

One Click 2111

[Chapter 2111: Ready to work](#)

""Smoke Cage Sand"!"

"It's another outstanding one among the Taichu exercises!"

"By the way, this technique has another effect, which is to temporarily fuse certain crystal wall cells together to form super large crystal wall cells!"

"I haven't completed this exercise before, so I can only let the clone use the pupil of the ten thousand world to store the place of exile."

"But it's different now. If I temporarily fuse a large number of crystal wall cells, I can definitely contain the entire place of exile!"

Su Lang turned to look at the profound meaning of the new exercise, his eyes gleaming with excitement.
and.

Now there is no need to wait for the clone to cool down!

"Then, after placing the new technique, let's start working!"

Su Lang smiled slightly, and immediately began to choose exercises.

Because the technique of passively lifting crystal wall cells has not failed, Su Lang still chooses this kind of technique.

quickly.

He chose a copy of "Haoheng Profound Art" from his inventory of exercises.

"system!"

"Activate the nine hearts into one function and practice the exercises for me!"

Su Lang's heart moved, the system function was turned on, and "Hao Heng Xuan Gong" entered the training state!

Not long.

It will become one of the founding-level Taichu exercises that Su Lang mastered!

Immediately after.

Su Lang stood up.

He looked at Hao Xingren and others, and suddenly found that everyone was still immersed in the curtain wall.

"Ahem!"

"Everyone, although I don't want to disturb you, it's time to go to the Heavenly Continent."

Su Lang raised the corner of his mouth and coughed slightly, awakening everyone.

Suddenly.

Hao Xingren and other two hundred and one warriors gradually woke up from the concentration.

"Sorry, Your Majesty Su Lang, I'm so absorbed in waiting!"

Hao Xingren bowed deeply to Su Lang, "I have not yet paid tribute to His Majesty Su Lang for passing on the merits, please wait for me!"

Talking.

He knelt on the ground and knocked his head heavily at Su Lang.

Yi Heguang and others also bowed and bowed their heads with respect, grateful.

How cherished the too elementary exercises are.

Even the master-disciple relationship will not easily teach without reservation.

But Su Lang not only did this, he also used the four basic exercises, let alone gave them countless pills before.

Before Su Lang appeared.

Hao Xingren and the others have never treated them well in their entire lives.

How can they not be grateful, bow down and bow their heads, even unable to express their gratitude.

"Everyone, get up!"

"Cultivate hard and help me deal with Tianmi Continent in the future, Emperor Yuanmingzhou is the best reward!"

Su Lang smiled brilliantly and waved to lift everyone up.

"Yes! Your Majesty Su Lang!"

"With the leadership of His Majesty Su Lang, the boundless universe is united and will win!"

"..."

Hao Xingren and the others solemnly nodded their heads, and then stood solemnly, waiting for Su Lang to speak.

"right now."

"I have already figured out how to bring the Ship of Ten Thousand Territories and the Land of Exile back to the Heavenly Continent together."

"You can enter the universe of my life first and wait for the good news."

Su Lang looked around at the crowd, then opened his life universe with his hand.

A spatial passage appeared in front of everyone.

"Yes! Your Majesty Su Lang!"

Everyone took their orders, flew into the passage, and entered the life universe of Su Lang.

Although not during the mission.

But Su Lang himself was inside the Ship of Ten Thousand Regions.

Therefore, the spirit of the ship of the ten thousand domains did not judge everyone to flee, thus obliterating them.

In fact, Hao Xingren and others have all entered each other's life universe.

After all, staying in the Ark of Ten Thousand Regions is too boring. When there is no mission, it is a kind of relaxation to go to other people's life universe.

at this time.

Two hundred and one warriors entered Su Lang's Dantian universe.

I immediately felt the difference in Blue Star!

Not to mention that the cultivation civilization here is super advanced, the rules and avenues are incomparably perfect, and clearly manifested, it is simply the best place for cultivation in the universe!

Just when they were surprised.

Su Lang sent Li Xianyang to receive them again and took them around.

then.

Hao Xingren and the others were like Grandma Liu entering the Grand View Garden, and they began to walk around with excitement on the core fragment of Blue Star, the boundless world.

In the boat of ten thousand domains.

Su Lang took a deep breath and took a step forward. A strong temporal and spatial fluctuation erupted in his body!

Chapter 2112: Condensing a super giant temporary world

The next moment.

He appeared between some parts of the Ship of Wanyu.

Relying on the understanding of the ship of ten thousand domains, it is not difficult for Su Lang to do this.

Immediately after.

Su Lang began to find a foothold within the body of the Ship of Ten Thousand Domains, and moved forward little by little, constantly approaching the outside of the Ship of Ten Thousand Domains.

Time passed slowly.

Because the distance traveled each time is very small.

Su Lang made a total of 9.37 million steps in the body of the Ship of Ten Thousand Domains before reaching the surface of the Ship of Ten Thousand Domains.

After digging out the spirit.

Su Lang clearly saw the world barriers of Exile and the cosmic barriers of the boundless universe!

This is the first time Su Lang has seen the barriers of the universe!

That is an extremely magnificent super barrier, that is truly boundless and vast!

Even if Su Lang's spiritual thoughts were opened to the extreme, he couldn't see the tip of the iceberg of this barrier at all.

At best, it was just a small spot on the barrier of the boundless universe.

and.

Su Lang's divine thoughts couldn't penetrate this barrier, and couldn't even penetrate it!

"Natural universe!"

"It's really small."

"Even at the beginning level, it is just a bigger ant for the natural universe!"

"I don't know how the natural universe was formed."

"..."

Su Lang looked at the cosmic barriers of the boundless universe and couldn't help but be amazed.

Immediately after.

He took a deep breath, and focused all his attention on the exile.

The purpose this time is to take away the entire exile!

Although the area of the land of exile is not very large.

But if you add the turbulence of time and space outside the mainland, it will be huge.

Even if Su Lang dispatched the clone to explore continuously, he did not explore the end of the time and space turbulence in the land of exile!

Although it is blocked by the turbulence of time and space.

But it also suffices to show that the entire world of Exile is huge!

Fortunately.

Su Lang didn't need to see the whole picture of the exile.

He only needs to separate the land of exile from the barriers of the boundless universe, making it unreliable.

Then open the space channel of the inner world and create enough traction to **** away the entire place of exile.

"Take away the place of exile."

"The most important thing is to grasp the timing!"

"..."

Su Lang took a few deep breaths, turned his head to look outside the crystal wall of the World of Exile, and detailed steps of action emerged in his mind.

first step.

Condense the temporary giant crystal wall world with "Smoke Cage Sand"!

"call!"

"Yanlongsha·Ning!!"

Su Lang's eyes condensed, and he displayed countless profound meanings instantly!

In a flash.

An upheaval appeared in Su Lang's body.

However, among the trillions of crystal wall cells, a huge hole has melted in the crystal wall of every world!

Immediately after.

These cavities continue to expand, pushing the world's crystal walls around, stacking them together, cyclically, and constantly advancing!

quickly!

Among the trillions of crystal wall cells selected by Su Lang, a large number of crystal walls completely melted and pushed around, forming a thicker crystal wall.

The space of the most central crystal wall cell has been fused and connected together, forming a very huge world!

And this world is still expanding around!

The crystal walls of the crystal wall cells continue to melt and stack, and continue to push around.

at last!

All the crystal wall cells selected by Su Lang merged into an independent super world!

Around this super world, there are heavy barriers stacked together!

Only such a heavy world barrier can support such a huge world!

"finished!!"

"Then, the second step is to separate the Crystal Wall of the Exile World from the Crystal Wall of the Infinite Universe!"

"This step is actually included in the decomposition of the boat of ten thousand domains..."

"System, start the one-key decomposition function!"

"Target, the boat of ten thousand domains!!"

While Su Lang opened his temporary super giant world, he burst into a terrifying attraction, locked the ship of ten thousand domains, and began to disintegrate!

[Chapter 2113: Decompose and recast the boat of ten thousand domains](#)

Suddenly!

A mysterious force acted on the ship of ten thousand domains!

Silently.

The Ship of Ten Thousand Domains collapsed into countless materials!

Because the Ship of Ten Thousand Domains stored part of Senior Zhaoyu's legacy, it also exploded directly at this time.

Densely densely packed, countless treasures of heaven, material and earth, and the source of the emperor of Xianyuan, like the stars and the sea, have emerged, a dazzling array of infinite value!

Su Lang put it into the storage space instantly!

And just when the ship of ten thousand domains was broken down.

The entire place of exile also began to tremble crazily!

Countless cracks appeared in the huge barriers of the world, like strange spider webs, all around!

Simultaneously.

The place of exile where the boat of ten thousand domains was lost fell directly from the cosmic crystal wall of the infinite universe and drifted slowly towards the distance.

However, under the attraction of Su Lang's eruption, the entire world of Exile gradually stopped moving.

At this time.

Horrible time and space fluctuations continue to appear.

Like to tear everything up!

Moreover, the place of exile that has always been hidden with the help of the power of time and space and the crystal wall of the boundless universe is also looming, gradually emerging, and anyone can see it.

Su Lang was also directly squeezed out by the crystal walls of the Exile.

Appears in the boundless universe.

If it weren't for him to possess the combat power of the five generations level, he also had the protection of the eight-sided shield.

If you don't die, you will definitely be seriously injured.

Fortunately, everything went well!

Su Lang looked at the place of exile free from the crystal wall of the boundless universe, and gave instructions in his heart.

—"System! Start the one-key mixer to refine the boat of Wanyu!!"

In an instant.

The Boat of Ten Thousand Territories, which has just been broken down into countless materials, recondensed into the Ship of Ten Thousand Territories under a majestic and mysterious force like time goes back!

and.

The ship of Wanyu, refined with system functions, has a much higher degree of fit between its components than the original version!

The quality of each component should also be higher! !

This more powerful ship of Ten Thousand Regions has faintly reached the limit of the Jiuyan Primordial Beginning Realm!

If it can go one step further, it is a half-step eternal treasure!

At this moment.

This ship of Ten Thousand Regions has become the highest-level weapon in Su Lang's hands!

"Ship of Ten Thousand Realms, protect me the crystal wall of the Exile Land!"

Su Lang gave an order, and under the power of this ship of ten thousand domains, the trembling land of exile was violently stabilized!

Immediately after.

The dense cracks in the crystal wall of the world began to heal continuously.

The turbulent time and space around him also gradually subsided.

But destruction is easy, and reconstruction is difficult.

Even with the current Ship of Ten Thousand Realms, it would take a lot of time to heal the huge world crystal walls in the exile.

Rather than being able to restore it in an instant.

Su Lang just floated in the cosmic space.

Through the layers of time and space, looking at the gradually healing exile.

"Although it has not fully recovered yet."

"But it is completely feasible to store it in the body and transfer it to the Heavenly Mian Continent!"

"In that case..."

Su Lang took a few deep breaths, and there was even more terrifying attraction in the space passage of the super giant temporary world!

Suddenly.

The place of exile began to move again, and continued to move towards Su Lang.

The two sides are already very close.

The world crystal wall of the Exile directly touched the space channel of Su Lang's temporary super giant world.

Soon.

The boundless place of exile, under the mysterious rules of space, gradually overlapped with Su Lang's super giant world space channel and had a doll effect.

The place of exile, which was originally much larger than the size of Su Lang's space channel, was magically swallowed by the space channel and appeared in the super-giant temporary world!

Suddenly.

The universe, full of space-time power, calmed down completely.

Everything was restored to the most stable, and also the most common, dead universe void.

"finished!!"

"Fortunately, most of this place of exile is empty space, and only a very small part of it contains matter, which is suitable for the space doll effect."

"Otherwise, I really can't take it into the crystal wall world inside the body!"

Su Lang breathed a long sigh of relief, closed the space channel, and immediately activated the clone replacement function!

[Chapter 2114: Perfect place to practice](#)

Huh!

A burst of shifting.

Su Lang appeared directly in the Tianmen Continent, near the exchange building.

"The place of exile must emit temporal and spatial fluctuations, just in case, put it in a place off the beaten track for the time being!"

Su Lang thought about it for a moment, and then came to an uninhabited desert through the Internet.

This is the largest desert on the Tianmen Continent, covering a very large area and it is almost limitless!

And here is extremely barren, just a piece of wasteland, almost useless.

"That's it!"

Su Lang's eyes condensed, and immediately opened the space channel of the super giant temporary world.

next moment.

The place of exile was released by him.

In the space channel, the place of exile is like a small transparent bubble.

But as soon as he left the space channel, the place of exile instantly changed back to its original state, replacing the entire desert!

The power of time and space also began to spread.

Outside the crystal walls of the Exiled Land, hundreds of millions of light-years in radius were shrouded, and time accelerated wildly.

Ten times, a hundred times, a thousand times...

The closer you are to the exile, the faster the flow of time, and the farther, the slower.

Fortunately, the gradient of the time flow rate is relatively gentle, otherwise it has to form a terrible time turbulence with the normal time flow rate.

By the time.

If a warrior below the primordial level strayed into this area, he would peel off his skin if he did not die.

Even now the slower time flow is decreasing.

It will also cause a little time turbulence, which will affect living things.

For example, if a creature stands in place, the time flow in the area where the left half of the body is located is faster, and the more it goes to the right, the slower it is.

This kind of difference will cause the body to be misplaced in time and produce unexpected results.

Perhaps the creature's left arm grew rapidly, leading the right arm, and then he became a unicorn arm...

At this time in the time acceleration area.

Under the influence of time, a large number of creatures begin to grow rapidly, or they may be born, old, sick and die!

Some individual creatures are also affected by the turbulence of time.

but.

The creatures living near the barren desert have a low cultivation base.

They didn't notice that time was accelerating, just like ants on a huge planet, they couldn't feel the planet rotating at all.

They can only attribute the strange results after the body is affected by the slight time turbulence to other reasons.

Only Su Lang overlooks the earth from the perspective of God and understands everything!

at this time.

Time accelerating in an annular area.

Everything looks.

It is very similar to when Su Lang did a civilization development experiment in Tai Sui Life Universe.

All creatures are growing, reproducing, growing, aging, sick, and dying frantically.

but.

Tai Sui lives in the universe.

The accelerated development of creatures is not the power of time.

It's just that the mothers' nests speed up their own life process by accelerating the speed of cell division and metabolism.

And this time.

But it is real, time is accelerating!

and.

Still around the place of exile, the ring-shaped area tens of millions of light-years wide is all accelerating in time.

Such a vast range.

Not to mention the general 'future' stage early warriors.

Even in the early days of Jiuyan, it was difficult to do it.

Even if it can be done, it can only be done in a short period of time and cannot be sustained.

But the place of exile was formed by the predecessor Zhaoyu with his own life universe and the powerful Jiuyan Taichu Weapon of Wanyu.

It can achieve 10,000 times the time flow rate, and it will continue!

The power of time spilling out of the world of Exile can also cause hundreds of times of acceleration.

This is an extremely precious resource.

Outside the Exile, the circular area with a width of tens of millions of light-years has become a good retreat place.

Cultivating here for a day is equivalent to practicing outside for a year and several years!

of course.

The place of exile is the perfect place for cultivation.

Its time flow rate has been maintained 10,000 times at all times!

even.

Under Su Lang's control, the flow of time can be increased!

After all, the Ship of Ten Thousand Domains is stronger than before!

In addition.

The place of exile used to be to protect oneself and prevent internal creatures from leaving, so that a terrifying turbulence of time and space would be formed.

[Chapter 2115: Freedom, it's coming](#)

These forces are used to form the turbulence of time.

Occupies a large part of the ship of ten thousand domains and the land of exile.

now.

The place of exile has become one of Su Lang's world.

I also moved to the Heavenly Continent, so these protective measures are naturally no longer needed!

These forces used to form the turbulence of time and space can be used to increase the flow of time!

"The time acceleration area outside this crystal wall can be reserved."

"However, it is impossible to maintain such a high flow rate. The highest one hundred times is sufficient, and the farthest is limited to 10 million light-years."

"The closest thing to the inside is a hundred times, the further you go, the slower it will be. It is divided into different stable time flow areas to avoid time turbulence and prevent bad results!"

A light of thought flashed in Su Lang's eyes, and he quickly flew above the World Barrier in Exile!

"Ship of Ten Thousand Domains, listen to my orders!"

Su Lang touched the crystal wall of the world with his hand, and had a closer connection with the boat of ten thousand domains.

"Yes! Master!"

The Ship of Ten Thousand Domains suddenly appeared on the crystal wall of the world touched by Su Lang.

After being recast.

He is the same as the "Golden Red" spirit of the Nine Dragon Coffin, the spirit of the spirit has made great progress, at least there is no problem in communicating.

The key is that he is also very loyal, not only is there on call, but any order will be executed.

"Ship of Ten Thousand Domains."

"From then on, you will be called Xiaozhou."

"Xiaozhou, now you cancel the turbulence of time and space in the place of exile for me!"

"Then reduce the time flow rate outside the crystal wall of the Exile."

"The place closest to the crystal wall is the highest velocity, which is set to be one hundred times the infinite universe, covering an annular area with a width of one hundred light years."

"Then it was ninety-nine times the time flow rate, covering an annular area two hundred light-years wide."

"Then ninety-eight times..."

"..."

Su Lang kept giving orders to the Ark of Ten Thousand Regions, clearly explaining all his settings.

"Yes! Master!"

Qi Ling Xiaozhou agreed neatly, and Xuan even started to implement Su Lang's plan.

The first is to cancel the time turbulence inside the Exile.

Immediately, the time flow rate outside the world crystal wall of Exile was weakened, and a ring area with different time flow rates was completed.

Finish it all.

Xiao Zhou immediately returned to Su Lang's face.

"Xiao Zhou, good job."

"Next, increase the time flow rate of the Exile to the limit!"

"Well, it can last for one month!!"

Su Lang ordered again to increase the time flow rate of the Exile.

Emperor Yuan Mingzhou would run out to do things at any time.

Naturally, Su Lang would make the best use of their resources to improve their overall combat capabilities as soon as possible.

The Exiled Land has continued for more than four billion years at a rate of 10,000 times the time, and there is still enough strength to continue.

If the remaining power is used up within a month, it will surely increase the flow of time to an extremely terrifying level.

and.

After running out, it is not impossible to supplement.

"Yes! Master!"

The Ship of Ten Thousand Domains took the lead and once again moved in the crystal wall of the world.

In the Exile, the flow of time began to slowly increase.

"Take advantage of the exile to increase the flow of time."

"It's time to announce the fact that the Land of Exile was included in the Heavenly Misty Continent."

Su Lang clicked the corner of his mouth, and directly released Hao Xingren and others in the boundless universe.

"Subordinates, see Your Majesty Su Lang!!"

When Hao Xingren and others saw Su Lang, they suddenly bowed on one knee and saluted.

"Well, get up."

Su Lang smiled slightly and lifted everyone up.

Because I visited Su Lang's Dantian universe.

There was still deep shock and excitement in the eyes of Hao Xingren and others.

At this moment, they found that they were in a peculiar world. Everyone was dumbfounded, and their eyes turned slightly red.

"This is... the Heavenly Misty Continent!?"

"We came to the Heavenly Misty Continent!"

"God, we don't have a task to do, and the Ark of Ten Thousand Realms didn't even kill me!"

"We are free? Right, we are free!?"

"..."

Everyone was talking excitedly, and everyone was shaking slightly.

They fought for the boundless universe in the ship of ten thousand domains, and to a certain extent, they also lost the most precious freedom.

now.

Freedom, it's coming!

[Chapter 2116: This is a great event](#)

"Hahaha!"

"Welcome to the Tianmen Continent!"

"Everyone, from now on, the Land of Exile and the Ship of Ten Thousand Realms have all belonged to me!"

"You have completely restored your freedom!"

Su Lang looked at the extremely excited people, smiles suddenly, and personally confirmed everyone's guess.

"Oh my God!"

"We really came to the Tianmen Continent!"

"The Ship of Ten Thousand Domains and the exile are controlled by His Majesty Su Lang, and my future tasks will be issued by His Majesty Su Lang, and there is no need to worry about being wiped out due to violations!"

"Great, great, I'm waiting for complete freedom!"

"His Majesty Su Lang is really great. I will wait second, mainly to revitalize the Land of Exile and the Ship of Ten Thousand Realms!"

"Right, right, right, the Land of Exile and the Ship of Ten Thousand Realms are dead things, and can only act according to the established plan."

"The Spirit of the Ship of Ten Thousand Territories is even more rigid. I don't know how to work it out, which has caused us to miss many geniuses and many companions that should not be lost!"

"Yes, the original Ship of Ten Thousand Domains did not perform as expected at all!"

"Now that His Majesty Su Lang controls the Ship of Ten Thousand Territories and the Land of Exile, they will surely reflect their value to the maximum!"

"I predict that the era of explosive emergence of the strong has come!"

"The prosperous age created by His Majesty Su Lang is coming!"

"..."

Hao Xingren and others all whispered in excitement and talked a lot.

They have never been so happy!

Simultaneously.

The eyes of everyone looking at Su Lang were even more respectful and awe.

The Ship of Ten Thousand Territories and the Land of Exile were left by Senior Zhaoyu, and almost formed an independent hour by itself.

But even so.

He was also directly brought back to the Heavenly Misty Continent by Su Lang!

This is simply a miracle!

"Well, everyone!"

"I want to announce this to the public."

"The boat of ten thousand domains and the land of exile have returned to the Tianmen Continent. This is a great event."

"Soon, you will be able to see the powerhouses of the Heavenly Mian Continent, the Cultivation Realm and the Wu Clan Continent in Zhu Shan's mouth!"

While talking, Su Lang handed out the special terminal for spiritual transmission to everyone.

quickly.

Under Su Lang's guidance, everyone understood the usage of the special terminal and the role of the spiritual transmission Internet.

"Amazing!"

"Yes, this spiritual internet has actually created a virtual second-day Miao continent, a brand new spiritual world!"

"In the Internet of Spiritual Transmission, everyone can easily get together and exchange their cultivation experience, completely saving the cost of traveling."

"Not only in the virtual second day of the Misty Continent, in the real Heavenly Misty Continent, we can also transmit at will with the special terminal, which is amazing!"

"His Majesty Su Lang is really amazing!"

"..."

Hao Xingren, Yi Huguang and others were holding the transmission terminal, and they were dumbfounded and dumbfounded.

at this time.

"Everyone, follow me into the spiritual internet now!"

Su Lang smiled slightly, and a trace of spiritual thought entered directly into the spiritual internet.

As the master of the spiritual transmission Internet.

Su Lang doesn't need any special terminal, he can enter the world of the Continent on the next day with his spiritual thoughts!

at this time.

This trace of Su Lang's spiritual thoughts turned into a virtual body, walking in an extremely real virtual world.

Overlooking the earth, it is still the desert before.

If I didn't look carefully, I thought I was still in the real Celestial Continent.

"Quick! His Majesty Su Lang has entered the second day of the Continent!"

"Pour a trace of spiritual thought into it, and you can connect to the spiritual Internet. It's so convenient!"

"..."

Hao Xingren and other 201 powerful people also hurriedly used the terminal to enter the Continent of Misty the next day.

The next moment.

They saw Su Lang who was smiling.

"This is the second day of the Misty Continent!"

"The virtual world composed of formations and spiritual power is extremely real, enough to make people live a second life!"

"Look, Your Majesty Su Lang is ahead!"

Everyone was talking, watching the world around them while rushing towards Su Lang.

Just then.

A earth-shattering voice suddenly spread throughout the entire virtual Tianmen continent!

[Chapter 2117: World announcement](#)

"Attention please!"

"Announcement: The Land of Exile and the Ship of Ten Thousand Domains have been merged into the Heavenly Continent, located in the Silent Sand Sea!"

"From now on, the place of exile will become the best place for cultivation in the Tianmen Continent, because the flow of time within it will be 10,000 times faster than the endless universe, or even tens of thousands of times faster!"

Three announcements issued by the 'server' resounded throughout the world.

Every creature who entered the spiritual Internet heard these three announcements clearly.

"what?"

"The Land of Exile and the Ship of Ten Thousand Realms!?"

"What kind of existence is that? It can allow the managers of the Spiritual Transmission Internet to make a world announcement!"

"I know the place of exile, that is a strange world with 10,000 times the flow of time, another time and space!"

"The place of exile was originally only accessible through the gate of exile, half of it would be treated as a land of seals, and once you entered, you could not come out."

"No matter what, the place of exile has become the best place for me to practice on the fascinating continent. Oh my god, 10,000 times, tens of thousands of times the cultivation speed, it's too heavenly!"

"Yeah, then I practice for a day, which is equivalent to tens of thousands of years of cultivation, which is unimaginable!"

"Hey, I don't know what the ship of ten thousand domains, which can be compared with the land of exile, does it play against the sky?"

"..."

Countless creatures on the Tianmen Continent were excitedly discussing works.

The content of the announcement also spread to every corner of the real Celestial Continent in just a few breaths.

The Heavenly Misty Stars, the Cultivation Realm, the Wu Clan Continent... and even the most remote places, they all know the news!

In an instant.

There was an uproar between heaven and earth!

The discussion of countless creatures is like thunder, constantly resounding, and like a tsunami, turbulent and continuous!

The entire Tianmen Continent was stunned.

At the same time, there was an endless desire for the place of exile!

Tens of thousands of times the speed of cultivation is almost equivalent to reducing the difficulty of cultivation tens of thousands of times!

This is an irresistible temptation for any creature!

then!

After the initial horror, someone immediately went to the sand sea of silence in the announcement, where the exile was located!

but.

Because Silence Shahai was originally an extremely barren and uninhabited place.

Therefore, there is no teleportation point for the teleportation network near the nirvana sand sea, not even the ordinary teleportation array.

Ordinary warriors want to reach the sea of nirvana, they must first go to the nearest teleportation point, and then fly over by themselves.

Only those who have special terminals and those who are too junior and quasi-beginner can directly reach the sea of dying sand!

at this time.

Such early powers as Zhuge Zhenduo, Han Li and others appeared in front of the nirvana Shahai, Su Lang and others.

Just a dozen breaths.

All the strong and quasi-primary people who did not retreat were all gathered near Su Lang!

Then they saw Hao Xingren and others who surrounded Su Lang motionlessly.

"This is... one hundred and sixty Taichu and forty-one quasi Taichu strong!"

"They have such a strong fighting spirit and terrifying will. Even though most of their attention has been placed on the virtual Celestial Continent, it still makes people feel like they are like terrifying behemoths that must wake up at any time!"

"This group of people must all be experienced generations, warriors of the same level, waiting for three or four to be unable to reach their level, but will be killed!"

"Yeah, their cultivation base has also been lowered. If the cultivation base is raised by His Majesty Su Lang, they will definitely become a terrifying killing weapon!"

"These people are the strongest in the land of exile? I heard that there is a war of reincarnation in the land of exile. Many reincarnations can determine a winner. Perhaps each of them is the winner!"

"Too strong, really too strong. Although I am waiting for a high level of cultivation, but in terms of combat talent, I can't compare with them at all!"

"..."

Everyone from the early days looked at Hao Xingren and others, their eyes brightened, and they all exclaimed!

at this time.

In the Heavenly Misty Continent, the announcement sounded again.

[Chapter 2118: The era of accelerated cultivation](#)

"Attention please!"

"Announcement: In addition to the Exile Land, the area outside the Exile Land 10 million light-years wide is also a retreat with a faster flow of time than the endless universe!"

"The place of exile needs to make enough contributions to the Heavenly Misty Continent in order to obtain an entry qualification and a certain amount of training time."

"But in the time acceleration area outside the Exile, the conditions for entry will be very, very low, and it can be used by almost all people!"

These announcements resounded through the virtual Heavenly Misty Continent, and instantly agitated countless creatures.

The place of exile is so awesome.

Everyone knows that there must be conditions to enter it, and the conditions will certainly not be too low.

And the periphery of the exile is also a time-accelerating area, but it can be cultivated by almost all the people. This is simply the feat of Fuze's entire Celestial Continent!

"Hahaha! I was worried about not being able to use it, but now I don't have to worry about it!"

"Yes, an area with a width of 10 million light-years, how many people can it hold!"

"The era of accelerated cultivation of the whole people has arrived, thanks to the great and infinite Emperor Su Lang!"

"Thanks to your Majesty Su Lang, Fukuze, and me and the lower-level warriors. Without Majesty Su Lang, I would have been desperate for cultivation!"

"Yeah, Your Majesty Su Lang is too great, the spirit is transmitted to the Internet, the exchange building, the time to accelerate the cultivation area, which one is not a miracle of grace forever!"

"His Majesty Su Lang is heroic and domineering, the younger one will kill Shahai, go to that time to speed up the cultivation area, and promise to return to His Majesty Su Lang as soon as possible!"

"..."

Countless warriors were talking excitedly, exclaiming, and then they worshipped Su Lang's incense statue nearby, and finally hurried to the nirvana sand sea.

Simultaneously.

The powerhouses of Taichu and Quasi Taichu who had already killed Shahai were shocked when they learned of the announcement.

They never expected that Su Lang would have done another feat of blessing countless creatures and reincarnation forever!

"Oh my God!"

"Within 10 million light-years outside the exile, it's all acceleration areas!"

"Go, let's go in and see!"

"..."

All the primordial and quasi-primary powerhouses were so excited that they rushed towards the place of exile.

Because they were not far from the place of exile.

So it has almost set off and entered the area of twice the time flow!

The quasi-prime people noticed something strange.

But the early powerhouses who have understood part of the time rules clearly feel that their time has speeded up, twice as much as before!

No matter whether it is cell metabolism or energy flow in the meridians, the speed of any change is twice as fast as before!

Soon, the quasi-primaries also discovered this, and their eyes widened with excitement.

"Twice the cultivation speed!"

"The key is to keep it going, it's amazing!"

"Twice is nothing, I am tripled here, hey, it has become quadrupled here!"

"I understand, this area of tens of millions of light years is divided into many parts, and the closer to the periphery, the faster the flow!"

"I'm in the inner layer, here is a hundred times the flow rate of time. God, I saw the world crystal wall, what a terrifying world crystal wall, this is the world barrier of the exile!"

"The place of exile, there is more than 10,000 times the flow rate of time inside!!"

"I really hope that I can go in for cultivation, I don't know what the conditions will be!"

"..."

Everyone kept going deep into the desert, and finally saw the edge of the world in the Exiled Land. They were amazed and looked forward to it!

Simultaneously.

In the virtual heavenly continent.

"His Majesty Su Lang is really great!"

"The place of exile was originally a prison, but now it has become the best place for cultivation!"

"Yes, and the flow of time has been increased by His Majesty Su Lang, I don't know how many times it can be increased!"

"..."

When Hao Xingren and others heard the world announcement, they were first shocked.

Immediately after Su Lang turned the place of exile into a place of cultivation, he was extremely surprised.

[Chapter 2120: One hundred thousand times the time flow!](#)

"Yes, Your Majesty Su Lang!"

"I'm waiting for this to set the standard!"

Jiang Wenzheng and others, Hao Xingren and others all responded immediately and discussed.

Many people are powerful.

Various standards have not only proposed, overturned, revised...

The standards for admission to the exile were gradually improved.

Just then.

"the host!"

"The time flow rate of the Banished Land has been increased!"

"At present, the flow of time in the Exile has reached one hundred thousand times!"

The spirit of the Ship of Ten Thousand Domains contacted Su Lang and reported the results of the work.

"One hundred thousand times!!"

"Good job, Xiaozhou!"

"Now you go back first and continue to maintain the World Barrier in the Exile."

After Su Lang listened to it, his face suddenly showed joy.

One hundred thousand times, but higher than he expected!

A warrior cultivating inside for a day is equivalent to cultivating outside for two to three hundred years!

This is not only effective for the rest of the warriors on the Tianmen Continent.

The key is that it works for Su Lang himself!

Based on his current situation, the cultivation base needed to break through is far more than other ordinary early powers.

If it can be increased by a full 100,000 times on the basis of the current cultivation speed, it will definitely be a terrifying multiple!

"My cultivation speed has increased by 100,000 times!"

"Isn't that 7,058 million trillion times!"

"Tsk tsk, then I am sure I can break through several times in one day!"

Su Lang's eyes were shining, and he felt that the day when he broke through to half an eternity was not far away!

He almost couldn't wait to practice in the exile!

But before that.

He still has something to do, and that is to open source the land of exile

——Arrange the spirit gathering formation method, and gather countless heaven and earth auras to the place of exile.

After all, there is so much energy in the land of exile, the more you use it, the less you use it. If it is used up, no matter how fast the flow of time is, it will be useless.

Not to mention.

The nirvana desert inherently has relatively poor energy.

The practice area around the exile is actually not suitable for cultivation. Now that the flow of time has increased, the concentration of energy in the world has to increase!

then.

While everyone is setting standards.

Su Lang closed his eyes and focused on the inside of the storage space.

When he dismantled and recast the Ship of Ten Thousand Regions before, he got a lot of the legacy of Zhaoyu's predecessors.

Part of these things are the energy spar used to maintain the operation of the boat of ten thousand domains. The source of the emperor has the source, but there is no source of the universe.

And more are all kinds of natural treasures, spiritual flowers and herbs, finished medicines, weapons and so on!

"Senior Zhaoyu has packed countless Xianyuan Diyuans at one time in order to avoid the ship of Ten Thousand Domains from lacking energy supply."

"Now that the Ship of Ten Thousand Domains is under my control, there is no need to worry about energy at all. Now these Xianyuan Emperor sources, I can use them first."

"Except for this, the finished medicines and weapons must be broken down."

"In short, all resources must be used in an optimal way!"

Su Lang thought silently, and immediately issued an instruction to the system, "System, store it in all Xianyuan Diyuan!"

"Ding! The storage is complete, the current balance is 96 Universe Origin!"

"hiss!!"

"There are more than ninety universe origins, great!"

Su Lang's expression moved, and he was overjoyed.

With so many cosmic origins, adding a little more is enough to upgrade a certain system function.

"The one-key training and one-key martial arts functions are already level 49."

"I don't know what kind of functions you will get when you upgrade to level 50."

Su Lang showed expectation, and immediately looked at the rest of the treasures, first of all the finished weapons and pills.

Although these finished medicines and weapons are generally of low level, the ones that are too elementary add up to only a few thousand.

However, the number of finished medicines and weapons below the original level is terrifying.

"Great."

"It's all high-quality materials!"

"Let me turn you into more advanced and more perfect weapons and pills!"

Su Lang took a deep breath and locked the things to be decomposed with his spiritual thoughts,

"System, decompose all the designated targets for me!"

"Ding! The decomposition is successful, you will get the Soul of the Supreme Beginning*4, the Soul of the Supreme Emperor*2121115, the Elementary Material Linbo Liuli*87596, and Lei Guangzheng*4589..."

"Ding! The decomposition is successful, you get the Soul of the Supreme Emperor*14586..."

"Ding! The decomposition is successful,..."
