

One Click 321

[Chapter 321: I can't understand it at a glance](#)

A golden student actually wants to teach them a lesson! ?

Oh my God, there are a thousand platinum, one hundred purple gold, and ten Hall of Fame students in the entire Dan Sect.

Adding more potential silver and gold levels, this is a big lesson for tens of thousands of people!

And the instructor is a golden student who is less than twenty years old!

After the shock, many of the tens of thousands of students suddenly showed ridicule.

This is so special, is the world upside down?

Have you started to teach the Platinum and Zijin Hall of Fame and your tutors by the gold students? Ha ha!

However, some students said that although they were unbelievable, they thought that golden student Su Lang might have discovered some important alchemy mystery!

Otherwise, how can it be endorsed by a tutor?

Even those students who didn't know Yun Yemeng's permission for this matter also guessed some truth.

You know, every instructor has passed the news, which means that the decision to start this course must be approved by a higher-level person!

Then, it's not the great mentor, or the master Yun Yemeng!

Thinking of this, these students became excited!

They decided that they must go to the course this time and they would definitely learn something good.

And those students who are despised in their hearts also plan to go and see it, it's just a good show!

At the same time, the news that golden student Su Lang would start a class to teach all Danmen students, also spread the Danmen, and came to Qimen, Zhenmen and Warmen.

These students have less information, so they are even more unbelievable and even more contemptuous.

Especially those warmen who are muscular and simple-minded.

After many warmen students heard the news, they began to ridicule without even thinking about it.

"Are the Danmen guys down? It's a laugh to ask a golden student to come to class!"

"Walk around, I heard that this big class is in Shangyangshan Square, where there can be a lot of 10,000 people, let's go take a look!"

"Hahaha, although we said it started at 8 o'clock, let's go early and take a good position."

"You give me a place, I'm going to buy melons, do you want melon seeds or watermelon?"

"..."

Outside the Dan Gate, the other three melon-eating audiences expressed their great interest, and rushed to Shangyang Mountain in groups in twos and threes.

At the same time, An Xin's yard.

Su Lang smiled and said, "Master, since you have passed on the news, let's continue to learn Dandian!"

"Ah? Learn Dandian, now?"

An Xin was stunned, and couldn't help looking at Yun Yemeng.

"Yes, I know to cherish time!"

Yun Yemeng looked at Su Lang, nodded slightly, and then smiled at An Xin, "Do I still need my permission to learn this kind of thing? Haha!"

"Okay, I see, master!"

An Xin smiled, and immediately turned to look at Su Lang, "Train, let's go."

Su Lang nodded, and walked into the room with An Xin.

"Huh, pretending to be!"

Miao Feichen snorted coldly in his heart. He looked at Yun Yemeng, observing his words, and wanted to see if the master had the same idea with himself.

but.....

"I'll take a look too, are you going?"

Yun Yemeng glanced at Miao Feichen, then turned to follow the pace of Su Lang and An Xin.

"This!"

The corners of Miao Feichen's mouth twitched, and his heart was very bad.

He could see it, the master is really optimistic about that kid!

Sighing in his heart, Miao Feichen's expression changed for a while, but he followed suit.

Four people came into the room.

An Xin looked at Yun Yemeng at a loss.

"I'll just take a look, don't worry about me."

Yun Yemeng waved his hand, then took a chair and sat down.

"Oh!"

An Xin was a little nervous. To be honest, it was the first time she had communicated with Yun Yemeng, and it was the first time Yun Yemeng was staring at the teacher.

Before, she had only seen Yun Yemeng a few times in the distance.

At this time, Su Lang picked up the jade slip and placed it between his eyebrows—he didn't want to explain to others about spiritual power anymore, so he simply concealed it.

An Xin didn't say anything bad, and sat down and waited for Su Lang to ask questions.

Soon, Su Lang asked the first question

—“I can't understand it at a glance. Miao Feichen will question and beep!

And Master Anxin will also be hit.

[Chapter 322: Show a little hand](#)

Learning is to have problems.

Although the first question raised by Su Lang was a bit remote, it was relatively simple, and Anxin answered it directly.

After that, Su Lang raised some more questions, and it became more and more difficult to show that he was fusing the pill codes and slowly getting them through.

And Anxin was a little bit difficult to answer, but at any rate it was answered.

Sitting beside Yun Yemeng, he nodded his head again and again. From the questions Su Lang asked, he knew that Su Lang's talent was really very, very high!

Has exceeded his expectations!

At this time, Su Lang raised a super difficult question.

"Master, it is said here that the veins of the red water dragon leaves and the pollen of the blue flowers can be mixed to produce the main medicinal properties of the red and blue points.

But the red dragon leaves are so precious, why not use silver grass, Liurenlian, and Aoi flowers instead.

The three kinds of elixir together are not as valuable as one-third of the value of the Hong Linglong leaves, but after the mixture of their properties, they are almost identical to the Hong Linglong leaves.

As long as thirty-nine basic material processing methods such as the infiltration method and the liquid separation method are used to remove the Yin Russell inside, the remaining impurities will hardly affect the refining of the red and blue cent yuan pill.

Is there anything in it that I didn't think of? "

As soon as Su Lang's voice fell, Yun Yemeng was shocked, and Miao Feichen couldn't help showing shock.

And An Xin opened his mouth slightly and said in disbelief:

"My God, although the ancestors have long discovered that the mixture of Yinguangcao, Liurenlian, and Aoi Flower has almost the same medicinal properties as Honglinglong leaves, they have never been able to get rid of Yin Russell.

Su Lang, you actually thought of the way to get rid of Yin Russell, which is to use 39 basic materials? "

Su Lang clicked the corner of his mouth and said, "Oh? So this method of removing Yin Russell hasn't been invented yet? No wonder no one has used silver grass, liuren lotus, and Aoi flowers to replace red dragon leaves!"

"Su Lang, your alchemy talent is really amazing!"

"Even I haven't found a way to get rid of Yin Russell, but I didn't expect this method to use only basic materials."

Yun Yemeng looked at Su Lang with some surprise, his eyes shining brightly, very bright.

With the alchemy attainments in the realm of Pill God, from the basic processing techniques and sequence mentioned by Su Lang, he inferred that this method is really feasible!

Although it is more cumbersome, but a little trouble, you can replace the red dragon leaf with lower-level materials, which is totally worth it!

After all, the Red Linglong leaf is also the material of the Wang Tier anyway, and it is also very precious when looking at the entire Blue Star.

"I found it accidentally too, haha."

Su Lang smiled very modestly and glanced at Miao Feichen faintly.

Miao Feichen was stunned by Su Lang, his face a little hot.

He kept saying that Su Lang had no real knowledge.

At this time, Su Lang pioneered a method to replace the Red Linglong Leaf.

After completing the two thousand years of Blue Star, all alchemists have not overcome the problem.

This has proved that Su Lang's alchemy talent is really against the sky, and the knowledge of alchemy is also perfect and superb.

Su Lang has real skills!

The result of this proof is tantamount to slapping Miao Feichen fiercely, making his face hot and embarrassed, but unable to refute it.

Pill God Yun Yemeng agreed, and he had a Pill Zun in Miao Feichen district, daring to refute! ?

Dare not!

He could only hold his breath in silence, which was extremely uncomfortable.

Seeing the embarrassment flashing on Miao Feichen's face, Su Lang's heart was refreshed, and he continued to read the alchemy classics.

Later, Su Lang raised some questions and explored solutions to some difficult points.

Every speech made by Su Lang is refreshing, and can even inspire Yun Yemeng, making him unable to stand up from his chair.

And this made Yun Yemeng even more surprised, and he valued Su Lang more and more. It also made An Xin a little proud of her. Su Lang is her disciple!

At the same time, Miao Feichen's bad feelings grew stronger.

[Chapter 323: A crowded classroom](#)

"This son's alchemy talent is really against the sky, read the alchemy classics, almost all of them!

This kid, his alchemy technique of refining a large number of pills in a short time, wouldn't it be true? ? "

The terrified Miao Feichen looked at Su Lang's gaze gradually filled with fear, even with a trace of fear.

He was afraid of Su Lang's talent!

Such a junior will sooner or later surpass him Miao Feichen, and then step him under his feet and crush his face with the soles of his shoes!

Damn it!

The more I think about it, the more hostility in Miao Feichen's heart becomes.

On the contrary, Dan Shen Yunye dreamed that Su Lang was so talented, and instead of fearing that he would be surpassed, he was surprised and expected for Su Lang, a younger generation who was about to emerge from the blue and beat the blue.

The minds of the two are simply the difference between clouds and mud!

Amidst Yun Yemeng's expectations, Anxin's pride, and Miao Feichen's dark hatred, Su Lang gradually learned most of the King's Pill Code.

At this time, it was close to 8 o'clock in the evening.

An Xin checked the Chuanxin Jade Pai and said with a smile: "The time is almost up, and I have been sent a message by a tutor, saying that all the Danmen disciples have basically arrived at Shangyangshan Square, and today's course is here."

"It's all arranged by the master."

Su Lang smiled slightly and returned the alchemy classics in his hand to An Xin.

Yun Yemeng also nodded, stood up and walked outside, followed by Miao Feichen with anxiety.

The four went to Shangyangshan Square together.

At this moment, the Shangyangshan Square is completely crowded with people, shoulder to shoulder, and water can't escape!

The disciples of Danmen stood in the inner circle of the square, while the disciples of Zhanmen's Gate Qimen stood in groups on the periphery to join in the fun.

Not only was the ground hustling and bustling, but also a large number of instructors and students above the Wuwang level were flying in the sky.

In the middle of the square where nothing sits, there is a huge white jade platform.

The white jade platform is spread all over the array, in a square shape, with a length of fifty feet and a height of one feet, almost another square on the square.

This white jade platform was used to hold some activities and competitions before, and at this time, it became the podium for Su Lang to attend classes!

"It's 8 o'clock soon, why aren't you here? Isn't it fooling us?"

"The news spread all over the college, and that Su Lang definitely didn't dare not come, but he was too late. This shelf is a bit big!"

"A golden student in the mere paltry has asked tens of thousands of us to wait for him to come to class, and there are 10,000 people in my heart!"

"In my opinion, Su Lang may have already arrived, but seeing so many of us, he was frustrated and he didn't dare to come on stage!"

"I think so too. After all, our group of people are the top geniuses of the entire Blue Star human race. When we gather together, even ordinary mentors can't be calm!"

"Hahaha, in the end, Su Lang still had to take the stage, I want to see how ugly he will be."

"Maybe nervously speechless? Maybe scared to pee my pants? Hahaha, it's funny just thinking of that picture."

"..."

Everyone talked a lot, the voices were full, and the whole Shangyang Square was like a boiling pan, and it was noisy.

at this time!

Two figures rose into the sky from the periphery and landed on the huge platform in the middle. It was Su Lang and An Xin.

Considering that Su Lang can't fly, An Xin sent him up.

As for Yun Yemeng and Miao Feichen, they did not appear in front of the public, otherwise they would cause a great uproar.

At this time, the appearance of Su Lang and Anxin directly attracted the attention of everyone in the entire square.

Down to the potential level students, up to the Platinum and Zijin Hall of Fame students and major instructors, countless eyes fixed Su Lang closely.

[Chapter 324: Let's watch carefully](#)

"Here! He is the gold-level student in this lecture, Su Lang!"

"You look good, look at the brows and eyes, look at the strong bridge of the nose, the body and skin are so good, the most important thing is that he is very natural, not nervous at all, and bold."

"I apologize for what I said before. Facing so many of us, he was so calm and calm. I admire him for that!"

"Yeah, this person is really awesome. I heard that he showed strong alchemy talent when he first started, so he was accepted by Anxin as a closed disciple!"

"Do you know that huge game? He won more than 600 people alone. It is said that hundreds of people lined up to slap in the face to apologize to him and lost a huge amount of spirit stone!"

"I know, and later in the alchemy building, he slammed the entire 24th floor of the students, revealing the alchemy technique of quickly refining a large number of pills, which is the alchemy he wants to teach us today!"

"Haha, let's not hide it from you, I was the one who gambled with Su Lang on the 24th floor of the Alchemy Building, and I was so shocked that I was gone!"

"Looking down, it seems that the magical alchemy is real, it's ridiculous that my eyes and ears are blocked, I have never heard of his deeds!"

"Haha, he didn't have a reputation before. After today, he will surely be famous in academies, and even in the main city of Blue Star."

"This also has to be recognized for his alchemy, otherwise, even if he is famous in the world, it is just a laugh."

"This is not bad, let's watch it carefully!"

"..."

Tens of thousands of people whispered to each other, their voices buzzing, making noise like a nest in a bee.

"Master, just leave it to me here!"

Above the giant podium, Su Lang smiled slightly at An Xin, with strong confidence on his face.

"Okay, come on, apprentice!"

An Xin patted Su Lang on the shoulder, soaring into the air and flying into the sky.

Immediately, the array of text on the Baiyu platform gradually brightened, forming a huge virtual scene above Su Lang's head.

The content of the virtual scene is Su Lang and the ten-meter venue around him.

"It's going to start!"

From Pill Shenyun Yemeng to potential level students, everyone flashed this thought and closed their mouths involuntarily.

The huge square gradually calmed down.

"Teachers and classmates, I am Su Lang."

"Presumably, everyone knows the reason for gathering here today. Yes, I created a magical alchemy to teach everyone."

Su Lang looked around, his eyes squinting, his voice was not loud, but it could reach every student's ears.

This move alone shocked and admired some students again.

"Time is precious, don't talk nonsense, let's start now!"

Su Lang did not drag his feet in the slightest, snapped his right hand, and an ordinary pill furnace appeared in front of him.

"Presumably many of my classmates know that I used to refining a large number of pills in a virtual pill furnace condensed by flames, but in fact, a traditional pill furnace can be used.

"Because everyone uses different pill furnaces, I use the most mediocre and common pill furnace for teaching!"

Su Lang smiled slightly and said, "Now, let's talk about the first step in mass alchemy, how to deal with bulk materials.

It is well known that the amount of alchemy materials is determined according to the alchemy prescription, and the amount of the alchemy prescription is fixed, even if it is doubled proportionally, it involves many problems and is the most important reason why a large number of alchemy cannot be realized.

Our first step is to solve this most important problem, and I found the solution, and I will show it to you now. "

[Chapter 325: This is too awesome](#)

While talking, Su Lang took out a large amount of alchemy materials.

"It is not possible to double the amount of materials proportionally, but it is completely feasible to increase the amount of materials and thereby increase the amount of pellets.

Here, it is necessary to change the number of materials used. It can be said that this is an improvement on the Danfang. It does not change the type of material, only the amount of material.

Different alchemy prescriptions have to be changed to different degrees, which means that each kind of alchemy prescription needs to re-estimate the amount of materials used in large alchemy.

This seems to be a very cumbersome thing, but I found the law and summarized it into a formula.

According to this formula, you only need to perform step-by-step deductions to get the material consumption of the large alchemy room.

Based on the balance of the properties of the pill, it is impossible for us to change the amount of materials on a large scale. This change is based on the set ratio.

In other words, if you want to refine three times the amount of pill, you must make adjustments on the basis of three times the amount of materials.

This allows you to freely choose the number of pills to be refined.

Below, I will use a Tier 4 pill that everyone can refine, the Qi and Blood Pill, as a demonstration. "

Immediately, Su Lang began to conduct practical operations, processing materials while explaining.

His first speech shocked everyone!

Tens of Wandanmen students and instructors in the entire square pressed the stormy waves in their hearts and stared at Su Lang intently, for fear of missing a detail.

Those students and instructors who watched the excitement of the War Array Gate saw this scene, and suddenly thundered.

Many of them actually came to see jokes.

But at this time, seeing the performance of the Danmen crowd, they knew that Su Lang on the stage was really not bragging.

He has the strength to stand there and teach the entire Danmen!

"I rub, this Su Lang is too awesome!"

"I'm less than 20 years old, and I actually created a major alchemy on the alchemy!"

"Although I don't understand the principles of those words, I know that his alchemy will definitely bring huge changes to the entire human race!"

"Tsk tusk tusk, Dan Sect is an evil evildoer against the sky, hey, when will our sect show such a genius and push our Blue Star array forward?"

"We also need this kind of genius, but it's a pity that Su Lang has never seen an enchanting evildoer in thousands of years. I'm afraid there won't be another one!"

"..."

The students of the three disciplines of the battle formation were shocked and admired, and the instructors secretly jealous.

They really seem to want a genius like Su Lang!

Obviously Danmen is already the strongest, why can't it be a super genius among the other three? jealous!

at the same time.

In a place invisible to everyone, Dan Shen Yun Yemeng was watching Su Lang attend class with Miao Feichen.

"Wonderful, wonderful! I didn't expect it could be changed like this!"

"This formula can be used on almost 90% of the pill! Good, good!"

"Just this method of changing the proportion of materials used has benefited me a lot. Su Lang is really a stunning genius!"

Yun Yemeng kept applauding, her face full of excitement.

Miao Feichen stared at Su Lang, his face was blue and red.

On the one hand, he was shocked by Su Lang's alchemy, and on the other, he was ashamed of being beaten in the face.

"No, this is just the first step!"

"To make a large amount of alchemy at one time, the problems involved are far beyond imagination, and he may not be able to overcome them all!"

The arrogance and stubbornness in his heart made Miao Feichen reluctant to admit defeat.

[Chapter 326: Everyone is intoxicated](#)

On the huge podium.

Su Lang slowly and detailedly analyzed the formula of the amount of deduction material for the audience to watch.

Moreover, he also deduced on the spot the materials needed for 10 times the number of alchemy pills that benefit Qi and blood.

"Next, we will proceed to the second step to process the materials. In fact, this step is the same as in alchemy.

Just be aware that the concentration and quality of each material must be the same, and the difference should not exceed 5%!"

With that said, Su Lang began to process materials again.

His movements flowed smoothly, and everyone was fascinated to see him, and the platinum and purple students all sighed.

Even some instructors have learned a lot of useful details.

After processing the materials, Su Lang began the next step, warming the furnace.

"This step is not the same in the weekdays. The required temperature will vary with the amount of material, so it must also be deduced. Here is a formula again..."

Su Lang explained the second deduction formula he had summarized, and everyone was in an uproar.

"It turns out that this can be done!"

"This thinking is really unpredictable and unpredictable!"

"I learned what I learned, this skill is really wonderful, great!"

The teachers and students of Zhongdanmen showed surprises, and then continued to stare at Su Lang intently.

"Now, we have deduced the required temperature, 92.6 degrees!"

"This temperature looks a bit harsh, look at it, there are decimal points!"

"But it doesn't matter. I'll teach you a method to control the temperature, which allows you to control the temperature of the pill furnace more precisely. This method is..."

Su Lang explained a new method for controlling the temperature of the pill furnace, which shocked the teachers and students.

Even the teachers and students of Zhenmen and Qimen have gained a lot.

Because alchemy and refining arrays actually have some things in common, controlling the temperature of the cauldron is one of them.

As a result, more and more people listened to Su Lang's lectures, and the number of people watching the excitement decreased drastically.

Immediately afterwards, Su Lang began to explain the remaining steps, bringing up all the problems, large and small, and then giving solutions.

All the teachers and students in Danmen held their breath, their eyes burst open, and they were engrossed in listening to Su Lang's lecture. The entire square was filled with an atmosphere of 'learning'.

Su Lang talked about some wonderful methods from time to time, and there was a shock and ecstasy from the crowd.

Of course, there are also some students who have insufficient knowledge reserves and can't keep up with the courses, so they are rushing around.

Some female students even had tears in their eyes, wishing that Su Lang could teach them hand in hand. at the same time.

Pill God Yun Yemeng was also shocked, and he kept saying, "That's it!" "It's wonderful!" "How could this happen? 'Wait for the whisper.

But Miao Feichen's face was gray, and Su Lang had already won by this step, and had already slapped him severely!

Fortunately, there are not many people who know about this, otherwise he would have the heart to die!

After a series of analysis, explanations and practice, Su Lang's "Short Time Mass Alchemy" course is coming to an end.

"Now, let's start the furnace and see how many pills can be refined!"

On the stage, Su Lang smiled faintly, then picked up the pill furnace and fell to the ground.

The lid of the Dan furnace fell to the ground with a bang.

Wow!

Dozens of pills spilled out like jelly beans, making everyone excited.

The refining is successful! !

This means that this kind of alchemy technique is feasible, mature and perfect!

[Chapter 327: The first alchemy genius in ancient and modern times](#)

"Su Lang is awesome!"

"Senior Su Lang, I love you!"

"I was wrong, I really know I was wrong, I shouldn't question Senior Su Lang!"

"Hahahaha, under the guidance of Senior Su Lang, I have mastered this kind of alchemy, which is great!"

"It's really the number one alchemy genius in ancient and modern times. This kind of alchemy has almost changed the entire basic alchemy. Su Lang, I am obedient!"

"..."

Tens of thousands of people shouted loudly, and countless lights gathered on Su Lang. At this time, he had become the focus!

The name of Su Lang will be printed in the hearts of everyone on the square.

"Oh, I didn't expect the little ones to show their hands, and their reaction would be so big. If I teach them crazy ways to improve the quality of the pill, will they go crazy with ecstasy?"

Looking around the boiling sea of people, the corner of Su Lang's mouth evoked a trace of pride.

With the 'synchronization of alchemy', he mastered the sky-defying alchemy techniques such as rapid alchemy, mass production, and perfect alchemy.

Just throw out a little leftover material, can surprise all alchemists crazy!

"Okay, this is the end of today's class. I will talk about it in the next class!"

Su Lang waved his hand at tens of thousands of people, and immediately looked at An Xin, who was flying in the sky and was equally excited.

An Xin and Su Lang glanced at each other, suddenly realized, and immediately flew into the platform, holding Su Lang and flew away from the square.

"Ah! Su Lang is gone!"

"I still want to see him, he is so handsome!"

"Woo, people want to go to apprentice..."

"Senior Su Lang said that there is another class, I'm really looking forward to it!"

"..."

Seeing Su Lang disappeared, the students suddenly felt regretful.

Immediately, he was full of great expectations for the next class that Su Lang said!

"Well, all students go back and consolidate their knowledge!"

A mentor yelled, and then left violently.

Although he remembered some of the alchemy that Su Lang explained, he still hadn't integrated it.

At this time, he must immediately go back to the deadlock, and only after he has mastered the magical alchemy.

The tutor's roar reminded all Danmen students present.

They came to their senses one after another, and quickly dispersed in groups

——They should exchange and learn from each other, and study the alchemy taught by Su Lang together.

Those trainees from the gate gate also took some gains and left the square with admiration for Su Lang.

The most miserable one was the Warmen students, and this time they also learned some flame manipulation techniques. It was regrettable that they had little gain.

...

The students on the square dispersed, and the projection array on the platform gradually extinguished.

And Su Lang came to Yun Yemeng and Miao Feichen with An Xin.

"Good! Good talk!"

"Su Lang, you are such a genius!"

The first time he saw Su Lang, Yun Yemeng stepped up excitedly and patted Su Lang on the shoulder.

"Haha, it's all taught by my tutor."

Su Lang laughed and pushed the credit to An Xin.

"what!?"

An Xin's face turned red, and he waved his hand quickly: "How can I teach you a disciple like you?"

Yun Yemeng smiled and said: "Haha, Su Lang can achieve this, and the contribution of Anxin's instructor is indispensable!"

"Where is..."

An Xin's face turned redder.

At this moment, Su Lang turned to look at Miao Feichen, and said, "Miao Feichen, how?"

The simple five words made Miao Feichen tremble.

"You... indeed created a magical alchemy!"

"The old man is stubborn, arrogant, and prejudiced against you. I was wrong."

Miao Feichen knew that he had lost thoroughly, and he didn't shame anymore, "Here, the old man apologizes to you."

With that, Miao Feichen bent down and bowed to apologize.

"I accept your apology."

With Yun Yemeng present, Su Lang didn't intend to be distracted, waved his hand, and let Miao Feichen go.

"In the previous course, the elders also had doubts, so I won't accompany them and leave."

Miao Feichen straightened up, bowed his hands to everyone, and left immediately.

He lost, lost to Su Lang, a junior who was less than twenty, of course he didn't have the face to stay here.

And Su Lang did not stop him, smiled, and looked at Yun Yemeng with a hint of excitement:

"Sect Master, can I give it to my Hall of Fame student status!? There is also, I'm going to Canglan Continent, don't forget!"

[Chapter 328: Hall of Fame student badge](#)

"Hahahaha!"

Yun Yemeng smiled happily, "The kind of alchemy you created is completely enough for me to make an exception to grant you the status of a Hall of Fame student.

From now on, you will enjoy all the benefits of the Hall of Fame students, and you can also travel to the Canglan Continent through the cracks in time and space. "

"That's great!"

Su Lang's eyes lit up, isn't everything he did to go to Canglan Continent?

At this time the goal is about to be achieved, how unhappy he is! ?

"By the way, Sect Master, when can I go to Canglan Continent?"

After a pause, Su Lang continued to ask, "I hope I can go to Canglan Continent as soon as possible."

He can't wait so much, one is for Ji Ruxue and Murong Xianxian.

After all, Chi Zesheng changed, Su Lang didn't want to have any accidents with the second daughter when he arrived in Canglan Continent.

Secondly, the resources of Canglan Continent are extremely abundant, far from Blue Star comparable.

Once he set foot on the Canglan Continent, Su Lang could dispatch the treasure hunting flying flying flying flying to search for more and more precious treasures!

At present, the fierce beasts near the main city of Blue Star have basically been scoured by Su Lang's treasure hunting flying flying strays, and there is nothing to do.

"Do you want to go to Canglan Continent as soon as possible?"

Yun Yemeng was stunned, and said, "You are only at the Martial Commander level now, why don't you improve your realm?"

You know, crossing the cracks of time and space is not an easy task.

Even if you have the formation support, with your Martial Commander-level strength, you will have to suffer a lot! "

An Xin also persuaded: "Yes, Su Lang, have you finished studying those alchemy classics before you learned the king rank..."

"No, no, no."

"I want to set foot on the land of Canglan Continent in the shortest time."

Su Lang shook his head fiercely, his eyes lighted up, and said, "I can't wait any longer, I can bear no matter how hard it is!"

"Since you insist, let it be yours."

After some thought, Yun Yemeng nodded and agreed to Su Lang's request, "It happens that the last time the selected elites are going to Canglan Continent, you join the team and join them."

"Thank you, the master, please arrange it for me!"

There was a surprise in Su Lang's heart, and he quickly handed over to express his gratitude.

"It's the reward you deserve!"

"I will give you the Hall of Fame badge now."

Yun Yemeng smiled and took out a badge, which was not made of gold or wood and covered with mysterious lines, but it looked very strange.

Su Lang swept his eyes and found that this was a special artificially refined material, even if it was a piece of equipment to imitate it was extremely difficult.

At this time, Yun Yemeng took out a special carving knife, and after engraving Su Lang's name on the badge with the secret method, he handed it to Su Lang.

"This is the Hall of Fame student badge!"

Su Lang received the badge, feeling a little excited.

Thinking back a few days ago, when he first went to class on Yangshan, he knew that he would reach this level in a very short time!

However, this time was shorter than Su Lang expected.

"Su Lang, you are so amazing. In this year, other classes have not even started! You have become a Hall of Fame student."

An Xin said sincerely, "In the history of Xuanyuan Martial Arts Academy, you are the first student to enter the Hall of Fame so quickly, it is incredible!"

"Without a mentor, I wouldn't be where I am today."

Su Lang smiled lightly and said modestly, "It's all the tutors who teach well."

"Uh, don't be so poor."

An Xin's face turned red, and she knew that Su Lang could achieve such an achievement entirely on his own.

[Chapter 329: Shocking subpoena](#)

"Hehe."

Su Lang smiled and turned to look at Yun Yemeng with a happy expression, "Sect Master, when shall I go to Canglan Continent?"

"The time will be at ten o'clock tomorrow morning, and the place is here. You bring your badge to go ahead, and I will arrange someone to meet you.

In addition, the location of the space-time crack is very important, you must not leak it out! "

Yun Yemeng took out a map with a route drawn on it, ending at an unnamed peak in the Xuanyuan Mountains.

"I remember!"

Su Lang nodded solemnly, wrote down the map, and threw it into the storage space.

"Well, you worked hard today too, take a good rest."

Yun Yemeng patted Su Lang on the shoulder, and disappeared in place.

Su Lang turned to look at An Xin: "Master, I want to make some preparations for going to Canglan Continent. Tonight... I won't study!"

"Well, you go."

An Xin smiled and said, "By the way, the Hall of Fame students can choose a place to live in Tiansheng Valley, where the spirit is very strong."

"Okay, I know!"

Su Lang nodded with a smile, and then gradually left under An Xin's gaze.

Looking at Su Lang's back, An Xin felt that the intersection between himself and him might not be more.

"He will surpass me soon and go where I can't see..."

Thinking of this, An Xin couldn't help but look sad and stunned.

The other side.

Yun Yemeng flew in the air, suddenly if he felt something, he took out a jade card for transmission.

I saw a sentence written on it: "Anxin disciple Su Lang, suspected to be able to kill Qin Hu in the town of Nanlin, and the martial arts level broke out in Dongfang City. Please tell me!"

This information comes from a certain instructor in the war gate.

The Martial Arts League and Xuanyuan Martial Arts Academy were both established by Yanxingxing, and many instructors of Xuanyuan Martial Arts Academy worked in Martial Arts League.

Su Lang killed Qin Hu in Nanlin City and turned the tide in Dongfang City, both of which were investigated by the Martial Artist Alliance.

In the previous alchemy course, a tutor who worked in the Martial Arts League recognized Su Lang, so he sent a message to Yun Yemeng.

"What!? This is impossible!"

"Unexpectedly, the Wu Zun-level combat power can be exploded, killing dozens of powerful beasts, and saving Dongfang City from distress?"

Looking at the information on the jade card, Yun Yemeng was shocked.

In his eyes, how could Su Lang, a small junior military commander, burst out of the power of Wu Zun?

This has crossed three realms!

What he didn't know was that Su Lang was still a pinnacle martial artist...

"According to my intuition, it must not be Su Lang."

The light in Yun Yemeng's eyes flickered, "But... if you don't have full confidence, they will definitely not deliver the information to my hands, let me decide.

In other words, Su Lang really did it! Hiss, this little guy is so strong! ? The hiding is so deep, no wonder he is not afraid to travel through the cracks of time and space at all. "

Yun Yemeng's heart was full of horror.

Immediately, his thoughts flowed: "Su Lang is such a genius, his identity is mysterious, and he has to go to Canglan Continent through the cracks in time and space. This is a bit unusual and suspicious.

But what he did-Dongfang City turned the tide and started teaching alchemy, but it was not like a traitor in the Fengling clan.

Forget it, don't bother to think about it, anyway, to enter the cracks of time and space, you have to experience the heart stone, whether it is a traitor, you can tell at a glance. "

After thinking for a while, Yun Yemeng replied with a message: "Temporarily stop investigating Su Lang."

"Yes!"

at the same time.

News of the Battle of Xishan also spread throughout the main city of Blue Star!

Almost everyone in the streets and lanes is talking about the Wuzun-class battle that took place in Xishan.

[Chapter 330: Jin family secret meeting](#)

"You don't know, I was not far away at the time! I was a good boy, the colorful sword light seemed to cut through the sky, scared my soul to fly!"

"What happened later? It's a shame that I didn't witness this kind of battle up close."

"Later? No later! The colorful sword light broke out and everything died. Xishan left a big pit. It is said that the meeting halls of the four Xishan houses instantly evaporated, and the two great martial arts died on the spot!"

"The two great martial arts died on the spot!? Oh my god, how could this happen? Aren't all martial arts fighting? A battle of the same level was finished in one move?"

"Yeah, that third mysterious martial master is too powerful, and he used his own power to kill two masters of the same level!"

"With such existence, is it already approaching the realm of the Valkyrie!"

"Perhaps it is, but it is not the most important thing. The most important thing is why this battle broke out?"

"Yes, right, right, the Wuzun level civil war hasn't erupted for hundreds of years, so why did it suddenly start? And it was the famous Xishan Four that died out."

"I don't know, but the secret behind this is absolutely terrifying!"

"..."

The warriors talked a lot, while horrified at Su Lang's strength, while guessing the reason for the outbreak of the war.

It's just that they couldn't think of breaking their heads. This war broke out because of a few words!

Not only these ordinary warriors can't think of it, but those great families, the Hidden Ancient Clan, and even the warrior alliance are also puzzled!

The Golden Dragon Mountain Range, where the Golden House of the ancient family of hermits is located.

Somewhere in the mountains, in a secret room, there are eleven figures sitting around a long table.

Each of these eleven figures exudes a terrifying martial arts-class aura.

Especially the rickety figure sitting at the top, turned out to be a quasi-god-level powerhouse!

"Jin Wubai is dead! Zhou Mihe is also dead! He was beheaded by a sword!"

"Damn it, you can kill two martial arts with a single sword, and it is still a top-notch technique, not even a king-level technique. At least a high-level martial arts can do it."

"Dare to do it outrageously, this guy's identity is definitely not simple, could it be...is it the Martial Arts Alliance?"

"Warrior League!? Maybe it really is! In this Blue Star, who would dare to attack our Jin family? Even the Li family and the Wei family would definitely not dare!"

"If it is really the Martial Artist Alliance... then it means that we have shown our feet!"

"The matter between us and the Fengling Race has been exposed!? No, it is absolutely impossible. How can we expose if we are so concealed!?"

"The mystery of martial arts is endless. The Martial Arts Alliance must have known our plan through some unknown means, **** it..."

"..."

All the Jin family warriors talked a lot, and there was a trace of anxiety between their words.

And from the words they talked, we can also see some clues-they have secretly taken refuge in the Fengling Race!

The gangster of the Fengling clan who had made a lot of noise before, turned out to be one of this powerful ancient clan!

Such a horrible truth, if it were to be told, I don't know how many people would feel that the sky was falling.

"Okay, give me peace."

Suddenly, the rickety figure sitting on the top spoke.

His voice was very small, almost inaudible, but the other ten figures closed their mouths in an instant.

Therefore, that rickety figure is the strongest of the Jin family, the super ancestor who has lived for more than a thousand years, Jin Yuanji!

In the hearts of everyone in the Jin family, he is God!
