

"No, I swear I didn't lie!"

The flower-armed man woke up from a semi-coma, and uttered a stern cry, "You promised to spare my life!"

"I didn't say that they would spare you."

Su Lang smiled noncommittantly, and said to a group of frightened women, "The chance of revenge is right here, what are you waiting for?"

If you don't even have the courage to take revenge, then I might as well help you out. "

The humiliated women shivered with fear, and then they remembered all kinds of bullying they had suffered, and the hatred in their hearts gradually surged.

"I...I'm coming!!"

Finally, a woman stood up tremblingly, her teeth were trembling, but the hatred and killing intent in her eyes was almost monstrous!

"I'm coming too!"

The second woman stood up, followed by the third, fourth and last eight women all stood up.

They picked up the ropes, iron chains, and ball **** used to bind them from the ground, and tied them firmly.

"You can play it first, but don't let him die easily."

Su Lang nodded in satisfaction, then left an encouraging smile and turned away.

After closing the door of this house of sin, there was a vaguely scream of a big man killing a pig.

"Retribution~"

Su Lang smiled lightly and rushed to the guard's residence.

This stronghold is not too big. After a few minutes, Su Lang arrived at his destination.

The gate of the guardian's residence was closed, but this couldn't stop Su Lang at all, knowing that unlocking is a necessary skill for a qualified killer.

Not long after, Su Lang opened the door smoothly and got in.

"Who?"

A woman's voice came from inside the room.

Then a woman in blue appeared in Su Lang's vision.

This woman is a junior body temperer, with a good appearance, a little bruise on her face, and fear and fear in her eyes.

When she saw someone who was unexpected, and there was no tattoo on her earlobe, a glimmer of hope flashed in her eyes.

"Are you a looted woman?"

Su Lang faintly looked at the blue woman in front of him.

The blue woman was excited: "Well, who are you, how did you come in, can you take me away?"

"I will leave here, and so can you, but not now."

Su Lang smiled, "Do you know a safe, the one where the guards store gold and silver coins."

"Yes! I still know his password, he said it unconsciously after drunk!"

Seeing that there was hope to leave, the blue-clothed woman was immediately overjoyed and nodded frequently.

"Do you still know the password? That's great, take me there!"

Su Lang was also pleasantly surprised. He had not touched the safe of this era, and he was not sure of opening it. At this time, having a password would be too much trouble.

"The safe is here, the password is *****."

The woman in blue turned to lead the way while she was talking, at a fast speed.

Ten seconds later, a mechanical password safe the size of a closet appeared in front of Su Lang, which was very heavy and firm.

Su Lang entered the password, opened the safe with a bang, and was instantly blinded by a flash of gold and silver.

The blue-clothed woman standing by the side also looked straight. So many gold coins were beyond her imagination.

"Great, great!"

Su Lang looked at the piles of gold and silver coins in front of him, and he was ecstatic, "I don't know if it will be enough for the system to be upgraded!"

Immediately afterwards, Su Lang grabbed a handful of gold coins and deposited them directly into the system.

In the mysterious black space, the number behind the gold coin icon suddenly became 26!

The woman in blue on one side watched the gold coins disappear into Su Lang's hands, and she was dumbfounded in shock.

Being able to put away items out of thin air means having a space ring, but a space ring can only be owned by a general-level boss!

To what extent is the background terrifying for a person who can have a spatial ring during the tempering period?

Thinking of this, the blue-clothed woman's gaze at Su Lang became extremely awed.

Su Lang didn't know what the woman in blue was thinking. He smiled, one after another, depositing all the coins in the system and converting them into gold coins.

The number behind the gold coin icon changed from tens to hundreds, and finally became 1568!

"It's more than a thousand, hahahaha!"

Su Lang clenched his fists in excitement, and shouted in his heart, "System, quickly upgrade me the one-key practice function!"
