

## One Click 1151

### [Chapter 1151: The inner boundary of the kidney opens up!](#)

"Count it down, there are five thousand three hundred and twenty-six treasure places of the Five Elements."

"Wind, thunder, poison, gravitation, darkness, and other special attribute treasures, eight hundred and thirty-seven."

"Hey, these things are now mine!"

The corner of Su Lang's mouth raised vigorously, and he came to the sky above the huge mountain of fire.

This huge mountain is very large, not weaker than Blue Star Zhu Feng.

And this is a treasure of the fire system, containing extremely strong fire system rules, very suitable for being placed in the inner boundary of the magic.

"Get up!"

Su Lang stretched out his hand and grabbed it. With the endless force driving the rules of gravitation, he forcibly pulled this huge mountain straight into the sky from the ground!

"Enchant the inner world, open!"

Su Lang opened the inner boundary of Yingzhuo and placed this huge flame mountain on Mars.

This giant mountain should not be underestimated. Su Lang was unwilling to throw it on Mars. That would cause huge damage.

I can only put it on gently, and even help to dig a big hole, like planting a tree to plant this mountain on Mars.

After charging this giant mountain.

Su Lang continued to the next destination.

His movements are very fast, and he can collect a precious treasure in almost ten seconds.

Although Su Lang currently only has the Inner Realm of Yingzhuan and the Inner Realm of Qiming, all the treasures with other attributes have been put away and temporarily placed in the storage space.

After all the treasures were put away, almost another day passed.

Su Lang's Enlightened Venus and Yingluo Mars each received more than 1,000 gold rules and fire rules.

The surface of the two planets has undergone tremendous changes.

The metallic and fire-attributed plants in those treasures have survived many, and even become more lush.

The planet that had been dead for billions of years gave birth to plant life, which made Su Lang excited.

The emergence of life represents that the world has once again stepped onto a new level and is one step closer to the goal of prospering the world.

Simultaneously.

In the process of collecting various treasures.

Su Lang was constantly changing the exercises he was practicing, and one third of the four hundred exercises had been practiced.

This allowed Su Lang's combat power to improve again.

In addition to the more than one hundred immortal-level exercises that he had practiced before, these two hundred immortal-level exercises increased Su Lang's attack level by half a small realm.

Defense, physical fitness, and endurance have each added a small realm.

Except besides.

Su Lang's accumulated cultivation base has been able to open up the last inner realm of the five internal organs-the inner realm of the kidney.

There is also mental power, and it has completely reached the pinnacle of the Kongni realm, and can break through to a higher realm at any time.

"Unconsciously, I am stronger again."

Su Lang smiled faintly, very happy.

Immediately afterwards, he temporarily put aside the migration of broken life planets.

Anyway, the rest is ordinary land. If it is broken, it will be broken. Even if it is broken into slag, there is no loss.

"bring it on."

"The inner boundary of my kidney, open it up!"

Su Lang was very excited and gave the order to open up the inner world.

Like opening up other inner worlds, a soreness came from both kidneys, which was very sour.

Immediately after.

A space guide appeared between the kidneys.

It expands and expands like an inflatable ball.

Finally formed a Wuxian inner boundary ten times larger than Blue Star.

"Hahaha!"

"I finally become the man with the strongest kidney in the world!"

Su Lang laughed freely, very excited.

After the inner realm of the kidney was opened, Su Lang could clearly feel a force blessed on him, which made his combat power improve to a certain extent.

It's just that this time it didn't break through the small realm.

"When I install water, wood, and Saturn into the inner world, my strength will definitely increase again."

The corner of Su Lang's mouth twitched, and there was a strong expectation in his eyes.

Immediately after.

Su Lang glanced at Jupiter.

I saw Jupiter shrinking a circle, much smaller than Saturn.

However, it is still a behemoth, and it will take a long time to drain it.

"Well."

"It seems that Mercury is still in my pocket."

Su Lang smiled faintly, "When I have received Mercury, I will try the Soul Gathering Split and Burning Soul Solitary Lamp tactics. I must be able to improve my soul a lot."

but.

Su Lang did not go directly to the solar system, but went to find Chu Xiaobei and instilled 13 rules in her.

Ji Ruxue and Murong Xianxian were still taking psychiatric pills, so Su Lang did not disturb them.

After completing today's training mission, Su Lang went to the space-time channel and set off from Blue Star to Mercury.

#### [Chapter 1152: Circular gravitational array](#)

In just one or two days, nothing has changed at all on Mercury.

The surface is still like a hot hell, but there are very cold ice in some abysses.

The places where the north and south poles cannot be illuminated by the sun are full of strange glaciers.

suddenly.

A space channel appeared in the empty space with long hair and long robes. If ancient nobles, it was Su Lang.

"start!"

When Su Lang saw Mercury not far away, he clicked the corner of his mouth and opened his mouth immediately.

The large-scale formations appeared in space with Su Lang's thoughts, exuding strange powers that counteract the powerful gravitational force from the sun.

After Mercury breaks away from the sun's traction, another large formation will appear, besieging it and preventing it from running around.

Immediately after.

Su Lang immediately used space rules to tear through space cracks and separate Mercury from this space.

Black cracks are all over the space, and even the light is swallowed.

Mercury seems to have fallen into a prison of countless space cracks.

Immediately, Su Lang immediately expanded the inner boundary of the kidney.

Wow!

A world of chaos emerged, like the big mouth of a giant starry sky, swallowing Mercury suddenly.

The original position of Mercury suddenly became a huge shadow!

"Come!"

Su Lang's thoughts moved, and the inner world suddenly closed, and Mercury completely entered Su Lang's inner world.

In the inner boundary of the kidney, Mercury is suspended in the middle, absorbing all the surrounding matter.

A virtual sun orbits Mercury continuously, bringing light and heat.

However, the virtual sun with the power of rules is not comparable to the great stars of the solar system.

Therefore, the temperature on Mercury began to plummet!

Directly reduce from four to five hundred degrees Celsius to minus hundreds of degrees!

Those rivers that were originally in the inner boundary but were later attracted by Mercury's gravitational force have directly become glaciers, covering the surface of Mercury like a spider web.

Su Lang could clearly feel that the thick water avenue continued to spread in the inner boundary.

Su Lang also understood some unfamiliar rules about the water system that he had never understood.

Of course, in a tight moment, you cannot comprehend any rules, only some simple rules.

"Finally finished, the inner boundary of the kidney!"

"Wow, the inner boundary of the kidney is not very nice. The name of Mercury is Chenxing, so let's call it the inner boundary of Chenxing."

Su Lang looked at his inner circle of Chenxing and showed a very satisfied smile.

Immediately after.

He went to take a look at the asteroid belt, which was already full of Jupiter elements.

Small planets are like miniature Jupiters, with their surface covered with gaseous liquid components and a \*\*\*\* in the middle.

Su Lang was floating in the distance of the asteroid belt, looking at this beautiful solar system halo, but he felt a little pity in his heart.

Because the Jupiter components absorbed by the asteroids in the asteroid belt are basically saturated.

The remaining Jupiter elements are homeless and can only wander in space, gradually disappearing.

"Hey, this is really a shame."

"Now Jupiter only draws less than half."

"If this goes on, the remaining half will be wasted."

"Next there will be Saturn, and perhaps Uranus and Neptune. These two are also gas giants and require component extraction."

"If the ingredients of these four planets are all wasted, it would be a violent thing."

Su Lang touched his chin and thought, "No, I have to think of a way to solve this problem."

So, Su Lang began to think hard.

After a long time, finally thought of a way-to arrange a huge circular formation.

This kind of ring formation is all based on the rules of gravity, like a huge but very thin ring, centered on the sun, in the asteroid belt.

Its role is to emit a huge gravitational force, capture surrounding asteroids and spilled Jupiter components.

"The engineering volume of the formation seems to be huge."

"But I didn't spend a lot of time with the means of arranging the formation with one thought."

Su Lang felt that this method was feasible, so he immediately began to arrange the gravitational array magic ring in the asteroid belt.

[Chapter 1153: Explore Zhenxing!](#)

In fact, Su Lang had long experience in arranging this kind of formation with a huge span.

Because the Five Elements Sky is a super giant array covering the entire southern continent, equivalent to half of the solar system!

But what was arranged at this time was just a thin ring-shaped formation, without covering it.

After dozens of minutes.

Su Lang moved forward in the asteroid belt by space means and arranged a gravitational array around the sun.

"Wanxing leads the big formation, come!"

Su Lang initiated the circular formation called the 'Wanxing Traction Array'.

Suddenly, a terrifying gravitation was emitted from the formation!

The surrounding asteroids received gravitational pull, and they broke away from their original orbits one after another and flew toward the gravitational array.

"You can't let so many asteroids hit the formation together, otherwise there will be trouble."

Su Lang thought, the gravitation from above the formation suddenly became much smaller.

But those asteroids still flew toward the gravitational array due to inertia.

Su Lang had to let the gravitational array activate the reverse gravitational function, forcing the asteroids to gradually stop.

in this way.

The asteroid belt became tighter than before under the action of the gravitational array, but did not condense together, forming a strange ring-shaped planet.

Simultaneously.

There are still some asteroids hitting the formation, but due to the small number, the formation has not been affected.

In addition.

Numerous elements of Jupiter are expelled from the space channel, and then captured by the gravitational array, without a trace of overflow.

"When you get away from Saturn, you will also follow the law."

Su Lang glanced at the much slender asteroid belt, turned and flew towards Jupiter.

Not long.

The pale yellow Jupiter appeared before his eyes.

More than sixty avatars and avatars are doing their best to maintain the space channel.

With the withdrawal of more than 600,000 space channels, it has become smaller than Saturn.

"In a day or two, it should be almost the same."

Su Lang nodded, bypassed Jupiter and flew towards Saturn.

Now that I'm here, let's take a look at Saturn by the way.

Saturn is not far from Jupiter.

Su Lang soon arrived near Saturn.

This is a pale yellow planet with a composition similar to Jupiter and a gas giant planet.

It is surrounded by a beautiful planetary ring, and there are many moons in the planetary ring.

The ancient name of Saturn was called 'Zhengxing', which meant suppression and contained the principle of breaking all laws with one force.

Far away.

Su Lang's spiritual power discovered the earth system rules on the surface of Saturn!

"Sure enough, as expected."

"Saturn is also one of the core fragments of the Infinity Realm, containing the Great Road of Earth!"

Su Lang smiled and nodded, and immediately penetrated Saturn with mental power again, passing through the gaseous outer layer and the liquid middle layer all the way to the inner core of Saturn.

This process is more difficult than when exploring Jupiter.

Because the composition of Saturn is more dense, this makes it more difficult for Su Lang to penetrate the spiritual power.

At the same time, the inner core of Saturn surprised Su Lang very much.

Because the inner core of Saturn is even bigger than that of Jupiter, equivalent to three blue stars!

The inner core of Saturn is a huge earth gemstone, with very high quality, very hard texture, and exudes terrifying gravity.

Su Lang estimated that it is because the gravity is too large that the outer two layers become tighter, and eventually the volume is smaller than Jupiter.

To put it simply, Jupiter's core has a small gravitational pull, which results in a large and loose planet.

The gravity of Saturn's core is even more terrifying, causing the planet to be closer together.

"Although Saturn looks smaller than Jupiter."

"But it's not easier to extract the components of Saturn than to extract Jupiter, and it's even harder."

Su Lang clutched his forehead and rolled his eyes, only to feel pain and happiness.

After discovering the details of Saturn, Su Lang went home.

As for Uranus and Neptune, Su Lang decided to check Jupiter and Saturn again.

Not long.

Su Lang returned to the quiet room of the White Jade Fairy Palace again.

"Spirit power has reached the peak of Kongni. It's time for soul fission and soul burning."

Su Lang took a deep breath and completely eliminated the slight tension in his heart.

## [Chapter 1154: Soul fission!](#)

"The first step is to forge the origin of the soul!"

Su Lang's expression was indifferent, and with a light wave of his right hand, a trace of spiritual power overflowed from the center of his eyebrows and wrapped around his fingers.

This trace of spiritual power has separated from Su Lang's soul and belongs to an independent soul power.

"The rules of life!"

Su Lang moved again, and the power of the rules of life emerged.

Yes, to forge the origin of the soul, you need to use the rules of life!

Next.

The rules of life embrace the breath of life and put it together with that trace of spiritual power.

but.

The spiritual power and the breath of life are completely incompatible with the water of the river.

But Su Lang naturally has a way.

In his mind, the spiritual power and the breath of life became silky, and immediately began to weave and twist.

This is a very delicate job.

In Su Lang's view, it is no less than operating on a gene!

When the mental power and the breath of life were woven together according to a certain law, a strange change suddenly occurred.

They begin to merge with each other and transform into another energy that exudes a unique aura.

That unique breath is like a higher-end mental power.

It can continuously decompose itself and form ordinary spiritual power.

And this is exactly a characteristic of the soul origin.

In addition, it has many magical characteristics, but it can only be understood in words, and you have to experience it yourself to know it.

"Well....."

"Before the origin of the pseudo-soul is integrated into the soul fragments, the breath of life is constantly dissipating."

After Su Lang sensed this, he immediately proceeded to split the soul fragments.

This is also a fine job, and it also needs to endure great pain!

"Soul split!"

Su Lang closed his eyes tightly, and the immortal essence in his body kept outputting, urging that terrifying means.

Soon.

An extremely severe pain came from his brain.

Su Langnei looked at the Sea of Consciousness, and discovered that there were cracks in the vast world of Consciousness of the Sea.

Immediately after.

These cracks are connected together, completely cutting a piece of "Knowing Sea World".

In Su Lang's eyes, it was as if the entire world of knowledge of the sea had become a two-dimensional plane of white gold paper, and then a corner was gently torn off.

The torn corner did not disappear, but rapidly became smaller, and then turned into a spherical shape.

The edges of the criss-crossed cracks all became smooth and rounded, seeming to have been caught for countless years...

This is the broken soul fragment!

During the whole process, apart from severe pain, Su Lang did not experience any side effects or sequelae.

There is no tendency to split consciousness and become enchanted, and there is no horrible picture of the instability and direct collapse of the world of consciousness.

"It seems that this exercise is very safe."

"Yes, can there be any difference in the techniques synthesized by the system!?"

Su Lang smiled, and patted the origin of the pseudo-soul in his hands to the center of his brows.

Soon.

I saw in the world of the sea, a little gold fluttered like a firefly, falling into the spherical soul fragments.

After the pseudo-soul origin entered the soul fragment, it immediately merged into it and disappeared.

And the soul fragments formed a new soul, as if it had come alive, and it was constantly floating and dancing in the sea of knowledge of Su Lang!

In this way.

The whole process of soul fission is over.

The resulting small new soul is called the 'child soul'.

The original 'child soul' was only at the Wuwang level, which was the realm of 'Mind and Soul'.

This is the most basic realm for stepping into soul cultivation, which is equivalent to the 'body tempering realm' of a warrior.

In addition.

Although this is a new soul, it is completely controlled by Su Lang.

It was completely infused with Su Lang's will, and would not produce new consciousness at all.

It can be said that the sub-soul is just the fission form of Su Lang's complete soul, from the complete body to the combined body.

"Tsk tsk."

"This 'Soul Gathering and Splitting Technique' is not only a good way to cultivate the soul, but also a perverted-level clone method!"

"The newly formed sub-soul can completely seize a certain intelligent life and then cultivate and grow!"

"Moreover, there is no limit to the number of 'Soul Fission' of the Soul Gathering Secret. The stronger the caster, the higher the upper limit of the sub-soul."

"Ordinary Wudi-level powerhouses can at least split more than 10,000 sub-souls and create a large number of clones!"

"In addition, the training concepts of the Soul Gathering Technique and the Origin Devil Emperor are similar in different ways. They are both scattered to reduce the difficulty of cultivation."

Various thoughts continued to surface in Su Lang's heart.

[Chapter 1155: Crazy drug use!](#)

However, the idea of using Soul Fission as a clone is not intended to be implemented.

Such a clone is not comparable to a clone of system functions.

Not only does it require resources and time to train, the key is that once he dies, Su Lang's deity will be miserable, and a piece of soul is directly missing...

Therefore, let alone use the fissioned new soul to create a clone, it is impossible to even release the body.

This independent sub-soul can only be cultivated and grown in Su Lang's Sea of Consciousness, and finally merged into the Sea of Consciousness again during the 'fusion'.

Thought for a while.

Su Lang continued his soul fission.

With the first experience, his speed has become much faster.

After practice makes perfect, it is even ten times a second!

New souls split out one by one, floating in the sea of knowledge, like spherical fireflies, strange and lovely.

With more and more sub-souls, the scope of Su Lang's understanding of the sea world is shrinking.

It is like tearing off a small piece of debris from the edge of a piece of paper, and then placing it on top of the paper.

More and more debris, smaller and smaller paper!

Over time.

Su Lang had split into a hundred thousand souls.

And his sea of knowledge world has also become narrower and narrower.

In the end, only the sun transformed by the 'sunny sun' and the position occupied by the souls of hundreds of thousands of servants are left.

In this small world of sea of knowledge.

At the top is the "sun" with endless light.

The space in the middle is filled with countless new souls!

On the ground below, phantom figures of hundreds of thousands of servants sat cross-legged.

"Soul fission is complete."

"The spiritual strength cultivation of the Kongni realm fell directly to the early days of Kongni!"

"Obviously, there is a huge loss of soul fission, and most people can't play at all."

Su Lang felt his spiritual realm and sighed with the consumption of soul fission.

You know, the cultivation of the Kongni realm from the initial stage to the peak may be more difficult than the cultivation from the "Mind" to the "Sunshine"!

The mental energy consumed is like the sea!

And these consumption is not a sequelae, it is normal consumption, unable to use the new functions.

"Next."

"It's time to cultivate these soul fragments."

Su Lang took out a large amount of mental power pills from the storage space, from the low-level to the emperor-level, everything!

Soon.

Su Lang began to take drugs constantly.

Not to mention the low-level pills, the emperor-level "Immortal Emperor Soul Pills" are all knocked one by one!

This is the pill for the emperors to fight to break their heads!

If those Martial Emperors knew that Su Lang was taking drugs like this, it would be shocked that their eyes would pop out.

of course.

The Immortal Emperor Soul Pill is too cherished, and Su Lang has only a dozen, which adds up to a few dozen.

Ten pills were stuffed into his mouth, and many immortal soul pill, and even lower-level holy pill and \*\*\*\* pill were stuffed.

With the help of one-key practice, Su Lang's movement speed was incredible.

Therefore, his 'digestive ability' is also very fast. As soon as the ordinary pill enters his stomach, he is digested and added to the sub-souls.

Even the emperor grade pill is rapidly digesting, and the majestic medicinal power continues to erupt, madly flooding into the sea of consciousness.

Under the power of the pill, the function of 'mental cultivation' is added.

Su Lang's spiritual cultivation speed is already unimaginable!

The soul of that one hundred thousand sons skyrocketed to several realms almost instantly, from the "Mind" all the way to the "Nian Sea".

In each sub-soul, beautiful golden silk ribbons appeared.

It was originally like the child soul of a round firefly, becoming more and more beautiful.

However, the volume of the sub-soul has not increased, it is just a constant qualitative change based on the original body shape!

Continue to infuse the medicine!

After the sub-soul paused for a moment, a six-pointed star-shaped crystal appeared inside.

This hexagonal crystal is like an extremely dazzling golden star!

This is precisely the crystallized spiritual power and the characteristic of entering the realm of the 'Morning Star'.

At the realm of Morning Star, the sub-soul's growth rate slowed down a bit, but it was still incredibly fast.

Less than a minute.

The golden stars in the sub-soul became more rounded, and the volume began to grow, forming a moon.

[Chapter 1156: Su Langshuang](#)

This is entering the realm of Huiyue.

Immediately after.

The Huiyue in the soul of each individual began to grow, the surface of the pits became smooth, and the light bloomed more and more brightly.

They are constantly evolving towards the sun!

Gradually.

These sub-souls have entered the realm of Sunshine, corresponding to the Wuxian level!

But this is not over yet!

Su Lang's Immortal Immortal Soul Pill and Immortal Emperor Soul Pill began to play a real role at this time!

The terrifying medicinal power poured into the sea of knowledge, turned into silk ribbons, and merged into the souls of each individual.

The 100,000 mini-Xi grew stronger, and cracks began to appear on the surface.

Among these cracks, there appeared a brighter beam than the sun itself!

These beams broke through the shackles of the sun's body and fully bloomed

—This is Nirvana in the sun, a magical scene forming the realm of emptiness!

finally.

A hundred thousand souls have reached the early stage of Kongni!

Su Lang did not immediately recover the power because the power of the medicine had not been exhausted.

Several dozen minutes passed.

All the medicinal power was completely consumed, and although the souls of one hundred thousand souls did not reach the middle stage of Kongni, they grew a lot again.

Of course, Su Lang's main soul also absorbed a lot of medicinal power and recovered a lot.

"One hundred thousand souls of the Kongni Realm!"

"From the ages to the present, and for countless years to come, I am afraid it will be difficult for anyone to achieve this achievement!"

Su Langnei looked at the Sea of Knowledge World, very excited, unable to calm down.

This is the soul of Kongni Realm!

Only the soul of Emperor Wu can reach the realm!

Even if it is a miniature soul, it looks like a firefly, but the realm of Nirvana out of thin air can easily crush any Wuxian!

This.

It is also a miracle that only Su Lang can create.

Other Martial Emperors, even if they obtained the Soul Gathering Splitting Art, could not fission into so many sub-souls, let alone cultivate the sub-souls to the realm of Kongni in such a short time.

They may have a lot of methods to speed up the cultivation speed of the sub-soul.

But no matter what the method is, it can only shorten the training time by a small margin.

Compared with Su Lang's one-key cultivation, spiritual cultivation, and one-key alchemy functions, it is completely scum!

"The child soul has been cultivated almost."

"Now you can use the Soul Burning Solitary Lamp Art!"

"By the way, let's use vomiting the old to learn new things first, and eliminate all the side effects in my practice."

While thinking about it, Su Lang used the new function of spitting out the dead.

This is the first time he has used this function with his Grand Fusion technique.

"Ding! "One Thousand Ways to One Unnamed" has successfully eliminated all side effects!"

As the system prompts appear.

Su Lang suddenly felt light all over, as if he suddenly released the feeling after carrying a heavy load for a long time.

It seems that there are a lot of side effects in the Great Fusion Technique!

"Wow, cool~!"

Su Langshuang shook his head.

After enjoying the refreshing aftertaste for a while, Su Lang remembered the business again.

"Business matters!"

"Burning Soul Lone Lamp Art, Burn my soul!"

Su Lang's eyes condensed, his whole body revolved, and he immediately launched the 'soul burning' method!

Suddenly, it seemed as if an invisible flame rose out of thin air from the sea of consciousness, spreading along the countless golden silk ribbons toward the sky's "sun"!

Immediately after.

These invisible flames actually started to burn the 'sun', making it gradually show a semi-melted state!

The same situation appeared in the souls of 100,000 children.

The soul-burning flame continues to burn the 'sun', making it more pure.

And Su Lang did not feel any pain!

"Hahaha!"

Su Lang laughed happily, "It doesn't hurt at all, it's really beautiful!"

The last time he used 'Burning Soul', he broke out the first scream after coming into this world, and then he screamed in pain and was embarrassed to see people.

And this time, it didn't hurt at all!

Su Langshuang was observing his sea of consciousness crookedly.

The soul-burning fire continued to burn the 'sun', seeming to burn all the distracting thoughts that Su Lang had accumulated throughout his life.

This made his state of mind become pure and peaceful, his mood gradually calmed down, and he became sad and unhappy.

Su Lang entered the realm of epiphany where things are forgotten.

At that instant, the remote rules of backfeeding Su Lang among the three inner realms of Yingluo Inner Realm, Qiming Inner Realm, and Chenxing Inner Realm seemed to become clearer!

Su Lang's own thinking also seemed to speed up time, many times faster.

He began to comprehend the power of the rules constantly with his own understanding!

This state did not finally disappear until the burning of the soul was over.

By this time, two hours had passed.

#### [Chapter 1157: The epiphany brought by the burning soul](#)

With the help of the epiphany effect brought by the 'burning soul'.

Su Lang even understood a lot of the secrets of twelve unfamiliar rules that he had never encountered before.

It was the first time for Su Lang to comprehend the rules without resorting to system functions.

In addition, to comprehend the twelve rules at once, this is placed among all the creatures in Canglan Continent, and absolutely no one can surpass it!

"Unexpectedly, after the side effects of 'Burning Soul' are eliminated, there will be such an amazing effect."

The corners of Su Lang's mouth raised slightly, and his eyes slowly opened, both eyes shooting out like lightning.

Soon.

Su Lang once again saw the sea world inside and observed the changes after the soul was burned.

I only saw the sun in the sky dimmed a lot in the world of the sea, but it was also a lot more introverted.

At the same time, the "sun" in the souls of 100,000 people has all become smaller and more pure.

However, even after experiencing Soul Burning, Su Lang's soul became very, very weak, even worse than the spiritual strength of the Sun Realm.

But neither Su Lang's main soul nor sub-soul fell into the realm, and still maintained the state of emptiness.

Under the function of 'spiritual cultivation', the weak soul is constantly recovering.

"I didn't fall into the big realm!"

Su Lang nodded very satisfied, "It seems that the side effects of the 'burning soul' falling to the realm have also been eliminated."

Soon.

Su Lang took out many spiritual pills from the storage space to speed up the recovery of his soul.

"It takes at least one day for the soul to recover."

"The pill is not enough, and it must be refined."

"When the soul recovers, the pill should be almost refined, and then I will burn the soul again."

While thinking about it, Su Lang observed Jupiter through perception sharing.

The clones did not receive the influence of Su Lang's "Burning Soul", and still maintained their heyday, maintaining the space channel to pull away from Jupiter.

Seeing that Jupiter still has a lot of time to pull away.

Su Lang's attention shifted to other places.

The first is the inner boundary of Chenxing, which is the inner boundary of the kidney where Mercury is located.

Both Yingluo Mars and Qiming Venus have obtained many treasures, and strange plant creatures have even appeared on them.

Only Mercury has just been collected into the inner boundary and has not been cultivated by Su Lang.

then.

Su Lang immediately took out more than a thousand pieces of treasure land containing the avenue of water from the storage space, and put it into the inner boundary of Chenxing.

In the inner boundary of Chenxing, above Mercury, a large number of rivers, lakes, and even the original oceans gathered.

The originally gray-black Mercury has a trace of blue lines, which is a dense river system on the surface.

Some of the surviving plant creatures in the treasure land of the water system have even recovered their vitality and became the first creatures in the inner world of the stars.

In addition to putting in the water system treasure, Su Lang also instilled a large amount of immortal yuan into the inner boundary of Chenxing.

These immortals enter the inner world of Chenxing, are absorbed by the inner world, and strengthen themselves and Mercury.

However, it also fed back a part of more pure energy to Su Lang, allowing his cultivation realm to be improved.

In fact, Yinghuo Inner Realm and Qiming Inner Realm were constantly vomiting Su Lang's Xian Yuan, which made Su Lang's Xian Yuan more refined and stronger.

This approach of complementing each other and making progress together is exactly Wuxian's basic practice method!

Of course, Su Lang didn't need to use this method deliberately, he only needed to wait for the completion of the inner boundary, and then he was directly promoted to Emperor Zhun.

At that time, it will be able to feed back the inner world madly at a very high level, so that the inner world can grow rapidly, without the need for traditional step-by-step methods.

"At present, the inner boundary of the five internal organs has been opened up."

"In addition to the Dantian Inner Boundary, I have a total of six inner Boundaries, which is only four short of ten inner Boundaries!"

"Well, I don't know where these four inner boundaries will be."

Su Lang thought for a while, and guessed a lot of things, but couldn't be sure, so he could only temporarily put this question behind his head.

Immediately after.

Su Lang took out a small space ball, which was the entrance to the universe of Zhou You Life.

### [Chapter 1158: Five new temples](#)

"It's time to go and see those Nicholas."

"Otherwise, if they can't adapt to the environment, they will probably be dead."

Muttered, Su Lang entered the universe of life of Qiu You.

The huge planet of life appeared under his feet.

Su Lang knew that this planet about the size of the Canglan Continent was also hollow...

Looking down on the earth.

On the vast land, the warriors of the Heifu tribe are different from long ago.

Because they have begun to practice the supplementary chapter of Feeding All Living Beings, they have become more efficient incense and aspiration generating machines.

However, the Heifu clan still practiced traditional martial arts, and they were too far away from the pure incense system of the Chongtong clan.

Except besides.

The beliefs of the Heifu tribe have also been divided!

Su Lang came to the earth, hid himself, and walked in the largest city of the Heifu clan.

I saw that five new temples were built in the city!

With a spiritual sweep, you can find that these temples are not enshrined in Zhouyou, but Xiao Huohuo, Ye Tiandi, Shi Ritian, Saitama, and Li Xianyang!

Zhou You is very honest, and the four statues are all made according to the 'design plan' given by Su Lang.

Five new temples.

Xiao Huohuo was a handsome man, carrying a giant iron ruler on his back, and he was full of flames.

Emperor Ye Tian stood in the temple with his hands on his back, stepping on the Nine-Color Mother Qi Ding under his feet, and floating behind him was the golden bitter sea, the chaotic lotus, the beautiful rivers and mountains, the yin-yang life and death map and other visions.

Shi Ritian looked up at the sky, behind him were the sun and the moon, reincarnation, true dragons and phoenixes, and four phantoms similar to him.

Saitama's style of painting is different from the first three.

This is a kind-faced bald boy, wearing a yellow tights, a white cloak, and red gloves on both hands.

The whole person exudes a unique temperament of 'drawing the sword and looking at the heart at a loss', 'I can't find an opponent, so I am bored'.

Finally, it was Li Xianyang.

Well, his image is exactly the same as Li Xianyang's deity, he is a handsome young man.

His head is slightly lowered and his hands are standing solemnly, like a little brother standing behind a big man.

These five new temples have also built many sub-temples in other cities, and each of them is worshiped by Heifu tribe warriors.

no way.

In the past, the Heifu class was solidified, and there were few ways to rise.

At this time, there was a great opportunity to get ahead, and of course many people took the risk, abandoning the belief in the black \*\*\*\* Zhouyou and turning to other gods.

Especially the temple of Li Xianyang, the Heifu tribe worshipped the most!

Because in order to complete Su Lang's mission, Zhou You directed and acted in the sitcom "Li Xianyang vs. Black God Zhouyou".

That scene, the whole thing is like a world war!

The Heifu tribes all over the world were stunned and dumbfounded.

Suddenly, Li Xianyang, who was able to fight against the black \*\*\*\* Zhouyou, attracted a large number of fans!

At this moment, in Li Xianyang's temple, a trace of incense and wishing power radiated from their eyebrows and merged into the statue.

Finally, they gathered directly into the main temple through special channels.

The statue of Li Xianyang in the main temple already possesses a touch of spirituality, and it is not far from the birth of incense creatures.

For the other four temples, because Zhou You also directed and acted out some events, they gained many fans and also possessed some spirituality.

However, it was worse than Li Xianyang.

"Ha ha."

"It seems that Zhou You is still very honest, and he spares no effort in his work. It's not bad."

Su Lang smiled and nodded, dispelling the thought of knocking on Qianyou by the way.

Immediately after.

Su Lang crossed a large area and came to another continent.

This vast continent was vacated by Zhou You, and the Liqi Clan under Ling Jue's command was settled.

However, the dark nature of the life planet Zhou You is really unfriendly.

In just one day, the Liqi tribe directly died one-tenth.

The rest seems to be terminally ill. Seeing that there is more air and less air intake, you will burp.

Even the Liqi clan with a relatively high cultivation base is very uncomfortable.

"Is it so miserable?"

"Let me save you."

Su Lang looked at the miserable hell-like situation and moved to the sky.

He stretched out his right hand and waved it lightly, and a beam of light burst out in all directions!

In the beginning, it was just a fist-sized light ball, but after a few seconds, it had become a sun-like existence!

#### [Chapter 1159: Nicholas evolution experiment](#)

Endless light and heat scatter the earth, dispelling the darkness!

The Liqi Clan warriors who were suffering in pain suddenly felt that the pain disappeared, and it seemed that they had never been so happy in their entire lives.

"It's the savior!"

"He is the savior who rescued us from the collapsed world. He has appeared!"

"Great Savior, Americk worships you, please don't leave us again!"

"Great savior, please bless the Liqi clan so that we can live on this terrible land."

"..."

Each of the Liqi tribe warriors continued to worship Su Lang.

These muscular, simple-minded Liqi tribe warriors did not have any suspiciousness or strangeness at all.

At this moment, they had thoroughly and sincerely regarded Su Lang as a great salvation god.

In a short time.

Su Lang noticed that a trace of incense and willingness was converging towards him.

of course.

Gathering the incense power in a short period of time is not only because of the sincerity of the Liqi clan, but also because the Liqi clan is stronger.

The Liqi tribe is not the Heifu tribe!

The strongest combat power of the Heifu tribe is Wu Zun, not even the Valkyrie.

But among the Liqi clan, there are quasi-saint-level powerhouses!

At the time of the destruction of the world, those who can survive are at least at the level of King Wu.

In addition, although the Ricky tribe only survived one-tenth, the number was extremely terrifying.

For various reasons, the incense aspiration power was condensed in a short time.

"The Liqi people are not very intelligent, and they are very easy to become fanatics."

"This is because Emperor Ling Juewu is also cautious, and he doesn't want to touch the incense force."

"Well... if he is like Zhou You, using incense and willingness to lay his back, I will have to solve a few more minor problems if I want to kill him."

While thinking about it, Su Lang isolated the gathered incense aspiration power.

Then use the rules of willingness to carefully collect the different sky boxes for Wuyu tea trees to absorb.

"Next, start experimenting."

Su Lang thought in his heart, descending from a height, and came to a place where hundreds of thousands of Liqi tribes gathered.

"The savior has come to us!"

"Oh my God, if we can get the favor of the savior, we will surely rise again!"

"Great, great!"

"..."

Countless Liqi tribesmen saw Su Lang approaching, and they were all trembling with excitement, and worshiped more vigorously.

Su Lang stopped in the air, looking down at the hundreds of thousands of Liqis below.

These Liqi tribes were led by more than a dozen war gods, and they kept kowtow to Su Lang.

"Ricky people."

"The opportunity to change destiny has arrived."

"I will give you the opportunity to evolve, and you will gain the ability to adapt to this land."

"Of course, there is also the possibility of failure. You may become unimaginable monsters and die in endless pain."

"Accept it or not, it's up to you to decide."

Su Lang's voice was not loud, but it reached the ears of every Liqi tribe.

This immediately made the Liqi tribe below boil.

They directly ignored the possible failure, regarded it as the favor of the savior, and cheered.

"Sure enough, we really got the savior's intimacy!"

"Oh my God, we can evolve, what is the word evolution? Although I don't understand, I think it must be very, very powerful!"

"I want to evolve, I want to adapt to this land, I want to survive, and then become a strong one!"

"Hahahaha, the Liqi family will not perish!"

"..."

The Liqi tribe cheered and danced a distinctive dance

—A kind of dance with kowtow as the main movement!

In short, it is to use various postures to kowtow, which looks very emotional.

Su Lang looked at this performance-like scene, his face became quite weird.

"cough!"

"Since you are all willing to accept this opportunity."

"Then, I will give you this precious opportunity!"

Su Lang's voice became serious, and all the dancing Liqi tribes also crawled on the ground, waiting with excitement for the gift of the great savior.

"Everything evolves!"

Su Lang suspended the sky, opened his arms, and his body radiated a unique radiation!

This special radiation energy can cause benign mutations in living beings. This is how Su Lang makes the Liqi tribe adapt to this world.

#### [Chapter 1160: Qingqiu Emperor Wu visited](#)

Under the influence of "Evolution of All Things".

The martial artists of the Liqi tribe have undergone bizarre and different changes.

Some Liqi people are beginning to become stronger, some are becoming smarter, some have a tendency to keratinize their skin, and some Liqi people are turning black, yellow, red and green...

In short, 'benign mutation' is a general concept.

In the case of ignoring the environment, every change that takes place in the Liqi clan is good for you!

But the right one is the best, and only the Liqi clan who has become more adaptable to the dark attribute will have a greater chance of living.

And mutation evolution is not something that can be completed in a moment.

Su Lang just gave them a head start and let them embark on the path of evolution.

Of course, if the Liqi clan wants to continue to evolve, it has to rely on Su Lang to maintain the special radiation of "evolution of all things".

But Su Lang would not spend all of his time on the Liqi Clan.

"Clone dispatch!"

With a thought, Su Lang drew a avatar from Jupiter.

"I am a brick, and move it wherever I need it!"

The clone incarnation hummed a little song and appeared in front of Su Lang, looking like an optimistic guy.

Next.

Su Lang let the clone avatar take over his work, and used the 'Evolution of All Things' method to help these Liqi races evolve.

At this time, hundreds of thousands of Liqi tribes are evolving in different directions, and the advantages and disadvantages are not yet visible.

But as time goes by, someone will definitely be eliminated, of course, some people will come out and become the protagonist of the Liqi clan.

"Next... to the life universe of Ling Jue?"

"Well, no, no, it's too difficult for me to move those mainland debris by myself."

"It took me a day to move six thousand treasures, and I must put all the broken life planets in the storage space, not a few months."

"Hey, there are still too few avatars. If I have a thousand two hundred and eight avatars, and I get all of them to work as porters, I will definitely be emptied in a few clicks."

Thinking of this, Su Lang's expression became a bit distressed.

If you want more clones, you have to upgrade the system functions, but to upgrade it to level 35, you need 100 million Hinayana sources!

One hundred million Hinayana Xianyuan, what concept is this! ?

Su Lang estimated that the possessions of Emperor Wudi of Rank Nine would be only 20 to 30 million...

"Hey, I'm too difficult."

Su Lang shook his head and sighed, "I only hope that the level 35 clone dispatch can give me an awesome bonus function."

And at this moment.

On the edge of the emperor's death zone, a man with a green crown in Tsing Yi appeared before Wu Xing Tian's obstacle avoidance.

"Qingqiu, come to visit fellow Langdi Daoist."

Emperor Qingqiu arched his hands at the Five Elements Sky barrier.

"Brother Green Hat, wait a minute, I'll go find me Ma Ma."

A crystal bun-like spirit emerged from the Five Elements Heaven barrier, and said seriously.

Emperor Qingqiu Wudi looked at the tool spirit in front of him, and the corners of his mouth twitched.

"What kind of spirit is this? It's obviously a dumpling, but it has the face of Emperor Lang, so strange!"

"Besides, it calls me Brother Green Hat. I always feel that this name is not right. At my age, at least it must be..."

"In addition, it said it was going to find it hemp, what does this have to do with Langdi?"

"Hey, why is this Southern Continent weird, Jiao Qin and the others never mentioned it to me."

"..."

Qingqiu was thinking about it, suddenly there was a wave of spatial fluctuations in front of him, and when he looked up, it was Su Lang.

"The junior has seen Senior Qingqiu."

Su Lang first waved away Xiao Hai, who was about to be entangled, and then gave a meeting ceremony to Qingqiu.

"Friend Langdi is too polite!"

Qingqiu Emperor Wu put aside his distracting thoughts, and returned to Su Lang, very approachable.

"Senior Qingqiu didn't come last time, but this time I look forward to seniors coming."

Su Lang smiled and opened the Five Elements Heaven barrier, "Senior Qingqiu, please!"

"excuse me!"

Qingqiu smiled slightly and entered the Five Elements Heaven.

Immediately, under the leadership of Su Lang, the two walked towards the holy city of Yaochi.

Qingqiu Wudi deliberately got close, so he didn't stand up and walked side by side with Su Lang.

On the way.

"Friend Langdi Daoist."

"I'm afraid your injury is a bit serious!"

Qingqiu Emperor Wu said with a look of concern, "I think your mental state seems very weak, as if you are about to fall into the realm of emptiness."
