

One Click 2121

[Chapter 2121: Strengthen weapons](#)

"..."

A series of system prompts appeared in Su Lang's mind.

A large number of finished medicines and weapons were decomposed, reduced into countless materials, and fell into Su Lang's storage space.

In a blink of an eye.

A super continent made up of countless materials is formed in the vast storage space.

"Tsk tut!"

"As expected of Senior Zhaoyu, it seems that half of his foot has entered the eternal state!"

"These materials are enough for me to upgrade like this!"

Su Lang rubbed his hands in excitement, and directly ordered, "System, give me the evolution of the Youtian Sword!"

"Ding! Consumes the Soul of the Beginning*288, the elementary material Celestial Dragon Stone*500, Ningtian Mingxin*1000, Haoxing Meteorite Core*1000, Evil Star Shooting Sunda Jade*10000, Liaoyuan Steel Lishi*20000.. Godless grade material: Godless soul*8000000...The Youtian Sword has evolved into a weapon of the Siyan Taichu!"

The system prompt sounds.

Except for a few more types of materials consumed, they are roughly the same as the last evolution, except that the quantity has generally increased greatly.

at this time.

The Youtian Sword, which has been strengthened nine times, and has evolved into the Siyan Tai's primary weapon, has reached the stage of the Liuyan Taichu!

"Wow!"

"Master, I was promoted again!"

"Great, Master, Xiaoyou loves you!"

Qi Ling Xiaoyou's excited voice reached Su Lang's mind.

Su Lang knew that if there were not many people around, Xiaoyou would run out and hang on him again.

"Just happy, hehe!"

Su Lang smiled, and then ordered again to evolve the Heavenly Eight-Round Shield, Godless Dragon Platform, Construct Moon Mother Nest and Bright Sword!

quickly.

A series of system prompts sounded, all weapons have been evolved by Su Lang once!

Like the Youtian Sword, the Eight-Ringed Shield of Heaven and Heaven has reached the level of the Primordial Six-Evolution Stage.

Not only that.

Except for the eight-sided shield of Tianjiao.

The remaining weapons have only been strengthened to eight times at present, and they can be strengthened once!

The Qibao Miaoshu has only been strengthened to the eighth time, and the Heart-piercing Lock has only been strengthened for the third time.

"There are still more materials."

"System! Strengthen the Seven Treasure Tree!"

Su Lang took a deep breath and gave orders to the system.

"Ding! Consume Huanyu Longevity Immortal Domain*8745, Nitianquanya*7845...The Qibao Magic Tree has been strengthened successfully!"

Suddenly.

Countless materials disappeared, completing the eighth strengthening of the Qibao Miaoshu.

Su Lang did not stop, but ordered again.

Suddenly.

Qibao Miaoshu completed the ninth enhancement, reaching the limit of the current one-key enhancement function!

Its power has even reached the Qiyao Primordial Beginning Realm, which is equivalent to the Heart-piercing Lock.

but.

The materials used to strengthen the Qibao Miaoshu are indeed very, very large!

Even Su Lang felt a little pain.

"From the current materials."

"I have to set aside a part of the formation and use it for other purposes."

"Heart-piercing locks are enough for now, so they won't be strengthened, just strengthen the weapons such as the Moon's Nest."

Su Lang thought silently, and immediately let the system complete the ninth strengthening of the remaining weapons.

The powers of the Mother's Nest of the Moon, the Dragon Platform without God, and the Light Sword have all reached the level of the five generations!

At last.

Su Lang took out the 'Eye of the Nine Yin Candles' again.

The effect of the Eye of the Nine Yin Candles is actually very powerful, you can see the big things happening within a certain range!

The effect of the key candle Nine Yin Eyes is passive.

It will know immediately where something happens within a certain range.

Rather than the usual, first found the clues, and then went to investigate, only to know that something went wrong.

Tianmi Buddhism's "Tianyantong" has the advantage of seeing wherever you want, but it does not have the advantage of never missing a big event!

Currently.

Su Lang's investigative power simply cannot cover Tianmi Continent and the surrounding star regions.

If it is to raise the Eye of the Nine Yin Candles.

There will be a qualitative improvement to his investigative ability!

at this time.

Su Lang took out the Eye of the Nine Yin Candles.

Qi Ling flew out immediately and gracefully bowed to him.

The spirit of Zhujiuyin is called Ao Yu, and she looks like a little deer girl.

[Chapter 2122: Eight Yanjing Boundless](#)

"It's time to promote you, Ao Yu."

Su Lang reached out and rubbed Ao Yu's hair.

"Thank you, Master!!"

Ao Yu nodded happily, and quickly returned to his body.

Immediately after.

Su Lang began to evolve and strengthen the Eye of the Nine Yin Candles!

This weapon was refined in the land of exile. At that time, at the level of the six-pass godless level, he could perceive any major events on the vast continent of the land of exile.

It should be noted that the length and width of the exile is one billion light years!

This is far beyond the detection range of Su Lang's spirit by many times!

If it is strengthened to the realm of the primordial beginning, the perception range of the Eye of the Nine Yin Candles will definitely skyrocket to a staggering level.

at this time.

Under Su Lang's orders.

System prompts also kept ringing.

A lot of materials were consumed, and the Eye of the Nine Yin Candles was first evolved into the Three Duty Primordial Stage by Su Lang!

Immediately after.

It was strengthened three times on the basis of the Three Duty Supreme Beginning Realm, bringing its level to the level of six evolves.

Qi Ling Ao Yu was so excited that she couldn't help herself.

If it hadn't been for Xiaoyou to stare at Su Lang's head, she would have to hang on Su Lang's neck.

"Ao Yu."

"How far is your current perception range?"

Su Lang asked with the little black bowl in his hand.

"Return to the master!"

Ao Yu replied cleverly, "Ao Yu can perceive relatively big things happening within a trillion light-years."

"One trillion light years! Not bad, not bad!"

"I will improve you later so that you can detect the entire Celestial Continent!"

Su Lang nodded in satisfaction, "Now, once you find something that is too elementary or above, please give me feedback."

"Good host!"

Ao Yu nodded heavily.

Soon.

Su Lang turned the candle nine-yin eye into a pattern on his clothes, just like the eight-sided shield of the sky.

Next.

It's the Infinity's turn again!

When Su Lang strengthened the weapons before the evolution, he reserved enough materials for the Infinite!

"With the current materials."

"Strengthening eight times is no problem at all."

"The system, activate the one-click enhancement function, and strengthen the designated target!"

Su Lang condensed in his eyes, locked a total of 80,000 parts with his spiritual thoughts, and immediately issued instructions.

Suddenly.

In the storage space, countless materials disappeared out of thin air!

There are a total of 120,000 parts of Infinity, all of which have completed the sixth enhancement!

And the conventional power of the Boundless has finally entered the Bayan Primordial Realm!

If there are enough strong people stationed in it, you can reach the Jiuyan Prime Stage!

"Finally strengthened to the sixth time!"

"If it is the seventh strengthening, the material consumed is estimated to skyrocket again."

"Next time, let's consider 'Weapon Evolution' for Infinity's parts."

Su Lang looked at the Infinity in the storage space that had been promoted to the Eight-Yan Realm, and the corner of his mouth immediately hooked.

So far.

The weapons that Su Lang wanted to strengthen had already been strengthened.

Next.

It was the turn of the medicine and the formation.

First of all.

Su Lang read the various alchemy classics, formation classics, and Qidao classics obtained from Senior Zhaoyu.

Senior Zhaoyu is worthy of being able to wrestle with Emperor Yuanmingzhou. In addition to his unpredictable cultivation base, his alchemy, formation, and implement have all reached the primordial level.

The kind of classics he possessed was almost comparable to the total number of classics that Su Lang had read.

"Lying down!"

"Learned this time!"

"With this knowledge, just one thought can become a big killer move!"

"As long as the materials are sufficient, I am afraid that even Jiuyan will be able to kill at the beginning, and will be trapped in half an eternity!"

Su Lang smiled excitedly.

He also did not expect that Senior Zhaoyu had so many classics of formation, alchemy, and implements, which could completely raise his three ways to the limit of the Primordial Beginning Realm!

Relying on a single thought to form a formation, countless formations emerged in the wave of hands, it was difficult for Jiu Yan to escape from the beginning!

With strong expectations.

Then read all the classics.

The result is that his three attainments of formation, alchemy and implement have reached the limit of the primordial realm, and can no longer continue to improve.

If you want to go deeper into these three roads, I'm afraid I can only comprehend it by myself.

"It's so cool!"

"In the future, there will be another means of confrontation."

"It seems that I still have to store a lot of Array Dao materials, so that I can use it to display 'One Thought Forms a Array'!"

Su Lang thought so, and then he began to design the 'open source' formation as a place of exile.

[Chapter 2123: Update iterative heaven](#)

Open source open source.

That is to open the source of heaven and earth energy into the exile.

Su Lang had done similar things long ago on Canglan Star!

At this time, he has mastered the formations together to the extreme realm that is too elementary. The formations he mastered are many times more powerful than at the time, and how many times stronger!

"This formation still has to cover the entire Celestial Continent."

"Otherwise, simply extracting the energy from the heavens and the earth near the Silent Sand Sea would not be efficient enough!"

"Therefore, simply add an energy transmission network on the basis of the spiritual transmission Internet!"

"In this way, I will be able to extract an average part of the heaven and earth energy from the vast area of the Heavenly Continent and infuse it into the exile."

"At that time, there will be a steady flow of energy from the heavens and the earth in the land of exile, and the energy consumption from the outside world will be spread evenly across all areas of the vast Heavenly Continent. There is nothing that a certain area will be sucked up!"

"Well, I can take this opportunity to improve the spiritual transmission Internet and expand it to more areas. All places that were not covered before will be covered!"

"..."

Su Lang pondered silently, a trace of excitement gradually rose in his eyes.

Immediately after.

He closed his eyes.

A continuous array model emerged in the consciousness space.

This is constructed by Su Lang with spiritual power, the current model of the spiritual transmission Internet!

From above this model.

You can see countless formations!

These formations are closely connected together, one on top of the other, forming a super formation covering more than half of the Heavenly Misty Continent!

then.

Su Lang has made this formation with all his skills in the formation.

But judging from his current eyes.

This formation has many areas that can be improved.

Many low-level formations can be replaced with high-level formations.

The connection and cross-linking method of the formation can also be further improved to enhance communication efficiency.

The primordial soul that acts as a 'server' also needs to add more and more advanced ones in order to ensure the most perfect operating state of the spiritual transmission Internet.

"It seems that there are so many things that can be done this time!"

"The Internet of Spiritual Transmission must not only be improved, but also new features must be added, which can be called a big change!"

"In the future, there will be more energy transmission functions, and its name is afraid that it will become longer."

The corner of Su Lang's mouth clicked, "It is called the Internet of Spiritual Energy Transmission? No, it has a virtual world with many comprehensive functions. It is called...the heavenly virtual world."

Named a brand-new Tianmenxu world.

Soon.

Because of the need to upgrade the heavenly virtual world.

During this period, it will have a lot of influences on the world of heaven.

Therefore, Su Lang let the 'server' temporarily let everyone offline.

then.

The 'server' of Tianmenxu Realm issued another announcement.

"Attention please!"

"Announcement: Spiritual Transmission Internet is about to usher in its first update iteration!"

"The content of this update includes the extension of coverage area, the construction of energy transmission network, the arrangement of the transfer point of the Silent Sand Sea, the construction of the entrance to the Exile..."

"This update method is shutdown update, please all personnel offline within one minute!"

Announcements sounded in the heavenly virtual world.

It immediately caused a worldwide sensation!

"What, the spiritual transmission Internet can be updated and iterated!"

"His Majesty Su Lang is really amazing, only to establish this spiritual teleportation... No, it hasn't been long before the establishment of this virtual world, we will continue to improve it!"

"After this update, the coverage of the Celestial Void Realm has become wider! In addition, an energy transmission network will be built and a large number of transmission points will be added!"

"The most important thing is the entrance to the exile, I must go to the exile to practice!"

"Stop talking, go offline in a minute!!"

"..."

In places such as the Heavenly Misty Continent, the Cultivation Realm, the Wu Clan Continent, and the Heavenly Misty Star Group, all the warriors who learned of the announcement were excited and talked a lot.

Soon they were also very obedient and went offline, waiting for the update of the heavenly virtual world!

Those warriors who were running madly towards the Silent Shahaï also temporarily stopped.

Because Su Lang wanted to build a teleportation point to the Netherworld Sand Sea, they naturally didn't have to fly over by themselves!

[Chapter 2124: The design is complete, get started!](#)

And Su Lang's side.

After posting the update announcement.

For example, Jiang Wenzheng and other early powerhouses also knew the content of the announcement.

then.

Everyone looked at Su Lang in shock.

They know the power of the spiritual transmission network best.

At this time, Su Lang not only needs to update and improve, but also add new functions, which is too strong.

Such a vast work.

All will be done by Su Lang alone.

This is another miracle project that will last forever!

The primordial and quasi-primary warriors looked at Su Lang in shock and respect.

Seeing that he had settled into concentration with his eyes closed, he did not disturb him.

Instead, they continue to communicate silently and formulate access standards for the inner and outer areas of the exile.

Su Lang began to delete and modify the formation model, improve the old functions and add new content.

With his current formation skills.

Soon, various levels and different types of formations were combined.

The formations complement each other and become a more advanced and powerful combined formation!

In a short time.

Su Lang redesigned the entire formation!

The brand new Celestial Void Realm will cover the entire Celestial Continent and the Celestial Constellation.

It mainly adds a very powerful energy extraction function, which can absorb the energy in the void of the universe to supplement the Tianmen continent itself.

There are also powerful energy transmission and distribution capabilities, and the entire Celestial Continent will be the source of energy for the Exile.

"The design is complete!"

"It's time to finish it yourself!"

After repeated confirmation, Su Lang nodded in satisfaction.

Immediately after.

With a thought, he directly used the convenience of the transmission network to come to the high sky. Others are temporarily not allowed to use the Celestial Void Realm, and Su Lang himself is not affected. Soon.

Su Lang passed through layers of guardian barriers and came to countless array bodies.

"Just start here!"

Su Lang's eyes flashed, and the countless arrays within the scope of his divine consciousness suddenly collapsed, turning into countless materials and appearing in the storage space.

At the same time, countless new formations appeared in the original place of these collapse formations!

This is the convenience of using one-click decomposition and one-thought-to-array functions together.

If the other people are replaced, it will take countless hours and energy and waste countless materials just to dismantle the old formation!

at this time.

Su Lang began to decompose and arrange his formation without stopping.

During the period, he also took out some of the souls of the primordial age, and eroded them with incense willingness to form the most kind, brave, fair, and most...

Then these souls of the Beginning were refined by Su Lang into the Celestial Void Realm and became a new server.

Time passed slowly.

The brand-new Tianmenxu Realm is constantly improving and expanding!

Numerous remote places were also covered by the Heavenly Void Realm.

A large number of brand new teleportation points appeared on the ground, providing countless warriors to teleport.

The energy transmission network is gradually spreading out, as the new formation continues to spread in all directions!

In a blink of an eye.

Su Lang arranged countless arrays.

At this time, a system prompt appeared in his mind.

"Ding! "Haoheng Profound Art" has reached the founding level!"

"Ok?"

"The exercises are over!?"

The corner of Su Lang's mouth twitched, revealing a touch of excitement.

Immediately afterwards, he felt a strong warm current appearing out of thin air, pouring into the limbs, every cell!

Except for the 20 billion cells that had been actively promoted by Su Lang, they only increased by less than twice.

The rest of the remaining cells are all tripled!

"three times!"

"Already a very good multiple!"

"One hundred and seventy gao cells up and down in my body, all have tripled, and my energy reserve and the strength of twisting power can be increased a lot!"

Su Lang smiled, and then chose a passive exercise exercise called "Chenyu Wuya Xuanlu" and placed it on the nine martial arts villains to make them practice exercises together.

Soon.

Su Lang opened his property panel and took a look.

[Chapter 2125: Liuyantai primary combat power](#)

"Properties panel!"

[Name]: Su Lang

[Race]: human

[Qualification Level]: Turbidity

[Realm level]: Three Yan Taichu

[Attack level]: Liu Yan Taichu

[Defensive level]: Liu Yan Taichu

[Shenfa Level]: Wuyan Taichu

[Endurance level]: Six Yan Taichu

[Spirit Level]: Realm of Pure Nirvana

[Mastering the exercises]: Infinite Heart Sutra, "Ten Thousand Laws into One: Infinite Profound Meaning" (too elementary, founding)

[Activated system functions]: one-key practice function (level 49), one-key martial arts function (level 49), clone dispatch function (level 48), one-key treasure hunt function (level 48), one-key alchemy function (level 15) , one-key mixer function (level 15), one-key array function (level 15), one-key synthesis function (level 15), one-key empowerment function (level 25), one-key enhancement function (level 9), one Key decomposition function (no level)

"Attack defense and endurance have been improved to a new level!"

"To sum it up, it is the result of the three exercises to the founding!"

"One 'future' stage time exercise, two passive exercise exercises!"

"Well, it's not bad, but with the basic technique, my combat power can be raised to a higher level!"

"However, the realm of the early level cultivation is very important. After all, the time rule is the foundation. Once the foundation is laid, it can be more stable and not easy to overturn."

"After completing this brand new Celestial Void Realm, I will go to the place of exile and practice hard for a day. Well, it's equivalent to twenty or thirty years!"

"At that time, the safekeeping will be able to slap the Jiuyan Beginning Realm powerhouse!"

Su Lang thought excitedly, and immediately began to continue arranging the formation.

Annihilate the sea of sand, in a place of exile.

All the primaries and the quasi-primaries have formulated detailed access standards.

Seeing that Su Lang did not come back.

So they all sat down cross-legged, then took out the pill given by Su Lang, and started to seize the time to practice.

joke.

The time flow they are now in is one hundred times that of the endless universe.

Of course you must cherish it!

Time passed slowly.

In a blink of an eye.

Another hour or so has passed!

The system prompt sounded again.

The previously placed technique "Chenyu Wuya Xuanlu" has been practiced to the founding level!

Su Lang immediately stopped to set up the formation, sat down on the spot, and accepted the transformation and promotion of the practice!

Suddenly.

A huge amount of warmth flowed out of Su Lang's body, like stars appearing everywhere in his body, seeming to illuminate his entire body!

And he just ascended the crystal wall cells not long after.

At this time, most of them have increased by one-half to two-thirds of the space.

Although it has been less than twice.

But on the basis of the current huge size of crystal wall cells, the benefits are also great.

Because the passive exercise method has not completely failed.

So Su Lang chose a passive exercise "Endless Taixu Jue", and began to practice with nine hearts into one!

"After this exercise is finished."

"It is estimated that the effect of passive exercises will be reduced to the limit."

"Even if the passive exercise technique is still effective, I still have to consider choosing some active techniques for backup!"

Su Lang's eyes flashed with thoughtful light.

So far, he has practiced a lot of passive lifting methods.

From various tricky angles, he passively strengthened and improved his crystal wall cells.

It is equivalent to using all kinds of passive lifting methods, and the second use, the effect is naturally greatly reduced or no more.

Therefore, you can only practice active exercises.

of course.

These passive exercises have brought extremely terrifying benefits to Su Lang.

Those crystal wall cells that have never been actively promoted are larger than the crystal wall cells of the same level who have worked hard for billions of years!

And much bigger!

The quantity crushed the same level too early.

The quality has to be crushed again!

Coupled with other factors, Su Lang's current combat power is now three small realms ahead of the same level in the early days!

Closer to home.

Placed the exercises.

Su Lang continued to arrange the formation.

Soon, he arranged countless formations!

With multiple breakthroughs.

And the continuous efforts to improve the function of spirit.

At present, Su Lang's spiritual detection radius has reached a million light-years level!

Within this range.

Su Lang can lay out countless arrays and fill them up!

In addition, he has always been able to use the transmission Internet, and he can continuously transmit at will.

[Chapter 2126: A good strategy to kill two birds with one stone](#)

Every transmission.

Su Lang has just finished setting up all the formations within a million light years!

After reaching the edge of the current heavenly virtual world.

You can use the clone to dispatch and replace, continue to arrange the formation, and expand the heavenly virtual world.

The speed is a little bit slower, but also very, very fast!

therefore.

In a short time.

Su Lang not only renewed and perfected the Celestial Void Realm, but also expanded the coverage area to envelop the entire Celestial Void Continent.

He was also equivalent to measuring the Heavenly Misty Continent with his own spiritual thoughts.

This irregular one of the four continent fragments of the Infinite Realm, including the Cultivation Realm and the Wu Clan Continent, has a length of one trillion light-years at its longest point and six trillion light-years at its shortest point!

Such a large area.

At this time, all of them were arranged by Su Lang to the heavenly virtual world!

"It's time to urge the new Heavenly Void Realm!"

Su Lang was suspended in the dry void, looking at the boundless continent under his feet, and took a deep breath.

Immediately after.

Seeing his thoughts moved, all the formations seemed to have been turned on, all running together!

Rumble!

The endless cosmic energy has almost formed a torrent of twisted rays of light, frantically flooding into the heavenly virtual world to absorb the energy of the universe and the formation of the cosmic energy!

In a short time.

The Tianmen Continent is like a colorful luminous body, extremely vast, spectacular and beautiful!

Simultaneously.

Inside the Tianmen continent.

The spiritual energy of heaven and earth is also absorbed by the heavenly virtual world.

However, Su Lang would not be exhausted, and controlled the absorption of the formation.

Therefore, the degree to which the Heavenly Misty Void Realm absorbs the aura of the Heavenly Misty Continent is not strong.

The creatures can also feel that the concentration of the surrounding aura has dropped a little, and it has almost no impact.

After the huge amount of energy is absorbed by the special array components in the heavenly virtual world, it is transmitted to the energy transmission network and temporarily stored.

Because Su Lang hasn't completed the connection between the Heavenly Void Realm and the Exile Land. after all.

The place of exile is equivalent to another independent time and space!

It is not so easy to connect together.

Changed to other martial artists, even Bai Lian, Po Suo this kind of Jiu Yan Taichu, absolutely can not do it.

It is estimated that this half-step of Mi Ling Buddha will be eternal, and it will take countless efforts and time to achieve it.

For Su Lang.

It is not too difficult to accomplish this.

The difficulty of connecting the Heavenly Void Realm and the Exile Land is mainly due to the barriers of the world and the power of time and space.

But Su Lang has a boat of ten thousand domains!

This fellow wanders into the world barriers of the Exiled Lands, and almost blends into one. The two complement each other and are dependent on each other.

Su Lang can fully connect the Heavenly Void Realm with the help of the Ship of Ten Thousand Domains!

"Use the boat of the universe as an energy transmission medium."

"It can also use the energy collected by the Celestial Void Realm, which can greatly extend the time limit of the high flow rate in the Exile!"

"This is simply a good strategy to kill two birds with one stone!"

"But before that, we have to transform the Ship of Ten Thousand Territories."

"This ship of Ten Thousand Regions itself has very anti-sky characteristics."

"It can transport creatures to many places in the boundless universe, and it can also be brought back out of thin air. This must be used!"

"Perhaps, I can build it into a real 'main **** space'!"

"..."

Su Lang's eyes flashed with excitement.

The main **** space, invading and plundering countless worlds, its power is self-evident!

Just do it.

Su Lang didn't rush to open the new Heavenly Void Realm, but went directly to the crystal wall of the World of Exile.

Stepping on the incomparably heavy, mainland-like world crystal wall, through the ship of ten thousand domains, Su Lang can clearly feel the torrent of time inside the exile!

"Come out, Xiaozhou!!"

Su Lang thought, Xiaozhou suddenly appeared among the barriers under his feet.

Immediately after.

The world barrier slowly melted, and Su Lang directly sank in, slowly being wrapped in the fluid world barrier, and then came to the ship of ten thousand domains.

"the host!"

The spirit of the Ship of Ten Thousand Domains respectfully shouted at Su Lang.

"Ha, pretty well-behaved."

Su Lang smiled slightly, and then began to make a transformation design based on the current ship of Wanyu.

[Chapter 2128: Upgrade the Coffin of Kowloon](#)

"system!"

"Activate the weapon evolution function, the goal, the coffin of the Nine Dragons!!"

Su Lang locked the coffin of Nine Dragons with his spiritual thoughts and immediately issued instructions.

"Ding! Consumes the soul of the Supreme Emperor*454584, the godless-grade material exquisitely returns to Yuanyu*98874, Lenoduye stone*7458456...The coffin of Nine Dragons has evolved successfully!"

Accompanied by the appearance of a little material consumption and system prompts.

The Coffin of Nine Dragons suddenly became an extremely basic weapon, and its power was greatly increased!

But Su Lang is not satisfied with this.

As the core component of the Ark of Ten Thousand Domains, how can it be enough for the Yiyantai primary weapon?

"system!"

"Continue to evolve the coffin of the Kowloon!"

The light in Su Lang's eyes flickered, and he issued instructions again and again, directly raising the level of the Nine Dragon Coffin to the Sanyan Primordial Stage.

So far.

The materials that continue to evolve are no longer enough.

But this is not over yet.

There is also a key enhancement function not used.

"Activate one-click enhancement function! Target Nine Dragon Coffin!"

Su Lang locked a large number of unnecessary materials with divine mind and gave instructions to the system.

Suddenly.

These useless materials disappeared and turned into mysterious energies, strengthening the Nine Dragon Coffin even stronger.

Because the basic level of the Nine Dragon Coffin has reached the Sanyan Primordial Stage.

Therefore, when strengthening, even if it is the first strengthening, more materials are consumed.

In addition, Su Lang had strengthened a large number of weapons before.

Even if he had the legacy of Senior Zhaoyu, it was almost consumed at this time.

"The Coffin of Nine Dragons has the strength of the Siyan Primordial Realm, almost enough."

"Next, let's install and arrange the newly refined parts."

Su Lang thought while escaping thirty-six parts

——All these parts are prepared for the Kowloon Coffin!

"go with!!!"

But seeing Su Lang sip softly, the thirty-six parts in his hand suddenly turned into streamers and fell around the coffin of Nine Dragons, embedded in the gap.

Immediately after.

Su Lang's eyes moved to the rest of the gap.

Thousands of self-refined parts were cast out one after another, perfectly embedded in the established position.

"Small boat!"

"Close the gap immediately!"

Su Lang gave an order, and the gap between the parts that had been actively opened by the Ship of Ten Thousand Domains suddenly closed slowly.

All the parts are tightly integrated, and there is no gap at all!

But this is not over yet.

The Ship of Ten Thousand Domains is the primary weapon of Jiuyantai.

But it can't be upgraded like building blocks.

After splicing them together, they need to be formed into a perfect whole with mysterious refining methods.

"Colorful Burning Heaven, Go!"

With a wave of Su Lang, countless colorful flames suddenly fell on the body of the Ship of Ten Thousand Domains, and a new round of casting began.

This time.

Su Lang's refining technique is very gentle, and will not have any effect on the original spirit of the weapon at all.

instead.

"Ah! Really comfortable!"

"Thank you master, thank you master!"

"I feel my empty body has become more fulfilled!"

The boat of Wanyu is inspired by its own power and becomes more and more comfortable, as if you are in a hot spring!

Time passed slowly.

Under Su Lang's colorful burning sky.

Thousands of newly refined parts are completely integrated into the Ship of Ten Thousand Domains, forming a whole, regardless of the old and the new.

And the aura of the Ark of Ten Thousand Domains skyrocketed again, reaching a stronger level in the Jiuyan Primordial Realm.

The key is.

It has all the functions that Su Lang needs.

The first is the log-in entrance of the heavenly virtual world.

This login entrance has been perfectly connected with the Celestial Void Realm on the Celestial Continent.

Su Lang standing inside the Ship of Ten Thousand Domains can directly log in to the Celestial Void Realm in the place of exile, and then teleport to the rest of the place.

and.

The Ship of Ten Thousand Regions is the existence of the Jiuyan Primordial Realm.

And it is moving fast in the world crystal wall of Exile all the time.

Its login entrance can be used anywhere in the exile, and there is no need to set up a new formation in the exile.

"finished!"

"So, Xiaozhou, start the energy transmission network!"

"Give me the extracted heaven and earth energy and cosmic energy into the land of exile!"

[Chapter 2129: Million times energy concentration](#)

"Yes, master!!"

Xiaozhou immediately took the command and immediately activated the energy network.

Suddenly.

In the Heavenly Void Realm, the countless energies collected by the energy network were all instilled into the exile.

However, the extremely majestic energy overflowed from the ship of Ten Thousand Regions itself, and then spread towards the inside of the exile.

In a short time.

The energy density of the Exile Land rose to a level.

The creatures who existed in the land of exile were extremely shocked and excited.

"Energy concentration has increased!!"

"God, I never expected that the energy concentration of the outside world is comparable to my spiritual gathering practice room!"

"The energy concentration is not only increasing, is it going to be ten times the original? A hundred times? Or thousands of times!?"

"Following the great tremor of the world, the energy concentration has greatly increased. What is going on!?"

"..."

Countless warriors were horrified, and the warriors who knew each other talked and made various guesses.

however.

Their level is too low!

Even the strongest, only Wudu has no **** level, it is not worth mentioning.

They don't even know that the flow of time has become 100,000 times faster.

As for the creatures in these exiles, Su Lang is too lazy to explain to them at present.

Anyway, when the Exile Land was opened, some warriors, monks and witches came to practice and told them the truth.

"The energy concentration of heaven and earth has risen!"

"But this is not enough. A hundred thousand times the time flow rate and a mere thousand times the increase in energy concentration is a drop in the bucket."

Su Lang nodded slightly, shook his head slowly, and ordered again, "Xiaozhou, continue to give me energy."

"Yes!"

The Ship of Ten Thousand Territories took the lead, and the energy escaping from his body became more and more vast.

This makes it like an energy source, continuously increasing the energy concentration of the Exile Land.

In the heavenly continent.

With the extraction of the energy transmission network of the Celestial Void Realm, the energy around the world has dropped a little again.

Compared to before.

This time the decline is slightly larger.

But it still won't have any impact on the Tianmen Continent.

Because the Tianmen Continent is really too big, its size is a million times the size of the exile!

As time passed by.

The energy concentration in the Exile has reached about 100,000 times the previous!

Not only was the energy concentration on the entire continent of the Exiled Land increased, but the surrounding void was also full of countless energy.

In the land of exile.

Countless intelligent creatures have gone crazy!

"Oh my God! What is going on?"

"The energy of the Exile has increased countless times than before, and it is still increasing. Is the universe favoring us?"

"I want to break through, I break through!!"

"..."

A large number of intelligent creatures broke through one after another in a strong energy concentration.

In a short time.

The overall combat power of the entire Exiled Land has risen to a level.

Of course, this was useless for Su Lang, at least he had to be at the Beginner level to be able to help him.

"the host!"

"The energy concentration in the Exile has increased to 200,000 times the previous level. Will it continue to increase?"

The Ship of Ten Thousand Domains kept running in the crystal wall of the world while asking Su Lang's opinion.

"carry on!"

"Anyway, the Tianmen Continent has entered the era of accelerated cultivation by all people."

"At that time, most people will practice in and outside the exile."

"Rather than let the energy of heaven and earth spread across the vast expanse of heaven and earth, it is better to gather them together and use them together!"

Su Lang's eyes flashed, and he gave the order to continue to the Ship of Ten Thousand Domains.

then.

The heavenly virtual world energy transmission network continuously absorbs the energy of heaven and earth and the energy of the universe.

The Ship of Ten Thousand Regions continuously releases energy into the exile.

It wasn't until the energy of the Exile Land had reached one million times the previous energy that Su Lang stopped it.

One million times the energy concentration.

It is already an extremely terrifying magnitude.

Great influence has also been exerted on the Tianmen Continent.

If it hadn't been for Su Lang to balance the energy concentration of various regions of the Celestial Continent with the Celestial Void Realm energy transmission network, some places would have become infinite regions.

[Chapter 2130: Restart the Heavenly Void Realm](#)

And in the land of exile.

With a million times the energy concentration, countless intelligent creatures have started a rocket-like promotion speed!

Even ordinary flowers and plants have quickly become all kinds of treasures.

Of course, the intelligent creatures in the exile now look down on these low-level treasures.

The pure heaven and earth energy alone has made them infinitely useful!

"These wise creatures of the exile..."

"Well, although they are very low-level, their combat effectiveness is not strong."

"But after all, they are native creatures in the land of exile. Compared to the Heavenly Continent, the number is not too large, so they will not be driven away for the time being."

"However, the place of exile is a place dedicated to cultivation after all."

"It is okay for them to enjoy a certain amount of time, but not forever!"

"After a certain period of time, let them be placed in the Celestial Continent."

Su Lang thought so, and then through the boat of ten thousand domains, from the place of exile, across time and space, returned to the Continent of Heaven.

Just returned to the Tianmen mainland.

He appeared in the outer area of the Exile, before Jiang Wenzheng and the others.

Because the outer area of this exile is also an established practice area.

Therefore, Su Lang used the Heavenly Void Realm to put a lot of energy into it, turning it into a 10,000-fold energy density!

Jiang Wenzheng and others have already felt the changes in the energy concentration and distribution area of the Tianmen Continent, knowing that this is Su Lang's handwriting, and can't help but be amazed.

Uniformly mobilize the energy of the entire Celestial Continent.

This method is unique in the history of Infinity.

Even the previous Emperor Wu Bian Zhou could hardly achieve this level.

at this time.

When everyone saw Su Lang, they all knelt down and bowed down.

"Meet His Majesty Su Lang, Emperor of Infinite Universe!"

All the primordial and quasi-primary strong salutes respectfully, and their faces are full of respect and admiration.

"Everyone, please."

"I wonder if the access standards for the exile and this peripheral practice area can be formulated?"

Su Lang smiled slightly, raised the crowd, and asked softly.

"Return to your Majesty!"

"Subordinates and others have discussed and made an access standard, please have a look!"

Jiang Wenzheng took out the entry standards that everyone worked together to complete, and gave them to Su Lang with both hands.

"Ah, very good!"

"Just follow this."

Su Lang took over the jade slips with the access standards, read them with spiritual thoughts, and nodded in satisfaction.

In the beginning, the people were all spirits, and there was strength and wisdom.

The access standards that they worked together to create are very consistent with the status quo of the Heavenly Continent.

Jiang Wenzheng was very satisfied with Su Lang when he was waiting for the early strong, and he was immediately excited.

"You have worked hard."

"Next, I will restart the Heavenly Void Realm, and officially open the training areas inside and outside the Exile!"

Su Lang nodded slightly at the crowd, and then with a thought, he walked into the world of heaven and earth.

Soon.

He informed all the access standards specified by Jiang Wenzheng and others to the servers of the Heavenly Void Realm.

After the server has completely digested it.

Su Lang opened the Heavenly Void Realm so that everyone can log in.

There are countless intelligent creatures in Tianmen Continent.

Many wise creatures have lost the Heavenly Void Realm, that is, after the spirit is transmitted to the Internet, they simply do not want to live.

As a result, they are always trying to log in to the heavenly virtual world through the terminal.
at this time.

As soon as the heavenly virtual world opened.

Suddenly a huge number of intelligent creatures logged on!

"Haha, I'm logged in! I'm the first one!"

"The brand new second day of the mysterious world, I am coming!!"

"This place has been renamed the Heavenly Netherworld Realm, and His Majesty the Great Infinite Universe has included the entire Heavenly Mian Continent here!"

"My hometown was no longer in the Void Realm before, but it is also here now, great!"

"Quickly, the news of the opening of the Heavenly Void Realm is spread!"

"..."

Countless creatures were both excited and moved, and when they were talking about it, they immediately spread the news.

Suddenly.

There is no need for Su Lang to specifically inform the creatures of the Celestial Continent that the Celestial Void Realm has opened up. The creatures of the entire Celestial Continent learned the news themselves!
