not been in the right mood recently.

It was probably a side effect of the mental attack on her brain due to the rapid upgrade.

It was better for him not to trigger her.

Chapter 872: The Proudest Person in Dragon City

Lu Siya cursed for a long time in the rainstorm.

Only then did she calm down a little.

She glanced at Meng Chao, smiled, and said, "Fortunately, I found you again at this time.

"I was surprised to find that you were the second person after Lin Chuan who was not phased by me at all...

"Especially when we were in the narrow training cabin together, and our training clothes, which were as thin as cicada's wings, were soaked by the genetic medicine. At that time, I thought that no matter how calm you were, you would have some... basic reactions to show respect, right?

"However, I carefully sensed the direction and speed of your blood flow, and I found that your blood did not condense downward at all.

"It made me realize that you were really not interested in my body."

"Wait..."

Meng Chao interrupted Lu Siya. "Sister Ya, that's why you were paying attention to the blood all over my body when we were training together. Did it condense downward

"I'm sorry. I didn't mean to. This is the pain of being a 'sensitive'."

Lu Siya sighed and said, "That's why I wear special glasses made of crystals and monster bone powder, which can lower my senses and block redundant information, to slow myself down a little.

"But when I was training with you, I had to stimulate my spirit energy to the maximum. I couldn't wear the glasses all the time, could I?

"Also, in order to adjust my vitality magnetic field to the same frequency as yours, I had to monitor your breathing, heartbeat, and a series of physiological parameters. At that time, you also monitored my physiological parameters. I just accidentally monitored a little bit more

"That's not a little bit."

Meng Chao said, "That's a long time

"At first, I thought that you were just like Lin Chuan, feeling inferior and ashamed of yourself in front of me. After all, you and Lin Chuan come from the same background, and your talent and experience are almost the same. The two of you are also very good friends. I thought that you were just a small-sized Lin Chuan."

Lu Siya continued, "Slowly, I realized that you are far stronger than Lin Chuan, a hundred times stronger. Do you know how much stronger you are than him?"

Meng Chao thought for a moment and asked, "In terms of combat power?"

His current combat power was indeed much stronger than Lin Chuan's in the past.

“For a strong person, combat power is indeed very important, but it is definitely not the most important factor that determines how strong a strong person is.”

Lu Siya stared into Meng Chao’s eyes and slowly said, “Unlike Lin Chuan, who is extremely self-abased, you are very proud. You are the proudest person I have ever met in my life, and even the proudest existence among all the transmigrators on Earth!”

Meng Chao was stunned for a moment. He pointed at his own nose and asked, “Am I... proud?”

“Proud. You don’t even realize it yourself. The real pride is the pride that comes from your subconscious.”

Lu Siya seriously said, “I’m proud. Many people have been deceived by your appearance and style. They think that you are an easy-going person who has no desires and is even very casual. Only a Spirit Sensor like me, who has been with you day and night, can feel the pride that seeps out from the depths of your bones.

“I don’t know how to describe this kind of pride either. It’s as if you feel that you have a unique power or a world-shaking secret that no one knows about. You always exude the aura of ‘I’m the only one who is awake when everyone is drunk.’ Everyone else is a short-sighted fool. Only you are the most intelligent person in the world who can see far ahead. You are even... the ‘savior.’”

Meng Chao scratched his head. “Is it that obvious?”

“Others might not be able to tell, but in my eyes, it is.”

Lu Siya said, “Do you still remember the last jewelry exhibition I brought you to? It was for the nine great cultivation families and was not open to the public. People with other surnames needed an invitation to enter.”

“I remember.”

Meng Chao said, “I was so bored that I wasted three hours of my time.”

“It was one of the most high-end jewelry exhibitions in Dragon City. There were scholars chatting and laughing, but no one came and went. Those attending were all elites of the upper-class society, so naturally, they were talking about contracts worth billions and the future development of Dragon City in the next hundred years. Ordinary people with foreign surnames were not only flattered but also at a loss for what to do. They didn’t even know how to walk, so how could they interrupt?”

Lu Siya said, “I was worried that you wouldn’t be used to such a big scene for the first time, so I paid special attention to you and was ready to help you out at any time.

“However, I found that the way you looked at those rich kids was like you were looking at a bunch of clowns, or even a pile of... dead bones in a tomb!

“It’s true that many poor kids lost their balance when they faced the rich kids. They would put on an overly sharp posture to arm their fragile minds and show their arrogance.

“But I know that you are not like that.

“Not only did you not deliberately show your arrogance, but in order to give me face, you hid your true feelings by pretending to be low-key and slow-witted.

“However, no matter how hard you tried to hide it, you couldn’t hide the ‘caring for mentally retarded children’ look in your eyes when you heard those disciples of wealthy families talking loudly and predicting Dragon City’s future development.”

Meng Chao could only say, “It’s not my fault. Your friends’ predictions of the future are really... imaginative and interesting.”

“They are not my friends. I’m also a very proud person. Not every Tom, Dick, and Harry is qualified to be my friend. I just didn’t expect you to be ten times prouder than me.”

Lu Siya said, “When the dazzling and gorgeous jewels that were carved out of top-grade crystals were presented, even the well-informed disciples of the wealthy families couldn’t help but hold their breaths. However, I saw a trace of impatience in your eyes.

“Your eyes are not only uninterested in these priceless treasures.

“There’s also an inexplicable confidence, as if you’ve seen gems that are a hundred times more dazzling. And as long as you’re willing, they’re all at your fingertips.”

Meng Chao was a bit embarrassed.

He had to admit that Sister Ya’s senses were too sharp.

In the memory fragments of his previous life, he did know some top-grade gems scattered in the depths of the Other World...

Including the coordinates of the so-called ‘ancient divine weapons.’

He was also confident that he would seize all the supreme treasures before the forces of the world found them.

Compared with the supreme treasures that could shake the entire continent of the alien world, the jewelry carved by Dragon City was nothing?

“If it’s just pride, it means that you’re just a whimsical man.”

“However,” Lu Siya continued, “In just three years, you have indeed created a miracle that countless sons of wealthy families could not even create in thirty years.

“This is enough to prove that you have the confidence to be proud.

“This is also the reason why I chose to join hands with you and become the best partner.

“You have the confidence to be proud, but you are not interested in my body at all. That way, you can avoid a lot of trouble.

“You won’t be blinded by the most primitive desires and confuse our business with our ridiculous feelings, making a mess of things.

“Because of this pride, you won’t be shortsighted, blinded by profit, and abandon the agreement when our business has just started.

“So, when Dragon City ended the Monster War and was about to enter a new period of strategic opportunity, and we were forced to the cusp of the storm and had to be more closely tied together to keep warm and face the enemy side by side. The first thing I thought of was you. I think that since everyone is so proud and so rational, we can definitely handle this relationship properly.”

Meng Chao said, “Sister Ya, I . . .”

“You’re not going to tell me that there’s a girl whom you like, are you?”

“No.” Lu Siya said with a half-smile, “At first, I thought so too. I thought that you just didn’t like my type. After all, everyone has their own type.

“I thought that you liked the ‘little miracle doctor,’ type such as Su Mulian.

“Su Mulian is like a budding white lotus, and she’s indeed on the opposite extreme from me. If you like that type of thing, then it’s not surprising that you’re indifferent to me.

“Including the subtle... telepathic interaction between you and Su Mulian, as well as the way she looks at you... the way she’s both afraid and can’t help but approach you, it’s very easy for people to misunderstand the relationship between the two of you.

“Meng Chao, you know that I don’t like to make things difficult for my friends. If you really like Su Mulian, I wouldn’t have suggested such an awkward deal.

“However, according to my observation, even when Su Mulian used up her life force to heal you, the blood in your body didn’t gather downward when you were intimate with her. It was almost the same as when you were facing me

“Wait, Sister Ya!”

Meng Chao could not take it anymore. “Why are you paying attention to my blood all the time? Is it gathering downward?”

“...Everyone has their own curiosity!”

Lu Siya curled her lips and nonchalantly said, “I just wanted to know what kind of girl you’d be attracted to if neither I nor su Mulian can attract a proud person like you.

“I’ve been observing you for a long time, but I’ve found that no girl can attract you. You’re not interested in women at all.”

“No, it’s not like that!”

Meng Chao coughed dryly for a long time before he gritted his teeth and said, “Alright, although this matter concerns a world-shaking secret, I feel that it’s necessary for me to explain it to you since you’ve put it that way.”

“There’s no need to explain. It’s not a big deal.”

Lu Siya looked past Meng Chao's shoulder and over the rolling mountains to see the dark clouds, the thunderous night sky, and the horizon where countless giant beasts were lurking.

She opened her arms and basked in the torrential rain and rolling thunder.

Flames that could not be extinguished even if the torrential rain were ten times stronger were surging in her eyes. "There are so many wonderful, moving, and unbelievable things in this world that we cannot stop until we explore and conquer them.

"The Other World beyond Monster Mountain Range, the endless starry sky above the Other World, and the past and future that run through the endless starry sky, are the most important things that we should invest all our emotions, wisdom, and courage into.

"As for the so-called 'love' between the two carbon-based creatures, because of the instinctive stimulation of passing on genes, the so-called 'love' that produces chemicals in the brain and deceives ourselves is not worth mentioning at all. Meng Chao, do you think so too?"

Chapter 873: Period of Pain

Meng Chao could not bear to look at Lu Siya's overly fierce eyes. He turned his face and said, "Sister Ya, you've raised your ideology to such a high level. Wouldn't it be too rude for me to say that I don't think so?"

"So, you agree to the deal?"

Lu Siya smiled. "That's right. Through the deal, you can use my father and the entire Lu family's power to influence the nine mega corporations and put your idea into practice.

"At the same time, I will be able to gain the support of Broken Star Club, Blue Home, and the Red Dragon Army through you.

"Although there is an irreconcilable structural contradiction between the nine mega corporations and the Red Dragon Army, the nine mega corporations are what they are. I am me. I, Lu Siya, will not be restricted by anything. Neither the Lu family, Sky Pillar, or the nine mega corporations can stop me.

"Therefore, you can rest assured that as long as it suits our interests, I don't mind working with Broken Star Club, Blue Home, the Red Dragon Army, or even Battle God Palace. Of course, I think that it's enough for both of us to know about it. That way, it will be more convenient for me to get key information and resources from the nine overlords.

"Believe me, our collaboration will only grow more pleasant. Perhaps, it won't be long before both of us break through the Deity Realm. In the future, Dragon City will belong to you and me. One day, the combination of our powerful genes will even give birth to Dragon City. No, it will be the strongest and most perfect life form in the entire Other World..."

Lu Siya's smile grew wider and wider.

Then she approached Meng Chao step by step.

The brilliance in her eyes was something that Meng Chao had never seen before.

“Yeah, Sister Ya, calm down. Is there a need for us to be so... anxious and impatient?”

Looking at the brilliance in Lu Siya’s eyes, Meng Chao suddenly felt a chill run down his spine. He stammered. “I-I feel like something’s wrong with your condition. Have you been training too much recently? Are you too tired because your spirit energy is attacking your brain?”

“You should take a break. Really, I think that we should finish our special training early and go back to Dragon city to relax. Just like you said, we should go to the movies, go to the park, eat ice cream, and see a doctor to make sure that the Monster War and our training in the depths of Ruins No. 2 have not caused too much of a negative impact on us. Let’s talk about something else. What do you think?”

Lu Siya stood still.

She lowered her head and looked at her reflection in the puddles, which was distorted by the heavy rain. A confused look appeared on her face.

“That’s right, I must be too tired. It’s so strange. Why did I have the idea of breeding a new generation of life forms out of nowhere?”

Lu Siya rubbed her temples and murmured, “Before I conquer the Other World, I don’t intend to let anything bind my hands and feet

“You’re cultivating too fast.”

Meng Chao said, “I remember that you only broke through the six-star Heaven Realm a few days ago, but you’ve already become more powerful than an ordinary fighter at the peak of Heaven Realm. As the saying goes, haste makes waste. It’ll be easy for you to go crazy if you keep advancing like this.”

“That makes sense.”

Lu Siya glanced at Meng Chao as she spoke. “However, it’s not quite right for you to say that. You just broke through the five-star Heaven Realm not long ago, but your combat ability is already above that of ordinary six-star Heavenly Realm fighters. We’re all monsters!”

The two of them laughed at her words.

Anyway, the awkward and tense atmosphere a moment ago had diffuse a lot.

“By the way, Sister Ya...”

Meng Chao took the opportunity to change the subject. “Is there any new news about the Supernatural Entities in the Abnormal Beast Research Department recently? Like White Spirit, Earthquake, the Demonic Abyss Eye, Vortex, the Tree of Wisdom, and so on?”

“No, the monster civilization has been wiped out. Where would new Supernatural Entities come from?”

Lu Siya glanced at Meng Chao in confusion. She did not understand why he suddenly brought this up. She thought for a moment and said, “Recently, the Abnormal Beast Research Department has been updating their organization and system. Everyone is so busy that they don’t have time to deal with any monsters!”

“Organization updates and system upgrades?”

Meng Chao was slightly startled.

“That’s right. The Abnormal Beast Research Department was originally set up to deal with the highly intelligent monsters that infiltrated Dragon City and wreaked havoc. Now that the monster civilization has been wiped out, if the Abnormal Beast Research Department wants to continue developing, it obviously has to carry out updates and give itself a brand new mission.”

Lu Siya told Meng Chao that in the later stages of the Monster War, the Abnormal Beast Research Department had recruited a large group of people with extraordinary abilities and made great contributions. They had also honed their combat strength through numerous tough and fierce battles.

Moreover, the closer they were to the water, the better it would be. The Abnormal Beast Research Department had also used its advantage to carve out a significant piece of the monster civilization’s legacy.

The Abnormal Beast Research Department, which had been developing smoothly due to the sudden expansion of its strength, clearly did not want to end up in a situation where it was in a sad state once the enemy disappeared.

Right now, everyone in the Abnormal Beast Research Department, from the director, Nie Chenglong, to her, the leader of the ninth special search and rescue team, as well as the ordinary investigators, were all ambitious and eager.

They hoped to remove the word “Abnormal Beast” from their name and upgrade from the Abnormal Beast Research Department to Dragon City Research Department. In the future, their scope of investigation and punishment would not only be limited to high-iq monsters, but also the entire Other World—all the high-iq indigenous creatures.

“Dragon City’s secret police in the adjudicator court are still in charge of Dragon City’s internal investigation as in the past. They specialize in hunting and punishing superhumans who have gone out of control. Our Abnormal Beast Research Department is the Dragon City civilization’s most chilling blade that has pierced into the depths of the Other World. One day, we will even upgrade the ‘research department’ to the ‘investigation corps,’ which will control Dragon City’s top-notch special forces and secret resources.”

Lu Siya proudly said, “You should be able to imagine how powerful we will be at that time!”

Meng Chao nodded.

Since ancient times, a secret organization like the Abnormal Research Department that was active on the black front might not be more powerful than the regular army, but it was definitely more terrifying than them.

Meng Chao had always collaborated well with the Abnormal Beast Research Department. He had even kept his home in the department’s family courtyard.

The stronger the research department was, the better it would be for him.

Yet, for some reason, an uneasy flame was still dancing in the depths of his brain.

Gazing at the dark night sky, he seemed to catch a glimpse of a fleeting danger.

“What happened to you? Your body temperature dropped by 0.3 degrees all of a sudden?”

Sensing Meng Chao’s uneasiness, Lu Siya glanced at him strangely. “By the way, two days ago, the director asked me if you were interested in officially joining the Abnormal Beast Research Department?”

“Of course, not as an ordinary investigator or even a gold-medal investigator.

“During this period of time, the Abnormal Beast Research Department has been recruiting and expanding its strength. A few special operations teams have been established. Although the specifications are not high for the time being, they have the opportunity to cross Monster Mountain Range and take charge of the outside world. They have the most important right of independent action and highest priority in handling the spoils of war. I think that you might be willing to become the leader of one of the special operations teams.”

“Wait...”

Meng Chao’s brain was boiling. Countless pieces of information were bubbling in the magma. He wanted to reach into the magma and endure the pain to retrieve the broken clues.

[Your current progress in the Mystery of the Supernatural Entities is 99% . All the Supernatural Entities have appeared. The final answer is right in front of you.]

That line of small golden words flashed in front of his eyes again.

Every tiny word was like a golden awl that pierced deep into his brain.

The corner of Meng Chao’s eyes twitched, and he mumbled, “Sister Ya, do you know of any other organizations that have been carrying out system and organization updates like the Abnormal Beast Research Department in Dragon City recently

“Of course. Other than this department, there’s also the adjudicator court, the Hunter’s Association, the major universities and research institutes, including the Red Dragon Army and the nine mega corporations. Every one of them is undergoing drastic adjustments and triggering earth-shaking changes!”

“After all, in the past, the major forces of Dragon City had always set ‘defeating the monster civilization’ as their highest goal to determine the organizational structure, allocate personnel and resources, shape the corporate culture, break down the missions, and set the KPI,” Lu Siya said.

“Now, the monster civilization has been utterly defeated. The gate to the new world is slowly opening in front of us. Aren’t all the forces going to undergo a complete transformation?”

“No wonder...”

Meng Chao was like a bee that had lost its sense of direction due to the interference of spirit magnetism. It kept circling in the muddy col, but it could not find its way. He muttered to himself, “No wonder Dragon City has been in a mess recently. It turns out that it’s because everyone is undergoing a transformation. And there must be a price to pay for this transformation, right?”

“Without a doubt. Just like the metabolism of the human body, a large amount of waste must be discharged to ensure that the new organization is stronger.”

“Many veteran soldiers who have performed meritorious deeds have spent their whole lives fighting monsters. Their gradually rigid thinking can only adapt to the fighting style of dealing with monsters. If they were to copy it into a brand-new war, it would be a disaster,” Lu Siya said with a straight face.

“It is true that we will have to pay a great price if we want to reform the old and replace the respected, even powerful experts of the older generation with a new generation full of new ideas and new battle strategies to ensure the smooth transformation of Dragon City’s entire civilization. But we have no other choice but to grit our teeth and survive this ‘period of pain.’”

“Period of pain...”

Meng Chao narrowed his eyes and said, “Therefore, the period after the Monster War was indeed the weakest period of Dragon City’s civilization.

“On one hand, the great enemy that united us has collapsed. The crack that existed among us for a long time was exposed unscrupulously. Triggered by the ‘the monster civilization’s legacy’, the crack became bigger and deeper!

“On the other hand, the change of strategic goals has made the major forces in Dragon City scramble to upgrade their systems and organizations. Just as you said, it is a ‘painful period of transformation,’ and this transformation is bound to come at a price, which might trigger new conflicts.

“Right now, we are like a man who’s wounded and exhausted after half a century of fierce battles. We’ve had to rely on our strong will and desire to survive in order to stand firm and fight the enemy to the death.

“Alas, the moment we kill the enemy, the breath that has supported us to stand firm dissipates. We collapse all of a sudden. All our injuries and fatigue drown us like a tide.

“However, we are still driven by hunger to tear the flesh and blood from the enemy’s body and devour them like a tornado. We are too full and have indigestion. Isn’t that right? Isn’t it?”

Chapter 874: Deliberately Leaked Information

“Yes, Meng Chao. Now it’s my turn to tell you, take it easy and don’t get excited.”

Lu Siya said, “You should understand that the release of many structural contradictions and the comprehensive transformation of the strategic structure are imperative for Dragon City’s civilization.

“We can’t bury our heads in the sand like ostriches and pretend that Dragon City is really a paradise where everyone is united and there is no conflict.

“As with many things, the longer it drags on, the bigger the problem becomes.

“Dragon City’s civilization is indeed at its weakest moment right now, but in any case, the monster civilization has already suffered a crushing defeat, and there are no new enemies around for the time being. If we don’t take advantage of this precious window period to expose and resolve the conflict and successfully realize the transformation, how long can we wait?”

“No...”

Meng Chao stared blankly at the torrential rain ravaging the earth. He was silent like a clay puppet for five minutes, allowing the cold rain to turn into rolling steam around his boiling brain.

Boom! Crack!

Suddenly, a bolt of lightning split the night sky.

It also split open the unsettling mist that had constantly shrouded the depths of his brain.

He widened his eyes and shuddered uncontrollably.

“Meng Chao, what’s wrong?”

Lu Siya was also affected by his emotions. She stepped forward and gently pressed his shoulder, injecting a stream of spirit energy into his body in an attempt to calm his restless thoughts.

“That’s right, Sister Ya. You’re right. Problems must be solved, and pains are hard to avoid. Now that we’ve won the Monster War, this is the best time to solve the problem...”

Meng Chao turned around, his face pale. He smiled at Lu Siya and said, “But what if we haven’t won the Monster War yet?”

“What did you say?”

A strange look flashed across Lu Siya’s eyes.

She did not even notice that her pupils had constricted slightly.

She pulled her hands away from Meng Chao’s body and rubbed her glabella gently to ease the piercing pain that had been lingering on her glabella ever since she had broken into the six-star Spirit Armor Realm. She also covered her face.

“Meng Chao, are you overtraining like me? Aren’t you being too paranoid?”

Lu Siya smiled. “We’ve annihilated and captured dozens of beast hordes, destroyed most of the monster habitats on Monster Mountain Range, and occupied the Hidden Mist Domain, the sinkhole, and the monsters’ lair. Even the monster mastermind has fallen into our hands, allowing us to study it.

“Before the rainy season arrived, the fog that shrouded Dragon City and Monster Mountain Range had become much thinner, and the spirit magnetic interference could not cause too much of a stir. We sent thousands of drones and armored airships to scout Monster Mountain Range from a high vantage point. We did not find any signs of large-scale beast hordes or Apocalyptic Beasts’ activities. After all, the resources devoured by the beast hordes and Apocalyptic Beasts were astronomical. Their existence would certainly have a serious impact on the surrounding environment, and it was impossible for them to hide perfectly.

“If this is not a perfect victory in the Monster War, then what is your idea of a complete victory?”

“I know, I know.”

Meng Chao paced back and forth restlessly, his teeth and nails deeply embedded in his flesh and blood. He was trying to clear his mind with the sharp pain.

As the bolts of lightning exploded one after another, his face became paler and paler, but his eyes became brighter and brighter.

“On the surface, it seems that we have indeed won the overall victory of the Monster War. It is precisely because we believe that all the monsters have been eliminated and there are no more worries that the internal problems of Dragon City have caused the volcano to erupt.”

Meng Chao suddenly stopped walking and stared straight at Lu Siya. He stretched out a finger and said, “However, who said that the main brain of the monster has fallen into our hands?”

Lu Siya was stunned.

Then, she couldn't help but laugh.

“Meng Chao, are you confused?”

Lu Siya said, “Although you didn't personally witness the decisive battle between my grandfather and the main brain of the monster, you went to check the scene under the leadership of Battle God, Lei Zongchao. Later, you established a spirit connection with the brain deep inside the monster mastermind and read a lot of information related to the monster civilization.

“Even if you don't believe my grandfather and the others, you should believe your own eyes and memories, right

“No, what your eyes see may not be the truth. Memories, even if they can not be tampered with, can at least be blocked and distorted.”

Meng Chao's fingertips trembled slightly as he said, “Of course, I know that Lu Zhongqi and the other twenty Deity Realm powerhouses were engaged in a decisive battle with the monster mastermind deep inside the sinkhole. No one knows the horror of that decisive battle better than me.

“The question is, how do we know that the one who fought the Deity Realm warriors was the mastermind—the creator and supreme commander of the monster civilization?”

This question stunned Lu Siya for quite a while.

“The other party was so powerful that even my grandfather and the others were severely injured...” she said hesitantly.

“Just because it was powerful it had to be the monster mastermind?”

Meng Chao pressed on, “Did it have to 100% be the monster mastermind?”

“Wait, it's not a question of whether it's powerful or not.”

Lu Siya thought for a moment and said, “It's Jin Qianxi. The monster mastermind and the remains of Jin Qianxi's brain were closely combined together. It even absorbed Jin Qianxi's soul to grow to where it is today. You should be clear about this through reading the memory information in the brain.”

“That's right. Jin Qianxi is the key. Jin Qianxi and the monster mastermind were highly bound. For a period of time, we even guessed that Jin Qianxi was monster mastermind!”

Meng Chao raised his trembling finger and snapped it hard. "The question is, who told us about this? Who implanted such a judgment in our brain—Jin Qianxi is the monster mastermind?"

Lu Siya pondered for a long time with a calm look on her face.

She still had a blank look on her face.

"Sister Ya, why has your thinking become slow? There's no reason for you to forget about this."

Meng Chao frowned slightly. "It was the Bubble Messenger who told us.

"During the battle in the Lair, in the secret laboratory under the headquarters of Golden Tooth, you, me, and A'Ji fought against the Supernatural Entity, Vortex for 300 rounds and killed the enemy with great difficulty. The enemy's corpse turned into foam, and a human figure of Jin Qianxi came out of the foam to tell us!"

"That's right!"

Lu Siya was enlightened. "That's what the Bubble Messenger said."

"That's the problem. That's the problem that has been bothering me for more than half a year. It has been making me uneasy, but I can't figure it out no matter how hard I think about it."

Meng Chao's voice was as sharp as a knife sharpened by ice. "Why did the monster civilization send such a 'messenger' to tell us about Jin Qianxi?"

"We are clearly sworn enemies. Why would the monster civilization be so kind as to reveal such crucial information to us?"

"You must know that before the battle in the Lair, we still knew nothing about the true face of the monster civilization. We did not know their social form, the source of their power, or where they learned so much about the wisdom of the human civilization.

"Wasn't it the most reasonable choice for the monster civilization to conceal the information and maintain the status of the 'enemy being in the light while we were in the dark?'"

"Why did they create such a Bubble Messenger and reveal the information about Jin Qianxi and the monster mastermind in such a hurry when there was absolutely no need to?"

Lu Siya was silent for a long time in the rainstorm.

"I don't know."

She quietly asked, "What do you think?"

"Information is also a kind of weapon. Usually, both parties will try their best to hide information about themselves from their opponents. If they intentionally disclose information, they must be trying to achieve some purpose, such as warning, threatening, or signaling a compromise."

When they were drinking with Long Feijun during the first half of the night, the rain had gotten increasingly weak, and the dark clouds in the sky had gradually thinned. Meng Chao and the young

officers from the Red Dragon Army all believed that the rainy season was about to end and dawn would arrive soon.

However, at some point in time, the rain had grown heavier and heavier, not to mention the pitter-patter of raindrops that fell on people like bullets.

Just by looking at the roaring flood in the depths of Mist Mountain, they knew that it was still too early for this world to be completely calm.

However, the cold raindrops had instead cooled Meng Chao's scalding brain.

The path that he had found from the countless broken clues suddenly became clear.

"The human civilization and the monster civilization have been fighting for almost half a century. We both know very well that we are sworn enemies. There is no room for compromise or surrender between us. Any warning or threat will be useless."

Meng Chao wiped the boiling rain off his face and calmly said, "Under such circumstances, any information that the monster civilization revealed to us on their own initiative can only serve one purpose—to mislead.

"Mislead us into believing that the monster civilization was only able to grow to where it is today because of Jin Qianxi's influence.

"Mislead us into believing that the monster mastermind and Jin Qianxi's brain remains have been tied together, and the two have long been integrated into one.

"It misled us into believing that as long as we killed a powerful existence that had fused with Jin Qianxi's brain remains in the monsters' lair, we would completely destroy the monster mastermind and obtain the final victory!

"But, is that really the truth, the whole truth?"

"Meng Chao, you..."

A surprised expression flashed across Lu Siya's face.

She did not expect Meng Chao's mind to be so sharp.

She reached out in the darkness.

However, a force pulled her hand back.

"Of course, we won't believe the Bubble Messenger's words."

Lu Siya said after careful consideration, "But all of this is consistent with the information we've analyzed from the brain. Other than you, so many Deity Realm experts, including me, have read a lot of information from the brain. It's enough to prove the relationship between the monster mastermind and Jin Qianxi. How do we explain that?"

"I can't explain it. That's another thing that shouldn't have happened and can't be explained at all.

“Why did the the monster mastermind leave such a complete micro brain for us to study and steal its memory?”

“Even if the destruction of the monster civilization is inevitable, does the monster mastermind really lack the power to destroy its own brain and everything before the human beings charge into its lair?”

Chapter 875: Another Micro Brain

“Perhaps, our attack was too fierce.”

Lu Siya tried to explain, “First, the railway guns bombarded the area. Then, my grandfather and the others rushed into the monster’s lair. The mastermind didn’t have enough time to react. It didn’t have time to destroy its own brain.

“This raises a new question. Why is the Hidden Mist Domain’s defense so weak? Even the final lair deep in the sinkhole didn’t pose any decent resistance. It was as if the monster mastermind had given up on resisting.”

Meng Chao said, “Yes, while we explored the Hidden Mist Domain, we entered the illusion that was created by the Supernatural Entity, the Tree of Wisdom, and experienced a rather thrilling adventure. However, such an adventure on such a scale was still too shabby for the final battle in the Monster War that had lasted for half a century. It was too beneath the monster civilization’s dignity.

“Could it be that the war potential of the monster civilization has been exhausted long ago, and even the dying struggles can only reach such a level?”

“It’s not like that!”

“We have found a lot of evidence in the Hidden Mist Domain. The green algae, which can replicate and move around terrifyingly, can gather into a Green Tide and surround the war machines of human beings, forming a terrifying green giant!

“A lot of immature ‘ultimate bodies of Apocalyptic Beasts.’ As long as half of the resources were transferred to the other half, a few mature bodies with explosive combat ability could have been born!

“In fact, there was no need for complicated operations at all. As long as the remnants of the beast horde scattered throughout Monster Mountain Range were retracted back into the Hidden Mist Domain and hidden in the underground crevices, why couldn’t they last for another ten days to half a month and cause a great deal of damage to human beings?”

“Let alone ten days to half a month, even if the monsters are a little stronger and can last for another twenty-four hours, isn’t it enough for the monster mastermind to destroy the brain that contains a large number of its secrets?”

Lu Siya was speechless.

As his mind became excited, Meng Chao’s face gradually turned from pale to red.

On the other hand, Lu Siya’s face turned from red to pale.

“We are sworn enemies!”

Meng Chao, who was fully immersed in the exhilaration of his mind, did not notice Lu Siya's change. He waved his fist heavily, "When humans encounter a beast horde and run out of ammunition and food, they will definitely die. They know that they would rather die than give their precious flesh and blood to the monster.

"Since the monster mastermind has intelligence that surpasses humans, why would it give its living brain to humans unharmed?"

"One must know that billions of years ago, it was the mother. It was a powerful existence that was on par with the ancient civilization. In its eyes, the people of Earth today should be a relatively low-level creature. They were no different from ants.

"Losing to a group of low-level creatures in the Battle of survival is already depressing enough, and you have to let these ants take away your brain, slice it into pieces, and steal your memories. To the monster mastermind, this is a hundred times more humiliating than total destruction!

"In any case, if I were the monster mastermind, I would have thought of a hundred ways to self-destruct. I would never let the human beings take away my brain and take away all my memories!"

"...That makes sense."

Lu Siya could only say, "So, what's your conclusion?"

"My conclusion is..."

Meng Chao took a deep breath and looked at the continuous lightning in the sky. His tongue was like thunder as he enunciated each word clearly, "There is such a possibility—the so-called 'victory of the Monster War' was guided by the monster mastermind step by step. It deliberately lost to us.

"Similarly, the micro brain that seems to contain a large number of ancient mysteries and the origin of the monster civilization is not a trophy that we seized, but a gift that the monster mastermind gave us—a 'gift' like the Trojan Horse!"

Lu Siya shook her head slightly.

She smiled somewhat helplessly.

"Are you kidding me?"

She tried her best to control the extremely weak trembling in her voice. "It's possible to feign defeat in a small-scale battle, or even lose a battle on purpose. However, how is it possible to lose the entire battle on purpose and lose all of your army, nest, resources, and brain?"

"Under normal circumstances, it's indeed impossible."

Meng Chao's voice was as sharp as a razor, "Except for one situation—unless the monster mastermind used its extraordinary intelligence and powerful computational ability to deduce the outcome of the monster war and realized that no matter what I did, I would definitely die.

"Sister Ya, let me ask you a question. When do you think the monster civilization went from prosperity to decline and headed for defeat?"

“The battle at the periphery of Dragon City a year ago?”

Lu Siya pondered for a moment and shook her head, “No, it’s too late now. It should be the Northern line attack, which is when we stopped the Red Radiance Jade tide from erupting underground on Raging Waves Mountain Range. From then on, as long as Dragon City doesn’t make fatal mistakes, the monster civilization has no chance at all.”

“That’s right. The northern front attack is indeed very crucial.”

Meng Chao suddenly changed the topic and said, “But what if I tell you that even if we can’t stop the red brilliant jade tide from erupting, even if the red dragon army is completely wiped out on the northern front battlefield, even if Dragon City suffers a heavy blow and can’t recover its vitality for several years, we can still achieve the final victory in the Monster War?”

Lu Siya was stunned. “What?”

“Humans are an extremely tenacious race. We did not rely on luck or the efforts of a few lone heroes to survive all the way to this day in the other world. I believe that even if we suffered a heavy defeat on the northern front, we would never be unable to recover and sink into oblivion. Instead, we would erupt with a hundred times more courage and fighting strength in the face of an even more terrifying threat to our survival.”

Meng Chao said seriously, “The monster mastermind woke up too late. It suffered too much damage during the ancient war, and it lost too much power during its trillions of years of sleep. No matter how crazily it stretched its tentacles and plundered resources, it was impossible to repair more than 10% of its active cells and turn back into a terrifying ‘mother.’

“Both of them are evolving crazily.

“They are becoming stronger and stronger in the bloody battle that has lasted for a long time.

“However, with the enhancement of spiritual energy training, rune machines, and genetic modification technology, human beings are evolving faster than the monster civilization.

“No matter what, we will win the final victory of this survival battle.

“Even if it is a miserable victory of killing 1,000 enemies and losing 800 to ourselves, it is meaningless for the monster mastermind that has been annihilated.

“Since the humans have won the northern offensive, at the latest, the battle at the periphery of Dragon City will be over. The monster mastermind should be very clear that it will definitely die.

“Since it will die either way, what’s impossible for it to deliberately lose a war that it will definitely lose in exchange for a chance to survive?”

Lu Siya hesitated and said, “How else do you think the monster brain can survive after surviving?”

“I don’t know.”

Meng Chao said, “Perhaps, it has abandoned most of its body and only a small part of its living cells to escape in a way that we don’t know?”

“That’s impossible.”

Lu Siya shook her head, “The entire nest of the monster is made up of a giant ancient creature. The computational ability and combat ability of the monster mastermind depend on the operation of the entire body. After leaving a small part of the living cells of the body, even if it can survive, its computational ability and combat ability will plummet by a hundred times. It will be even worse than an ordinary monster

“But at least, it’s still alive.”

Meng Chao said, “If it’s alive, there’s hope. If it’s alive, it’s everything.”

“Your imagination is too rich.”

Lu Siya frowned deeply and said, “Do you really think that an ordinary piece of the flesh of an ancient beast can leave its body and live on its own?”

“In the field of investigation, one does need to have a rich imagination, right? Perhaps, it’s not ordinary flesh, but...”

Meng Chao paused for a moment and took a deep breath before he said, “It is a brain.”

“Brain?”

Lu Siya’s pupils constricted for a moment before she burst into laughter. “Hasn’t the monster mastermind’s brain become our spoils of war?”

“That’s right. One of the brains has indeed become our spoils of war. But who said that there is only one brain in the monster mastermind?” Meng Chao said.

“The brain of the monster civilization was divided into the giant brain that occupied hundreds of meters and was responsible for thinking at the executive level, and the micro brains that were smaller than a fist and connected in an array were responsible for thinking at the decision-making level,” Meng Chao said.

“In the ancient war, the mother at its peak had hundreds of micro brains that formed a matrix of micro brains to carry out highly complicated analysis and decisions in order to compete with the ancients

“However, the micro brains were all destroyed

“All of them were destroyed by the space-based orbital weapons of the ancients. Only the last micro brain was hidden deep underground and survived,” Lu Siya said.

“Who said that? Who made such a judgment—that only the last micro brain was left in the control of mankind?”

A frightened smile appeared on Meng Chao’s face. “It was the micro brain that told us that it was the only one left.”

Lu Siya fell into silence again.

Meng Chao was silent for a long time, too. He listened carefully to the sounds of the mountain torrents breaking rocks, breaking trees, and filling up the ravines.

“I think that we have found the reason why the monster civilization did not destroy its brain and gave us the intact micro brain as a gift.”

Meng Chao’s voice sounded like it came from the deepest part of the Ten Thousand Year Ice Cave.

“What if there was another micro brain?”

“What if, when a micro brain was discovered and analyzed by us.

“When countless elites of Dragon City went into the ruins to cultivate crazily.

“When all the major forces of Dragon City were fighting over the heritage of the monster civilization.

“There is another micro brain lurking in the deepest part of Ruins No. 2, staring at us coldly.”

Chapter 876: Stay Away From Me

In the night sky, one lightning bolt after another rained down like a raging fire.

Lu Siya’s face was clouded by the lightning.

She looked at Meng Chao calmly for a while.

Then, she suddenly burst into laughter.

“A second micro brain? Are you kidding me?”

Shaking her head, she mumbled, “The information we extracted from the micro computer is enough to prove that the space-based orbital weapons have dealt a devastating blow to the mother. Only a single seedling has fallen into our hands.

“Information can be tampered with or even fabricated. Even if the information is 100% true and comprehensive, as long as the order is adjusted, one thing can be twisted into another completely opposite thing.

“Since the Tree of Wisdom, the Supernatural Entity under the enemy’s command, can create a beautiful paradise that doesn’t exist to confuse us, how hard can it be for the enemy to hide the existence of another micro-brain?”

“But you have no evidence. All of this is just your speculation... No, it’s just your imagination.”

Lu Siya gently put her hands on Meng Chao’s shoulders again, and her tone became unusually gentle.

“Meng Chao, it seems that we’ve been training too hard and our nerves are too tense during this period of time, which is why we have all kinds of symptoms. Listen to Sister Ya. After we return to Dragon City, we’ll rest well for a few days, recharge, and think more about our business and transactions—our future and the future of Dragon City are destined to be bright. Don’t worry too much and be too sensitive.”

“No, Sister Ya, you don’t understand. The future of Dragon City is far from ‘all light.’ I’m trying my best to find the trigger from light to darkness...”

Meng Chao said in a low voice, "Indeed, I don't have any evidence. The 99% probability is just my imagination. But if there's a 1% probability, I'm right. Don't you think it's very scary?"

"In the Earth era, there was an old saying, 'Wu and Yue are in the same boat'. That is to say, even if enemies like the people of Wu and the people of Yue are irreconcilable enemies, once they are on the same boat and face the stormy waves, they have to work together to reach the other shore and save their lives.

"In the past decades, the monster civilization was like a surging river, a stormy wave that was enough to overturn the small boat that was Dragon City.

"It was precisely because of the monster civilization's existence that the survivors who had accumulated all kinds of conflicts and hatred in the bloody era at the beginning of the transmigration, where resources were scarce, order collapsed, and the law of the jungle ran, were able to put aside their past grudges, ignore differences, give up disputes, and move forward together.

"The monster civilization tried to destroy us, but unintentionally, they became the 'glue' and even the 'shaping agent' of Dragon City's civilization. We made the monster civilization, and the monster civilization made us!

"But now, the monster civilization is doomed. We thought that we had conquered the surging river. The 'Wu people' and the 'Yue people' have all gone ashore. We are absolutely safe now!

"Therefore, everyone, from the leaders of the corporations, the Deity Realm warriors, to the ordinary warriors who have yet to awaken their extraordinary powers, have turned their attention to the monster civilization's legacy, the voice of Dragon City's future, and the transformation of the external colonization mechanism. The structural contradictions that have been accumulated in the Dragon City for decades are erupting.

"If at this time, the monster civilization is not completely dead and still retains even 1% of its power, infiltrating the inner part of Dragon City with our unpredictable methods, don't you think that it's really dangerous?"

There was another point that Meng Chao did not mention.

Dragon City's expansion would definitely not be as smooth as many citizens had imagined.

The so-called "iron flood, sweeping across the other world" might have been the case in the early stages, but soon, Dragon City civilization would hit an iron plate.

If Dragon City's civilization and the indigenous civilization that had occupied the Other World for tens of thousands of years were to collide violently, the remaining power of the monster civilization would suddenly emerge from the darkness and attack from both inside and outside.

That would be the most terrible disaster for Dragon City.

"...Alright."

Lu Siya realized that she could not convince Meng Chao no matter what.

She coughed lightly and rubbed her glabella harder. She said helplessly, "Then what are you going to do?"

"I want to end my cultivation early and go back to Dragon City to find Battle God Lei Zongchao. I want to tell him my worries and let him analyze them together."

"As you know, I don't have any evidence," Meng Chao said. "All the more reason for me to summon all the forces in the city to be on high alert again."

"Sister Ya, I think you should go back to the Lu family and talk to your grandfather about it, too."

"Senior Lu Zhongqi was a witness to the last battle. I think that as long as you tell him such a dangerous possibility exists, he will definitely find more loopholes and clues."

"Then, we can deploy more manpower and resources to conduct a more detailed and comprehensive inspection of Ruins No. 2 and the entire sinkhole. We can ensure that even a mutated snake, insect, rat, and ant cannot escape from us."

"Only then will it be safe. Don't worry."

"The cost of doing so is very high," Lu Siya said with a frown.

"No matter how high the cost is, it will be worth it to prevent the revival of the monster civilization."

Meng Chao said, "Besides, we were going to inspect Ruins No. 2 in the first place, because too many cultivators and researchers have been corrupted by mysterious forces. Some of them even turned into a giant beetle in their sleep!"

"I highly suspect that the mutation of these people was caused by the lingering ghosts of the monster civilization."

"Therefore, we are not going to conduct a new inspection. We are just going to upgrade the inspection that we are already conducting. Also, everyone who has been in and out of Ruins No. 2 and has come into contact with the monster mastermind should have a more thorough, detailed, and rigorous inspection. I think that's the only way to be safe."

"...Makes sense."

Lu Siya seemed to agree with him. "When are you going to return to Dragon City?"

"Now."

Meng Chao made a prompt decision. "Since we've detected the suspicious points, we have to, of course, seize every second. We can go and look for your father first. Since you said that Uncle Lu is known as the 'gray fox,' he will naturally be cautious and resourceful. I think he will be interested in the suspicious points that I have raised and send us back to the city before dawn. Sister Ya, what do you think?"

"I think... Cough, cough, I think..."

Lu Siya began to cough.

At first, it was just a few light coughs that tickled her throat.

Very soon, the coughs interrupted her rhythm of speech.

She coughed violently. Her entire body trembled from the coughing, and she bent down like a lobster.

The saliva that she coughed out was surrounded by streaks of glittering blood.

Meng Chao turned pale with fright.

He sensed that Lu Siya's body temperature had risen by seven or eight degrees in just half a minute. Then it dropped to around thirty degrees in an instant.

A normal person's body would never experience such temperatures.

If it were a normal person, they would have gone into shock or even died by now.

"Sister Ya, what's wrong?"

Meng Chao hurried forward to help her up.

He felt every fiber of Lu Siya's muscles twitching violently.

It was strange. According to the perception of his vitality magnetic field, Lu Siya had apparently fallen into an invisible ice cave, and her body was losing heat rapidly.

However, when Meng Chao touched her shoulder and arm, his palm was felt so hot that blisters almost appeared on it.

It seemed that an invisible flame was strangely burning on her skin.

"I . . . don't know..."

Lu Siya staggered a few steps back and almost fell to the ground.

Bewilderment appeared on her face as she spoke intermittently. "It's probably a side effect of spirit energy attacking the brain due to excessive training. Or perhaps, it's the wind, rain, thunder, and lightning..."

Her vitality magnetic field gradually turned from a calm pond into boiling magma.

Even Meng Chao could feel that something was about to crawl out from the depths of her brain.

Meng Chao stepped forward again, grabbed Lu Siya's hands, and injected a stream of spirit energy into her body in an attempt to resonate with her.

Both of them had been baptized by the Blue Origin Crystal.

The Blue Origin Crystal was the crystal with the strongest vitality. It was very effective in stimulating the growth of cells and promoting the healing of wounds.

When both of their vitality magnetic fields converged and the spirit energy in their bodies resonated, their self-healing ability would be increased by three to five times.

Most of a person's fatigue, diseases, poisons, and wounds could be healed without any medication.

Yet, this time, no matter how much spirit energy Meng Chao injected into Lu Siya's body, it was like a clay ox entering the sea[1].

"I'm afraid that this is not a sign of mental derangement!"

Meng Chao frowned deeply. "I told you not to train so hard. Do you really think that it's that easy to break through the peak of Heaven Realm.

"Who told you to train so fast? Breaking through to a whole new realm is not as easy as eating and drinking."

Lu Siya raised her head, and a self-mocking smile appeared on her pale face. "I'm... Ahem, I'm not going to lose to you!"

"Aren't we friends? Why are you competing with me?"

Meng Chao did not know whether to laugh or cry.

He had been reborn at the end of the world, and he had been blessed by the Kindling. He was the chosen one.

Sister Ya could have competed with anyone, but she had to compete with him. Why did she have to do this?!

He raised his wrist and looked at his tactical watch.

As expected, all the numbers and information on it were blinking crazily.

Only the "Signal Strength" column was as calm as death.

Tonight should be the last rainstorm of the rainy season.

This was the most chaotic place in the planet's magnetic field, and it had the most intense spirit magnetic interference in the entire Hidden Mist Domain.

Of course, there was no signal, so there was no way to contact the outside world directly.

No one would hear their voices in the raging storm and deafening thunder.

"I'll carry you down the mountain now."

Meng Chao made a speedy decision. "I'll go to the hospital and find someone strong enough to examine you!"

He reached out to pull Lu Siya.

However, Lu Siya used the last of her strength and gave him a hard push.

Then, she fell into the muddy water.

"Sister Ya, what's wrong?" Meng Chao was stunned.

"I, I don't know..."

Lu Siya looked at her hands in a daze. The confusion and pain on her face grew stronger. She murmured, "I just think... you should... stay away... from me... as far as possible..."

Chapter 877: Lu Siya's Sudden Change!

Her voice became softer and softer.

Her eyelids gradually drooped.

It looked like she was about to collapse on the ground and faint.

However, she kept muttering, "Run... Run quickly..."

The torrential rain tore her voice into pieces.

It made her even more petite and haggard as she curled up in the mud.

Meng Chao stepped forward and picked her up. She felt light and weightless in his arms.

When she had been too proud of herself in her cultivation just now, Lu Siya had pushed her spirit energy to the maximum. She was charging forward like a Tyrannosaurus rex.

Now that she had suffered the backlash of her spirit energy, she could only lean on Meng Chao's back like an octopus.

Meng Chao sensed that her vitality magnetic field was extremely chaotic, causing her body temperature to fluctuate between thirty and forty-five degrees within half a minute. He did not dare to be negligent and sprinted down the mountain at full speed.

Unfortunately, it was easier to go up the mountain than to go down.

The next mountain, which had no path to begin with and had been washed into a mess by the flood and flow of debris, was even more difficult to climb up.

Meng Chao shifted between the mountain torrents, broken trees, and falling rocks. As he leaped forward, it was inevitable that there would be bumps, and that led Lu Siya to moan in pain.

"It hurts... My head hurts, there's something..." Lu Siya moaned.

"Hang in there, we'll be down the mountain soon!" Meng Chao encouraged her.

"A voice... Meng Chao, did you hear a voice?" Lu Siya seemed to be hallucinating and falling into a dream, twisting and turning behind Meng Chao.

"What voice?" Meng Chao asked casually.

"Evolution, the voice of evolution."

Lu Siya was like an octopus that was tightly wrapped around him. She moved closer to his ear and her silky voice entered his ears and eyes. "Humans have their limits. Our evolution is too slow. Based on the normal path, it will be impossible for us to evolve to the level of the Ancients in another thousand years, ten thousand years, or even longer."

“The Ancients are far from being the most powerful existence in the world. They were all destroyed, weren’t they.”

“Sister Ya, you...”

Meng Chao was stunned for a moment.

He suddenly realized that Lu Siya’s voice and train of thought had become clear again.

However, there was a subtle difference between her current words and the feelings she had in the past.

Also, her body temperature, which had jumped up and down, had gradually stabilized.

There was only a fluctuation of three to five degrees.

“We don’t have time, Meng Chao. We don’t have a thousand or ten thousand years to evolve slowly. The ‘reboot’ is about to happen, and it has already happened,” Lu Siya said gloomily

“Before everything becomes irreparable,” Lu Siya said, “we must evolve. We must evolve crazily at all costs to become an unprecedented life form that surpasses human beings—the most perfect life form!

“That way, even if we are unable to avoid this catastrophe, we will still be able to survive.

“At the very least, our genetic inheritor’s unprecedented perfect life form will be able to—”

“No, Sister Ya. Aren’t you sick? Why are you still thinking about this?”

Meng Chao did not know whether to laugh or cry.

Suddenly, he realized that something was wrong. Something was very wrong.

Whoosh!

A bright lightning bolt streaked across the sky.

The projections of the surrounding mountains, rocks, and trees were all distorted into weird shapes, and they scattered in front of Meng Chao.

Meng Chao also saw his and Lu Siya’s shadows.

He discovered that countless tentacles had grown out of his and Lu Siya’s bodies.

The tentacles were dancing in a weird way.

Lu Siya’s hair fell behind Meng Chao and clung to his ears, cheeks, neck, and chest.

Meng Chao knew that Lu Siya liked clean and neat hairstyles.

During cultivation, the vitality magnetic field would surge and stimulate the hair follicles. In turn, that caused the hair to grow, and the long hair would move on its own when there was no wind.

However, after every cultivation, she would cut her long hair short, or at least twist it up.

But now, her hair was growing recklessly like weeds in the Hidden Mist Domain.

It was like a vine covered in green algae, giving Meng Chao a brand new, wild life force.

Most importantly...

Every strand of Lu Siya's hair had turned green.

It was like a living plant.

Meng Chao was shocked.

He turned his head subconsciously.

He happened to see Lu Siya's half-smile and her blood-red eyes.

At some point in time, her eyes had changed from black and white to crystal-clear rubies that looked like they had been carved out of Red Radiance Jade.

No, they were not rubies but mines. There were two bottomless pits that seemed to lead all the way to the core of the Earth.

In just half a second of looking at her, Meng Chao felt like his soul was about to be sucked in, and his body was about to be eaten by Lu Siya.

Green hair! Red Eyes! An extremely devilish expression!

At that moment, Lu Siya appeared to be a completely different person. No, she was not a human at all!

Behind her, a crystal dragon, which was condensed from the sturdiest rocks and crystals and surrounded by the terrifying aura of an ancient vicious beast, had silently taken shape.

Although there were no living eyes in its deeply sunken eye sockets, two clusters of faint blood-colored flames burned as it stared at Meng Chao without blinking.

It was almost as if Lu Siya was staring at Meng Chao without blinking!

Meng Chao's hairs stood on end.

Before he had time to react, the crystal dragon had opened its bloody mouth and spurted sulfur like a volcano on a primitive planet. Then, it lunged at him!

However, before it could get to Meng Chao and Lu Siya's heads, the two of them suddenly stopped.

Another crystal dragon that was smaller in size rose up from the ground and crashed into the first seven-inch crystal dragon, knocking it away.

Two eyeballs made of crystals were embedded in the eye sockets of this crystal dragon.

Although it was equally ferocious, the depths of its eyes still shone with the last trace of rationality.

Lu Siya's long green hair danced devilishly and turned into vines with sharp thorns. When it tried to pierce Meng Chao's heart at lightning speed, Meng Chao's heart was already in his hands.

Fortunately, Lu Siya herself was the first one to grab her long hair.

"Sister Ya..."

Meng Chao subconsciously pushed his vitality magnetic field to its limit. With the roars of tigers and dragons coming from his spine, spirit energy ripples burst out in all directions like shock waves, blowing Lu Siya away.

Bolts of lightning that were more mournful than the previous ones illuminated the world that was completely different from usual under the torrential rain and the flash flood.

Meng Chao saw an unbelievable scene.

Lu Siya's face revealed an ambiguous expression that was difficult to distinguish between good and evil.

Sometimes she would grit her teeth, sometimes her face was ferocious, sometimes she was smug, and sometimes she was furious.

She clutched her crazy green curly hair with all her strength. She swayed as if she was drunk, and at the same time, she seemed to be fighting with an invisible enemy.

Meng Chao soon realized that the "invisible enemy" was herself.

The two crystal dragons that she had summoned behind her had completely opposite temperaments. One of them was domineering, while the other was brutal. They were fighting each other brutally and getting entangled.

They kept biting and tearing off large pieces of rocks and crystals from each other's bodies with their sharp claws and teeth.

On the surface of the crystal dragons, there were also shining spirit tattoos that contained different offensive spirit and magnetic fields. They either used high-frequency oscillations to blast their opponent's limbs into pieces, or used their own claws and teeth... They had the ability to produce effects of frost, fire, and corrosion.

They had both been summoned by Lu Siya, but they seemed to be irreconcilable enemies. Soon, they tore each other into pieces. Yet, they were reborn among the debris on the ground before they fought again.

The battle between Lu Siya and herself had reached its climax.

She stabbed her left hand into her rapidly rising chest as if she was trying to take out something hidden deep inside.

But her right hand grabbed her left wrist at lightning speed.

Terrifying veins bulged on both of her arms from the back of her hand to her shoulders. The veins on her left arm were normal red, while the veins on her right arm were, shockingly, greenish-black!

Seeing how Lu Siya's right arm had transformed, Meng Chao had no reason to think that he had once watched a video of the man-eating pomfret exploring the Hidden Mist Domain.

In the video, a member of the special man-eating pomfret team was corroded by the mysterious power in the Hidden Mist Domain, and the terrifying greenish-black blood vessels protruded from the surface of his body.

At that time, the captain of the man-eating pomfret team had designed the video to lure the mysterious power to the arm of the member. Then, he raised his knife and chopped off the entire arm from his shoulder.

In the end, the broken arm seemed to have gained life and turned into something like a scorpion or a spider!

It was unknown when, but Lu Siya had also been corroded by the mysterious power in the depths of the jungle!

However, her free will seemed to have not been completely suppressed yet.

After more than ten seconds of hand-to-hand combat, no matter how hard her right arm tried to stop her, her left fist still landed heavily on her chest.

“Pu!”

Lu Siya spurted out a mouthful of blood.

It was a mouthful of extremely thick and sticky blood.

Even though it had left her body and landed on the ground, the blood was still hissing. Blood-red tentacles crawled out of the slowly squirming pool of blood and trembled slightly.

After spurted out the strange blood, the red glow in Lu Siya’s eyes faded slightly and she regained a little bit of consciousness.

“Nobody, no power, can control me. Whatever the hell you are, go to hell!”

Gritting her teeth, she raised her left arm again.

Countless sharp stones were flying over from all directions. With the curling and molding of spiritual energy, they formed a gauntlet with a long, narrow blade on her left arm.

The moment the gauntlet was formed, without any hesitation, Lu Siya turned the blade around and stabbed at her heart.

However, her shoulder blades made a crisp cracking sound. The broken bones pierced into her flesh and stopped her movements.

The blue-black veins on her right arm extended to her chest and her left arm like wildfire.

Lu Siya could not move.

After struggling for a while, she broke out in cold sweat.

The red light in her eyes shone again and became deeper and deeper.

Despair finally appeared on the Queen Bee’s face.

“What are you waiting for?”

She glared at Meng Chao and hissed, “Hurry up and kill me!”

Chapter 878: Decisive Decisions

Meng Chao's heart sank to the bottom.

However, he did not hesitate at all.

It was even less likely that he would not be able to make a move at that critical moment.

After his return following the apocalypse, whenever he should be ruthless, he could be more ruthless than anyone else.

Moreover, he had seen many explorers who had been corroded by mysterious forces in the ancient ruins. They had become neither human nor ghost, and their lives were worse than death.

He and Lu Siya knew very well that death was often a kind of relief and even happiness.

If he were to be corroded by mysterious forces, black mucus would ooze out of his body, and he would soon transform into a giant beetle. He would also lose all his ability to think and free will.

He also hoped that Lu Siya would be by his side and give him a quick death.

Therefore, before Lu Siya could finish her sentence, Meng Chao had already activated the nine dragons divine seal and poured surging spiritual energy into the boiling dragon veins, causing the raging dragons to... all of them moved along his high spine to his limbs and bones.

Boom!

He punched Lu Siya's chest without any mercy.

Mysterious and complicated spiritual patterns appeared on his arms, fingers, and palms respectively. Different spiritual patterns shone and combined into a destructive spiritual magnetic field, sending an explosive force directly into Lu Siya's heart.

Lu Siya spat out another mouthful of sticky blood.

She flew out like a kite with a broken string.

Even the two crystal dragons, which were shaped by her will and controlled by her mind, showed signs of stiffening and collapsing.

Meng Chao didn't move, but as soon as he made his move, it was like a flood that had burst out of a dam.

Boom! Boom! Boom! Boom! Boom! Boom! Boom!

He turned into a streak of light and coiled around Lu Siya, who had yet to land on the ground. Taking advantage of the fact that Lu Siya had nowhere to borrow strength from, he unleashed the continuous techniques of the Ultimate Stream to the maximum. In just a breath, he launched nearly a hundred attacks toward Lu Siya's vital points, he made Lu Siya float in the air again and again, unable to land on the ground at all.

Of course, Meng Chao was very clear that an attack of this level would not be able to kill Lu Siya.

After all, Lu Siya was a superhuman in the six-star Spirit Armor Realm, and she had even reached the peak of Heaven Realm. She was qualified to explore the mysteries of the Deity Realm.

No matter how talented Meng Chao was, his combat ability was only “comparable” to that of a six-star Heaven Realm cultivator. In the end, he lacked the decisive strength to kill a cultivator at the peak of Heaven Realm in one strike.

The most ideal result would be to heavily injure Lu Siya and knock her unconscious.

As long as he could temporarily suppress the mysterious energy in her body, he would be able to send Lu Siya to the hospital in time, or he could find Long Feijun and Lu Fanghui to provide support.

Lu Siya sensed Meng Chao’s intention.

A hint of approval flashed in her eyes.

She took the initiative to cooperate with him, exposing her vital parts.

This was especially so for the right side of her body, which was already covered in black-and-blue blood vessels.

When her right arm wanted to block or summon the Crystal Dragon to stop Meng Chao, her left arm would cause trouble again and meet Meng Chao’s attack.

Although every heavy blow from Meng Chao would make her groan in pain.

After the pain, however, she would moan happily.

It was as if the excruciating pain could stimulate her mind, keep her awake and bright, and suppress the mysterious power that was drilling into her body.

The two of them worked well together, and their minds were in sync.

Accompanied by Meng Chao’s heavy punches, the greenish-black power on Lu Siya’s right half of her body was dispersed.

The remaining greenish-black power seemed to be cornered, and it could only drill into her right arm. Mysterious and complicated jade-green spiritual patterns appeared on her right arm, as if it was a vivid, flat jungle painted on Lu Siya’s arm.

Meng Chao’s eyes lit up.

He thought of how the captain of the man-eating pomfret team dealt with the mysterious energy that was parasitizing his team members.

He and Lu Siya looked at each other deeply.

Lu Siya had seen the video, too.

She immediately understood what he meant.

Gritting her teeth, Lu Siya, who had the nickname of Queen Bee and was as ruthless to herself as anyone else, raised her right arm that was entangled by the mysterious energy.

“Break!” Meng Chao Roared, and his blade broke through the speed of sound.

On the blade, a cluster of spiritual energy that looked like a small sun exploded and turned into hundreds of golden arcs of electricity.

It was the ultimate skill of “Domineering Saber” Jin Wanhao, Celestial Tyrant’s Star Shattering Slash.

The saber that was surrounded by electric arcs slashed at Lu Siya’s right shoulder mercilessly!

For a powerhouse like Lu Siya, the loss of her entire right arm would certainly have a serious impact on her combat ability.

However, even if all four of her limbs were broken, it was still better than being completely eroded by the mysterious power and turning into a monster that was neither human nor ghost.

Meng Chao and Lu Siya had already reached a consensus through eye contact.

Meng Chao’s Golden Saber was about to cut off Lu Siya’s right arm that was enveloped by the greenish-black aura.

“Ah!” Lu Siya screamed inhumanely deep down her throat. Her green hair, which was as messy as weeds and vines, suddenly grew several meters long and entangled Meng Chao’s saber.

If Meng Chao had used the Golden Tooth Blood Soul Saber, Lu Siya’s hair would not have been able to block his slash no matter how much it had been strengthened by the mysterious power.

Unfortunately, Tonight was only for training. Meng Chao was carrying a Thunder Saber—a victory commemorative edition produced by his own company!

Although it was an upgraded version specially produced to commemorate the great victory in the Monster War, the materials were extremely generous.

However, no matter how generous it was, it could not be compared to the Golden Tooth Blood Soul Saber.

At this moment, Meng Chao’s spirit energy was as dense as that of many experts in the six-star Spirit Armor Realm.

Naturally, his full-force attack was not something that the Thunder Saber could withstand.

When his speed was pushed to the maximum, the tip of the saber could not help but tremble slightly.

The flawless path of the saber was even thinner than a strand of hair.

The mysterious power lurking in Lu Siya’s body keenly caught the movement of the hair.

The entanglement of the long green hair further buffered and dispelled the terrifying destructive power of Celestial Tyrant’s Star Shattering Slash through the method of using softness to counter hardness.

At the same time, the entanglement also wrapped around Lu Siya’s left arm, waist, and strong legs.

No matter how hard she struggled, she still fell backward in a strange zombie-like posture.

Whoosh! Whoosh! Whoosh! Whoosh!

Meng Chao cut off countless strands of green hair and sent them flying into the air, turning gray in an instant.

It was as if their vitality had been sucked dry, withering and fading away.

The thunder-like battle blade struck Lu Siya's right shoulder with unstoppable force.

However, because of the deviation of the path of the blade and the interference of the long green hair, it was 0.5 centimeters lighter than Meng Chao had expected.

The blade brushed past Lu Siya's shoulder blade.

The golden electric arc had severely torn her tendons and muscles.

However, it was unable to completely separate the mysterious power from Lu Siya.

Meng Chao snorted coldly and slammed his legs onto the ground like a rocket. He rushed forward like a hungry tiger pouncing on a sheep, sending Lu Siya flying hundreds of meters away in an instant.

He took the opportunity to tear apart the entanglement of the long green hair and raised the saber high again.

This time, he had grasped the characteristics of the Thunder Saber—the victory commemorative edition.

From the weight, the length, the center of gravity, and the materials of the monsters mixed with metal, they all turned into mysterious and complicated information flows that flowed into his brain and merged perfectly with the fatal strike that he was about to unleash.

However, when Lu Siya was sent flying more than a hundred meters away and crashed heavily into a green rock protruding from the rock wall, the seemingly solid rock shattered and collapsed.

Rumble!

On the rock wall, tens of millions of tons of mudslides swept down like thousands of soldiers and horses. Lu Siya was instantly engulfed by them and disappeared without a trace.

What was worse was that even Meng Chao could not escape the impact of the debris flow, and he was caught in the surging and sticky flood.

Meng Chao struggled desperately.

He tried to condense his spiritual energy into wings and control the balance and direction in the turbid flow.

But the debris flow was different from the dozens of debris flows that he had encountered when he went up the mountain.

Not to mention that it was more rapid and fierce, there were more dangers in the debris flow, too.

Boom!

Boom! Boom! Boom!

Boom! Boom! Boom!

A lot of falling rocks and broken wood collided with each other in the debris flow. Then, like the fangs of a monster, they lunged at Meng Chao.

With great difficulty, Meng Chao waved his thunderous battle saber and shattered them one by one.

However, he felt that the debris flow was filled with chaotic spirit energy, as if ten thousand invisible hands were pulling him desperately. Every swing of his saber was a hundred times more laborious than a normal battle.

Soon, Meng Chao felt that he was stuck in a swamp and could not move at all.

However, at this moment, several undercurrents were rushing toward him at a high speed.

“What is this?”

Meng Chao’s pupils constricted to the maximum. He curled his body as hard as he could and narrowly missed the first undercurrent.

However, a rock dragon made of falling rocks and broken wood was rushing out of the debris flow.

No, not just one, but four rock dragons were lurking in the debris flow, waiting for an opportunity to launch a hidden and fatal attack on Meng Chao.

“Sister Ya...”

Meng Chao was burning with anxiety.

Manipulating rocks was Lu Siya’s specialty. The debris flow contained a lot of soil and rock components, which made it easier for her to create rock snakes and rock dragons.

However, under normal circumstances, Lu Siya would never kill Meng Chao.

However, the four rock dragons seemed to have just been summoned. Their eye sockets were deep, and they were like crystal dragons that were surging with dim phosphorescence. Their bodies were surrounded by a primitive and hungry aura.

It was obvious that they were not summoned by Lu Siya, but by the mysterious force lurking in her body.

After the impact and devouring of the debris flow, Lu Siya had been completely controlled by the mysterious force!

Meng Chao didn’t know whether the appearance of the mudslide was a coincidence or not.

Or was it the mysterious power lurking in Lu Siya’s body that could mobilize the magnetic field of the planet, control the microclimate in the surroundings, and bring “reinforcements” such as the mudslide.

If it was the latter, the power was far more terrifying than he had imagined.

“Run!”

Meng Chao made a prompt decision and changed his tactical purpose.

He changed from “helping Lu Siya expel the mysterious power that invaded her body” to “escaping death from the hunting of the mysterious power.”

The mysterious power was extremely terrifying. He could not fight it with his courage alone.

Only by running to the foot of the mountain and finding more powerhouses, mobilizing the corporations' elite troops and the Red Dragon Army, and surrounding the entire Mist Mountain, could he hope to destroy it completely.

And this was also the only way to save Lu Siya.

Chapter 879: The Demonic Extraterrestrial Flower

However, it was not easy to escape.

The other party seemed to sense Meng Chao's intentions.

It had also apparently taken advantage of the precious opportunity, when Meng Chao and Lu Siya had been struggling in the mudslide, to successfully devour Lu Siya's entire soul and obtain 100% control over her body.

From the darkness deep within the mudslide, a victorious laugh echoed.

In the blink of an eye, the situation had been reversed. The hunters and their prey had swapped places.

The four rock dragons pounced on Meng Chao ferociously.

It appeared that they had been endowed with the characteristics of the Crystalline Nine-headed Dragon. No matter how hard Meng Chao hacked at them, their heads would regrow time and time again.

With the continuous replenishment of the debris flow, they would be able to condense a brand-new head with a mouth full of blood and fangs.

Boom!

After the one hundred and fourth slash that was infused with destructive spirit energy, the thunderous battle saber that was full of spider web cracks finally shattered, leaving only the hilt and the blade that was several centimeters long in Meng Chao's hand.

The four rock dragons launched an overwhelming attack. Although they failed to break through Meng Chao's defense that was crossed over his arms, they stirred up enormous whirlpools in the debris flow.

The whirlpools tore at each other, causing Meng Chao to taste the feeling of the world spinning and his head spinning.

He had to be like a rocket breaking free from gravity, burning all his fuel crazily. Only then could he barely get his head out of the mudslide and breathe in the air that was too fresh and gave off a strong fishy smell.

On the mudslide, the torrential rain was so heavy and the mountain torrents were so fierce that Mist Mountain's entire spirit magnetic field was chaotic like a super storm.

Meng Chao felt that the lower half of his body, which had fallen into the mudslide, was like a small fish caught in a whirlpool.

The upper half of his body, which was exposed above the water, was like a startled bird that had its wings broken in the storm and was dizzy.

The upper and lower half of his body were twisted clockwise and counterclockwise by two astonishing strange forces, which made his spine, which was as strong as a flood dragon, feel a sharp pain as if it had been shattered.

He suspected that in the next second, he would be twisted into two parts by the violent force of nature, and his internal organs would be scattered all over the ground.

Meng Chao spat out blood, and his vision gradually blurred. It was as if a mudslide had poured into his brain, and darkness was about to engulf the entire world.

He could only bite the tip of his tongue and swallow the blood. Relying on the hundreds of thousands of contribution points that he had accumulated with great difficulty, he kept exchanging them for healing energy, stimulating the torn cells to grow and heal again and again.

Only then could he endure the next time, the more vicious and painful tearing.

Just like that, he struggled in the mudslide for an unknown amount of time.

He also did not know how many times he had smashed the four rock dragons with his fists, kicked them with his feet, and even bit them with his teeth.

The tearing force that could shatter one's body and bones gradually dissipated like the receding tide.

Meng Chao could finally regain control of his body bit by bit.

After wiping away the five kilograms of mud that had smeared his face, he found that he had been swept halfway up the mountain by the mudslide, into a slightly calmer col.

It was the place where he had once rested when he had gone up the mountain, where he could overlook the intersection of the Red Dragon River and the Raging Tiger River.

The four rock dragons that had been biting on him, smashing, kicking, and biting him countless times had all disappeared.

Perhaps, they had finally exhausted the bizarre life force that their creator had bestowed upon them and 'died'.

However, Meng Chao was not happy at all.

It was not only because his body was covered with wounds scratched by sharp branches, rocks, and crystal fragments.

The wounds that had been soaked in the debris flow for too long, lost too much blood, and turned white, could not be healed in a short time no matter how hard they were repaired.

His bones and joints seemed to have been crushed by a 10,000-ton hydraulic press and were randomly glued together with solid glue.

With just a slight movement, Meng Chao felt an intense pain that made him want to roll on the ground and cry for his parents.

It was not just because his body was empty. All his spirit meridians, including the dragon meridians, were like earthworms that had been dried by the sun.

He could not even straighten them up, let alone expand them several times and spurt out scorching power.

And because..

He saw an unbelievable scene.

It was only one or two hours away from going up the mountain.

The platform that he used to rest on had completely changed its appearance.

A large amount of green grass, shrubs, and vines grew on the originally dark mountain rock.

The soil that had been washed clean by the storm was replaced by large patches of moss, fungus blankets, and algae.

The carpet that looked like a green ocean was covered with colorful flowers.

There were also a large number of strange plants that Meng Chao, who was the reaper, could not even name. They were growing crazily under the crazy rain.

It was like a miniature forest that was small but full of vitality.

The heavy rain, mountain torrents, lightning... no power could stop the fungi, spores, and plants in the miniature forest from releasing the thickest, most surging, and most wonderful vitality.

Such life force made Meng Chao feel cold all over his body, as if he had fallen into an ice cave.

That was because he recognized two of the most iconic creatures.

The first was the Green Tide.

It possessed an incomparably terrifying ability to divide, reproduce, and heal itself. It could even cover the high-voltage electric towers of humans, manipulate steel, and turn into the terrifying algae of the green giant.

The second was the Blood Flower.

The old enemy of the people of Dragon City could turn the originally extremely terrifying monster into an undead creature that was ten times more terrifying.

A sparkling Green Tide...

A bright red Blood Flower...

It swayed to its heart's content in the fierce wind and rain, stretching its limbs.

And in the middle of the Green Tide, the Blood Flower, and all sorts of frantically growing etherealized plants, was a huge flower bud.

The flower bud, which was more than three meters in diameter, was entangled by countless blood vines. It looked like a giant bug pupa or the egg of an Apocalyptic Beast.

However, it was growing, expanding, and splitting hundreds of times faster than a regular bug pupa or a beast egg.

When Meng Chao's eyes fell on the giant flower bud, cracking noises were already echoing inside it. Clusters of crimson and emerald-green spores were spurting out like mist.

"This is... the aura of the Apocalyptic Beasts!"

Meng Chao's pupils constricted into two slightly quivering light spots.

He had smelled similar auras before.

In the depths of the nest of the monsters, in the crystal clusters that gave birth to the ultimate Apocalyptic Beasts, on the undeveloped remains of the ultimate Apocalyptic Beasts.

However, the aura in front of him was a hundred times more intense than that of the immature bodies that were not born yet.

It was so intense that it did not look like any Apocalyptic Beast that humans had ever seen.

Instead, it was the combination of all the Apocalyptic Beasts.

It was an existence that could be compared to the ancient beasts that had once charged toward the orbital space station of the Ancients in the ancient era.

Meng Chao instantly realized something.

It was not that he had escaped from the mudslide and escaped to the shore.

It was the mysterious force hidden in the debris flow that had brought him to this "mini forest" that was a hundred times scarier than the debris flow!

He wanted to jump back into the debris flow.

As soon as he exerted force on his hands and feet, the soil beneath him became as soft as quicksand, sinking him deep into it.

Hundreds of seemingly slender and feeble green seedlings crawled out of the "quicksand" near his hands and feet. They grew crazily at a speed visible to the naked eye, wrapping around his limbs in an instant.

The green seedlings were covered in sharp sawteeth and sharp thorns that could not be seen with the naked eye. They were deeply embedded in his flesh and blood, sucking his blood and spirit energy quickly. Stimulated by his flesh and blood, they kept expanding and were about to be embedded into his body.

Meng Chao struggled desperately, but the more he struggled, the more excited the green seedlings became.

After much difficulty, four streams of scorching spirit flames were condensed and burnt the green seedlings that were wrapping around his limbs.

The enormous flower bud in front of them had already exploded in a series of crackling sounds like firecrackers.

Its shell had been split into eight petals.

Each petal carried a pattern that was even more gorgeous than the wings of the ghost eye golden-winged flame bug. It spread out and covered the entire miniature forest.

The petals were as thin as the wings of a cicada. They were crystal-clear and soft as if they were boneless, covering the entire miniature forest with a layer of mysterious gauze.

It made the green tide, the blood-patterned flowers, and all the etherealized plants appear even more devilish, mysterious, and gorgeous.

The color was so intense that it could not be described with words. It was simply like a 'extraterrestrial demonic flower' that flew from the depths of the universe on a meteorite.

In the middle of the blossoming extraterrestrial demonic flower, Lu Siya seemed to have just woken up from a long hibernation. She leaned lazily on the throne made of the interwoven pistils of the fluorescent flowers. She rested her chin on one hand and pondered quietly.

Then, she yawned slightly.

Then, she stretched herself comfortably.

Then, she stood up from the center of the extraterrestrial demonic flower calmly.

She narrowed her eyes and allowed the storm and Rolling Thunder to hit her face and body hard. She felt and enjoyed the brand-new world to her heart's content. The corners of her mouth curled up into a satisfied smile.

In the end, she glanced at Meng Chao with a half-smile.

Meng Chao's heart instantly froze and shattered.

This was not the Lu Siya he knew.

The "Sister Ya" in front of him had even longer green hair. It was like a green waterfall that poured all the way to her feet, covering all the vital parts of her body and condensing into something between a flexible combat suit and a rigid armor.

It not only provided a powerful defense and combat enhancement.

It also outlined her already undulating figure, which was even more soul-stirring.

Moreover, these things, which were unknown whether they were hair, armor, or weapons, seemed to have their own lives.

With Lu Siya's every frown, smile, and breath, her long green hair was also moving and growing in a strange rhythm. It went around her tall chest, her soft waist, and her round crotch, it went around her muscular legs, her delicate ankles, her almost perfect arches, and her ten toes. It went into the ground under her feet, and the Green Tide, red flowers, vines, etherealized plants... the entire mini forest... it all blended together perfectly.

One could not help but have a terrifying thought—"Lu Siya" and the entire mini forest were her "complete body!"

Chapter 880: Rebirth in Blood

In her long, green hair, there were some colorful flowers, spores, and little mushroom-like creatures growing out. They were reminiscent of small and exquisite headdresses.

At that moment, Lu Siya resembled the incarnation of a forest more than the elven queen in Meng Chao's memories from his previous life.

However, under the long green hair, her red blood-red eyes diluted the tranquility and peace that the jungle should have, leaving only natural selection and the cruelty of the law of the jungle.

Even so, her blood-red eyes were not like the red eyes of many monsters. The pupils and whites of her eyes merged together and turned into a turbid and brutal scarlet.

They resembled crystal balls that had been carved by the sacred hands of a master after decades of hard work and sacrifice. They were red crystals with over a hundred different layers of textures and lusters that nested together. Plus, they constantly emitted a lively and profound light.

It was as if her eyeballs could exchange astronomical information with Meng Chao with just a glance..

There were also strands of mysterious and complicated blood-colored spirit tattoos around the corners of her blood-red eyes. They did not have the slightest sense of terror and brutality. Instead, they were like very special moles of tears, which instead increased the owner's soul-stirring and unique demonic beauty.

The most fatal thing was her temperament.

In the past, although Lu Siya had been very strong and an outstanding figure among the third generation of Dragon City's wealthy families...

Compared with her father, "Gray Fox" Lu Fanghui, who was the backbone of the second generation, she remained lacking in some aspects.

Not to mention, she was still far from being qualified in comparison to Battle God Lei Zongchao and her grandfather, Lu Zhongqi, who were the strongest of the first generation powerhouses in Dragon City.

Knowing this, Lu Siya could not help but burn with ambition. She had worked harder and harder to cultivate.

However, "haste makes waste." While her strength and influence had advanced rapidly, she would inevitably attract a lot of enemies and leave a lot of hidden dangers.

In a word, her ambition was greater than her ability.

Sometimes, she would be impatient and even become the captive of her ambition.

The nickname, "Queen Bee" was both a recognition of her past efforts and a hindrance to her future development.

Before him, Lu Siya's impetuous and sharp-edged aggressiveness, as well as impatient desire for victory, which Meng Chao was once very familiar with, vanished into thin air.

It was as if Lu Siya had gone through thousands of years of baptism, washing away the pungent smoke and fire all over her body.

She became calm and at ease.

However, as long as one saw her shining blood-red eyes, one would realize that she had not really given up all her ambitions.

On the contrary, her ambitions were a hundred times more inflated than they were in the past.

At that moment, Lu Siya had become more confident than Meng Chao...

Confident that sooner or later, the entire world would belong to her.

No power could stop her footsteps.

If that was the case, what was the point of being so aggressive?

The cat had already caught the mouse and was lazily playing with it. It did not need to show any further "aggressiveness."

Therefore, although Meng Chao was very close to her...

Lu Siya did not immediately rush forth to "play" with him.

Instead, she turned her face and looked at the edge of the mini jungle with interest. There was a slightly raised mound of soil.

She stared at it intently, as though she was an expert in plants and animals who had discovered a brand-new species.

Meng Chao, on the other hand, was enveloped by an almost solidified power. Even if he tried to move his toes by a millimeter, he would feel a piercing pain.

He could only gasp for breath and use his contribution points as fast as he could to repair his body, accumulate strength, and prepare a new trump card.

At the same time, he followed Lu Siya's gaze and observed the mound, trying to find out what it was that interested her so much.

The mound seemed ordinary.

It was covered in a large amount of soil that had been washed away by the flood. After the continuous heavy rain, it had turned into smelly mud a long time ago.

Lu Siya raised her eyebrows.

Immediately, dozens of green sprouts drilled out from around the mound.

Like dozens of tiny mechanical arms, they used the most delicate techniques to dig up the mud that covered the mound.

It was then that Meng Chao clearly saw that the so-called “mound” was actually the remains of snakes, insects, rats, and ants.

Although humans had occupied the Hidden Mist Domain and killed and captured most of the monsters, it was impossible for them to completely destroy the monsters.

It was also obviously impossible for them to entirely destroy small beasts such as snakes, insects, rats, and ants. Besides, they should not be completely wiped out either. Otherwise, it would affect the ecological balance of the Hidden Mist Domain and even the entire Monster Mountain Range.

That was especially so when dense mist shrouded the place all year round, and the spirit magnetic field was chaotic. It was difficult for drones to fly there, and it was also tough for mechanized troops to launch large-scale operations on Mist Mountain. There were still a large number of small and weak snakes, insects, rats, and ants that did not pose a threat to humans but were good at burrowing.

They had temporarily escaped the pursuit of humans.

However, they could not escape the devastating disaster brought about by the torrential rain and the flash flood.

The nests of many snakes, insects, rats, and ants had been destroyed. They had also been swept away by the flood and mud flow, torn apart by the rapid current and the gravel in the mud, and their remains were scattered everywhere.

This was the lowest place on the mountainside.

A few days ago, there had been a flood or a few waves that had hit the place, bringing with it a large number of snake, insect, rat, and ant carcasses.

Meng Chao estimated that there were at least a hundred snake, insect, rat, and ant carcasses there.

However, because all the carcasses were in pieces, their rotten, black, twisted, and severely rotten limbs were all fused together.

Even if he activated his super vision, he could not count how many carcasses there were.

He did not understand why Lu Siya was so interested in the carcasses that could be seen everywhere.

Lu Siya studied them attentively for a long time.

Like an overly curious child, she squatted down and leaned over to look.

Then, a tuft of long green hair curled up on her head and reached for the pile of carcasses.

As her hair extended, the outer layer of green peeled off, revealing the thin blood-red core inside.

It turned out that her hair was not green, but blood-red.

The green part was just a strange cell that wrapped around it and had the characteristics of both plants and animals—the Green Tide.

Hundreds of long blood-red strands pierced deeply into the mud on the ground and then into the rotten pile of carcasses, entangling every broken snake, insect, rat, and ant.

With a flick of her finger, Lu Siya's long red hair broke into pieces.

As if they had independent life, they all crawled into the snake, insect, rat, and ant carcasses.

Then, a horrifying scene played out!

The carcasses, which had been dead for several days and smashed into pieces by the flood, were highly decomposed. Yet, they seemed to be injected with a brand new life force by Lu Siya. Supported by the red threads that looked like blood veins, they swayed and stood up one after another!

The broken limbs of different snake, insect, rat, and ant species were pieced together, like toys carefully made by a master of horror.

Wisps of scarlet blood shot out from the joints of the stitched monsters and the holes where their facial features should have been. It looked like balls of demonic flames were burning on their bodies.

They waved their deformed blade limbs and danced wildly, enjoying their brand-new life.

They formed a circle around Lu Siya and worshiped her as if they were saluting their creator and ruler with the highest respect.

Lu Siya's face was filled with joy and relief.

She reached out and picked up a spider with a mouse head and a scorpion tail from the mud. She stared at it for a long time, like a naughty child admiring her first carefully polished toy.

Then, she carefully placed the monster back into the group of dancing monsters.

Suddenly, something strange happened.

The monster that had just been put back was suddenly attacked by the other monsters.

After it was torn into pieces, its attackers suffered the same fate.

All the undead creatures that Lu Siya had just resurrected began to kill each other in the cruelest manner!

The battle between the undead creatures was a hundred times crueler, uglier, and more terrifying than the fierce battle between humans and monsters.

The bodies of these stitched monsters contained large amounts of Blood Flower spores, and they all had the ability to drain the last bit of their vitality, split cells, as well as quickly heal themselves.

Their self-slaughter was like a spectacular battle between the undead, who had already died once or even countless times in the deepest parts of hell.

Lu Siya watched with great interest.

Dozens of undead creatures fought until only one was left.

In the end, the winner treated all the carcasses of the losers as trophies and dragged them to the deepest part of the mini jungle.

The sound of biting could be heard from the depths of the jungle.

Lu Siya was finally satisfied. She clapped lightly for the winner and stood up.

She had squatted for too long and stood up too fiercely. It was as if the wound on her shoulder had been pulled.

The long and narrow wound left by Meng Chao's powerful chop was still in her right shoulder.

Even though his blade had not been able to completely cut away the mysterious power lurking in Lu Siya's right arm...

The destructive power contained in the blade's glow, which originated from Meng Chao, was still deeply embedded in her bone. It kept disrupting Lu Siya, preventing her wound from healing for a long while.

Lu Siya frowned slightly in pain.

She turned her head and glared at Meng Chao as she complained to him, "It hurts!"

She was complaining.

Yet, there was no anger or hatred on her face.

Red threads that looked like Blood Flower spores burrowed out of her wound and pulled the two sides of the wound together like surgical sutures.

The armor that was as thin as cicada's wings, which was made of long green hair on her chest, also moved over and covered the wound perfectly.

Meng Chao looked at Lu Siya's shoulder and chest.

He swallowed hard.

He wanted to run away.

But his two legs were nailed to the dangerous mud like nails.

"Why are you trying to run?"

Lu Siya smiled like a man-eating flower. Her blood-red eyes shone as she said, "I don't blame you. On the contrary, I admire you more and more!"

"When you realized that something was wrong with me, you made a prompt decision and tried to kill me without hesitation. You didn't dither at all."

“Such ruthless methods and decisive temperament don’t make you look like a younger brother in his early twenties.

“As expected of the one and only genetic inheritance partner, whom I’ve personally selected!”
