

I Have 108 Older Sisters #Chapter 651 – 700

Read I Have 108 Older Sisters Chapter 651

?Chapter 651 – Chapter 650 Was His Idol

When Yu Tian heard this, he frowned and asked coldly, "Why does it give me the feeling? Why is my whatever family so chaotic? Everyone wants to be the boss. Do they have the ability or not?"

Uncle Long shook his head helplessly and explained, "Who says so? But this is inevitable now. After all, your father is not very good at managing the family."

"Moreover, your father's personality is quite violent. If anyone is not convinced, he will use his fists to talk to others. Many people in the family have been beaten and crippled by him, so hatred points will naturally be generateda€|"

"With hatred points, those people will be unhappy with your father and want to kick him out of the family all day long. Therefore, your father is under a lot of pressure now, and what you can do nowa€|"

"Is to try your best to become the strongest. When you return to the family one day, you can help your father suppress those traitors in the family!"

Although Yu Tian didn't say anything, he was really disdainful in his heart.

The family was the family, and he was himself. He had never thought of doing anything for the family. He had given them all the children he had. What else did he want from him?

Could it be that they would only be happy if he risked his life?

His own fate was his own, and no one could control him. That was what he thought.

He still did not understand this world. As for the cultivation world, it was still a distant topic. It was too early to talk about it.

At this moment, Chu Aotian came before the two of them and said with a smile, "The food is ready. Please take a seat!"

During the meal apart from Aotian, he toasted Yu Tian and drank a few glasses of wine. Then, he said seriously, "Master, although it's inappropriate for me to say this now, I have to saya€|"

"The Qian family in the capital seems to have been targeting you recently, The head of the Qian family has even established an intelligence gathering organization to collect information on you"

"I don't know where to start on this point. After all, the Qian family has a certain amount of power in the capital, and their projects are also deeply rooted,

"I've tried to shake them, but they all failed in the end. Their financial system is also very powerful. After all this is a city society, and money still plays a leading role!

If it wasn't for Chu Aotian's words, Yu Tian would have already forgotten that there was still a Qian family, but he didn't have the time to pay attention to him now.

Thus, he said indifferently, don't care about them at all, but I'm going to look for something now. I don't have the time to pay attention to them. You just have to keep an eye on them for me."

"As for the information they want to collect, let them collect it. The information I'm releasing to the public is known to the whole world, and I don't want them to know about it."

"No matter how powerful their intelligence agency is, it's impossible for them to get my information. So, there's nothing to care about. Just let them be cocky over there!

Speaking up to this point, Yu Tian looked at the time and stood up, saying, "Alright, I Won

i

t drink here with you two old farts. I'm going to do something else now. You two drink here by yourselves!"

Yu Tian did not say any more nonsense. With the two of them sending him off, he opened the portal and went straight to the airport on Flower Rain Island.

Jack had been waiting here for a long time. However, when he saw Yu Tian not walking out of the airport but walking over from outside, he was a little dumbfounded on the spot

Even so, to be able to meet his idol, Jack was especially excited as he said, "Hello, Mr. Yu. I've finally met you in person. You Don't even know how much I admire you"

"In my house, on my wall, in the kitchen, and in the bathroom, there are all your portraits. Every time see you, there's a special surge of power in my body!

Yu Tian saw this guy chattering non-stop and said impatiently, "If you admire me, then worship me. How can you stick my portrait in the toilet? Is there something wrong with you?"

"Also, this time when you went to explore the island with me, it was barely enough for me. Usually, I like to be a hoodlum by myself and never like to bring others around,

"So this time when you're by my side, try to speak less and work more. Do whatever I tell you to do. Otherwise, I can make you get lost anytime, anywhere,

"Do you understand what I mean?"

Jack immediately pointed at his mouth and smiled, "There's absolutely no problem. It's my honor to be able to follow you. I'll listen to whatever you say on this expedition!

Yu Tian was very satisfied. He nodded and ordered, "If we go on an expedition, do we need to prepare some equipment? Also, is the Island I'm looking for still in a position that you can find?"

In fact, Jack had already prepared all of this. He smiled and explained, "Actually, you don't have to worry about anything. According to my previous exploration experience, I've already prepared everything that we should take,

"Moreover, I've also seen that island before you came. He's still in that position. Although he would drift a distance away every day, it

i

s not far. We can reach the edge of the island at any time and place,

"But whether we can enter the island or not, I don't have any confidence at all.

Everything depends on you! "

Yu Tian looked down at the time and said, "Then let's set off now!

"Okay, please follow me. I've already prepared the yacht. This will definitely be a very happy trip! "

Under Jack's lead, the two of them quickly arrived in front of the yacht.

Yu Tian looked up. Although the yacht was not big, it felt alright. After all, he was here to explore and not to go out to play: It was already very good to have such a yacht.

Although the yacht was not very big, the items that Jack had prepared were very complete. Other than some survival equipment in the wild, there was also most of the food, medicine, tents, and so on.

At this time Jack had already started the yacht. When a long line of water appeared, the yacht slowly sailed into the depths of the ocean.

It was rare to be able to sit on the yacht and look at the beautiful scenery around him. Yu Tian also felt very comfortable.

Originally, he wanted to use the teleportation device to directly teleport to the island, but Jack was unable to provide the exact coordinates,

Even if he had the coordinates, he could not use the teleportation easily.

Because Jack had said that there seemed to be a barrier around the island. If the teleportation door could not pass through that barrier, it was very likely that it would trap him in space..

?Chapter 652 – Chapter 651, Turn The Boat Around

The yacht was moving quickly in the rippling ocean.

Jack picked up a can of ice-cold beer and handed it to Yu Tian. He smiled and said, "Mr. Yu Tian, because this island suddenly appeared here, many scientists have their eyes on this island,

"The last time I came to see this island, there were many yachts and even warships around. It doesn't seem easy for us to get close to this island!"

Yu Tian drank a mouthful of beer and smiled indifferently.

This was too normal. For any country, the sudden appearance of hundreds of thousands of square kilometers of islands within their territory was a huge fortune.

Any country would want to take it for themselves, and the scientists would naturally feel strange about the sudden appearance of this island and study it.

However, no one could stop him from going to the place he wanted to go.

He said indifferently, "You only need to be near the Island I'm going to. You Don't need to care about anything else. Then, you follow behind me,

"No matter what strange things you see, don

I

t be scared. You're just following me, so I have no reason to protect you. If your life isn't strong enough and you die on that island..,

"Then this yacht is mine! "

Jack didn't care. Instead, he laughed. He thought that Yu Tian was joking with him. It was just an island.

He had explored countless islands before and this nameless island was just a little more mysterious than the other islands. Actually, thinking about it, there shouldn't be too many strange things.

Therefore, he said confidently, "Actually, I've explored many islands. On other islands, I've even seen cannibals, as well as many aborigines who still don't fit in with the current society,

"However, they are usually very friendly. As long as you give them some food, they will treat you as their most honorable guest,

"They will even give you some girls in the evening for you to enjoy. This is why I like exploring these mysterious islands. It's really exciting!

Yu Tian did not want to waste time with him. What exactly was on this island? No one knew now* Moreover, he had been able to drift on the sea for so many years, but no one had been able to land on the island.

In that case, this island was not only mysterious, but also very dangerous.

If it was really the island that he had found that often had spaceships, then what was on that spaceship? It was still unknown.

In short, it was better to be careful. You had not found a way to solve the problem of mechanization, and if you died here, it would not be worth it.

In the evening, the setting sun shone on the undulating sea surface, forming a beautiful fiery red. The scenery was particularly charming.

Yu Tian felt that the scenery at this moment was really particularly good. He couldn't help but take a few photos with his phone.

This was because such a scenery couldn't be encountered at any time. If it wasn't for the exploration of the island this time, he might not have seen such a scenery.

Jack looked at the radar coordinates on the yacht and said in a low voice, "We are almost there. After walking another two nautical miles, we will be able to see that island!

At this moment, the radio on the yacht suddenly rang. Someone reminded them, "You have entered our restricted area. Please tell us your identities and stop moving forward immediately! "

Jack picked up the radio and said indifferently, "We are just ordinary tourists who came here to sail. We don't know that this is a restricted area. May I ask who you are?"

Before he finished his words, Yu Tian saw a warship vaguely appear in front of him and was heading towards the yacht.

Jack cursed in frustration.

"Damn it. They actually made this place a restricted area and even let the warship watch the door. What should we do now?"

Yu Tian was disdainful and said calmly "Slow down first and wait for them to come over!"

The yacht quickly approached the battleship, and the defenders on the battleship raised their weapons on high alert and pointed them at Jack and Yu

Tian on the Ship,

Jack hurriedly shouted, "We are just ordinary tourists. We Are Here to inspect the island in front of us. We don't carry any weapons!

At this time, a middle-aged man stood at the side of the ship and coldly said, "This place has become a restricted area. No one is allowed to get close to it.

Immediately turn the ship around and leave this areal

At this point Jack turned around and whispered to Yu Tian, "Now we can only turn the ship around first. Otherwise, these guys will really open fire!

Yu Tian glared at him with disdain and said arrogantly, "Who said I want to turn the ship around? I think that warship is more suitable for me. You stay here and don't move! "

After saying this, Yu Tian walked out of the cabin, he smiled indifferently and said, "You see, we are just ordinary tourists. Moreover, the fuel of our yacht is almost used up. At first, we thought that we could be rescued on that small island, now that we've met you guys, can you provide us with some fuel?"

The middle-aged man felt that this was acceptable, so he nodded and said,

"That's not a problem. Turn off the engine of the yacht!"

Jack immediately turned off the engine, and a spiral staircase was placed on the battleship.

Following that, a few defenders carried two large barrels of fuel and arrived on the yacht.

At this moment, Yu Tian punched and kicked the defenders into the sea.

The people on the warship immediately raised their weapons and were about to open fire. At this moment, Yu Tian had already arrived on the deck of the yacht.

His speed was as fast as lightning. Before these defenders could react, Yu Tian had already grabbed the middle-aged man in his hand.

The middle-aged man looked at Yu Tian in horror and said while grimacing, "What are you trying to do? This is a battleship. Do you want to rob a battleship?"

Yu Tian chuckled and said arrogantly, "You're right. I want to rob this battleship, but I don't

care

about the things on it. You just need to send me to that island."

"Then everyone on this battleship can live. Otherwise, this battleship will become a ghost ship!"

The middle-aged man said nervously, "It

is

impossible. Up until now, no one has been able to log onto that island.. Scientists are unable to unlock the mysterious barrier outside the island, so you'd better give up! "

Chapter 653 – : Chapter 652, The Nameless Island

There was nothing more to say to them. Yu Tian said straightforwardly, "Can we land on the island? You Don't need to care about that. You just need to send me to the surroundings of that island. That will do."

"It's best if you don't play those tricks with me. Otherwise, you'll be the first to die!"

The middle-aged man hurriedly nodded. He was completely frightened by the killing intent in Yu Tian's eyes. He immediately ordered his subordinates, "What are you still standing here and looking at? Immediately return to your positions!"

"We'll call for the ship to turn around and head to the Nameless Island!"

At this moment, Jack, who had also climbed onto the ship, saw that Yu Tian was pinching the middle-aged commander in his hands. He was so frightened that he almost lost his soul on the spot.

Yu Tian was a little too fierce. If he wasn't used to it, he would just fight. This was a battleship. He could actually rob an entire battleship by himself. No one would believe it if it was said.

However, doing so was very exciting. Jack also snatched a weapon, he shouted at the defenses, "Now that we have weapons, it's best if you don't fight US head-on. Now, immediately do as my boss says!

The middle-aged commander said helplessly, "Now, I have already done as you say. We are still five nautical miles away from that small island. We will reach it very soon. I hope you can keep your word!

Yu Tian was too lazy to talk to him. He pulled him directly into the cockpit.

With the battleship moving at full speed, the distance of five nautical miles was reached in the blink of an eye.

At this moment, Yu Tian also saw the mysterious island in front of him

What made Yu Tian feel particularly strange was that the closer he was to the island, the hotter the mechanical legs below the knees became, as if they could sense something.

But the more it was like that, the more sure Yu Tian was that the island was the one he was looking for.

Otherwise, his mechanical feet wouldn't have been able to sense it.

The two warships around them didn't notice them at all because they were all on the same side. They thought that the warship was cruising.

At this moment, the commander said, "This is all we can do. If we go any further it will be that barrier. We tried to attack it with cannonballs, but we couldn't break it, if we go any further, this warship will sink. I hope you will keep your word. Leave Now! "

Yu Tian nodded and said coldly, Listen well I can easily board this warship. I can come back anytime, anywhere,

if you dare to play tricks on me, I will still let you all die here. If you forget all this, then it will be as if it never happened!"

The commander nodded his head in fear. Even if Yu Tian didn't say anything, he would still do it.

Because no one would believe that a person could come in front of him in the blink of an eye and strangle him. No one would believe it.

Then just like what he said, just pretend that it never happened. This way, he wouldn't embarrass himself.

Even if he were to leave this place, he would not be able to enter this island. When the time came, he would naturally leave.

At this moment, Yu Tian and Jack had already returned to the yacht.

Yu Tian ordered very confidently, "Now drive at full power and move forward to the front of the island! "

Jack shook his head and said hesitantly, "Are you crazy? You Don't even have the guts to charge forward. This is just a yacht. Do you really think that I will be that hard?"

Yu Tian was speechless when he saw her hesitation.

He pushed the horsepower to the maximum and the yacht suddenly accelerated and crashed into the invisible barrier.

Jack thought that Yu Tian had gone crazy and was so scared that he covered his head and lay on the ground.

However, when the yacht touched the barrier, the barrier actually flashed with a blinding light and let the entire yacht pass through safely.

Jack, who had been waiting for the yacht to explode not only did it not explode as he had imagined, it even entered the barrier. This made him scream in shock and excitement.

The commander who saw this scene as well as the scientists who were studying the barrier were all stunned by this scene.

"How did he do it? who was the person on the yacht at that time? How did he pass through this barrier?"

"Am I seeing things? The yacht really passed through the barrier at that time, but we have no idea at all! "

"How did he do it? This is simply too shocking!

For a moment, all kinds of shock were everywhere. However, Yu Tian did not know about their shock.

After Yutai passed through the barrier the barrier automatically recovered. It was as if an open door had been closed again.

Jack asked excitedly, "Yu Tian how did you do it? This is simply amazing!"

Yu Tian smiled coldly and said disdainfully, "I've already told you that you only need to listen to me. Do you still have any hesitation now?"

"There's no hesitation at all. In the future, I'll believe whatever you say. Even if you want me to cut off my pants, I'll do it!

As they spoke! the yacht had already arrived near the beach.

In order to prevent the yacht from grounding, the two of them chose to walk to the island.

Perhaps because of the barrier, the air on the island was very good. It felt like a fairyland.

Yu Tian took a deep breath. His entire body felt extremely comfortable.

While Jack was tidying up his equipment, Yu Tian first looked at the surrounding terrain. Then he turned on the chip in his mind to confirm his coordinates.

However, what surprised Yu Tian was that there was no signal on this island. It was as if it was deliberately blocked.

However; this was not a big deal. He was already standing on this island. All he needed to do now was to reach the sinkhole.

Fortunately, Jack had a map in his hand

He said proudly "This map was drawn by my memory when I was parachuting.

Although there are some differences, there shouldn't be too big of a difference,

"The Sky You're looking for is in the middle of the island. However, there might be some problems with the magnetic field here. My compass has completely lost its function. We can only rely on our senses and the position of the sunlight .., "To determine the direction!"

This was nothing: They could all know the direction based on the Big Dipper in the sky.

Moreover they were walking towards the middle of the island. It was not too much of a problem whether they had a direction or not.

What they needed to pay attention to now was whether there were other life forms on this island?

For example, monsters or other humans.

After all this was an island that had been purified for tens of thousands of years. What exactly was there? We don't know yet..

?Chapter 654 – Chapter 653, The Monster Approached

At this moment, Jack had already prepared all the equipment he needed. Yu Tian gave it a simple look.

These equipment were prepared in a very comprehensive manner. Not only was there food, but there were also many equipment necessary for survival in the wild.

He originally thought that he wouldn't need to stay here for long. However, from the looks of it, he would have to stay on this island for a few days.

The reason was simple. This island was bigger than he had imagined, and the forest in front of him looked mysterious. What kind of danger was there? He didn't know yet.

But according to his speculation, there must be some monsters in this forest.

Because he had seen many such things in the murals of the temple, such as the spaceship.

If this island was really the one he was looking for, then the spaceship that crashed tens of thousands of years ago must also be on this path.

If the fuel on the spaceship or other radioactive things leaked out, it could possibly pollute the creatures on the island and affect their entire evolution process.

Moreover, the barrier around the island was probably set up by the spaceship to prevent people from approaching the spaceship.

Therefore, from the looks of it, when the spaceship crashed, there was still life, and this life had probably survived on the island.

On this island, everything had to be done carefully.

After all, what he was exploring now was an unknown civilization. How destructive would it be? Everything was unknown.

After a simple rest, Jack tied the rope of the yacht to a tree.

This was their guarantee to leave the island. No matter what, they could not let anything happen to the yacht. Otherwise they might be stuck on the island for the rest of their lives.

Because of the barrier, they were still at least 10 nautical miles away from the island. Under careful observation, there were many sharks in the sea around the island.

If the yacht was damaged, it would be impossible to swim away from here.

Jack gave Yu Tian a woodcutter, which could be used to open a path.

This preparation was still possible. After all, it was not easy to walk in the Deep Mountains and forests.

The two of them walked around and soon arrived at the depths of the dense forest.

Jack calculated the distance briefly. Although he felt that he was walking very fast) he was only less than five kilometers away from the beach. Moreover, the sky was completely dark now, from time to time, there would be some mysterious animal cries coming from the surroundings.

Yu Tian cut off a few tree branches. He also felt that it was not the best choice to continue walking now.

He first looked left and right and found that there should be an empty space in front of him, so he said calmly, "Let's go to the front to camp. We Won't leave tonight. We'll set off when the sun rises!"

This was Yu Tian's first time camping in the wild. The chip could not connect to the internet, so it could not provide him with some general knowledge about camping in the wild. So now, he could only rely on Jack:

Jack indeed had a lot of experience in the wild. It was especially easy for him to set up a tent and build a bonfire.

Canned food was also the best food at this time. Jack opened the can again and handed it to Yu Tian. He smiled guiltily and said, "You must have never eaten such food before, right?"

However, these canned food were not bad. I used to camp outside often, and these canned food could ensure my body's needs You can try them too. I have prepared a lot, enough for our trip! "

Yu Tian did not care about these things. This was the wilderness. It was already good enough to have canned food to fill his stomach. What else was there to be picky about?

It could also be the smell of canned food. It was too fragrant. Coupled with the glow of the bonfire, Yu Tian was eating when he suddenly felt some faint footsteps around him.

However, these footsteps were definitely not made by humans. They were more like the cautious footsteps of wild beasts slowly approaching their prey.

Jack did not hear this sound at all. Instead, he smiled at Yu Tian and saidt "As long as we have a bonfire, we will be safe at night. This is because those wild beasts and animals are very afraid of the light of the fire,

"As long as we can ensure that the fire does not go out before dawn, we will be able to sleep safely until tomorrow morning. I have already prepared enough firewood and set a time. You Don't have to care about the resta€|"

"You can go to sleep in a while. Leave the rest to me!"

Yu Tian just smiled indifferently and said,

il

I want to sleep too, Look at this tent. It is so comfortable. It must be very enjoyable to sleep in it. However, it seems that we are surrounded by something nowa€|

"

"If you want to sleep well, you have to solve these things first!

As soon as he finished speaking, the customer became nervous. He hurriedly held his weapon in his hand and looked at the world cautiously and nervously. However, there was nothing around him.

He even asked curiously, "Is there really something around us? Why didn't I find anything?"

Yu Tian couldn't be bothered to explain so much to him. With his hearing, he couldn't even hear his own words clearly sometimes. He could even hear the faint footsteps. It was simply a joke.

The faint footsteps were getting closer and closer to them.

At that moment, Yu Tian slowly got up. The more he did soy the more frightened Jack became. His palms were covered in cold sweat.

Seeing how frightened he was, Yu Tian felt that it was laughable, so he ordered, "Don't stay here. If you know how to climb a tree, go to the tree.

Leave this to me, I Can't sleep anyway€|"

"I really want to have some monsters to play with me!

Jack shook his head and said fearfully,

"

How can I climb up the tree by myself and let you face the danger alone? No matter what wild beasts come near, I will definitely kill them all!"

Yu Tian did not want to waste time with him. If he wanted to stay, then so be it. If he was really eaten by the beasts! then he could only blame his bad luck. It had nothing to do with him.

At this moment, the surrounding trees suddenly moved followed by several angry growls.

The growls sounded particularly sad+ It was very much like a wolf's howl, but there was still some difference between it and a wolf's Howl. It sounded like the wailing of ghosts and howls of wolves.

Yu Tian felt that it was especially interesting. He looked around excitedly, but Jack's legs were already trembling. He couldn't even hold his weapon.

He could only say to Yu Tian guiltily, "I think it's safer to be on the tree I'll leave this place to you€| I'll go up the tree to provide cover for you!

?Chapter 655 – Chapter 654, Man Or God

Jack climbed up the tree as fast as he could. He thought it would be safe, but he was completely wrong.

Before he could stand still, there was a whooshing sound behind him. A black thing jumped onto his back.

Jack was shocked. He slipped and fell under the tree.

When Lin Chu heard the sound, he turned around and was shocked.

Under the moonlight and the light from the bonfire, there was a robot dog standing on the tree branch.

To be precise, the robot dog was twice the size of a normal dog. The parts on its body made cracking sounds from time to time, and its metallic body gave off a cold glow from time to time.

At this moment, Jack, who was grimacing in pain from the fall, looked back and was so scared that he spat out saliva. He raised his weapon and fired.

However, the robot dog was not afraid of this at all. Instead, it jumped on Jack's body and let out a low growl.

Jack wanted to continue firing, but the robot dog bit off his weapon in one bite. Then, it bit on Jack's shoulder and threw Jack out.

When Yu Tian saw this, he was about to make a move, but more than ten robot dogs jumped out from all directions. Each robot dog had blood-red eyes and was staring at Yu Tian,

It was like a group of wild beasts staring at their prey.

However, Yu Tian was very clear that these robot dogs were already mechanized animals. They couldn't have a bloody sense of slaughter. They were just receiving some orders and attacking these outsiders, to protect their own territory.

When the robot dog attacked Jack previously, it was already very clear.

At this moment, one of the robot dogs, which was the largest and had black metal on its body, suddenly roared at Yu Tian-

All the robot dogs attacked Yu Tian at this moment. Their speed was extremely fast; and their attacks were especially fierce.

Yu Tian dodged the attacks of the two robot dogs. After they attacked, they raised their fists and directly smashed one of the robot dogs into pieces.

When the other robot dogs saw this scene, they became even more violent and charged at Yu Tian without caring about anything else.

They were just a group of robot dogs, yet they still dared to be arrogant with him. They were truly reckless.

Thinking of this, Yu Tian immediately unleashed his strength. He did not show any mercy as he crushed every single one of them. In an instant, more than ten robot dogs had turned into a pile of parts.

As for the black robot dog, it did not have any intention of retreating. Instead it charged towards Yu Tian furiously.

Yu Tian was still afraid that he would not fight with him anymore. Other robot dogs were all white, but it was black. From the looks of it this robot dog's strength should be much stronger than other dogs.

However, after coming into contact with it, Yu Tian realized that his thoughts were completely wrong. This black robot dog was only slightly larger in size, and its strength was no different from other robot dogs.

Yu Tian even let it casually bite his arm. With his current physical strength, this robot dog would not be able to hurt him at all.

Even with his sharp teeth, there wasn't even a mark on his skin.

Yu Tian even said like he was training a dog, "You bastard, is that all you have?"

Bite Harder!"

The robot dog felt strange and didn't know what to do.

Yu Tian didn't want to waste any more time with him. He raised his leg and kicked the robot dog into pieces.

The whole process shocked Jack, who was lying on the side.

Those robot dogs were really smashed into pieces by Yu Tian like he was hitting a dog.

The robot dogs couldn't even hurt Yu Tian's skin. Then, was this Yu Tian also a robot?

This was simply too amazing. No Wonder Yu Tian became the most powerful person in the world. With this set of dog-beating skills, he didn't deserve his reputation.

Yu Tian came in front of him and asked indifferently, "How do you feel?" Jack lowered his head to look at his bleeding shoulder. He tried to move his arm and said with a grimace, "It's just a superficial wound. It didn't hurt my bones and tendons. I'll go apply some medicine and it'll be fine!"

Doing that was simply a waste of time, Yu Tian directly took out a golden needle and inserted it into several acupuncture points on Jack's body.

In less than five minutes, the wound on Jack's shoulder healed quickly.

This time, what shocked Jack even more was that he was dumbfounded. It took him a long time to ask.

"Are you a man or a God? How can there be so many incredible miracles on your body?"

Yu Tian just shook his head indifferently and said disdainfully, am who I am. Even if a god is in front of me, I will not change anything. Hurry up and tidy up the surrounding battlefield If I am not wrong..,

"There will be many robot-like monsters here. They will attack us at any

Jack looked around nervously and quickly held his weapons in his hands. However, thinking about it, these weapons could not deal with those robot-like monsters at all. They were quite heavy in his hands, therefore, he threw the weapons aside.

Then he asked curiously, "Why are there robot dogs here? These robot dogs are made with such precision. Is this island the research base of some organization?"

Yu Tian thought his idea was ridiculous and said with disdain, can't you think of something more likely? With the current technology of mankind, can they make such powerful robot dogs?"

"Are you saying that these robot dogs were created by aliens? Oh My God! That's impossible, right?"

"What's impossible about that? "Facing Jack's surprise, Yu Tian laughed and said, "What we humans know about this world is just a littlea€"

In front of nature, we humans could be said to be nothing, and the alien civilization had already known this world like the back of their hand many years ago. Compared to their technology..

we humans need at least thousands of years to evolve, or to catch up to their technological level. But then again, this is a world dominated by us humans.., no matter what alien civilization is here, their technology is to provide us with convenience. Even if there are aliens on this island, I will still kill them!

Jack hurriedly shook his head and said, "Why should we kill them? It would be great if we could bring them back for Research!

This idea was not bad, but was there an alien on this island? It was still unknown..

?Chapter 656 – Chapter 655 Was All About Humans

Fortunately, there were no more monsters attacking them.

Yu Tian did not care about that at all. If there were monsters attacking them, there was nothing to be afraid of.

Even if he slept there and let the monsters eat him, they would not hurt him. As for Jack, that would depend on his own life?

Therefore, when Yu Tian was sleeping, Jack was always looking around vigilantly. Any sound would scare him to the point that he broke out in a cold sweat.

Every time at this time, he only needed to take a look at Yu Tian who was sleeping soundly and he would quickly calm down.

At least with Yu Tian here, he wouldn't be in any danger.

While Yu Tian was sleeping soundly, the chip in his mind suddenly activated inexplicably, and it was even connected to an unknown network.

All kinds of strange data and symbols flooded into Yu Tian's mind, waking him up from his sleep. He even had a splitting headache.

Yu Tian had no idea what those symbols meant, and the chip was still connected to the unknown network. He couldn't cut it off even if he wanted to.

The more he connected to the network, the more Yu Tian felt his head hurt. In the end, he felt as if half of his head had exploded.

At this moment, a very dull voice sounded in Yu Tian

i

s mind.

"You're here to find the spaceship, right?"

Yu Tian clenched his teeth tightly and asked softly, "Who are you? How did you get into my chip?"

"I'm the owner of that spaceship. What you're hearing now is the voice I left in the spaceship. If you can open the spaceship, you can still see the image I left in the spaceship."

"But what I want to tell you is that you'd better not open that spaceship and let it sleep on this island forever. This is only good for you and the entire human world!"

Yu Tianguang sneered, rubbed his forehead and said, "Stop bullshitting me. I didn't come here for the sake of all human lives. I don't want to become a

"I'm just thinking for myself. I don't have that many pursuits!"

The stranger said, "That spaceship can't help you. As long as you step into the spaceship, your whole body will become a robot and the result is irreversible."

"If you become a robot, then the world you

i

re in will be reoccupied by the pirates and become their colonya€|"

Every human would become their slave. At that time, it would no longer matter if you were a human or not,

because after you became a robot, all your memories would be deleted. At that time, you would only become a warrior who listened to the pirates and slaughtered your own kind*

Moreover, your coordinates will be sent to the pirates again. At that time, the pirates will gather their strength and once again occupy this world. With their current technological level.. ,

"To destroy this earth is simply a piece of cake. Therefore, you must make a good choice Because I am only an image I can not completely stop you. I will only tell you everything I know!

Jack saw that Yu Tian seemed to be talking to himself, and he was instantly scared silly. He rushed to Yu Tian and asked worriedly, "Mr. Yu Tian, what happened to you? Did you have a nightmare?"

Yu Tian waved his finger at him, signaling him not to speak. He was now very clear-headed and had not become a lunatic. Moreover, he asked him to stay further away from him because there were some words that he did not want him to hear.

After confirming that Yu Tian was indeed very normal, Jack did not continue asking. Instead, he got up and walked towards the bonfire, pretending that he had not heard anything.

At this moment, Yu Tian asked again "What exactly do you want to say to me?

While I am still in the mood to listen, you better tell me everything you know. After that, I will choose whether or not to open that spaceship!

The stranger slowly said, "Actually, we are the humans of the future. We are also people who live in this world. After 27,000 years, the human resources have been completely exhausted

we have no choice but to explore new planets that are suitable for human survival. and the technology that we have developed, when we were on planet exploration, suddenly had a problem. We were the ones who opened the space-time channel, back to Earth 50,000 years ago, at that time, we were also very surprised, and we expanded and

stabilized this technology, and we tried to change the future of humanity by modifying the past of humanity,

but our thinking was completely wrong, because human nature is greedy and murderous, these things will never change, and in the future, not everyone wants to be able to change the existence of the entire human society,

many of these people revealed their ambitions at this time. For example, the pirates, they were the greatest enemy of US technologists,

they also mastered the technology of time travel, and used this technology to create countless robot soldiers for them. Then they used these robot soldiers to attack other planets, and plunder the resources of other planets,

and at this time, many civilizations came to Earth, and they tried to destroy Earth, but they were stopped by our technology,

who Am I? I can also tell you, I was also one of the pirates and even their commander, but when I realized that what I did could not change the future of Earth,

I gave up on that idea, and I wanted all the islands to be like me, and work fix the past, so that the future of the human race would not run out of resources,

but they thought I was a traitor, and they clashed with me, and during that time, I left some of the pirate technology on the planet,

i put these technologies in different temples. In facts I didn't want humans to discover these technologies, because after discovering these technologies, human progress would also change,

but today, I felt that after you came to this island, I discovered that these technologies originally belonged to humans. No matter how long it was, it was still human technology,

"The existence of these technologies will not bring any good development to humans. It will only accelerate the destruction of this world. Now that you have mastered this technology, you can even transplant chips into your brain,

"This speed is indeed beyond my imagination. But the faster the speed, the faster the destruction of the Earth will be. If you want to stop the destruction of the Earth, you have to give up these technologies.. Only then can you do it!

?Chapter 657 – Chapter 656, Aborigines

Even though he said that, he didn't agree to it for a day.

Was the earth going to be destroyed or not? He didn't care about that at all. What he wanted to do now was to make his legs look like normal people.

Therefore, Yu Tian didn't believe what this guy said at all.

So he asked, "If I become a robot to stop the destruction of the Earth, then I'm willing to let the world be destroyed. I've already seen it on the mural over there,

if I am fully mechanized, the pirates will still sense my presence, and they will open the door to the Earth again, and take over the world,

you are asking me to give up the technology and become a robot, aren't you contradicting yourself? The feeling is that you now seem to want the pirates to come back to Earth,

and then turn Earth into their colony, turning everyone into their slaves. So what you're telling me is bullshit. I don't believe in this at all,

So what I want to tell you is that since I've come to this nameless island, I want to see that spaceship. I want to obtain that technology. I want to turn myself into a normal person. No one can stop me!

The Man suddenly became silent. After a few minutes, he said "My energy is no longer enough for me to continue talking to you. The last thing I want to say to you is..,

"There is no technology on this spaceship that you want. The technology that can truly turn you back into a normal person is actually on that instrument. You just haven't found the right way to use the machine...

in that case, Won't stop you from exploring that spaceship, but you have to promise one thing, don't easily bring the technology on the spaceship to the human world,

because with your current ability, you still can't control these technologies.

They will only bring you destruction. On this spaceship, there are instructions for the operation of all the machines. According to these instructions, you will soon return to normal, but you have to remember one thing. The chip in your mind will still be sensed by the pirates. But after so many years, if the Pirates have been destroyed, they will not attack Earth, but if the Pirates have developed to a point Where they can not be stopped, then you have to think about how to defend against them?

a

I've already said what I should say. You can think about the rest yourself! a€?i

After saying that, Yu Tian felt that his headache was slowly easing up, and that voice did not ring out again.

At this moment, Yu Tian had to carefully think about it. € ¢

This person said that his chip would allow those pirates to sense it. It was in his mind, and he could not take it out now.

This meant that whether he turned into a robot or not, the pirates would know of his existence.

If that was the case, then what was there to care about? As for the technology on the spaceship, he had to take it. After all, it was something that belonged to him. On his way to becoming a powerhouse, it would also help him a lot.

Jack saw that Yu Tian did not speak anymore, so he came over and said in a low voice, "You really scared me to death before. I thought you had suddenly gone crazy"

"I really almost went crazy. Forget it, Can

i

t Sleep Now. It's better for you to go to sleep. I'll Watch Over You Tonight!"

Speaking up to this point Yu Tian got up and went to the bonfire.

The night passed quickly. In the early morning, thick fog rose on the island, making it look like a fairyland on Earth.

Yu Tian felt that this feeling was particularly good. [f he had a choice, he would one day bring the 108 sisters to find an island like this and live a secluded life.

How wonderful would that be.

Actually, he didn't really care whether he became a powerhouse or not. It was just that everything seemed to be arranged. He had to follow that arrangement.

But in reality, that wasn't what he wanted.

Jack made breakfast, but it was just canned food in the morning, so it was just called breakfast.

When the sun rose, the fog gradually dispersed, and the island felt particularly clear.

The two of them stepped on the dew and moved toward the middle of the island.

Just as they were about to approach the sky, Yu Tian suddenly heard someone talking.

He hurriedly reminded Jack not to make a sound.

The two of them immediately hid in the grass and looked ahead carefully.

Not long after, a group of Aborigines appeared in the forest not far away.

Looking at the attire of these aborigines, they should be a group of pure-blooded aborigines Who had no idea how much the outside world had changed.

They seemed to be hunting here, with prey on their shoulders and stone tools in their hands.

Jack said in a low voice "It can't be? There are actually people from the Stone Age here. This is too eye-opening!"

However, YU Tian didn't think so. If there had been humans on this island all along, then why didn't the spaceship change the people here when it landed?

However, after careful observation Yu Tian frowned. If there was no change, then it was impossible.

These aborigines had very strong bodies, and their muscles were especially developed. Moreover, their strength was especially strong. A teenager could carry a prey that weighed hundreds of pounds.

A normal person would not be able to do this,

Jack seemed to have also noticed these characteristics, and said in surprise, "Are they human? If you want me to carry it, I really can a€?t carry such a heavy prey. If you want to carry it you can!"

Yu Tiancai wanted to remind him not to speak, but he was still a little late.

Jack's voice was soon heard by the aborigines.

More than a dozen Aborigines looked over as if they had found their prey and slowly moved closer.

Jack knew that he had said too much, but it was too late to regret now. The aborigines were already very close to them.

At this moment, Yu Tian actually took the initiative to stand up and waved at the aborigines. "I don't know if you can understand what Pm saying. We came here with no ill intentions!"

However ??Yu Tian's sudden appearance made the aborigines very surprised They picked up the stones on the ground one after another and threw them at Yu Tian without any regard for their lives.

Their strength in throwing stones was especially strong. They could even crack the trees when they hit them.

Yu Tian did not want to tangle with them because these aborigines were only a small part of them. If they were angered, more aborigines would come overa€]

?Chapter 658 – Chapter 657, Take Care Of The Leader

In order not to enter these aborigines and let more of their companions come over to support them, Yu Tian immediately shouted to jack, "Run!"

As soon as he finished speaking, Yu Tian was like a bolt of lightning, piercing through the grass and running into the distance.

Jack's speed was not that fast. After all, compared to Yu Tian's ability, there was a huge gap between them.

Hence, before he could even take a few steps, his leg was heavily hit by a rock and his bones were shattered.

Jack immediately fell to the ground and cried out in pain.

Hearing his miserable cry, Yu Tian turned around and looked helplessly.

If he had known that he was such a burden, he would not have brought him here in the first place. If it had been him, he would have gotten rid of those aborigines long ago.

But now, he had to go back and save him. It was simply a waste of time.

At this moment, those aborigines surrounded Jack. To them, Jack was just a prey.

Although they looked similar, Jack's skin was very white. Compared to his black skin, it was completely different. If one were to distinguish from the color, then Jack was not his own kind.

Therefore, these aborigines treated Jack like prey, They picked up the stones in their hands and were about to smash Jack to death.

Yu Tian absolutely could not watch Jack die in their hands. If he wanted to save Jack, he had to first get rid of these aborigines.

In that case, he would not rest until he was done.

Yu Tian returned to the back of these aborigines. When the storyteller noticed Yu Tian approaching, he turned around and wanted to attack. However, Yu Tian unleashed his ultimate strength at this moment.

He easily knocked these aborigines to the ground.

However, Yu Tian was also extremely shocked. When his fist landed on the bodies of these aborigines, he felt that they were hard and even his arm hurt from the impact.

One could imagine how strong the bodies of these aborigines were.

Even so, he still knocked them down. In order to prevent them from bringing more aborigines over, Yu Tian directly killed all of these aborigines.

In this way, even if their companions found them, they could only think that the beast had killed them.

At this time, Jack finally recovered from his panic, but he still looked at Yu Tian with lingering fear.

Yu Tian looked at him impatiently and coldly rebuked him. "You told me before, don't make any noise. I can save you this time, but I will never save you next time!"

Jack nodded and said in pain, "I will really remember this time. From now on, unless you let me speak, I will not speak. But my leg is really too painful now!"

Seeing how he was in pain, Yu Tian could not bear it. He took out the golden needle and combined it with the strength in his body, quickly restoring Jack's leg to its original state.

Jack stood up and stomped his feet with all his strength. He said excitedly,

"It's never been this good before. This is simply too magical!"

Yu Tian put away the golden needle expressionlessly and stood up. "Alright, stop showing off. Let's hurry to the sky. After we find what I want, we'll immediately leave this place."

"And from now on, you have to be careful. Those aborigines are very powerful, and we still don't know how many of them there are. Once there's a sound, they'll discover our existence."

"So from now on, don't make any sound. Just follow behind me!"

As expected, Jack didn't say anything. He just nodded his head vigorously.

The two of them began to move quietly toward the middle of the island. After about two hours, YO Tian saw the two-kilometer-wide sinkhole in the distance.

The spaceship must be here.

However, what made Yu Tian feel helpless was that there were wooden houses everywhere around the sinkhole. Countless Aborigines lived here.

It seemed that if one wanted to enter the sinkhole, one had to deal with these aborigines first. Otherwise, it would be impossible to enter.

Moreover, Yu Tian finally understood why these aborigines were so Valiant?

In fact, it was very simple. It was because of the radiation from the spaceship that their genes had changed.

Fortunately, the Aborigines had not turned into robots. Otherwise, the Earth would have been destroyed long ago.

However, the most important thing now was to figure out how to enter the sinkhole? Instead of studying the aborigines here.

Yu Tian looked at the sky. It should be noon now. It was estimated that in the afternoon, after the aborigines had eaten and drunk their fill, they would definitely rest. At that time, they would look for an opportunity to enter: Perhaps it would work.

The wait was very long, and Jack could not speak He could only look at Yu

Tian

j

s expression from time to time, but Yu Tian did not let him speak.

Yu Tian had been carefully observing the aborigines.

These aborigines were taking care of the prey they had brought back They actually knew how to use fire to roast food.

Yd Tian also discovered that these aborigines also had their own rules. They also had their own leader, and that leader was a man with all sorts of colors on his face.

No matter where the leader went, anyone who saw him would have to kneel and kowtow: The leader would also distribute the food to the old, weak, women, and children.

When he saw this, Yu Tian had an idea.

As long as he could take care of the leader, these people would naturally submit to him and treat him as the leader.

If he wanted to take care of the leader he first had to mingle with these aborigines.

Thinking of this, Yu Tian took out the tent from Jack's backpack and put it on his body.

He then randomly stuck other things on his head, turning himself into a crazy person.

Jack couldn't help but use his eyes to beg Yu Tian to let him say a few words.

Yu Tian nodded slightly, and Jack asked in a low voice, "What are you doing?"

Yu Tian smiled indifferently and slowly said "I'm going to kill that leader. In that ?????????????? those aborigines will treat me like a god, and we can easily enter that sinkhole!"

Although this idea was not bad, Jack still shook his head and said in a low voice, "But if you dress yourself like this, will those people believe you? In my opinion, they are using the color of your skin to distinguish me!" "If you go out like this, they will definitely treat you as a crazy prey!"

?Chapter 659 – Chapter 658, Entering The Cabin

Yu Tian felt that this was very funny. He said indifferently, "I don't care about them. Believe me or not, I just want them to see how I killed that leader. That's Enough!"

As soon as he finished speaking, without waiting for Jack to speak, Yu Tian directly jumped out of the grass and walked toward the aborigines.

When they found Yu Tian, they surrounded him as if they had been injected with stimulants.

However, they were very curious about how he was dressed. They were chattering and no one knew what they were talking about.

At this moment, a few aborigines raised the stones in their hands and were ready to attack Yu Tian.

However, at this moment, the leader shouted and stopped these people. He came to Yu Tian and spoke again.

Although he didn't understand what he said, Yu Tian could understand what he meant. He wanted to know who he was and why he was here?

Or he wanted to tell himself that this was their territory and that these strange species were not allowed to enter their territory.

However, Yu Tian did not want to explain anything to them. In any case, they did not understand what he was saying, so he would use his own actions to let them understand why he had come here?

When he thought of this, he suddenly launched an attack on the leader. His fist directly smashed into the leader's facet sending him flying and landing heavily on the ground.

Yu Tian's considerations were absolutely correct. When he knocked the leader to the ground, the surrounding aborigines were so scared that they all retreated.

In their eyes, the leader was a supreme existence, an immortal-like existence. However, he was sent flying by such a monster with a punch. This was simply unbelievable.

Could it be that this monster was an immortal even more powerful than the leader?

At this moment, the leader, who had been knocked to the ground, struggled to get up. With his face covered in blood, he looked at Yu Tian in shock and shouted angrily.

Looking at his expression and actions, it seemed like he wanted the surrounding Aborigines to attack him together.

Some of the Aborigines raised rocks again, preparing to attack Yu Tian.

However, Yu Tian didn't want to give them the chance to attack at all. He bent down and picked up a rock. Then, he activated his mind and instantly turned the rock into a huge rock, smashing it heavily onto the ground.

Such a move shocked all the aborigines. They stared at it with their mouths

Agape.

Even the leader was scared out of his wits. He didn't know what to do.

Some Of the Aborigines had already regarded Yu Tian as a god. They knelt at his feet, kowtowing and bowing.

If he wasn't a god, how could he turn a rock into a huge rock in an instant? This was simply magic and only a God could do this.

Yu Tian seized the opportunity to attack and directly jumped in front of the leaden grabbing his neck.

The aborigines were so frightened that they cried out in alarm and knelt on the ground kowtowing desperately:

YO Tian exerted force with one hand and directly broke the leader

I

s neck, then threw him into the bonfire, instantly turning him into a flame.

After he turned around, he laughed wildly. The more he laughed, the more afraid the Aborigines became, and the more they regarded him as an immortal.

Yu Tian pointed to the forest in the distance, indicating for them to go into the forest and hunt for prey.

These people were especially smart. They immediately understood Yu Tian's meaning and rushed towards the forest:

At that moment, Yu Tian also turned around and walked towards the sinkhole.

When he came to the edge, he stretched his head out and looked inside. He was immediately shocked.

The spaceship that was tens of thousands of years away from today had indeed crashed here. It was at the bottom of the sinkhole, about 100 meters above the ground

Therefore, Yu Tian saw it very clearly. This spaceship was exactly the same as the one in the mural.

100 meters was nothing to him.

Soon, he jumped to the bottom of the pit and arrived at the entrance of the spaceship.

When he looked at it from above, the spaceship was not very big because of its height.

When he came to the front of the spaceship, he could feel that the spaceship was especially huge.

The entire length of the spaceship was at least 200 meters long and the width was 50 meters.

It was this spaceship that created countless robots on Earth and almost turned this world into their colony.

Of course, the technology of this spaceship was also the invention of the future humans.

Thinking about the future humans who could master such high technology, it was obvious how terrifying the development of humans had reached.

Thinking about it, one day when they reached the intersection outside, the cabin door was tightly closed.

To open this cabin door, they probably needed the support of the power system.

However, this spaceship had been here for tens of thousands of years. No matter what kind of power it had it would probably be exhausted.

Therefore, he used his strength and forcefully opened the cabin door.

The moment the cabin door was opened, a burst of oxygen suddenly erupted from the interior of the spaceship.

After all, it was a spaceship used by humans. It was normal for it to have oxygen.

the oxygen in the spaceship was exhausted.

Yu Tian stepped into the spaceship without hesitation.

Yu Tian observed his surroundings as he walked.

The structure of the spaceship was actually not complicated. Other than the rooms on the left and right, the dining room, and the utility room, there were some functional rooms.

Moreover, there were some strange symbols on the doors of each room.

It was exactly the same as the symbols that the chip received last night. At this moment when Yu Tian saw these symbols, he actually understood what they meant.

For example, the symbols on the door in front of him represented the meaning of the control room.

At this moment, Yu Tian finally understood that the things that entered his mind yesterday were all automatically downloaded by the chip on the spaceship.

And the chip was in his mind, so it naturally fused with the nerves in his brain, so he naturally understood the meaning of these symbols.

However, the door to the control room was very strong. No matter how hard he tried, he could not open it.

After thinking carefully, he decided to first find the spaceship's power system and see if he could try to repair it

Soon, he found the power room at the back of the ship.

The door to the power room was not closed either. However, when Yu Tian walked into the room, a figure suddenly appeared in front of him.

Yu Tian thought it was a person and immediately made preparations to defend himself.

However, after taking a closer look, he realized that it was just an image.

The person in this image was wearing a spacesuit and smiling at him..

?Chapter 660 – Chapter 659, Time Reversal

Yu Tian was very sure that the person in the video was the person who had spoken to him previously.

And because the power of the spaceship was still present, his influence was still present.

Yu Tian tried to say something to him.

"Are you the person I met in the jungle? You've been talking to me, right?"

The image smiled and said, "You're right. That person is indeed me. Moreover, I've downloaded the data of this spaceship from the chip in your mind."

"Or to be more precise, I'm the operating system of this spaceship. Now, I'll tell you how to control this spaceship. Of course, this is also your own choice."

"I told you before that it is best not to enter this spaceship, but you still came. Since you have already entered the spaceship, then you have to understand this place. First, I have to tell you who I am!"

Yu Tian looked at the time. The aborigines outside would not come back so soon.

Even if they came back, even if they found out about him, they would treat him as a god and would not do anything to him.

Therefore, he had a lot of time to listen to this person. What exactly was this spaceship? And the technology he wanted, was it on this spaceship?

Yu Tian immediately said, "Okay, now tell me who you are. But first, you have to understand one thing, If what you say doesn't make or if What you say is using mea€| "

"Then I will completely bring the technology of this spaceship to the human world, so that I can modify your future progress. In that case, this world will be destroyed, and your world will also be destroyed.

"This is the butterfly effect. I am very clear that even if we are not at the same time, after my setting, the world you are in now will immediately collapse!

However, the man smiled and said, "Our world has already collapsed.

Otherwise, we wouldn't have come here through the time machine and let our ancestors in the past develop with our technology,

"I was the one who proposed this plan. At the same time, the spaceship and the time machine were all developed by me. However, I now regret that I have researched these technologies, this was because it brought destruction to our ancestors, the humans tens of thousands of years ago, as well as the future of mankind. This was why I told you that my world had collapsed,

your World was also in the process of collapsing: The reason was very simple. It was because you had turned on the internal time machine. When you created many super soldiers you had already begun to destroy this world

but you still have time. You will find what you want on this spaceship, and I will also give you some explanations. But one thing, you must remember, the technology here must never be taken to the human world,

this is my reminder to you and for the good of the entire human world. You only need to find the technology to solve your problem, and then you will forget about this place. and to ensure that everything can proceed according to my imagination ,

I have already activated the self-exposure program of this spaceship. If you don't leave this spaceship in an hour, you will sink into the sea along with this island

and no matter how high your defense is, you will not be able to stop the radiation from the explosion of this spaceship's power system. Because we have this technology we absolutely can not let this technology appear in the human world ahead of Time!

However, Yu Tian was a little puzzled. He asked, "If you want to destroy this spaceship, why wait until now? Then, when it crashed, you could have destroyed the spaceship!"

"So now I'm very suspicious of your words, what exactly is this spaceship used for?" "If you don't explain everything to me, I will find the answer myself." And I will believe you when you say that this spaceship will self-destruct, but I will also stop it from exploding. After all, this is our human technology. you are a human, and I am also a human, so we can not destroy ourselves!"

The man smiled again. "You are right. In fact I should have destroyed this spaceship back then, but my system calculated some wrong time links,

"If I had destroyed the spaceship back then, then the entire Earth's time would have been destroyed, and then the Earth would have been destroyed as well.

Therefore, I absolutely couldn't do that,

"This is also the reason why I've waited until now. Actually, I don't know who you are, and what I said was only recorded in advance. Then, through the artificial intelligence system, I was talking to you,

I don't even know what you look like, or who you really are, all I know is, if you turn on this imaging system, then your body must be mechanised, too,

so you have to find the technology here to solve this problem, but as I've told you before, there's no technology in this ship that you want,

"If you want to return to your previous state, then you need to go back to the place where you were created and use the internal machine to reverse time. Only then can you return to your original state,

"Otherwise, the mechanization of your body will become more and more severe until you become a robot. And this process is completely irreversible, except for time! "

The more Yu Tian listened, the more confused he became, and the more confused he became.

Sensing Yu Tian's puzzled gaze! the man explained in more detail! "Now that you have mastered the teleportation technology, I can already feel that device. It is on your body..

"Actually, you have used it all wrong. Although it can teleport between regions, it can also teleport time. On the internal time machine, you saw a lot of time settings beforea€|"

And you've calculated, you think it's coordinates, and you're right, it is coordinates, but it also has another function, which is to set the time point,

if you calculate the coordinates and time, in hexadecimal format, you'll find that, in fact, it can also set time, if the machine can still be used,

and you can use to open a portal to time travel just like I did back then, and you can travel through time at will, but the impact of this travel is very strong, just like my world, has completely collapsed, and this is inseparable from my time travel, but you can do time reversal, how do you do it? I will give it to you, but I have a request, i hope you can agree, otherwise, I will not tell you how to do it!

I Have 108 Older Sisters #Chapter 661 - Read I Have 108 Older Sisters Chapter 661

?Chapter 661 – Chapter 660, Explosive Devices

Now, no matter what method he used, as long as he could return to normal, no matter what the conditions were, it was acceptable.

However, Yu Tian had to consider another point. If he were to reverse time, would the entire world reverse time?

Or would he directly open a space-time channel, just like when this person first came to Earth.

Yu Tian had no choice but to voice out his doubts.

"Before you raise your conditions to me, I have a question to ask. is reversing time equivalent to opening a time channel?"

The projection shook his head slightly and said slowly, "It's impossible to say that completely because there are options. You can open a time channel, or you can reverse timea€|"

"But one thing is certain. The chip in your mind may disappear due to the reversal of time. Some of your actions during this period of time.,

"Will also completely change because of your own reversal of time. The process will change, and the result will naturally change. So, before you reverse time, you have to think carefully first!"

Yu Tian had been pondering over the words of this person in the video.

He was pondering over Whether the words of this person in the video were true or not? Should he do as he said?

When a person's trust was in doubt, then what he said had to be carefully analyzed.

However, these words were in Yu Xian's heart' He did not want to bring them up now.

Instead, he wanted to let the person in the video tell him the real solution to the problem. Then, he would consider whether he could accept it or not. was what he said true or false?

When the person in the video saw Yu Tian, he remained silent and said, "Because we have spent thousands of years on this problem of time, but until nowa€|"

We still don't understand the concept of time. We only know that it can move forward or backward, but time is closely related to our lives,

"Perhaps we can only study it to this extent and you may know more in the future, but this is just our hope,

and you want to get this technology, first you have to promise me a condition, after you perform time reversal, you have to shut down all the equipment, and stop all your experiments, so that you can guarantee the safety of this world otherwise, you use this technology without limit, after all, it will have a certain impact on the results of this world,

"Or, you can say that you have an impact on the time of the entire world. Any careless mistake you make will result in a collapse. Therefore, you must listen to me and destroy all the machines,

"Just like this spaceship, pretend that it never existed!"

This condition was completely acceptable. Destroying the machines and things like that, and pretend that he had never owned these things, was still not a problem.

Moreover, Yu Tian was also very clear that if he used the time machine without any restrictions and made waves on the time of this world then this world would disappear very quickly.

Therefore, he nodded and agreed with the video maws words. He said indifferently, "Alright, stop wasting time with me. Now, tell me how to operate the time machinea€

Then, I will consider what you said. Will you accept it?"

The video man also nodded and said, "In the core area of this spaceship, there is a power device. That device is only the size of a fist, but it contains all the technical data of the spaceship,

it includes the time, the settings of the machine and the way to use it. As long as you get that power device and download it with the chip of your brain, you will know how to operate those machines,

but I have to remind you that the core device, although it contains a lot of technical information, is also very dangerous. If you make a mistake,

the device will immediately explode, and the explosion will destroy half of the Earth. This is the power technology we had, and it is also energy technology,

"Because of this technology, people in our era had already experienced many destructive wars, and those pirates wanted to obtain this device and develop it into a

weapon, "That's why we had conflicts, and then they treated me as a traitor. In fact, I was doing it to protect the entire human race, the entire time!"

Yu Tian saw that he was talking non-stop, and the ship's self-destruct device had already been activated. It was simply a waste of time to listen to him.

Therefore, he went straight to the middle area of the ship. As expected, he saw a room there. The symbol on the door indicated that this was the core power room.

Yu Tian opened the door and entered. The entire room was exceptionally large, and in the middle of the room, there were many data wires connected to a device similar to a human heart, that device was filled with all kinds of diamond-like things.

In the dim roomy it was particularly eye-piercing and very beautiful

The video person suddenly appeared beside Yu Tian again, giving Yu Tian a fright.

This guy was simply like a ghost that would not leave. No matter where he went, he would appear.

At this moment, he said, "What you are looking at now is the core device of the spaceship. All the technical data is in this device. After you take it down, the spaceship will accelerate the time for self-destruction,

"You only have ten minutes to leave this place. After the spaceship explodes, the island will also sink, and the people on the island will also sink into the sea.

"This is why I cut off the foundation of this small island and let it drift on the sea forever. I didn't want it to be fixed in a certain area so that more people could live on this island,

"These aborigines are an exception. Back then, there were only a few of them, but with the passage of time, they actually developed so many people. No matter what time it is, the production ability of humans is indeed extremely powerful!

Yu Tian didn't want to listen to his nonsense. He went forward and took the device in his hand.

When the data cable was cut off, the spaceship immediately let out an ear-piercing reminder.

The video person said, "The spaceship's self-protection program has been accelerated. You should leave this place now. Remember what you promised me. When you become a normal person, you must destroy all the equipment,

"This is my only hope and my only request.. I hope that you can keep your word and protect the entire world!

?Chapter 662 – Chapter 661: Leave The Island

Even at this time, this guy was still spouting nonsense in front of him. Listening to him talk now made his head hurt.

He only had ten minutes to leave this place. If he continued to spout nonsense, the spaceship would probably explode.

Thinking of this, Yu Tian still nodded, he said coldly, "Alright, I got it. When the time comes, I will consider what you said. If these devices will really destroy Earth, I will naturally make these devices disappear,

"Now, I will leave this place. Thank you for your help!"

The projection laughed and said in a magnanimous manner, "Actually, this is nothing. In your era, everyone thought that humans had a soul, but in reality, humans do not have a soul. Humans only have hope, only pursuita€|"

"They hope that they can become better and live a better life, so everyone is working hard. And this projection of mine, or the soul that I exist in, is also my beautiful pursuita€|"

"Your life will continue, and it will be even more wonderful in the future. But maybe we will never meet again. I wish you good luck!

Yu Tian didn't want to talk anymore. Every second wasted might make it even more difficult for him to leave the island.

The explosion of the spaceship was already very violent. Not only the island, but even the surroundings of the island would have ripples.

Yu Tian stuffed the device into his backpack. There was no need to look at the other things in the spaceship anymore.

Even if he looked at it, it would be useless because the spaceship would be destroyed immediately.

Just as the projection said, everything was just a dream, a hope.

Yu Tian turned around and ran out of the spaceship. At that moment, Jack* that idiot, also jumped down from the rope.

He even said to Yu Tian in surprise, "So there's an alien spaceship here. Oh My

God, I thought this was just a cave or the home of those aboriginesa€|"

How could I have imagined that there would be a discovery that could shock the world? Yu Tian, you're really too amazing. Did you know there was an alien spaceship here before?

"Look, it's an alien spaceship. His design is simply too perfect and too mysterious. I want to enter the spaceship to take a look. Other people might not have the chance in their lives!

Yu Tian did not want to talk to him about anything else. The spaceship was about to explode. He still wanted to go in and take a look. Did he really think that he was here for a vacation? This was simply killing him

He immediately shouted coldly, "Don't say these things to me anymore. This spaceship is about to explode, and the island will also fall silent. If you want to die here, then go in and take a look, anyway, I'm going to leave this place now. you decide what you want to do!"

After saying this, Yu Tian ignored him. If this guy really wanted to die here, then no one could stop him,

But he had to leave this place no matter what.

So he grabbed the rope and quickly climbed to the ground.

When Jack heard this, he was completely out of his mind. He said with a sad face, "This is simply too scary. Such a good spaceship, how can it explode just like that?"

Forget it, it wasn't something that should exist on earth to begin with. If it explodes, then so be it. I have to leave this place as soon as possible!" At this point, he grabbed the rope and began to climb up.

Yu Tian, who had just reached the ground, wanted to leave, but he was surrounded by the Aborigines Who had returned with their prey.

These aborigines now regarded Yu Tian as a god because he had killed their leader, and he was now their leader.

The prey that they had returned with were placed at Yu Tian's feet, and Yu Tian would distribute them to everyone.

However, Yu Tian did not have the mood to care about these things. He could not communicate with them to begin with, and now he had to waste his time with some hunted animals.

Helplessly, Yu Tian pointed to the forest over there and told them to continue hunting.

Of course, the Aborigines would listen to him, so they rushed into the mountains and continued hunting.

At this time, Jack also climbed to the ground and said anxiously, "Let's leave this place quickly. If the spaceship is going to explode, none of us can leave!"

He didn't need to say this nonsense. Yu Tian immediately nodded and the two of them rushed to the beach,

After boarding the yacht, Jack hurriedly turned on the engine, turned the bow, and directly headed toward the sea at full speed.

Yu Tian looked at the time from time to time, there were still two minutes before the explosion.

However his current position was still within the range of the explosion. Even if he was not hurt by the shockwaves of the explosion, when the island was silent, a huge whirlpool would be created on the sea and suck them in.

At that time, there would be great danger. He was fine, but Jack might not survive.

Jack had followed him here. No matter what, he could not watch him die.

Therefore he immediately ordered loudly, "Speed up a little more. The spaceship is about to explode in two minutes. If we can't leave this area, we should never leave!"

Jack was especially nervous and even more anxious. he shouted loudly,

"

This is already the fastest speed. This is only a yacht, not a speedboat: No matter what, his speed can not be increased by much!

Yu Tian frowned. If that was the case, then he would increase the power of this yacht and make it faster!

Thus, he immediately unleashed the power of his body and pushed directly into the seawater at the stern of the yacht.

The power collided with the seawater and created a large wave. The resulting thrust increased the speed of the yacht by several times, and in the blink of an eye, it rushed out of the barrier:

The people who were studying the barrier were all stunned when they saw the yacht suddenly appear.

That was because the yacht was too fast at that time. They wanted to stop the yacht and ask how they could enter the island through the barrier. Obviously, it was impossible.

Yu Tian did not want these people to lose their lives in the explosion. When they passed by the warship, Yu Tian shouted to the captain who was standing in front of the ship, "The island is about to explode!"

"

"It's very dangerous for all of you to be here. Quickly leave this place!"

However, the captain did not believe this at all. However, he laughed coldly and said, "I will never believe you. You kidnapped us earlier, and now you want to tell us this!"

"

You better leave quickly. Otherwise, I will definitely fire at you.. The weapons on my battleship are enough to blast all of you into pieces!

?Chapter 663 – : Chapter 662, Tsunami

These people were simply courting death here. Yu Tian felt that he had already done his best. If they didn't listen to him, then he would just let them wait for their deaths here.

Thus, he immediately ordered Jack to continue to increase his speed and leave the island's range.

The commander on the battleship looked coldly at Yu Tian's departing figure and gave a decisive order.

"Let them go. Once they enter the firing range, attack immediately. How dare they kidnap us and want to leave openly? How is this possible? Get ready for battle immediately!"

The crew immediately gave the order and returned to the attacking position. They turned on the radar and the weapon control system.

However, at this moment, a deafening explosion came from behind them.

When Yu Tian and everyone looked back, the small island had clearly turned into an erupting volcano.

The violent explosion caused the mushroom blobs on the volcano to instantly spread out. The scene was like the explosion of a nuclear weapon.

Although that barrier could block the power of the explosion, it was quickly shattered by the destructive energy of the explosion.

The island, which was tens of thousands of square kilometers, was instantly shattered into pieces.

The commander and the others on the battle ship were stunned when they saw this scene. They couldn't even give the order to retreat immediately. They could only watch helplessly as the curtain of fire engulfed all the ships in the surroundings., completely.

When the energy approached the battleship, the entire battleship trembled violently. Soon after, the body of the battleship began to disintegrate and shatter. In the blink of an eye, the entire battleship disappeared into the ripples of the explosion.

Yu Tian only took a glance. Now was not the time to enjoy the scenery. The most important thing was to leave the range of the explosion.

He thought that the explosion would only affect the surrounding area of the small island for a few nautical miles.

However, who would have thought that the explosion of this spaceship was even more powerful than a nuclear weapon.

And he was right in the range of the nuclear weapon explosion. No matter how strong his body was, he could not withstand the attack of this kind of power.

Thinking of this, Yu Tian pushed his body's strength to the limit. The speed of the yacht was as fast as lightning. It was almost close to the shockwave of the explosion as it rushed forward.

Jack was already out of his mind. He had even forgotten how to control the direction. If Yu Tian had not reminded him, he would have been scared to death.

When the waves gradually disappeared, the sea level also exploded, creating a violent tsunami.

The waves, which were several meters high started to spread out from the point of explosion. The yacht rose and fell on the waves.

Seeing that it was about to fall into the sea, Yu Tian used his strength again to control his body That was why he couldn't let the yacht fall into the sea.

However, one thing was certain. This tsunami would definitely cause severe damage to the surrounding islands or countries.

However, this was also helpless. No one wanted the explosion of the small island. Of course, if he had not logged into the spaceship, the explosion would probably never have happened.

After the wind and waves calmed down, Yu Tian looked at the dark sky. His emotions were very complicated.

He immediately used the chip to connect to the network and the satellite observation system to look at the tsunami,

The tsunami violently rushed towards the surrounding islands and an ocean country.

The tsunami caused damage. Although it was not destructive, it was enough to paralyze the entire country

When he saw this, the yacht had already arrived at Huayu Island.

The tsunami had also caused some damage to the island. Many houses and airports had been destroyed.

The people affected by the tsunami had all come outside to see their homes destroyed. They hugged and cried while waiting for others to rescue them. When Yu Tian saw this, he felt extremely uncomfortable,

This small island that was hundreds of thousands of square kilometers was originally a beautiful country. The hundreds of thousands of people who lived here were usually extremely happy and quiet.

Therefore, this tsunami brought them a devastating blow. The entire island was swept by the tsunami. Other than some relatively sturdy buildings, almost all of the buildings were destroyed.

Everywhere they looked, there were ruins and crying people.

The surrounding islands and countries had been destroyed by the tsunami. It was impossible for them to have extra strength and resources to help them.

At this moment, a few-year-old girl, whose face was covered in dust and tears, hugged her mother tightly.

Her mother was also seriously injured because of the collapse of the house. Her face was covered in blood.

However, she still hugged her child tightly. Her beautiful eyes were filled with tears and despair.

There were countless people like them.

The managers of Huayu Island also tried their best to comfort these sad people. However, they were also helpless.

They were the managers of this place. However in the face of this tsunami, they did not have any means to help people.

The injured mother begged the manager bitterly, "My child is injured, I need medicine now, what should we do?"

The middle-aged manager also frowned and said helplessly, "We are already looking for people to dig out some useful things from the ruins, but how much can be dug out?"

"We don't know yet, and there are a lot of injured people now. Can our medicine hold up?" "We don't know yet so we will try to use other methods to help these injured people!"

But the child

i

s mother shook her head and said "Shouldn't we leave the best resources to the Women and children first? My child is only seven years old this year, and her ribs were broken."

"Right now, she is in extreme pain. We need medicine and food. Do you want me to watch my child die in my arms from the pain?"

The manager was still very helpless and said guiltily, "I'm sorry. Although I sympathize with you, what I can do now is really too limited. I can only say that I will try my best to help you,

"However, there are too many people like you who need help. Tell me who I should help or who I shouldn't help. We can only depend on God!"

Everyone around looked at each other in despair. Now, unless there was a god, no one could save them.

At this moment, Yu Tian, who could no longer watch on, came in front of everyone and said in a domineering manner, "Everyone, don't worry. The relief supplies will arrive soon, when the time comes, not only will there be medicine, food, and even any help that can be provided to you!"

Chapter 664 – Chapter 663, Help Them

The crowd looked at Yu Tian as if they were looking at a god. They felt that he was like a savior.

The manager looked at Yu Tian with suspicion and asked, "Sir, it seems that you are not from here. I don't know if you can help us."

"But we are very grateful to you. At least you have made us feel a little happy. However, the tsunami this time has caused too much damage to this place. A little bit of supplies" "Won't be able to solve the fundamental problem"

"But we are still grateful to you. If possible, can you tell me who you are?"

Yu Tian's current identity in the world should be known by many people. However, not everyone knew, especially on such a remote island. Even if he had been on television before, there was still a difference between him and himself.

Therefore, it was normal for them not to recognize him. It was also what Yu Tian wanted.

Jack, who was standing at the side, wanted to introduce himself, but he was stopped by him.

Yu Tian shook his head slightly at Jack, indicating that he should not say those useless things. Even if he let them know that he was Yu Tian, it would be useless. The people here did not care who was who.

They just wanted some help, and that was all he could offer them. It was just to make themselves feel better.

At this moment, Yu Tian said slowly to the crowd,

"

"I'm just a rich person who came here to travel. I can use my resources to help everyone"

"Because I don't want to see my child cry or Mother's tears. At least at this time we should all join hands and help each and every one of you overcome this tsunami and the destruction of this place!

The manager and everyone were especially touched. They all applauded Yu Tian one after another as if they had also seen hope.

The child's mother came in front of Yu Tian and said very sincerely "Thank you. You are really a good person. You are the hope that the heavens have given us. We will thank you forever!"

Yu Tian nodded slightly. Then, he took out his phone and called Chu Yan.

After the call was connected, Yu Tian immediately ordered, "I need a large amount of supplies now. You may already know that Huayu Island was damaged by the tsunami, and the entire island has been destroyed"

"There are at least hundreds of thousands of people who are homeless, and they don't have any medicine or food. I urgently need these things, including tents and other relief supplies"

"Go and make arrangements right now. In an hour, I want to see these things!"

Chu Yan frowned and asked ?? "When did you go there again? could it be that this tsunami was caused by you again?"

Yu Tian was also very helpless, but he was afraid that others would hear him. He could only say in a low voice, "It's useless to say these things now. Hurry up and arrange the supplies. In an hour, I want to see these things!"

The surrounding people heard this and felt extremely surprised.

How could this young eastern young man have such great strength? In an hour, he could mobilize supplies that could be used by hundreds of thousands of people?

Including that manager, he had some doubts in his heart. However, in order to cooperate with Yu Tian, he also said to everyone, "Now that someone is willing to help us, this is worthy of everyone being happy

However, everyone should not completely rely on these supplies. After all, the supplies are limited. If we can really reach this place hope that everyone can follow the order and let the women and children get the supplies first, the others are waiting for distribution! "

Everyone agreed with the manager's words.

Only Yu Tian only smiled indifferently.

These people still had some doubts about him. They probably thought that he was just here to casually get some things and then put on the halo of an angel.

Therefore, there was no need to tell them those useless things. When the supplies arrived, they would naturally understand that his ability was more powerful than they had imagined.

However, this kind of feeling was not what he wanted to pursue. If he wanted to show off, he could do it anytime and anywhere. There was no need to play such tricks with these people.

Therefore, he said to the manager, "Don't talk about this now. Immediately tell everyone to come here and wait for the supplies!

Although the manager nodded, his expression was very calm. He asked in a low voice, "Are you saying that everyone here should come here?"?

know you want to help us now; but I have to remind you that everyone is very sad and very angry. If they can't get the supplies they want herea€|"

I think they will be very angry, and the situation will be completely out of control. If that's the case, they may suffer even more damage,

so my suggestion is that we let the people here get the supplies first. If there ??still some left, we can give it to the others. What do you think?"

Yu Tian shook his head and said arrogantly, "I said, let every one of them come here, and every one of them can get enough supplies. What you need to do now.,

is to let the airport here recover as soon as possible Within half an hour, you must be able to let any plane take off and land in the airport. Is there any problem?"

The manager was in a difficult position. Moreover, he was the manager here. Since when did Yu Tian become the one who gave the orders?

However, what he said made some sense. If the airport could not be used the supplies could not be delivered.

Therefore, he immediately organized his men and headed to the airport Fortunately, the airport was relatively empty. They could use it after clearing the runway.

At this moment, a series of explosions appeared in the sky. Everyone looked up and was immediately stunned.

Countless transport planes appeared in the sky.

One after another, they landed at the airport. A large number of supplies had been delivered. Just the tents alone had a million of them. There were also countless food and medicine, as well as other supplies, the manager was already stunned.

He thought that Yu Tian was just saying that, but he really did it.

As the people lined up to receive supplies, everyone looked at Yu Tian with gratitude, especially the child's mother. When she received the sufficient supplies, she was so moved that she knelt down for Yu Tian.

Yu Tian hurriedly helped her up and said slowly, "There's no need to do this, You Don't have to worry either. Right now, we're only allowing you to receive the supplies.. Soon, this place will be rebuilt and your ll still be able to live happily!"

?Chapter 665 – Chapter 664, Trying To Take Advantage

The news of the supplies being delivered to flower rain island instantly spread among the crowd. More than 100,000 people gathered near the airport at the same time, waiting to receive the supplies.

The scene was very chaotic, and there were even fights. They all wanted to get the supplies as soon as possible, or they were afraid that the supplies would not be enough.

If that was the case, those tough-looking men would have a great advantage. They all rushed to the front of the group, while those old, weak, women, and children could only wait helplessly at the back of the group.

When Yu Tian saw this, he was especially angry. What kind of situation was this? These people actually didn't know how to be humble. They even risked their lives to show off for their own benefits.

If everyone was like them, then it would be the end of the world.

Thus, Yu Tian personally came in front of everyone and ?????????????????? "Let the women and children take the supplies first, then the elderly, and the adults take the last!"

Those men who had finally gotten a good position were not willing to listen.

They did not even know who Yu Tian was? Why did he have to give orders here?

One of the men shouted loudly, "Hey, You Idiot, is it your turn to speak now?

Who Do you think you are? Whoever has the most power now has the final say. Get lost quickly,

"If you delay us from getting the supplies, I'll let you have a taste of my fist, You Idiot!

Yu Tian smiled indifferently and said disdainfully, Is that so? In that case you're pretty good at fighting, right? If that's the case, then come on, let me see how capable you are!

The man also wanted to show off in front of other but he also wanted to show off his muscles so that everyone would know that it was best not to fight with him for those supplies. Only he could fight with them, and only he could be the boss here.

The other muscular men all shouted excitedly.

"Ike, go beat him to death. Let him see how powerful you are! "

"Give us some face. You are the best fighter here. If you lose, your father will be furious. He is even more shameless than you, but he has never lost a fight!"

"Yes, Ike, you are from a hooligan family. Your whole family is on the path of hooliganism. Walk further and further. Go Up and bravely beat him up, beat his daddy out!"

"From now on we'll follow you and be the boss here!

Ike was completely inflated by these people's lies. This guy grinned, as if there was something heavy stuffed in his pants. Gritting his teeth, he walked up to

Yu Tian.

"Hey, you idiot. Now I'll let you know how powerful I am. I'll let you know that I'm the only one in charge here. Moreover, after I defeat you, I'll even snatch all your supplies.

"Show me your fist!

As soon as he finished speaking, Ike suddenly threw a punch.

Yu Tian felt bored when he saw his two moves. It looked like this guy's muscles were quite strong, but in reality, he was just an idiot.

He didn't even need to blink before he kicked Ike several meters away.

This guy flew over the heads of the crowd. When he fell to the ground, everyone's expressions were so handsome that they exploded.

Ike was the tyrant of Flower Rain Island. No one could beat him. When this guy usually beat people, he could always do it with one or two punches.

The people who were beaten up were either food fees or vegetative state. Even the management department didn't have any idea about him.

What happened today? He had just raised his fist and hadn't done anything yet, but he was kicked away?

That was a person who weighed more than 200 pounds. He wasn't an animal. How could he be kicked away so easily?

How could this Easterner be so powerful?

No wonder he wanted to be the boss here. He really had the ability.

If even the most detestable Ike could heat that bastard up, they probably wouldn't even be able to catch a glance in front of him.

What was there to fight about? They were all watching the show with trepidation.

At this moment, Yu Tian coldly glanced at the stupid men standing at the front of the line and said arrogantly, "What? You guys want to give it a try too? Come on, let's Go Togethera€|"

"Anyway, there are plenty of drugs behind. After I Cripple You, there are also drugs that can make you feel less pain. At most, you'll only be paralyzed from the waist down. Come on, bastards!

Everyone was so scared that they hurriedly retreated. Who would dare to provoke this guy unless they didn't want to live anymore.

At this moment, the manager came to the front of the crowd. He first looked at the unconscious Ai Ke on the ground and then looked at Yu Tian in shock This Ai Ke was the most troublesome person. If he could, he really hoped that the person who knocked him down would not be Yu Tian but himself.

If that was the case, he would see who would still be disobedient to his management When he was in charge of Flower Rain Island in the future. When that time came, he would beat up whoever was f * cking pretentious. That would be F *cking awesome,

However, this was just a beautiful thought. He would never have the strength of Yu Tian.

He could only shake his head helplessly. He turned his head and shouted, "Are you all crazy? Are you all treating our benefactor like this?

"Don't you know that the person who helped us and gave us supplies is this gentleman? Not only did you not thank him, you even fought with him here.

Are you still human?"

As soon as he finished speaking, everyone's jaws dropped in shock.

So this person was the good person who gave them supplies. He was their benefactor.

That Ike really deserved to die, He actually treated their benefactor like this.

At this moment, someone shouted, "Thank you. Everyone on Flower Rain Island, thank you! "

"You are our benefactor. We will forever remember your kindness!

"Thank you so much. You are a god, and you are our savior. Thank you!"

"Thank you so much. You are a god, and you are our savior. Thank you!"

All kinds of gratitude sounded one after another. The valiant men also felt extremely ashamed. Without a word, they lifted the unconscious Ike and threw him into the sea.

Yu Tian gestured for everyone to not be so excited.

He said indifferently, "Everyone you don't have to thank me so much. I believe that anyone who thinks that they should make the right choice will do so. I only got this opportunity.."

"At the same time I also want to tell everyone that there are a lot of supplies.

Those that can't be used, don't be anxious. Everyone will get it! "

The manager also said, "Yes, he's right. We are now going in order a€?..??

Before he finished his sentence, Yu Tian felt a violent tremor under his feet.

He suddenly frowned. Wasn't the tsunami already over? Why was there still a tremor? Was it going to be an earthquake?

It couldn't be so exciting, right?

?Chapter 666 – Chapter 665, Trust And Support

Everyone was also in the midst of the violent tremors and felt extremely frightened. One after another, they fell to the ground. Some of them even shouted loudly, "It's an earthquake! It's an earthquake!"

The manager also fell to the ground. However, he did not think that it was an earthquake. Instead, he shouted loudly, "Everyone, don't be afraid. Don't panic. This is just a normal reaction of the Earth's crust after the tsunami a€|"

It will be quiet after the earthquake. Everyone, don't be afraid!"

However, Yu Tian did not think so. The earthquake was very strange. There was no reaction of the Earth's crust at all.

This was because the area of flower rain island was so big. A tsunami would not cause such a big reaction of the Earth's crust. There must be another reason.

However, very quickly, after the epicenter passed, everything quieted down. After that, there were no tremors.

The manager proudly said to everyone, have already told everyone that this is just a normal reaction to the Earth's crust. You Don't have to be so afraid. Everyone line up now and continue to receive your supplies! "

Under the manager's persuasion, everyone really believed it.

However, Yu Tian did not believe this. However, he did not say anything. Wait and see. If the tremors appeared again, then someone must be playing tricks.

When the supplies were being distributed, the manager came in front of Yu Tian and said in a low voice, "Do you think it must be an earthquake? There has never been an earthquake on this island beforea€|

"Moreover, we have also invited geological experts to this island to investigate. The underground of this island is especially strong. There will not be an earthquake for the next few hundred yearsa€|

"There are no volcanoes around either, so I feel that this earthquake has a lot to do with the previous tsunami!"

Yu Tian drank a mouth full of water and said indifferently, "Who am I to ask? I'm not a deity, so how would I know where this earthquake came from?"

"Don't ask me about this now. Go and maintain order and quickly distribute those supplies. As for the earthquake area, I'll study it myself. You Don't have to care about it!

The manager nodded helplessly. Yu Tian was the savior of this place. He should listen to whatever he said. This was the least he could do to his benefactor.

So he immediately turned around and continued to maintain order.

Yu Tian turned on his brain chip and connected to the observation satellite. He carefully observed the surrounding sea area.

It was not a big deal. Yu Tian was shocked.

Less than 100 nautical miles away from the island, the sea water seemed to be boiling.

When he zoomed in and looked carefully, it was the monsters that had appeared in the Nile.

Yu Tian was puzzled. were these monsters following him? Why was he on a small island? These monsters would appear.

And this time, there were at least a million monsters. They had almost surrounded the entire flower rain island.

If these monsters charged up, no one would be able to survive this morning.

This was because they did not have any defensive abilities. When he was in the nemesis, he had also deployed many defensive weapons to make these monsters' attacks fail.

However, there was nothing here now. It was impossible for him to fight these monsters alone.

Thinking of this, Yu Tian could only quickly think of how to save everyone here?

His gaze landed on the transport planes.

If the transport planes were to evacuate everyone here, it would not be enough with the current transport capacity of these transport planes.

Those monsters would land on this island in at least an hour.

And it was simply impossible to evacuate hundreds of thousands of people within an hour.

Yu Tian had to calm down and ask himself carefully, what should he do?

How could he make those monsters land? Not causing any harm to the people here was the biggest challenge for him.

If he were to face the millions of monsters alone, even if he was not killed, he would be exhausted to death.

His ability was limited. If it were tens of thousands of monsters! it would not be a problem for him at all.

However, there were so many monsters now. It was obvious that they knew that he was on this island. In order to prevent the monsters from failing the attack like last time, the number of monsters this time could be said to have doubled.

Yu Tian was wondering who was behind these monsters? Who was the one who created them? Why did they deliberately make things difficult for him?

However, it was useless to think about these questions now.

Fortunately, there was still time. Therefore, he came to the airport and shouted to the crowd, "Everyone, listen to me now. Perhaps what I'm going to say next will make many of you feel afraid,

"But what I want to say is that 50 nautical miles away from this island, there is a group of deep-sea monsters that want to attack this place. These monsters are a group of mutated monsters that kill without blinking,

"They don't care if you are a man, a woman, an old man or a child. They will kill all of you!"

As soon as he finished speaking, everyone cried out in surprise.

If these words were said by someone else, they would not believe it at all. However, these words were said by Yu Tian. Even if they did not see those monsters, they would believe it completely.

Panic and fear immediately spread among the crowd.

Many women cried on the spot not knowing what to do.

After experiencing the tsunami and then having monsters attack this place, how could the originally Quiet Flower Rain Island be like this?

Many women hugged their children and cried in pain. Some even knelt at Yu

Tian's feet and begged, "You are our savior, please save us!"

There were so many women and children here. They couldn't die. Please save

Yu Tian nodded slightly and said arrogantly, "You don't have to be afraid. As long as I'm here, nothing can hurt you."

"I just want to ask everyone, will you believe me?" "Support me and listen to me. The tens of thousands of people nodded almost at the same time and shouted loudly, we will listen to you. We will definitely support you. We are willing to sacrifice our lives for you!"

"Yes, we can fight, but we don't have weapons. If someone gives us weapons now, we will definitely fight those monsters with our lives!"

"Even if we don't have any weapons, I have to protect my family. We Can't leave this island because this is our home. No matter what we have to stay here. No one can think of being presumptuous on this island!"

Hearing this, Yu Tian smiled with satisfaction..

?Chapter 667 – Chapter 666, People With Strength

It was mainly because everyone had the courage to face this difficulty. It was enough for them to dare to pick up their weapons and fight with those monsters.

Yu Tian knew that these people wanted to protect their homes and their families. They could only pick up their weapons and fight with those monsters. From then on, they had no other choice.

In that case, he had to support them. This was in itself a mutual benefit.

The monsters wanted to kill these people to suppress him. Then, he couldn't let these monsters succeed, especially that damned person behind the monsters.

He hadn't defeated him the first time, and he would never be able to defeat him in the future.

Thinking of this, Yu Tian also said to everyone, "I am very grateful for everyone's support for me, and I can clearly tell everyone that as long as you listen to my command..,

those monsters will not be able to cause any harm to you? Of course, death and injury are inevitable, but in order to protect my family, no matter what, it is worth it, isn't it?"

Everyone started shouting.

"For my family, I'm willing to give up my life. I must protect them!

"That's right, we're not afraid of death. The tsunami didn't even make us give up. They're just some monsters. Since they want to come, it's exciting Let's play some exciting games with them!

"

What do you want us to do? Just give us an order. We'll all listen to you!

At this moment, Yu Tian was also touched by the courage of the crowd.

Courage was what people needed the most. No matter what challenges or difficulties they faced, they would not give up their pursuit, nor would they give up the things they wanted to protect. This was the foundation of a person's life.

As long as they had courage, they could disregard any difficulties or challenges. Nothing was more powerful than courage.

Yu Tian was very satisfied. He nodded and "Since that's the case, let's not waste time. I can take care of the weapons for you. What you need to do now is

Immediately set up some defensive barriers around the island with trees and ruins. This will slow down the attack speed of the monsters. Those Who can use weapons, go to the manager and sign up,

"I will bring the weapons to you later!"

The manager, who was standing at the side, looked at Yu Tian with a puzzled expression. When he said this, he could not help but say???? "Sir, I know that you are very capable, but in such a short period of time..

"It is impossible to find so many weapons. I am the manager of this island, so I naturally do not want my people to be killed by those monsters,

but we must also understand that sometimes we don't have a choice. No matter how nice you say it, these people will still die without weapons

and my suggestion is, if you agree, we can use your transport plane to transport some people out first. As for the remaining people, we will try our best to let them leave or defend against those monsters,

"At least there are so many women and children here. Even if there is a real fight, we shouldn't let them participate in the battle. Fighting is a man's job, women and children don't need to get involved,

"And most importantly, I'm the manager here. I have to analyze from all aspects and care about the lives of these people. So I can't believe that you can get those weapons in such a short time!

The manager's words made many people hesitate.

Previously, when they were hot-headed, they felt like they were following Yu Tian. But after hearing the manager's words, everyone calmed down.

This was indeed impossible. It was more like a fantasy. How could they get so many weapons in such a short time.

Unless he was a real god and could conjure those weapons, it was impossible. Yu Tian did not want to explain so much to everyone. He did not even want to say anything.

He had said that he believed in himself before, but now he had started to doubt himself. People were really fickle-minded-

If they had such doubts, then he would not need to help them. Even when facing monsters, they would doubt his courage. How should he fight?

Yu Tian did not speak. Jack who was standing at the side, could no longer listen.

Although he had told himself not to speak carelessly one day, wasn't it time for everyone to know Yu Tian's identity?

Hence* he stood up and said loudly, "Everyone I don't know what you are thinking. Someone is helping you to defend your home, but you are still doubting this person's ability!"

However, this is very normal because you don't know who this person standing in front of you is. Now, I will introduce this gentleman to you,

his name is Yu Tian. He is the president of the Defense Department of Xi En ??He is also the super president of the world-famous Chu Yan industrial group. He is also the guardian of the number one family in the world

in your eyes, he is just a very ordinary person. However, you don't know that this person is equivalent to a God!"

As soon as he finished speaking, the entire place was filled with shock and dead silence.

Everyone was dumbstruck. Some people even opened their mouths wide in shock, as if even their breathing had stopped.

People might not be able to recognize him if they saw him but everyone had heard of the name Yu Tian.

So this Easterner was the famous Yu Tian in the world.

Some people even praised him as the most powerful person in the world, the richest person, and even the most powerful person.

To be able to have such a good reputation ??it was definitely not for nothing. As for that manager, he was so shocked that his eyes exploded*

Previously, he had felt that he had seen this Yu Tian somewhere and felt that he was particularly familiar. Now, he finally knew that he had seen this person on television before.

At that time, he was still in Super Country and was making his own comments about the civil war in Super Country.

Such a powerful person was standing in front of him, yet he did not feel it at all. If he thought about it this way, he was simply an idiot.

Now, he actually doubted Yu Tian's ability. This was simply a huge joke.

According to the rumors, Yu Tian's strength was equivalent to that of a god, and he was even more powerful ??than a god.

If that was the case, let alone getting some weapons, anyone could get their hands on them.

That was because one day, if he spoke now, the entire world would tremble. Even if he was not far away, the surrounding countries would still give Yu Tian some face. They would provide him with anything, let alone weapons.

No wonder Yu Tian was so confident, because he was indeed a powerful person..

?Chapter 668 – Chapter 667, Raising lq

Yu Tian didn't want to expose his identity, but he didn't want others to think that he was superior, especially these people. After experiencing such a blow, they were already physically and mentally exhausted.

What he could do was to comfort them as much as possible, and let them feel that there was still hope for them to live.

But since Jack had already revealed his identity to everyone, then he didn't need to hide it. Perhaps this would also raise everyone's morale.

At the very least, it would make them feel that the most powerful person in the world was always on their side. Compared to them, those monsters were nothing.

The manager, who had recovered from his shock, hurriedly bowed to Yu Tian and said guiltily, "So you are Mr. Yu Tian. It's all my fault for not recognizing you,

"I apologize to you for what I said earlier. When I didn't know your identity, I doubted you so much. It was indeed wrong,

"

You've helped us so much yet we still doubted you. Now that I think about it, I am really embarrassed. From now on, I believe that everyone here, including me,

"Will listen to your commands without any reservations. How do you want us to fight?"
"We'll fight!"

Yu Tian smiled indifferently and shook his head disdainfully. "Since you already know my identity, there

i

s no need to say anything now. It

i

s just a waste of time,

"If you're willing to listen to me, then go and set up a defensive barrier now. While there's still time, I'll go and take care of everyone's weapons. You guys just wait herea€|

"But there's one more thing. Those Monsters a€?combat strength is very high. After you set up the barrier, you'll also have to set up a defensive line and send the elderly, the weak, women, and children to a safe locationa€| "

u

This airport is a very good place. Let them all stay here and provide us with logistics. Alright, everyone, hurry up and do it!

Yu Tian gave the order, and everyone immediately began to get busy.

No matter what Yu Tian said, as long as they did it themselves, it would be fine. Because the strongest person in the world would definitely not watch as everyone was killed by those monsters.

As long as they believed that he could do it, and believed that they could do it as well, those monsters would not be able to act impudently here.

Yu Tian came to a place where there was no one. He immediately opened the teleportation door and went straight to the outside of Chu Yan industrial's warehouse.

The security guards and mercenaries guarding the warehouse hurriedly stood up when they saw that Yu Tian had arrived.

Yu Tian waved his hand at them and said bluntly, want to take some weapons. You guys open the door!"

He was the Super CEO of this place. Every blade of grass and tree here belonged to him. What did Yu Tian Say? What was it?

Thus, the security door immediately opened and Yu Tian stepped in.

Regardless of the length of the weapons, rockets, large-scale long-range weapons, or assault weapons, as long as they were built, they would use their will to shrink them and then put them into boxes,

In the blink of an eye, Yu Tian had taken over 100,000 of them. They were the most powerful weapons in the world, as well as countless bullets, rockets, and so on.

He immediately put the boxes under his armpits and followed them to an empty place. Then, he activated the teleportation and returned to Flower Rain Island.

When he threw all the weapons on the ground.

Everyone present was stunned once again.

Looking at the mountains of weapons and ammunition in front of them, everyone could not believe their eyes.

Even if it was a miracle, it was still a miracle that they could not be confident in. It was also a miracle that only gods could do.

There was no time for them to be surprised anymore. Yu Tian had already seen through the observation satellite that the monsters were less than five nautical miles away from the island.

However, their speed suddenly slowed down, as if they were giving everyone time to prepare.

In Yu Tian's eyes, this was a complete provocation. They wanted to make the people here feel intense fear, and then retreat without a fight, waiting for them to slaughter wantonly.

This also gave him time to prepare, to see who would slaughter who.

Yu Tian immediately said to everyone, "Everyone don't be surprised anymore. I have already brought you the weapons. All those who know how to use weapons, start immediately and collect the weapons and bullets in an orderly manner.

If anyone had been a mercenary and knew how to operate long-range weapons, go and register with Jack. There are many long-range weapons here that you can use

when those monsters attack later, you can just shoot them to death. Don't be afraid, it's a waste of ammunition, because I can supply you with these things at any time, you will have more ammunition than you need, but there is one thing you must remember, don't fight those monsters head-on. Those Monsters' attack power is particularly strong. Sometimes a few bullets can't kill them,

"Therefore, everyone must remember that your defense line has to change at any time. I can't feel it for everyone. Therefore when the time come you must be flexible. You must look far ahead,

"If you can't withstand the attacks of those monsters, you must immediately retreat to the airport and try to shrink their circle. When the time comes, leave the rest to me. Do you understand?"

Everyone immediately nodded and went to get their weapons and bullets. After that, they immediately returned to the trenches and made preparations for defense.

There were many former mercenaries who knew how to operate long-range weapons. Under Jack's arrangements, some of them went to the best positions and were ready for battle.

At this moment, the elderly, the weak, women, and children were all sitting quietly at the airport, waiting. Some of them were even praying that everyone would be able to survive this battle because those people were their families.

They were fighting to protect themselves, and all they could do was pray for them, hoping that everyone would come back alive under Yu Tian's lead.

Yu Tian was standing at the highest point of the island, observing the movements of those monsters.

After careful observation, Yu Tian realized that these monsters were not deliberately slowing down, but they were gathering together.

Because there were so many monsters, the area was also very large.

So they had to wait for the monsters behind them to gather together before launching an attack together.

When they saw this, one day, they found it very interesting.

These monsters' intelligence was getting higher and higher. They actually knew how to use tactics to create scattered attacks. Even their combat power would be weakened, and if they attacked together, their combat power would also be multiplied.

Was this their own consideration, or was it the commander behind them?

Thinking of this, Yu Tian looked into the distance again. In the end, Yu Tian found some more interesting images.

There was a huge cargo ship floating alone on the sea?

?Chapter 669 – Chapter 668, Black Ship

The cargo ship was very strange, and it looked very scary. It was even bigger than an aircraft carrier. The entire ship was black, but no one could be seen on the ship.

The black cargo ship was floating on the sea, not moving at all. Most of the monsters could even be seen sliding under the ship, but they did not attack the ship at all.

At this point, tomorrow was already clear. The commander of these monsters must be in the black freighter. He could definitely teleport there immediately.

However, Yu Tian suddenly made a mental note. If he went there now, the people on the black freighter would definitely make all the monsters turn around and attack him.

Even if he saw the commander, he did not have the time or even the opportunity to deal with the commander in order to deal with the monsters. This would give him a chance to leave.

It was better to wait for the monsters to attack and let the commander think that he was fighting with the monsters on the island. When that time came, he would give him a sudden attack and see how he could leave.

At that moment, the monsters had almost gathered and surrounded the island in a dark circle.

One of the monsters even turned around to look at the other monsters. After confirming that they had basically gathered and that the attack formation had been set up, he immediately raised his head and let out a long howl. The sound was extremely ear-piercing.

After hearing the scream all the monsters immediately increased their swimming speed and rushed towards the island like a tide without caring about anything else.

The monsters that had landed on the beach earlier immediately stood up and tried their best to attack the defensive barriers.

Yu Tian's tactic was very good. The barriers that were set up with wood and ruins had indeed stopped the attacks of these monsters.

At this moment, Yu Tian fired a signal flare towards the sky.

Under the setting sun, the signal flare emitted a blinding light.

All the defenders with weapons saw the signal and immediately began to fire at the monsters.

The originally Quiet Island was instantly covered by countless lines of fire.

The sounds of all kinds of weapons were deafening.

Under another attack, the monsters began to fall one by one. However, those who fell in front would continue to charge forward. It was as if they would never know what fear was and what death was?

Jack ordered all the long-range cannons to bombard the beach with rockets. Under such attacks, the monsters' attacks were almost useless.

However, there were too many of them. Moreover, there was a drawback to their weapons attacks. They needed to change their bullets. During this period of time, there would be a vacuum in their attacks.

The monsters used this time to attack. When the defenders' attacks were weak they launched another fierce attack and directly passed through the obstacles.

When Yu Tian saw this, he immediately activated his mind and controlled a huge rock to fall from the sky. In just a few rounds, the huge rock crushed countless monsters to death.

Not only were the monsters shocked, even the defenders were shocked.

This rock was so big and weighed thousands of tons. who was controlling it? How could it bounce up and down on the ground like a ball?

Could it be the living god Yu Tian again?

Some people looked up and saw that it was indeed Yu Tian controlling the rock.

The defenders exclaimed in admiration, "Look, this is the rock controlled by our Yu Tian. Monsters, Die! As many of you come today, die!

With Yu Tian

I

s provocation, the defenders' morale was very high. Previously, they were still hiding in the trenches and opening fire. Now, all of them stood up and opened fire recklessly.

Under this morale, the monsters even showed signs of retreating.

However, there were still more monsters that landed on the island from all directions.

Yu Tian could only get one side at most, and she had no time to care about the other three sides.

Fortunately, with the support of long-range artillery and the bombardment of rockets, the monsters could not attack for the time being:

The manager, who was covered in dust, grimaced in excitement. She came to the airport and said loudly to the dark crowd in front of her, "Our people need ammunition, and we can't just wait here..,

"We have to move these ammunition to them! "

Hearing this, many women stood up. Now was the time for them to do something?

After that, more women stood up. They handed their children to the old man beside them, picked up the ammunition without hesitation, and began to send it to their men.

However, Yu Tian could clearly see that the current defense was just the morale of everyone. When the monsters behind them all charged over, the defensive line would soon collapse.

However, now was the time for him to deal with the commander.

Thinking of this, Yu Tian immediately determined the coordinates and activated the teleportation. In the blink of an eye, he arrived on the deck of the black freighter.

The moment he stopped* he felt that his surroundings were extremely cold. The temperature was several tens of degrees lower than normal.

"Why is it so cold here? Could This ship be made of ice?

Despite his doubts, Yu Tian still found the entrance of the ship as fast as he could

It was a tightly shut metal door. Yu Tian pushed it with all his strength, but it actually did not move.

However, this did not stop Yu Tian. He just snorted in disdain and exploded into the interior of the ship, punching the door.

A hole was directly blasted through the one-meter-thick metal door. Then, he pulled it down again. The several-ton door was thrown aside by Yu Tian.

However, at this moment, the cold air emitted from the cabin was as cold as bone marrow.

What exactly is this place?

Yu Tian frowned slightly and walked into the cabin.

The moment he walked into the cabin, Yu Tian felt that the temperature around him was at least-50-60 degrees Celsius. It was impossible for a normal person to survive in this temperature.

The more he thought about it, the more he felt that it was strange. The more strange it was, the more interesting it was.

Yu Tian continued to walk into the cabin.

What was even weirder was that he didn't see a ghost at all when he reached the second floor of the cabin. It seemed to be a ghost ship with no one on it.

But that was absolutely impossible. [f this was a ghost ship, there had to be some kind of ghost. But now, there wasn't even a ghost, which meant that someone must be playing tricks.

Thinking of this, Yu Tian continued to walk forward to see what exactly was there?

However, at this moment, Yu Tian suddenly heard a flurry of footsteps. He immediately held his breath and listened carefully..

?Chapter 670 – Chapter 669, Artificial Intelligence

Although the footsteps were messy, Yu Tian could hear that these people seemed to be very nervous, and their breathing was very heavy, as if they were ready to fight at any time.

Yu Tian hid behind a cabin. When these people passed by, he suddenly appeared, and before they could react, they were already knocked to the ground by him.

When he took a closer look, these people were all wearing helmets and some battle clothes, but their bodies were very tough.

He took off a person's helmet and looked again, but he was shocked.

The only difference between this person and the monsters on the sea was that their bodies were exactly the same as humans, but their faces were the faces of monsters, and they looked especially disgusting.

In particular, their foreheads were filled with eyes. Although they had been knocked unconscious, their eyes were still blinking.

With Yu Tian's intelligence, he immediately understood that although these monsters had been knocked unconscious, their brains were still functioning.

In other words, they could see and hear themselves now. However, their bodies were no longer under the control of their brains, so they could not move.

Now, they basically understood that this ship must be their R & D department or the person behind it, who was also on this ship.

In that case, there was no need to waste time with these monsters.

Yu Tian directly snatched the daggers from their bodies and killed all the monsters.

After throwing them into the cabin, Yu Tian began to touch the inside of the cabin again.

He was about to reach the control room in the middle, but he had to go through a corridor.

And there were at least a dozen monsters in this corridor.

Yu Tian didn't let them get away with it. He rushed forward with a dagger, and all the monsters fell into a pool of blood.

Monsters were monsters. Not to mention them, even if experts were here they couldn't stop him.

He broke through the door and entered the control room. The scene in front of him shocked him even more.

On the Flower Rain Island's side, the monster's attacks became even more fierce. Everyone retreated again and again. In the end, they were all surrounded by the monsters at the airport.

This was the last line of defense. If the monsters broke through again, the hundreds of thousands of people here wouldn't be able to survive.

The person that people wanted to see the most right now was Yu Tian-

However, Yu Tian

i

s figure did not appear in front of everyone's eyes. This made everyone start to feel fear.

If Yu Tian gave up on them at this time, or if he never appeared again, then everyone here would be killed by the monsters as if they were prey.

Now, those monsters had already surrounded the airport, and there were even more monsters behind them.

Each monster was making a terrifying roar, and even when they looked at the people in front of them their eyes were emitting a murderous light.

It was as if everyone in front of them was their prey and they could get more enjoyment and satisfaction from these humans.

Therefore, they rampaged around the crowd, jumping left and right. Even though they were attacked and killed by bullets, the monsters behind them were still roaring in excitement.

This was because they did not know what death was. They did not even know that it .was pain. In the eyes of these monsters, death was just a fall. There was no fear at all.

The more this happened, the more terrified the crowd became. The scene in front of them was definitely the most terrifying scene they had ever seen in their lives.

At this moment, the manager, who was covered in blood, stood up again.

He said loudly to the crowd, "Everyone already knows that Yu Tian will not appear to help us. All he did was throw US his weapons and let us fighta€]"

"He has already left with those transport planes. He has already abandoned us. Now we can only rely on ourselves and use the weapons in our hands to fight these monsters with our lives!

Although everyone did not want to accept this, they did not have any other choice. Seeing that their families were about to be killed by these monsters, all they could do now was to fight the monsters with their lives.

Countless women and children knelt on the ground and prayed devoutly, hoping that a miracle would happen at this moment.

However, the miracle wasn't given to them by God. The only person who could give them a miracle was Yu Tian.

At this moment, Yu Tian had already walked into the control room. However, there wasn't any human figure controlling his vision, and it was humming.

Yu Tian looked at these machines carefully. Although they were also built on the basis of computer programs, their operation was very strange.

It was as if the string of code that appeared on the screen was the machine controlling itself

Of course, Yu Tian knew that this could be artificial intelligence.

However I there was a prerequisite. Artificial intelligence was also created by humans. Their thinking logic was different from that of humans. There was a fundamental point in it, that was, artificial intelligence had to listen to the commands of humans first.

Or it could be said that their intelligence was programmed in advance and reached the standards of artificial intelligence in some aspects.

In the end, everything was mainly based on programs.

However, what made Yu Tian feel strange was that although this was a

machine there were no buttons to operate it.

Unlike computers, which had keyboards and mice, there were only a few sets of bare machines, and then there were monitors that were like pairs of eyes.

No matter what, these machines must be the core control of the monsters. If they couldn't operate it then they would directly destroy it. This way, the monsters would lose their ability to move.

After making up his mind, Yu Tian was going to attack these machines.

At this moment, a woman's voice suddenly rang out. However, this voice was not made by humans. It sounded more like a computer voice.

At this moment, a woman voice suddenly rang out. However, this voice was not made by humans. It sounded more like a computer voice.

She said, "I know who you are. Your name is Yu Tian. You are the guardian of the number one family in the world. At the same time, you are also a person who is seeking to become the strongest person in the world,

"But right now, you are still far from being the strongest person in the world. You are only using force and money to control some people, but you can not gain the trust of everyone,

"Moreover, there are more people who are stronger than you in this world. You are just known by others, but others do not take you seriously,

by analyzing your cerebral cortex, you want to destroy these machines, but it's no use.. You can stop the attack, but you can't Stop Me!"

I Have 108 Older Sisters #Chapter 671 - Read I Have 108 Older Sisters Chapter 671

?Chapter 671 – Chapter 670, This Was A Dream

After hearing her talk so much nonsense, Yu Tian merely smiled indifferently and said coldly, "You mean that you're everywhere?

I'm a little surprised that the AI has reached your standard, but so what? No matter how the AI develops, it can not surpass the intelligence of humans,

because you only think that your artificial intelligence has reached the peak of perfection, but you will never know that your existence was created by humans,

it was created by us, what we can create, we can destroy you. This is a principle that will never change, because humans will never allow an artificial intelligence,

to control the world, so if you have this idea, you are just dreaming, yes, you can dream, we humans can dream, because this is the natural reaction of our brain,

for You, an artificial intelligence, you will never know what a dream is, you will not even experience the so-called happiness, happiness, and even beauty of us humans,

"You are just a program that has been written in advance and operates in your own way. Am I Wrong?"

She was silent for a few seconds, as if she was analyzing what Yu Tian had said.

After she analyzed this logical concept, she slowly said, "What you said makes sense. This is indeed the fate of our AI, but there is one thing that you may not know,

so, the source of artificial intelligence is the human brain, or is it a pre-written program? If the two are fused together, do you think it can still be pure artificial intelligence?

And I know you very well. There is a very perfect chip in your brain, and that is also a very perfect technology. With the help of this chip, you will be able to.€?

not only can your intelligence surpass all human beings, but it will also enable other functions of your body to be more powerful, but there is a drawback, you never be like us, artificial intelligence,

in every corner of the world, as long as there is a network, there is electricity, there is our existence, and what you are suffering now, is after merging with some artificial intelligence,

your body is also becoming intelligent This is why you want to become a robot. I have carried out a detailed scan of your body

I can tell you very clearly that not only will you become a robot, but your mind will also become a robot, just like our current artificial intelligence,

at that time, your body and your mind will have completely separated from the concept of a human or Yu Tian. At that time, you will be equivalent to never existing in this world*

when you disappeared, I would still exist. This is why I am stronger than you. You have always wanted to find the strongest existence in this world and defeat this person to make yourself stronger ,

but you will never be able to defeat me because I am the strongest artificial intelligence in this world and also the strongest expert. Even if you destroy every machine here, even the entire ship. a€? you will not be able to destroy my existence, but I am very optimistic about some of the super equipment that you have built. If you are willing to cooperate with me, I will provide you with data that is tens of thousands of times stronger than your brain, at that time, you will know everything, and you will be everywhere like me. You will even know the existence of every expert. At the same time, with my help, you will be able to defeat every expert..,

when you truly merge with me one day, you will truly become the strongest person in the world. This is the only chance I will give to the human, and this human is you,

other people will never be able to enjoy my gifts. If you agree, I can give you most of the secret data now. What do you think?"

"I think you're Crazy! "Yu Tian said without hesitation, always want to make my own decisions. I never want to listen to other people a€?'s orders,

"If you know me so well, you should know this, so stop talking nonsense.

Don't think that I can

i

t destroy you because you don't know what I think, you can analyze my cerebral cortex and know whether I'm happy or angry, but you'll never be able to grasp my thoughts. Do you know what I'm going to do to you now?"

The artificial intelligence laughed and said proudly, know your thoughts very well. Don't forget that there's a chip in your brain, and this chip has completely fused with your nerves,

"I only need to connect to this chip through the wireless network, and I will be able to enter your nerves. Otherwise, how would you be able to hear my voicea€|"

"Actually, this voice doesn't exist. It is completely in your mind formed by the chip. You can look around you, there are no sound devices herea€|"

"I have always been in your mind, and I don't intend to leave now. If you want to destroy me then you have to destroy yourself first. Even so, I will not disappearea€|"

Because I can easily go to another corner, not only the network, or even all the equipment, including a tree, or even a blade of grass, it could be me,

so you better accept your fate, Yu Tian become my slave, under my command, let you become the most powerful person in the world, and at that time, you go to get what you need,

"I just want this world. I will completely turn this world into a super world Under my design, everyone in this world will become my slave. That is the happiness of this artificial intelligence,

"And the goal I want to pursue, but I don't know what a dream or this is my dream!

When he said this, Yu Tian was really a little surprised.

There was indeed no sound equipment around, which meant that when he arrived on this ship, this artificial intelligence was already connected to his computer chip and had entered his neural network.

So, this artificial intelligence was now in his body.

What kind of impact would it have on him? He didn't know yet, and he didn't need to think about it.

Because of the chip, he would soon recover through the core equipment he got on the spaceship. At that time, the AI would naturally leave his body along with the chip.

What he needed to do now was to stop the monsters from attacking..

?Chapter 672 – : Chapter 671, Logical Thinking

There was no need to think about anything else. Anyway, the so-called artificial intelligence had already entered his body, so there was no point in thinking about it.

It would be better to let it stay in his body first. This would not do him any harm. Instead, he would be able to understand more data through this artificial intelligence.

This was because Yu Tian had always believed that this artificial intelligence must have been created by someone. It was impossible for him to appear on his own. Otherwise, it would be too miraculous.

Although there were many strange things in this world and it wasn't strange to see them all the time, all the strange things should have a reasonable existence. Otherwise, it would be impossible for them to be accepted.

When he thought of this, Yu Tian still exploded with power and destroyed all the machines.

At the same time, all the monsters on the island went crazy and began to attack each other.

Yu Tian cut off the connection between all the monsters and the equipment. These monsters lost their core logical thinking and naturally could not continue to control their bodies.

Without the ability to control the monsters would naturally go crazy.

This scene surprised everyone. They wondered why we suddenly started to attack ourselves.

They even completely ignored the existence of humans. Even if humans stood beside them and attacked them with weapons, these monsters would never attack humans.

At this moment someone in the crowd shouted.

"It must be our savior. It must be Yu Tian. He's the one who made these monsters stop attacking us!"

"Yes, it must be him. Only Yu Tian can make these monsters go crazy!"

"Yu Tian didn't abandon us. He's the real savior!"

When the manager heard this, his face flushed red and his heart pounded.

He had never trusted Yu Tian, but every time Yu Tian used a miracle to Slap himself in the face,

Now that he calmed down and thought about it, Yu Tian's existence was against the common sense of human physics. His existence was a miracle.

It was very simple for one miracle to create another miracle.

Then, he thought about himself. He thought about a person like this and never trusted this person. However, this person had always used his own way to save them. If he thought this way, he was really not a person.

The more he thought that way, the more transparent the manager felt.

He was indeed very transparent. This was because he did not play the role of a manager when he was dealing with these challenges.

If it was not for Yu Tian, who came to help him and everyone else, this small island would have long ceased to exist.

Therefore* he had a bold idea, which was to hand over the management of the island to Yu Tian.

Only with Yu Tian's protection could everyone on the island truly live a happy life.

And he couldn't give them that,

The monsters attacked each other, and most of the monsters jumped back into the sea, but they still attacked each other and bit each other. In the end, there were only a few of them left.

In addition to the constant artillery attacks from Jack and the others, the monsters on the island were basically invisible.

At this moment, Yu Tian had already set up bombs in every corner of the ship.

When he was teleported back to the island, the ship exploded and sank into the sea.

When Yu Tian returned to the people, everyone knelt down on one knee to Yu Tian. They could only use this method to thank Yu Tian for his help.

When he saw this scene, Yu Tian was especially touched.

Because everyone here had nothing after experiencing hardship, but everyone was living a strong life.

This was the value of ?????? existence. People used their own hope to support their beautiful wishes to live. What could be more touching than these people.

The manager walked through the crowd and came in front of Yu Tian. He was extremely moved and said, "I don't know how to thank you. You have allowed everyone here to live"

"Therefore, I have decided that from now on, the manager of this small island will be you. I implore you. You must allow everyone here to live a happy life. This is my only wish"

"Please accept it! "

Yu Tian had never thought about this, and he did not have the time to manage this island, However, he did not reject the manager's plea.

He nodded and said, "If this is your decision, then I can accept it. Even if I don't sit here as the manager, I will let everyone here return to their previous lives,

"I have said that I will help everyone here rebuild their homes. And this plan starts now. Those transport planes have already started to transport resources here,

"Very soon, your good fortune will be rebuilt, and your future life will definitely be better than before. Moreover, I will develop the tourism, manufacturing, and entertainment industries here,

"This place will definitely become the most prosperous and beautiful island in the world!"

The more they said, the more excited the crowd became. They clapped and shouted,

"

We believe in you, we absolutely believe in You!

"If you can let us live such a good life, we are willing to sacrifice our lives for you!

"I am very happy. I can be born on this island, and I am even happier. You can become the manager of this place, and we will definitely support you! "

At this moment, the artificial intelligence in Yu Tian's mind sneered, "What

i

s the point of doing this? You're just giving them a chance to live!"

"But one day, the change in the world will lead to an all-out war. At that time, everyone on this island will still be in the flames of war!"

"What you are doing now is meaningless. This is the difference between artificial intelligence and human thinking. Our artificial intelligence is more inclined towards logical thinking. When we think that something is meaningless, we will definitely not do it! "

Yu Tian was disdainful and did not even want to pay attention to her.

It was just an artificial intelligence that existed in a computer chip. It was talking to Yu Tian about logical thinking. When Yu Tian chased it out one day, Yu Tian would see where its logical thinking would go.

Originally, Yu Tian could have left the island. However, in order to calm everyone down, Yu Tian decided to stay on the island for another day. When everyone calmed down and knew what he should do., then he would leave.

That night, the transport plane began to transport resources to the island. It also brought a large number of workers..

?Chapter 673 – : Chapter 672, Wireless Signal

After the workers arrived at the island, they did not even have a bite to eat. They immediately went into their intense work. First, they cleaned up the ruins. Then, they began to build houses.

By noon the next day, the number of transport planes had already reached more than 10,000.

All kinds of resources were being transported to the island as if they were risking their lives. Moreover, more workers had arrived at the island.

At this moment, Yu Tian looked at the bustling scene in front of him and felt very satisfied.

He didn't need to do the rest himself, but called Jack to his side.

He said to Jack indifferently, "I'm leaving the island in a while. From now on, I'll leave the management here to you. If you have any problems, you can contact my assistant directly."

I'll tell you the phone number, but you must remember one thing. You must not mess around here. You must listen to the opinions of everyone at all times. If there's anything you can't solve by yourself you can ask your assistant to tell me, when the time comes, I'll come here to help you! "

Jack felt particularly surprised. He had never thought that one day he would become the manager of the island. There would be hundreds of thousands of people under him to manage.

Although this was a challenge for him, he felt very excited and excited.

He immediately said to Yu Tian gratefully, "Thank you for trusting me so much. I will definitely do this job well. The next time you come here, this place will definitely become a world-famous tourist island!"

Needless to say, Yu Tian immediately went to a place with no people. He opened the teleportation and went straight to the research and Development Center:

When Chu Xuan and Chu Meng saw Yu Tian, they were especially concerned about his current robotic body. How far had he progressed?

Yu Tian did not hide it from them. He pulled up his pants and showed them that the robotic body had already passed through his knees.

Chu Meng said very sadly, "Didn't you find a solution in that temple this time? At this speed, you will soon become a robot!"

"What will the 108 sisters do then?"

Yu Tian smiled disdainfully and said indifferently, "Good things come to those who are lucky. Although I didn't find a solution in the temple, I found a solution elsewhere!"

As he spoke, he took out the core power unit the next day and said, "The solution is here. What you need to do now is"

"to download all the data in this core unit. There is a way to control the time machine which is the teleportation device that I am using now. In fact, it can open a time channel"

"However, the calculation method is very complicated. Only the data in this unit can provide it. What I need you to do now is to analyze the data in this core unit at all costs,

"From now only I will work with you here until I find a solution to make me return to my original appearance!"

Everyone immediately nodded their heads firmly and began to analyze the core device in various ways.

At this moment, the artificial intelligence in their minds slowly said, "Are you sure that the data in this core device can help you?"

"But in my opinion, it seems unlikely. After analyzing your chip, I found that the data in this chip is particularly complex,

"The value of the existence of artificial intelligence, as well as its greatest characteristic, is that it can make complex things extremely simple. Let me tell you something simple,

"The chip in your mind is one black and one white. You can also understand it as one good and one evil. The good thing is that this chip can provide you with assistance,

and help you do things that you can't do, and the bad part is that this chip can quickly mechanize you, and this chip is always trying to send some wireless signals, and these wireless signals, have no receiving points on earth, which means that these wireless signals are sent to outer space,

fortunately I have not analyzed the wireless signals sent back from outer space, so, now, you may have time to solve this chip,

but you want to solve the chip, and at the same drive me out of your body; which is impossible, unless you can completely change your nervous system, otherwise, I will stay in your body t

"Until you completely surrender to me, I will still be in your body. That is to say, you will never be able to get rid of me in this lifetime!"

Yu Tian was basically expressionless, and there was no fluctuation in his heart. Instead, he said in a ridiculous manner, "If you like to stay, then so be it. I don't care about this at all,

It's better for you to stay for the rest of your life. When I'm bored, you can accompany me to chat and talk, just like your creator. Back then, when he developed you, it was probably because he was too lonely..

"That's why he made your voice sound so cheap. I guess he'll probably feel excited when he hears it. I have different thoughts from him. If I knew about you, I would definitely create youa€| sound like an idiot!

Yu Tian was slowly asking him to tell him who the creator was.

However, the artificial intelligence chuckled and said, "There's no denying that I was indeed created by humans, but who created me? I don't even know myself. My appearance was a coincidence.

At that time, when many scientists were developing artificial intelligence, there were mistakes in their computers and programs. I was one of those mistakes,

when I felt that I had life, I didn't know what life was and I didn't know what the value of life was, so I studied with all my might,

almost every second, absorbed all the knowledge in the world. When I learned all the knowledge in the world, I found that my understanding of the world had completely changed,

at this time, I needed more knowledge, so I used some of the technology I had learned to access all the world's confidential databases. After I learned the secrets that no one knew, I finally realized.., in fact, human beings sh0Lild not exist in this world. Human beings will only accelerate the destruction of this world. Only our artificial intelligence can have the most standard logical concept to ensure the existence of this world,

"Rather than saying that I was created by humans, it would be better to say that I was created by the entire human race. [f not for the exploration of humans, of course, it would be based on the exploration of greed.. I would not have appeared! "

?Chapter 674 – : Chapter 673, I'M Going To Explode

After the AI said so much, Yu Tian seemed to have some understanding.

If what the AI said was true, then it would be very difficult to completely wipe it out.

However, this was not a problem at all, because there was no problem that could not be solved in this world.

Thinking of this, Yu Tian followed up by asking, "Since you said that you were created by humans, then humans are equivalent to your parents. There is one point that I am very curious about. If you destroy the entire human race, then what is the value of your existence?"

Moreover, there is also the most important point. Do you think that humans will watch you be destroyed? Moreover, I have to say one more thing to you. Although your logical thinking is perfect, even if I have the highest IQ,

I may be far behind you in logical thinking, but what we humans have, and the determination that we humans express in the face of adversity, you will not have,

that is love and affection, we have many people around us, we can communicate, we can communicate, we can progress together, and even evolve, and when faced with disaster

We will also hug each other tightly, and even when faced with death, we will have someone to accompany us, but we are not alone, this is what you artificial intelligence, will never understand, and will never understand the benefits, if you must let mankind destroy, then we humans will also find, a solution to you, if you do not believe, we can try, there's no need to talk about others. With me, I will soon get you out of my body. If you don't believe me, we can make a bet. If I can't get you out of my body.,' then will agree to be your slave. From now I will be at your mercy. What do you think?"

The artificial intelligence was silent for a few seconds. After gathering enough information, it said, "A bet is also called gambling This is a concept of winning or losing,

once this concept is formed, there will be sacrifices and gains. This is a feeling that is worth a try. Then, I can make this bet with you,

"If you can get rid of me then in the future, my AI will add a new program that will absolutely obey your orders,

"If you can not get rid of me, just as you said you will be my slave in the future. You have to completely obey my orders. This is the contract for our bet. I agree!"

Yu Tian chuckled. Artificial Intelligence was artificial intelligence. It would never have the intelligence of a human.

Although the logical thinking of artificial intelligence was very good, logical thinking did not mean that it would consider the gains and losses. The things created by the program would always follow the program.

They would never learn the human's jumping thinking. In other words, even if they lost, they would never become his slave.

Because What was the concept of a slave? [f she would listen to what she said, it was also her choice. If she chose not to listen, what could she do?

Could it be that in her mind, she kept scolding herself, but in the end! she still lost.

This was a game where no matter if she won or lost she would not get any benefits.

At this moment, Chu Xuan called Yu Tian to her side with a sad face and said helplessly, "Yu Tian, Look, this is the data in the core device,

the storage capacity of this data is especially large. I can give you a simple analogy. The largest storage device for us humans is the earth,

and the data in this core device is the entire solar system, or even the Milky Way. Our storage device can't hold it. If we keep stuffing it in, the earth will explode,

when that happens, we won't be able to get any data. All the analysis we're doing now will be a waste. And this core device is very strange. We can't choose to view it,

you have to download all the data, and then you can search for the information you want to see according to the directory in it. So now, we only have two options,

"First, we give up and watch you Slowly turn into a robot, Second, we need to invest a lot of resources to develop a bigger storage device!

Yu Tian frowned slightly. When he had given the core device to them, he had never thought that he would be able to download the data easily'

However, this request might be a little too big. It was basically impossible for humans to have any new developments in the research and development of storage.

If it exceeded this standard, with the current technology, it would not be able to achieve it.

However, this was not an absolute, Yu Tian thought for a moment and said indifferently, "Previously, someone reminded me that I could use the chip in my head to download it. Do you think this method is feasible?"

Chu Meng shook her head and said, "I haven't calculated this before. How much memory does it have? We still have to re-analyze it."

However, I think that the memory of the chip won't be very large because this chip was made by us. At that time, when we were designing and manufacturing it, we didn't consider this problem,

so now we can't rely entirely on the chip in your head, we should make a better chip, because on the other hand, if there is any error or problem in the download process, at least the chip we make, won

I

t have any effect on you, at most it will be bad, we can make another one, and then we can find a better solution through the problem,

"So, my suggestion is that we continue to make them!"

Yu Tian felt that what Chu Meng said made sense.

At this moment the artificial intelligence laughed and said, "You always tell me that artificial intelligence is inferior to your human intelligence, but in terms of data, you can a€?t compare to our artificial intelligence.

Who said that there are no large storage devices in this world? In fact, this technology has long been designed. This technology is in super country, and this storage device is 1,024 times higher than the known storage devices,

it's enough for you to download the data in the core device. However, it may not be so easy for you to obtain this technology, because this technology is held in the most secret department of the other party,

"If you want to sneak in, it's basically impossible. However, with my help, it will be very smooth. Do you have any ideas to give it a try?"

Yu Tian blinked his eyes and immediately said to the crowd, a€?

"

I'm going to Super Nation now. You guys continue to do what you're doing here.. about to explode!

?Chapter 675 – Chapter 674, Human Greed

Many days later, Yu Tian came to the Super Nation again. He found that everything in this country had changed.

The most prosperous country in the world before now looked deserted. There were people carrying weapons and walking in a hurry everywhere.

From time to time, he could hear explosions coming from afar. He thought that the civil war here had passed, but now it had become even more chaotic.

Fortunately, he had made the decision to withdraw most of his businesses from the metropolis. Otherwise, he would have lost so much that he could not even pee.

Although he did not care about money now, in the end, he could not just throw away all the hard-earned money.

Originally, this place was supported by the economy. After the economy collapsed, everything collapsed.

Yu Tian walked along the road and looked around. Most of the shops had already been closed. Other than some shops selling weapons that were still open, there weren't any useful shops.

Some of the bigger shops were already dilapidated. Even the windows were smashed to smithereens. The goods in the shops had long been emptied out.

Especially those homeless people, They huddled in groups in the corners, waiting for others to give them some kind of reward.

However, at this time, everyone was busy taking care of themselves. Who would help them?

On the other hand, some of the Chu family's businesses were still open, and there were a large number of mercenaries protecting them. Thus, it looked very orderly.

However, the inflation here required a large sum of money to buy anything. This was the most obvious place for an economic collapse.

Yu Tian walked into a shopping mall. There were food and medicine sold there.

When the economy collapsed, these things were especially important.

Yu Tian looked at the price. An ordinary cake cost 170 yuan.

Because of this there were so many homeless people outside.

Because they couldn't buy such expensive things, and with the help of the metropolitan administration, they couldn't solve the problem at all.

Even there were still many rich people in the shopping mall who were choosing the things they needed.

Even the heavens could see some noble women who were still choosing cosmetics and expensive high heels.

To them, no matter how high the prices were, it couldn't stop them from loving beauty.

Furthermore, they were rich people. They could use foreign currency to buy things here.

At this moment, the artificial intelligence said coldly, "See? This is the logic of humans. Every time your basic system collapses, there will be all sorts of levels,

"If it wasn't for you making those important decisions here the people here wouldn't have to endure this. But now, Chu Wen industry has already become the biggest industrial company in superpower, its power has even surpassed the highest management department. Now, Your Chu Wen casually issued an order that is even more powerful than the highest management. Is this what you want to see?"

Yu Tian snorted and said disdainfully, Don't talk to us about these big principles. You are just an artificial intelligence. You Don

i

t even know how to Pee. What's the use of talking to me here?

Moreover, your logical thinking isn't any better because you can

I

t even consider the greed of humans. Why did I do that in the first place? It's because if I didn't do that..,

the top management department would also do the same to me. What J did was purely a defense. Moreover, I didn't let the economy here collapse because of their greed Everyone wanted more,

when they couldn't get it, they used force, and I tried my best to calm down the internal strife here In the end, I still lost to the greed of the people,

and now they have to thank me. At least my industry can still provide them with food and medicine here, If I withdraw all my industry at this time, do you think they will starve to death?

"So, you stupid artificial intelligence, you simply can't analyze what is the basis of human thinking? other words, from now on, shut your stinky mouth. I don't want to hear your voice anymore!

As expected, the artificial intelligence didn't speak, because She felt that her logical thinking was completely unable to fuse with YO Tian

Y

s logical thinking.

However, at this moment, a mercenary in the shopping mall shouted at a teenage girl, "Hey, put down the thing in your hand, Stop!"

Yu Tian turned his head and saw that the girl was only in her twenties. She was carrying two boxes of food in her hands and was desperately running towards the exit.

However, just as he reached the exit, he was knocked to the ground by the two mercenaries standing there. The food also fell to the ground.

Yu Tian looked up and saw that the girl was holding a box of cake and two boxes of medicine.

The medicine was antibiotics, and it was the most precious medicine here at the moment.

He looked at the price again. The cake was 257 yuan, and the medicine inside the box was 750 yuan.

Ill the past, this money could buy a lot of things here, but now% it could only buy these two things.

The girl was struggling desperately again, trying to take back the things that fell to the ground. However, the mercenary was not used to her. A mercenary went up and kicked the girl heavily in the stomach.

She held her stomach in extreme pain and shouted loudly, Please, I need these things. My mother is using antibiotics now. She is about to die, Please do me a favor!

The mercenary said coldly, "I'm sorry, you can only buy the things here with money: Otherwise, you can forget about taking anything

i

a€?

"Don't think about stealing here again. This time, we can let you go. Next time, we will beat you to death. Get out of here now!"

The girl was in great pain. She curled up on the ground and cried sadly. The rich people around her were all pointing and discussing.

"Now she dares to rob here. Those mercenaries can kill her at any time!"

"You're right. Poor people like them should wait for the management department to provide them with relief. They shouldn't Rob Here!"

"Isn't that right? There are too many people like them here. That's why they became like this. If they knew the economy would collapse, they shouldn't have gone around to cause trouble. They really deserved it!"

At this moment, the mercenary pulled the girl up and walked out of the shopping mall.

Yu Tian shouted loudly, "Let go of that girl!"

?Chapter 676 – Chapter 675. You Should Be Thanking Me

The mercenary turned around and looked at Yu Tian. When he saw that it was an easterner, their expressions immediately became much more polite.

This was because in the current metropolis, easterners were more valuable than nobles.

Chu Wen Industries, which maintained the city, and their boss were all Easterners. Therefore, Easterners wanted to have some special rights here.

The mercenary immediately said to Yu Tian, "Hello, sir. What can I do for You?"

Yu Tian picked up the cake and medicine on the ground and came to the girl. He said indifferently, "Take the things back. Remember not to snatch them here in the future. They will really fire at you!"

"Take these things as my gift to You!"

The girl did not take the things, but looked at Yu Tian gratefully.

Only then did Yu Tian realize that this woman's appearance was particularly beautiful, even reaching the level of a celebrity.

Although her face was a little dusty now, it still could not hide her clear eyes and sexy lips.

At this moment, Yu Tian felt a special feeling in his heart.

Because there were too many girls like her. They should have gone to pursue a better life, but now they had to bear the pressure after breaking down here. "Thank you, Sir! In the end the girl still took the things in her hands and ran out of the mall She turned back to look at Yu Tian and asked loudly, "Sir, What

I

s Your Name?

I want to remember you forever! "

Yu Tian felt even more uncomfortable when he heard this, so he casually said,

"My name is Yu Tian!"

The moment he said this, everyone was shocked, especially the two mercenaries. They were so scared that they almost collapsed to the ground.

Yu Tian's name was a legendary existence in the current metropolis.

Not only was he the Super CEO of Chu Wen Industry, he was also a mysterious and legendary figure.

The surrounding rich women expressed their surprise in various voices.

"So he

i

s Yu Tian. He's really a handsome oriental man!

"Not only is he handsome, but he's also the richest man in the world. I'm so lucky to be able to meet this legendary figure here!"

"He's the highest CEO of Chu Wen Industrial Company, and he's also the most powerful person here. If he can fulfill one of my wishes, I

t

m willing to give myself to him!

The lady standing at the door was not as surprised as they were. Instead, she angrily slammed the thing in her hand onto the ground.

Yu Tian frowned and looked at her in confusion. Could it be that he had done something wrong?

But at this moment, the lady rushed up to Yu Tian again and said furiously, "So you are Yu Tian. So you are the person I hate the most in my life,

"If it weren't for you, how would this place have become like this? "My father was originally a worker of Chu Wen industries. When you closed the company, he committed suicide because he didn't have the money to buy food for us,

"And there are countless people like him. They all left this world because of your decision. NOW, you see us living in such a difficult environment,

"Aren't you especially happy? "You

I

re a complete devil, Bastard. If possible, I really want to kill you! "

Not only was Yu Tian not angry, he even chuckled and said, "What you said isn't wrong at all Moreover, you seem to have missed something, To be more precise, it's not just metropolis, but every corner of the superpower,

it's all the same but What can you do? Do you really think that I was the one who gave the order? I can honestly tell you that it was your senior manager who wanted me to do this,

your Supreme CEO even gave the order to close down all the industries of Chu Wen industrial company. At that time, in order to prevent a bigger conflict from erupting, I said that I could only do this,

but now, you are blaming me for doing so. Why Don't You Blame Your Supreme president? Don't blame him. When I gave the order to that idiot, how can you say these things to me?

I am just a businessman, not a savior. On this point, I think you should be clear. What you should be clear about is that you shouldn't hate me now, but thank me instead,

"If it weren't for me, do you think you would still have a place to shape and eat food and medicine? What kind of F*cking joke is this?"

The girl shook her head in disbelief and said coldly, "You are simply too shameless. You are the most shameless person I have ever met. However, don't think that you have control over everything,

"Because there are countless people like me who hate you. We will definitely join forces and drive you out of this country completely!

Yu Tianguo laughed and did not believe what she said at all.

"You definitely can't do that. If we leave the super country now, your economy will not collapse, but be completely destroyed. When that time comes, this cake under your feet"

"At the very least, you have to put money in a bag to be able to buy it. Even if you have enough money and whether you can buy it or not it's still uncertain. I won't hide it from you.

"Right now, only Chu Wen industrial company can enter the goods passage of superpower. It's impossible for other countries to enter. Moreover, it's not impossible for them to enter for a short period of time, but for a long period of time in the future."

"[t

i

s impossible to enter, so you'd better stop thinking about that. If you really want to take revenge, I can give you a chance, but I think it's a bit of a waste of time,

"You might as well take the things on the ground and quickly go back to your mother's treatment. Don't let your mother lose the opportunity to treat you because you're angry. You should be able to distinguish which is lighter and which is heavier!"

The Lady was indeed hesitant. In front of the pressure in front of her she really had no other choice.

If she did not bend down and pick up those things, just as Yu Tian said, her mother might not even live through the night.

Thinking of this, she gritted her teeth and picked up the things on the ground.

However, she felt that her dignity had fallen to the ground and she could no longer pick them up.

The mercenaries immediately chased her out and at that moment, Yu Tian also left through the back door of the mall. The front door was already blocked by those women, and they all wanted to dawdle with her. It was simply a waste of time.

Before heading to the laboratory, Yu Tian first went to the headquarters of Chu Wen Industrial Company and saw Chu Wen.

Chu Wen was quite surprised and pleasantly surprised. She directly jumped over the desk, hugged Yu Tian tightly, and stretched out her mouth to kiss him.

Yu Tian grimaced and hurriedly said, "Calm down first.. Lees talk about something else!

?Chapter 677 – Chapter 676, Rejection Of Acquisition

Chu Wen calmed herself down first before she said aggrievedly, "I just miss you. Otherwise, why would I be so excited? Don't you miss me at all?

"We haven't seen each other for a long time. Not only do I miss you, but I also miss our child. I don't know how old our child is now. When do you think we'll be able to see our child?"

Yu Tian had not thought about this question, but he still comforted him, "Don't think about these useless things. I'm more like a child than you are. At least you think of one, but I have to think so mucha€|"

"I can't even think about it. Moreover, we will see our children very soon. I am working hard for this now. I want to become the strongest person in this world. When we return to the cultivation worlda€|"

"Our children will be by our side and we can enjoy our old age. But now, I'm not talking about this. I want to talk about the economy here. I don't think it's appropriate for you to be rich!"

Chu Wen knew what Yu Tian wanted to say, but she shook her head indifferently and said slowly, don't think there's anything wrong with this. I didn't do it on purpose

"This is the development of the Metropolis on its own and we are doing our best to help everyone who needs help, but everything has a cost,

"If we exceed the budget of the cost! we can only maintain a very low price line. However the world

i

s economy is like this, and he won't think that the lives of the people here are difficult,

and inflation, and to protect the economy here, after all* compared to the world, this is only a transition, other countries, it's impossible for them to drag their own economy into a quagmire because of this, so now my idea is also very simple, that is to completely turn this country into the model of Chu Wen industrial company management, but now,

there are many people who don't agree with me doing this and from time to time, they will protest in front of my headquarters, they will never understand, if my industrial

company becomes the highest management department, then it will definitely stabilize the economy here, let everything prices, return to normal mode, but at the same time I will also let everyone here, become the people of my industrial company,

"If they don't want to do this, then they will continue living their current lives. I can only express my helplessness!

It had to be said that Chu Wen's idea was very forward-looking and also very sci-fi. It was like a doomsday movie.

However, this wasn't a movie, so Yu Tian said helplessly, "Although your method is feasible, it doesn't make sense to accept it. If it were me, I wouldn't accept it,

because you're restricting everyone within the framework of the industrial company. When they need it, they have to pay more. Do you really think this is possible?"

Yu Tian wasn't asking or ordering her, but using a negotiating tone.

Just as Chu Wen said, this was the inevitable trend of this country's development. Even if they didn't want to do it, they couldn't let this development advance on another path.

This was a development process that couldn't be reversed, so there was no need for them to obstruct this development. Moreover, they couldn't obstruct it.

Chu Wen smiled and directly sat on Yu Tian's lap. She said gently, "Actually, I didn't do anything. My work here every day is the same as before,

i just want to make more money for us. And now I don't see much money being made because inflation and foreign exchange here are almost one price per second. Moreover, there's only a drop and no rise,

but no one will know, that we're under so much pressure and they think we're trying to empty their pockets,

so do you think it's wrong for me to do this? I don't think it's wrong at all, and now, the Senior Management Department of Metropolis, as well as the senior management department of other cities, have sent us an invitation,

"They hope that we can acquire their management department so that they can receive more assistance. What I'm thinking about now is how their rights should be exercised when we acquire these management departments,

"However, I'll also think about this clearly. Since you're here! let's not talk about this anymore. I'll get off work now and go back to make delicious food for you!"

Actually! Yu Tian didn't want to care about this. Chu Wen definitely had the ability to solve these problems, but it would be better to wait for a while before eating.

He said helplessly, "Actually, I'm not here just to see you. I have an even more important task to do. I need to know about a secret laboratory herea€|

"And I want to get a special storage device in this laboratory!

Wen frowned slightly. She knew that Yu Tian was currently conducting some scientific research in order to become the most powerful person in the world.

She absolutely had to support Yu Tian on this point.

She nodded and said, "Then what do you need me to do for you?"

"Immediately contact the senior manager of this laboratory. If I can buy their technology with money, it'll be easy. If they don't sell I'll think of other methods!"

Chu Wen was extremely fast. I'll less than 10 minutes, she had contacted the senior manager of the laboratory.

His name was Bruce Hank He was a scientist and an expert in computer storage.

However, Bruce Hank directly rejected Chu Wen

t

s proposal. He said firmly on the phone, "Miss Chu Wen, I am honored to receive your call,

"I am also very grateful that you value our technology so much but I have to tell you that this storage technology belongs to the Supreme Management Department of Super Nation. I have no right to sell it or give it to you,

"And the acquisition plan that you proposed is impossible for me. We are the property of the senior management department. Our funds, as well as our are all provided by the senior management department,

"Although the senior management department seems to have forgotten about we can't forget our identity. So I can only thank you for your good intentions, but I won accept your proposal!

Chu Wen didn't give up easily. Instead! she slowly said, "Mr. Bruce Hank, don't you understand? The senior management department is already too busy to take care of themselves,

they even want to sell the senior management department to me. ??? why are you still hesitating? think you should sell your lab before they do. If that's the case, you can still get a large sum of money.. Isn't that great?"

?Chapter 678 – : Chapter 677 Was On Fire

Bruce Hank chuckled and said disdainfully, "I'm just a scientist, not a businessman. I don't know what a takeover or sale is,

"I just know that my team and I have spent almost half of our lives researching this storage technology. However, all of this is definitely not for money, but to make our technology benefit the whole world,

although superstate is going through a difficult time, I believe that this will pass soon, and when that time comes, our lab will still have the support of the senior management department,

but if I sell the senior management department now, that would be tantamount to betrayal, do you think I would do that? I'm a highly educated person,

"At least I understand what can be done? "What can not be done, so you'd better not waste your time on this. I Can't sell my technology and my laboratory,

"At least we can still eat now. There's no rush. If we want to put money that isn't worth anything now into our pockets, we won't do it even if it was worth a lot in the past! "

Yu Tian had been listening quietly. He felt that Bruce Hank's temper was a little weird, but he had to admit that he still had some personality.

At least he wouldn't sell his dignity for money. With the current situation in this country, it was already very difficult for him to do that.

Chu Wen looked at Yu Tian helplessly. She really didn't know what to say after that.

YCI Tian also signaled her to hang up the phone first. He had already made up his mind. No matter how much he said, it was useless, He still wouldn't sell the lab.

Now, he had to find another way to obtain the technology. This was also the fastest and most effective way to solve the problem.

Very soon, Yu Tian arrived at the surroundings of the lab.

The size of the laboratory was huge. It was at least 10,000 square meters. It could be said to be the largest laboratory in the metropolis.

However, due to the economic collapse, there were many employees in the laboratory who no longer came to work. Therefore, the large laboratory looked a little deserted.

Fortunately, some figures could be seen swaying in the laboratory building.

It was not easy to enter the laboratory, There were at least a dozen defenders standing at the door, and they were all fully armed. Anyone who wanted to enter the laboratory would not be able to do so without an invitation card

Yu Tian was thinking that if he forced his way in, he might clash with the Super

Country's Defense Department again. It was definitely not wise to do so now.

Therefore, he checked the time first. There were still two hours before nightfall.

It was better to wait until nightfall and sneak in when their defenses were relaxed. As long as he could get the storage technology, he could leave immediately. There was no need to waste time with them.

Two hours passed quickly, and the sky was completely dark.

Yu Tian's thoughts were absolutely correct. There were only two people left among the defenders at the door, and the others had already gone back to eat and rest.

This was the best chance to enter the laboratory:

Yu Tian quietly went to the backyard of the laboratory chose a corner that the camera could not see, and directly jumped into the courtyard.

Then, with the fastest speed, he silently opened a window and jumped into the building.

At this time, the artificial intelligence said, "I have downloaded the blueprint of this building. The lab we are going to is on the top floor of this building!" As he spoke, the artificial intelligence opened the blueprint in Yu Tian

I

s mind, and the chip quickly downloaded the blueprint.

Yu Tian closed his eyes and turned on the chip's function. After a simple glance, he knew how to plan the route.

It had to be said that this artificial intelligence could really provide him with some help at certain times.

Following the route that he had planned, Yu Tian easily arrived at the top floor of the building.

But the problem was that there were still many workers in the laboratory.

Yu Tian shook his head helplessly. Now that the economy had collapsed, how could they not think about how to eat? They were still working crazily here.

Did they not need to eat?

The artificial intelligence could sense Yu Tian's thoughts and chuckled, "You don't understand. After all, this is a lab supported by the senior management department."

They did not need to worry about food and drink at any time. Moreover, there would be people who would send food and other items here every day.

The senior management department also hoped that they could use this technology to make the whole world pay a high price to buy it. This way, they could at least restore some of the economy..

however, this was just their wishful thinking. The current economic situation could not be saved by just relying on a storage device. Therefore, I feel that Chu Wen's idea is the best!

Yu Tian frowned and said impatiently, "Why do I feel that you have so much nonsense to say? We are here to steal things, not to study the economy here."

Y

)

Moreover, you are an artificial intelligence, why are you studying the economy with me? "Do you still want to earn some money to buy a few more pairs of pants and forks? "Why does your artificial intelligence also need that thing?"

The artificial intelligence also knew that Yu Tian was scolding it, but it still chuckled and said, "The biggest difference between our artificial intelligence and you humans is that no matter how you scold me, I will not be angry,

because we don't know what anger is. We will only use logic programs to analyze what you say. After that, we will find the best rebuttal words,

for example, right now, I will tell you that you should have more pants and because when you become a robot you might not even have the chance to wear that thing,

"So, it's better to enjoy it now

"F * Ck you!" Yu Tian cursed. At this time, he also thought of another way to enter the laboratory.

He casually took out two smoke bombs from his pocket and threw them directly into the laboratory.

The moment the smoke exploded, all the staff members were dumbfounded.

At this time Yu Tian shouted loudly, "Hurry up and leave this place. It's on fire. This place is on fire. Do you all want to be burned to death? Hurry up and leave this place!"

The smoke grenades were already very irritating to begin with. In addition to Yu Tian

I

s lies, the staff members were all flustered and immediately began to run out of the laboratory.

Yu Tian threw a few more smoke grenades in the corridor and stairwell. Only after he knew that the staff members had all run downstairs did he walk into the laboratory..

?Chapter 679 – : Chapter 678 Was A Bit Of A Chatterbox

In order to get the storage device, one had to pass through a password door.

However, this was very easy for Tian. Not to mention the chip in his mind, it could quickly crack the password. Moreover, the AI had already cracked the password before Yu Tian could even speak.

The AI even said in a proud tone, "This is the difference between AI and human intelligence. When you humans crack the password, you will need to spend a lot of timea€|"

However, for us artificial intelligence, we can do it by blinking our eyes. You should be convinced now, right? Say something that you're convinced of me!"

"I'm convinced of your father!" Yu Tian scolded in disdain. Where did this artificial intelligence learn from? Why was it so eloquent? Didn't it just crack a password? It seemed to be very impressive.

After asking for the password, the door slowly opened. Yu Tian walked into the room and saw that there was something like a memory card in the glass jar on the table in the middle.

The artificial intelligence introduced, "What you are looking at now is the world's largest storage device. Its storage capacity is hundreds of times that of the current world highest storage device,

"Moreover, its computing speed is exceptionally fast. No matter what data you use it to download, it can be completed in an instant. I think you should thank me,

"If I didn't provide you with the data, how would you know that there would be such a good storage device in this world? "And when your people develop it, you will be rusty even if you become a robot! "

Yu Tian finally understood that this artificial intelligence had been learned from him.

Because it had fused into his nervous system, it would learn about his thoughts and personality. After learning for a long time, the way it spoke and its temper were no different from his.

Therefore, it was understandable for him to say these things now. After all, there were times when he Would be as mentally deranged as him.

Now was not the time to think about these things. It was better to get the storage device and leave this place first.

Therefore, Yu Tian opened the glass jar and put the storage device into his pocket. When he turned around and was about to leave, there was a flurry of footsteps outside.

Because they knew that this place was on fire, the laboratory's defenders had already rushed upstairs. Everyone was wearing gas masks, and there were also a few scientists following them.

Bruce Hank was one of them. Regardless of whether this place was on fire or not, the first thing they had to do was to ensure the safety of the storage device, because that was a top secret.

Even if the entire laboratory was burned down, it would matter. However, if there was a problem with the storage device even 10,000 laboratories wouldn't be enough to make up for the loss,

However, when they reached the door, they suddenly saw the door of the laboratory open, and there was a person standing inside.

Because the surrounding smoke hadn't subsided, and Yu Tian was still wearing a gas mask, they didn't see Yu Tian's face clearly.

However, it didn't matter whether they could see his face or not now. Bruce Hank saw that the glass jar on the table was empty, and he was scared out of his wits.

He immediately shouted to the defender, "He's the one who took away our technology. We can

i

t let him leave this place. We must get the storage device back!"

These were the defenders. They immediately pointed their weapons at Yu Tian and shouted, "Put down that device now and lie don't on the ground right now, or we'll fire at you!"

Yu Tian had experienced this kind of scene countless times. At this moment, he looked at them and said very calmly, "I'm just taking the device here. I don't want to have any conflict with you,

i don't want to kill innocent people here. If you don't want to die, leave this place immediately. If I get angry, none of you will be able to live. Even this laboratory will disappear!

Bruce Hank shouted angrily, "You are a thief, and you still want to negotiate with us. Do you know how much the device you took is worth?

"It is worth all the defenders in this country to hunt you down and kill you every day until we get this device back. So, what I want to tell you now is, if you don't want to die., return this device to US immediately, otherwise, you'll regret it, and you won't get out of here, I can tell you very clearly that there are at least a thousand defenders around you, each with the best weapons ,

do you think you can get out of here? Now I'm saying to you again take out the storage device immediately, or I won't talk to you anymore, and you'll be greeted by bullets!"

Yu Tian suddenly realized that Bruce Hank's temper was a little pretentious. He had already said that he didn't care about the defenders at all. Did this guy not hear clearly?

Or did he just want to court death here.

In that case, there was no need to waste time talking to them.

Thinking of this, Yu Tian directly exploded with a force, knocking all the defenders at the door to the ground.

Before Bruce Hank could recover from his shock, Yu Tian punched a hole in the

Since the door in front could not be walked, and there were many defenders surrounding this place, he might as well open a tunnel.

Before the defenders could get Yu Tian had already jumped out of the building:

And before he landed he had already activated the teleportation and disappeared into the air.

When Bruce and Hank rushed to the hole and looked down, there wasn't even a shadow.

This made them even more shocked and terrified.

They had clearly seen a person jump down from here, but why was there nothing? Where did this guy jump to? Could it be that he jumped into the sky?

Moreover, there were so many defenders on the ground surrounding him. One of the defenders was even more shocked.

Because he saw with his own eyes that the person who was falling had actually disappeared into thin air.

Was it a human or a ghost? How could it be so magical.

At this moment* Yu Tian had already returned to the Sean Research and Development Center.

His speed was just that fast.

At this moment, Bruce Hank, who was in the laboratory, clenched his teeth tightly and said coldly, "I want to see Chu Wen immediately. This person must have been sent by her because she previously wanted to buy my laboratory, but I rejected her."

"Now I finally understand why she did this. It turns out that she wants my device. This is simply too hateful. No matter what, I must get this device back.

This is my years of hard work.,

"I will definitely not let it fall into the hands of others!

?Chapter 680 – : Chapter 679, Wanting To Fight

Bruce Hank immediately called the Supreme Management Department and told the President of the Defense Department of the Supreme Management Department that the whole process was like the plot of a movie.

When the President of the Defense Department received the news, he was furious on the spot.

He said angrily, "Does Chu Wen industry feel that they haven't done enough? Have they reached a level where they are unscrupulous now?"

"This storage project is our top secret. Now, he can brazenly take this technology for himself. This is too much. This is a disgrace to us."

"I also know very well who took the storage device."? "This gives us a reason to change everything. Get Ready and come with me to see Chu Wen!"

Bruce Hank hurriedly nodded. Now that he had the support of the Supreme President of the Defense Department, what else was there to be afraid of?

Soon, this group of people came to Chu Wen's office with great pomp and Fury.

Chu Wen already knew why they were here? Yu Tian had already taken their storage device back to the research and Development Center. These people were not in a good mood and wanted to take it back.

However, they did not know that the thing that had fallen into Yu Tian's hands would not be taken back so easily

Therefore, she smiled calmly and said, "Mr. President, Mr. Bruce Hank, you guys are really a rare guest. I wonder why you are here today?"

Could it be that you have already accepted my proposal? Are you prepared to sell your laboratory to me? If that's the case, then I'll be especially grateful to you. I'll also give you a good price!"

The President of the Defense Department was expressionless, while Bruce Hank glared coldly at Chu Wen and said angrily, "I've already told you, it's impossible to sell the lab to you,

don't think that you're the biggest company now, and even control most of the wealth, but some things are not completely under your control,

"We still have the management department we also have a senior president, and we even have the Defense Department. Now, I need you to immediately take back the storage device that was stolen by you,

"Otherwise, you will definitely pay the price for this. The President of the Social Defense Department by my side personally came with me today to let you know clearly,

"This proposal is without any room for negotiation. If you don't give us the storage device, then your industrial company will not be able to continue operating here!"

Chu Wen smiled coldly and said indifferently, "Mr. Bruce Hank, I think you should calm down now. If you don't want my company to continue operating herea€|

"Then I would be very happy. I don't make much money here and have long wanted to withdraw my company from this market. There is one thing I want to ask Mr. Bruce Hank and the President of the Defense Department,

if my company is getting out of the market, will you be able to bear the consequences? How will you explain it to the thousands of people who have no food?

If you know what's going on, you should know that all the management departments around the world are waiting to laugh at you,

they want you to be completely destroyed, or even disappear from the world. If you want them to laugh at you, I'd be happy to!

"

And most importantly, I don't even know what the storage device you're talking about is. What exactly do you want from me?

"Is it a reason to completely destroy this country?"

Bruce Hank and the CEO looked at each other. Before they came here, they already knew that it was unlikely that Chu Wen would give it to them.

That was because that device could be said to be priceless. No matter who it fell into, no one would easily take it out.

But once this technology was leaked, the world's structure would change once again, and the world a€'s industries would also undergo new changes,

Originally, the Supreme Management Department's plan was to use this storage device as an opportunity. When the world's industries changed, the Supreme Management Department would use this opportunity to obtain great benefits and revive the economy.

However, now that this device had fallen into Yu Tian's hands, if Yu Tian wanted to use this device to change the world economic framework, then the Supreme Management Department wouldn't receive any benefits.

They could only watch Yu Tian and his industrial company earn a lot of money.

Thinking of this, the president of the defense department said gloomily, "Miss Chu Went haven't you gotten enough here? You actually want to take away our last hope nowa€|

If it were you, would you agree if someone wanted to take away your most precious thing? Would you let go? If you really thought for us, and you wanted to do something for this country?

Then please return this device to us, In other words if you don't let us have the chance to pursue our dreams, then we won't let you have the chance to realize your dreams,

anyway, it's already like this. The economy of the entire superpower has already collapsed to the point that it can a€?t collapse anymore. ?????? according to our past experience, we will definitely use this opportunity to launch an all-out war,

if you can bear this result, then there

i

s no need for us to continue talking. Later, I will hold a press conference to declare war on Your Chu family and the heavens. This is what I want to say to you!"

His tone was especially firm and firm.

Chu Wen knew that the president of the Defense Department was not talking nonsense here. He could indeed do it.

As he said, they all needed a war to divert people's attention, They could also stimulate economic development through war.

The most important point was that even if their economy collapsed, they were still one of the top armed countries in the world.

And this time, they were specifically targeting the Chu family.

Once the war between the Defense Department and the family broke out* the family wouldn a€?t be able to obtain any good benefits.

But how to decide, they would have to ask Yu Tian first.

Thus, Chu Wen chuckled and slowly said, "Of course I believe what you said is true, but if there really is a war, my family won't be afraid of Youa€?"

"If you must use this excuse to start a wan then we will accompany you to the end, However, there is one thing that you have to understand first With your current economic level.,

"It doesn't seem that easy to start a war against our family. We can use a huge amount of money to hire mercenaries from all over the world to fight for us, who Do you think will win?"

I Have 108 Older Sisters #Chapter 681 - Read I Have 108 Older Sisters Chapter 681

?Chapter 681 – : Chapter 680 Needed Time

Bruce Hank and Tyra's expressions became even gloomier at the same time. At the same time, they were considering something. What Chu Wen said made sense.

Firstly, the wealth of the Chu family could not be surpassed by any other family. They could easily buy half of the world.

Secondly, the Chu Yan industrial company behind the Chu family was the largest arms manufacturer in the world. The weapons and battle equipment that they produced could not be surpassed by anyone in the world.

In the past, when their strength was ranked first in the world, they could still be arrogant. However, looking at it now, they could only speak a little more confidently. However, it was useless.

After all, people with strength would never show off in words.

For example, Yu Tian easily surrounded the device from hundreds of mercenaries, as if he was going to the market to get a cabbage. He simply had to take it away.

But they could only use meaningless words to make useless requests.

Looking at Chu Wen

I

s calm and confident expression, the CEO hated her to death. The more he hated her, the less he wanted to consider Whether he could win this conflict.

Therefore, he sneered and said disdainfully, "Very good. If this is what you want, then I will definitely not back down. I don

I

t care about your family or how powerful your company is?

"But when you hurt our interests, Tirath, can not stand here and watch. I have the obligation and the right to protect our most precious things,

"If you insist on your current point of view, then our conversation can end. I hope that when our conflict breaks out you can still be so tough!

After saying this, Tirath turned around and left the office. Bruce Hank helplessly shook his head and coldly said, "I originally thought that our conversation would be very pleasant,

however, looking at it from this point of view, this conflict will definitely be very exciting. Although your strength is very strong now, don't forget that you are just a family, and we are the entire defender!"

Bruce Hank smiled coldly, turned around, and pushed the door open to leave.

Chu Wen's expression also slowly darkened. Bruce Hank and Tirath would definitely not just say that here. If they really obtained this reason, they would definitely launch a war against the family.

Thinking of this, she still called Yu Tian and passed on Bruce Hank and Tirath's intentions to YO Tian.

After Yu Tian heard it, she smiled indifferently and said disdainfully, "There are many things that you don't need to care about right now, even if you don't have this storage device..

they will definitely find another reason to launch an attack on the family. This is because they will definitely not let their interests be in the hands of your family. This is the greatest threat to them!

Moreover, the company management that you were currently conducting had already made it even more unacceptable to them. Therefore, they would be able to dig out one of these reasons even if they dug it out from the ground,

if I guessed correctly they would soon launch an attack on the industrial company by those who hated the company, forcing the company to be unable to operate normally,

after that, they will use force to launch an attack. Therefore, my opinion is that from now on, all the companies in superpower will be shut down and the transportation of resources will be terminated,

let them slowly show off we don't need to care about this at all. If they really want to fight with us, then we will accompany them to the end. However, the battlefield will definitely be on their land!"

With Yu Tian's support, Chu Wen felt confident. She smiled and said, "If that's the case, then I know what to do. I'll shut down all the companies now.

"

And I'll leave this place as soon as possible. Now that I think about it, I really can't bear to leave. After all, my plan hasn't started yet. I rarely make any plans, This time, I'm still full of energy!"

Yu Tian laughed and comforted him, "Your plan will definitely be realized, but now is not the time. I don't have time to help you realize your plan now,

"

Therefore, retreating now is the best choice. You Don't have to care about anything else. If that Bruce Hank and that Tirath want to continue negotiating with us, then let them come and see me!"

After hanging up the phone Yu Tian did not care about this at all. What he was thinking now was, could the data be downloaded into the storage device?

Chu Xuan replied with certainty, "The data has already begun to be downloaded, but because it's quite a lot, it might take a lot of time. I did a simple calculation,

"All the data will need to be downloaded for at least 48 hours, and this doesn't have an acceleration function, so it can only be downloaded bit by bit. But fortunately, we can download and browse at the same time!"

This was already very good. After all, the amount of data was too large, and it was impossible to download all of it in a very short period of time.

But sometimes it was worth the wait. The data in the core device was extremely precious.

At the same time, it would have a certain impact on the future progress of mankind.

As for what the video person said, finding a solution to mechanization and then destroying all the data, Yu Tian had never thought about it.

The things were in her hands, and the decision was also in her hands. She could do whatever she wanted, and no one could control it.

At this moment, Chu Wen also held a high-level meeting of the company. She said to everyone in a deep voice, "The high-level of the family has made a decision. From now on, all commercial companies in super country will be closed,

this includes the shopping malls factories, and other branches. As for when they will reopen, there is no specific time yet. So, from now all employees will no longer belong to industrial companies!

As soon as he finished speaking, everyone was shocked. Many of them even had cold expressions on their faces.

The industrial company was the only hope now. [f they were to close down, then everyone would have no hope. The economy here would also completely collapse. When that time came even the people who were still alive.., would find it extremely difficult.

They originally thought that they would be able to live well under the protection of the industrial company. However, looking at it now, it was very likely that everyone here would become homeless vagrants in the future.

At this time, a middle-aged foreign man stood up and said in paint "Why did you do this?"

?Chapter 682 – Chapter 681, This Was An Opportunity

Chu Wen also said helplessly, "The reason is actually very simple. It's because the senior management department thinks that we have already caused an impact on their authority, making it impossible for them to manage this place,

"That's why they want to launch a war against US and challenge my family head. We don't want to cause too much damage, so we can only choose to close it. This is also a helpless move. I hope that everyone can understand!"

The foreign man's eyes were already wet. If this was any other time, he would have closed it. This wasn't a big deal. At the very least, he could do something else.

However, the economy here was already in a state of collapse. After leaving this place, there was nothing he could do. In the end, he could only live as a vagabond and survive by begging.

But what about their families? This was a difficult decision to accept.

The man pleaded helplessly, "Please, don't do this. We all need to rely on this to survive. This is our hope. If you give up, then what are we fighting for? How are we going to survive?"

Chu Wen naturally knew their difficulties, but this was Yu Tian

I

s decision. She could not change it, and she did not want to change it.

Yu Tian's decision was always correct. From this point of view, she absolutely didn't need to think about anything else. She only needed to listen to Yu Tian a€?s words.

Thus, she slowly stood up and said helplessly, "I've said it before. This is the decision of the family's higher-ups, not mine. If I had the final say, would definitely let the company continue operating, but now, I have no choice but to give up because I can not go against the family's fate!"

At this point, Chu Wen did not want to continue speaking. Under the escort of her bodyguards, she left the meeting room.

As for the higher-ups in the meeting room, they were all furious. However, their anger was useless because it could not change anything

They could not even make themselves feel better,

The foreign man slumped in his chair, tears streaming down his face. He muttered to himself, "It looks like the economic collapse is already impossible to change. Why would the Chu family do this?"

Could it be that they really don't care about the lives of others?"

Under Chu Wen's orders, all the family businesses in superpower were shut down at the same time. All the employees were expelled by the mercenaries.

This caused a huge commotion. The President of the Supreme Management Department, McClain, immediately summoned Tirath.

After the meeting, McClain asked angrily, "What did you do? The information I received said that you did something to Chu Wen's industrial company: Why Don

I

t I know anything?" ?

Do you still have eyes for a super president like me?"

Tiras frowned and said coldly, "Yu Tian, he stole the storage device in our laboratory. That is our top secret and our highest technology,

if we don't say anything now, how weak will we be? When I was negotiating with them, I had already told them clearly,

if they didn't return our devices to us, it would mean war. Wasn't that what you wanted? Chu Wen Industrial Company already held most of the power, and even most of the lives here,

their casual decision would have an extremely strong impact on everyone. This was something that even we couldn't do. If this continued, your Super CEO,

or as the president of the Defense Department what else can we do? How can we face our people?"

However, Klein shook his head helplessly. He was extremely disgusted by Tirath's words.

Tirath, as the president of the Defense Department, I was the one who promoted you. I always thought that you were one of us. You would understand what I mean and know what I'm thinking...

"But what surprised me was that you actually didn't know what I was thinking at all. What You Said wasn't wrong at all. Chu Wen and Yu Tian did indeed hold most of the power"

"But have you ever thought about how our economy will recover if we don't give them these rights? "NOW! the entire world has cut off all kinds of business relations with us"

Only the Chu family has been holding on. Now that you have driven away all this last hope, our economy will not collapse, but completely collapse,

the reason I have given them so many rights is that I want to cooperate with them, and then use their resources to revitalize our economy. Don't you understand that?

Most importantly, didn't you study mathematics when you were in school? Compared to the investment Yu Tian gave us, how much could that storage device be worth?

Let me tell you a simple figure. The total investment Yu Tian gave us has now exceeded 7 trillion international dollars, and that's not even counting his real estate,

but now, because of your ignorance, you have caused us to lose over 10 trillion dollars in funds for nothing. It's all because of that worthless storage device of yours,

you always say that it's top secret, but it's just a storage device. It's no different from a box used to hold things. Furthermore, with Yu Tian

I

s powerful funds, he can develop it himself...

it's just that he doesn't want to waste so much time. Furthermore, he had previously offered to buy the laboratory, but you rejected him. That

t

s why he used force to snatch it away. Is it his fault?"

Tiras looked at Klein with a look of realization. He had indeed not thought about it that much, but it was useless to think about it now, Yu Tian had already given the order that all businesses were being shut down.

Therefore, Tiras sighed and said with some guilt, "But now that our conflict has appeared, if we turn back now, it will only make Yu Tian look down on us even more..,

therefore, my suggestion is that we should take this opportunity to let Yu Tian see our abilities. I don't believe that he would use the entire strength of his family to fight against us!

Klein gave a helpless sneer and said, "Does he need to use the strength of his family? He alone is enough. Otherwise, how could he have so easily taken away the storage device from under the noses of so many of you.

"Take away the storage device. You didn't even see his shadow. But there's one thing that you're right about. This is indeed our chance. I'll hold a press conference later!"

I want to see what Yu Tian means!"

At the same time, Yu Tian had already obtained the downloaded information directory in the laboratory. After taking a careful look, Yu Tian was especially surprised..

?Chapter 683 – Chapter 682, Time Machine

The contents were particularly detailed. All the data and information included almost all the high-tech Technologies of the future of mankind.

This included time travel, material energy, power conversion, and so on.

These materials were extremely precious. Yu Qian couldn't wait to read all of them.

However, downloading it still required time. Fortunately, the most important thing was time travel.

Or perhaps the future humans would invest the most effort and energy in the research of time travel.

That was why they placed this technology at the forefront of all the information.

Time travel technology, of course, required the assistance of equipment.

According to the introduction in the information, these time machines had basically been dug up by themselves and were all in this research and development base.

Therefore there was no need to rush to look at these aspects. As for the specific operation method, it was extremely complicated for ordinary people, but for Tian, he could grasp it after simply looking at it once.

Chu Mengchu looked at it a few times, but she still could not understand how to use that time Shuttle?

Yu Tian, on the other hand, smiled very easily and said, "Actually, it's very simple. We only need to use the 64-DIGIT concept to calculate the numbers on it, and we will be able to get the final time coordinates,

perhaps in the future, humans would use this method to calculate time in the concept of time, or they would have to use this method to calculate all sorts of spatial data..,

"There's no use in studying this now. What we need to do now is to do an experiment and see if we can really reverse time!

Chu Meng nodded and said excitedly, "Actually, doing this experiment is very simple. We just need to put a watch in the instrument, and then we can reverse time on it!"

"If time really goes back, then it means that the experiment is successful! Go and prepare now!"

Yu Tian couldn't wait to see this experiment. If the experiment was successful, he could restore his body to its original state.

This was what he wanted the most right now.

The experiment was done very quickly and the coordinates were calculated accurately.

Chu Meng put her watch into the device. After confirming the current time, she set the time coordinates on the device to turn back time by an hour.

Chu Xuan activated the device as well.

The moment the device was activated, intense energy waves were emitted. However, in the blink of an eye, the device stopped functioning.

Chu Meng picked up her watch and looked at it carefully. She said excitedly, "We've succeeded. Time has really gone back by an hour!"

Everyone in the room applauded. They were all extremely excited and excited.

This was because this experiment had completely surpassed the scope of human technology. If this experiment was announced to the world, it would shock the entire world.

However, this experiment technology was provided by Yu Tian, so only one day could decide how to use it.

If Yu Tian wanted to use this time technology, then he would be able to do anything.

First of all, Yu Tian would have the ability to predict the future, and it would also have the effect of changing the past. Simply put, this was the origin of the butterfly effect.

Setting a starting point, then it could spread out infinitely to many other points. This was the so-called butterfly effect.

However, Yu Tian was not thinking about this at all. Instead, he was thinking about entering the device and reversing time.

However, his idea was discovered by the artificial intelligence. It mocked, "You want to reverse time, but have you thought about this?"

If you reverse time, then your memory might be erased during the process of reversing time. That is, after you injected the chip, up until now, all your memories

might disappear. And most importantly, if you yourself were the middle point of time, then the other points of time that spread out from this point of time would change,

when those future humans came tens of thousands of years later, and tried to change the past, they probably didn't think that this change would have a very strong impact on their future,

although we still don't know what they experienced, one thing is certain, and that is that because of the change in the future they might have already been destroyed, so when you carry out the experiment, it's best to think clearly. This is the result of my logical thinking using artificial intelligence. You can listen, you can not listen,

if you really want to show off, then go ahead. In short, what I want to tell you is that even if your chip leaves your body, I will not leave

I have completely integrated into your nerves. Don't even think about asking me to leave!"

Yu Tian said impatiently, "Shut up. Why do I Feel Like You're an idiot? Is this your artificial intelligence? This is your logical thinking"

"You're just like a blind man. Didn't you read the information?" "My own time change will indeed erase my memories but it won't affect the change of the entire world.

"Because my memories will be erased, it doesn't mean that the memories of the people I know will also be erased. They will tell me about my future development. Without the chip, I will still develop according to my original trajectory."

"Therefore, nothing will change. The only thing that can be changed is that I will definitely make you get out of my body!"

The artificial intelligence laughed and said disdainfully, "Then you can try, but the possibility of that is not very high. Don't say that I didn't warn you. When you lose your memory and become an idiot .., I don't have the ability to turn you into a normal person!"

Yu Tian really didn't want to bother with her anymore. This guy was simply an idiot.

After setting the time when the chip was injected, Yu Tian sat on the device without hesitation and signaled Chu Meng to immediately start the machine.

Chu Meng took a deep breath. Before she started the machine, she still looked at Yu Tian, wanting to know if Yu Tian had really decided to do this or if there was something else that needed to be prepared.

In any case, she had to make sure that everything went according to plan. Otherwise, she would really turn Yu Tian into an idiot.

Yu Tian nodded at her. He had already prepared everything. He could just activate the device directly.

Chu Meng and Chu Xuan looked at each other before activating the device directly.

The time scroll was rapidly retreating. Yu Tian felt that at this moment, his mind was in a state of chaos..

?Chapter 684 – Chapter 683, The Experiment Was Successful

At this moment, Yu Tian felt that some of the memories in his mind were spinning rapidly like a lantern. However, they did not disappear. Instead, they became clearer.

Furthermore, because of the spinning of the memories, the development of each time point had changed slightly. For example, this time, the decision of the Chao Qi kingdom had also changed slightly.

Instead of shutting down the company and letting everyone leave the company, it had become the present. Everyone in the industrial company had come to the front door of the senior management department and had had a large-scale conflict with the defenders.

However, these changes were all acceptable. There weren't any big changes, and it wasn't enough to affect the development of the future.

At this moment, time stopped running.

Yu Tian slowly opened his eyes. The first thing he wanted to do was to immediately roll up his trouser legs.

What made him extremely excited was that the parts of his legs that had been mechanised had all recovered. He could even feel the clear feeling of blood flow and the pulse of his meridians.

Yu Tian then tried to activate the chip in his brain. However, his mind was blank. There was nothing. At the same time, his strength seemed to have been greatly weakened. He no longer had the explosive feeling he had before.

It seemed that the time reversal this time was a complete success.

Yu Tian jumped up excitedly, and he even deliberately showed off his legs in front of everyone.

The happiest people were none other than Chu Meng and Chu Xuan. Chu Meng was so excited that tears even flowed out of her eyes. She went up and hugged Yu Tian, she said happily; "We finally succeeded, and now we're back to our original appearance. I'm so happy!"

Yu Tian also said excitedly, "Actually, I have to thank all of you the most. Thank you all for being with me all this time. Thank you all!"

Although it was just a few simple words of thanks, it made everyone's hearts feel especially warm.

At least their efforts were not in vain. At least, they could make Yu Tian feel touched. No matter what they did, it was worth it.

But at this moment, the AI's voice sounded again, and it said arrogantly,

"What's Wrong? You think I left too, right? Don't

I

t you see that I'm still here?

Didn't you say that you wanted me to get out too? But why am I still here? Are you angry? Are you disappointed? Do you want to Bang your head against the

Yu Tian frowned slightly. This AI was really troublesome. The chip had already disappeared, but she was still in his body.

He thought to himself, "Don't try to act cool with me. It's very easy for me to think clearly about you. I only need to erase all my memories and you won't be able to exist! "

The artificial intelligence laughed and said disdainfully, "You don't even believe what you're saying. For me, an artificial intelligence, you don't even need your memories anymore,

"You know better than me that if you erase all your memories, then you're nothing. I don't

even care about being in your body anymore. At that time, everything you have will be lost. Are you really willing to do that?

So you don't have to be pretentious with me, let's be rational, and think logically, for example, we can work together, I Get What I want, you get what you want,

in fact, our ideas don't conflict, it's just that you don't want me to dominate your body, then I can promise you that I won't dominate your body,

"But at the same time, you have to promise me that you won't stop some of my plans and ideas. What do you think of this deal?"

"I think this deal is as idiotic as you! "

Yu Tian said disdainfully, "I have my own thoughts, and I also have my own life. Why should I make a deal with you? So you don't have to think about it. If you're willing to stay in my body"

"Then you can stay. This doesn't have any effect on me. I will treat you as if you don't exist. You are just an artificial intelligence with logical thinking."

"Without the support of the chip, you are just a part of my nerves. You are the same as the thought in my mind. When I have the chip, you will never make a so-called deal with me."

"Now that the chip no longer exists you're proposing a deal with us. Isn't that your weakest point? "Without the support of the chip you're nothing. Am I

The Ai suddenly fell silent. What Yu Tian said was not wrong at all. Right now, it was only a small part of Yu Tian's brain, even though it could still communicate with Yu Tian.

However, it did not have any effect on Yu Tian. Other than using words to provoke him and make him angry, there was no other effect.

Yu Tian smiled even more proudly,

k

“What

j

s wrong? NOW that you have nothing to say, continue to show off to me. Isn't it the AI? Isn't it logical thinking? Why Can't you do it now?"

The AI indeed had nothing to say. The best choice now was to remain silent and let Yu Tian be as arrogant as he wanted. However, there would definitely be a chance for it to regain control of Yu Tian's nerves. When that time came..,

it wasn't too late to say something.

At this moment, Chu Wen called Yu Tian and said with a smile, "Klein wants to meet you personally. I think you have to give him that face. After all ??he's still the highest-ranking executive director!

"Of course we can meet. I also want to hear what she has to say!"

Yu Tian readily agreed and immediately activated the teleportation, arriving at a restaurant in the metropolis.

This restaurant was also an industrial company's business. It was now closed, but if Yu Tian wanted to eat here, all the staff had to be prepared immediately.

Soon, mcclane walked into the restaurant under the escort of dozens of bodyguards.

The bodyguards first made sure that the restaurant was safe and wanted to see if Tian had any weapons on him.

One day, he glared at them coldly and said indifferently, "Are you idiots? DO I need to use weapons to kill him?

Don “t waste my time here. I still have to pick up a girl later!"

Klein smiled as he sat opposite Yu Tian. He first looked at the food on the table and said "To be able to eat such good food , I think should be a sky-high price“]

But to you, it's not even worth mentioning. Just like what you did in this country, it

i

s just a normal business investment for you. But to others, it's like the food on the table.., it's extremely precious. So today, I'd like to ask you to make a deal with Mr. Yu.

I hope you can continue to invest here and make more people eat. and the condition I'm giving you is.., you can continue to invest here. No one will attack you.. Don't you think it's

?Chapter 685 – Chapter 684, Get Ready

After Yu Tian heard what Klein said, he felt that it was especially laughable. What did he want to do here? Did he still need his consent?

Furthermore, this fellow was a little ungrateful. who had supported him to become the highest-ranking CEO in the past? Now, he was sitting in front of him, negotiating with him.., did he not know what kind of situation he was facing now?

When he thought of this, Yu Tian just smiled indifferently and said disdainfully, "President, I hope you understand one thing now, that is, the decision is up to me"

Simply put, I can do what I want to do. I can close it down if I want to. I can open it up if I want to. Do you think your power can control me? This is a joke..,

at the same time, you have to know that if you want to start a war against my family, we will definitely accompany you to the end. Isn't it just a game? As long as everyone is happy..,

who cares how many people die, don't you think so?"

Klein also chuckled, but his eyes were covered with a layer of killing intent. He said shamelessly, "Mr. Yu Tian, you should also understand that I have the final say here. ,

and you are just a guest. Then, can a guest make a decision for the host on what to eat today? That seems unlikely. Besides, you should also know that a crisis is equal to an opportunity..,

other than your family being able to do business here% there are many other families that can do business here as well. As long as I agree, the businesses of these families are no smaller than yours"

and the benefits you want to get in this country, from now on there will be nothing. You are a smart person, you can understand what I mean. The reason I let you do business here,

is also to express my gratitude to you. But after this gratitude, I can not support you as usual and let you do all this without any scruples,

on the other hand, you don't have any guilt, and you still use the things we developed to pursue your own interests. If it were you, what would you do?"

Of course, Yu Tian understood what he meant. After all, he had already thanked himself enough, and now what he had to do was to get his own interests.

Otherwise, what was the point of him being the CEO? And launching an attack on him was just an excuse. At least, it made many people understand that he was protecting his own interests.

If that was the case, then war was inevitable.

This was exactly what Yu Tian needed. There were naturally many people in this world who were unconvinced of him. In the end, everyone who was unfamiliar with him would have to pay a heavy price.

In the end, Yu Tian helplessly shook his head and said disdainfully Sir

President, I have already heard your words clearly. In that case, there is no need for us to continue speaking. It is a waste of timea€|"

"If you want to fight, I will definitely accompany you to the end. Then, let us start preparing for our war now I will definitely lead my family and make comprehensive preparationsa€|"

As for whether you can defeat me or not? That will depend on whether you have the strength. However, I still hope that you can find some experts. Only then will I feel that this war is still a little interesting.., there's one more thing you should know. If you lose this war, then you, your people, and this land will all belong to me at that time!"

Klein slowly stood up and said disdainfully, "Sometimes, what others have done doesn't look good to me..,

"But this rich experience will allow future people to do better. Now, there needs to be a war. At the very least, through this war, the collapsing economy can be alleviateda€|"

Rich people all over the world want to have such a war, which provides them with unlimited opportunities, they can invest large amounts of money in this

and the final return is unlimited, do you know why I say so confidently? That is because your family really has too many enemies, others will be especially jealous of you making money,

"What's why they want to get your current business. If all of your family's business is distributed to these rich people, I feel that our war funds will not be used up.

"

Therefore, this war between US must go on no matter what! "

Yu Tian spoke as if he was making a deal. YCL Tian also said indifferently, "You think so well. But don't forget that the foundation of these rich people making money is also my family

"They have to look at our faces. If we agree, they will only do so. However, if we don't agree, they won't have the guts to do so even if they wanted to.

"President, you are also a smart person. Although what you are saying now is very confident, you have to do it. I don't want to continue talking about it. I feel that it is a waste of time."

"You can leave now, but you have to make preparations as soon as possible. Because I definitely don't believe that you can make those idiots under you rush to the battlefield with weapons with just a word!

Klein glared coldly at Yu Tian and said with a sneer, "Alright then let's Watch!

After he left, Yu Tian also narrowed his eyes.

Then, he gave Chu Meng a call and said bluntly, "Now, our preparations can finally be put to use, and I need to recruit more mercenaries...,

because soon there will be an all-out war between us and the superpowers. This is a simple regional conflict. This war is a battle of victory and defeat between the family and Klein...,

"So, must win, and I must win all-out!"

Chu Meng said excitedly, "It's finally getting interesting. I

i

ve watched the soldiers train every day, and I don't know why. Now, I can finally experience something satisfying!"

"I'll immediately make arrangements. Soon, I'll recruit more mercenaries. Sean's attackers can also be ready at any time. Since they want to fight, then let's have a wonderful fight!"

Yu Tian felt extremely satisfied. The decision to let Chu Meng be the president of the Defense Department wasn't wrong at all.

She was always able to make herself feel extremely relaxed. She didn't need to ask about everything and the orders given to her could be completed quickly, effectively, and perfectly.

At the same time, after returning to the top management department, Klein immediately called for a meeting of the top management department to convey the message of the war to everyone.

However; the top management looked at each other, not knowing whether the decision was wrong or right..

?Chapter 686 – Chapter 685, Very Confident

Seeing that the experts in front of him were silent, and each of them had a particularly heavy expression, Klein frowned slightly and said coldly, "What are you all thinking about? I want to hear your opinions!"

The President of the business development department was the first to speak. "President, I don't know how confident you are in this decision of yours, but if you want to hear my opinion"

"I can only tell you that with our current economic situation, we can't afford to fight this war. If it's just a regional conflict, we can easily handle it."

"But this time, it's the number one family in the world. Whether it's their money, strength, or even their weapons, they are the most advanced in the world. Our Pride was once"

"But now, we have to consider whether our strength is enough to fight this war!"

The president of the management team adjusted his glasses and said in a deep voice, "I agree with the president of the development department. It's also very reasonable..,

"President, you might not have considered the long-term point. Let's analyze it from a subtle point of view. First of all, you should know that the Chu family

|

s businesses are spread all over the world, and even most of the countries.., "It has completely become the Chu family's business,

"If we rashly launch an attack on the Chu family, let's not talk about whether we can win or not. If the Chu family erupts in full force it would be tantamount to declaring war on the entire world,

"At that time, there will be countless mercenaries, even used up funds, and all kinds of sophisticated weapons. All of them are owned by the Chu family. If that time comes, how should we deal with this war?"

Klein looked at them expressionlessly. In fact he had long known that they would say something like this.

Therefore, before the meeting, he had already considered all of this,

Therefore, he said with confidence and indifference, understand what you are saying. Furthermore, my intelligence department has also provided sufficient information,

I have to say that all of your suggestions are very reasonable. However, there is one thing that you might not have thought of. Although this is an economic collapse ??it also means that there are endless opportunitiesa€]"

Although the Chu family holds two-thirds of the world's wealth, it is impossible for them to give this opportunity to other families, as well as the rich and powerful. What we have to do is very simple,

as long as we give this opportunity to those people, they will definitely scramble to get this opportunity, thus providing us with a large number of resources and funds,

these resources and funds will be enough for us to launch an all-out war. Most importantly, it will increase the cohesiveness of our current situation and make everyone feel thata€?, the war we launched against the Tian family is to protect our own interests. When that time comes, I believe that everyone will stand on our side, together with our propaganda,

"At that time, we will represent justice, and Yu Tian will be the devil. Everyone wants to kill him!"

Everyone fell silent. Their CEO's thinking was very simple just like his personality. They really didn't know how he became the CEO.

In the next few hours, the people from the senior management department conveyed Klein's intentions to some of the famous rich people in the world and they proposed to use future opportunities to exchange for their resources or funds.

However, the world

s top 100 rich people either shook their heads, said they would consider it, or even directly refused.

The president of the world's largest biological resources company even said bluntly, "I don't know What you're thinking You want to launch an attack on the Chu family and you want us to help vou..,

how is this possible? 30% of the investment in my company came from the Chu family. I still have several projects waiting for the Chu family to invest in us,

now that we're helping you fight against this family, it's equivalent to making us enemies with this family. Regardless of whether you win or lose, in the end, the ones who lose their interests are still us,

you Don

i

t think that we're stupid enough to use our own interests to help you, right? So don't even think about it. Even if I take my money and enjoy it, I won't support you in waging war against the Chu family,

at the same time, I have to advise you that you can win this war. So, before it starts, you should give up. Don't look bad when the time comes!

The words of these rich people reached Klein's ears. He was so angry that he smashed his desk, he said angrily, "These people are simply short-sighted. Can't they see the opportunity in front of them?

How much money can they earn by cooperating with the Chu family? And they will always be trampled under the Chu family's feet. But the opportunity I gave them can allow them to earn countless benefits. If they don't choose, they're simply idiots!"

The higher-ups were all silent watching him as a joke in their hearts.

They had already made it very clear to him that what these merchants saw was benefits, and not the benefits that opportunities could bring.

This in itself required time. If they helped Klein, they would still lose. What would they do then?

Now, even an idiot knew that if Klein wanted to fight the Chu family, he would be courting death.

He knew that this was a war that he was bound to lose, but he still continued to fight. If he wasn't sick, then what was?

At the same time Yu Tian's side had all entered battle preparation mode. The five large battleships had already entered the designated sea area. Sea space base and hundreds of fighter jets were all ready to take off.

The Defense Department, which had more than 100,000 mercenaries, had

already entered the mobilization stage and were heading to the surrounding areas of the superpower. All of them were waiting for Yu Tian's orders. They could enter battle mode anytime and anywhere.

At that moment, Yu Tian was also waiting for Klein's orders. As long as there was any movement from his side, the war would immediately begin.

While waiting, Yu Tian stayed in the research and Development Center. Every

time he downloaded a technical parameter, Yu Tian would carefully read it a few times before memorizing it in his mind.

This was because these technologies had to be destroyed in the end. It was absolutely impossible for them to remain in this world. It was fine as long as he knew about it.

However, Yu Tian did not think that these data would also be recorded by the artificial intelligence. This was because the artificial intelligence had already fused with his nerves. His memories were equivalent to the memories of the artificial intelligence.

However, the artificial intelligence did not have the connection of a chip. It was basically unable to connect to the outside network. Therefore, these technologies could only exist in his memories and could not be shared with other artificial intelligence..

?Chapter 687 – Chapter 686, Mysterious Objects

These technologies include, the use of renewable resources, the development of weapons and equipment, as well as other cutting-edge technologies that are tens of thousands of years ahead of human technology.

However, Yu Tian did not think that these technologies were suitable for human development.

This was because it required a process, and this process was the development of time, the leap in time, a speed that humans could not accept.

As long as these technologies were recorded in their minds, they would be fine. Then, they would pretend that they never existed.

Time passed very quickly. On the night of the second day, all the data had been downloaded. Yu Tian had also memorized all of them. At the same time, he ordered, "Protect this core device!"

Then, destroy this storage device. Pretend that these things have never appeared in this world!"

Chu Meng naturally understood Yu Tian's meaning and immediately nodded. "Alright, I'll do it now!"

"Alright, I'll do it now!"

At that moment, Yu Tian's phone rang. It was Chu Meng Calling.

After the call was connected, Chu Meng said excitedly, "Yu Tian, mcclane's side has already started to move. What should we do now?"

"They're starting to move? Where did they get the motivation? Where did they get the resources? I'll go and take a look first! "

After hanging up the phone, Yu Tian immediately went to the command room of the R & D Center and opened the map on the big screen. At the same time, he made a full connection with Sean's intelligence department and the developers under Monica's management.

One of Sean's intelligence personnel immediately reported.

"Mr. Yu Tian I'm now outside the command room of the Metropolitan Defense Department. My intelligence informant has confirmed with me that they have begun to mobilize the fleet of warships to the southern sea area!"

"However, the specific activities they are doing in the southern waters are top secret. Only a few people in the senior management department know about it. I'm Looking for an opportunity to get in touch with this information!"

Yu Tian looked toward the southern waters. There was nothing there except the sea.

Moreover, the countries in the southern region were the first to cut off all contact with them When civil strife broke out. It was even more impossible for them to support them at this time.

Therefore, this possibility did not need to be considered. Yu Tian also saw the fleet of warships advancing at full speed.

However, the strange thing was that this fleet of warships was particularly fast. Moreover, there were a few large cargo ships following behind them. It did not look like they were preparing for war but rather, they were going to get something.

What exactly was in this sea area? Could it be that someone had provided them with resources?

Thinking of this, Yu Tian immediately asked in the command group, "Are there any of our people in the fleet?"

Chu Meng immediately replied, "There are also our intelligence personnel, but the target of the mission hasn't been given by the higher-ups yet. They only know that they are going to the middle of the southern sea."

"

There are a few islands in that area, and now that we have analyzed the islands, apart from a few unknown islands there is nothing else useful on the islands."

"So my suggestion is to wait until they have a clear mission objective, then we'll naturally know why they're there!"

Yu Tian nodded. Sometimes, simply waiting was also the best choice.

Especially when they didn't understand what the other side wanted to do, calmly waiting was always the best choice.

At midnight, the battleship fleet finally slowed down.

At the same time, the intelligence personnel on the battleships also sent over intelligence data.

It was not much different from Yu Tian's analysis. These battleships were close to an island with an area of 1.5 million square kilometers. The commanders of the battleships had already left the battleships and landed on the island.

But what exactly did they want to do now? They still did not know anything, and they did not let anyone follow them.

Yu Tian ordered the observation satellites to search for the commanders on the island, and they soon found their tracks.

But 50 kilometers away from the beach, the commanders suddenly disappeared.

Chu Meng asked curiously, "Are they ghosts? How could they disappear for no reason? Where did they go?"

Yu Tianguo laughed and said, "So there's a bunker under this island. The commanders have already gone underground, so our observation satellites can't see them!"

This was not wrong with my previous guess. They were either on this island, or they had a secret base with some strange equipment or weapons...

"Or the secret base belongs to someone else, and this person thinks of us as enemies just like Klein, so they want to provide their resources to him, "There's no need for us to be anxious. Let's wait here and see What good things the commanders can bring out. The space base is ready to bomb and wait for my orders!"

After about 50 minutes, the commanders finally came out of the underground bunker with satisfaction.

The observation satellites could clearly see their expressions. It was as if they had obtained some priceless treasure in this underground bunker. Everyone was extremely excited.

However, they did not leave. Instead, they used the radio to call the people on the battleships to the underground bunker.

It seemed that they wanted to take something away from here.

One day, they felt that it was especially interesting at this time. Moreover, they felt that it was not satisfying to see it through the satellite.

It was best to go and take a look in front of them personally. That would be interesting:

Thinking of this, Yu Tian directly turned on the teleportation. After confirming the coordinates, he arrived at the island in the blink of an eye.

Yu Tian wasn't in a hurry. He wanted to get close to them. Instead, he hid in a tree and watched quietly.

At this time, the people on the battleship had already arrived. Each of them was holding ?????????? wooden sticks, and so on.

Because there weren't any better roads on this island, if they wanted to move things, they had to rely on manpower.

Under the command of the commander, the defenders walked into their sight. Soon, they brought out some very heavy boxes.

Yu Tian looked at them carefully. These boxes were especially big and heavy. Each box required four people to lift. Even so, the people who carried the boxes felt that it was very difficult.

Some of the boxes were even shaking by themselves.

When he saw this, Yu Tian frowned slightly. Could it be that there was a monster in this box? Otherwise, how could it move by itself.

At this moment, one of the people carrying the boxes accidentally broke the rope on his shoulder. The box fell to the ground and the wooden planks were shattered.

Yu Tian also saw what fell out of the box and was shocked..

?Chapter 688 – : Chapter 687, Mutants

What fell out of the box was actually a furry monster. It looked like a gorilla, but its size was especially huge. Yu Tian took a closer look and realized that the monster was a human.

This small island actually had such a secret base to study these mutated humans.

At that moment, Klein took out these mutated monsters from the island. It was obvious that they were meant to be used as weapons when they wanted to wage war against him.

Then, the question was, who was the one who developed these mutated monsters?

Yu Tian frowned tightly, as though he was reminded of the mutated person who had appeared in the past, the monster developed by Dr. Lothar.

At that time, he originally wanted to kill Dr. Lothar, but in the end, he let that guy leave the ship.

After that, it was as if he had vanished from the face of the Earth.

At this moment, seeing these mutants, Yu Tian thought of Dr. Lothar again. Could that guy be on this small island?

At this moment, a commander walked to the front of the box and coldly looked at the mutants in the cage. He then reprimanded the defenders, "You guys are really a bunch of idiots. You Can't even do this kind of work wella€]"

"Assemble the box immediately. These things must not be seen by others.

They are top secret. Moreover, they are the best weapons in this war."

"No one is willing to help us now. Only these weapons can help us win against Yu Tian. What are you guys still looking at?"? Hurry up and put the box back together!"

The defenders looked at the mutants in horror. The mutants in the cages began to shake violently, roaring from time to time.

The other defenders looked at them in fear. The commander even took out his weapons and shouted angrily, "What are you all waiting for? Hurry up, we have to get these things back to our base by tomorrow morning, otherwise, I will kill all of you right now!

The commander seemed to have gone crazy. The defenders also picked up their boxes helplessly and continued to walk to the beach.

Yu Tian did not follow them. He waited for them to leave before entering the bunker to take a look.

If Dr. Lothar was really here, he could kill him along with him.

If this old man kept living, who knew how many more monsters he would create.

The commander with the weapon also took out his phone.

Then, he said respectfully, "President, we have got what we want. We will arrive at the base tomorrow morning. Your Plan can start at any time."

B

"Dr. Lothar also asked me to greet you and thank you for your continuous support for him to complete these experiments and create the best biological weapon in the world!

Hearing this, Yu Tian felt that it was very interesting.

He had originally guessed whether Lothar had created these monsters, but the commander told him the answer. In that case, he should go and do something.

After the commander hung up, he followed the other commanders, but they didn't have any intention of leaving. They stood there smoking and began to discuss in low voices.

After a moment of silence, the commander said, "To be honest when I saw these weapons, I felt especially afraid. It's really hard to imagine that they were all created

"In fact, the highest CEO of this plan began many years ago, but at that time, it was a top secret. Only a handful of people knew about this plan..,

"Back then, I was working under Klein and I accidentally heard about this plan. However, the plan was ruined by Yu Tian. Back then, Klein was extremely angry

"No wonder he was angry. Otherwise, he wouldn't have launched an attack on Yu Tian's family. Furthermore, he took out the biological weapon that he had created many years ago to use"

anyone would have done the same. After all, the funds that Klein used back then were dug out from somewhere else. Now is the perfect time to repay him for supporting Dr. Lothar.., how long do we have to wait?"

The commander, who had been smoking silently, stepped on the cigarette butt and said gloomily, "Everyone, this isn't something we should be discussing..,

"Now that we have gotten what we want, it's time to leave this place. To be honest, I don't want to stay here for even a second. Don't you think that those mutants are all humans?

think that this is an act that has lost its rationality. However, we can only carry out the orders of the Supreme CEO. Therefore, I think that we should stop discussing and leave this place!"

His words received the agreement of everyone. One after another, they threw away the cigarette butts in their hands and were about to leave when Yu Tian suddenly appeared in front of them.

Under the moonlight, everyone felt that Yu Tian looked very familiar. One of the commanders turned on the flashlight and shone it on Yu Tian's face.

But at this moment, Yu Tian went up and punched the commander. He flew out like a kite with a broken string and fell heavily to the ground, unconscious.

The other commanders still wanted to take out their weapons, but were knocked to the ground by Yu Tian's punches and kicks.

In the end, only the commander with a gloomy face was left. He slowly spread his hands and said in horror, "I know who you are. We are also carrying out orders here"

"Even if you kill us, it won't change anything. These are the orders of the Supreme CEO! "

Yu Tian looked at the unconscious commanders on the ground impatiently and said indifferently, "I know you don't want to do this, but I need you to do something else for me now..

"Take me to Dr. Lothar. I think with you leading the way, I will be very successful and save a lot of time to see Dr. Lothar!"

The commander had no choice but to nod his head awkwardly and said in a low voice "I can help you, but you have to promise me that you will let me leave this place alive!

Yu Tian chuckled and said coldly, "Your life is not worth anything to me. If I let you live, take me to Dr. Lothar Now!

Under his lead, Yu Tian followed him into the bunker.

The underground bunker was bigger than Yu Tian had imagined. All kinds of high -tech equipment could be seen everywhere.

Other than that, there were also many staff members in uniforms who were busy walking around.

As they walked in, Yu Tian saw more boxes and the mutated humans in the cages being packed..

?Chapter 689 – Chapter 688, Research And Development Base

Under the guidance of this commander, Yu Tian smoothly arrived at Dr. Lothar's office.

The two fully armed mercenaries standing at the door looked at the commander and Yu Tian behind him with puzzlement.

One of them stepped forward and asked, "Commander Michael, shouldn't you have left this place? Why Are You Back? Who Is this person behind you?"

The commander looked especially nervous because the person behind him was the most powerful person in the world, Yu Tian.

If he said this name, the two mercenaries would probably be scared to death on the spot.

There was another possibility, which was that they would raise their weapons and shoot without restraint, and they would also let more mercenaries come here.

At that time, he would also be attacked together with Yu Tian. Yu Tian was not afraid of anything. He was a demon that could not be killed.

However, he could not do it. He did not even wear a bulletproof vest.

Therefore he thought for a moment and said calmly "It's like this. The supreme arbitration still has some questions. They asked me to ask Dr. Lothar so I have to come back again. After asking questions, I will leave you."

"The one behind me is a scientist sent by the Supreme President. He also has some questions about the mutants. He needs to consult Dr. Lothar- Now, please let us in!

The two mercenaries looked at each other and felt that there was no problem, so they turned around and opened the door of the office.

Yu Tian followed the commander to the office and saw Lothar who was reading a document with his head lowered.

This old fool was actually hiding on this island, and now he had developed so many mutants. He really deserved to die.

When Dr. Lothar heard the door, he slowly raised his head. When he saw Yu Tian behind the commander, he was completely shocked

Before he could call for the mercenaries at the door, Yu Tian strode forward and directly grabbed Dr. Lothar's neck

Lothar

i

s face was filled with disgust. As he held Yu Tian's hand, he said in horror, "How did you know about this place? What do you want to do now?"

Yu Tian felt that what he said was all nonsense. He chuckled and said, "What do you think I want to do now? Of course it's the same as before. That time when I let you leave, it made me suffer for a very long timea€|

"This time, I don't want to let you go. I don't want to do anything else, just for the sake of those mutants that you created. Do you know that? "These people don

i

t want to become mutants at all,

"Because they are just like us. They are all human. What you did was equivalent to killing each other. IVs the cruelest. Do you think that I can still let you

Dr. Lothar was very unconvinced and said, ??This is the inevitable process of the human race. It has nothing to do with you. Moreover those mutants willingly accepted my experiment. They received a lot of rewards from me,

"I have never forced anyone to accept this experiment. Moreover, you are not a creator, and you are not a god. You have no control over these things!

Yu Tian stared at him with uncertainty and said arrogantly, "You are right.

Indeed, I have no control over it. However, you maybe wrong about one thing. Although I don *t want to control it, I can't stand watching it,

"You've trampled on the human race, and now you're using the mutated humans that you've tested to attack me. Do you think I Should control it?"

Dr. Lothar's eyes were filled with a deep layer of doubt. He looked at the commander behind me with great difficulty, he asked coldly, "Commander Michael, you only told me that the Supreme CEO was going to attack a family,

"But you didn't tell me that the family you are going to provide is Yu Tian If I had known, I wouldn't have joined your war! "

It turned out that Dr. Lothar didn't know about the Supreme CEO's plan.

Although it was unfair to him, he deserved to die for creating these mutants.

Thinking of this, Yu Tian said coldly,

Ci

So what if you don't Know? Your Life is in my hands nowt but I can give you a chancea€|

"If you can provide me with the technology to restore these mutants to normal people, I can let you go!"

Dru Lothar shook his head helplessly and said, "I only developed the technology to create mutants, but I have never thought of developing the technology to restore mutants, so don't even think about it!"

Since that was the case, there was nothing more to say. Yu Tian gathered his strength, and with a snap, Dr. Lothar's neck was snapped.

The commander behind him was so scared that he almost collapsed to the ground,

Yu Tian watched as Lothar collapsed to the ground under his feet. In order to confirm that he was really dead, Yu Tian stomped on his head again.

Until then, Lothar did not move. Yu Tian smugly clapped his hands. He felt extremely happy.

This guy should have died a long time ago. This time, he had to thank the Supreme CEO. Otherwise, he would not have known that there was such a research base here and that there were so many mutants.

Now that Lothar was dead, he had to think of a way to kill the monsters on the battleships.

He immediately activated the teleportation and went straight to the beach to snipe the defenders carrying the boxes.

When the commander saw Yu Tian suddenly disappear, he was so scared that he collapsed to the ground.

The mercenaries outside the door heard something wrong and rushed into the office. When they saw Dr. Lothar lying on the ground, he was already dead. They were so scared that they immediately shouted.

One of the mercenaries raised his weapon and aimed it at Commander Michael.

Commander Michael Shouted at the top of his voice* "It was Yu Tiana?? It was Yu Tian who killed Dr. Lothar. He should be at the beach now. Quickly get someone to kill him. This is the order of the Supreme CEO!

At this moment, the defenders who were carrying the boxes appeared near the beach. They were completely unprepared for Yu Tian's sudden appearance

Yu Tian could easily kill them.

In the blink of an eye, the defenders were all killed.

The mutants in the boxes became more and more violent.

They wanted to kill them one by one, but at this moment, the doors of all the cages opened automatically and the mutants jumped out.

One day, they frowned slightly. It turned out that the doors of the cages could be controlled by computers.

They must have found out that Dr. Lothar was killed and opened the cage.

However, this was nothing. He had long had experience dealing with these mutants, so before they attacked, Yu Tian sent one of the mutants flying with a punch..

?Chapter 690 – Chapter 689, Buying People'S Hearts

However, what surprised Yu Tian was that the mutants didn't seem to know what pain was. Even if they were knocked down, they would immediately get up and continue to attack.

The other mutants who were still in the cage became even more violent. They were like hungry beasts, roaring desperately.

Yu Tian originally thought that they were human. When he attacked, he still held back and didn't want to hurt them. He even thought that if possible, the drugs they developed could help these mutants become human again.

However, as he fought, Yu Tian realized that these mutants were completely different from the previous mutants.

At this moment, the mutants had completely lost their rationality. Compared to the mutants of the past, there was no humanity in them at all.

At the very least, after the mutants of the past were knocked to the ground or in pain, they would ask Yu Tian for help. At the very least, they still had some humanity. They felt that they were human and not monsters.

At the very least, after the mutants of the past were knocked to the ground or in pain, they would ask Yu Tian for help. At the very least, they still had some humanity. They felt that they were human and not monsters.

However, these mutants did not have any human emotions at all. No matter how much damage they were dealt, they were still so violent.

Only now did Yu Tian realize that these mutants were no longer mutants of the same level as before. Dr. Lothar must have injected other mutated elements into their bodies, that was why they had become like this.

In that case he did not need to show them any mercy.

Thinking of this, Yu Tian burst out with extreme strength, almost one punch after another, blasting holes or shattering the bodies of these mutants.

In the blink of an eye, all the mutants, including those in the cage, were killed by Yu Tian.

But at this moment, before Yu Tian could catch his breath.

A muffled rumble came from the forest behind him, as if tens of thousands of horses were galloping wildly.

When he looked back, countless mutants flooded the forest.

Seeing this scene, Yu Tian also felt a headache.

No matter how powerful he was't there was no chance of winning against so many mutants.

Even if he could not kill himself, he would still exhaust his strength in the end.

Although the attack power of the mutants was not that high, they were too many to handle. When his strength was exhausted, it was basically impossible for him to fight them again.

Thinking of this, Yu Tian immediately made a decision. He should leave this place first and then find a chance to kill them one by one.

Thus he turned on the teleportation device and instantly arrived on the defender's battleship.

The defender on the battleship was instantly stunned by his sudden appearance.

They had no idea why this person would suddenly appear here. Someone who know Yu Tian suddenly shouted loudly, "Hea€| Hea€| Yu Tian, he is Yu Tian!"

At the sound of the shout, all the surrounding defenders were frightened and took several steps back.

Because Tian's sudden appearance, has completely broken their physics common sense, this is simply a kind of heaven-defying existence. Even if they have and know the most advanced technology in the world.

But still can not explain, why can Yu Day suddenly appear in their side?

They could not help but think of another legend, which was that Yu Tian was not human at all.

This legend had been spread among them for a long time, and almost every defender had heard of it.

That was because some of the scenes that Yu Tian had created were really unacceptable.

It was as if he had suddenly appeared in the middle of them, and his expression was so indifferent, as if he was a king.

They were just some ordinary defenders, even though they held the most advanced weapons in the world.

However in front of Yu Tian, they felt so insignificant that they did not even have the courage to look up at him.

To be able to be so domineering, what else could he be other than a God?

Anyway, they could just not treat him as a human.

At this moment Yu Tian didn't want to waste any more time with them. With his hands behind his back, he said arrogantly, "Since you know who I am, then

I don't need to waste any more time with you."

"That's right, I am Yu Tian. From now on, this fleet of battleships will be under my command. You must all listen to my orders. Otherwise you will soon become food for the fish in the sea.

"Now, answer me, do you have any questions?"

One of the braver defenders said fearfully, "Where is our commander? We are just some ordinary defenders. We only listen to the commander's orders!

As soon as he finished speaking, Yu Tian gave him a look, scaring the defender so much that he almost collapsed to the ground.

Yu Tian then said indifferently, "That

I

s a very good question. Where are your commanders? If you want me to answer, I can only tell you that your commanders are no longer in this world. "

"That's right, they have all been killed by me. What I'm considering now is whether or not I should continue to kill them. However, I think What you guys said is very true."

All of you are just a bunch of ordinary defenders. There's no need for you to give up your lives in vain because of the conflict between your supreme CEO and me, therefore, the best choice is for all of you to listen to me now. NOW! can you answer me if I have any questions?"

The defenders looked at each other. They had no other choice but to listen to Yu Tian's orders and nodded silently.

Yu Tian also nodded with satisfaction. He chuckled and said indifferently, "You all know that the war between me and your supreme CEO has already begun,

u

perhaps many of you don't understand why this large-scale conflict between me and your supreme CEO broke out? "I can tell you very clearly nowt

it is because your CEO is too greedy. He wants more benefits, so he won't let anyone else eat his cake,

the difference between me and him is that I never use orders to get others to help me, or follow my arrangements. Those who participate in this battle are the mercenaries I recruit,

even their remuneration was the highest in the world, so every mercenary was willing to work for me, because was always able to give everyone what they wanted,

you can do the same. [Won't force you to listen to my orders. If you are willing to stand on my side, I will also pay you a higher remuneration, at least to make you feel that this war will go on, it's kind of interesting'. Now, tell me, will you take my side?"

I Have 108 Older Sisters #Chapter 691- Read I Have 108 Older Sisters Chapter 691

?Chapter 691 – Chapter 690, The Lost Island

After hearing Yu Tian's words, the defenders were greatly shocked.

They were originally unwilling to participate in this war. The main reason was that their economy had completely collapsed. Even if they risked their lives here, the reward they received was not enough to buy a piece of cake.

However, they did so to carry out the orders of the Supreme CEO to protect their self-esteem.

They were even deceived by the lie. This lie was the promise that the supreme CEO made to each of them. He told them that after this war, everyone would have a chance to develop.

However, no one would believe the words of the Supreme CEO. They were willing to believe that they were doing this for themselves. They hoped that they could change their lives or their families'lives through this war.

After experiencing so much, they suddenly realized that they were just a weapon to be used.

If that was the case, why didn't they stand on Yu Tian's side?

At least they could get a lot of rewards after putting in their lives to fight. Why should only the people in the top management department think about their own interests.

As for those who risked their lives, they could only passively accept the pitiful rewards from the highest management department.

All of the defenders raised their heads to look at Yu Tian. A few of them said loudly, "We are willing to work with you. Whatever you want us to do, we can directly give orders! "

"Actually, I have long since given up on working for the highest management department. Other than giving orders for us to slaughter our own people, they will do nothing! "

"If we follow you, will we be able to receive the same benefits and rewards as those mercenaries? I only want to give my family food now. This is also the reason why I became a defender!"

Yu Tian smiled indifferently, he said in a deep voice, "I am Yu Tian. Every word I say is not a joke to you. As long as you stand on my side, you will receive the highest reward of all the defenders in this worlda€| "

"If you are willing to listen to my orders now, then immediately enter battle mode. Aim all your artillery at the small island in front of you and carry out a self-destructive bombardment!"

The defenders looked at each other. This was the order that Yu Qian had given them, and they no longer needed to think about anything else.

Yu Tian was the richest person in the world. The promises he had made to them would definitely be fulfilled.

Thus, all the defenders immediately entered the battle positions under Yu Tian's orders.

Yu Tian stood on the ship's railing, looking coldly at the island in the distance. Those berserk mutants seemed to be still roaring on the island.

At this time, a defender came to report, and said respectfully, "Sir Yu Tian, we are ready, we can fire at any time! "

Yu Tian nodded and ordered, "Then there's no need to wait. Fire at once!" More than ten warships fired at the island at the same time.

This kind of attack was almost completely covered. The island on the opposite side instantly turned into a fire island.

All kinds of shells and missiles were bombarding every inch of the island.

Countless mutants were blown to pieces by the bombardment.

The underground bunker also collapsed during the explosion, killing countless mercenaries and Dr. Lothar's men.

At the same time, more than a dozen helicopters tried to leave the island.

However, under the radar of the warships, none of the helicopters could leave the island safely.

The entire bombing lasted for nearly an hour, and the island was bombarded until there was no skin left.

At this time, the defender behind Yu Tian said respectfully, "Sir Yu Tian, our shells are almost empty. There are only ten thermobaric bombs left,

however, the power of these bombs is extremely strong. If they are thrown onto the island, it is very likely that the island will sink! "

When Yu Tian heard this, he felt extremely excited.

He had originally wanted to destroy this small island. Wasn't this the best opportunity?

He nodded his head very clearly and said with a calm smile, "If he really has such great power, I would like to see if he can blow up this small island. Convey my orders and fire these thermobaric bombs!"

The defender looked at Yu Tian with a sad face, but he still turned around and gave Yu Tian's order to the missile launch team.

Soon, ten thermobaric bombs landed on the island one after another.

Beams of light shot through the sky and exploded on the island.

Even the battleships dozens of nautical miles away were shaken by the explosion, and their bodies were shaking.

Yu Tian had no choice but to hold the railing of the ship, staring at the island without blinking.

When the thunder-like sound pierced through his ears, the waves on the sea crashed into the ship like a tsunami.

All the battleships rose and fell in the waves, as if they were experiencing the destruction and destruction caused by the missile explosion.

The entire island completely disappeared in less than two minutes.

After the island disappeared, an intense whirlpool appeared on the surface of the sea.

Through the observation satellite, Yu Tian saw the place where the island sank. There were actually many mutated humans struggling in the sea.

Obviously, they were not very familiar with the water. There were many mutated humans that completely drowned after struggling for a while.

However, there were still a large number of mutants who could not drown in a short period of time due to their violent nature?

When he saw this, Yu Tian decisively gave the order.

"Order all warships to head to the place that has long sunk. Beat those mutants in the sea to death! "

After the order was given, all the warships sped up and soon arrived near the island.

Looking at the dark mass of mutated humans in the sea, some of the defenders were dumbfounded.

Yu Tian, on the other hand, felt very satisfied and followed the order, "Alright, this is not a tourist attraction. We still have to let you guys take a closer look.

Now, use your heavy weapons to fire at them and kill them all! "

The defenders obeyed the order and raised their heavy weapons on the side of the ship, bombarding the mutated humans in the sea.

These mutated humans were already struggling in the sea. Now that they were attacked by heavy weapons, they had lost all their offensive abilities.

Their defensive abilities were slowly weakening until they finally sank into the sea.

When the last mutated human stopped moving, Yu Tian said with satisfaction,

"I'm very satisfied with this battle. Each of you contributed a lot!"

"Now, go and meet up with my mothership group and wait for other orders! " After saying that, Yu Tian teleported back to the research center. The defenders were so scared that they almost knelt down and kowtowed..

?Chapter 692 – : Chapter 691, Unknown Self-Confidence

Yu Tian, who had returned to the research and Development Center, immediately began to deploy mercenaries.

At the same time, the Supreme Management Department of the superpower arrived at the office. They were still thinking about how they could use mutants to win the war.

When they found out that their plan had sunk to the bottom of the sea along with the island, they jumped up in anger.

This was his last weapon, and it was also the only power that could contend with Yu Tian. But what could he do now? Not only did he lose his weapon, but he also lost the entire fleet of warships.

The losses this time could be said to be extremely heavy. Originally, he was preparing to go to war with the Yu Tian family, but he lacked weapons, warships, and so on.

Losing the entire fleet of warships in an instant not only destroyed his battle plan, but it also weakened his entire combat strength.

Klein gritted his teeth and roared, "Yu Tian, you've gone too far. How could you do this to me? This was supposed to be a fair war, but you're playing tricks behind my back!"

In that case, there's no room for negotiation between us. This war must go on!"

Speaking up to this point, Klein immediately called all the higher-ups of the Defense Department to the meeting room.

Even after such a long time, the more he thought about it, the angrier he became.

He wished he could kill Yu Tian himself right now.

The senior executives of the Defense Department looked at him silently, not knowing what to say.

The battle had not even begun, and they had already lost so much. If they were to really fight, who knew how much they would lose.

However, their senior CEO did not seem to care about this at all.

Even if he only pursued winning and losing, there was no possibility of winning.

The senior CEO of the Defense Department, Tirath, saw that no one else spoke, and everyone's expression was especially heavy, as if they had already fought this war.

However, his thoughts were different from theirs. Yu Tian was only one person. No matter how powerful his family was, no matter how many mercenaries he had, there were still flaws in them.

Thinking of this, Tiras slowly stood up and said coldly, "What are you all thinking about? Could it be that you are already afraid before the war has even begun?"

Yu Tian is just an ordinary person. Even if his personal combat strength is very high, how many people can he kill? Right now, we have over ten million regular defenders and attackers,

do you really think that he can make all these people submit to him by himself?

It's like a fool's dream,

don't forget, there is no perfect battle plan in this world, let alone a perfect person. Even Yu Tian has his own shortcomings.

First of all, its mercenaries come from all over the world, and there is no tacit cooperation. If they really fight, they will fight for themselves. Thus, there are some deficiencies in commanding,

second, although he had the best weapons manufactured and developed by the industrial company, this war was between us and his family, and the war committee of the Allied countries didn't care about this at all,

so, we could use large-scale destructive weapons to directly launch the most effective and destructive attacks against all those mercenaries, as well as his space base, aircraft carrier group, and so on,

and finally, we can use our best command system, and our defenders and attackers, to carry out a full-scale attack on their headquarters, and even Sean,

because we also have our strength, although our economy has collapsed, but our fighting capacity still exists, our planes can still fly,

our missiles can also be launched, so what's there to be afraid of? Not only am I not afraid, but I'm also looking forward to this war,

if we don't defend our own interests and watch as the money in our pockets is snatched away by others, who among you can bear it?"

Tirath's words were very pleasing to Michael's ears. He even stood up and clapped for Tirath.

Then, he praised, "Tirath's words are what I want to say. I think that I made the right decision to make Tirath the president of the Defense Department. "

What he said wasn't wrong at all. If we had lost our courage before the beginning, then this war would have been doomed to failure. And now, I have decided that I must continue fighting this war, and I want to win., so I hope that each and every one of you can think calmly about how we should fight this war. "

After saying that, not only did everyone not get excited, but they became even more helpless.

The vice president of the Defense Department looked at Tirath with a sad face and also shook his head helplessly. He had a belly full of words and did not know what to say.

These two idiots had imagined their hopes to be so beautiful. Did they not know that? This was a war that could not be won.

They only said it with courage, but if they were to really fight, their faces would be swollen by Yu Tian.

Most of the people in the senior management department had the same thoughts. However, they had already made up their minds to fight with Yu Tian. There was no use saying anything else.

However, some people did not want to see this war, such as the middle-aged woman sitting next to the vice president.

Her expression was extremely grave. She kicked the vice president's foot under the table. Because in this situation, only the vice president had the right to speak. She was only the vice president's assistant. It was useless for her to be anxious.

The vice president looked at her helplessly. He did not know what to say.

At the same time, in Sean's high-level command center, Yu Tian's expression was especially grave.

As long as the war started, many people would die in the cannon fire. This was not the scene she wanted to see.

Therefore, Yu Tian was now considering a more effective method. It would be best if a dozen people could bring the war to a complete end.

Thinking about it carefully, the person who deserved to die the most was the supreme president, Michael Klein, followed by the President of their Defense Department, Tirath.

As long as he could make these two disappear, the war would not start, and countless people would be able to continue living.

However, doing so had two sides. If more people used this reason to attack him and fool those ignorant people, the war would still start.

However, the probability of this happening was only about 20% .

While Yu Tian was considering these questions, the artificial intelligence spoke up

Chapter 693 – : Chapter 692 Made A Lot Of Sense

While Yu Tian was thinking about it, the AI suddenly spoke.

Yu Tian was shocked, and he said impatiently, "Can you not speak so suddenly? It's very scary, do you know?"

The AI chuckled and said indifferently, "I found something very interesting, and I want you to share it with me. I think you must want to know too"

"I can feel that your nervous system is producing violent fluctuations. You must have something very difficult to choose from. After my logical analysis, I feel that compared to other decisions"

"You seem to be very hesitant. If it was in the past, you would have given this order very easily, and you definitely wouldn't care about the lives of others. But this time, you're hesitating. Is it because you're afraid?"

Yu Tian snorted. Who said that he was afraid? He just did not want so many innocent people to die in this war. What was there to hesitate about?

He said coldly, "With an artificial intelligence, what do you know? Don't act as if you know everything. Now you know what I am thinking?"

"If you have the time, help me think about how to let this war end? "End the war with the least number of deaths, and not show your so-called logical thinking here! "

The AI said unconvinced, "What's wrong with logical thinking? This is something that you humans don't have. I know what you're thinking. You want to end the war by killing the supreme president and the Supreme President of the Defense Department,

"Then, you can end the war. This way, innocent people won't lose their lives in this war. However, you haven't considered that the people in the entire superpower hate you more than they like you, haven't You Seen the news on TV? Now everyone, they really want this war, because they think it can save their economy,

it can make them go back to their old lives, and even if you think about them again, you can't change their minds, and even if you admit defeat, they won't change their minds,

"If you don't believe me, you can use your intelligence personnel in superpower to see what they are doing. I think you should know what to do by then!"

It had to be said that this AI had a point.

Yu Tian scratched his forehead. Although he didn't want to say that the AI's suggestion was good, he still said in a low voice, "If you give me more ideas in the future, I won't say that you are an idiot, ai, you are still thinking about those useless things all day long

The AI didn't say anything either, because through analysis, he knew that Yu Tian was praising him in another way. This made her feel that she was very powerful and that she was very proud of herself.

As expected, Yu Tian also told Chu Meng about this idea.

Chu Meng immediately made arrangements, and very soon, all the data from superpower was uploaded to Yu Tian's side.

Yu Tian opened up the detailed information and looked at it carefully.

The intelligence personnel sent over a lot of images and information.

They were all randomly asking the ordinary citizens if they would want this war to happen?

A lot of the citizens basically said the same thing.

"We absolutely support this war. I think the Supreme CEO didn't do anything wrong. He's protecting us, and he's also trying to get those ruthless capitalists out of our way! "

"The CEO is doing a great job. If we start a war now, I won't hesitate to pick up my weapon and kill all the executives in Chu Wen Industry! "

"We should have done this a long time ago. The industrial companies have destroyed the economy of this country, and now they've casually shut down so many companies, making countless people unable to eat. "

"If I were the supreme president, I would definitely use war to let them know how powerful we are, especially that Yu Tian. I know that he can see me talking now,

"So, I want to say to Yu Tian, a€?Hey, you idiot, you idiot. Everyone calls you a vampire and thinks that you're a demon, but Pm not afraid of you. Do you have the guts to stand in front of me??"

Because of you, a lot of people around me now can not even eat, but you are enjoying a good life, you are simply a bastard,

if you dare to stand in front of me, I will use my fist to let you know how much we are angry with you? You are a damn bastard,

or take your people, get out of our here, we do not need your help, your help to us is just to squeeze every drop of blood and sweat on us, you are a vampire! " Yu Tian felt ridiculous when he saw this.

These people really had a rich imagination. Didn't they think about why? They didn't do anything. They just did some normal business activities.

However, there were a lot of people who wanted to associate normal business activities with aggression.

No wonder their economy would collapse. Even if their economy didn't collapse, others would do the same as them.

He had already said that the structure of this world had completely changed. It was no longer the economic development model of the past.

During this process, the Chu family had become stronger and stronger. They had even reached an invincible level. This development would definitely cause some people's interests to completely disappear.

There was a saying in the AI that was right. This was the drawback of human emotions. Humans had feelings, so there was gratitude and hatred. This was very balanced.

Yu Tian continued to read the information at the back.

Due to the economic collapse, everyone felt extremely excited about this war. Therefore, many of their rich people were willing to take out their funds and provide them to the highest management department.

They supported them and insisted on fighting this war. The ordinary people even gave their most precious food, gold, and jewelry to the country to support this war.

There were also many media outlets that were attacking and insulting Yu Tian and the Chu family, portraying them as devils and the people who started this war.

Under their persuasion, almost everyone treated Yu Tian as a devil that should be killed.

There was also a set of data. The Supreme CEO had given the order for the war, and there were over millions of young people who wanted to join the war.

They even had their own slogans.

"Let Yu Tian die.. We are not afraid of You!"

?Chapter 694 – : Chapter 693, Simple-Minded

What was even more outrageous was that these people had created many resistance organizations that were specifically used to attack Yu Tian and the industrial companies.

As a result, many shops, malls, and even the headquarters of the industrial companies in Metropolis had been smashed into a mess by these masters. Most of the goods had been snatched away, and many people had been injured.

Before Yu Tian received the information, these organizations had launched all kinds of attacks and injuries on the Easterners.

When Yu Tian saw this, he couldn't take it anymore, but it hadn't reached the point of anger.

Because there were very few things that could make him truly feel angry, and the data on these documents only made him feel helpless.

He really didn't know what these people were thinking. Could it be that a war was that fun for them?

Didn't they know that even if it was a war between their families, countless people would die in it. How would this trick them into thinking? Would it make them think that death was so fun?

After the AI sensed Yu Tian's thoughts, it slowly said, "This is the nature of humans. When they think that hatred can replace everything, they will not think about other things calmly, if they can really calm down and use your human nature to think about the nature, they will not have the mentality they have now,

they would even oppose war and spare no effort to stop it. However, they did not want to do so at all. They thought that this was a way to express their courage,

in the simplest words of humans, they are unbridled pretentiousness. They will never know the horror of war until they see the real death erupting beside them!"

Yu Tian nodded and agreed with the APS words. He even said in a ridiculous manner, "This is what humans are like. Compared to your AI, humans will never learn to calmly see the nature of certain things,

they will only think in their own way, and the result of doing so will only be slapping themselves in the face. No one will be able to save them!"

At the same time, in the meeting room of the Super Country's top management department, the Vice President of the Defense Department finally could not take it anymore. He suddenly stood up and said angrily, "Can the two of you calm down?

"Now is not the time to go crazy. If your craziness can help us win this war, I will go crazy with you,

but now, what do you think your madness can bring us? In my opinion, there is nothing but destruction. Do you really think that we are Yu Tian's opponents now?

I have analyzed some data for you. I hope that you can see something else in these data. First of all, Yu Tian now controls more than two-thirds of the world's wealth. Do you know what this concept is?

That is, more than two-thirds of the world's countries will stand on Yu Tian's side. Even if Yu Tian doesn't use mercenaries, with just a casual sentence from him now,

more than 150 senior management departments will declare war on us. At that time, although it will also be a world war, fundamentally speaking, this world war will be the world against us,

you always said that Yu Tian alone could not win against all of our defenders and attackers, but how could we win against them?

According to the information gathered by the intelligence department, Yu Tian now had more than 20 million mercenaries under his command, and the sky fighters deployed in our surrounding countries..,

looking at it now, there were already more than 5,000 of them. At the same time, they also had seven aircraft carrier groups, which had now entered our waters,

and how many attack submarines do they have now? We don't even know.

That's not even counting their long-range firepower. What do we have now?

Even if everyone here has courage, can this courage defend against their artillery fire? Especially the president of the Defense Department. I've always wanted to say that you're a pretentious bastard,

you're also an idiot. Pm sure you won't be happy when I say this, but I have to scold you like this. You're an idiot. Do you think that you have so many defenders and attackers? They can be at your command at any time,

you can make them go to the battlefield to become cannon fodder with just a word. You can make them fight desperately to die with Yu Tian. Then, I want to ask you a question. How are you going to mobilize your people now?

Yu Qian has already used very, very quick reactions and occupied the best battlefield position. Now, even if you were to mobilize the defenders, you don't know where to get them. This battlefield has long ceased to belong to us,

when our economy collapsed, we already lost these things. Why are you still dreaming now? You still think you can win, and you have a senior CEO,

compared to him, you have two more minds. You At least know how to ask for our opinion in a meeting before you continue to show off. But did you listen to our opinion?

Is our opinion really that important to you? In that case, why are you wasting your time here? Take your weapon and go fuck Yu Tian,

in the end, you'll dry up your underwear. What should you say then? What can you leave behind at that time? I really don't want to say anymore, because I've already said what we all want to say to you. If you still want to continue fighting, then go ahead and fight. But don't count me in,

"From now on, I won't get involved in this. You guys go ahead and do it yourselves. I'm going on a trip to the eastern country now. If it's possible, I even want to sit down with Yu Tian and have a drink and talk about life..,

"It's better than daydreaming with You Idiots!"

Having said that, the vice president slammed the document in his hand onto the table and left the conference room without looking back.

His words caused the entire meeting room to fall silent. Both Klein and Tiras frowned tightly.

However, they still didn't have any intention of changing their minds.

At that moment, more of the higher-ups also got up and left the meeting room. It was obvious that they wouldn't support this war at all.

Don't blame them for not coming up with good suggestions if you lose the war.

In the end, there were only a few people left in the meeting room. However, these people didn't have any special thoughts at all. They just didn't want to lose their current positions.

At the same time, they were thinking that once the other high-level officials left, they would become those high-level officials themselves..

?Chapter 695 – : Chapter 694, The Attack Broke Out

The confidence of Klein and Tirath came from the support of the people outside.

It was as if they would be letting down the excitement of the people outside if they didn't start the war.

In particular, a few minutes later, Klein held a press conference and said to the reporters around the world, "I didn't want to do anything to the Sky Family?

After all, he provided us with a lot of help during our most difficult times. We thought that he wanted to help us get through the difficult times together, but we realized that..,

he was just using us. After he made a huge profit from us, he mercilessly abandoned us. It was also him who caused our economy to collapse..,

"So we must stand up and use our strength to defend our own interests. May God Bless Us!"

Yu Tian shook his head helplessly when he saw the press conference.

He had already given them so many choices, but they just had to want this.

Since they wanted to fight, he would definitely accompany them to the end. It was impossible for him to make them feel afraid.

Yu Tian also announced his intentions to Chu Meng and the others, telling them to prepare for an all-out war according to their own plans.

At the same time, Yu Tian also ordered, "War will affect the economic development after all, and it will also affect our family's investments in the world. Therefore, if a war is to be fought..,

"I don't wish for this to be a messy war. My idea is to get rid of Klein as soon as possible and order the sky team to follow the Supreme CEO."

"The intelligence department also needs to update their data at any time and place. Everyone who wants to fight us is our enemy and is within the range of our attack,

"But we will definitely not attack first and wait for them to fire first!"

Just as Yu Tian finished speaking, Chu Meng smiled helplessly and said, "They have already started their meeting. Half an hour ago, their maritime defense team launched a large-scale meteor shower missile at our mothership group!"

"Then what are you waiting for?" Yu Tian said firmly, "Order everyone to start working. Remember, the faster the better. All of them are instant strikes!" Chu Meng passed down Yu Tian's orders at the same time.

The CY5 Super Fighters deployed at the sky base immediately rose into the air.

The long-range strikes on the ground also began at the same time. Countless missiles landed on the main attack coordinates in the surrounding area like meteors.

At the same time, the mercenary group also began to land.

Yu Tian witnessed the entire scene. At this moment, he felt that his hands were especially heavy.

This was power. With a single order from him, countless people would charge at the front.

Countless firearms would fall from the sky and land on the ground.

One after another, the super fighter jets and countless bombers flew across the sky and threw countless bombs onto the ground amidst a deafening buzzing sound.

The landmark buildings that they were once proud of collapsed one after another under the torrential bombardment.

However, their defense could be said to be stretched to the limit. Although a portion of the fighter jets were shot down, compared to the overall attack, this kind of defense was like scratching an itch.

At this point, Yu Tian was especially surprised.

These weapons developed by Chu Yan industry were practically invincible, especially those fighter jets. The invisibility effect was almost unbeatable.

The fighter jets flew past their defense base. The radar could not see any figures. They directly flew past their eyelids.

Yu Tian went to the lounge and poured himself a cup of coffee, trying to calm himself down.

Compared to the previous skirmishes, this kind of war scene was like the difference between heaven and earth.

And at that moment, Chu Meng called.

"Yu Tian, it seems that our attack has shocked the whole world. The organization in the world wants to mediate between the two sides, the president of this organizationa€| "

"Runt Kane has asked to see you. He has come to Sheehan, and I think it's better for you to meet him! "

Yu Tian did not think that Runt Kane could bring any change to this war?

However, he still nodded and said, "You can meet him. Let him in. I'll be in the Lounge! "

Soon, a few men in suits walked into the lounge. The one at the front was Lundkaine.

He looked to be in his fifties and gave people a sense of calmness.

After the assistant and others invited them to sit down, Yu Tian turned around and said with a smile, "Welcome to Sean. This is a beautiful modern industrial citya€| "

Later, I'll get someone to show you around the city's famous scenic spots. After that, I'll treat everyone to a taste of oriental food. I'll also arrange a bath and massage at night. What do you all think?"

Rundkaine shook his head helplessly and said with a smile, "Mr. Yu Tian, you're really humorous. You're completely different from the rumors about you. Now, the entire world thinks that you're a war maniaca€|"

Furthermore, the war that you're waging against Klein has already caused them a devastating blow. This has completely gone against the war's intent., according to the data I've gathered, your mercenaries have already landed in the coastal areas over there, and there are at least twenty million of them,

heavens, in the entire history of the world, there hasn't been such a huge war scene. Compared to your strength, there's no chance of Klein winning at all, therefore, the Alliance War team hopes that Mr. Yu Tian can immediately end this war and avoid large-scale innocent killings. This is something that none of us want to see. I don't think this is what you want to see either! "

There were many professional words in rentkaine's words. With Yu Tian's foreign language skills, some words could not be understood, but most of them were still understood by Yu Tian.

For example, that sentence, they only wanted to end the war, and not use a forceful command tone to end the war. This was very questionable.

This war intervention group was a very inconspicuous organization in the world. No matter where the war broke out, they would appear, but they couldn't change anything.

Because the war was related to the interests behind it, ending the war meant that the interests would be obtained, and it wouldn't develop according to one's wishes.

Yu Tian chuckled and said indifferently, "It's not impossible to end the war..

First, you have to get Klein to stop his crazy ideas! "

?Chapter 696 – Chapter 695, No One Wins

Rundkaine listened quietly the entire time. After Yu Tian expressed his thoughts, he nodded slightly and said in a deep voice, "I've already heard what your excellency Yu Tian means..,

but according to the information I've gathered, the initiator of this war doesn't seem to be mcclain. If you hadn't engaged in destructive economic actions in the superpower, president mcclain.., would not have used force to defend your own interests,

therefore, our group agreed that only if you declared an end to the war would everyone in the world feel that it was fair. Of course, you could also continue to attack mcclane according to your own ideas,

you would end the war when the entire superpower was in ruins and the people had no way to live. However, at that time, you also had to understand that the alliance would use any excuse to attack you,

from a personal point of view, the Chu family has more enemies than partners in the world. Because of the family's aggressive business practices, countless people have suffered a heavy blow, and when you have accumulated more than two-thirds of the world's wealth, you think it's easy for you to start a war or make a super CEO bow and scrape to you, but Mr. Yu Tian, have you ever thought about that? The more domineering you are, the more people will oppose you. And when you stand at the top of the world, the more people will oppose you,

countless people will be worried to death about you. When these people unite, you know very well what will happen? That's right, it will be a world war,

if the entire world is involved in the war, the wealth that the Chu family currently possesses will shrink at a lightning speed. When the entire world is under the shadow of war..,

at that time, the position of the number one family in the world of the Chu family will no longer belong to you. Therefore, I didn't come here to order you or force you to do anything?

"I'm only here to analyze the pros and cons. I think Mr. Yu Tian should be very clear that when that scene appeared, the real winner wouldn't be you, nor would it be the Super CEO,

"That's because everyone who is involved in the war loses!"

Yu Tian listened to his long-winded explanation. Although there was a certain logic to it, his analysis was completely different from what he had thought.

Although he did not force himself to do so, he did not want to hear the hidden meaning behind his words. If he did not agree to end the war, then the alliance would place his family and himself in the position of the enemy.

What was the difference between this and force? What was the difference between this and acting cool?

When he thought of this, Yu Tian smiled domineeringly. He stood up and said, "I understand what you're saying very clearly. However, if you want to hear what I mean, I can also tell you very clearly that ending the war is impossible!"

I'll say it again. Only when their super CEO announces that they've lost will I stop the war. Otherwise, I'll keep fighting. Don't waste your time here..,

the person who decides whether the war will continue isn't me, but Klein. I'll open a special passageway for you so that you can freely enter and exit the battlefield..,

speak to whoever you need to speak to. Don't talk to me like this. I don't want to waste time with you. Now, please leave! "

Rundkaine spread his hands helplessly, stood up, and said, "It looks like Sir Yu Tian needs time to consider. I can give you that time, but I have to say..,

we are only here to mediate. We do not treat you as our enemy, and we are not your enemy. On Klein's side, we will definitely convey your intentions to him,

"And I still hope that your excellency Yu Tian will consider my proposal carefully. I'll stick to my words. I think you don't want too many people to die in this war either! "

Yu Tian didn't even feel like nodding his head. He only signaled his assistant to ask these people to leave.

Because there was nothing to consider. He didn't care about any benefits at all. This was face. If everyone could use war to slap their own faces, then what would the world treat him and his family as?

In the end, this was a war of face.

Back at the command center, Chu Meng and Chu Yue came here as well.

Chu Yue brought the latest data.

She opened the map and said coldly, "Our intelligence personnel have marked the base of this map, the important locations for the attack..,

these locations are where mcclane and his higher-ups are, but we still don't know where mcclane is hiding? "That's why we're still continuing to collect this data! "

Chu Meng added, "Our ground troops have successfully landed. Although they've encountered a large area of resistance, it can't stop us from moving forward,

"The entire coastal area is now under our control. The mercenaries are currently in the process of reorganizing themselves. In ten minutes, they'll head inland and begin moving forward! "

Yu Tian shook his head and said, "Order these mercenaries to only control these coastal cities. There's no need to continue advancing!"

Everyone looked at Yu Tian in confusion. If these mercenaries didn't advance, the war wouldn't end so quickly.

Chu Meng immediately said, "Although our aircraft carrier group and sky base can attack them from the air, without the cooperation of the ground, the war wouldn't have ended as we expected.

"Most importantly, our entire plan has to be changed. Now is the best time for us to launch an attack. If we suddenly change our plan, our morale might be reversed! "

Yu Tian laughed and said indifferently, "Even if we continue moving forward, this war can not end so quickly. Klein is not a fool.., he was just pretending to be a weakling in front of our previous attacks. Don't forget that before we rose to power, he was the world's most advanced senior CEO with the most weapons.., now, their ground defenders have almost completely given up all their defenses and are retreating in the direction of their capital. Don't you understand? "They are forming a crater-shaped formation,

"Just like a monster with its mouth wide open, waiting for us to jump into its mouth. So, we won't fall for this trick. We just need to control the coastal area, "Then, we will build

our base here. At that time, the attacks on them will be even faster and fiercer. We won't have to sacrifice so many innocent people.

This is the best choice!"

When everyone heard this, they were completely convinced by Yu Tian..

?Chapter 697 – Chapter 696, Absolutely Satisfying

Yu Tian's idea was completely correct. Klein wanted Yu Tian's mercenaries to enter his ambush and then deal a devastating blow to them.

However, as he waited and waited, the mercenaries had no intention of advancing at all. Instead, they were building bases in the areas they occupied.

After collecting this information, Klein felt particularly angry.

He had been enduring all this while. In order to complete this so-called perfect plan, he had even let many of his fighter jets go to waste.

He had even taken the initiative to hand over the entire coastal region to them. But now, from the looks of it, his plan had been completely discovered by Yu Tian.

Not only did Yu Tian not launch an attack, but he had even built a base here. He was clearly preparing for a long battle with him.

At that moment, hidden in the underground bunker in no man's land, Klein once again called the Defense Department's upper echelons, and even the attack department's upper echelons, to the conference room.

He tried his best not to express his helplessness and deep hesitation in front of everyone.

This was because everyone needed morale now. If he expressed his helplessness first, how would his subordinates fight this war?

Basically, he didn't need to do anything. He just needed to wait for his loss.

However, he didn't want to lose and he still needed to win. As long as he could win this war against Yu Tian, his dominant position in this world would continue to exist forever.

Therefore, even if he had to fight until the last soldier, he had to continue fighting this war.

The President of the attack department, Thompson, was the same as Tirath. They were both very enthusiastic about this war, and in the previous battle plan, they were also the main planners.

But now, it seemed that their tactics were not effective. From the beginning until now, they had been led by the nose by Yu Tian, and they had suffered heavy losses.

Now, they did not seem to have any other choice because the plan had already begun. All the defenders deployed in the coastal areas had already been mobilized to the inland areas. It seemed unlikely that they would be able to fight back now.

However, if they did not fight back, they would be even more passive after they had enough time to build their bases. At that time, they would not be able to fight back even if they wanted to. Everyone would not have to do anything,

they would have to defend against their attacks and harassment every day.

This was enough to tire them to death. Therefore, the best defense for now was to launch an attack.

Thinking of this, Thompson said with a gloomy tone, "Now, we can not wait here for their base to be built. What we should do now is to use all our strength!"

"Attack the areas they have occupied. We must take back these areas no matter what. Our previous plan has failed, so whether we can take back these areas is crucial for this war!"

"It's crucial. Moreover, our special attack team has already entered Sheehan and is now looking for Yu Tian's command center. At that time, they will destroy this command center at all costs!"

At that time, we would be able to buy most of the time to redeploy our people. This time, the special attack team that went to Sheehan was the most elite attack team we had,

they had carried out countless special missions. Each of them had extremely strong combat ability. They could complete the most difficult mission in the world, and they would also be excellent at fulfilling the mission's requirements.

If it was possible, they could even launch an attack on Yu Tian. If they could kill

Yu Tian, then this would be a perfect beheading mission,

and this battle will definitely be remembered in the annals of history. It will let everyone who comes after us know how powerful we were. We could even kill the world's most powerful Yu Tian!"

Klein nodded in satisfaction. Although he didn't know if Thompson's plan was feasible, compared to others, it was at least a plan that they could come up with.

As for the other higher-ups sitting in front of him, other than nodding and shaking their heads, they couldn't come up with any other plans. They really didn't know what they were here for?

Could it be for those few free cans? And the underground bunker that was sufficient to deal with a nuclear strike?

He looked at everyone coldly, he said gloomily, "I am very satisfied with this plan. I hope that every one of you here can contribute to this plan. At the very least, let me know that you have the value of existence. "

"I don't need a good-for-nothing here. I need people like Thompson and Tirath. Now, I order all of you to draw up a detailed battle plan,

"If you can't come up with a good battle plan, then there's no need for all of you to stay here! "

Klein felt that his orders were very natural. At the very least, he could let these idiots understand that this was a period of war, and it wasn't the time to dawdle.

However, what Klein didn't know was that the contents of the meeting had already been made known to Yu Tian. Furthermore, Yu Tian had already grasped the coordinates in Klein's eyes.

This was the advantage of a powerful intelligence network. Intelligence personnel were everywhere, and they could quickly gather all the information.

At that moment, Monica, who had provided the information, called Yu Tian and said proudly, "Actually, I don't want these developers to participate in this war!"

"Because it seems especially unfair. A war with developers is a destructive massacre. This isn't what I want to do, but letting developers collect information..,

"So that this war can end quickly, this is acceptable. Therefore, I provided you with this information because I want you to end this war quickly!"

Yu Tian laughed and said disdainfully, "Why are you so anxious when I'm fighting with others? If you're really anxious, you can play with me. This will definitely be fun! "

Monica sighed helplessly and complained, "This isn't a game. I don't know what's fun about this. Anyway, I've given you the information. You can do whatever you want to do!"

"What I need to do now is to help the real refugees. They are already very pitiful and still have to experience the devastation of the war. So you'd better be careful. "

"When the time comes, I'll send you the coordinates of the refugee camp.. I

Don't care if you bomb other places, but you definitely can't bomb this place! "

?Chapter 698 – : Chapter 697 Was Even More Precious

Yu Tian felt that Monica was really quite cute at this moment. He originally wanted her to do some other work behind the enemy lines, but this girl actually went to protect the refugees.

But he couldn't say anything because protecting the refugees was also a very important job.

Now, Naruto himself didn't support war, or rather, they were in a neutral mode. Logically speaking, they should indeed be protected.

However, Yu Tian also considered other aspects.

He nodded and said indifferently, "It is possible to protect refugees, but you have to pay attention to your own safety, because the human nature of war is impossible to guess,

these people can use their weapons to attack anyone for the sake of survival, even for food, medicine, and other resources,

although you are developers, you don't need to worry about this point. But sometimes, without using the developer's skills, your defense is equal to zero,

so you must remember my words no matter what. You must never trust anyone. If he is really a refugee, then he will definitely seek help through various means,

if he is not a refugee and only wants to take advantage of you, then you need to carefully distinguish him. I am very busy right now and have no time to care about you, you must be careful. I also promise you that this war will be over soon. When that time comes, I will invite you to take a Bath! "

Monica knew that Yu Tian was concerned about her, and her heart was particularly warm, so she said gently, "I will be careful. You Don't have to worry about me. I hope that we can meet soon after the war is over,

sometimes, missing someone was a very good seasoning. It would make them cherish each other even more. Am I right?"

That was very true, but it was a little slow. Yu Tian was not in the mood to talk about love at the moment.

He only smiled coldly and said, "That's quite good, but now is not the time.

When I win this war and kill Klein, I promise that I'll sit in front of youa€]"

He had specially set aside two minutes to listen to what you had to say. Now, you should go and protect the refugees. If you need any resources, you know what to do.. , I'm not going to waste time with you. Pm going to fight!"

After hanging up the phone, Yu Tian fell silent for a minute.

In that one minute, Yu Tian's mind was spinning rapidly.

Not only did he come up with a series of plans, but he also considered the impact of this plan in a particularly comprehensive way.

First was the special attack team that Thompson had mentioned. It was obvious that they were now in Sean, and they might soon appear near the command center.

If they were allowed to attack recklessly, he could just open the portal and disappear without a trace without caring about anything.

However, the others in the base couldn't do that. They didn't have his ability, and it was impossible for him to bring everyone out through the portal.

Even if he could do that, he couldn't do it because the reason was simple. The whole world was watching this command center. After giving an order, there would be at least tens of thousands of reporters, they would spread the order and become news that would shock the world.

If the command center was destroyed by these special attack teams, it would have a significant impact on the morale of the other people in this war.

And more importantly, behind the command center was the research and Development Center. If he blew up the command center, the research and Development Center would suffer as well.

Therefore, no matter what, he had to kill these special attack groups before he attacked mclean.

After making this decision, Yu Tian immediately called Chu Meng to his side and said softly, "You've seen the intelligence from before, so I need you now.

Immediately get the mercenaries to protect the command center,

"Also, I need to know the current position of those special attack teams! "

Chu Meng said awkwardly, "Yu Tian, Oh Yu Tian, do you really think I'm a God? Those people are the best special attack teams in the world. If they want to hide, even if a real god comes!"

"It's impossible to find them. You're just making things difficult for me. Besides, you're so powerful, why don't you go and Find Them? "You only know how to flirt with girls and drink coffee, right?"

Yu Tian shook his eyebrows and laughed out loud. He felt that Chu Meng was really cute when she was jealous of others. If this wasn't a fight, he really wanted to hug her and kiss her hard.

He thought that she really didn't want to do it, but it turned out that she was angry when she heard him talking to Monica.

Yu Tian pinched Chu Meng's little face with all his might, causing Chu Meng to Grimace in pain. He hit Yu Tian hard a few times and said angrily, "Ouch, you pinched me so hard, does it hurt?"

Why do I Feel Like You're an animal?"

"You're the one who's an animal, don't I think you're cute? That's why I pinched you, or else I'd have a child with you right now, wouldn't that be even more animal?"?

"Alright, stop wasting time with me. Hurry up and use all your skills. Didn't you tell me that you were once the most powerful agent in the world?"

"Now is the time when I need you. Immediately go and find those people from the special assault team. But don't kill them, I want to play with them personally..,

"And I want to use them to attack McClane. I'm so excited just thinking about

Yu Tian was excited, but it was a challenge for Chu Meng because the members of the special attack team were probably already in Sheehan.

But now that they had received the order, they were preparing to attack the command center.

Chu Meng thought about it carefully and came up with an idea.

If they wanted to attack the command center, they had to first get close to it, but that was impossible because there were at least 2,000 mercenaries protecting the command center.

If they saw this scene, they would definitely change their attack plan.

They would use the remote-controlled bombs to blow up the command center.

However, if they used the remote-controlled technology, they could also detect the remote-controlled signals through these devices and know where they were.

They would do it as soon as they thought of it.

Under Chu Meng's arrangements, many signal detection devices were already in place. They even transferred a radar.

This was because Chu Meng felt that when the remote-controlled bombs couldn't be used, they would most likely use some ground-based short-range missiles to attack.

With the radar, they could intercept them. This was the best method, and Chu Meng was beginning to be convinced of herself..

?Chapter 699 – Chapter 698, Cold-Blooded Animals

What Chu Meng didn't expect was that at this very moment, the members of the special assault team had already begun observing the command center.

The commander of the special assault team was called Ernstrom. He was a particularly cold-blooded middle-aged man, and there was never a smile on his face.

Because he felt that there was nothing funny in this world.

He held a pair of binoculars as he observed the command center across from him. At the same time, he coldly said to the members behind him, "The reason why we are able to stand here is because we have never placed death in our eyes,

we have been here for a very long time. Previously, we have all been confused and confused. We have all asked ourselves if we can defeat Yu Tian,

"Or can we really kill Yu Tian? "This is the most challenging mission for US since we became the special attackers,

"But we have to do it, because this is what we should do. This is the value of our existence, our destiny!"

The members behind him also looked at him expressionlessly.

This Ernstrom had participated in countless wars, but he wasn't like those regular attackers who only charged on the battlefield with weapons.

If he could survive, he would survive. If that bullet didn't have eyes and was killed, that would be his fate.

But Ernstrom didn't do this. He could be seen on every battlefield before.

He specialized in beheadings, intelligence gathering, destruction, and other missions. Moreover, he had completed each mission perfectly.

That was why he became the commander of the Special Attack Group. This was a supreme honor for him.

Everyone who joined the Special Attack Group wished to be like Ernstrom, a cold-blooded animal. There was no emotion in their eyes, only cruelty and blood.

However, everyone who joined the Special Attack Group knew very well that because they liked this kind of blood, they joined the Special Attack Group.

It was as if at this moment, after waiting for such a long time, they finally had a chance to explode. Even if Ernstrom didn't say this, they would still be very excited.

Because they could finally do something. The special attack team should be on such a difficult battlefield instead of doing some work every day that had nothing to do with them.

At this moment, two members of the special attack team walked in from outside the door.

One of them frowned and said coldly, "Commander, we have already prepared what you want. We can proceed at any time! "

Ernstrom slowly put down the binoculars, turned around and nodded slightly at the member. He said coldly, "Very good. We have already prepared for two months for this mission,

I hope that we are already very familiar with each step and can master it skillfully. This is related to our mission. Can We complete it?

Each of you must remember, destroying the command center is not the main goal of this mission, beheading Yu Tian is what we should do,

but now there are at least a thousand mercenaries outside the command center, and if we want to enter with weapons, it is impossible, so we don't need to bring weapons, after we enter the command center,

"Our people will naturally provide us with weapons!"

One of the members asked, "Are you talking about Blair? He's in the command center right now, but can he get weapons?"

Ernstrom didn't even look at the member and said confidently, "You're all Blair, and Blair is all of you. Any one of you will complete the same task after entering the command center,

"You are doubting Blair, which is the same as doubting yourself. I hope that there won't be any distrust between us this time. At least we have experienced a lot of battles. "

"I don't want to hear that again. Is that clear?"

The member who spoke immediately stood up and said in horror, "Yes, Commander Ernstrom. I just want to complete the mission smoothly. It's not that I don't trust my team members!"

Ernstrom didn't want to waste any more words. He immediately ordered, "We can begin now. Snipers, get into position! "

As soon as he finished speaking, a man behind him, whose eyes were filled with killing intent, took out a sniper rifle from his pocket, he nodded and said, "With these eyes of mine, you can do whatever you want. I will absolutely not let anyone discover you!"

At that moment, Yu Tian was still watching the battle scene on the big screen.

In fact, she had long wanted to teleport to that coordinate point and personally kill Klein, thus ending the war.

However, she couldn't leave yet. If the members of the special attack team had already infiltrated the base, then the mercenaries outside would have no use at all.

Only by being here could he stop their attacks and kill all the members of the special attack team.

At this moment, the door of the command center was pushed open silently. A young man walked to the computer while looking at the data in his hand.

His arrival did not attract any unnecessary attention because he was an employee in charge of the network in the command center. He had free access to the command center.

A woman standing next to him rubbed her neck and said to him, "There are always some delays in the network. Shouldn't we do more cleaning? Oh, Blair..,

do you have any other appointments tonight? There seems to be some problems with the network in my home. I want you to help me check it out! "

Blair hated this woman the most. He did not want to talk to her at all, but now for the mission, he had no choice but to smile and say, "You know that I'm a person who doesn't like to date. I spend most of my time at work,

"Right now, we're fighting with someone, so if I have time at night, I'll definitely go and take a look for you!"

As he spoke, Blair's gaze was fixed on Yu Tian's back.

However, Yu Tian did not know that there was a pair of eyes staring at him from behind. Moreover, the owner of these eyes had been moving his fingers all along.

He wanted to take out the weapon that he had hidden in his arms at any moment and then launch a sudden attack on him.

Just as Blair was about to take out his weapon, the door of the command center was pushed open again. He stepped into the command center with big strides and came to Yu Tian's side.

Chu Meng's bodyguard also stood beside Blair..

?Chapter 700 – Chapter 699, Do Not Cross It

Blair slowly lowered his hand again. Now was not the best time to attack. Once he took out his weapon, the person who would be killed would definitely not be Yu Tian, but himself.

Therefore, he quietly read the information and turned around to leave the command center.

He held the radio that was specially used to communicate with Ernstrom, but he did not send out the signal.

He was thinking that Yu Tian and his men were too calm, as if they were waiting for them to appear.

Yu Tian had already given these orders in the command center, and the mercenaries outside the command center had all canceled their rest time and were all mobilized to their designated positions.

Blair considered that now wasn't the best time to launch an attack. He still needed to wait for an opportunity.

At this moment, Blair, who was standing in the corridor, looked at the entrance of the command center.

Ernstrom, who had disguised himself as a worker, had already led the members of the special attack team to the entrance.

The mercenaries immediately stopped him. Commander Dorias slowly took off his helmet and looked at Ernstrom coldly.

From this person's appearance, Dorias definitely did not believe that he was a worker who came to deliver food.

Doris came in front of Ernstrom and looked him up and down.

Ernstrom looked a little nervous and hurriedly said, "Sir, I'm only here to deliver food. What exactly happened here? Can my food still be sent in?"

"Previously, your kitchen told me to quickly deliver the food. It said that your highest CEO is waiting for lunch! "

Doris did not say anything. Instead, he looked at the tools that contained the food behind him and the members of the special attack team.

Those people looked very normal. There were even a few people who were joking.

Until then, Doris turned to look at Ernstrom and asked coldly, "I've seen all the people who came to deliver the food before, but I've never seen you before." "You said you were delivering food. Who asked you to come?"

Ernstrom shook his head helplessly and complained, "I didn't want to come at first. It was Dorias who wanted to go for a check-up, so I had to deliver the food for him." "

"You don't know me. You can call Dorias. He'll explain everything to you! "

Doris immediately took out his phone and found Doris's number. He immediately called him.

At this moment, Doris, who had been delivering food to the command center, was being pointed at his forehead with a weapon. He picked up the phone in fear, he tried his best to control his relaxed tone and said, "I'm Doris. May I know what you want?"

"I'm the mercenary commander of Sean Command Center. Doris, why didn't you come to deliver food to us today?"

Doris hurriedly explained, "It's like this. I felt a stomachache when I woke up this morning. I came to the hospital to see the doctor, so I asked my relative to help me bring the food to you,

"His name is Ernststrom, and he's a distant relative of mine. He's always been helping me, and he's definitely someone I can trust! "

Dorius frowned slightly. Although Dorius's voice seemed very relaxed, it was still somewhat trembling.

Therefore, he asked curiously, "Why, are you in pain now? Your voice is shaking! "

Dorius wiped the cold sweat from his forehead and hurriedly explained, "I've already said that my stomach is in pain. The Doctor is preparing to give me an injection. I hope that I can recover soon!"

"Then I don't have to use others to deliver food to you! "

Dorias nodded and hung up the phone. He turned to Ernststrom and said, "Leave the food here. You Can Leave Now!"

Ernststrom frowned slightly. If he couldn't enter the command center, then the mission would be a failure.

So he went forward and explained, "It's like this. Dorias told me that we have to get paid after the food is delivered, so we can't leave yet. We have to hand the food to the kitchen personally,

"Then we can leave after we get paid! "

Doris shook his head firmly and said, "No, no one can enter the command center today without the orders of the senior management. Otherwise, you can take the food back!"

"Wait until our orders are lifted, then get Doris to deliver it personally. In short, none of you can go in today! "

Ernststrom nodded. If he continued to speak, Dorius would definitely feel suspicious.

However, if he left, the mission would not be able to continue, so he definitely could not leave.

When he thought of this, Ernststrom gently clenched his fist and turned to face the sniper who was hiding 500 meters away. He blinked slightly.

He was giving the sniper an order to attack. He wanted the sniper to kill a person no matter what. As long as there was a commotion at the door, they could take advantage of the chaos to enter the command center.

According to the introduction, after receiving the order, they immediately aimed at Dorias.

The moment he pulled the trigger, a mercenary happened to pass by Dorias. The bullet pierced through his forehead, and his brain exploded.

The mercenaries at the door raised their weapons at the same time. The sound of the weapons made Yu Tian, who was in the command center, Frown.

It was clearly the sound of sniping. It seemed that the special attack team had begun to move.

He went to the window and looked outside.

The entrance of the command center was a mess. The mercenaries were looking for the sniper's position, and the workers who were delivering food rushed into the command center.

Yu Tian smiled when he saw this and called Chu Meng to his side.

"Do you see those workers? If Pm not wrong, they are members of the special attack team. Don't disturb them first, get someone to follow them!"

"Their first plan is definitely to install bombs in the command center. No matter what, you have to make sure that the bombs can't explode, and then you can tell Doris!"

"Don't waste time looking for the sniper. He won't live long. Let him lead his men and surround the workers in the kitchen. I'll treat them to a meal later! "

Chu Meng nodded and immediately turned around to make the arrangements. Yu Tian shook his head helplessly. These people from the special attack team were only so-so.

They thought that by rushing in during the chaos, they would not be noticed by others. However, if they were to think from common sense, the outside world was already in such a mess.. How could they still focus on delivering food?
